

Introduction

These reference tables support and supplement the General Medical Council (GMC) report The State of Medical Education and Practice in the UK (SoMEP) 2019. They are available in both Adobe Acrobat (.pdf) and Microsoft Excel 2003 (.xls) formats.

The tables are based upon management information from the GMC's Fitness to Practise (FtP) activity. The nature of our work means that counts of activities and their outcomes can, and do, change retrospectively, and this should be borne in mind when interpreting the most recent figures.

Other sets of reference tables are available on the GMC website at <https://www.gmc-uk.org/about/what-we-do-and-why/data-and-research/the-state-of-medical-education-and-practice-in-the-uk/workforce-report-2019#Data%20tables> .

Activities reported

The first 25 reference tables report FtP events and activities. Tables 1 to 13 report events that arise out of enquiries **received** between 1 January 2012 and 31 December 2018; these events form a cohort that illustrates the rate at which enquiries become complaints, then complaints become investigations and cases. Tables 14 to 25 report GMC activities that **concluded** between 1 January 2012 and 31 December 2018; these allow meaningful year on year trend comparisons between numbers of activities to be made.

The small numbers of cases that were still under appeal when the data was downloaded have been excluded from these tables.

Doctors reported

Tables 26 to 56 report the number of **doctors** of different types who have been involved in FtP activities in the period from 1 January 2012 to 31 December 2018. They include only doctors who held a licence to practise when the complaint starting the activity arrived or shortly before that.

Note that in each of the rows, the count in the overall 2012-18 column is usually less than the sum of the counts in the individual 2012 to 2018 columns. This is because, for a doctor who has more than one FtP involvement, only the one most serious outcome is counted in each period. A doctor with outcomes in more than one year will be counted in each of those years, but only once in the overall 2012-18 period.

Rates reported

Tables 57 onwards report the rate of doctors of different types who have been involved in different FtP activities in the period from 1 January 2012 to 31 December 2018. They include only doctors who held a licence to practise when the complaint starting the activity arrived or shortly before that. Each doctor was counted only once for the 2012-18 period.

Abbreviations

The following abbreviations are used throughout the tables:

BME - Black Minority Ethnic
EEA - European Economic Area
CE - Case Examiner
GP - General Practitioner
IMG - International Medical Graduate
IOT - Interim Orders Tribunal
MPT - Medical Practitioners Tribunal
PMQ - Primary Medical Qualification
PE - Provisional Enquiry

Notes

Source: Management information from General Medical Council (GMC) Fitness to Practise activity.

The counts are as at 18 September 2019, when the data was downloaded.

The year is based on the date the complaint that led to an investigation was received.

The year-on-year changes should be interpreted with caution

- complaints that were received recently are more likely to be still being investigated.

The outcomes counted in this table are 'first-instance' decisions, not final outcomes.

For explanations of terms used in this table, please consult the SoMEP report or the GMC web-site www.gmc-uk.org.

Notes

Source: Management information from General Medical Council (GMC) Fitness to Practise activity.

The counts are as at 18 September 2019, when the data was downloaded.

The year is based on the date the complaint that led to an investigation was received.

The year-on-year changes should be interpreted with caution

- complaints that were received recently are more likely to be still being investigated.

The outcomes counted in this table are 'first-instance' decisions, not final outcomes.

For explanations of terms used in this table, please consult the SoMEP report or the GMC web-site www.gmc-uk.org.

Notes

Source: Management information from General Medical Council (GMC) Fitness to Practise activity.

The counts are as at 18 September 2019, when the data was downloaded.

The year is based on the date the complaint that led to an investigation was received.

The year-on-year changes should be interpreted with caution

- complaints that were received recently are more likely to be still being investigated.

The outcomes counted in this table are 'first-instance' decisions, not final outcomes.

For explanations of terms used in this table, please consult the SoMEP report or the GMC web-site www.gmc-uk.org.

Notes

Source: Management information from General Medical Council (GMC) Fitness to Practise activity.

The counts are as at 18 September 2019, when the data was downloaded.

The year is based on the date the complaint that led to a case was received.

The year-on-year changes should be interpreted with caution

- complaints that were received recently are less likely to have reached the point of a hearing.

The outcomes counted in this table are 'first-instance' decisions, not final outcomes.

For explanations of terms used in this table, please consult the SoMEP report or the GMC web-site www.gmc-uk.org.

Notes

Source: Management information from General Medical Council (GMC) Fitness to Practise activity.

The counts are as at 18 September 2019, when the data was downloaded.

The year is based on the date the complaint that led to a case was received.

The year-on-year changes should be interpreted with caution

- complaints that were received recently are less likely to have reached the point of a hearing.

The outcomes counted in this table are 'first-instance' decisions, not final outcomes.

For explanations of terms used in this table, please consult the SoMEP report or the GMC web-site www.gmc-uk.org.

Notes

Source: Management information from General Medical Council (GMC) Fitness to Practise activity.

The counts are as at 18 September 2019, when the data was downloaded.

The outcomes counted in this table are 'first-instance' decisions, not final outcomes.

The year is based on the date on which the CE issued a decision or the MPT hearing finished.

For explanations of terms used in this table, please consult the SoMEP report or the GMC web-site www.gmc-uk.org.

Notes

Source: Management information from General Medical Council (GMC) Fitness to Practise activity.

The counts are as at 18 September 2019, when the data was downloaded.

The outcomes counted in this table are 'first-instance' decisions, not final outcomes.

The year is based on the date on which the CE issued a decision or the MPT hearing finished.

For explanations of terms used in this table, please consult the SoMEP report or the GMC web-site www.gmc-uk.org.

Notes

Source: Management information from General Medical Council (GMC) Fitness to Practise activity.

The counts are as at 18 September 2019, when the data was downloaded.

The outcomes counted in this table are 'first-instance' decisions, not final outcomes.

The year is based on the date on which the CE issued a decision or the MPT hearing finished.

For explanations of terms used in this table, please consult the SoMEP report or the GMC web-site www.gmc-uk.org.

Notes

Source: Management information from General Medical Council (GMC) Fitness to Practise activity.

The counts are as at 18 September 2019, when the data was downloaded.

The outcomes counted in this table are 'first-instance' decisions, not final outcomes.

The year is based on the date on which the CE issued a decision or the MPT hearing finished.

For explanations of terms used in this table, please consult the SoMEP report or the GMC web-site www.gmc-uk.org.

Notes

Source: Management information from General Medical Council (GMC) Fitness to Practise activity.

The counts are as at 18 September 2019, when the data was downloaded.

Some or all of the counts for individual years have been suppressed for data protection purposes

- suppressed counts have been replaced with an asterisk (*).

The year is based on the date a complaint was received.

The outcomes counted in this table are 'first-instance' decisions, not final outcomes.

For explanations of terms used in this table, please consult the SoMEP report or the GMC web-site www.gmc-uk.org.

Notes

Source: Management information from General Medical Council (GMC) Fitness to Practise activity.

The counts are as at 18 September 2019, when the data was downloaded.

Some or all of the counts for individual years have been suppressed for data protection purposes

- suppressed counts have been replaced with an asterisk (*).

The year is based on the date a complaint was received.

The outcomes counted in this table are 'first-instance' decisions, not final outcomes.

Doctors in two specialty groups, Medicine and one other, have been counted in the other specialty group.

For explanations of terms used in this table, please consult the SoMEP report or the GMC web-site www.gmc-uk.org.

Notes

Source: Management information from General Medical Council (GMC) Fitness to Practise activity.

The counts are as at 18 September 2019, when the data was downloaded.

The year is based on the date the complaint that led to an investigation was received.

The year-on-year changes should be interpreted with caution

- complaints that were received recently are more likely to be still being investigated.

The outcomes counted in this table are 'first-instance' decisions, not final outcomes.

For explanations of terms used in this table, please consult the SoMEP report or the GMC web-site www.gmc-uk.org.

Notes

Source: Management information from General Medical Council (GMC) Fitness to Practise activity.

The counts are as at 18 September 2019, when the data was downloaded.

Some or all of the counts for individual years have been suppressed for data protection purposes

- suppressed counts have been replaced with an asterisk (*).

The year is based on the date the complaint that led to an investigation was received.

The year-on-year changes should be interpreted with caution

- complaints that were received recently are more likely to be still being investigated.

The outcomes counted in this table are 'first-instance' decisions, not final outcomes.

For explanations of terms used in this table, please consult the SoMEP report or the GMC web-site www.gmc-uk.org.

Notes

Source: Management information from General Medical Council (GMC) Fitness to Practise activity.

The counts are as at 18 September 2019, when the data was downloaded.

Some or all of the counts for individual years have been suppressed for data protection purposes

- suppressed counts have been replaced with an asterisk (*).

The year is based on the date the complaint that led to an investigation was received.

The year-on-year changes should be interpreted with caution

- complaints that were received recently are more likely to be still being investigated.

The outcomes counted in this table are 'first-instance' decisions, not final outcomes.

For explanations of terms used in this table, please consult the SoMEP report or the GMC web-site www.gmc-uk.org.

Notes

Source: Management information from General Medical Council (GMC) Fitness to Practise activity.

The counts are as at 18 September 2019, when the data was downloaded.

Some or all of the counts for individual years have been suppressed for data protection purposes

- suppressed counts have been replaced with an asterisk (*).

The year is based on the date the complaint that led to an investigation was received.

The year-on-year changes should be interpreted with caution

- complaints that were received recently are more likely to be still being investigated.

The outcomes counted in this table are 'first-instance' decisions, not final outcomes.

For explanations of terms used in this table, please consult the SoMEP report or the GMC web-site www.gmc-uk.org.

Notes

Source: Management information from General Medical Council (GMC) Fitness to Practise activity.

The counts are as at 18 September 2019, when the data was downloaded.

Some or all of the counts for individual years have been suppressed for data protection purposes

- suppressed counts have been replaced with an asterisk (*).

The year is based on the date the complaint that led to an investigation was received.

The year-on-year changes should be interpreted with caution

- complaints that were received recently are more likely to be still being investigated.

The outcomes counted in this table are 'first-instance' decisions, not final outcomes.

For explanations of terms used in this table, please consult the SoMEP report or the GMC web-site www.gmc-uk.org.

Notes

Source: Management information from General Medical Council (GMC) Fitness to Practise activity.

The counts are as at 18 September 2019, when the data was downloaded.

Some or all of the counts for individual years have been suppressed for data protection purposes

- suppressed counts have been replaced with an asterisk (*).

The year is based on the date the complaint that led to an investigation was received.

The year-on-year changes should be interpreted with caution

- complaints that were received recently are more likely to be still being investigated.

The outcomes counted in this table are 'first-instance' decisions, not final outcomes.

Doctors in two specialty groups, Medicine and one other, have been counted in the other specialty group.

For explanations of terms used in this table, please consult the SoMEP report or the GMC web-site www.gmc-uk.org.

Notes

Source: Management information from General Medical Council (GMC) Fitness to Practise activity.

The counts are as at 18 September 2019, when the data was downloaded.

Some or all of the counts for individual years have been suppressed for data protection purposes

- suppressed counts have been replaced with an asterisk (*).

The outcomes counted in this table are final outcomes after all review stages.

The year is based on the date on which the MPT hearing finished.

Doctors in two specialty groups, Medicine and one other, have been counted in the other specialty group.

For explanations of terms used in this table, please consult the SoMEP report or the GMC web-site www.gmc-uk.org.

Notes

Source: Management information from General Medical Council (GMC) Fitness to Practise activity.

The counts are as at 18 September 2019, when the data was downloaded.

Some or all of the counts for individual years have been suppressed for data protection purposes

- suppressed counts have been replaced with an asterisk (*).

The outcomes counted in this table are final outcomes after all review stages.

Doctors in two specialty groups, Medicine and one other, have been counted in the other specialty group.

For explanations of terms used in this table, please consult the SoMEP report or the GMC web-site www.gmc-uk.org.

The counts are as at 18 September 2019, when the data was downloaded.

The outcomes counted in this table are 'first-instance' decisions, not final outcomes.

Table includes only doctors who held a licence to practise when the complaint starting the activity arrived.

For a doctor who has more than one FtP involvement only the one most serious outcome is counted for 2012-2018 period.

For explanations of terms used in this table, please consult the SoMEP report or the GMC web-site www.gmc-uk.org.

Notes

Source: Management information from General Medical Council (GMC) Fitness to Practise activity.

The counts are as at 18 September 2019, when the data was downloaded.

Some or all of the counts for individual years have been suppressed for data protection purposes

- suppressed counts have been replaced with an asterisk (*).

The outcomes counted in this table are 'first-instance' decisions, not final outcomes.

Table includes only doctors who held a licence to practise when the complaint starting the activity arrived.

For a doctor who has more than one FtP involvement only the one most serious outcome is counted for 2012-2018 period.

For explanations of terms used in this table, please consult the SoMEP report or the GMC web-site www.gmc-uk.org.

Notes

Source: Management information from General Medical Council (GMC) Fitness to Practise activity.

The counts are as at 18 September 2019, when the data was downloaded.

Some or all of the counts for individual years have been suppressed for data protection purposes

- suppressed counts have been replaced with an asterisk (*).

The outcomes counted in this table are 'first-instance' decisions, not final outcomes.

Doctors in two speciality groups, Medicine and one other, have been counted in the other speciality group.

Table includes only doctors who held a licence to practise when the complaint starting the activity arrived.

For a doctor who has more than one FTP involvement only the one most serious outcome is counted for 2012-2018 period.

For explanations of terms used in this table, please consult the SoMEP report or the GMC web-site www.gmc-uk.org.

Notes

Source: Management information from General Medical Council (GMC) Fitness to Practise activity.

The counts are as at 18 September 2019, when the data was downloaded.

Some or all of the counts for individual years have been suppressed for data protection purposes

- suppressed counts have been replaced with an asterisk (*).

The outcomes counted in this table are 'first-instance' decisions, not final outcomes.

Doctors in two speciality groups, Medicine and one other, have been counted in the other speciality group.

Table includes only doctors who held a licence to practise when the complaint starting the activity arrived.

For a doctor who has more than one FfP involvement only the one most serious outcome is counted for 2012-2018 period.

For explanations of terms used in this table, please consult the SoMEP report or the GMC web-site www.gmc-uk.org.

Notes

Source: Management information from General Medical Council (GMC) Fitness to Practise activity.

The counts are as at 18 September 2019, when the data was downloaded.

Some or all of the counts for individual years have been suppressed for data protection purposes

- suppressed counts have been replaced with an asterisk (*)

The outcomes counted in this table are 'first-instance' decisions, not final outcomes.

Doctors in two specialty groups, Medicine and one other, have been counted in the other specialty group.

Table includes only doctors who held a licence to practise when the complaint starting the activity arrived.

For a doctor who has more than one FIP involvement only the one most serious outcome is counted for 2012-2018 period.

For explanations of terms used in this table, please consult the SoMEP report or the GMC web-site www.gmc-uk.org.
