Four oral areas

How to use

1. Wet the toothbrush head, and squeeze appropriate toothpaste on it.
2. Place the bristles on the teeth of the 45 degree angle aligned with the gum line.
3. Press ON/OFF button, brush start working or stop working.
4. You just gently move the bristles to place where need to clean, The pressure should be within 150g (Sonic toothbrush is to rely on high-frequency vibration of the bristles to clean the mouth, so when brushing teeth, the using force teeth is much smaller than ordinary, about 1/8 or so can)
5. Dentist advice that the oral cavity is divided into 4 areas(as shown above), slowly brushing the toothbrush during the brushing process to ensure that each area has about 30 seconds of cleaning time, the machine has a 30-second area reminder function, every 30 Seconds will be suspended for 0.5 seconds to remind you to replace the area to brush your teeth.,
6. Press on/off button, brush start working, then press button keeping three seconds to stop working. This toothbrush has six brushing modes: clean (Strong/weak), soft(Strong/weak), whiten(Strong/weak). You can press the one to work mode selection to own needs. This toothbrush also has a memory function working mode, next time you use the brush, directly into the mode you has used, no need to adjust.

Product Features

1. High-frequency sonic vibration: 31,000 times per minute high-frequency acoustic vibration, just 15 days, you can remove the stains (including tea stains, smoke stains), to achieve whitening effect
2. Ergonomic design: waterproof non-slip, feel comfortable, safe and reliable
3. USB fast charge design ,Unplug the waterproof plug at the bottom of the toothbrush. Plug the DC plug of the charging cable into the charging port at the bottom of the toothbrush before inserting it, and then insert the USB plug into the computer or the USB plug on the 5V.
