How long have you been in business and how did you get started?

I have worked in plumbing service since I was 17 years old for a family business. I am a master plumber and opened Plumb Krazy in Lexington about 14 years ago.

What is the most challenging thing about owning your own business?

The most challenging aspect of owning a business is generating profits while still focusing on customer needs. Word of mouth always travels the farthest and I try very hard to keep all of my customers happy.

What unique product or services does your business provide?

We offer a home plumbing inspection that will tell the homeowner where they can make changes within their plumbing system to be more energy efficient and to save money on their utility bills.

What does winning The Best Of Lexington mean to your business?

I have tried for over 14 years to focus on the Lexington community and utilized the phone book as my first source of advertisement. My wife felt community involvement in the local schools and civic organizations would better benefit our community and raise our market awareness to customers. We have since then worked diligently to become active in community activities and searched for positive publications to help us stay involved. We have been partnering with Lexington Life Magazine and feel that a higher awareness of what we do and who we are has been spread to the public than before. It means a great deal to me and my family to be recognized as the best plumbing company in Lexington because we live and work here and try to be of service to those in need.

Our Heart is with Our Community!
