ENVIROALERT® EA800-ip

Network IP Critical Condition Monitoring Solution for Asset Protection

The EnviroAlert EA800-ip provides two-way access to remotely monitor, collect and view real-time data from up to eight sensors for temperature, humidity, water, gases, pressure and dry contacts. Sensor settings may also be modified via an IP connection eliminating the need for on-site adjustments or a service call. Industries that benefit from 24/7 peace of mind include medical, pharmaceutical, HVAC, food service, high tech and more.

Wireless and hardwired sensor probes detect temperature, humidity, water presence, power failure, gases, pressure, dry contact and more (sensors sold separately).

APPLICATION EXAMPLES

The EA800-ip is designed for use in a variety of applications, including Grocery and Convenience Store Coolers and Freezers; Laboratories, Pharmacies, Hospitals and Clinics; Restaurants, Commercial Kitchens and Institutional Food Storage; Computer and Electronics Rooms, Cell Tower Sites, and HVAC; Factories, Refineries and Warehouses; Greenhouses, Grain Elevators and Livestock Buildings; Residential Basements, Garages, Kitchens, Laundry Areas and Vacation Homes.

The EnviroAlert EA800-ip offers:

- Ethernet connectivity
