THE NISSAN ARIZONA TESTING CENTER

Think your drive is tough? Welcome to one of the most challenging places on earth. We test day and night, in scorching heat, freezing cold, on high-speed ovals and in torturous road conditions. But the results are worth it – the most rugged commercial vehicles you can buy.

SALT SPRAY TUNNEL

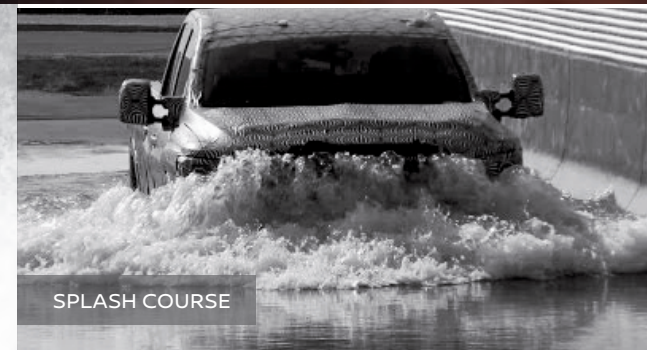

HEAT CHAMBER

To see how far we go to create a vehicle you can trust, go to bit.ly/ncvdqr19

SO YOU CAN BE CONFIDENT MILE AFTER MILE

When it comes to making the toughest commercial vehicles you can buy, there's only one road to success. Exhaustive testing, testing, and more testing. Over 535,000 miles and 6,600 quality and durability tests, and it's no Sunday drive, either. We simulate years of corrosion in our salt spray tunnel. We then crank up the heat to 140 degrees and humidity to 95% in our heat chamber, recreating extreme climates. Our vehicles are also put through their paces on a challenging splash course, then pounded around the track, including on a specialized frame twist segment, to ensure they'll hold up to years of abuse.

Do we really need to go to such extremes, just to make a Nissan Commercial Vehicle the best you've ever owned? Yes, because every day, you depend on your vehicle to do your job. That's the motivation for us to do ours.
