

KÄRCHER

**CLEANLINESS IS
ALWAYS IN
SEASON.**

PROFESSIONAL | HOSPITALITY

THE BEST-KEPT HOTELS IN TOWN

Sustainable hygiene management is now a standard practice in the hotel and restaurant business. It improves the wellbeing of guests and reflects the self-image of the business. In addition, professional maintenance extends the service life of the facilities. Cost-conscious managers invest in Kärcher cleaning systems because they are economical in use, intuitive in operation and extraordinarily long-lasting.

WELCOME YOUR GUESTS WITH CLASS AND STYLE.

The name Kärcher is a synonym for high performance, quality and innovation worldwide. For cleaning expertise that sets standards. For the hotel and hospitality industry, the Kärcher system offers outstanding solutions for all requirements: perfectly balanced machines, accessories and cleaning agents. Top-performing, efficient and economical thanks to innovative technology, low consumption and durability. Inconspicuous and stylish in classic anthracite. Whisper-quiet.

1 The highest standard of cleanliness

The Kärcher microfiber roller is a state-of-the-art accessory. Unbeatable on fine stoneware tiles, it achieves exceptionally good results on all smooth or lightly textured floors.

2 eco!efficiency – achieve more with less

Efficiency comes in different dimensions. For example: Reduced energy consumption. High-performance internal-combustion engines. Lower cleaning agent consumption. Highly concentrated cleaning agents, to avoid packaging. Environmental design of machines, while minimising components. Effects which can only be achieved through new ideas and innovative technologies and which, above all, require the will and ability to actually carry them out. Kärcher already offers an extensive range of machines and cleaning agents with the eco!efficiency rating.

3 Low operating noise

Thanks to soundproofed motors and optimised flow channels, dry vacuum cleaners from the eco!efficiency range are especially suited for use in noise-sensitive areas or during normal business hours.

4 Quality you can see and rely on

Kärcher products are synonymous with quality. See the ergonomics. Feel the power. We are constantly working on optimising the combination of technology, design and operating convenience. Numerous awards bear testimony to the perfection of our products. What is most important to us is the positive feedback from our highly satisfied customers.

READY TO RECEIVE GUESTS IN STYLE

The first impression counts. This is especially true in the hotel and restaurant business. Cleanliness is the first impression guests have of a hotel. Leading hotels and service providers rely on the world market leader Kärcher for this. From scrubber driers for the foyer to incredibly quiet vacuums for the lobby, Kärcher always has the right cleaning system.

Professional in every detail

Dry vacuums and electric brooms are powerful, compact machines with many practical features.

During business hours

Spray extraction machines are designed to clean carpets and upholstery quickly and thoroughly – also during business hours.

Effortless sweeping

Push sweepers are time-savers when it comes to cleaning small and large areas quickly and thoroughly – plus they are easy on your back.

Discreet, but thorough

Step-on scrubber driers only draw attention due to their easy operation and excellent performance.

1 Retire your broom and dustpan

The cordless EB 30/1 Adv Li-Ion electric broom is ideal for spot cleaning entrances and reception areas. It quickly, quietly and easily pick up loose dirt from hard and carpeted floors, is immediately available when you need it and can be set aside inconspicuously just as easily.

2 Cost effective and technically brilliant

Scrubber driers make floors hygienically clean and give them a brilliant shine. With its high surface pressure, roller brush technology is advantageous for textured or jointed surfaces. Machines with proven disc technology are suitable for smooth surfaces.

3 Saving energy has never been so much fun!

T 12/1 unit has a convenient step-on switch for ease of operation and features two back wheels and two front castors for maximum manoeuvrability

4 Torque conquers dull spots

The BRC 43/500 iCapsol interim carpet cleaning process cleans carpets faster, improves the appearance and keeps the carpet cleaner longer. Cleaning carpet quickly in a 24/7 environment is the challenge you face.

5 Just spray and vacuum for a clean carpet

Ideal for heavily soiled carpeting: Spray-extraction cleaners loosen and remove dirt in a single operation. The spray-extraction function of the Puzzi series is ideal for heavy traffic areas which must be quickly restored to dry, accessible condition.

ONLY THE BEST IS GOOD ENOUGH.

Guests come first. And guests want things clean and quiet – always and everywhere. Cleaning systems for indoor areas must therefore have special characteristics: They must be quiet, easy to transport, ergonomically designed, and usable even in small spaces. These characteristics also make these machines easier to use and more pleasant for the user.

Endless steam
Kärcher steam cleaner with two-tank system for continuous operation without a cool-down break.

Top-class maintenance
Whisper-quiet dry vacuum cleaners such as the T 15/1 and T 12/1 for daily maintenance cleaning.

Clean large areas thoroughly
Dual-motor upright vacuum cleaners with generous working widths clean even large areas in almost no time.

For carpeted areas
Automatic carpet cleaners for thorough, deep carpet cleaning or interim cleaning with encapsulation technology.

- 1 Tip-top carpet appearance**

Upright vacuum cleaners such as the CV 38/2 combine suction with the power of an electrically driven brush. The effect: The pile is raised to allow the vacuum to remove dirt from deep within the pile. The indicator lamp shows the user when the roller brush setting needs to be adjusted to obtain the best cleaning results.
- 2 Because less is more – everything is as it should be**

The T 12/1 vacuum cleaner can be operated with or without filter bag. It features a versatile and highly efficient filter system. After all, cleanliness matters, but so does hygiene. And the antistatic Irgastat bend ensures full suction power for effortless vacuuming.
- 3 Suction tube with extra long hose**

This stand-on vacuum is a high-performance, multi-surface cleaning HEPA stand-on commercial vacuum designed for increased productivity and maneuverability on hard and soft floors. In applications where a sweeper, wide-area vacuum or dust mop can be used, the Chariot 2 iVac ATV HEPA vacuum is all you need.

- 4 The classic solution for edges and corners**

This telescopic manual vacuum tube reaches places the brush can not reach. Overhead cleaning is made easy thanks to the flexible suction hose.
- 5 Take large areas in stride**

The BRS 43/500 iCapsol interim carpet cleaning process cleans carpets faster, improves the appearance and keeps the carpet cleaner longer. Cleaning carpet quickly in a 24/7 environment is the challenge you face.
- 6 The upholstery master**

Puzzi spray-extraction cleaners excel in upholstery cleaning with unbeatable extraction performance for extremely short drying times.
- 7 Remove lime and dirt without chemicals**

Steam cleaners loosen stubborn lime and dirt in bathrooms without cleaning agents, and their ingenious two-tank system eliminates waiting times for water heating. The VapoHydro function allows for the spray jet to be adjusted continuously from hot water to steam.
- 8 Tackle difficult vacuuming jobs**

With its ergonomic strap system, the BV 5/1 backpack vacuum can be carried comfortably on the user's back – ideal for cleaning, e.g. staircases or between narrow rows of seats. Also available as a battery-operated vacuum for even greater flexibility.

PURE RELAXATION

Cleanliness and hygiene have top priority in swimming pool and sauna areas. Without compromise. Kärcher cleaning systems are ideal for cleaning in wellness areas to remove coarse and fine dirt, dissolve limescale and to disinfect. Areas are left not only looking clean, but also being properly hygienic.

1 Quick and clean

The compact BR 30/4 C scrubber drier is the first choice for maintaining floor hygiene in sensitive areas, e.g. barefoot areas. Spray, brush and vacuum in one pass, or separately. Fast and spotless.

2 A multitalent for floors

The BR 40/10 C scrubber drier combines many features in a single unit: It scrubs like a single-disc machine, picks up cleaning solution like a wet vacuum, and polishes like a high-speed machine. Thanks to the positioning of its two suction bars, it can vacuum especially close to the edge. In addition, the squeegees pick up cleaning solution in both directions of travel – forwards and backwards.

3 Environmentally friendly hygiene

Steam cleaners provide impeccable hygiene in saunas without using any cleaning agents. A plus for people and the environment (further information).

4 The multi-talent for mobile use

The AP 100/50 M is a simple and versatile all-in-one solution – suitable for different surfaces. The cleaning fluid can be sprayed on and vacuumed away.

5 Unbeatable cleaning performance

Surface cleaners such as the FR 30 ME deliver ten times more area cleaning performance – indispensable efficiency for cleaning large wellness areas hygienically.

6 Dead zone for bacteria

The Kärcher Inno-Foam kit is a foam system for cleaning and disinfection with a high-pressure cleaner. The disinfecting foam has an especially long adhesion time, which enhances its effectiveness. The dual spray lance is remarkably easy to use, changing between the foam nozzle and the high-pressure nozzle with a flick of the wrist.

Big in small places

Compact scrubber driers deliver top performances in small places – in spas as well as fitness rooms.

Hygiene with high pressure

High-pressure cleaners and surface cleaners, with or without suction, do not give germs a chance.

The 2-in-1 solution

The AP 100/50 M: a combination of high-pressure cleaner and wet and dry vacuum cleaner.

CLEANING ACCORDING TO THE HOUSE RULES

The kitchen is vitally important for the reputation of a restaurant. For official reasons as well, there is no room for doubt that kitchen and restaurant hygiene is the top priority. The Kärcher system offers all the machines, accessories and cleaning agents necessary to maintain stainless steel and other surfaces in clean condition.

- 1 Cordless wet cleaning**
The BR 30/4 C Bp cleans up minor messes in no time. With cordless power instead of an annoying cable. There is no risk of tripping or getting caught somewhere. Nevertheless, this scrubber drier has enough endurance for thorough cleaning.
- 2 Even the machine is hygienic**
Unheated, compact HD 2.3/14 C Ed Food high-pressure cleaner. Designed for universal use in the commercial food industry and equipped with the new EASY!Force high-pressure gun.
- 3 Compact and powerful**
Small, powerful, reliable, extremely versatile and light as a feather: Our NT 22/1 Ap wet and dry vacuum cleaner delivers impressive results during light and moderate cleaning work in a number of commercial applications.

- 4 The lowest profile in its class**
The BRS 40/1000 C scrubber is an all-round machine for all hard surfaces. Thanks to its extremely low-profile construction, it can also reach under shelves – an important factor for kitchen hygiene.
- 5 Putting on the pressure**
It takes the concentrated force of a hot-water jet or steam jet to remove stubborn baked-on dirt. Tackle the job with Kärcher accessories for steam cleaners, including the detail nozzle, brass bristle brushes, and a cleaning cloth set.

Crumb alert
Handy battery-operated cleaners such as cordless brooms and sweepers effortlessly remove loose dirt.

Powerful and independent
Battery-operated scrubber driers are mains-independent, immediately ready to use and manoeuvrable. Also available for mains operation.

Versatile all-rounder
Compact mobile scrubbers such as the BR 40/1000 C for basic and maintenance cleaning of all hard surfaces are ideal for use in small kitchens.

High pressure in the kitchen
Special high-pressure cleaners with components approved for use with food-stuffs deliver uncompromising hygiene.

OUTDOOR FACILITIES – YOUR CALLING CARD AT THE ENTRANCE

The anticipatory pleasure of a good meal or a wellness weekend reaches its climax immediately before the entrance. This expectation can be further enhanced by a well maintained outdoor area. This advantage should be exploited to the full – in the car park as well as the forecourt area, and in the underground car park, walkways and pool area. You can do this systematically with the Kärcher system: perfectly coordinated machines, accessories and cleaning agents.

Absolutely indispensable
High-pressure cleaners are indispensable in many areas, including façade cleaning, vehicle maintenance and floor or surface cleaning.

Swift brooms
Compact push and walk behind sweepers complete sweeping tasks in a fraction of the usual time and are considerably more cost effective than a normal broom.

Broad areas
Ride-on sweepers are the solution for large-area sweeping tasks – on car parks as well as golf course paths.

Ready for big jobs
Ride-on scrubber driers for extremely severe conditions and long working hours. Your first choice for underground and above-ground car parks, as well as loading areas.

1 Progress made simple
Kärcher compact ride-on sweepers combine superior ease of use with high area performance and effective automatic filter cleaning. The adjustable seat position, tilting steering wheel and oversized wheels underline their aim to fulfil contemporary expectations for ease of use.

2 Can we make that easier?
The compact and extremely manoeuvrable KM 75/40 W makes child's play of thorough cleaning of small to medium-sized surfaces. Traction drive replaces brute strength, while effective vacuuming delivers cleanliness without a cloud of dust. Available with a choice of a powerful petrol engine or an especially quiet battery-powered version also for indoor use, with an antistatic carpet sweeping kit available as an option.

3 High-pressure surface cleaning
The FR 30 surface cleaner masterfully transforms the power of a Kärcher high-pressure cleaner into surface cleaning performance. The version with a plastic housing is especially easy to use, both outdoors and indoors.

4 Right on track
With their large surfaces, coarse and stubborn dirt and steep ramps, multi-level car parks often impose special demands on scrubber driers. The Kärcher B 150 R is ideally suited for the task, with its robust steel frame for use under severe conditions on surfaces with slopes up to 15%. The large water tank and powerful battery enable for long periods of continuous operation.

5 Remove gum safely and easily
The SG3 Bp Gum Remover safely and easily removes gum from hard and soft floors in a matter of seconds. Our unique technology quickly vaporizes gum through a combination of heat and our green, environmentally safe detergent.

THE KÄRCHER SYSTEM

Kärcher's development into a system provider follows the principle of achieving more together. In the company itself, as with suppliers and particularly with end users, solutions that benefit all parties are sought together. For innovative products and services that are combined to create an optimised system: the Kärcher System. Crucially, by using the Kärcher system, the most important – and ideally all – requirements and needs of the customer are completely fulfilled.

As a system supplier, Kärcher does not want to offer anything and everything, but only what operators need for their individual cleaning system. It is not the available range that is decisive, but the actual demand. It is important to have an answer to all questions relating to performance, efficiency and sustainability. A system that consists of machines, accessories, cleaning agents, services and digital solutions that can be easily integrated into operating procedures and adds value. A system that makes a difference: the Kärcher System.

makes a difference
