

# ANTIQUE RADIO CLASSIFIED

VOLUME 5

OCTOBER 1988

NUMBER 10

## R.C.A. RADIOLA SENIOR

THE NATIONAL PUBLICATION FOR BUYERS AND SELLERS  
OF OLD RADIOS AND RELATED ITEMS - PUBLISHED MONTHLY

## ANTIQUE RADIO CLASSIFIED

Antique Radio Classified (ISSN:8750-7471) is published monthly, 12 times per year, by John V. Terrey, 498 Cross Street, P.O. Box 2, Carlisle, MA 01741 Telephone: (508) 369-9770, 9:00 AM to 9:00 PM only, thanks.

Annual subscription rates within the U.S. are \$19.00 by Second Class mail and \$28.00 by First Class mail.

Annual foreign rates. By air: Canada - \$30.00; Mexico - \$28.00, Other foreign countries - \$55.00. Surface mail to Canada, Mexico & other foreign countries - \$25.00 (Surface delivery to countries other than Canada may take two or more months and cannot be guaranteed.)

Two year subscriptions are twice these rates and receive an extra month. Sample issues are available free on request.

POSTMASTER: Send address changes to Antique Radio Classified, P.O. Box 2, Carlisle, MA 01741.

### STAFF

Publisher and Editor:	John V Terrey
Publishing Staff:	
Betsy Dumka	Chris Fredenckson
Bobby Lyman	
Founding Publisher/Editor:	Gary B. Schneider
Contributing Writers:	Richard L. Arnold
Norman S Braithwaite	Dave Crocker
Alan S Douglas	Mike B. Feher
Richard C Foster	Jim Fred
Frank Heathcote	David W. Kracuter
Jim Kreuzer	Harry Poster
Ron Ramirez	Henry Rogers
Gil Schlehman	Gary B. Schneider
Howard Stone	Ralph Williams
John P. Wolkonowicz	

**PURPOSE.** Antique Radio Classified is published for people involved in the radio collecting hobby. Its purpose is to stimulate growth of the hobby through the buying, selling and trading of radios and related items, and to provide a monthly forum for the interchange of ideas and information.

### WRITING TO ANTIQUE RADIO CLASSIFIED.

All correspondence should be sent to:

Antique Radio Classified  
P.O. Box 2, Carlisle, MA 01741.

Your ads, renewals, letters, etc. can be handled faster and more efficiently if (1) each is on a separate piece of paper, and (2) your name, address and SUB# is written on each.

Unfortunately, A.R.C. is not staffed to answer letters with questions about antique radios or requests for advice. However, A.R.C. does solicit letters of interest to its readers and will publish them as space permits. A.R.C. assumes that permission is given for publication of all correspondence re-

ceived unless otherwise indicated.

**GUARANTEE.** You may cancel your subscription at any time and receive a pro-rated refund of that part of your subscription not yet mailed. If errors to ads are made by A.R.C., the ad will be run in the next available issue, free, upon request.

**PAYMENT.** Please send in full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid. Pay in U.S. funds, checks drawn on a U.S. bank or money orders are preferred. Make check out to "A.R.C." U.S. stamps or cash are OK for small amounts. Canadian payers may send a Canadian check in U.S. funds, but must add \$1.00 (U.S.) for conversion costs. On request, subscriptions will be prorated to amount sent, minimum term is one year.

**CHANGE OF ADDRESS.** Please send us both your new and old address and notify us 4 weeks in advance of the change in order to receive uninterrupted copies of A.R.C. Include your old address, SUB# and expiration date along with your new address. Note when your new address is effective. Temporary address changes can be made also.

**SUBMISSION OF MATERIAL.** Antique Radio Classified welcomes and solicits information that pertains or relates to the radio collecting hobby. This may include material such as articles, upcoming radio events, meetings, radio books and publication reviews, new radio clubs and organizations, radio auctions and price reports, sources of old radio and restoration supplies, and any other material that would be of interest to the hobby. All material submitted should be typewritten and verified for accuracy. Unless prior arrangements are made, all submitted materials become the property of Antique Radio Classified and will not be returned.

**MAILING OF ISSUES.** A.R.C. is available by subscription in the U.S. either by First Class or Second Class mail (Second Class is the way most magazines are mailed). First Class copies usually are received by the fifth of the month; copies by Second Class mail, by the tenth. The mailing of First Class copies is staggered, with those living farthest away mailed on the first day, and local copies mailed the last day. All non-U.S. copies are mailed on the first day. All Second Class copies are mailed on the last day. Mailing is usually completed by the 25th of the month.

**ETHICS.** No person involved in the production of A.R.C. is to act on any information in the magazine until they receive their copy through the mail.

**DISCLAIMER.** The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

Antique Radio Classified subscription rates, frequency of publication, content, size and ad rates and details are subject to change at any time by A.R.C.

## DISPLAY AND BUSINESS CARD ADS - DETAILS AND RATES

The deadline for display and business card ad artwork, payment and repeat requests is the first of the month. Late ads will be run only if space and time permits. As artwork is reduced to 63% in the printing process, originals should be the artwork size listed below. Do not send in artwork on art board or negatives. Ads should be typeset or typed neatly with a carbon ribbon. If you want us to prepare your ad, include the one-time cost listed below for A.R.C. to make up the ad. Please read payment terms above. \*Tear sheets\* will be sent only for 1/2 and full page ads, if requested when ad is submitted.

Page	Artwork Size (send in this size)		As Printed (size in magazine)		Cost for	Cost for	Cost for	One-time Cost for A.R.C. to makeup Ad (if requested)
	H x W (inches)	H x W (inches)	H x W (inches)	H x W (inches)	1-month	3-months	6-months	
Full	11 13/16 x 7 1/2	6 5/8 x 4 3/4	6 5/8 x 4 3/4	6 5/8 x 4 3/4	\$70.00	\$189.00	\$355.00	\$24.00
1/2 H	5 1/4 x 7 1/2	3 5/16 x 4 3/4	3 5/16 x 4 3/4	3 5/16 x 4 3/4	35.00	94.00	178.00	12.00
1/2 V	11 13/16 x 3 9/16	6 5/8 x 2 1/4	6 5/8 x 2 1/4	6 5/8 x 2 1/4	35.00	94.00	178.00	12.00
1/4	5 1/4 x 3 9/16	3 5/16 x 2 1/4	3 5/16 x 2 1/4	3 5/16 x 2 1/4	18.00	48.00	91.00	6.00
1/8	2 5/8 x 3 9/16	1 5/8 x 2 1/4	1 5/8 x 2 1/4	1 5/8 x 2 1/4	9.00	24.00	46.00	3.00
Business Card	2 x 3 1/2	1 1/4 x 2 1/4	1 1/4 x 2 1/4	1 1/4 x 2 1/4	not avail.	15.00	28.00	2.00

The 3-month rates represent about a 10% discount, the 6 month rates, 15%. We have no agency discounts.

Photos should be at an 85 line screen; otherwise, add \$5.00 per photo for screening. (Do not glue photos to artwork; submit separately.) If you are confused by these requirements and terms, please write or call A.R.C. before beginning to prepare your ad. We will be happy to advise you on your ad ideas, estimate how much the ad will cost, recommend an ad size, etc.

We assume that advertisers want all ads which are submitted to run without delay; therefore, we will run the ad and bill for any additional work required for the ad to meet A.R.C.'s specifications. A late ad will be run beginning with the next month.

Advertising is accepted only for items related to antique radios, communication, electricity, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers agree to respond promptly to inquiries and orders, and to resolve problems promptly if the buyer is not satisfied.

## EDITOR'S COMMENTS

Surprised to receive A.R.C. early? Yes, A.R.C. was mailed about as early as possible this month. As we have mentioned before, A.R.C. is not mailed on a certain day of the month. Although the classified ad deadline is always the tenth of the month, the proximity of weekends and holidays can extend the time needed to complete the pages for printing and then mailing.

**Renewal time** is here for many of you. I mention this again because more subscriptions expire in September than in any other month. So check your mailing label for your "EXP" month, and renew now so you don't miss any issues of A.R.C.

**This issue** features early battery sets. Richard Arnold leads with an article on the Aeriola/Radiola Senior, the set on this month's cover. The story of the restoration of an Atwater Kent Model 20 Compact receiver follows. Richard Foster offers an item on duplicating old lacquer finishes, and Paul Giganti sent in an article on the Marconiphone Model R.B.7, a six-tube British set.

William Sureck reports on the Bob Shuck auction held in August, and Gil Schlehman contributes another *Telegraph Key Review*. The popular *Photo Review* appears with its usual variety.

**Club Spotlight** features the Northland Antique Radio Club. This new club has quickly grown into a major regional club, and many collectors have added its "Radio Daze" meet to their list.

**Problems.** Since I have been publishing *Antique Radio Classified*, I have received only a trickle of letters reporting problems between buyers and sellers. Although, as stated on the masthead, A.R.C. cannot assume any responsibility in these matters, we do try to help the individuals involved resolve their problems. The trickle grew to over a dozen complaints these last several weeks. I hope the following commentary on typical (some exaggerated) situations will help.

"He said it was in mint condition; I wouldn't put it much above fair!" Sellers, please describe your items fairly and completely, and be aware that what you may consider excellent condition, others may not. The terms excellent/good/fair are only a starting point in describing condition; buyers should ask detailed questions about any restoration work, reproduction parts, repainting, rewiring, rust, etc. before a purchase.

"It has been three weeks, and I haven't received my set yet." Sellers, be timely and don't procrastinate. Buyers, be patient as shipping can

take seven to ten days or more.

"The set was received broken." Did you know that UPS does not consider it poor handling if it drops a box from a height of thirty inches onto its corner! Notice how new products you purchase must be custom packaged with styrofoam to survive shipment today. Although we cannot duplicate this type of packaging, protecting your item from both external and internal damage is important.

Double-boxing when shipping is best to protect the set from external damage; this means packing the set in one box and then packing the boxed set in a second box, with at least two inches of padding between. Foam rubber, bubb'e pak or styrofoam balls (peanuts) are best; newspaper gets compressed.

Often overlooked is protecting the radio from itself! If the box is dropped, heavy components can damage the cabinet and other parts of the radio. A heavy speaker in a cathedral can be ripped from the front panel if the boxed set is dropped on its back. Remove heavy components and perhaps the entire chassis (especially with plastic radios), and ship them in a separate box.

Unfortunately, fraud seems to appear in any activity if enough money is involved. The ad crossed out on page 25 of the August issue was from an individual, Jerry Gabell of Simpsonville, S.C., who since then has been arrested for breach of trust with fraudulent intent and for obtaining goods under false pretenses. Just before we mailed the August issue, we heard of the pending action and, by hand, crossed out his ad in over 3500 copies. Fortunately, this situation is the exception among those who advertise in A.R.C. and other radio publications. Many successful transactions take place each month as a result of A.R.C., and I hope that this occurrence doesn't spoil it for all.

As many of you receive this issue, I will be at the A.W.A. Canandaigua meet; I hope to meet many of you there. There is life after Canandaigua, however. October looks like another big club meet month; try to make it to one.

Happy collecting.

John V. Terrey

## ON THE COVER

The drawing of the RCA Radiola Senior on this month's cover comes from the *Radio Handbook*, compiled and edited by the International Correspondence Schools, © 1924. This handy book is quite inexpensive to purchase today and is full of theory and radio information.

Richard Arnold's article in this issue covers the Westinghouse Aeriola Senior, which later became the Radiola Senior.

## OOPS!

The Scott Allwave 15 in last month's issue was in an Imperial cabinet, not in a Waverly Grand cabinet as was stated.

## WITH THE COLLECTORS

### Westinghouse, G.E., R.C.A. and the Aeriola/Radiola Senior

BY RICHARD ARNOLD

*The complete story of the beginnings of the Radio Corporation of America would fill a volume; here Richard Arnold gives us a brief glimpse of the complexities of the early days of RCA, Westinghouse and General Electric.*

*The discussion of RCA leads into one of RCA's most successful sets, the Aeriola Senior, later called the Radiola Senior after a metal tag replaced the paper lid instructions and the box was made of mahogany instead of gumwood. More information on RCA and the Aeriola/Radiola Senior can be found in the references at the end of the article. The Editor.*

#### THE BEGINNINGS (in brief) OF RCA

The Radio Corporation of America, now called RCA, was formed in 1919. After World War I, the U.S. Navy was getting out of the transatlantic communications business which it had taken over from the Marconi Wireless Telegraph Company during the war. The U.S. Navy, along with the then Acting Secretary of the Navy Franklin D. Roosevelt, wanted an American company, instead of the British-owned Marconi Wireless Telegraph Company of America, to control commercial transmissions. The only problem was that Marconi was the one company which had the capability to handle these transmissions.

Before the war, the General Electric Company and Marconi of America had negotiated for just such a purpose, but the war put an end to the talks. General Electric had the power and patents on Alexanderson high frequency alternators, which at the time were the most practical means to generate high frequency signals. Marconi had the stations and equipment, so the two companies used each other's facilities.

To solve this dilemma, in October of 1919, the physical assets of the Marconi Company and actual operation were transferred to a new entity, RCA.

Separately, Westinghouse had purchased the rights to patents including the Armstrong regenerative circuit and started experimenting in voice receivers. By mid-1921, RCA had become the sole sales agent for General Electric and Westinghouse.

#### EARLY BROADCASTING

Westinghouse started the first radio station licensed by the Department of Commerce on October 27, 1920. This station, KDKA operated by Dr. Frank Conrad, went on the air to broadcast the election returns in November of 1920. Although an RCA station broadcast the Dempsey/Carpentier prize fight on July 2, 1921, regular

Figure 1. Westinghouse Aeriola Senior.

RCA broadcasting did not begin until December of 1921. By September of 1922, approximately 537 stations were on the air. All American stations operated between 200-546 meters while stations in Europe operated on 186-4,000 meters.

Before the early broadcasts, RCA had been manufacturing some radio equipment to sell to amateurs. Following these broadcasts RCA began selling radio equipment made by General Electric and Westinghouse. Thus, RCA entered the broadcast receiver business. About a year later RCA advertised its complete line of home receivers in its publication *Radio Enters the Home* (June 1, 1922).

#### THE AERIOLA SENIOR

A 1922 Montgomery Ward catalog lists a complete Aeriola Senior outfit for sale. A complete outfit consisted of the following items: the tuner; a WD-11 vacuum tube; a set of 2,000 ohm Brandies headphones; one 1 1/2 volt American dry

cell battery; one Signal Corps B battery; 150' of copper, aerial wire; 25' of insulated ground wire; one single pole double throw switch; a lightning arrester; four porcelain insulating knobs; two aerial wire insulators; two screw eyes; a porcelain wall tube; and one ground clamp. All this weighed 16 pounds and sold for \$69.

RCA billed the receiver as one of the latest and most advanced in the radio field. The Aeriola Sr. used the famous Armstrong regenerative circuit which multiplied the signal many times greater than the Aeriola Junior, a simple circuit receiver. Westinghouse designed the Senior to fill a demand for an inexpensive set with greater range than the Junior's. The Senior operates on a wavelength range of 190-500 meters. Two special condensers each with different capacities break this up to one of 180-350 meters and the other from 330-500 meters.

Regeneration occurs by means of a tickler coil and a variometer mounted by the antenna circuit inductance and connected to the plate circuit. A rheostat controls filament current.

Lightweight, easy and quick hookup, and

childlike simplicity were some of the major selling points. The set operates on a 1 1/2 volt dry cell providing current to the WD-11 vacuum tube and a B or plate battery providing 20 volts or more to the earphone.

By 1926, these one-tube sets were almost exclusively used by beginners and amateurs, but hardly ever for family use. America was big on the three-, four- and five-tube sets.

The Aeriola Senior set today is very popular with collectors and may sell from \$90 to \$110 in good condition. The condition of the instruction paper that fits in the top of the lid is also a factor in determining price. The brass-based tipped WD-11 tube the set originally used now goes for \$25 to \$42 by itself, according to the A.R.C. "Tube Value Survey" in the August 1987 issue.

(Richard Arnold, PO Box 275, Lone Grove OK 73443)

## The Radiola Senior Circuit

The Radiola Sr. receiving set is designed to use a WD-11 three-element electron tube as the detector element. Current obtained from a single No. 6 dry cell will heat the filament of this tube sufficiently, with a reasonable life for both the tube and the dry cell. The main receiving circuit is a special form of the single circuit, arranged so as to require a minimum number of adjustments. It is adapted for receiving on the shorter wavelengths only.

The circuit arrangement of the Radiola Sr. receiver is shown in Figure 2 below. Corresponding devices and terminals are lettered similarly on the cover illustration and in Figure 2 so that reference may easily be made to either figure when reading the following explanation of operation.

The antenna *a* is connected to terminal *b* for receiving on wave-lengths from 350 to 500 meters. This lead has a condenser *c*, which is larger than the condenser *d* connected in the lead from *e*. The antenna is connected to terminal *e* for the reception of signals on wavelengths below 350 meters. Then antenna circuit includes the variometer *f* and fixed inductance coil *g* as well as the ground connection at *h*. The antenna inductance is varied by turning the variometer *f*, which is done by moving a tuning handle on top of the case. The usual grid condenser and grid leak *i*, Figure 2, are connected in the grid circuit of the tube *j*. The filament current is controlled by a rheostat *k*, and the single dry cell is shown at *l*. The connections of the *A* battery in an actual set are indicated by  $-A$  and  $+A$ , Figure 2. The plate variometer *m* is coupled to the input coil *g* for the regenerative feed-back of energy. This variometer has dial on top of the panel called the tickler. The telephone receivers *n* and the *B* battery are shunted by the small fixed condenser *o*, Fig. 6, to provide a complete path in the plate circuit for regenerative radio-frequency currents.

Tuning should be done with the antenna connected to the terminal corresponding with the wavelength over which signals are expected. The filament of the tube should be just sufficiently heated, as burning it too brightly reduces its life materially. With the tickler *m*, Fig. 5, set on its zero position move the tuning handle *f* slowly over its range of values. Adjust it to best position, then increase tickler until maximum strength of undistorted signal is obtained. If the tickler is increased too much, telephone signals will lose their natural tone qualities.

(Adapted from the International Correspondence Schools' "Radio Operator's Handbook," April 1923, page 373-375. This usually inexpensive book is packed with information on early radio circuits and components including the Westinghouse RC and Grebe CR-8 & RORK.)

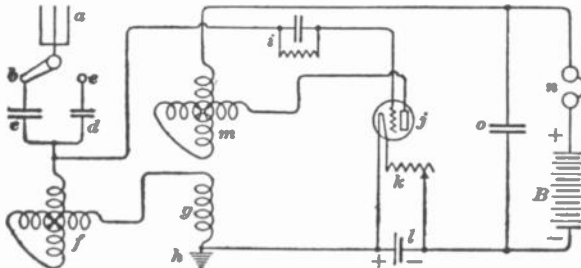

Figure 2. Radiola Senior circuit diagram.

## RESTORATION TOPICS

CONTRIBUTED BY RON RAMIREZ, 807 MAPLE ST., PROVIDENCE, KY 42450

### Restoring the Atwater Kent Model 20 Compact

Introduced around 1925, the Atwater Kent Model 20 Compact was made in two versions. The early version was No. 7570 and had UV tube sockets. The later version was No. 7960 and had UX sockets and a different grid leak circuit. There was also a third version of this set – the Model 21, which was nearly identical to the Model 20 Compact, No. 7570, except that it used UV-199 tubes. The set described in this article is the early version of the Model 20 Compact, no 7570. [The Model 20 originally came out in the "Big Box" version in 1924.]

I have found the Model 20 Compact to be a somewhat common set, as I have seen them in antique stores, at flea markets, and in the hands of collectors. However, when I purchased my set a few years ago, it was the first one I had ever seen. As you can see in Figure 1, it was in pretty rough shape when I bought it. The metal front panel was solid rust; the rust even stained part of the wood cabinet. Some collectors might consider such a set a junker, but I looked it over, saw that it had all its parts, and bought it. I just couldn't pass up the seller's price – twelve dollars.

Let me share with you how I restored this set. First of all, you should remove the metal front panel from the wood cabinet. All of the parts are mounted on this metal panel. The wood cabinet has a few more things you must remove before refinishing it – four metal rings which fit into holes in the back of the cabinet. The battery cable, speaker leads, antenna and ground leads pass through these holes. Also you must remove the metal plates in the back, mounted above these holes, which tell you where the antenna, ground, and speaker leads go. The hinges must be removed, also. And there is a metal plate inside the lid which says "Atwater Kent Receiving Set – Model 20," etc. If you have never refinished an AK box set, when you remove this plate you will get a surprise! The words "NOT GUARANTEED" are etched into the wood behind this small metal plate. Why this was, I do not know.

I will not tell you how to refinish your set because that is a matter of personal taste. You may prefer stain and lacquer, toning lacquer, Tung oil or whatever. [The original finish was lacquer.] I use stain and polyurethane. I will say, however, that I did not get the dark stain out of the cabinet

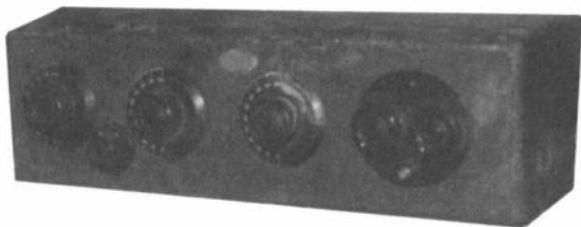

Figure 1. AK 20 Compact "Before"

that the rust caused in one place. After I finished the set, I heard that some collectors use bleach to lighten wood. If you use bleach, be careful!

Now for the hard part – the metal panel. If the metal panel on your set is badly rusted, as mine was, you will have to remove all the parts from it. This is not as hard as it sounds; you just have to be careful. Study the schematic diagram of this set before you proceed, which may be found in Rider's Volume 1. The three tuning knobs are easy to remove; just loosen the set screws and off they come. The three-position antenna switch is held on by two small nuts, and the unit which has the two filament rheostats and the on-off switch is held onto the panel by two screws. The wires going to these units must be unsoldered before you remove them. See Figure 2 to see how they are wired.

After you have removed the parts from the front of the metal panel, you have to remove the rest of the parts if the panel has rust inside and out (mine did). This, too, is fairly easy. Each of the three variable condensers are held onto the front panel by two screws; the tube sockets are held on by screws as is the large bypass condenser at the bottom of the panel. The battery cable is clamped to the bottom of the panel as well. Try to remove only those wires that must be unsoldered in order to remove parts from the panel! Unsolder and remove the audio transformers, noting where the leads go. Each audio transformer is in a cylindrical can, and each is held in place by two screws and nuts at the bottom of the panel.

Once all of these parts are removed, all you have left is the Atwater Kent brass plate at the front of the panel. Depending on the condition of your panel, you can tape over it or remove it. It is held onto the panel by two little "ears." If you do remove it, be EXTREMELY CAREFUL as the ears could be easily broken off!

You should remove as much of the rust as

possible if you want to preserve your set for future generations to enjoy. This is easily accomplished by the use of sandpaper and elbow grease. If the panel is pitted due to extreme rust, use some auto body filler to fill in the pits. Let the filler dry, and then sand the panel until it is smooth. Once you have the panel sanded down, you should spray it with a rust-resistant primer before painting in order to give it extra protection

you can give your set a nice finish that is free of runs. It takes practice...and patience!

When I painted my front panel, I was not sure what shade of brown to paint it. I knew it was brown because of an old AK 20 Compact advertisement I have which was printed in color. I went by the ad and painted it medium brown. Wrong! Every AK box set I have seen since then has a dark brown panel. A good choice for you may be the British Brown "Wrinkle Finish" sold by Antique Electronics Supply in Tempe, Arizona.

Do you remember where you put all those parts? It's time to put it back together, once the paint dries. Also don't forget to replace the parts you removed from the cabinet, once you refinish it!

Before you re-install the audio transformers, you should test them for continuity. They are probably bad, but test them anyway to be sure first. Also check the 600-ohm grid resistors. One is connected between the first variable condenser and the 1st RF tube;

likewise, the other one is connected between the 2nd variable condenser and the grid of the 2nd RF tube. Also check the other parts in the set: grid leak, a few fixed condensers, the filament rheostats and the RF coils. These

(Continued)

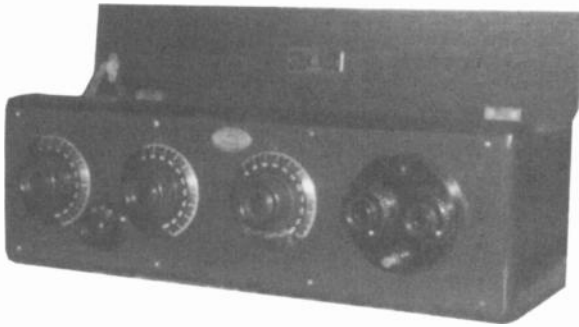

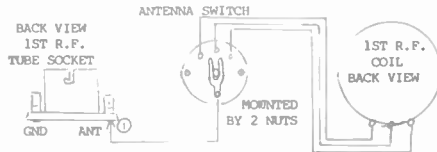

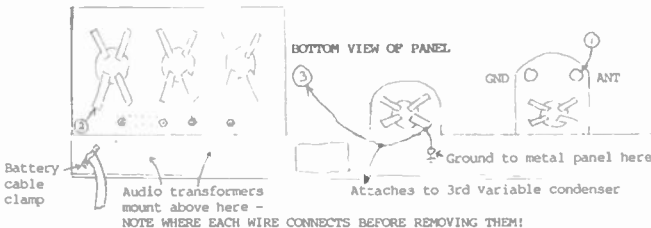

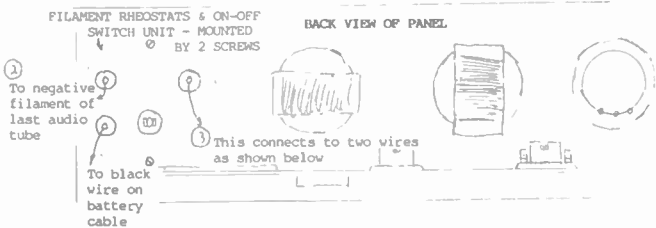

Figure 3. AK 20 Compact "After"

against future rust.

If you are unfamiliar with using spray paint, practice on something before you paint your panel. Once you learn how to use spray paint,

Wiring hookup for the 3-position antenna switch.

Wiring hookup for the filament rheostats/on-off switch unit.

Figure 2. AK 20 Wiring Details

(Restoring the AK 20C, Continued)

parts usually are OK, but test everything anyway to be sure.

If the audio transformers are bad, DON'T just throw the old cans away and bolt in new units in plain sight (unless you don't care if your set looks authentic or not)! Instead, you should remove the old units, which are encased in tar, from their cylindrical cans. There are two methods of doing this — either freeze the cans and then pull the insides out (if, indeed, the tar pulls free of the can after freezing), or heat the cans and pour the tar (and the old audio transformers) out. This heat method may be the easiest (and the messiest). There is also a third, and very time-consuming, method: chip away at the tar, little by little, until you get it all out.

Once the old transformers are out of the cans, you can put new ones in them or possibly, if you are able to remove carefully the old units, have the old ones rewound. Some collectors apply a high voltage of around five-thousand volts or so to the open windings to restore continuity. I have never tried this, but I have heard that there is a good chance of success when this is done. If you

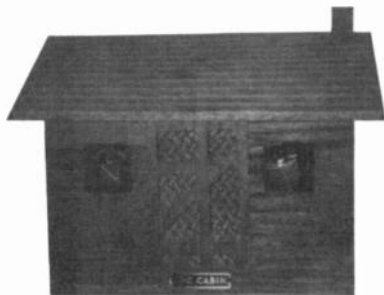

try this, PLEASE use EXTREME CAUTION as the voltage can be dangerous and even FATAL!

Now, once you have electrically restored the set, you can reattach the panel to the cabinet. If yours did not have the screws that mount the panel to the cabinet, use brass screws of the proper size.

The end result of my labors is shown in Figure 3. You may not be able to see it in this picture, but as I mentioned before, there is a dark spot on the top of the cabinet at the front which was apparently caused by the rusted front panel, the only blemish on an otherwise nice-looking set. The set plays as good as it looks, too; this AK 20 Compact picks up stations much better than any of the other five-tube, three-dial TRF battery sets I have restored so far. When hooked to a good antenna and ground, I believe this set performs as good or perhaps even better than most modern sets. I find this remarkable for a 12-dollar "junkie" that my mother-in-law described (before it was restored) as looking "like an old tool box."

Happy collecting!

(Ron Ramirez, 807 Maple St., Providence, KY 42450)

## Log Cabin Radio – An Unusual Novelty Set

BY CHARLES HARPER

Pictured here is a unique novelty radio of the mid-thirties. It's the Log Cabin radio, and the chestnut wood cabinet is shaped like a log cabin, complete with windows, door and chimney. Tuning and volume controls are in the "windows," and the speaker grille covers the "door." The nameplate is brass and red, and says "Log Cabin."

The chassis is a no name four-tube AC-DC TRF, using a 6D6, 6C6, 43 and a 12Z3 rectifier. With the help of my good friend, Howard Granoff, of the Olde Tyme Radio Company in Silver Spring, Maryland, we determined that the chassis was manufactured by Allied Radio Corp. in 1935.

The set is restored and plays like new. The cabinet is in original condition. It's an unusual novelty set, and most novelty collector friends of mine have never seen one like it.

(Charles P. Harper, Jr., 2081 Harmony Ct., Lexington, KY 40502)

## ATTENTION – Federal 61 Owners

Floyd Paul would like to correspond with any owner of a Federal 61. The purpose is to discover what tests and measurements anyone owning a Federal 61 has made. To start the communication link, Floyd has tested and measured every part in his Federal 61 and recorded the values. He has also measured the gain of the first RF stage as well as the three RF stages. The results were most interesting. His results, including frequency response curves, are available to anyone sending a SASE and requesting the information.

If you have tested or measured your Federal 61 and will share the results with Floyd, please send him a copy. Floyd has offered to compile the information and make it known through A.R.C. in a future article. If you just own a Federal 61 and want to test it or operate it, getting Floyd's free information will be of interest to you. How many Federal 61 owners are there out there? Write Floyd A. Paul, 1545 Raymond, Glendale, CA 91201.

## Marconiphone R.B.7 Multi-Valve Set

BY PAUL GIGANTI

Marconiphone is the name given to a variety of wireless receivers manufactured by Marconi's Wireless Telegraph Company, Ltd. Connections to aerial, ground, batteries, etc., are in all cases made by means of non-interchangeable, non-reversible plugs and sockets, thus eliminating the possibility of incorrect connection and shorting of the high- and low-voltage batteries to each other.

The 1922 Marconi R.B.7, one of the largest and today one of the rarest, was capable of receiving British Broadcasting stations in any part of the country, and could receive most BBC stations with a loop aerial. Apart from the remarkable sensitivity, it had (and has) excellent selectivity.

The R.B.7 has six tubes but by means of the reflex circuit the equivalent of seven tubes is obtained. Five stages of RF are used (type D.E.V.), followed by a tube detector (type D.E.Q.) and one stage of AF amplification obtained by using one RF tube to do duty as an AF amplifier.

A 4-volt battery of 40 ampere-hours capacity is used for lighting the filaments. The high voltage supply is 42 volts provided by two batteries in the

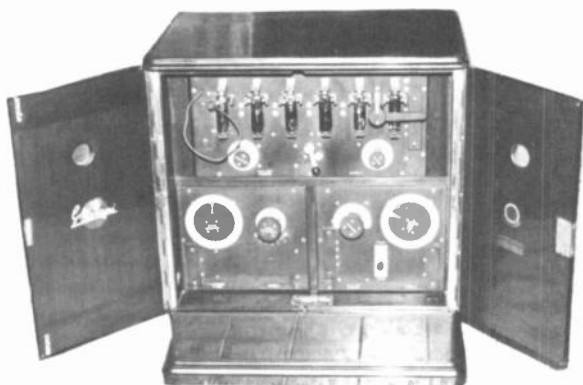

Figure 1. The Marconiphone R.B. 7.

bottom of the cabinet. Any number of tubes, from one to the maximum, may be used by means of a selector clip.

The cabinet is polished mahogany with hinged doors. A legged-table with loop aerial hanging underneath was optional.

This receiver was added to my collection recently; it came from the London area.

(Paul Giganti, 2429 San Carlos Ave., San Carlos, CA 94070)

Reference:

Harmsworth's Wireless Encyclopedia, Volume II, pages 1405-7.

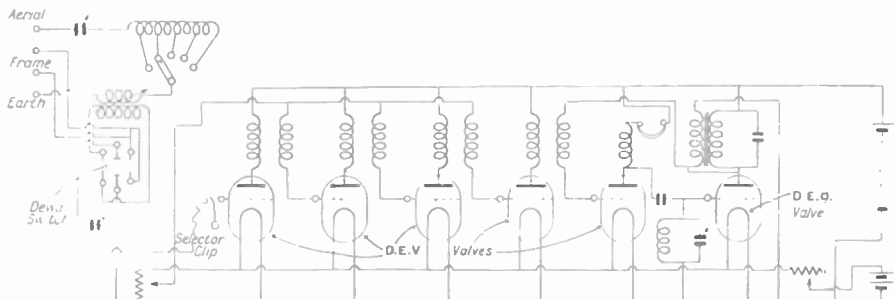

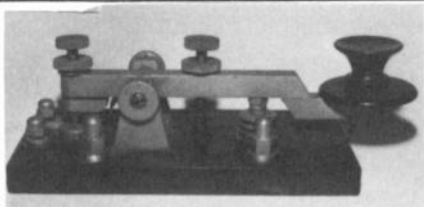

Figure 2. Circuit diagram of the Marconiphone R.B.7 Receiver. The aerial circuit is tuned by means of a series condenser and tapped inductance, and is loose-coupled to a secondary circuit, tuned by a condenser. The loose coupling is partly responsible for the excellent selectivity of the receiver. Regeneration is controlled by a potentiometer (in the lower left of the schematic) which varies the grid voltage. Transformers couple the first four stages of RF amplification in this set. The final stage is coupled by a tuned anode (plate) circuit to the rectifier (detector), the D.E.Q. valve. Note that the audio transformer in the anode of the D.E.Q. valve is coupled back to the grid of the previous D.E.V. valve. This valve serves both as the detector and the audio output (note the headphones in the anode circuit).

# TELEGRAPH KEY REVIEW

CONTRIBUTED BY: GIL SCHLEHMAN, 335 INDIANAPOLIS, DOWNERS GROVE, IL 60515

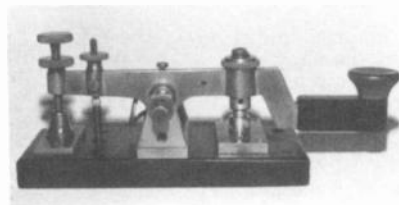

During the course of collecting and searching for radios, many collectors will have the opportunity to acquire telegraph keys and related items. In order to acquaint you to this collecting speciality and broaden your knowledge in this field, the accompanying photos of the Gil Schlehman, K9WDY, collection are presented to show the many types and variations you may encounter. Any questions regarding telegraph keys, please write in care of Antique Radio Classified.

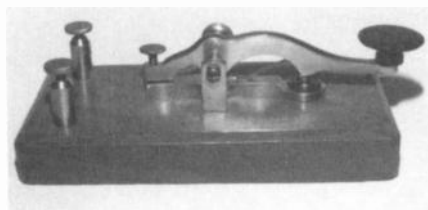

**SPARK ERA KEY** - This was made by the Independent Wireless Co. in 1921. It is of heavy construction on a hard rubber base with cooling fins on the contacts. A very heavy key worth its salt. *Courtesy John Kelley, KA9FV.*

**EDDYSTONE BUG** - The Eddystone Company, one of the very few bug makers in Europe, made the bug pictured here. This company was a major manufacturer of ham gear in the postwar era. One of our servicemen stationed in England in the mid-1950s bought this bug which has the look of a real bug when the top cover is in place. *Courtesy Ken Forbord, K9BKJ.*

**UNUSUAL SPARK ERA KEY** - This very unusual spark era key uses a ball and socket arrangement where a silver ball is suspended between two cupped contacts. Alignment is maintained for the life of the contacts, and then they can be quickly replaced with little effort. A heavy key, thought to be foreign. It may have been made by the Marconi Co. *Courtesy Paul Giganti, W6GVY.*

**EARLY CAMELBACK KEY** - This early camelback key was made by the Hinds & Williams Co. before 1856 when it was taken over and renamed the Chas. Williams Co. It is all brass mounted on a slate base and uses a leaf spring instead of the coil springs of later keys. I worked for over three years to obtain this one and nearly lost it to the big California forest fires a few years ago. *Courtesy Phil Shafer, W7BM.*

Closeup of the contacts on the unusual spark era key.

# AUCTION REPORT

## Bob Shuck Auction Indianapolis, Indiana – August 6, 1988

CONTRIBUTED BY WILLIAM P. SURECK

A large number of radios, radio-related advertising pieces and miscellaneous box lots of old and newer electronic parts belonging to Bob Shuck of Indianapolis, Indiana, were auctioned on August 6. These items were said to be the duplicates/extras and junkers in Mr. Shuck's collection.

Those who attended suffered through a preliminary three hours of auctioning box lots of parts, empty cabinets, and piles of defective (?) modern TV's and stereo components, as well as items unrelated to radio collecting. Potential bidders were enticed to stay by a time-capsule-like cache of 1920's through 1950's radios and radio-related items. A number of rarely seen receivers and advertising pieces were offered, and had been in Mr. Shuck's closed TV repair shop, which had been crammed with hundreds of items, according to the auctioneer.

Over a hundred buyers attended this sale (which lasted several hours), and bidding was fast and furious. The adage that "something is only worth what someone will pay for it" applied well to this sale. Prices seemed inflated on some items, while others brought less than I would have thought.

All items were sold "as is." A sampling of prices with condition follows.

RCA plastic Art Deco sign, exc. cond. ....	\$250
Philco grandfather clock, good cabinet.....	330
Emerson 520, green Catalin, exc. cabinet.....	90
"Time for Crosley" clock, exc. cond. ....	105
Majestic Treasure Chest .....	185
FADA bullet, yellow, exc. cabinet .....	600
Pcra-Bar radio, with glassware, good cabinet .....	205
WWII German, make?, exc. cond. ....	190
Emerson brown tombstone, good cabinet, bakelite ? .....	290
Emerson white tombstone, thin cracks on top .....	160
Bendix mirrored, slight flaking of mirror .....	450
DeWald Catalin, yellow, slight flaking of finish .....	460
Arvin metals, browns and one yellow, ranged from slight chipping to small rust spots 35-40	
Numerous 1920's headsets, poor to good condition .....	5-28
A-rvin clock, cracked face .....	45

(William P. Sureck, 810 S. Cleveland Ave., Arlington, IL 60005)

## Restoration Topics – Duplicating Old Lacquer Finishes

BY RICHARD C. FOSTER

Some collectors may wish to duplicate real lacquer finishes, a thing which is becoming easier to do. If you have spray equipment, it is a fairly simple matter. It is also possible to operate without spray equipment and get excellent results.

Alcohol-soluble aniline dyes are available from large distributors of art supplies and can be used either to tint lacquers or as wiping stains. A carefully shaded stain with walnut dye under lacquer looks very good on walnut or mahogany. On softer wood it tends to highlight the grain too much.

Toning lacquers are now available, and the sanding sealer that is supposed to be used before as a seal coat can double as a clear spray lacquer that doesn't turn white the way clear acrylic does. Alternating coats of clear and walnut toning lacquer with a careful eye to the color can do wonders; if you do your work carefully, you can't tell that you have restored a portion of a finish. One caveat is that toning lacquer acts like paint: it has a lot of pigment and cannot be used as a straight lacquer.

For an excellent description of the techniques of shading, toning and glazing, see *Fine Woodworking* magazine for Jan./Feb. 87, Number 68; there is an article on page 70 that is clear, well written, and worth looking up. In Number 62 of *Fine Woodworking*, there was a lengthy article on clear lacquer, spraying, and aerosol lacquers, along with a list of suppliers.

Toning and clear lacquer in spray cans can be purchased from:

Constantine's  
2065Y Eastchester Rd.  
Bronx, NY 10461, (catalog – \$1.00).

Vintage TV & Radio (offers toning lacquer)  
3552 West 105th St.  
Cleveland, OH 44111

*Fine Woodworking* is available from Taunton Press, 63 South Main St., Box 355, Newtown, Conn. 06470. Some back issues are available.

(Richard C. Foster, 12 Shawmut Ave., Cohituate, MA 01778)

# PHOTO REVIEW

This column presents in pictorial form many of the more unusual radios, speakers, tubes, advertising, and other radio-related items (covering the years 1900-1950's) from our readers' collections. The photos are meant to help increase awareness of what's available in the radio collecting hobby. Send in any size photos from your collection. Photos must be sharp in detail, contain a single item, and preferably have a light-colored background. A short description must be included with each submitted item. Please note that receipt of photos is not acknowledged, publishing is not guaranteed, and photos are not returned.

**CORONADO** - A battery operated radio, it was made sometime in the 1920's, I think. Tubes include 1-A-6, 30, 32, 33 and 34. (From the collection dubbed "Tony's Old Ladies.") (Anthony B. Parks - Franklin Grove, IL)

## **AERO-KING SHORTWAVE ADAPTOR** -

Plug-in coils and a five-pin Type 27 tube are used in this shortwave adaptor. Circa 1929. (Wally Worth - Wollaston, MA)

**ZENITH MODEL S-829** - A seven-tube Superheterodyne, 1934. Unlike other Zeniths, this model does not have a number in front of the model number. The two bottom knobs on the photo are not original. Some of the black finish is coming off. Is this a unique radio? I am looking for information on it. (Jerome Schliepp - Ripon, WI)

## **AIROPHONE RADIO RECEIVER** -

Manufactured by the A. W. Bowman & Co., Cambridge, Mass., & Chicago, Ill. This one-tube set features porcelain-scaled tuning knobs labeled "condenser" and "coupling" and a UV-01-A tube. The panel is clearly marked "The Airophone." McMahon's *Radio Collector's Guide* shows two 1923 sets made by A. W. Bowman and Co. One model is spelled "Airphone," and the other is blank. It is unknown by this collector if there is a misspelling of the model name in the book or if the blank was for the "Airophone." (Charles R. Combs - Albany, MO)

---

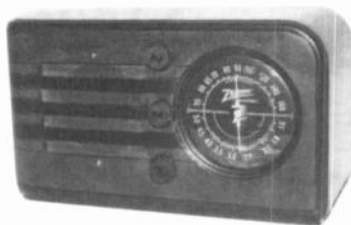

## PHOTO REVIEW

---

**PARMAK** – Six-volt storage battery model, made in 1935. It uses seven two-volt tubes and a vibrator power supply. It has an RF amp and push-pull output. An excellent performer, it is one of the few table models of that vintage to have an 8" dynamic cone for low notes and a balanced armature-ward cone speaker for the high range. (Robert E Lozier, Jr. - Monroe, N.C.)

---

**ZENITH MODEL 6D-117** - A black and walnut table radio with six tubes in a heavy wood case, and with black plastic knobs. Circa 1937. (Wally Worth - Wollaston, MA)

---

**RADIO SPECIALTY COMPANY MODEL T4** - This four-tube set (201A's) looks like a typical California shop set. It has a name decal on its front panel. The company was located in San Diego, CA. (Wally Worth - Wollaston, MA)

---

**RADIOLA III** - With balanced amplifier in an Arco factory case with built-in wooden horn speaker and room for batteries. Circa 1925. (Wally Worth - Wollaston, MA)

---

**ZENITH MODEL 5S126** - This wood table AC set has wooden knobs and an eight-inch speaker in the top. It has five tubes and two bands, and gives an excellent performance. (Wally Worth - Wollaston, MA)

---

# CLUB SPOTLIGHT

## NORTHLAND ANTIQU RADIO CLUB

The two-year-old Northland Antique Radio Club (NARC) has a membership of over 160 collectors in Minnesota, surrounding states, and around the nation and world. NARC aims to preserve the history of radio, television, and related items through activities enhancing members' knowledge of these items and through social contact with fellow collectors.

NARC publishes its *Northland Antique Radio Club Newsletter* six times per year. The ten-page newsletter covers club news along with articles on battery sets, AC sets, radio book reviews, and restoration tips. "Want Ads" are free to members. Each issue usually features a club member with his collection. The newsletter is the attraction for many out-of-state members who cannot attend the Minnesota meetings.

Every second month NARC holds a meeting; the annual meeting is in September. Past meetings have included swap meets, a workshop, picnics, a tour of museums, and speakers. When club membership was smaller, some meetings included open houses at collectors' homes. Two

radio "Show and Tell" meetings included talks on subjects such as The Cutting & Washington Co., The Basics of Collecting Plastic Radios, and Horn Speakers of Unusual Design. The annual indoor swap meet in the winter attracts 125 to 150 collectors, both members and nonmembers.

NARC's big event is its May meet, called *Radio Daze*, held near Minneapolis. This annual occurrence offers a two-day swap meet, radio contest, luncheon, speakers, and awards presentation.

*Radio Daze '88*, held May 20-21 at the Hotel Seville in Bloomington, attracted over 150 collectors from the U.S. and Canada. The AWA (Antique Wireless Association) co-sponsored the event which was twice as big as *Radio Daze '87*. The huge swap meet contained many rare radios such as a Crosley Oracle, Mickey Mantle radio, a DeForest D7A and a Paragon Type Three. The outstanding equipment contest had 13 categories. Guest Speaker Joe Pavek told of his early experiences with radio equipment and introduced his new museum. Over eighty attendees visited Joe Pavek's Museum of Wonderful Wireless in St. Louis Park. Other programs included a slide show of area collections, the first transistor set - the Regency TR-1, a film about collecting Catalin radios, and a film tour of the AWA museum.

The club invites anyone interested in old radios to send a SASE for a sample newsletter and membership form.

### Northland Antique Radio Club NARC

Yearly Dues: \$10 per family

Publication: *The Northland Antique Radio Club Newsletter*, six per year

Membership year: October to September

#### Officers:

President: Jim Thompson  
Vice Presidents: Chuck Bradley and Ed Ripley  
Treasurer: Doug Heimstead  
Secretary & Newsletter Editor: Greg Farmer

### THE NORTH AND ANTIQUE RADIO CLUB NEWSLETTER

*The banner from the NARC Newsletter.*

#### NEXT MEET

In November 1988, the annual indoor swap meet will be at Christ Lutheran Church, North St. Paul, Minnesota. The club welcomes non-members to this event.

# CLASSIFIED ADVERTISEMENTS

**FOR TRADE:** Scott Philharmonic early pointer, Warrington. **WANTED:** Crosley crystal set and detector unit. Larry Wright, 131 Hilltop Dr., Lake in the Hills, IL 60102. (312) 658-5993

**FOR SALE:** Old radio batteries: Philco #B portable battery #P-200, also #P-100 - \$5 plus shipping. Thomas Burnside, 4838 S. Westhaven Dr., Jackson, MS 39209. (601) 922-2235

**WANTED:** Dictogrand Type R12 loudspeaker horn bell. R. D. Chenez, 47 Lake St., Apt. A605, Gardner, MA 01440

**FOR SALE:** Radio-related tie clasps & lapel pins, custom-made. Send a LSASE for our all new illustrated lists. Makes a great gift. Michael Sabodish Sr., 11-A Matawan Ave., Cliffwood, NJ 07721

**WANTED:** List of tubes and chassis location or schematic for Emud Rekord 196 (Antique Radios, p. 68). Victor Marett, 3201 N.W. 18 St., Miami, FL 33125. (305) 634-9569

**FOR SALE:** Send SASE for list of radios and radio-printed material. David McKenzie, KØSVJ, 516 S. Exeter St., Eustis, FL 32726. (904) 589-0149

**FOR TRADE:** Metz beer bottle radio, both labels in very good condition. Trade for Coca-Cola bottle radio or perhaps Pepsi bottle radio in good condition. Send picture. R. King, 3017 Orwell, Lincoln, NE 68516

**FOR SALE:** Neon flicker flame lamps for scanning disk TV experimenters - \$15 ea. Large box of assorted parts for scanning disk TV sets, state your wants. Pilot Candid TV set, 2x3 in. screen, excellent condition. Transvision Model 7BL TV kit, unassembled, still in original box. General Electric prewar 1938 table model TV, covers 3 channels with 3 push buttons, Model HM 171, excellent condition. Phil Weingarten, 67-61 Alderton St., Rego Park, NY 11374. (718) 896-3545

**WANTED:** Televisions. Interesting table models, 1939 mirror sets, RCA TT-5 attachments, scanners. Also unusual primitive typewriters, hand-turned sewing machines. Related literature also collected. Mike Brooks, 7335 Skyline Blvd., Oakland, CA 94611. (415) 339-1751

**WANTED:** Zenith Trans-Oceanic radios. Prefer tube type. Must be reasonably priced. Private collector. Thank you. Phil Van Praag, 11511 N. Quicksilver Trail, Tucson, AZ 85737. (602) 297-6005

**WANTED:** Allen Chapman's juvenile fiction book, Radio Boys to the Rescue. Robert Stapleford, 1800 Randolph, Topeka, KS 66604

**WANTED:** Zenith 9-tube chairside radio Model 9-S-242. Arie E. Breed, 510 Lake Dr., Ottumwa, IA 52501. (515) 682-6925

**FOR SALE:** Phono needle replacements: any magnetic - \$14, any ceramic - \$6. Large selection. Steve Karpiak, 1333 Madison St #9, Hollywood, FL 33019. (305) 587-6720, (305) 923-2336, nights

## CLASSIFIED AD DEADLINES

Oct. 10 for Nov. 1988 Issue

Nov. 10 for Dec. 1988 Issue

Dec. 10 for Jan. 1989 Issue

**WANTED:** Transistor radios, 1950's/early '60s pocket-size type. Send close-up photo, Xerox image, or rough sketch with price to: Roger Handy, PO Box 24527, Los Angeles, CA 90024. (213) 451-4040

**FOR SALE:** Philco Tombstone Model 66. Tombstone 6v farm radio. AK Model 20C. Two new transmitter tubes 813-6L-B66A/866. Majestic table Model 30. Stewart-Warner battery radio. North Home battery radio. Arvin 524, metal case, small, AC. Russell Schoen, E7340 Nietzsche Rd., Clintonville, WI 54929. (715) 823-6744

**WANTED:** I have over 170 different telegraph bugs in my collection; do you have one? Gil Schlehman, 335 Indianapolis, Downers Grove, IL 60515

**FOR SALE:** Radiophone type D-10, DeForest portable reflex 4-tube, 1923 - \$750. Metal radios - \$75 ppd. Pat Cutini, 2114 Mair Rd., Ccrlu, NY 14036

**FOR SALE:** RCA rectifier power amplifier, exc. cond., tubes, UV875, 2-UX216B, UX199. UX210 - \$30 plus UPS. Weight approx. 35 lbs. Nelson J. Christenson, 15 Vinebrook Ave., Cornwall-on-Hudson, NY 12520.

**WANTED:** Speaker for Hallicrafters S20R; glass dial for S53, tuning knobs for S38 series. Dave Noon, VE3IAE, 19 Honeysuckle Cr., London, Ontario, Canada N5Y 4P3

**WANTED:** Old jukebox, 40's or 50's, reasonable please, within 50 miles distance from Torrance. Rick Siebler, PO Box 11112, Torrance, CA 90510. (213) 328-4520

**CLASSIFIED ADVERTISEMENTS**

**WANTED:** Radio tube catalogues, listings, substitution tables and other tube-related literature. Herbert Haas, 8516 Thunderbird Ln., Dallas, TX 75238. (214) 341-2708

**FOR SALE/TRADE:** Ray-O-Vac battery novelty transistors, N.I.B. - \$25 ea. or trade. C. Watts, 51 Glendale Rd., Brantford, Ontario, Canada N3T 1P5. (519) 753-5087

**WANTED:** Radionics, electro-magneto-therapy and unusual healing devices. Antique, modern. Examples: Abram's reflexophones and oscilloclasts. Drown's radio-therapy apparatus. Electric-magnetic belts, rings, corsets, medallions, insoles. Hair-growing hats (including Crosley's Xervac). Perkins magnetic tractors. Shaking, electrifying chairs. Electrifying bath. Electric acupuncture. Neurometers. Devices restoring manhood, hearing, sight; removing pain, rheumatism, cancer; hypnotising. Literature. Describe, price. Not interested in common 4D-faradic batteries, "Electreats," UV lamps, Relaxacisors, small vibrators, violet rays. Ole Lindan, 1404 Dorsh Rd., Cleveland, OH 44121

**WANTED:** Grundig table models. Grundig Satellite portables. Admiral All-World Model 909 and RCA Strato-World Model 1-MBT-6. Gary L. Stejskal, 1412 26 St. NW, Cedar Rapids, IA 52405. (319) 396-0341, after 6 PM CST

**WANTED:** Schematic/information - Radiolamp Company of America (Chicago), 5 tube, in base of brass lamp. Sandy Connors, 5 Breyerwood Ct., Hortonville, WI 54944. (414) 779-4167

**Please Save this Want List!****ACME**

Type Y1 Detector & Type Y2 Amplifier  
(small 1-tube units)

Type DY-10 Two-Stage Amplifier  
Type DY-12 Detector & Two-Stage Amp  
Acmehone 3-tube set & built-in speaker

# THE ARMCHAIR RADIO AUCTION

*ATTENTION ... Bidding extended to November 5, 1988*

A private museum of more than 200 fine quality vintage radios, thousands of tubes, equipment, publications and manuals is now being offered for sale to the highest bidder.

A complete tour of this museum, including individual item examination, is available on VHS or Beta format. Also included is a separate print-out of the inventory.

All opening bids must be submitted by midnight, November 5, 1988 to the office of the attorney of this estate. Details of final bidding will be coordinated through the law office of the designated attorney.

For your two-hour copy of the "Armchair Radio Auction" and a print-out of the inventory, send \$15.95 plus \$1.50 shipping and handling to:

**Attorney David O. Gass**  
**c/o Law Offices of Rhode, Nueses & Dales**  
**607 Plaza 8**  
**Sheboygan, Wisconsin 53081**

 Please call! I lost your telephone number.*

# CLASSIFIED ADVERTISING POLICY

**ONE FREE 20-WORD AD** for subscribers in each issue; additional words are 10¢ each. See details below. All classified ads must be received (not just postmarked!) by the ad deadline. Late ads are held for the following issue. Please enclose correct payment with all ads. Stamps or cash are OK for small amounts. (Canadian and other foreign advertisers, please see "Payment" on page two for methods.) "Free words" cannot be accumulated from month to month, "free words" must be "taken" when ad is submitted.

Please write each ad on a separate sheet of paper, especially when included with other A.R.C. correspondence. A 3" x 5" card is suggested if the ad is short. Ads may be sent in advance; again, write each ad on a separate piece of paper and indicate the month (or two months) you want the ad to run.

**Please write legibly and use both capital and small letters. Do not use dashes between words.** Some numbers and letters can look alike, for example 1, l and I (the number one, the capital I and the small L.) Write the following characters clearly (especially in model numbers): 1, l and I; 0, o, Q and D, r and n; 6, b and G, V, U, u, v and Y; A and R; 5, S and s; 2, Z and z. We try to correct spelling errors, so when using an uncommon word or manufacturer which looks similar to a common word or manufacturer, note it so that we do not "correct" it. Editor's comments are in [brackets].

**Advertising is accepted only for items related to antique radios, communication, electricity, etc. All items must be described fairly; reproductions, reprints and not-original items must be identified as such. Advertisers agree to respond promptly to inquiries and orders, and to resolve problems promptly if the buyer is not satisfied.**

Publisher reserves the right to edit ads without notification to the advertiser and to reject ads for any reason. Publisher is not responsible for errors due to illegibly written ads or for any other reason; if requested, the ad will be run in the next available issue at no charge for errors made by A.R.C. All ad rates and details are subject to change by the publisher. See page two for additional information.

## CLASSIFIED AD DETAILS

Classified ads must have a standard heading such as **WANTED, FOR SALE, FOR TRADE, FOR SALE/TRADE, SERVICES, MESSAGE, HELP**, etc. This heading is the only bold or all-capitalized words allowed in the ad. Capitalize only manufacturer names, model names, etc. Wanted and For Sale ads are mixed together to encourage the reading of all ads, including the Wanted ads. This standard ad format makes scanning the ads easier.

Before writing your ad, please look over the ads in a recent issue of A.R.C., and try to write your ad in the same style.

To encourage varied content of the ads, **multiple insertions of the same classified ad are limited to two successive months.** (To run an ad continuously, use a boxed classified or display ad.)

### Classified Ad Rates per Month

Subscribers:

- First 20 words **FREE\***
- 10¢ per word for extra words over 20 plus
- 10¢ per word for a shaded ad (count all words including free words).

\* Subscribers may take 20 free words on only one ad each month.

Non-Subscribers:

- 20¢ per word **plus**
- 10¢ per word for shaded ad.

Please do not forget to send in the extra 10¢ per word when your classified ad runs over the free 20 words, your payment will be appreciated, and it will help to keep A.R.C. healthy.

## BOXED CLASSIFIED AD DETAILS

Boxed classified ads can run unchanged for three months or more. No words are free. Ads may be shaded and may include bold and all-capitalized words freely. The ad need not begin with For Sale, etc. Boxed classified ads are placed with the display ads on the lower portion of the page. Minimum run is 3 months, prepaid.

### Boxed Classified Ad Rates per Month

Nonshaded ads:

- 12¢ per word for all words,\* none free, **plus**
- 10¢ per word for each bold word **plus**
- 10¢ per word for each all-caps word.

Shaded Ads.

- 22¢ per word for all words\* **plus**
- 10¢ per word for each all-caps word.

Note: All words in shaded ads are bold.

Non-Subscribers.

Add 15¢ per word to above costs.

\*Three of the total words can be bold-all-caps at no extra charge.

## PHOTO & DRAWING DETAILS

The deadline for ads with drawings or photos is the first of the month.

Drawings and photos are encouraged as the response to your ad is much larger and the reader knows better what you want or are selling. Send in your drawing or photograph and A.R.C. will reduce it or enlarge it as needed.

### Photo and Drawing Rates per Month

\$5.00 per month for each photo or drawing

## IMPORTANT — COUNTING WORDS — IMPORTANT

The **standard headings**: WANTED, FOR SALE, etc., count as **one word** each time used in an ad. **Name, address and (one) telephone number**, count as **6 words**, regardless of length. Ham-call letters and business name can be included in the 6 words and do not count extra. (Note "Jim, (111) 111-1111" also counts as 6 words.) So, please include complete name and address in your ads.

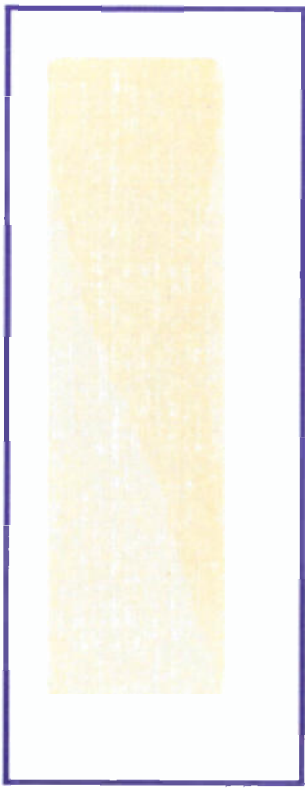

Each additional word, abbreviation, model number or number group, extra telephone numbers, etc. count as one word. Hyphenated words count as two words.
