PRODUCT DESCRIPTION

Slim Cycle - exercise bike, recumbent bike and upper body trainer in one

The unique combination of cycling and rowing is what makes Slim Cycle a 3-in-1 exercise bike an effective aid for cardio and strength training. Slim Cycle can be transformed from an exercise bike into a recumbent bike with a single movement. The 8 adjustable pedal resistance levels, together with a rowing unit comprising 3 strength levels, offers a uniquely versatile whole-body and fitness training. The comfortably padded XL seat ensures maximum comfort, while the soft backrest provides extra support and stability. Information on heart rate, training distance, speed and calorie consumption are transmitted directly to the training computer via the handles, which are fitted with the integrated heart rate monitor. In addition, Slim Cycle features a whisper-quiet pedal system, as well as a deep step-throw that makes getting on and off easier. Also, the Slim Cycle is easy to fold and can be stowed away with no difficulty at all, thanks to its transport rollers. User note: Maximum user weight 136 kg.
