Important Health Warning About Playing Video Games

Photosensitive Seizures

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these "photosensitive epileptic seizures" while watching video games.

These seizures may have a variety of symptoms, including lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms—children and teenagers are more likely than adults to experience these seizures. The risk of photosensitive epileptic seizures may be reduced by taking the following precautions: Sit farther from the screen; use a smaller screen; play in a well-lit room; and do not play when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

GAMEPLAY CONTROLS

Roll the dice	A
Menu selection	Move  to choose an option and press A

For minigame controls, see the *Minigame* section, and for trading controls, see the *Trading* section of this manual.

WWW.MONOPOLY.EA.COM

PLAYING THE GAME

The world's favorite board game is now available with an entirely new way to play! In addition to wheeling and dealing with the classic real estate tycoon battle, you can now play a super-fast version of *MONOPOLY* in the new Richest Edition mode. Choose one of three different settings to compete in a variety of fun minigames, acquiring properties on the board along the way, to see who can get rich the quickest. With each game you play, you'll get stamps in your passport. Fill your passport to unlock and play cool new boards. Get ready for a whirlwind of buying, selling, and squeezing every last cent out of your opponents!

To start, choose the flag that corresponds to the country whose language you'd like to use.

Your Profile

Two of the nine themed boards are available from the start of the game, and each time you add a property to your portfolio, your passport gets a stamp. Once you've earned enough stamps, you earn a brand-new board to play on. Soon you'll be visiting the next century on the future board, or dining out on the cheese board! As you advance, you will need to acquire more and more stamps in order to earn the later boards. So, make sure you remember to review your passport in the Choose Board screen to check on your progress and see those properties you've yet to earn stamps for!

MAIN MENU

Press **Start** to access the main menu.

MONOPOLY EDITION

Play the classic board game.

RICHEST EDITION

This new mode delivers big on fun in a fast, high stakes battle to become the richest!

MINIGAMES

Practice all the minigames you've unlocked in the Richest Edition.

OPTIONS

Turn subtitles on or off.

GAME SCREEN

Each player's cash or total worth (depending on game mode).

Quickly see who's in the lead by the amount of coins in their corner.

Each player has their own unique color and tab shape to identify them throughout the game.

Tabs on the board match the players' unique color and shape to indicate which player owns each property. When a player owns all the properties in a group, the properties and tabs in the monopoly have gold edges.

Saving and Loading

The game auto-saves by default at the end of each round once a save file is created on the hard drive. You automatically have the option to load the save file the next time you play.

MONOPOLY EDITION

Play *MONOPOLY* just like you remember it! The rules for this mode are the same as the classic board game, or customize your play with the different house rules available. On your turn, roll the dice by pressing **A**. Your token moves clockwise the number of spaces corresponding to your dice roll. If you roll doubles, you get to go again, but if you roll three doubles in a row, you'll be sent to jail! Players start with a small fortune to pay their way around the board. As you move, you pass GO and collect your salary, buy properties, charge rent, or trade with competitors to amass monopolies. If you have a monopoly, you can build houses or hotels in order to charge the highest rent possible and drive your opponents out of business. If you're the last player with money after all the others have gone bankrupt, you win!

NOTE: The M in Monopoly Edition represents millions, while the K represents thousands.

CHOOSE BOARD

Any themed boards you've unlocked with your Passport are available to use. Press **A** on PASSPORT to see how many stamps you need to reach your next renewal.

CHOOSE HOW MANY CONTROLLERS YOU WANT TO USE

You can play "hotseat" style with just one controller, or each player can play with their own controller, up to a maximum of four.

PLAYER SETUP

Choose to enter your player name and select your token. Then set opponents to either CPUs of various difficulty or humans.

House Rules

Should tax money go into the Free Parking pot? Do players have to evenly distribute houses among the properties in a monopoly before building hotels? Play how you like by tweaking the list of HOUSE RULES, accessible via the Who's Playing? summary screen. Simply highlight your choice and press **←** or **→** (or move **↑** **↓** or **↔**) for options that sound good. Select OK to confirm.

NOTE: House Rules reset with each new game, but are retained if you save a game mid-way through.

WHEN YOU LAND ON...

Most of the spaces around the board are properties you can buy or sell in your quest for real estate domination, but some have other effects. The list below explains the possible outcomes depending on where your playing piece stops. Note that this list does not include spaces where nothing happens. Free Parking, for example, only has an effect if you add a specific House Rule.

UNOWNED PROPERTY

You can choose to buy the property or put it up for auction. When someone else passes on a purchase, you can bid in the auction by pressing **A**. The more property you own, the more rent you can collect!

OWNED PROPERTY

You owe rent, which can be very expensive if the property is part of a monopoly improved with houses or a hotel.

YOUR OWN PROPERTY

You do not have to take any action, however, at the end of your turn, you may go to your Accounts screen and purchase houses or hotels for monopolies. Improving your lot with buildings increases the rent other players have to pay when they land there.

NOTE: You need four houses per property in a monopoly before you can buy a hotel. The rent on transport properties (e.g., train stations) goes up as you gain control over more of them. Utility charges are multiples of die rolls with extra rent if you own both of them.

FREE PARKING

It's free! Nothing to buy, nothing to pay—it's just a free place to park. And if you're playing with house rules, you may even get a windfall payout from the bank!

GO TO JAIL

Go directly to jail, and do not pass GO! Spend three turns languishing behind bars unless you roll doubles, use a Get Out of Jail Free card, or pay the bail.

GO TAXES

Pass or land on this space to earn your salary. Sorry but everyone has to pay taxes at some point. Give the corresponding amount to the bank.

COMMUNITY CHEST CHANCE

Draw a Community Chest card, and anything can happen. These cards can really shake up the game.

Draw a Chance card. You might get lucky and pull out a Get Out of Jail Free card.

ACCOUNTS

At the end of your turn you can choose to view your current Accounts. This screen shows the board with the properties you own highlighted. If you want to mortgage or build on your properties, select them and press **A** to see your options. To enter trading mode, select the TRADE option and press **A**.

TRADING

If you notice another player owns a property you'd like to have for yourself, see if you can make it worth their while to do business with you.

Select any properties you wish to include in the trade by moving **1** to highlight the property squares on the board and pressing **A**. A checkmark means the property will be included in the trade.

If you wish to include money, select the ADD CASH or REQUEST CASH options next to the player icons and press **A**. You can now adjust the amount that is included in the deal.

You can also include Get Out of Jail Free cards. Simply select the card near your name and press **A** to include it in the deal.

To close the deal, select the PROPOSE option and press **A**.

If you want to cancel the trade, select the CANCEL option and press **A**.

RICHEST EDITION

Don't have time for a full game of *MONOPOLY*? Richest Edition takes the cash out of the equation and features streamlined, minigame-oriented play that you can finish in just 30 minutes.

Choose a mode based on how much time you want to spend:

DEVELOPER

The quickest fix. Just six rounds, no trading. Who can become the richest player in just 30 minutes of play? This one is all about the property—who can amass and hold onto the biggest property empire?

INDUSTRIALIST

This version of Richest Edition is slightly longer, with nine rounds of play, lasting about 45 minutes. Community Chest cards could really affect the state of play, and special spaces, such as Free Parking and Go to Jail help keep you out of (or in) trouble!

TYCOON

You'll need about an hour to play this longest Richest Edition game at twelve rounds. All Community Chest events and special spaces are fully active, and every three rounds, a trading session occurs.

NOTE: Each player must have their own controller to play Richest Edition.

HOW TO PLAY

Forget what you know about playing classic *MONOPOLY*—Richest Edition is something completely different! The aim of the game is to acquire the most assets at the end of the allocated number of rounds. Each round starts off with four dice being automatically rolled. All players then take part in a minigame, and the winner of the minigame is granted first choice of the four pre-rolled dice.

Once you've selected your pre-rolled die, you don't move one token around the board like you might expect. Instead, the number you've picked determines the amount of tokens you get placed randomly around the board for that turn. The spaces you ended up landing on are displayed like a hand of cards and disappear when the tokens are placed. Once each player has chosen a die and received their tokens, the rest of the action starts.

Mr. Monopoly runs clockwise around the board, starting at GO. Every time he reaches a player's token, he lets you know what happens next. The various results of landing on each space are explained below.

No money at all is used in Richest Edition, as you acquire properties simply by landing on them. If you land on someone else's property, you'll need to give up one of your own to pay them rent. Your wealth is determined by the total value of your properties, including multipliers for owning a monopoly, or houses. Your total net worth is shown in your corner of the screen as your score. In practice, the economy is entirely barter-based. Watch out for quick shifts of fortune caused by Community Chest and Chance cards, and try your hardest to get a monopoly and start building houses. Whoever is richest at the end of the game wins.

NOTE: To skip the Richest Edition introduction, press **A**.

WHEN YOU LAND ON...

UNOWNED PROPERTY

The property is automatically yours. Get as many as you can!

OWNED PROPERTY

You owe rent, which you pay by handing over one of your own properties, or giving up a set of houses. The more developed the property you landed on, the higher the rent.

YOUR OWN PROPERTY

Nothing happens, unless that property is part of a monopoly. If it is a monopoly, then a set of houses or hotels is built across the whole monopoly and if you've already got a set of houses, then you'll build hotels! Once you've built hotels, the property is locked as yours. They are immune from being paid as rent, but they can be destroyed in a Community Chest event.

JUST VISITING

Skip out on rent for the rest of this round, even if one of your other tokens lands on someone's space. Your property is safe!

FREE PARKING

You can move one of your remaining tokens to another unoccupied square, to either avoid paying rent or perhaps pick up another property!

GO TO JAIL GO

Pay the bail of three properties to get out of jail.

TAXES

Choose any unowned property to add to your portfolio.
Return a property as tax, or in the case of an Income Tax, you'll need to give back one property for every four you own.

COMMUNITY CHEST

Different effects occur depending on which variant of Richest Edition you're playing in. In Developer mode, for example, the poorest player can steal their pick of three properties from the other players.

CHANCE

Steal a property from someone richer than you or build houses on a monopoly you own.

TRADING

Trading in Richest Edition's Strategic mode is slightly different than in Monopoly Edition, since there isn't any cash. To make a trade, select the player you'd like to trade with and then choose the properties (yours and theirs) to include in the trade. To propose the trade, select the PROPOSE option and press **A**. To accept another player's trade, select the DEAL option and press **A**, or decline it by selecting the CANCEL option and pressing **A**. Every player gets a shot at making a trade, so you can always try to get the right deal for you.

MINIGAMES

You can access the 12 quick, competitive Richest Edition minigames from the main menu once you've played them in a regular game. The instructions for each minigame also appear on-screen, but here they are for quick reference:

Get Out of Jail

The first person to escape wins. Saw through the bars on your cell window by moving **⬅** quickly **⬆** and **⬇**. Press **A** to switch between sawing horizontally or vertically, depending on the orientation of the bars.

Go to Jail

Make a get-away with your money bag by moving **⬅** **⬆** and **⬇** to run. Press **A** to jump over obstacles.

Pay Hospital Bill

Somehow Mr. Monopoly managed to fall out of his ambulance. Be the first player to chase it down by moving **⬅** **⬆** and **⬇** as fast as you can.

Pay Doctor's Fee

Be the quickest X-ray technician to win. Use **⬅** to guide the X-Ray target to the body parts listed in your corner of the screen. When the controller vibrates, press and hold **A** until the circle's rim fills to take an X-Ray.

Take a Ride on the Reading

Make all your stops in the least amount of time to win. Hold **A** to accelerate, and press **⬅** to brake. Your train needs to pull up right in front of the station for the stop to count.

Elected Chairperson of the Board

Collect the ballots that correspond to your color as they fly across the screen. Move **⬅** to guide the hand cursor over a ballot and then quickly press **A** to make the vote count. Whoever captures the most votes, wins. Be careful not to vote for your rivals!

Sale of Stock

Be a master market predictor to win. Move **⬅** to point your arrow above or below the current stock price line to guess whether it will go up or down. Careful, just because it looks like there's a good chance the stock will go up, doesn't mean it will!

Advance to GO

Race your truckload of money to the GO space. Steer with **⬅** to avoid obstacles in the road. Watch out for the warning signs!

Christmas Fund Matures

Stuff your stocking faster than the other players. Guide your hand with **⬅**. Then press and hold **A** to grab any present. Drag it above your stocking and drop it in. Once your stocking is overflowing with presents, press **A** repeatedly to tap the top present inside.

Pay School Tax

Pack up your book bag before everyone else to win. Guide your hand with **⬅** and press **A** over a book of your color to pick it up. Drag it to the arrow above your book bag to drop it in automatically. Once your bag is overflowing, move **⬅** **⬆** and **⬇** to tap the top book inside.

Bank Pays You Dividends

Throw all your moneybags in your vault first to win. Guide your hand with **⬅** stick and hold **A** to grab one of the money bags that matches your color. Then drag the colored arrow to point at your vault and let go of **A** to throw the bag in.

Advance to the Nearest Railroad

Race to the railroad on a pump-handled cart. Move **⬅** **⬆** and **⬇** to pick up speed. If you pump too quickly, your wheels lose traction and spin in place, so start slow and build up the pace gradually.

FAMILY SETTINGS

These easy and flexible tools enable parents and caregivers to decide which games young game players can access based on the content rating. For more information, go to www.xbox.com/familysettings.

HINTS AND TIPS

- In Richest Edition, choosing the die number can be pretty important. In the beginning of the game, take the highest number in order to land on and acquire as many properties as possible. Later, your strategy depends on how much property you already own. Taking a six when you don't have much property increases your risk of paying rent and losing what little you have, while taking a six if you have a lot of property means you'll have more chances to improve your lots with houses or hotels.
- The minigame difficulty is skewed dynamically in favor of the poorer players. Richer players need quicker reflexes to overcome extra obstacles. For instance, in the Get Out of Jail game, the richer you are, the more bars you have to cut through to escape.
- You can skip Mr. Monopoly's speech by pressing **⏏**.
