

# Cisco Cyber Vision Assessment Services

# Benefits

**Asset discovery:** Create an inventory of connected assets in an Industrial Control Systems (ICS) environment, including detailed information on their configurations and vulnerabilities, down to the component level.

**Communication maps:** Identify asset relationships and their communication patterns so you can start segmenting your network and build an effective monitoring strategy.

**Threat detection:** Put together a normal behavior baseline to ensure that your ICS is secure from external threats that could hinder productivity and be detrimental to your company.

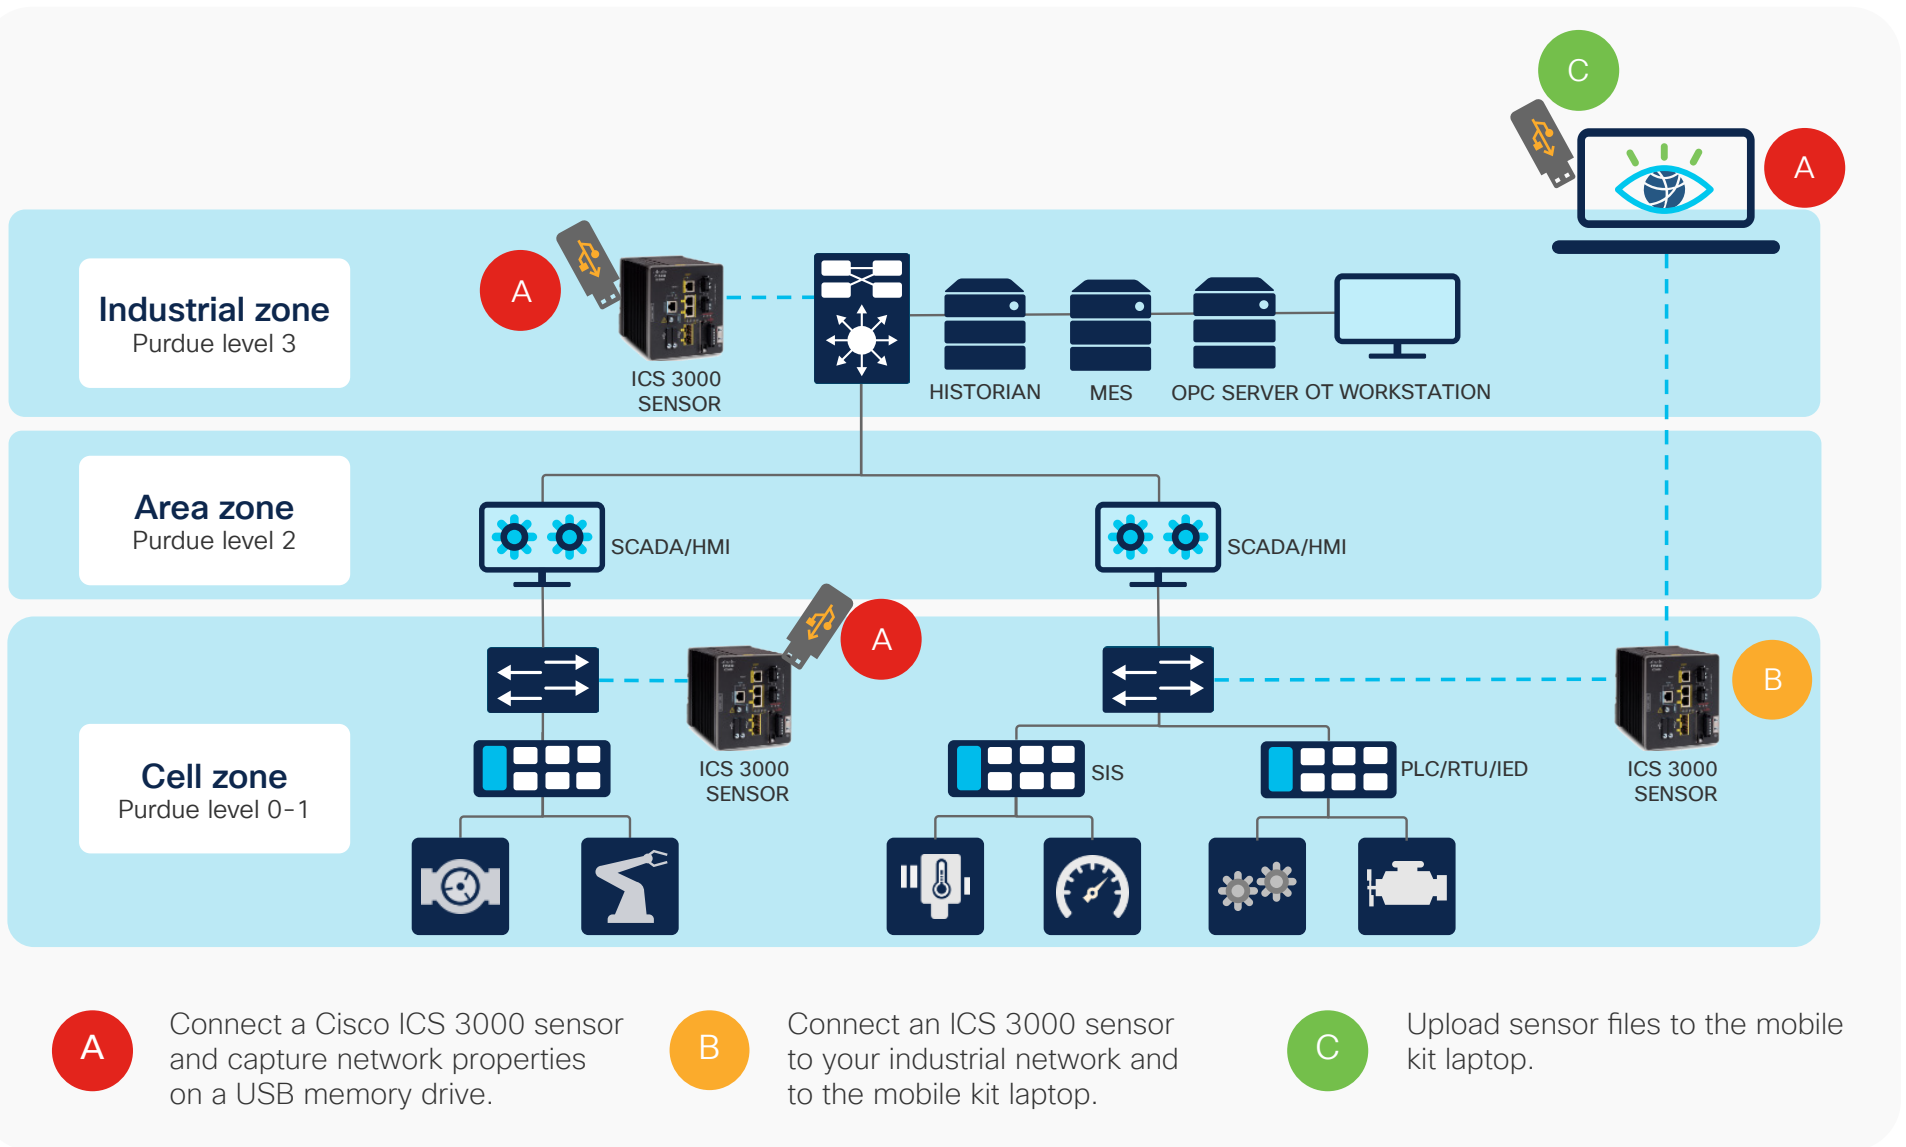

**Actionable insights:** Identify configuration changes and record control system events, and provide recommendations and best practices that are relevant to the integrity of your system.

With CX assessments, our Operational Technology (OT) security experts analyze your ICS network using Cisco® Cyber Vision from a holistic view and get you ready for your OT security journey, no matter what stage you are in.

# Options for gathering network data

Provide a comprehensive picture of your industrial security posture

# Understand and protect your industrial network

Cisco provides two options for customers to choose from. These assessments are carried out using Cisco Cyber Vision Mobile Kits as applicable.

# Make OT security your top priority

Protecting your industrial network requires visibility into equipment. This comprehensive test service is the first step to build an OT security strategy, and to fine-tune asset configurations and improve the overall performance of your industrial OT network. Our OT security experts powered with Cisco Cyber Vision will lay out a step-by-step roadmap with a wealth of information that is critical for the continuity and integrity your industrial process.
