

# FORWARD **K2**

THINKING

WINTER 2019

## BRAND STATEMENT

We've been here from the beginning. Before 'freeride' was even a thing. Back when skiing was stale and the product was boring. We came into this realm blazing, chomping to reimagine what skiing means.

It's hard to not look back, to not be nostalgic. It's hard to ignore those pivotal moments in product design - the shaped skis, the early twin-tips, the rocker revolution - that were born in our workshop. We've been to the peak and back again too many times to count.

When we look at those times, those celebrated products you still see floating around, there was one constant: we weren't chasing anyone else. We put our heads down and built the product that we wanted, because the product we wanted didn't exist yet.

This year's new products follow that mindset. One that bucks convention and follows our gut. One that bends your conception of not just K2 - but of skiing in general.

So dive on in, check out the new gear within these pages. There's all the tech, marketing messaging, and story support you need. But most importantly, get out with us on skis. We're fired up to come together and write the next chapter of K2.

# MINDBENDER

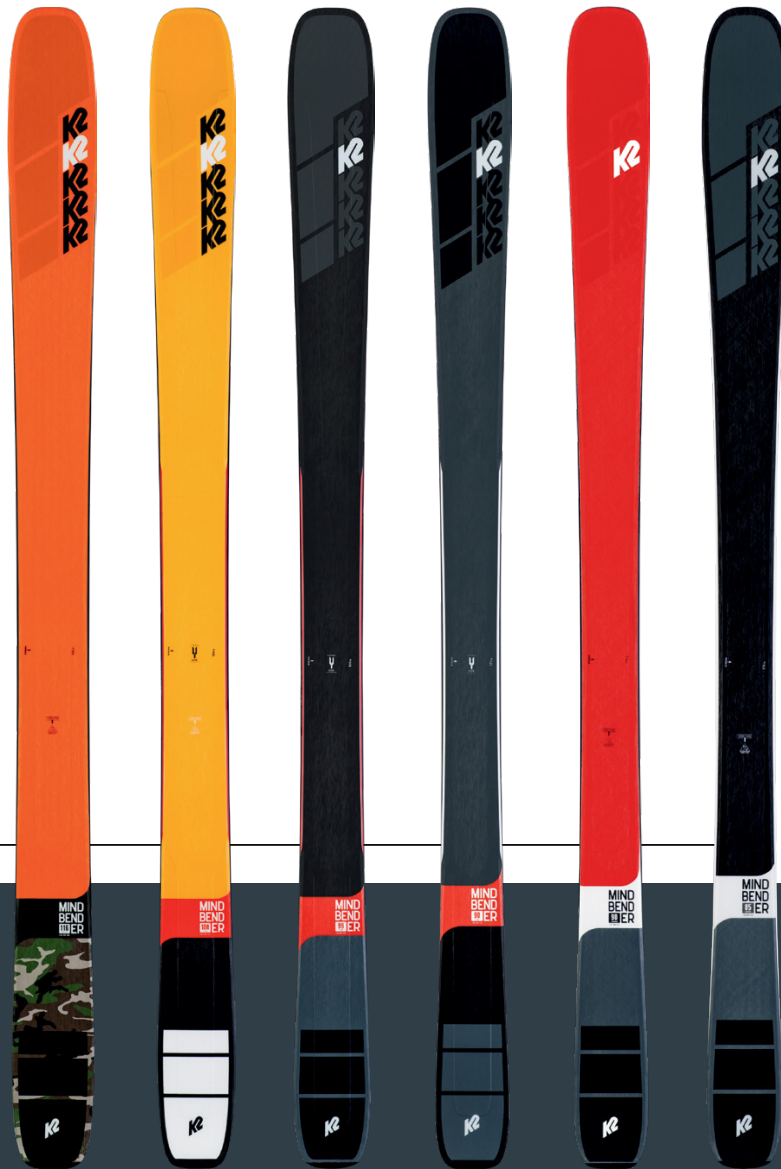

The Freeride skis and boots we have dreamed of are real. Built to blast.

No customer profile, no focus groups, no deep analysis of what wins magazine tests. We simply set out to make the skis we wanted to make. Skis that would let us push freeriding in new directions and make it goddamn more fun. Speed is fun; precise, high angle turns are fun, so is smearing, slapping, slashing and fucking around with your friends.

So here is the all-new Mindbender Freeride collection. It includes skis and boots - men's and women's models. We used plenty of science and high-level design in their creation, but in the end it was our gut that drove us. Because it isn't reason that drives us to ski. It's expensive, dangerous, cold, makes us skip days at work and sleep in parking lots. It's not smart, but we love it and these skis and boots make us love it even more.

Bend you mind around that.

# MINDBENDER /ALLIANCE

Pushing Forward: Innovating and advocating women in wintersports. Fresh air, burning legs, high 5's, fear, challenges, smiles, speed, ripping turns

*K2 Alliance*

For over 20 years now, the K2 ALLIANCE has existed as an undeniable community of progressive, original, uncompromising women pushing things forward for skiers everywhere. A small R&D team committed to building the product that women needed. They rolled up their sleeves, turned on the presses, and redefined the way women's skis were built, right here in our Seattle Development Center.

And they're still a part of the formula to this day, staying true to the values that K2 has held since the beginning. Determination, a commitment to innovation, a healthy dose of defiance, and the idea that nothing should get in the way of a good party.

For members of the ALLIANCE, skiing is more than just something fun to do in the winter, it's a way of life through which we connect, grow, learn, share, laugh, inspire, and most importantly, improve. We'll continue pushing forward, and strive to empower women everywhere to do the same.

# SKI /COLLECTION

From hardpack to deep powder, park to blue squares, we make a ski that does what you want to do on the mountain. To quickly guide skiers to the right sticks, we break it down like this.

## **FREERIDE / ALL-NEW MINDBENDER SERIES**

Untracked, Hiking The Ridge, First Tram, Out of Bounds, Fall Line, Tailgate Beers, B Lot, Pow Days, Big Mountain Speed, Critical Lines

## **SPEED PERFORMANCE / CHARGER AND ANTHEM HS**

Fresh Cord, Groomers, Hardpack, Hot Laps, Speed, Power, The Perfect Turn, Hold, High Performance, Carving, Stability

## **PISTE PERFORMANCE / IKONIC AND ANTHEM**

Any Condition, Any Terrain, Control, First Chair/Last Chair, Après Scene, First Tracks, Bumps, Hot Laps

## **FREESTYLE / FACTORY TEAM**

Surfy, Playful, Slashing, Maneuverable, Ollie, Butter, Presses, Rails, Urban, Park, Pipe, Jib, Big Mountain, Party

## **TOURING / WAYBACK AND TALKBACK**

Earn Your Turns, Backcountry Exploration, Expedition, Trail Heads, Touring, Downhill Performance, Skin Tracks, Breaking Trail, Safety

## **YOUTH**

Fun, Long Lasting, Hand-me-down, Promotes Learning and Stoke

# MINDBENDER SKI TECH

## TORSION CONTROL DESIGN

ONE PERFORMANCE STORY / TWO TECH SOLUTIONS

### TITANAL Y-BEAM

The Titanal Y-Beam delivers precision in the forebody of the ski, power underfoot and stability in the tail all while maintaining the maneuverability needed for freeride ripping.

### CARBON SPECTRAL BRAID

A variable angle braiding process that allows for variation in the torsion and flex by altering the fiber orientation along the ski.

**ALL NEW**  
**MINDBENDER**  
**116C**

Conceived in the heart of the Cascades, this is the model that inspired the name 'Mindbender'; never has there been a more capable 116mm waisted ski. If skiers keep pushing the envelope, this ski will lick the stamps.

**ALL NEW**  
**MINDBENDER**  
**108Ti**

Some say it's too wide, some say it's too narrow, but that's all noise. Skiers who push the Mindbender 108Ti quickly become accustomed to skiing big lines faster and more aggressively than they ever have before.

**ALL NEW**  
**MINDBENDER**  
**99Ti**

We're not suggesting you only need one pair of skis, but if you did, the Mindbender 99Ti is that ski. Quick, agile, powerful and stable, the feeling you get from this ski is difficult to put into words. This ski simply rules.

**ALL NEW**  
**MINDBENDER**  
**90Ti**

Sports car feel, big mountain appeal. The Mindbender 90Ti was born off-piste and raised on hard snow, maturing into a ski that is every bit as capable railing groomers as it is blasting crud and day old powder.

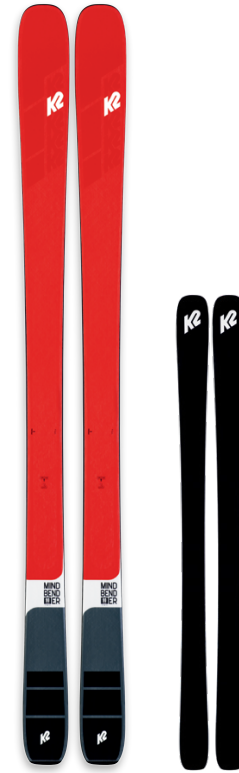

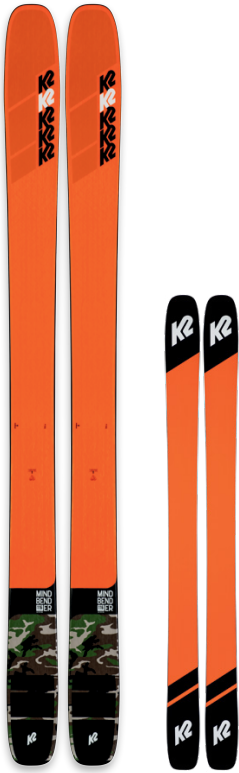

**ALL NEW**  
**MINDBENDER**  
**90C**

Stability is good, edge grip is impressive; but it's the intuitive nature and versatility of the Mindbender 90c that opens up new terrain all over the mountain.

**ALL NEW**  
**MINDBENDER**  
**85**

Welcome to the mindbending world of K2 freeride skis.

PISTE PERFORMANCE

2019-2020 / K2 SKIS - Dealer Catalog

## SPEED CHARGER

Longer radius speed-freak stability and power. Built for speed with Full Rox and Carbon Grid construction.

Dimensions:	125-72-99
Rocker:	Speed Rocker
Sizes:	168, 175, 182
Radius:	18.0m @ 175
Core:	Aspen/Paulownia Power Hybrid
Bindings:	MXCell 14 TCx

### KEY FEATURES

Full Rox  
Ti Laminat  
Carbon Grid

## SUPER CHARGER

Medium radius, on-rails precision. Full Rox construction, a metal laminate layer, and a long effective edge create superior edge hold for laying it the f&ck down.

Dimensions:	126-76-105
Rocker:	Speed Rocker
Sizes:	161, 168, 175, 182
Radius:	17.0m @ 175
Core:	Aspen/Paulownia Power Hybrid
Bindings:	MXCell 12 TCx

### KEY FEATURES

Full Rox  
Ti Laminat  
Carbon Grid

## TURBO CHARGER

Short radius quickness for the turning technician. Stiff, powerful, and precise for carving up corduroy like a hot knife through butter.

Dimensions:	129-72-107
Rocker:	Speed Rocker
Sizes:	158, 165, 172
Radius:	13.0m @ 165
Core:	Aspen/Paulownia Power Hybrid
Bindings:	MXC 12 Light Quikclik

### KEY FEATURES

Rox  
Ti Laminat  
Carbon Grid

## CHARGER

This softer flexing version of the Super Charger is a medium radius piste monster for those who prefer a softer ski for added liveliness and pep.

Dimensions:	126-76-105
Rocker:	Speed Rocker
Sizes:	161, 168, 175
Radius:	17.0m @ 175
Core:	Fir/Aspen Power Hybrid
Bindings:	M3 11 TCx Light Quikclik

### KEY FEATURES

Rox  
Carbon Grid

PISTE PERFORMANCE

2019-2020 / K2 SKIS - Dealer Catalog

## IKONIC 84Ti

The raw power of a super car refined to rip as a daily driver. Smooth power and versatile precision comes from The XTD Carbon Spyne and Exo-Konic Technology

Dimensions:	133-84-112
Rocker:	Speed Rocker
Sizes:	163 / 170 / 177 / 184
Radius:	17.5m @ 177
Core:	Aspen/Paulownia Konic
Bindings:	MXCELL 12 TCx Quikclik

### KEY FEATURES

- Exo-Konic Technology
- Carbon Spyne
- Ti Laminate

## IKONIC 80Ti

Top-level precision that extends beyond morning corduroy. Harnessing the power of Titanal laminate, carbon and a lively aspen/paulownia core to deliver a ski that tackles any resort terrain.

Dimensions:	129-80-108
Rocker:	Speed Rocker
Sizes:	156 / 163 / 170 / 177 / 184
Radius:	17.5m @ 177
Core:	Aspen/Paulownia Konic
Bindings:	MXC 12 TCx Light Quikclik

### KEY FEATURES

- Exo-Konic Technology
- Carbon Spyne
- Ti Laminate

## IKONIC 80Ti (SMU)

op-level precision that extends beyond morning corduroy. Harnessing the power of Titanal laminate, carbon and a lively aspen/paulownia core to deliver a ski that tackles any resort terrain.

Dimensions:	129-80-108
Rocker:	Speed Rocker
Sizes:	156 / 163 / 170 / 177 / 184
Radius:	17.5m @ 177
Core:	Aspen/Paulownia Konic
Bindings:	MXC 12 TCx Light Quikclik

### KEY FEATURES

- Exo-Konic Technology
- Carbon Spyne
- Ti Laminate

## IKONIC 84

Lively and energetic feel that delivers next level performance all over the mountain. Carbon stringers create a one-of-a-kind power/control balance.

Dimensions:	133-84-112
Rocker:	Speed Rocker
Sizes:	163 / 170 / 177
Radius:	17.5m @ 177
Core:	Fir/Aspen Konic
Bindings:	M3 12 TCx Light Quikclik

### KEY FEATURES

- Exo-Konic Technology
- Carbon Spyne

## IKONIC 80

Nimble and precise for carving on all slopes, all day. Dense fir at the edges and lightweight aspen in the middle balance power and quickness so you can rip.

Dimensions:	129-80-108
Rocker:	Speed Rocker
Sizes:	156 / 163 / 170 / 177
Radius:	15.9m @ 170
Core:	Fir/Aspen Konic
Bindings:	M3 10 Compact Quikclik

### KEY FEATURES

- Exo-Konic Technology

## KONIC 76

Quick and nimble combined with solid edge hold and confidence. Konic technology provides a stable and maneuverable all-mountain ski that performs wherever you go.

## KONIC 75

Quick and surefooted performance for exploring the whole mountain. Catch Free Rocker camber profile allows for easy turn initiation and ultra smooth edge-to-edge transitions.

PISTE PERFORMANCE

PISTE PERFORMANCE

## ALL NEW ANTHEM 72 Ti HS

A narrow-waisted, high-speed performer built to carve. BioKonic core, and titalanal metal laminate harmoniously create this fine tuned carving machine.

## ALL NEW ANTHEM 74 HS

Built to be snappy and fun, quick and dependable for hard snow. Speed Rocker camber profile blends with our Correct Flex technology to create a long effective edge for precision hold at high speed.

## ALL NEW ANTHEM 82

Energetic, powerful and consistent, The 82's wide range of performance comes from our BioKonic core and stance forward geometry.

## PON200N

Shane McConkey's legend lives on in the Pon2oon, a full power powder ski that is designed to do one thing—rip the deepest days of the season.

## CATAMARAN

Designed by Pettit, Pep & the K2 R&D Crew, this wide asym twin tip turns deep snow into a veritable playground; it's the surfiest, slashiest, quickest and most playful powder ski we've ever made.

## MARKSMAN

A modern conception of what a twin tip should be. The Marksman was conceived by Pep, and the result is a playful, yet solid ski for skiing creatively in all conditions.

## POACHER

The go-to park and all-mountain freestyle weapon of choice for K2 riders Joss Christensen, Colby Stevenson, Sean Jordan, and Clayton Vila. Pick your line, rip, stomp, repeat.

## SIGHT

Athlete approved for the park, pipe and beyond. A fine-tuned and precise twin tip that checks all the boxes with bombproof construction built from an aspen wood core, rip, stomp, repeat.

## PRESS

No nonsense durability and progressive shaping from K2's 25+ years of Factory Team design experience. Hopped up with Carbon Boost Braid and built to last Duracap construction.

# SKI / BOOT COLLECTION

Boots are all about fit first and foremost. Once you understand fit the type of skiing you do will steer you into one of our 4 collections, easy right?

## FREERIDE / ALL-NEW MINDBENDER

Leveraging the insane lightweight power of the Powerlite shell the all-new Mindbender boots are light but bombproof durable and hands down the bootfitter's choice in freeride boots.

## ALL MOUNTAIN PERFORMANCE / RECON AND ANTHEM

Built for lightweight performance so you can go anywhere with quickness and power

## COMFORT / B.F.C.

The name says it all, Built For Comfort! But there is a lot to that. Comfort comes from superior fit, premium materials and boot fitter friendly features.

## YOUTH

No hassle boots that get the kids stoked and on the hill faster and longer.

# ALL NEW MINDBENDER BOOTS

## FREERIDE FEATURES ULTRA DURABLE CUSTOMIZATION

Building on the lightweight, performance of the POWERLITE shell the Mindbender boot adds in smart and proven freeride features that focus on durability, simplicity and most of all customization.

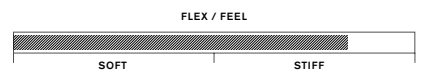

- . 10-17° forward lean adjustability
- . 50° hiking range of motion
- . Alpine & Tech binding compatibility
- . Tour liner with laces and hiking flex zone
- . Rip Cord Powercinch Strap
- . Grip Walk Outsoles

# SKI TECH

# SKI TECH

## Rocker

A gradual rise in the tip, and sometimes tails, of a cambered ski reducing edge contact with the snow for better maneuverability and flotation.

### Type

- SPEED
- ALL-TERRAIN
- ALL-TERRAIN TWIN
- POWDER
- CATCH-FREE

### Speed Rocker

Short and low rise in the tip for quick turn initiation and precise steering.

### All-Terrain Rocker

Skis with All-Terrain rocker have a gradual rise to the tip for great versatility in all conditions, with a short, low rise in the tail for added control variable snow.

### Catch-Free Rocker

Effortless turn initiation at slow and moderate speeds with a gentle, gradual rise in the tip and tail.

### Powder Rocker

High and long rise in the tip and tail to maximize float in softer snow.

### All-Terrain Twin Rocker

All-Terrain Twin Rocker is a gradual, extended rise at the tip and tail for added versatility and control in all conditions with twin tip skis.

## Core

K2 uses and blends a variety of wood species in our cores to fine tune the performance and personality of each ski.

### Type

- ASPEN
- BALSA
- MAPLE
- FIR
- PAULOWNIA

### Aspen

Lightweight and resilient, great all-around material.

### Fir

Energetic, tough, dense wood that absorbs impact.

### Balsa

Ultra-light and responsive, Balsa cores are a key component to our class leading performance to weight ratio.

### Paulownia

Lively, flexible wood with excellent weight to strength ratio.

### Maple

Energetic, tough, dense wood that absorbs impact.

## Construction

### Type

- TRIAIXIALLY BRAIDED
- METAL LAMINATE
- HYRBITECH
- DURACAP
- TWINTECH

### Triaxially Braided

A K2-patented process the interlocks strands of fiberglass around a milled core for pronounced torsional stiffness, while retaining the lively flex patterns inherent in a wood ski.

### Metal Laminate

A metal laminate construction, denoted by "TT" in the name, uses a sheet of Titanal above and below the core to give the ski a damp, precise and accurate feel.

### Hyrbitech

Blending a sidewall construction underfoot with a cap construction in the extremities. The sidewall section gives the ski accuracy, power and edge grip while the capped regions reduce swing weight and increase overall durability.

### Duracap

A molding process that envelopes the core and internal materials within the top layer of the ski. DuraCap skis are generally lighter overall, with enhanced durability and forgiveness.

### Twintech

A durable full sidewall construction providing great edge feel and performance with added top sheet resistant to ski vs. ski impact damage.

## Women's Tech

- BIOKONIC
- STANCE FORWARD
- CORRECT FLEX

### BIOkonic

Developed around the specific biomechanical attributes of women and optimized for hard snow performance; BIOkonic construction places dense, heavier materials directly over the edges with lighter materials in the center of the ski for increased precision and stability, while retaining a large sweet spot.

### Stance Forward

More than simply moving the mounting point on a men's ski; the overall shape, sidecut, and flex are designed in concert around the biomechanics of how women stand and pressure the ski during a turn.

### Correct Flex

Eliminates the overly stiff, mid-section typically found on shorter length skis, leaving a smooth and consistent flex profile optimized on every size from longest to shortest.

# SKI TECH

# SKI TECH

**Freeride**

Mindbender and  
Mindbender Alliance

**Ti Y-Beam**

K2's Ti Y-Beam delivers precision in the forebody of the ski, power under foot and stability in the tail, all while maintaining the maneuverability and drift control needed for freeride ripping. Precision cut titanal in a "Y" shape alters the torsional stiffness of the ski while maintaining a balanced, even flex pattern that delivers power in a controlled manner throughout the length of the ski.

**Carbon Spectral Braid**

An extension of K2's Torsion Control Design, Carbon Spectral Braid is a first of its kind variable angle reinforcement (Patent Pending) that allows for precision tuned torsion and flex by altering the fiber orientation along the length of the ski. Lively, energetic, and remarkably composed; Mindbender skis with K2's Carbon Spectral Braid have stability and control in spades while remaining hyper-maneuverable.

**Torsion Control Design**

Designed to enhance stability and control in all snow types, TORSION CONTROL DESIGN combines a progressive torsional flex, with a balanced and even longitudinal profile. Torsionally stiffest in the forebody and center of the ski, then easing throughout the tail, K2 skis with TCD have both precise, accurate turn initiation and smooth, consistent turn release in all snow types.

**PowerWall**

Power transfer is dramatically enhanced with the oversized ABS sidewalls that are laminated and pocketed within the wood core in the midbody of the ski. With the sidewall extending into the heart of the ski, the transmission of energy from skier to ski edge is direct and precise.

**SlantWall**

Adding a 30degree angle to the sidewall in K2's Hybritech construction, SlantWall increases a skis agility and responsiveness while maintaining accuracy and power.

**Precision Piste**

Charger

**Full RoX**

Precision Piste construction designed to maximize stability, precision and control with:

- FULL wood core to retain a lively, energetic personality
- FULL metal laminate for maximum power
- FULL length sidewalls for precise edge hold and grip
- FULL Carbon Grid- updated "RoX" shaped carbon grid in both the fore-body and tail for perfect suspension and increased torsional rigidity

**All-Mountain**

Ikonic

**Konic Technology**

A revolutionary approach to ski design that re-distributes mass in the ski by placing heavier and stiffer materials directly over the edges where they have the most impact on ski performance. This results in a ski with increased precision and high end power while retaining a large sweet spot.

**Freestyle**

Factory Team

**Double Barrel**

The backbone of our Factory Team collection, Double Barrel cores combine a dense, Fir core over the edges for power and impact resistance, with a lighter Aspen center core for a lively energetic feel.

**Asymm Tip/Tail**

K2's Asymmetric tip and tail design implements an elongated taper on the outside edge only, giving the uphill ski a much shorter effective running length, making it easier to control and maneuver whether slashing, buttering or just ripping soft snow. The longer inside edge provides added stability and floatation.

**Carbon Boost Braid**

Longitudinal carbon stringers woven into the K2's patented Triaxial Braid for added pop and rebound, found on freeride and factory team skis.

**Swap Base**

Two different colorways on the base keep your skis unique from your friend's.

**Touring**

Wayback and  
Talkback

**Skin Grommets**

Reinforced grommets in the tip and tail of the ski that both accommodate K2's pre-cut skins with a Z-clip skin attachment, and can be used with K2/BCA Shovels to build a rescue sled.

**Ti SpYne**

Titanal laminate developed specifically for K2 Touring skis that dramatically increases predictability and damping on lightweight carbon constructions, while enhancing stability and edge grip.

**Carbon Overdrive**

Top secret construction using carbon fiber to make a ski even more awesome than if it did not have carbon fiber. Radness levels achieved are difficult to quantify. Product of area '62.

**Snowphobic Topsheet**

Hydrophobic, snow shedding top material that helps prevent snow from sticking to the tops of your skis.

# MARKER BINDINGS

MXCELL		<b>MXCELL 12/14 TCx</b> - Designed for maximum power transmission between ski and boot with the XCell Piston Technology toe piece to keep boot centered during quick jolts and the TCx Heel for highest control and precision performance.
MXC TWINCAM X		<b>MXC 12 TCx LIGHT</b> - Combining a Triple Pivot X toe with a Twin Cam X light Heel. Giving a modern look to all mountain performance.
M3 TWINCAM X		<b>M3 11/12 TCx LIGHT</b> - The Triple Pivot Comfort Toe with the Twin Cam X light heel reduces weight for enhanced overall comfort and performance.
M3 10 COMPACT		<b>M3 10 COMPACT</b> - A Lightweight binding system with the Triple Pivot Comfort Toe and a Compact heel for the most comfort and secure feel.
M2 10		<b>M2 10</b> - Designed to save weight with the highly functional compact heel and the TLT two linkage toe for full lateral and backward release for beginner skiers.
ERC 11 TWINCAM X LIGHT		<b>ERC 11 TCx LIGHT</b> - Combining a lightened Triple Pivot Toe and a Twin Cam X light heel with easy-to-step-in for the lightest and highest performance women's system.
ERC 10 TWINCAM X LIGHT		<b>ERC 10 TCx LIGHT</b> - The ER3 Plate shaves some weight but still retains all performance from Twin Cam X Heel and comfort from the Triple Pivot Comfort Toe.
ER3 10 COMPACT		<b>ER3 10 COMPACT</b> - A Lightweight binding system with the Triple Pivot Comfort Toe and a Compact heel for the most comfort and secure feel.
ERP 10		<b>ERP 10</b> - The lightest women's binding system offered with an easy entry and targeted functionality for beginning skiers.
GRIP WALK SYSTEM		<b>GRIP WALK SYSTEM / NOW FEATURED ON ALL BINDINGS</b> New Patented ISO 9523 rocker sole boot and binding system designed for better grip and added walking comfort without compromising the binding's power transmission and release function. No adjustments needed.

# BOOT / TECH

① **POWERFUSE SPYNE**

(Recon & Anthem)  
Stiffest PU for flex control, lateral stiffness.

② **POWERLOCK SPYNE**

(Mindbender and Mindbender Alliance)  
Intuitive, strong, walk mechanism with forward lean adjustment combined with the stiffening Spyne.

③ **FASTFIT INSTEP**

Soft PU for easy of entry.

④ **SHELL BODY**

Medium PU stiffness for improved wrap, closure and damping

⑤ **POWER CHASSIS**

Stiff PU for immediate power transfer, torsional rigidity and rugged toe interface

RECON 130

MINDBENDER 100

## POWERLITE SHELL

*The POWERLITE shell is purpose-built to result in the best skiing, most durable and lightest weight boots ever produced.*

*This is the foundation that makes our new Mindbender, Recon and Anthem boots rip like no other.*

Made with four different stiffnesses of TPU and optimized wall thickness profiling the POWERLITE Shell achieves a paradoxical balance of lightweight agility and power.

## BOOTFITTER APPROVED

*100% TPU shell Materials for easier heat molding and grinding*

### PRECISIONFIT PRO / PRECISIONFIT PRO TOUR AND LUXFIT PRO / LUXFIT PRO TOUR LINERS

3D ankle pockets for a smooth out of box fit. ULTRALON Cross Linked EVA - Fully heat moldable.

### WOMEN'S CALF ADJUSTMENT

Easy adjustment feature on the ANTHEM boots to quickly find the right fit for both comfort and performance for a variety of calf muscles.

### DUAL CUFF ALIGNMENT

(Recon & Anthem)

### CANTABLE OUTSOLES

(Recon & Anthem)

### DIMPLED BOOT BOARD

Easier planning and sanding

# SKI BOOT TECH

# SKI BOOT TECH

## Freeride

Mindbender and  
Mindbender Alliance

**Powerlock Spyne**- Rugged, precise and intuitive. The Powerlock Spyne walk mechanism allows for 50 degree range of motion when hiking and an unforgiving, powerful connection while skiing. The mechanism can also be adjusted to customize the forward lean of the boot between 10-17°.

**Pebax Bio-Resin**- Lightweight, eco-friendly material for energetic and consistent flex across a wide range of temperatures.

**Integrated Tech Fittings**- Fully integrated into the shell injection, instead of just the outsole pods, makes our outsoles compatible with both DIN-alpine and Tech bindings.

**Ripcord Power Cinch Strap**- Quick Release Pull Tab unlocks the cinch cam mechanism

**Fast Fit Entry**- Softer TPU designed into the instep area of Powerlite shell for quick and easy entry and exit.

**Friction Free Cuff Pivot**- Low friction cuff pivot to ease range of motion.

**Grip Walk Outsoles**- Removable and interchangeable ISO 9523 alpine rockered soles collaboratively designed to work with Marker's Grip Walk binding system for better grip and added comfort when walking and standing in boots, but doesn't compromise the power transmission and release function between the boot and binding when skiing. Preinstalled.

**Navicular Punch**- A strategic bump built into the boot mold to alleviate pressure commonly experienced during ankle flexion.

**Asymmetrical Toe Box**- Fits the natural curvature of your toes for added comfort and to ensure a proper fit.

**Power Wedge**- A removable spoiler for adjustable forward lean angle from 12 to 14 degrees.

## All-Mountain

Recon and  
Anthem

**Powerfuse Spyne**- A rear co-injected "Y" shaped support that adds strength and power to the Energy Interlock in order to maximize fore/aft flex efficiency and lateral stiffness for responsiveness in every type of terrain.

**Energy Interlock**- A rivet-free technology that integrates the cuff and shell, putting less stress on the boot's material and produces a smoother, progressive flex.

**Fast Fit Entry**- Softer TPU designed into the instep area of Powerlite shell for quick and easy entry and exit

**Dual Cuff Alignment Index**- Dual sided cuff alignment for +/-2 degrees of cuff adjustment.

**Grip Walk Outsoles**- Removable and interchangeable ISO 9523 alpine rockered soles collaboratively designed to work with Marker's Grip Walk binding system for better grip and added comfort when walking and standing in boots, but doesn't compromise the power transmission and release function between the boot and binding when skiing. Preinstalled models available, also sold separately.

**Replaceable Outsoles**- Dual-injected soft and hard Thermo Plastic Urethane (TPU) for secure footing and increased life of the boots.

**Cantable Outsoles**- Advanced level of adjustability to customize stance angles

**Navicular Punch**- A strategic bump built into the boot mold to alleviate pressure commonly experienced during ankle flexion.

**Asymmetrical Toe Box**- Fits the natural curvature of your toes for added comfort and to ensure a proper fit.

**Power Wedge**- A removable spoiler for adjustable forward lean angle from 12 to 14 degrees.

## All Mountain Comfort

B.F.C. and  
B.F.C. W

**Powerfuse Spyne**- A rear co-injected "Y" shaped support that adds strength and power to the Energy Interlock in order to maximize fore/aft flex efficiency and lateral stiffness for responsiveness in every type of terrain.

**Après Mode**- Unlocks the upper cuff from the lower shell for comfort and convenience while walking from car to lift to apres and beyond, while still allowing to lock down for all-mountain performance.

**Hands Free Entry**- Dual material overlap for intuitive and easy hands-free exit and entry.

**Natural Stance/Natural Stride**- Supportive flex profile and design for a natural stance when standing in line at the ticket office, tram or chairlift and a natural stride when walking through the parking lot, trudging up the stairs or across the village.

**Grip Walk Outsoles**- Removable and interchangeable ISO 9523 alpine rockered soles collaboratively designed to work with Marker's Grip Walk binding system for better grip and added comfort when walking and standing in boots, but doesn't compromise the power transmission and release function between the boot and binding when skiing. Preinstalled models available, also sold separately.

**Replaceable Outsoles**- Dual-injected soft and hard Thermo Plastic Urethane (TPU) for secure footing and increased life of the boots.

**Cuff Alignment Index**- Single lateral sided cuff alignment for +/-1 degrees of cuff adjustment. Men's B.F.C. 120 and B.F.C. 100 and Women's B.F.C. 90

**Dual Cuff Alignment Index**- Dual sided cuff alignment for +/-2 degrees of cuff adjustment. Men's B.F.C. 90 and B.F.C. 80 and Women's B.F.C. 80 and 70

## Women's Boots

**Women's Specific Last**-A lower cuff height, volume and narrower heel to accommodate women's lower leg and foot shapes.

**Women's Adjustable Cuff**-Adjustable rear cuff support for Anthem boots that can be customized to fit with any calf shape.

## Heated Boots

**Therm-IC Heated Liners**-Integrated heating system to keep your feet warm on cold days. Increases mobility and performance of foot muscles. Three heat setting provide warmth from 4 to 19 hours. Fully charges in 6 to 7 hours with a USB cable. (figure 6)

## Boot Liners

**PrecisionFit Pro** - Pre Molded and Lasted with Ultralun heat moldable foams. Features an asymmetric tongue, pre molded ankle pockets and a high density power collar for a firm but comfortable performance fit.

**PrecisionFit Pro Tour** - Laceable, Pre Molded and Lasted with Ultralun heat moldable foams. Features an asymmetric tongue, a high density power collar and a flex notch for increased range of motion while hiking.

**LuxFit Pro** - Pre Molded and Lasted with Ultralun heat moldable foams. Features an asymmetric tongue, pre molded ankle pockets, and a medium density collar & foam package yielding performance with added comfort.

**LuxFit Pro Tour** - Laceable, Pre Molded and Lasted with Ultralun heat moldable foams. Features an asymmetric tongue, a medium density collar & foam package with a flex notch for increased range of motion while hiking.

**Cushfit** - Lasted with a blend of open cell and eva foam for an extremely comfortable yet supportive fit.

**CushFit Jr** - A blend of open cell and eva foam for an extremely comfortable fit.

# HELMET TECH

## Construction

**Hybrid-** This unique construction features the best of both In-Mold and Hard-Shell constructions. The primary In-Mold construction makes the helmet incredibly light, while the secondary Hard-Shell upper allows for more advanced Active Matrix Venting and increased durability.

**In-Mold-** In-Mold is the premium construction for ultra-lightweight performance and is characterized by an EPS liner that is molded directly to a lightweight poly-carbonate (PC) shell. The result is a construction so light you'll forget it's even there.

**Hard Shell-** Hard-Shell helmets are built to last and will look good no matter how many trips they make in and out of your gear bag. Hard-Shell helmets protect you from impact thanks to lightweight EPS foam bonded to an injection molded and durable ABS shell.

**Dual Active-** Perfect combination of user/switch regulated Active Matrix Venting and integrated Passive Channel Venting.

**Passive Channel Venting-** Channels on the inside surface of the EPS direct air-flow between your head and the helmet, removing moisture and excess heat for all day comfort.

**Active Matrix-** Climate control at the flip of a switch, Active Matrix Venting allows you to regulate the airflow of the helmet vent system with the push of a finger.

HYBRID SHELL CONSTRUCTION (figure 1)

IN-MOLD CONSTRUCTION (figure 2)

PASSIVE CHANNEL VENTING (figure 3)

ACTIVE MATRIX VENTING (figure 4)

## Liner Systems

**Convertible Full Wrap Liner-** Same coverage as a full-wrap but easily pops out, leaving the fit system and minimal padding to accommodate warm days and wearing a thin beanie under the helmet.

**Full Wrap Liner-** A comfortable, washable, full-coverage, breathable liner design that wicks away moisture to prevent overheating and seamlessly integrates fit and audio systems.

**Tech Form Liner-** Compression formed, precise fit liner with removable ear pad and neck roll for a convertible customized fit.

CONVERTIBLE FULL-WRAP LINER (figure 5)

FULL WRAP LINER (figure 6)

TECH FORM LINER (figure 7)

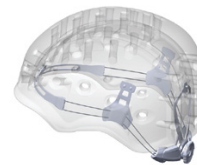

## Fit Systems

**BOA®-** All the benefits of the 360 K2dialed Fit System with the precision and quality that you have come to expect from Boa® Technologies.

**360 K2Dialed-** The 360 K2Dialed Fit System is an evolution of the K2dialed Fit System, delivering unparalleled comfort around your entire head. An intricate web design results in 360 degrees of even pressure distribution for a secure and snug fit that you customize with the twist of a dial.

**K2Dialed-** The K2Dialed Fit System creates ad custom-fitting helmet no matter what your head shape is. An ergonomically inspired three-point adjustable interface maximizes fit and customization with the twist of a dial. This allows for the ultimate convenience of being able to make fit adjustments on the fly.

BOA®FS360 FIT SYSTEM (figure 8)

360 K2DIALED FIT SYSTEM (figure 9)

BASELINE AUDIO (figure 10)

BIKE CERTIFIED (figure 11)

## Audio Tech

**Aftermarket Bluetooth Speaker Compatible-** All K2 Helmets are now compatible with Outdoor Tech® Blue Tooth audio systems, as well as other after-market audio options.

**Baseline Audio Systems-** Pre-installed audio kit with a low-profile speaker that easily connects to your mobile device without hindering the fit or comfort. The on-cord controller is designed for on-the-go usability at your fingertips for talk or tunes.

## General Tech

**Bike Certified-** Certified by North American bicycle helmet safety standard and European bicycle and skateboard helmet safety standard.

**Magna Snap-** Magnetic retention clip that easily flips up and over the goggle strap for a secure hold that you don't have to fumble for.

**Removable Ear Pads-** Ability to easily remove ear pads for reduced bulk while retaining the fit system.

**Removable Goggle and Headlamp Clips-** Customized fit for tool-free, on-the-go versatility.

**PowFly-** Waterproof breathable cover for Route for added protection against the elements of winter weather

POW FLY (figure 14)

# SKI POLE TECH

# SKI POLE TECH

### Pole Construction

**Carbon Web**- External carbon strands are precisely laminated onto the carbon shaft creating K2's lightest weight, most durable, and stiffest shaft offered.

**100% Composite**- Full composite construction for a great combination of weight, durability, and cost.

**Aluminum 7075 or 6061**- High strength aircraft grade aluminum for a seamless, durable tubing shaft.

### Grip Tech

**Rip Cord Grip System**- Safety releasable strap mechanism integrated into grip top. Unique lightweight cored out grip design removes material where possible. Utilizing a slim, neoprene padded right/left strap for comfort and ease of entry. Push button hinging grip top allows for easy strap adjustment and removes the need for buckles and Velcro, creating the most comfortable and streamlined strap ever.

**Utility Hook**- Stubborn boot buckles, heel risers and walk mode levers are no match for the utility hook grip. Flip your pole over and use the notch on the front of the grip to flip, clip, pull and buckle up your gear on the fly.

### Adjustment Tech

**LockJaw 6000**- Completely redesigned with a T6 6000 series aluminum lever and body linked together with Teflon bushings to optimize clamp force with minimum lever pressure. The minimalist design achieves a reduced weight of 25% from its plastic equivalent and is the most durable, non-slip adjustment mechanism in K2 poles.

**LockJaw Adjustment Mechanism**- Refined over several generations, the tried and true lockjaw system continues to define the standard for length adjustment mechanisms. Simple, lightweight and durable, the Lockjaw is the workhorse of the backside pole line.

**FlipJaw Adjustment Mechanism**- Length adjustment mechanism connecting a smaller diameter upper shaft with larger diameter, more durable lower shaft.

**Collapsible Pole Technology**- Collapsible for easy storage

### General Tech

**Bubble Inclinometer**- Quick and accurate slope angle measurement in the palm of your hand.

**All Season Kit**- Change up the tips and baskets, without any tools, to make them compatible for backcountry exploration in the summer or winter.

**Nesting Baskets**- Notches in the basket to couple the pair of poles for easy carry or storage.

**Backup Probe**- Want to check the snowpack without having to take off your pack and dig for a probe? No problem, just screw the two lower pole segments together and you have a 200cm backup probe at the ready. With gear this versatile, you're always prepared for the unexpected.

**Powder Basket**- The newly redesigned powder basket has a 95mm diameter for float in deep snow and a smooth flex to conform to harder terrain during long skin tracks and traverses.

**Articulating Powder Basket**- The 80mm ball and socket articulating basket features 50 degrees of unhindered movement, allowing the basket to effortlessly match the snow's surface during traverses or when conditions turn hard.
