

TEREX[®]

Parts Manual

AL8000HT[™]

First Edition
Rev A
Part No. 116477
September 2008

Introduction

Important

Read, understand and obey the safety rules and operating instructions in the appropriate Operator's Manual on your machine before attempting any maintenance procedure.

Basic mechanical, hydraulic and electrical skills are required to perform most procedures. However, several procedures require specialized skills, tools, lifting equipment and a suitable workshop. In these instances, we strongly recommend that maintenance and repair be performed at an authorized Terex dealer service center.

Technical Publications

Terex has endeavored to deliver the highest degree of accuracy possible. However, continuous improvement of our products is a Terex policy. Therefore, product specifications are subject to change without notice.

Readers are encouraged to notify Terex of errors and send in suggestions for improvement. All communications will be carefully considered for future printings of this and all other manuals.

Serial number is stamped into frame.

Safety Rules

Danger

Failure to obey the instructions and safety rules in this manual and the *Terex AL8000HT Operator's Manual* on your machine will result in death or serious injury.

Many of the hazards identified in the operator's manual are also safety hazards when maintenance and repair procedures are performed.

Do Not Perform Maintenance Unless:

- You are trained and qualified to perform maintenance on this machine.
- You read, understand and obey:
 - manufacturer's instructions and safety rules
 - employer's safety rules and worksite regulations
 - applicable governmental regulations
- You have the appropriate tools, lifting equipment and a suitable workshop.

Personal Safety

Any person working on or around a machine must be aware of all known safety hazards. Personal safety and the continued safe operation of the machine should be your top priority.

Read each procedure thoroughly. This manual and the decals on the machine, use signal words to identify the following:

Safety alert symbol—used to alert personnel to potential personal injury hazards. Obey all safety messages that follow this symbol to avoid possible injury or death.

▲ DANGER

Indicates an imminently hazardous situation which, if not avoided, will result in death or serious injury.

▲ WARNING

Indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.

▲ CAUTION

Indicates a potentially hazardous situation which, if not avoided, may cause minor or moderate injury.

NOTICE

Indicates a potentially hazardous situation which, if not avoided, may result in property damage.

Be sure to wear protective eye wear and other protective clothing if the situation warrants it.

Be aware of potential crushing hazards such as moving parts, free swinging or unsecured components when lifting or placing loads. Always wear approved steel-toed shoes.

Workplace Safety

Be sure to keep sparks, flames and lighted tobacco away from flammable and combustible materials like battery gases and engine fuels. Always have an approved fire extinguisher within easy reach.

Be sure that all tools and working areas are properly maintained and ready for use. Keep work surfaces clean and free of debris that could get into machine components and cause damage.

Be sure any forklift, overhead crane or other lifting or supporting device is fully capable of supporting and stabilizing the weight to be lifted. Use only chains or straps that are in good condition and of ample capacity.

Be sure that fasteners intended for one time use (i.e., cotter pins and self-locking nuts) are not reused. These components may fail if they are used a second time.

Be sure to properly dispose of old oil or other fluids. Use an approved container. Please be environmentally safe.

Be sure that your workshop or work area is properly ventilated and well lit.

Parts Stocking List

Required Parts

The following parts are required to perform maintenance procedures as outlined in the *TEREX AL8000HT Parts and Service Manual*.

Description	Part No.
Kubota Models	
Oil Filter	866050
Air Filter	866127
Fuel Filter	839200
V-belt	839209
Isuzu Models	
Oil Filter	868075
Air Filter	834460
Fuel Filter	868137
V-belt	868067

Manuals

TEREX Corporation offers the following manuals for these models:

Title	Part No.
TEREX AL8000HT Operator's Manual, First Edition	114426
TEREX AL8000HT Part's Manual, First Edition	116447
TEREX AL8000HT Service Manual, First Edition	116478
Newage Generator Manual	830001
Leroy Somer Manual	116118
Isuzu Engine Manual	116133
Kubota Engine Manual	893020
Axis Manual	116117
Marathon Manual	116188

How To Order Parts

Please be prepared with the following information when ordering replacement parts for your TEREX product:

- Machine model number
- Machine serial number
- Terex part number
- Part description and quantity
- Purchase order number
- "Ship to" address
- Desired method of shipment
- Name and telephone number of the authorized TEREX Distributor in your area

Genie Industries

18340 NE 76th Street
P.O. Box 97030
Redmond, WA 98073-9730
Telephone (877) 367-5606
Fax (888) 274-6192
genieindustries.com

Use the Service Parts Fax Order Form on the next page and fax your order to our Parts Department.

If you don't know the name of your authorized distributor, or if your area is not currently serviced by an authorized distributor, please call TEREX Corporation.

REV A

97602

WARNING

Explosion Hazard
Death or serious injury can result from the use of either or other high energy starting aids.

Do not use either or other high energy starting aids on machines equipped with glow plugs.

97602 B

114258

DANGER

Burn Hazard
Fuel and fumes can explode and burn.

No smoking. No flame. Stop engine.

114258 A

114431

DANGER

Electrocution Hazard
Death or injury can result from contacting electric power lines. Always contact the electric power line owner. The electric power shall be disconnected or the power lines moved or insulated before machine operations begin.

Maintain required clearance.	
Line Voltage	Required Clearance
0 to 50KV	10 ft. 3.0 m
50 to 200KV	15 ft. 4.6 m
200 to 350KV	20 ft. 6.1 m
350 to 500KV	25 ft. 7.6 m
500 to 750KV	35 ft. 10.6 m
750 to 1000KV	45 ft. 13.7 m

114431 A

133164

NOTICE

Component Damage Hazard.
Damage to equipment may occur if tower is operated with travel lock pin in place. Remove travel lock pin before operating hydraulic tower.

133164 A

133020 / 133097 (AUS)

Tires
Size: ST205/75R15 Load C
Lug Nut Torque: 80 ft-lbs / 108 Nm
Tire Pressure: 50 psi / 3.4 bar

133020 A

114463

INSTRUCTIONS

Set up
Position the light tower at the desired work site. Chock the wheels.
Disconnect the trailer lights and safety chains.
Pull release pin on the tongue jack and rotate into place.
Turn the jack handle to lower the foot pad and raise the tongue of the machine enough to clear the tow vehicle.
Release spring pin on the front and back outriggers and slide each outrigger out until spring pin engages. Rotate outriggers into position.
Turn the outrigger jack handles to level the machine. Level the machine using only the leveling jacks.
Drive the grounding rod into the ground and attach to grounding lug on chassis near base of tower.

Transport
Make sure the travel lock pin is securely locked in place.
Make sure the doors are closed and secured.
Pull release pin on each outrigger and slide into stowed position. Make sure the spring pins lock securely in place.
Raise the tongue of the machine by turning the tongue jack handle.
Position the transport vehicle under the coupler on the tongue of the machine.
Open the latch on the coupler.
Turn the tongue jack handle to lower the tongue.
Close the latch on the coupler.
Rotate the tongue jack to the stowed position and secure with the lock pin.
Attach the safety chains (if required).
Connect and test the trailer lights.

DANGER

Failure to read, understand and obey the operator's manual and the following safety rules could result in death or serious injury.

Improper Use Hazard
The operator is responsible for safe machine operation. This includes:
1. Avoid hazardous situations.
2. Always perform a pre-operation inspection.
3. Always perform function tests prior to use.
4. Inspect the work place.
5. Only use the machine as it was intended.
Do not operate unless:
- You read, understand and obey:
- manufacturer's instructions and safety rules - safety and operator's manuals and decals
- employer's safety rules
- applicable governmental regulations
You are properly trained to safely operate this machine.

Explosion and Fire Hazards
Do not start the engine if you smell or detect diesel fuel or other explosive substances.
Do not refuel with the engine running.
Refuel machine and charge battery only in an open, well-ventilated area away from sparks, flames and lighted tobacco.
Do not operate in hazardous locations or locations where potentially flammable or explosive gases or particles may be present.
Do not spray ether into engines equipped with glow plugs.

Electrocution Hazards
Machine is not electrically insulated and will not provide protection from contact with or proximity to electrically charged power lines.

Do not connect wires directly to the generator. Connect auxiliary equipment only to the power outlets provided.
Do not raise light tower near any overhead power lines.
Maintain required clearances in accordance with applicable governmental regulations and the following chart.

Line Voltage	Required Clearance
0 to 50KV	10 ft. 3.0 m
50 to 200KV	15 ft. 4.6 m
200 to 350KV	20 ft. 6.1 m
350 to 500KV	25 ft. 7.6 m
500 to 750KV	35 ft. 10.6 m
750 to 1000KV	45 ft. 13.7 m

Allow for tower movement and electrical line sway or sag, and beware of strong or gusty winds.
Keep away from machine if it contacts energized power lines. Personnel must not touch or operate machine until energized power lines are shut off.
Do not operate during lightning or storms.
Do not use machine as a ground for welding. Machine should be grounded in accordance with all local electrical codes. Consult local electrical codes or Authority Having Jurisdiction in the area where machine will be used for specific requirements.

Do not service or replace the lamps with the engine/generator running.
Component Damage Hazards
Do not turn the lights on unless the engine is running. Always turn the lights off before shutting down the engine.
Do not use a damaged or malfunctioning machine.
Do not tow light tower when lamps are hot. Hot lamps will break if moved.
Be sure all decals are legible and in place.
Tip-over Hazards
Do not raise tower unless all outriggers are properly deployed, foot pads are in firm contact with ground and machine is level.
Do not set machine up where it cannot be leveled using only the leveling jacks.
Do not hang any objects from lights or tower.
Do not raise or extend tower when wind speed may exceed 62 mph / 100 km/h.
Do not move machine while tower is raised.
Do not adjust or stow outriggers while tower is raised.
Do not place ladders or scaffolds against machine.
Do not use tower to raise material or personnel.
Do not alter or disable machine components that affect stability or safety.

Collision Hazard
Check work area for overhead obstructions or hazards.
Burn Hazard
Do not touch lamp fixtures when lights are turned on. Turn lamps off and allow to cool before touching.
Crushing Hazards
Do not lower tower unless area is clear of personnel and obstructions.
Keep hands away from potential pinch points.
Towing Hazards
Do not tow machine unless tower is fully retracted and lowered.
Do not tow machine unless travel lock is securely in place.
Do not tow machine unless all outriggers have been retracted and stowed.
Do not load cargo on the light tower. The light tower is not designed to carry any extra cargo.
Be sure safety chains (if required) are securely attached to the tow vehicle.
Be sure that all driving lights are operational. Be sure all lights, mirrors and hitch components conform to federal and local regulations.
Do not tow on public roads unless the machine meets all governmental regulations for towing.
Do not exceed maximum towing speed: 60 mph / 97 km/h.

WARNING	
Improper operation or maintenance can result in serious injury or death.	Read and understand operator's manual and all safety signs before using or maintaining machine. If you do not understand the information in the manuals, consult your supervisor, the owner or the manufacturer.

31788

DANGER	
	Explosion / Burn Hazard Ignition of explosive gases or contact with corrosive acid will cause death, burns or blindness
	Keep all open flames and sparks away. Wear personal protective equipment, including face shield, gloves and long sleeve shirt.
	READ MANUALS Read all manuals prior to operation. DO NOT OPERATE equipment if you do not understand the information in the manuals. Consult your supervisor, the owner or the manufacturer.

72019

DANGER	
	Electrocution Hazard Exposure to electrical wires will cause death or serious injury.
	Only trained and qualified maintenance personnel may access this compartment.

133012

DANGER	
	Burn / Carbon monoxide hazard. Hot exhaust can contain carbon monoxide that will result in death or serious injury.
	Do not touch hot surfaces or breathe exhaust. Wear protective gloves when handling hot parts. Read the operator's manual.

28161

WARNING	
	Crush Hazard Contact with moving parts can result in death or serious injury.
	Keep away from moving parts.

133017

WARNING	
	Crushing Hazard Contact with descending tower could result in death or serious injury.
	Keep away from machine when tower is being lowered.

California Proposition 65

Warning

The exhaust from this product contains chemicals known to the State of California to cause cancer, birth defects or other reproductive harm.

Towing Checklist

(Use at each stop)

Before Towing

- Boom hold-down latch is securely locked in place
- Towing hitch is properly secured to tow vehicle
- Safety chains (if required) are properly attached and secure (chains are crossed below hitch)
- All lights are connected and working
- Tires are properly inflated

Before Driving

- Fasten safety restraints
- Properly adjust mirrors

On The Road

- Do not exceed 60 mph / 97 km/h. Obey all local and national towing speed laws
- Check connections and tire pressure at each stop
- Slow down for hazardous conditions
- Allow extra distance for following and passing other vehicles
