Industrial Control & Networking Trends and Roadmap

Alexandra Dopplinger

Global Industrial Segment Lead, Factory Automation & Drives

► Presenter:

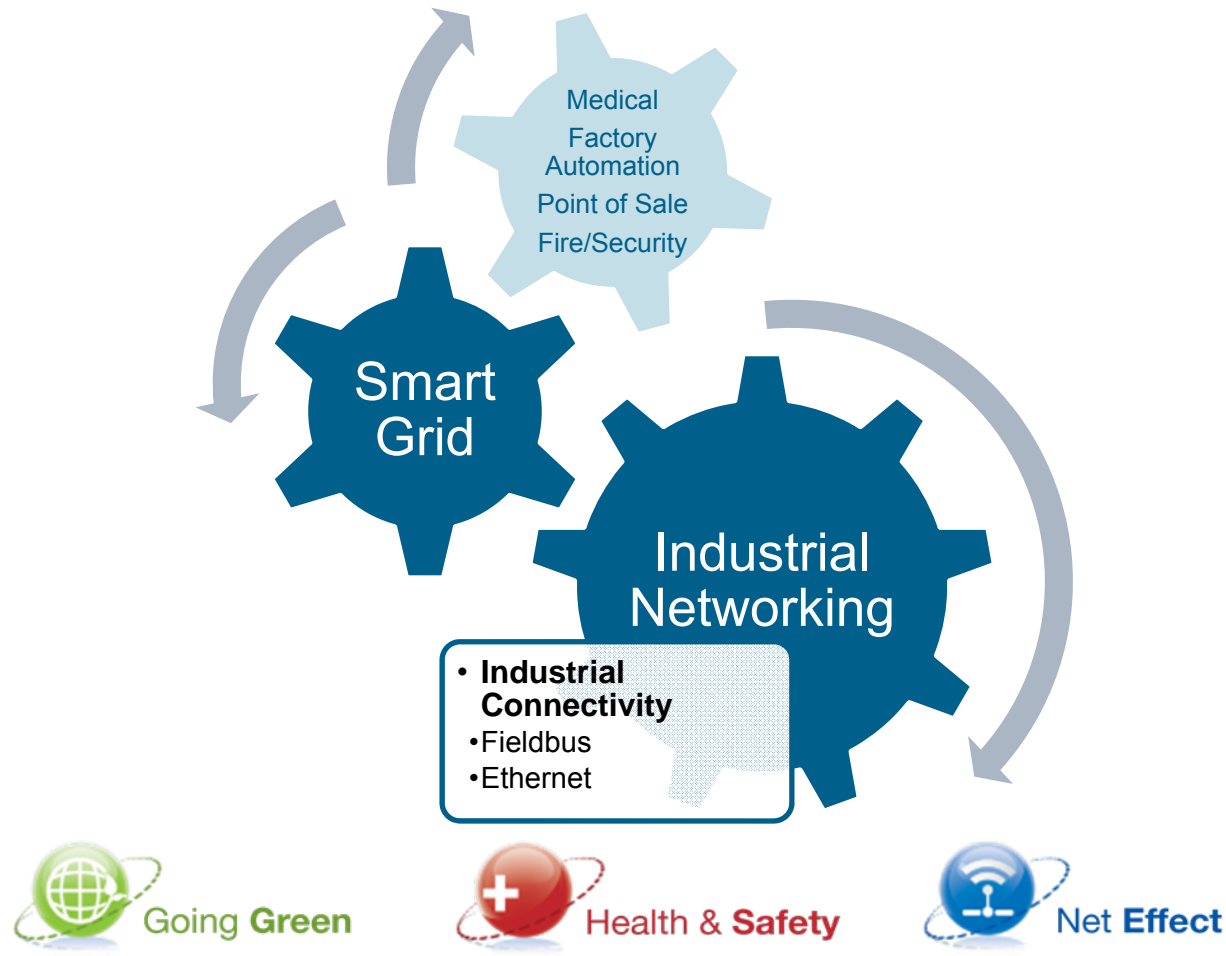

- **Alexandra Dopplinger, Freescale Semiconductor**
 - Global Industrial Segment Lead, Factory Automation & Drives
 - alex.dopplinger@freescale.com
 - +01 613-228-6825 (Ottawa, Canada)
 - Areas of expertise
 - Factory Automation & Drives market
 - Industrial connectivity protocols

- ▶ After completing this session you will be able to:
 - Describe global trends for industrial control and networking
 - Understand which applications Freescale targets in this market
 - Select the best Freescale solution for your industrial control and networking projects
 - Locate the latest reference designs, enablement and partner support for Freescale industrial control and networking solutions

- ▶ Industrial Control and Networking market
 - Target applications
 - Freescale alignment with market trends

- ▶ Industrial Control and Networking solutions
 - Application example: Programmable Logic Control
 - 32-bit processor roadmap for industrial control and networking
 - Industrial network protocol solutions

www.freescale.com/industrial

Factory Network

Industrial Control

Industrial Networking

Human Machine Interface (HMI)

Industrial Drives

Industrial Peripherals

- ▶ Communicate with real-time deterministic protocols
- ▶ Ruggedized for harsh environment

- Industrial Control
 - Programmable Logic Control (PLC)
 - Input-Output Control
 - Process, Temperature, Motion, Position Control
- Industrial Networking
 - Gateway, Router, Switch, Converter, Hub
- Human Machine Interface (HMI)
- Industrial Peripherals
 - Robot, Actuator, Power Management

www.freescale.com/factoryautomation

Freescale Devices are Popular for Industrial Automation

- Microcontrollers & Microprocessors
 - 8-bit MCU
 - 32-bit Kinetis ARM MCU
 - 32-bit ColdFire+ MCU
 - 32-bit ColdFire/68K MCU and MPU
 - 32-bit Qorivva Automotive MCU
 - i.MX Application Processor
 - QorIQ Multicore Processor
 - PowerQUICC Communications Processor
 - Power Architecture Host Processor

- Digital Signal Processors
 - Digital Signal Controller
 - StarCore DSP

- Sensors, Analog & Power Management

- Software and Tools

► And many other companies...

Factory Automation – Market Trends

Market Trend	Customer Requirements
Reuse software, hardware, and tools across platforms	<ul style="list-style-type: none"> ▶ Port software across same platform from 50 to 1500+ DMIPS ▶ Use libraries and reference designs for common functions ▶ Tools to develop increasingly complex algorithms
Reduce power consumption	<ul style="list-style-type: none"> ▶ Fanless operation at -40C to +85C ambient ▶ MPU <4 W max at >1000 DMIPS, with power management ▶ Intelligent motor control - 2009 was 6th year >10% growth (IMS)
Migrate from fieldbus to standardized Ethernet and wireless	<ul style="list-style-type: none"> ▶ Bridge from legacy fieldbus to industrial Ethernet ▶ Industrial wireless emerging in process, sensor arrays and automation
Cost-effective safety and security	<ul style="list-style-type: none"> ▶ IEC regulatory approval requires single-bit failure detection ▶ On-chip security to protect against IP cloning and network data hacking ▶ Improve system-level cost and development cycle

Factory Automation – Rugged. Reliable. Reusable

Market Trend	Freescale Alignment with Customer Requirements
Reuse software, hardware, and tools across platforms	<ul style="list-style-type: none"> ▶ Processor performance from 50 to 20,000+ DMIPS in harsh environments, from -40C to 85C ambient ▶ Increasing enablement to leverage ruggedized Power Architecture®, ColdFire® and i.MX processor portfolios ▶ Longevity program www.freescale.com/productlongevity
Reduce power consumption	<ul style="list-style-type: none"> ▶ MPU up to 1600 DMIPS <1 W max, with power management ▶ MPU up to 5500 DMIPS <8 W max, with power management ▶ MCU, 8-bit and DSC for cost-effective and efficient motor control ▶ On-chip memory & peripherals – flash, timers, ADC/DAC, PWM, I/O
Migrate from fieldbus to industrial Ethernet and wireless	<ul style="list-style-type: none"> ▶ Devices support legacy fieldbus, industrial Ethernet and/or wireless ▶ 3rd party protocol support www.freescale.com/connectivity
Cost-effective safety and security	<ul style="list-style-type: none"> ▶ Secure SRAM, on-chip data fusing to protect against IP cloning ▶ Hardware encryption to protect against network data hacking ▶ Parity, watchdog and ECC protection against soft errors

Factory Automation Solutions

Industrial Control Example

Factory Automation

Rugged. Reliable. Reusable. Freescale offers industrial control and networking solutions for many wired and wireless industrial communications protocols and human machine interfaces. Our safe and secure systems withstand hacking, cloning, tampering and soft errors in harsh environments typical of a manufacturing or processing facilities.

Featured Applications

- Industrial Control
 - Programmable Logic Control (PLC)
 - Input-Output Control (I/O Control)
 - Process Control, Temperature Control
 - Motor Control with Wireless Sensors
 - Motion Control
 - Single Board Computer
- Industrial Networking
 - Fieldbus-to-Ethernet Gateway
 - Industrial Gateway (Router)
 - Industrial Ethernet Switch
 - Industrial Converter (Bridge)
 - Industrial Hub
- Human Machine Interface (HMI)
- Industrial Peripherals
 - Robotic Arm
 - Robotic Manipulator
 - Network-Enabled High-Performance UPS
 - Digital Power Control

Design Resources

- Getting Started

Training & Events

On-Demand Training

- Industrial Network Protocols Training

Read More

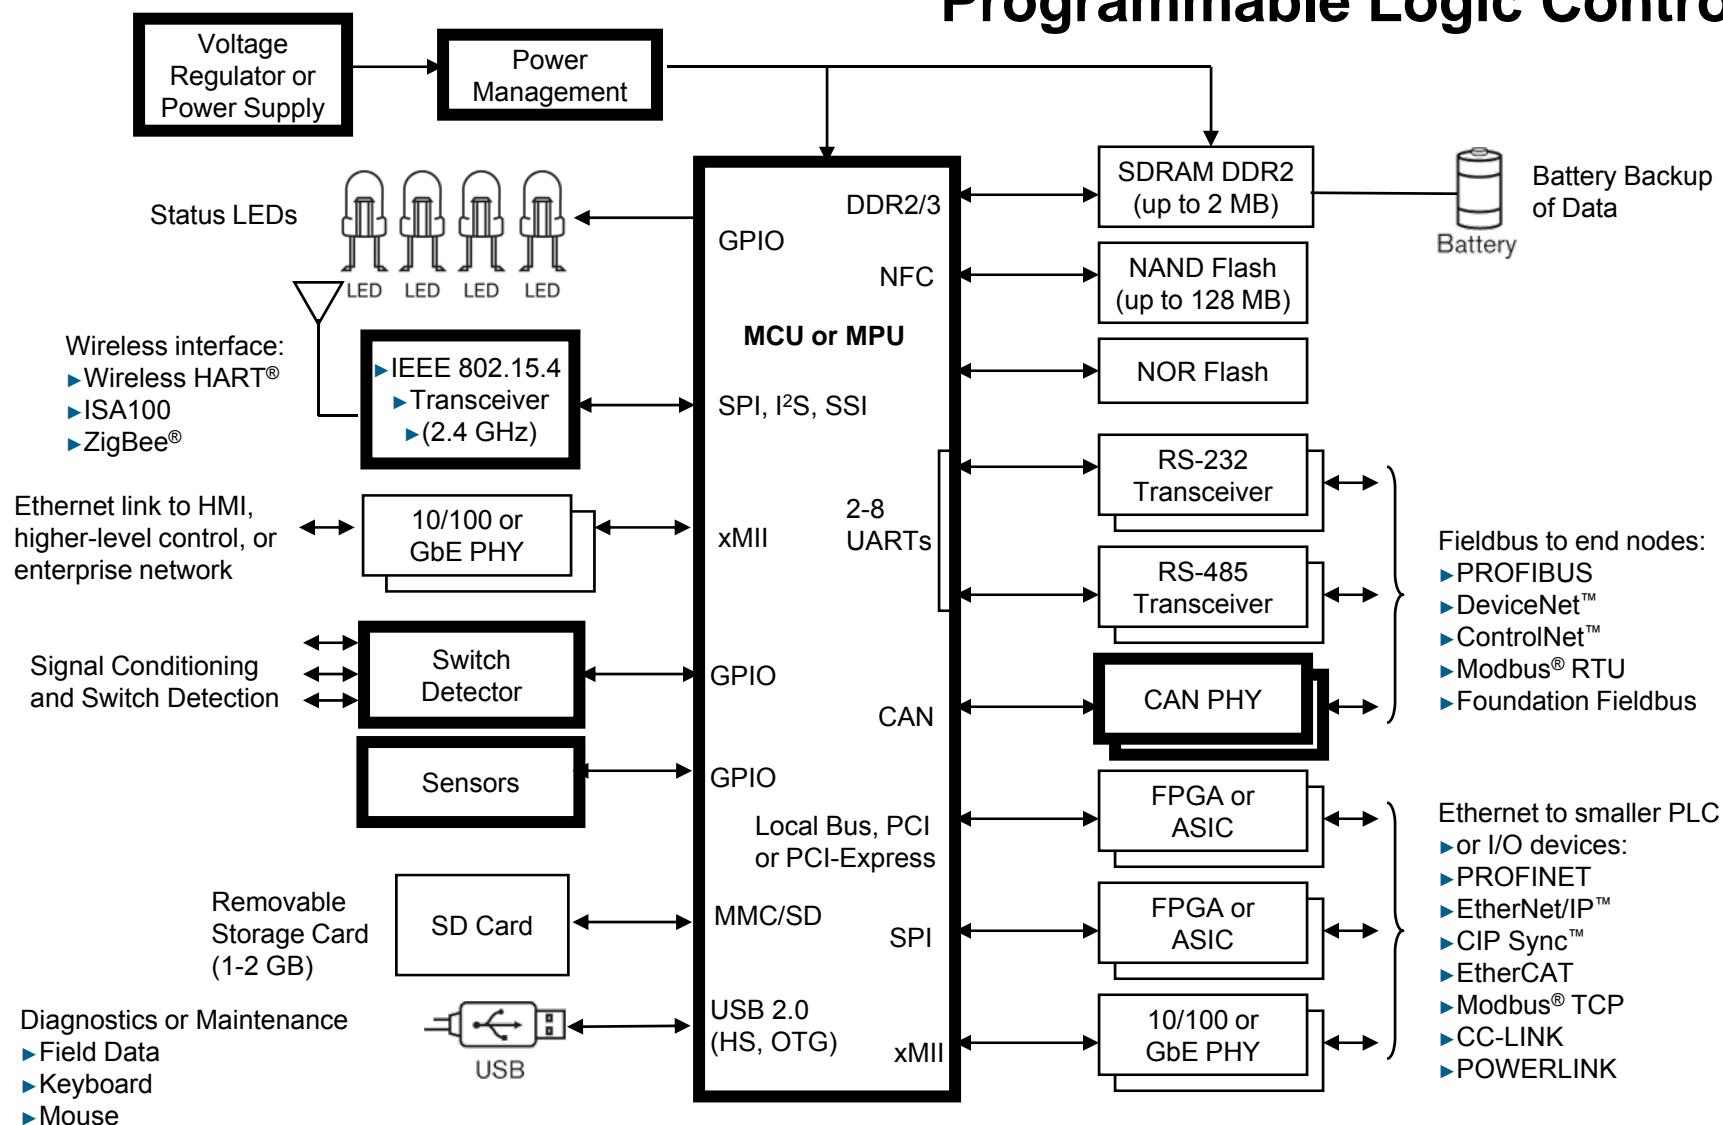

- Industrial Protocol support (PROFINET, EtherNet/IP™, Modbus®, EtherCAT)
- Freescale product longevity program offers up to 15-year availability for selected products

Application Requirements:

- ▶ Control machines and processes with fast, deterministic operation
 - Double precision floating point
 - On-chip cache and flash memory
- ▶ Manage logic, timing sequencing, counting and arithmetic algorithms
- ▶ Connectivity
 - Fieldbus: PROFIBUS, DeviceNet™
 - Industrial Ethernet: PROFINET, EtherNet/IP™, EtherCAT®
 - Binary and analog I/O
- ▶ Fanless operation in harsh environment, -40C to +85C ambient

Programmable Logic Controller

Freescal Solutions for Programmable Logic Controller

- ▶ **MCU or MPU:** On-chip Ethernet, CAN, PCI, UART, USB, I/O, local bus
 - P2020, P1011/12 QorIQ™ multicore MPU, highest MIPS/Watt, 5,500 MIPS <8W max
 - MPC8309 PowerQUICC MPU, 650 MIPS <1.5W max
 - i.MX28x, i.MX51x, ARM core, LCD, touch screen, up to 1600 MIPS <1W max
 - MCF5441x ColdFire MPU, extensive connectivity and motor control peripherals <1W max
 - MCF5225X ColdFire MCU, 512K flash, lowest cost, 80-200 MIPS <1W max
- ▶ **Connectivity:** www.freescale.com/connectivity
 - Industrial protocol support for Ethernet, CAN and serial interfaces
 - Wireless: MC13213, MC13224 integrate MCU with 2.4 GHz IEEE 802.15.4 wireless transceiver
 - Add antenna and oscillator for complete WirelessHART®, ISA100 or ZigBee® wireless network solution
- ▶ **Ruggedized Sensors:** www.freescale.com/sensors
 - 3-axis accelerometer: MMA8450Q, MMA736L, MMA7455L, MMA7660 for orientation, motion detection
 - Touch or Proximity: MPR121, MPR03x, MPR084
 - Pressure: MPX5999D, MP3V5004, MPXV5050 pressure sensor for vacuum pump monitor
 - Switch detector: MC33972, MC33975 with signal conditioning for up to 22 contacts
- ▶ **Power Management, Voltage Regulator, Power Supply**
 - MC34704 Power Management Unit (PMU) for i.MX25x
 - MC33730 PMU for QorIQ, PowerQUICC, MPC5xxx, ColdFire, 8-bit and DSC products
 - MC13892 PMU operates -30C to +85C with S/W drivers and reference designs for i.MX35x, i.MX51x
 - Voltage Regulator / Power Supply: MC44717, MC34713, MC34726, MC34727, MC33742, MC34700

32-bit Processor Roadmap for Industrial Control and Networking

Newest 32-bit Solutions for Industrial Control

QorIQ Multicore MPU

P2020/10, P1011/12
Pin-compatible across
1000-3500 MIPS <5W,
Extensive connectivity

PowerQUICC MPU

MPC8306/9, MPC5125
400-800 MIPS <2W,
Extensive connectivity

Power Architecture MCU

MPC5604P Automotive
100-400+ MIPS

ColdFire MCU

MCF5441x – 375 MIPS,
2x10/100 Ethernet, USB,
CAN, 5xUART

MCF5225x – 76 MIPS,
512K Flash, Ethernet,
USB, CAN, 3 x UART

ColdFire+ MCU

MCF51QF – Secure, 50-
200 MIPS <1W

MCF51QH – Low Power

i.MX MPU

i.MX51x – 1600 MIPS
<1W, Ethernet, USB, LCD,
graphics, touch screen

i.MX28x – 500 MIPS
<0.5W, 2x10/100 Ethernet,
USB, LCD, touch screen

Kinetis MCU

Pin-compatible across
50-200 MIPS <1W

K60 – Ethernet

K40 – LCD, USB

K30 – LCD

K20 – USB

K10 – Mixed Signal

Included in Product Longevity Program

Freescale Product Longevity Program

- ▶ The embedded market needs **long-term product support**
 - ▶ Freescale has a longstanding track record of providing long-term production support for our products
- ▶ Freescale offers a **formal product longevity program**
 - A broad range of devices are made available for a minimum of **10 or 15 years from the time of launch**
 - Participating Freescale products are listed at www.freescale.com/productlongevity

QorIQ and PowerQUICC High-Performance Processors

► Evolved from industry-leading PowerQUICC communications processors

- Single core @ 800 MHz <3 Watts
- Eight cores @ 1.5 GHz/core <30 Watts
- 10/100/1000 Ethernet, CAN®, UART, SPI, USB, GPIO
- Integrated security processors

► Hybrid software simulation and debug tools

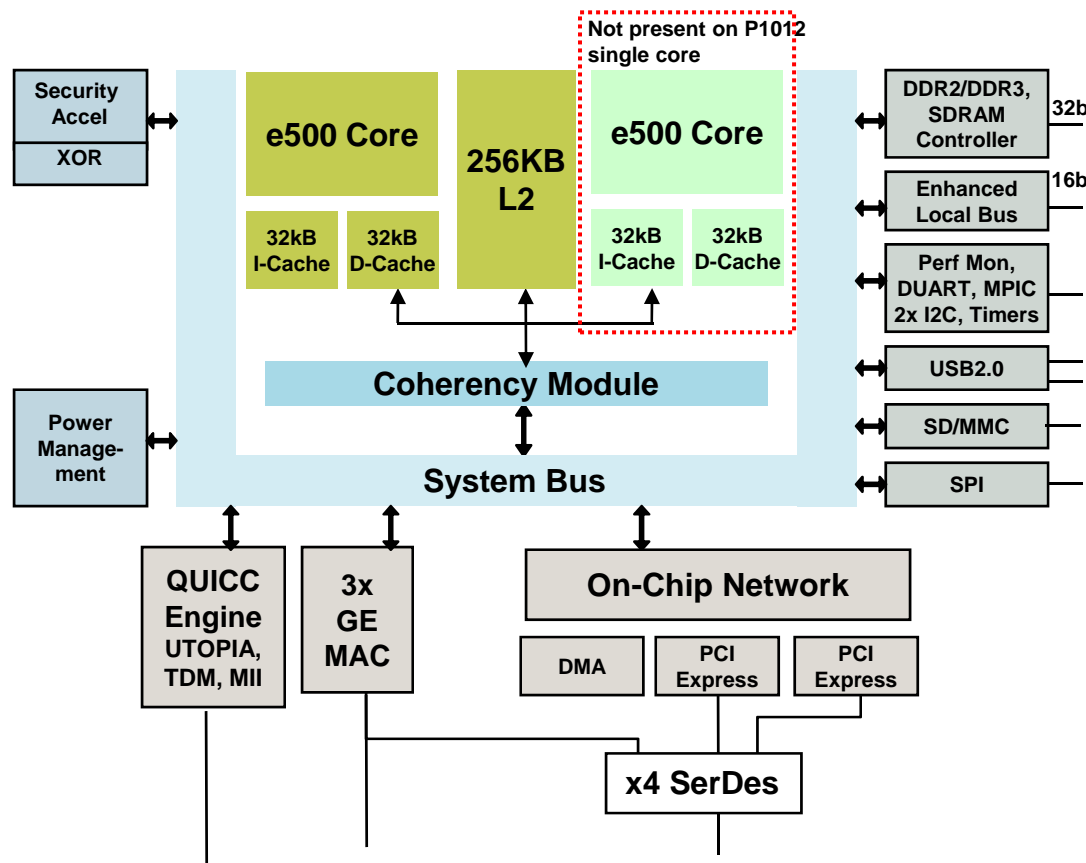

- CodeWarrior multicore development environment
- VortiQa gives production-ready security software

► Industrial qualification and long product life

- Operation in harsh environments from -40C to +85C
- Included in Product Longevity program

Pin-compatible solutions up to 20,000+ MIPS with leading MIPS/Watt

► Single or Dual e500 Power Architecture™ core

- 533 – 800 MHz (up to 1800 MIPS) per core
- 256KB frontside L2 cache with ECC
- 36 bit physical addressing, DP-FPU

► System Unit

- 32-bit DDR2/DDR3, 667 MHz data rate with ECC
- Integrated SEC 3.3 Security Engine
- Open-PIC Interrupt Controller, Performance Monitor
- 2x I²C, Timers, 16 GPIO, 2x UART
- USB 2.0 Controller Host/Device
- 16-bit Local Bus can boot from NAND Flash
- SPI controller can boot from SPI serial Flash
- SD/MMC card controller can boot from Flash cards
- Three 10/100/1000 Ethernet Controllers (eTSEC) with Jumbo Frame support, SGMII interface
 - IEEE® 1588v2 Support
- QUICC Engine® for protocols and legacy interfaces
 - 4 x TDM interfaces with HDLC support
 - 4 x UCC for Serial Protocols, e.g. PROFIBUS
- Two PCI Express 1.0a Controllers up to 2.5Gbps
- Power Management

► Process & Package

- 45nm SOI, 0.95V+/-50mV, -40C to 125C Tj
- 689-pin TePBGAII

Supports Industrial Ethernet and PROFIBUS, low power consumption

Introducing the MPC830x PowerQUICC II Pro Portfolio

For less than \$10, MPC830x PowerQUICC II Pro processors offer 770 DMIPS performance, extensive on-chip connectivity, and fanless operation for industrial and commercial networking applications.

► MPC8308 – 266 to 400 MHz

- Performance/price optimized MPC8308 combines 16/32-bit DDR2 memory controller with ECC, 2 x Gigabit Ethernet, PCI Express, USB and eSDHC targeting smart metering gateways, wireless media gateways, factory automation & test/measurement equipment. In mass production today.

► MPC8306/S – 133 to 266 MHz

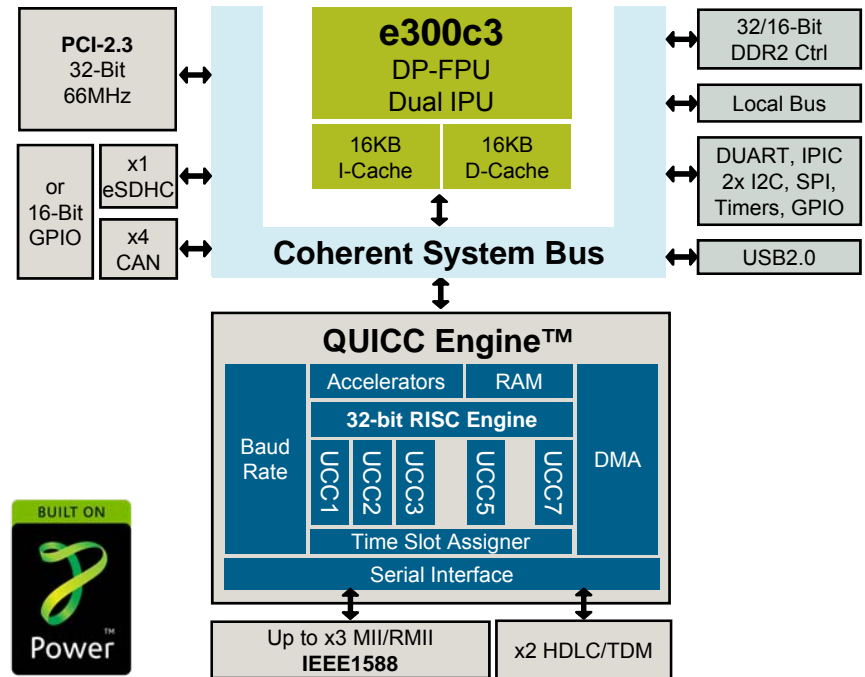

- MPC8306 integrates QUICC Engine, CAN, USB, SDHC and IEEE® 1588 support ideal for industrial control, factory automation and test/measurement equipment
- MPC8306S features QUICC Engine (HDLC/TDM, 10/100) and USB targeting networking equipment such as low-end base station line cards and branch access gateways

► MPC8309 – 266 to 400 MHz

- Richly featured with QUICC Engine, CAN, USB, SDHC, PCI and IEEE® 1588 support for networking, industrial control, factory automation and test/measurement equipment

MPC8309 PowerQUICC Processor

- e300c3 up to 400 MHz
 - ♦ 16K I/D 4-way L1 cache
 - ♦ Double Precision FPU + Dual IU
- DDR2 up to 333MHz
 - ♦ 32/16-bit, with ECC Support
- Local Bus
 - ♦ Both NAND / NOR flash boot support
- x3 10/100Mbps Ethernet
 - ♦ MII / RMII
 - ♦ IEEE1588 Support
- PCI-2.3, 32-bit @ 66 MHz
- x2 HDLC/TDM
 - ♦ Up to 128 channels
- USB 2.0 - Host / Device / OTG
- eSDHC (host controller)
- 4x CAN 2.0B Controllers
- 4x UART, 2x I2C, SPI, GTM, RTC
- 64 Muxed GPIO
 - ♦ MUX'd 16 GPIO with eSDHC / x4 CAN
- Multi-channel DMA controller

- **Power:** Sub-1.6W @ 333MHz CPU, 200MHz QE
- **Package:** 489 MAPBGA, 19x19mm, 0.8mm pitch

Sampling Now, Qualification Feb 2011
10Ku Pricing Starting at **\$8.55**

Low-cost Networking / Industrial Control with PCI-2.3 & 16/32-bit DDR2 w/ ECC

► Evolved from handheld battery-operated devices

- Single core @ 800 MHz <1 Watt
- 10/100 Ethernet, CAN, UART, SPI, SDIO, USB, GPIO
- Integrated video and graphics processors offload CPU
- On-chip power management to increase battery life

► Market-leading human machine interface

- High resolution color LCD controller with touch screen
- Hardware accelerated video processing and graphics rendering
- Camera interface

► Industrial qualification and long product life

- Operation in harsh environments from -40C to +85C
- Included in Product Longevity program

ARM

Starts
<\$10!
(SRP)

Pin-compatible solutions up to 1600 MIPS <1W

► Specifications:

- CPU: Cortex A8, up to 1GHz
- Process: 65nm, LP/GP
- Core Voltage: 0.7-1.1V
- Package: 13x13 0.5mm, 19x19 0.8mm
- Temp Range: -20 to 85C, -40 to 85C

► Camera

- Camera and Display I/F (legacy)
- Image Sensor Processor (ISP)
- Up to 8Mpixel @ 15fps, Up 133Mpixel/sec
- Resizing, Inversion, Rotation
- Color Space conversion, video/graphics combining

► Display

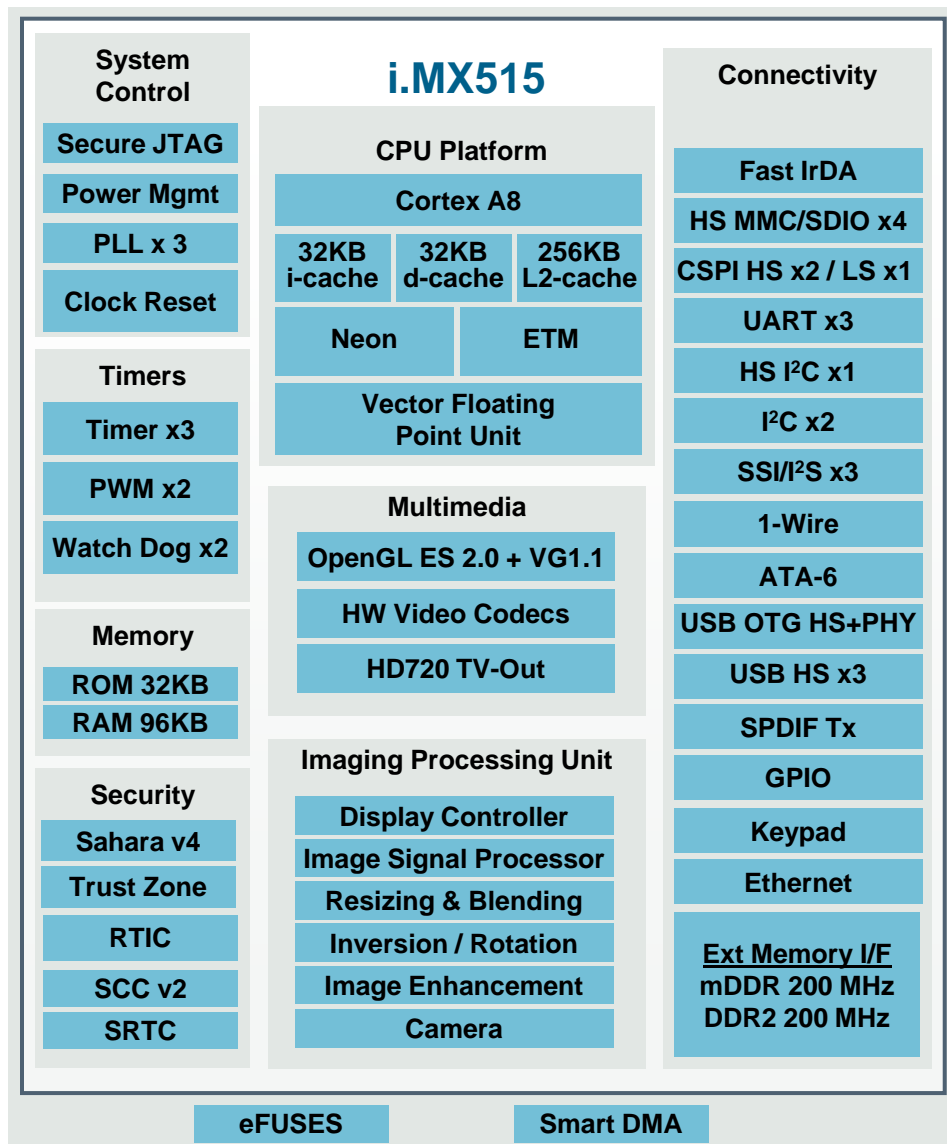

- Display I/F (legacy and MIPI DSI)
- Up to WXGA display - 24 bit @ 60fps
- Secondary Display Support

► Connectivity

- High speed USB OTG w/ embedded Phy, Host HS x3
- Up to 400Mbps MobileDDR, DDR2
- SLC/MLC NAND Flash 8/16-bit, NAND/NOR
- High speed MMC\SDIO, UART, I2C, SPI
- ATA-6
- 3.3V support on HD, SDIO, and SIM I/F

► Security

- TrustZone
- AES, DES/3DES, SHA-1, SHA-224, SHA-256
- Run time integrity checker (RTICv3)
- Secure High Assurance Boot
- Security Controller (SCC), including Secure RAM and Security Monitor
- Random Number Generator Accelerator
- Secure JTAG Controller
- Secure real-time clock
- Universal Unique Identification
- Tamper Detection

Introducing the Newest Freescale Industrial MPUs

i.MX28x

- ARM9™ architecture
- <0.5 W for hand-held and battery-powered applications
- On-chip power management
- Graphical display controller
- Secure boot
- Linux® OS and Windows® Embedded CE OS

Shared features:

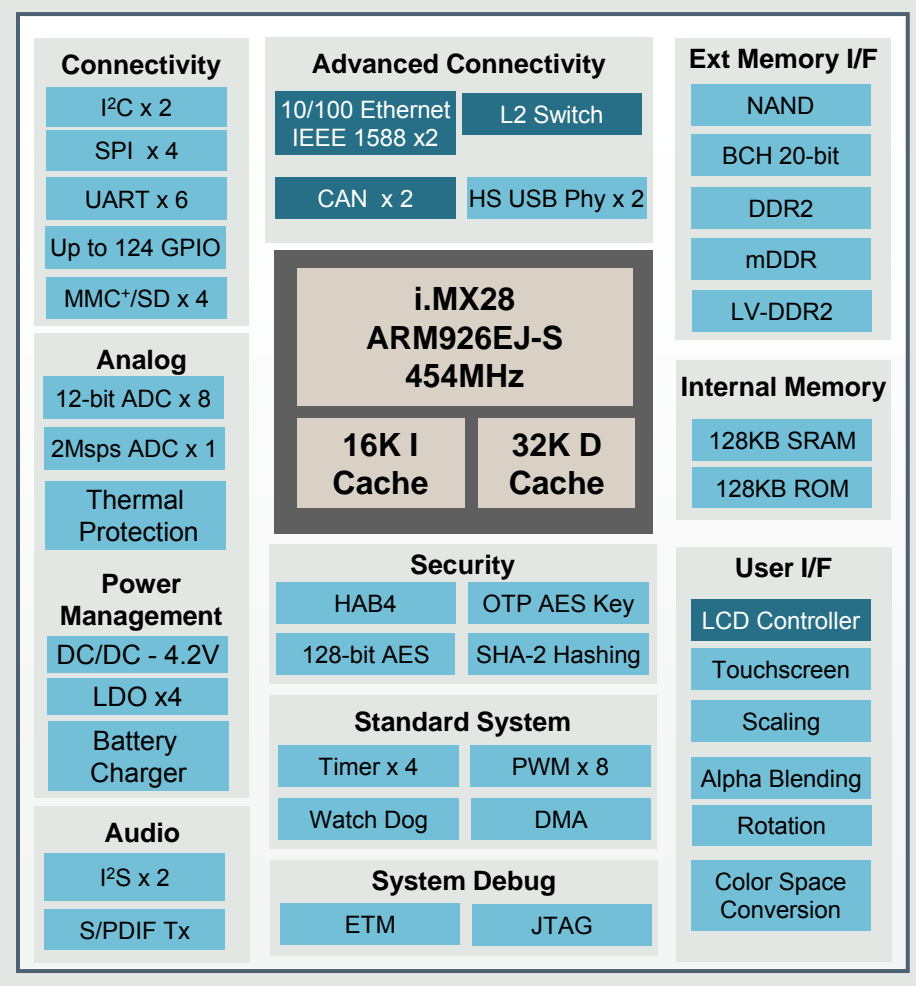

- Extensive connectivity
- Dual 10/100 Ethernet with IEEE® 1588 time-stamping
- 3-port Layer 2 Ethernet switch (L2 Switch)
- <0.5 W for fanless operation
- Industrial Qualification
- Product Longevity –15 years

MCF5441x

- ColdFire™ V4 architecture
- Motor control integration - PWM Timers, DACs, ADCs
- 10 serial ports
- DACs for sensors and audio interface
- True Random Number Generator (RNG) for enhanced data security
- MQX™ RTOS, Linux OS, and CodeWarrior™ v10

► Key Features and Advantages

- ARM9 Core with 454 MHz performance
- <0.5 W maximum power
 - On-chip Power Management for device and external components
 - Freescale Energy Efficiency Mark
- Display interface with touch screen
 - Rich user experience
- Extensive connectivity
 - Dual 10/100 Ethernet with IEEE 1588 hardware timestamp and L2 Ethernet switch
 - Dual CAN controllers
 - Dual USB with integrated PHY
 - Many other IO peripherals
- Real-time control
 - Integrated ADC and PWM
- Secure boot
- Industrial qualification
 - Product longevity – 15 years
 - -40C to +85C ambient operating temperature
- Packaged to reduce manufacturing cost
 - 0.8 mm pitch (289 BGA)
 - Product variants for a range of applications
- Linux and Windows Embedded CE

Pricing: 10K units MSRP from \$5.27 - \$9.90

Not available
on all variants

Hardware Platform

- Ease of Use – BSP and demo images, development environment build demonstration, video tutorials, schematic and layout, documentation
- Small, single-board design with optional add-on LCD module
- MCIMX28EVK – \$399
- MCIMX28LCD – \$199

Full Hardware Evaluation and Development Platform

Software

Linux and Microsoft Windows Embedded CE Operating Systems

- Full-featured, scalable, optimized and proven OS
- Product-worthy software for reference designs and product development
- Simplifies hardware management
- Streamlines software development

Complete software package
Simple download at no cost

- Use EVK to differentiate and accelerate product development
- Broad multimedia codec library
- IEEE 1588 stack from IXXAT
- Growing developer community

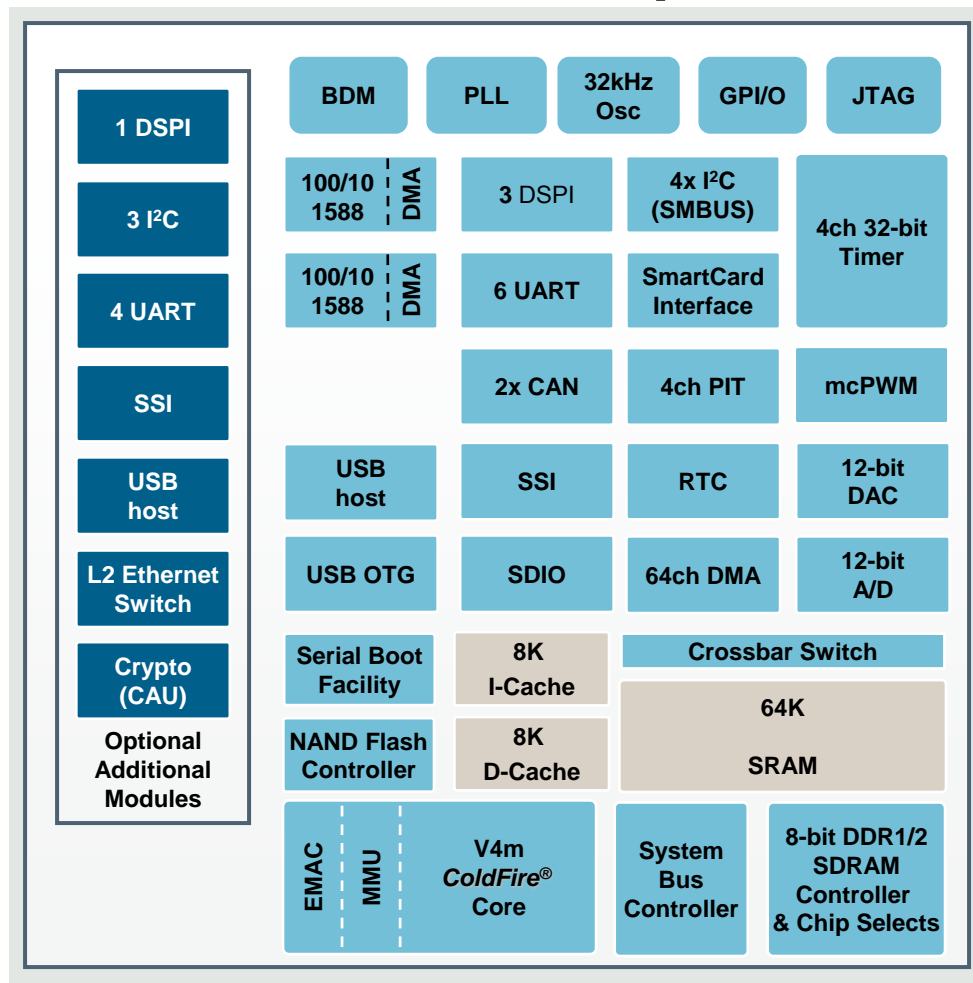

www.imxcommunity.org

Price. Performance. Personality.

MCF5441x ColdFire Microprocessor

► Key Features and Advantages

- V4m Core, Up to 385 Dhrystone 2.1 MIPS @ 250 MHz
- < 0.5 W Power
- Extensive connectivity
 - Dual 10/100 Ethernet with IEEE 1588 hardware timestamp and L2 Ethernet switch
 - Dual CAN controllers
 - Up to 10 serial ports
 - Many other IO peripherals
- Real-time control
 - 2x 4 ch. 12-bit ADC with simultaneous / parallel sampling
 - 2x 12-bit DAC
- True Random Number Generator (RNG) for enhanced data security
- Industrial Qualification
 - Product longevity – 15 years
 - -40° C to 85° C temperature range
- Packaged to reduce manufacturing cost
 - Product variants for a range of applications
- MQX RTOS, Linux OS, and CodeWarrior v10

Pricing: 10K units MSRP from \$4.99 - \$9.49

MCF5441x Development Platform

Hardware Platform

Tower System

- Modular, expandable development platform for 8/16/32-bit MCUs/ MPUs
- Rapid eval, prototyping with maximum hardware reuse
- Supported by range of MCU and peripheral plug-in boards and growing web community

www.towergeeks.org

Enables prototyping application development

Complimentary Operating Systems

Freescale MQX

- Full-featured, scalable, optimized and proven RTOS
- Simplifies hardware management
- Streamlines software development
- Reduces development cost while speeding time to market

Comprehensive OS solutions for embedded control and connectivity

Linux

- Support for 2.6.29 Linux kernel
- u-boot with ColdFire patches
- GNU tools: gcc, eglibc, & binutils.
- GDB debugger
- Wide range of BSP drivers offering broad application scope

Software

CodeWarrior IDE

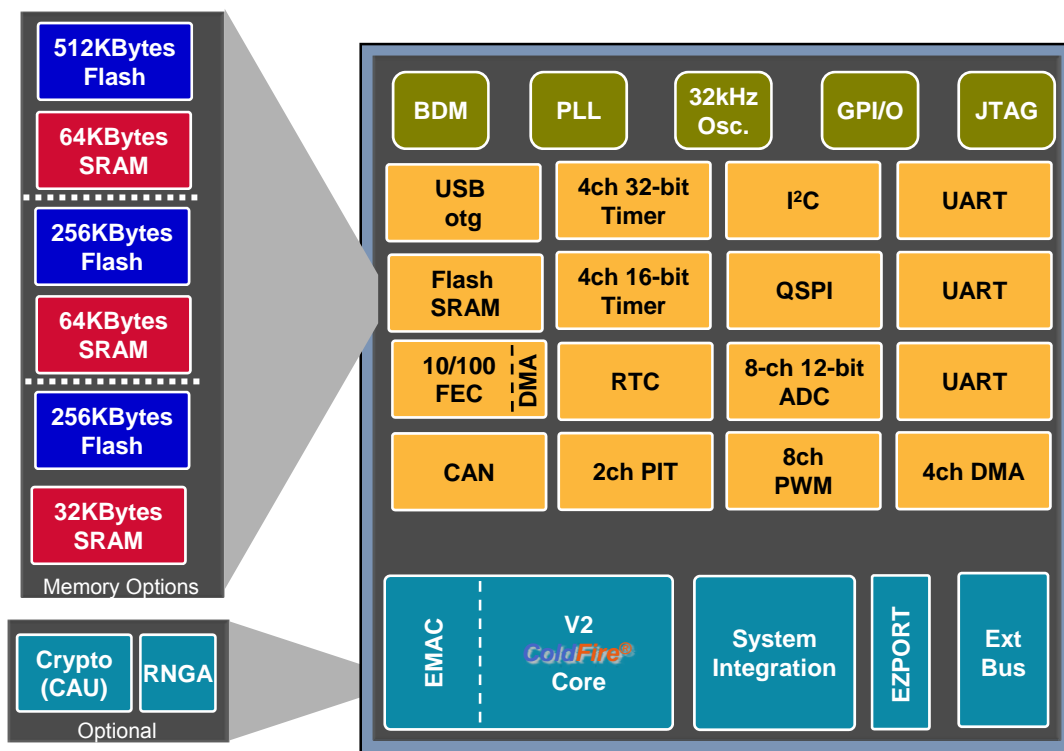

- Eclipse environment
- Processor Expert code generation wizard
- Build, debug and flash tools
- Software analysis
- Kernel-aware debug
- Host platform support

Accelerates development time

Extensive. Enabled. Easy.

MCF5225x ColdFire Microprocessor

- ▶ 76 Dhrystone 2.1 MIPS @ 80 MHz
- ▶ Flash/SRAM options
 - 512K/64K, 256K/64K, 256K/32K
- ▶ MiniBus expansion supports 1MB memory without ALE; 256MB with ALE
- ▶ 10/100 Ethernet controller with encryption; pin-out supports Ethernet in 2-layer board
- ▶ CAN controller
- ▶ USB 2.0 OTG controller
- ▶ 3 x UARTs, I²C, QSPI
- ▶ High precision ADC and many timers
- ▶ eMAC provides low-cost DSP performance
- ▶ Ready-to-go MQX RTOS software

First available broad-market
MCU samples

Factory Automation Solutions

Industrial Network Protocols

Most Significant Industrial Network Protocols

Field Bus (Discrete or I/O oriented)		Industrial Ethernet*	
	Most popular fieldbus solution. 31M+ nodes installed; 24% CAGR (PTO 2010). Introduced by Siemens.		2M+ PROFINET nodes installed; 40% CAGR (PTO 2010). Introduced by Siemens.
	CIP™ application layer on CAN. Very popular and still growing. Introduced by Rockwell.		CIP application layer on Ethernet. Growing fast. Introduced by Rockwell.
	Very popular SAE-sponsored standard but losing share in factory automation. Supported by many.		May dominate due to technology and ease of use. Predict >1 Mu by 2011. Introduced by Beckhoff.
	Modbus RTU is a widely used fieldbus solution, but losing share. Introduced by Schneider.		Modbus TCP/IP is a widely used Ethernet solution, but growing less rapidly in many markets (Schneider)

- **Standard** Ethernet TCP/IP protocols most common of Ethernet-based nodes
 - 6.5 Mu Ethernet TCP/IP nodes installed by 2006; 24 Mu by 2011; CAGR 24.3%
- Many deterministic industrial Ethernet protocols use a form of IEEE® 1588
 - For clock synchronization through the Ethernet network

IEEE® 1588

Freescale Devices Support All Industrial Protocol Levels

Target Applications

- ▶ Motor Drives
- ▶ Motion Control
- ▶ Synchronized Servos

IRT

Deterministic

Two PROFINET Implementation Options

- ▶ **QorIQ, PowerQUICC or i.MX processor with Ethernet MAC**
 - Integrate protocol software with MPU
 - High performance MPU and memory
- ▶ **Lower cost with low risk**
 - One chip for application and PROFINET
 - PROFINET IRT not supported

- ▶ **Any processor plus ASIC**
 - Two chips from two vendors
 - ASIC supports PROFINET RT and IRT
- ▶ **Lower risk with higher cost**
 - ASIC or FPGA adds \$15-\$25
 - Protocol software already integrated and certified in ASIC

How to Acquire PROFIBUS Solution

- ▶ PROFIBUS applications processor from Freescale
- ▶ PROFIBUS layer 2 link-layer microcode
 - License and support from either Freescale or DoGav
 - Coming soon:
 - Included with Freescale evaluation board support package (BSP)
 - Free download from www.freescale.com (password protected)
 - Same click-through software license as other BSPs
 - Supported by Freescale (with assistance from DoGav)
- ▶ PROFIBUS layer 7 application software options
 - Use your own, integrated with DoGav layer 2 microcode
 - Contract directly with DoGav for custom software development and support
 - Buy from protocol stack vendor
 - Real-time Automation, IXXAT, Softing, etc.
 - Contract directly with DoGav for custom software development

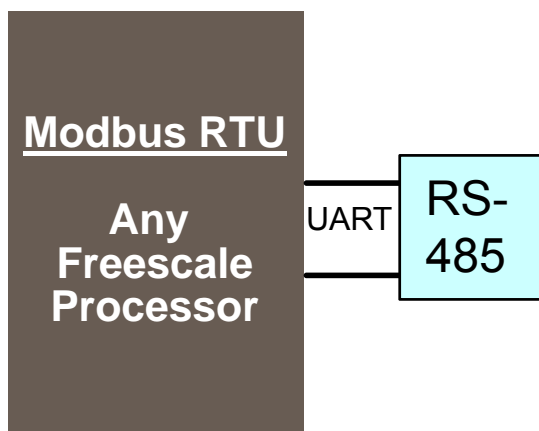

EtherNet/IP Implementation

- ▶ Source code integrated with Ethernet Controller
 - Integrates directly with Freescale OpenTCP & MQX
 - Organize target data as an Object Model
- ▶ Low cost
 - One-time source code cost
 - No additional hardware cost
- ▶ Low risk
 - RTA reference schematics available
 - Customers must understand Object Model to organize data properly

Modbus RTU and TCP Implementation

- ▶ Same application layer supports both Modbus TCP and Modbus RTU
 - Source code integrated directly with Freescale OpenTCP and MQX
- ▶ Low cost
 - One-time source code cost
 - No additional hardware cost
 - RS-485 driver for Modbus RTU
 - Ethernet PHY for Modbus TCP
- ▶ Low risk
 - RTA reference schematics available
 - Customers must organize data properly as Registers & Coils

PROFINET IO, EtherNet/IP, Modbus TCP Support

Fuji Electric FA Components & Systems

Panasonic Schneider Electric OMRON moxlex
one company > a world of innovation

EtherCAT[®]
Technology Group

>1400 members
Here are just a few

► EtherCAT emerging as very important for FA&D, industrial transportation and energy segments

- Supported by our protocol partners acontis, IXXAT, and Koenig

► Key customers actively drive it

• Alternative to protocols controlled by top three

- Siemens (PROFINET)
- Rockwell (EtherNet/IP)
- Mitsubishi (CC-Link IE)

• OMRON is funding growth in Japan

• Embraced by ABB, Schneider, National Instruments, etc.

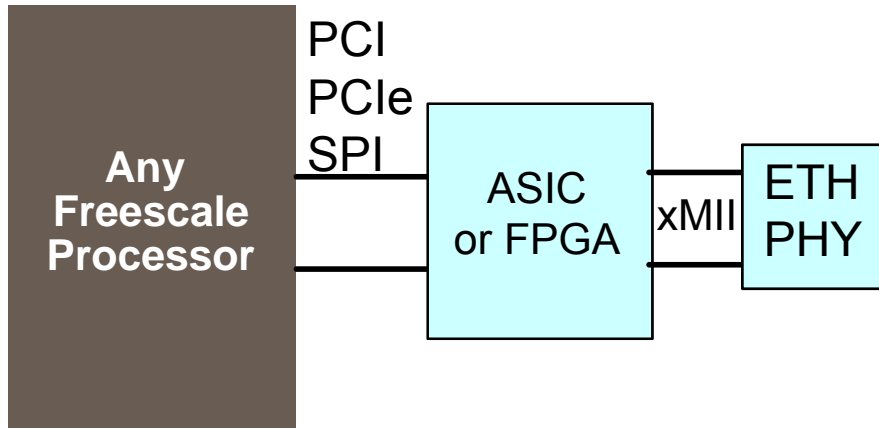

► EtherCAT is an international standard (IEC, ISO, SEMI)

- Sets new standards for real-time performance and topology flexibility
 - Real-time control over 10/100 Ethernet
 - Offers high precision device synchronization
 - Meets or beats legacy fieldbus cost
 - Eliminates switches and hubs
 - One master can support up to 20k slaves
 - Existing application S/W runs over EtherCAT
 - CANOpen, SERCOS, TwinCAT
 - Includes cable redundancy options
 - Supports functional safety (SIL3)

EtherCAT Implementation

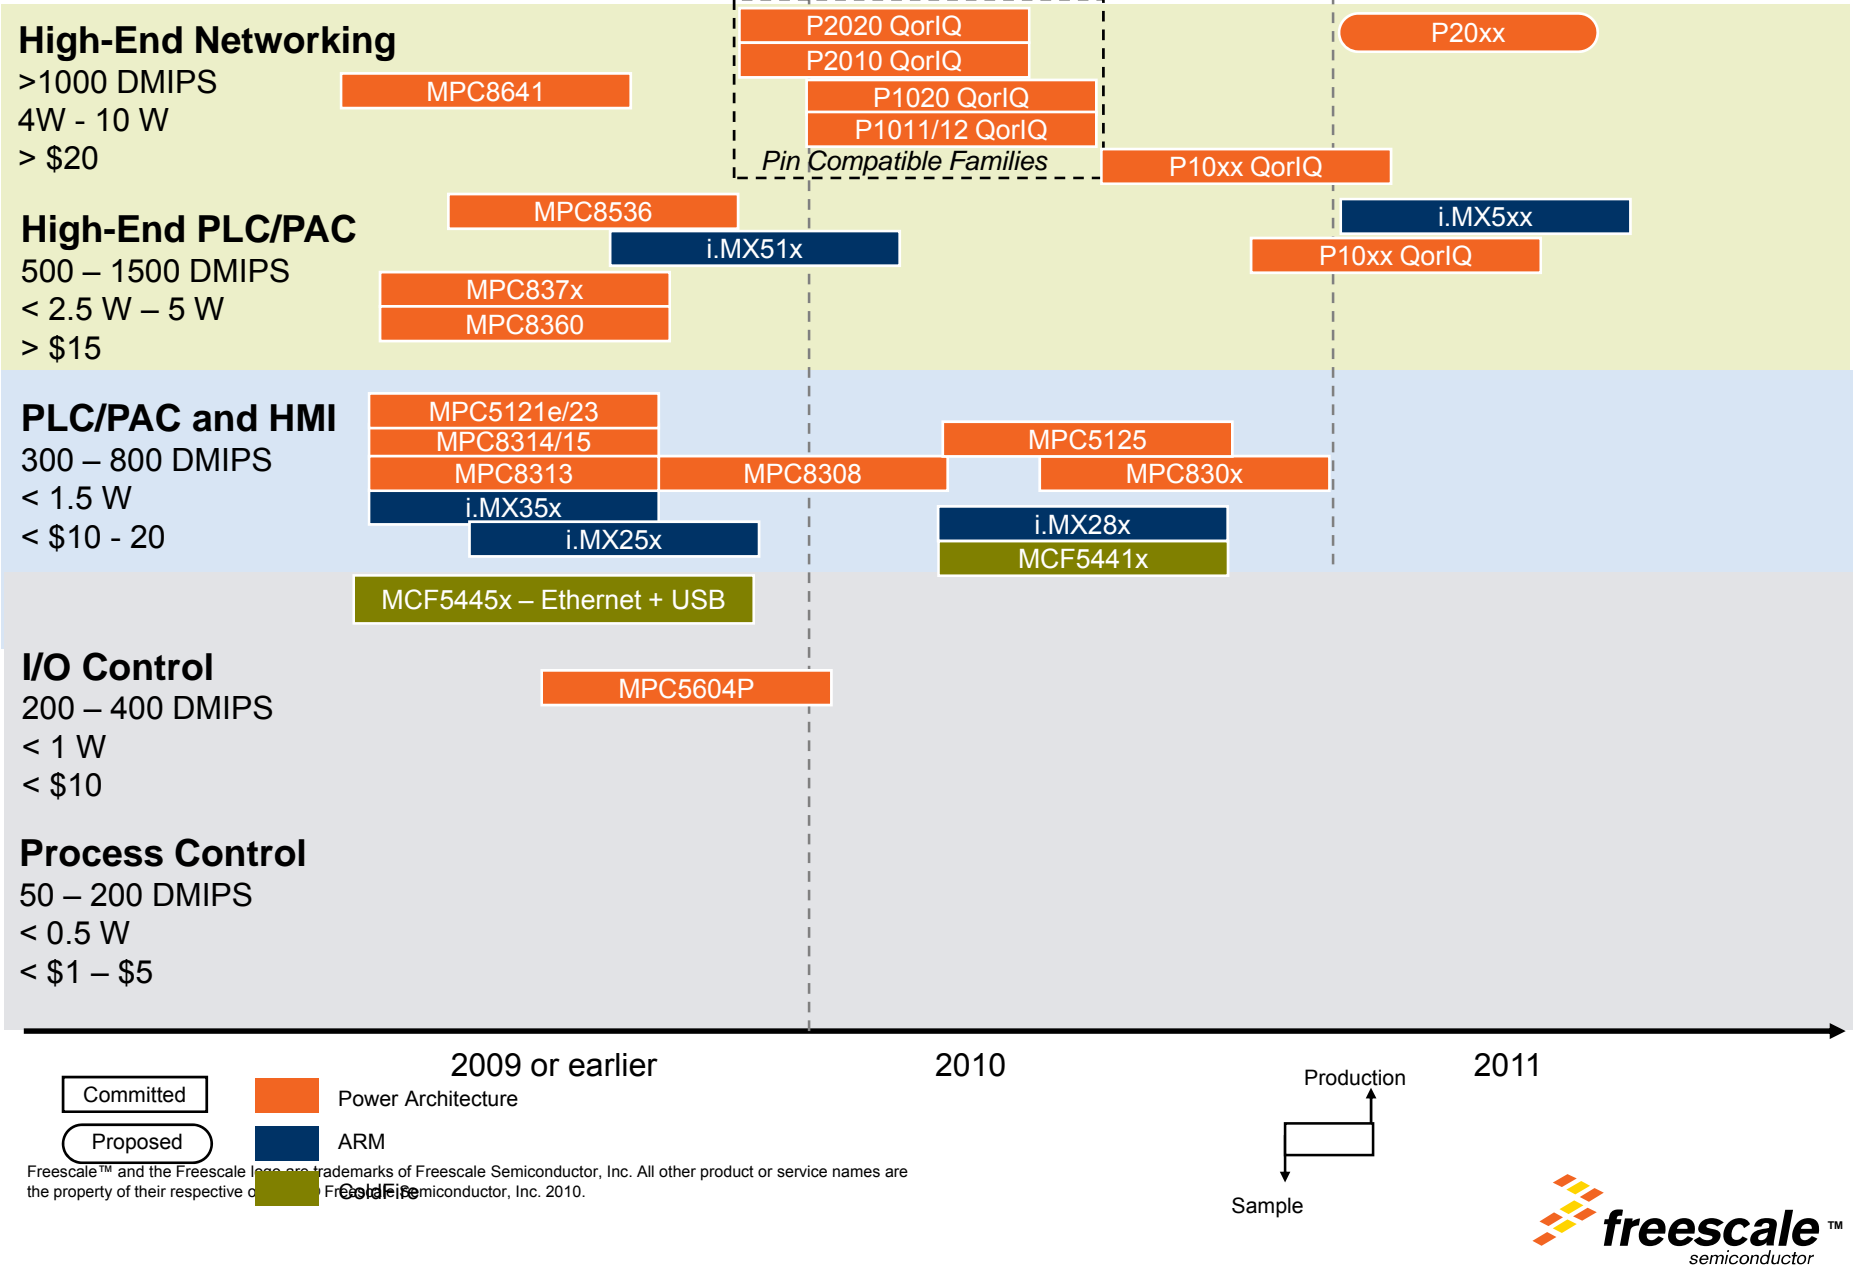

- ▶ **EtherCAT master**
 - Any processor with standard Ethernet
- ▶ **Lower system cost**
 - MPU needs high performance and memory
 - Same software cost as ASIC option
- ▶ **Low risk**
 - Complicated source integrated into MPU by partners. Tested in 2 plugfests.

- ▶ **EtherCAT slave**
 - Any processor plus ASIC or FPGA
 - 2 vendors
 - ASIC supports EtherCAT layer 2
- ▶ **Higher system cost**
 - ASIC adds \$5 - \$15 to system cost
- ▶ **Lower risk**
 - Complicated source already integrated into ASIC

Processors for EtherCAT Master

Freescall and the Freescall logo are trademarks of Freescall Semiconductor, Inc. All other product or service names are the property of their respective owners. Freescall Semiconductor, Inc. 2010.

How to Acquire EtherCAT Solution

- ▶ EtherCAT applications processor: Buy from Freescale
 - Evaluation board and board support package available for Linux

- ▶ EtherCAT Master protocol software integrated with OS
 - Buy from protocol stack vendor and OS vendor
 - Acontis or IXXAT with Green Hills INTEGRITY OS
 - Koenig KPA with QNX Neutrino RTOS
 - Joint support by protocol and OS vendor
 - OS vendors to offer board support package for selected Freescale evaluation platforms – P2020 and MPC8536 are first ones
 - Integration source code available for license from each vendor
 - Contract custom software development from protocol vendor

www.freescale.com/ethercat

► Freescale meets industrial control requirements

- Scalable system performance from 100 to 20,000+ MIPS
- Reduced system cost with integrated processors starting <\$15
- Fanless operation at 85C: 800 MIPS <2W, 1800 MIPS <3.5W

► Leading partner solutions and tools

- IEEE 1588, PROFINET and CAN from IXXAT
- PROFIBUS from DoGav
- EtherCAT from acontis and Koenig
- Industrial-grade safety-certified OS from Green Hills, QNX and others

► Rugged devices with long life and reliability

- Industrial or automotive qualification for -40C to +85C ambient
- Stability of 10 or 15 year product longevity statement

Technology provider for:

- PROFINET IO
- EtherNet/IP
- CIP Safety EtherNet/IP
- CIP Safety DeviceNet

Real-Time Automation (RTA)

RTA is a USA-based leading supplier of industrial protocols and solutions

- Established 1989 by John Rinaldi
 - 10 employees in Milwaukee WI, USA
 - Focus on networking, control & developers
 - "Media is irrelevant"
- Freescale products supported
 - QorIQ™ and PowerQUICC® processors
 - ColdFire® MCUs and MPUs
 - i.MX applications processors
- Contact John Rinaldi
 - rinaldi@rtaautomation.com, 414-453-5100
 - 150 S. Sunnyslope Road Suite 150, Brookfield, WI 53220
- Download evaluation information from www.rtaautomation.com

Protocols supported:

- PROFINET
- PROFIBUS
- EtherNet/IP™
- Modbus
- CAN® - CANOpen®, DeviceNet™

DoGav is an Israel-based software solution provider with more than 10 years experience developing production-ready microcode for PowerQUICC processors

- Established 1984
 - 5 employees in Petach Tikva, Israel
 - USA sales based in New York, USA
- Freescale products supported
 - QorIQ™ and PowerQUICC® processors
 - 10+ years providing microcode design services for PowerQUICC CPM and QUICC Engine™ Controller
 - 25+ years collaboration with Freescale and Motorola
- Contact David Gabbay
 - dg@dogav.net , +972-3-933-7197
 - 18 Nahum St., Petach Tikva, 49247 Israel
 - www.dogav.net

Protocols supported

- PROFIBUS DPv1
- Master and Slave

➤ Cut-Through switching / Two port MAC Relay [Data Centre, Server Farms, ..]

Store-Forward introduces large Transport Latencies

For 100Mb/s Ethernet Transport times are:-

10 Store forward switches = 11.00 times point to point

10 Cut through switches = 1.09 times point to point

➤ Industrial Ethernet Protocols [Manufacturing, Medical,]

Star topology

Too costly in cabling

Line/Ring/Daisy Chain topology

Cost effective cabling

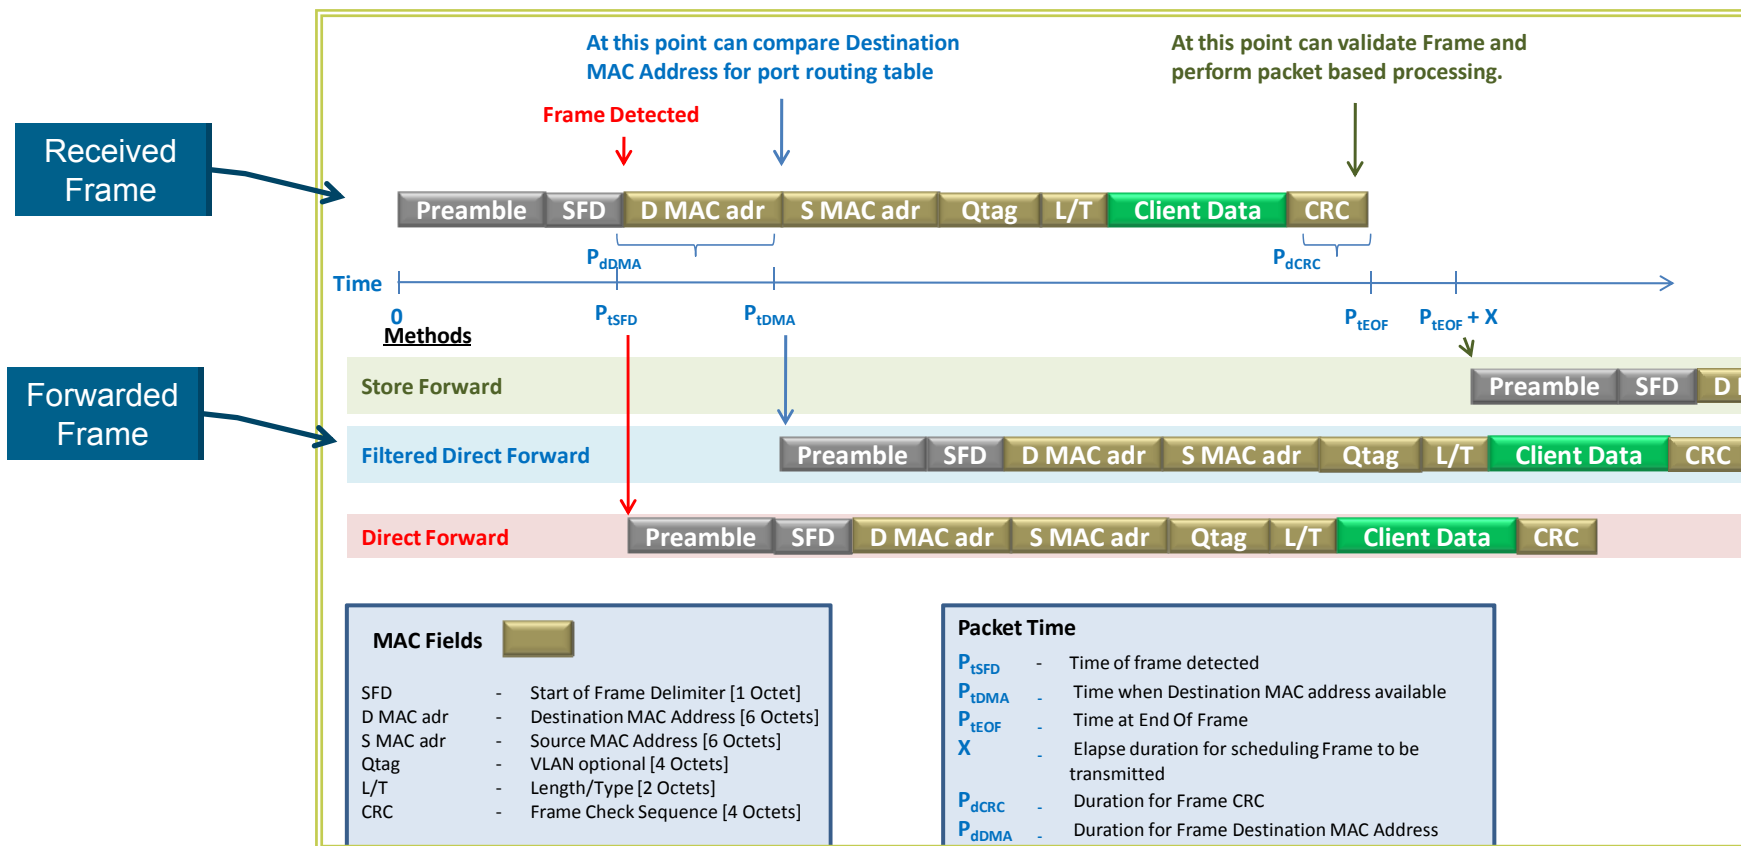

➤ Audio Visual Bridging [Home, Car, Infrastructure]

Normalised Latency [2ms]

1st Speaker buffers audio until all speakers receive audio and presentation time is reached

In all the options above the Frame is stored locally, and the Frame CRC is also validated.

Introducing the MPC830x PowerQUICC II Pro Portfolio

For less than \$10, MPC830x PowerQUICC II Pro processors offer 770 DMIPS performance, extensive on-chip connectivity, and fanless operation for industrial and commercial networking applications.

- ▶ MPC8308 – 266 to 400 MHz
 - Performance/price optimized MPC8308 combines 16/32-bit DDR2 memory controller with ECC, 2 x Gigabit Ethernet, PCI Express, USB and eSDHC targeting smart metering gateways, wireless media gateways, factory automation & test/measurement equipment. In mass production today.
- ▶ MPC8306/S – 133 to 266 MHz
 - MPC8306 integrates QUICC Engine, CAN, USB, SDHC and IEEE® 1588 support ideal for industrial control, factory automation and test/measurement equipment
 - MPC8306S features QUICC Engine (HDLC/TDM, 10/100) and USB targeting networking equipment such as low-end base station line cards and branch access gateways
- ▶ MPC8309 – 266 to 400 MHz
 - Richly featured with QUICC Engine, CAN, USB, SDHC, PCI and IEEE® 1588 support for networking, industrial control, factory automation and test/measurement equipment

Features

- e300c3 up to 400 MHz
 - ♦ 16K I/D 4-way L1 cache
 - ♦ Double Precision FPU + Dual IU
- DDR2 up to 333MHz
 - ♦ 32/16-bit, with ECC Support
- Local Bus
 - ♦ Both NAND / NOR flash boot support
- x2 10/100/1000Mbps Gbit Ethernet
 - MII / RGMII / SGMII
 - IEEE1588 support
- x1 PCI Express v1.0a
- USB 2.0 - Host / Device / OTG
- eSDHC (host controller)
- 2x UART, 2x I2C, SPI, GTM, RTC
- 3 dedicated GPIOs
 - Additional available based on peripherals used
- Multi-channel DMA controller

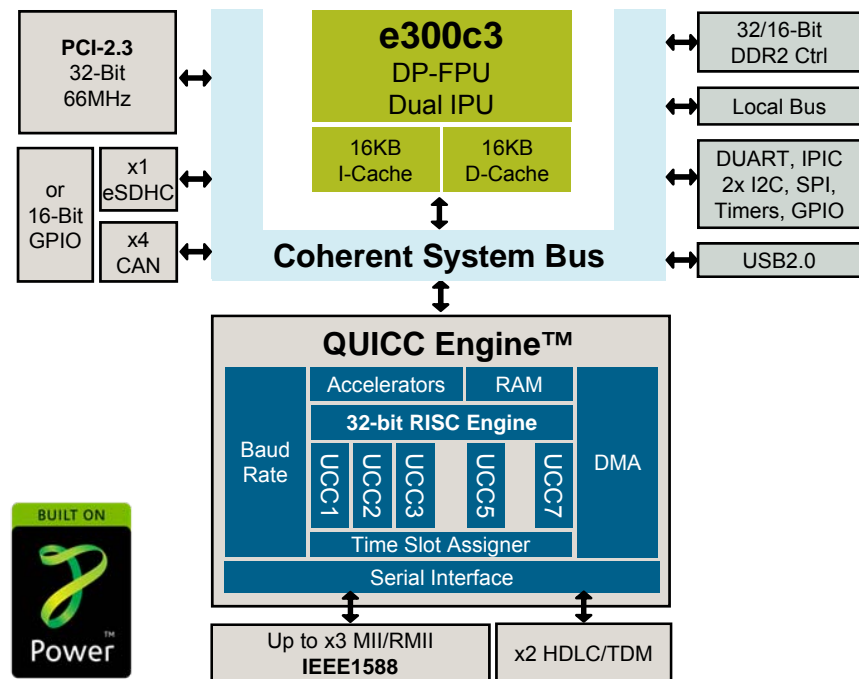

- **Power:** Sub-1.3W @ 333MHz CPU
- **Package:** 473 MAPBGA, 19x19mm, 0.8mm pitch

In Mass Production
10Ku Pricing Starting at **\$9.94**

Low-cost Networking / Industrial Control with PCI Express & 16/32-bit DDR2 w/ ECC

- e300c3 up to 400 MHz
 - ♦ 16K I/D 4-way L1 cache
 - ♦ Double Precision FPU + Dual IU
- DDR2 up to 333MHz
 - ♦ 32/16-bit, with ECC Support
- Local Bus
 - ♦ Both NAND / NOR flash boot support
- x3 10/100Mbps Ethernet
 - ♦ MII / RMII
 - ♦ IEEE1588 Support
- PCI-2.3, 32-bit @ 66 MHz
- x2 HDLC/TDM
 - ♦ Up to 128 channels
- USB 2.0 - Host / Device / OTG
- eSDHC (host controller)
- 4x CAN 2.0B Controllers
- 4x UART, 2x I2C, SPI, GTM, RTC
- 64 Muxed GPIO
 - ♦ MUX'd 16 GPIO with eSDHC / x4 CAN
- Multi-channel DMA controller

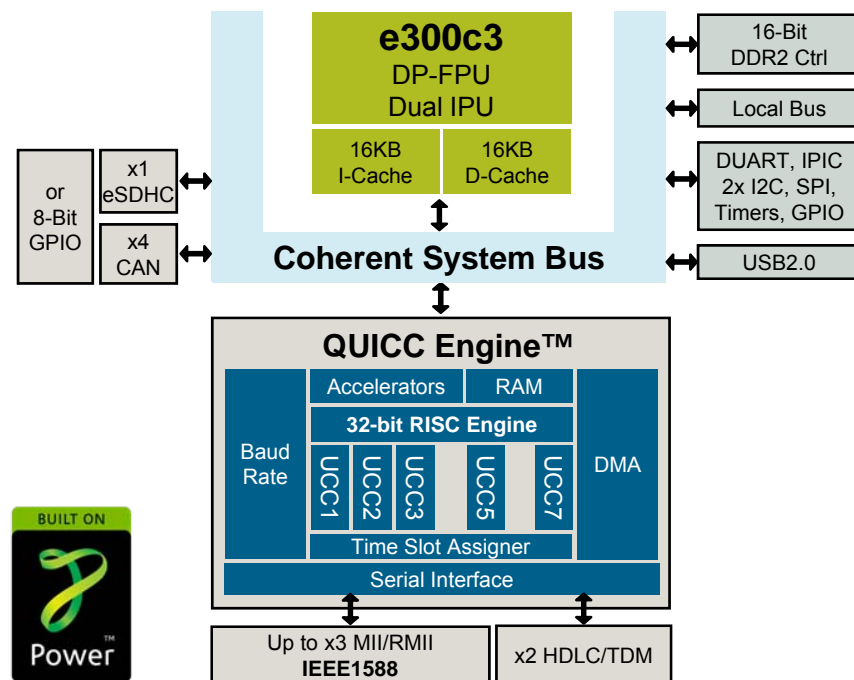

- **Power:** Sub-1.6W @ 333MHz CPU, 200MHz QE
- **Package:** 489 MAPBGA, 19x19mm, 0.8mm pitch

Sampling Now, Qualification Feb 2011
10Ku Pricing Starting at **\$8.55**

Low-cost Networking / Industrial Control with PCI-2.3 & 16/32-bit DDR2 w/ ECC

Features

- e300c3 up to 266 MHz
 - ♦ 16K I/D 4-way L1 cache
 - ♦ Double Precision FPU + Dual IU
- DDR2 up to 266MHz
 - ♦ 16-bit interface
- Local Bus
 - ♦ Both NAND / NOR flash boot support
- x3 10/100Mbps Ethernet
 - ♦ MII / RMII
 - ♦ IEEE1588 Support
- x2 HDLC/TDM
 - ♦ Up to 128 channels
- USB 2.0 - Host / Device / OTG
- eSDHC (host controller)
- 4x CAN 2.0B Controllers
- 4x UART, 2x I2C, SPI, GTM, RTC
- 56 Muxed GPIO
 - ♦ MUX'd 8 GPIO with eSDHC / x4 CAN
- Multi-channel DMA controller

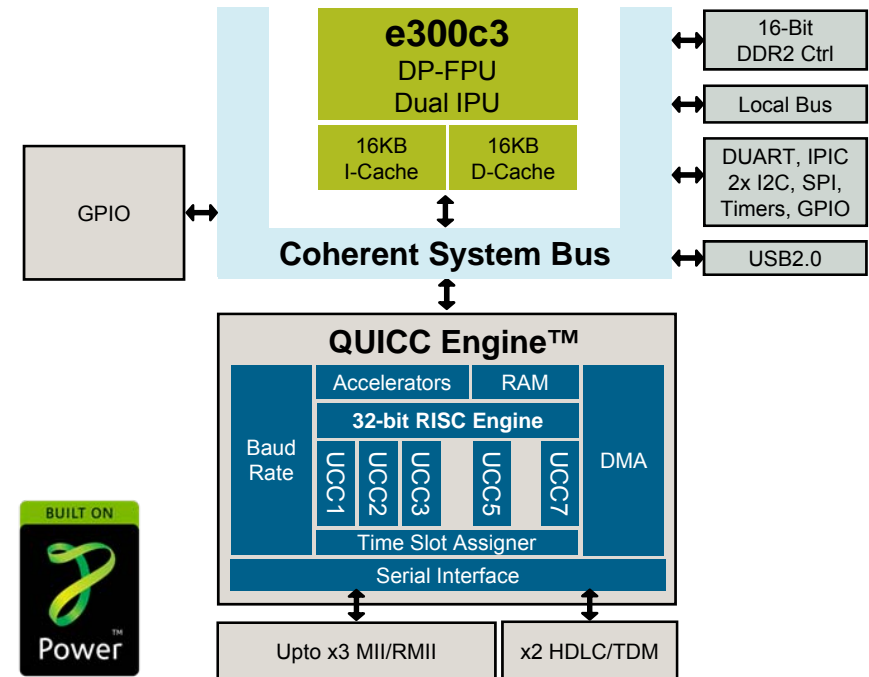

- **Power:** Sub-1.2W @ 266MHz CPU, 200MHz QE
- **Package:** 369 MAPBGA, 19x19mm, 0.8mm pitch

Sampling Now, Qualification Nov 2011
10Ku Pricing Starting at **\$7.49**

Low-cost Industrial Control / Factory Automation adding CAN, eSDHC & IEEE 1588

Features

- e300c3 up to 266 MHz
 - ♦ 16K I/D 4-way L1 cache
 - ♦ Double Precision FPU + Dual IU
- DDR2 up to 266MHz
 - ♦ 16-bit interface
- Local Bus
 - ♦ Both NAND / NOR flash boot support
- x3 10/100 Ethernet
 - ♦ MII / RMII
- x2 HDLC/TDM
 - ♦ Up to 128 channels
- USB 2.0 - Host / Device / OTG
- 4x UART, 2x I2C, SPI, GTM, RTC
- 56 Muxed GPIO
 - ♦ 8 dedicated GPIO
- Multi-channel DMA controller

- **Power:** Sub-1.2W @ 266MHz CPU, 200MHz QE
- **Package:** 369 MAPBGA, 19x19mm, 0.8mm pitch

Sampling Now, Qualification Nov 2011
10Ku Pricing Starting at \$6.99

P1012/P1021 QorIQ Processor

► Single or Dual e500 Power Architecture™ core

- 533 – 800 MHz (up to 1800 MIPS) per core
- 256KB frontside L2 cache with ECC
- 36 bit physical addressing, DP-FPU

► System Unit

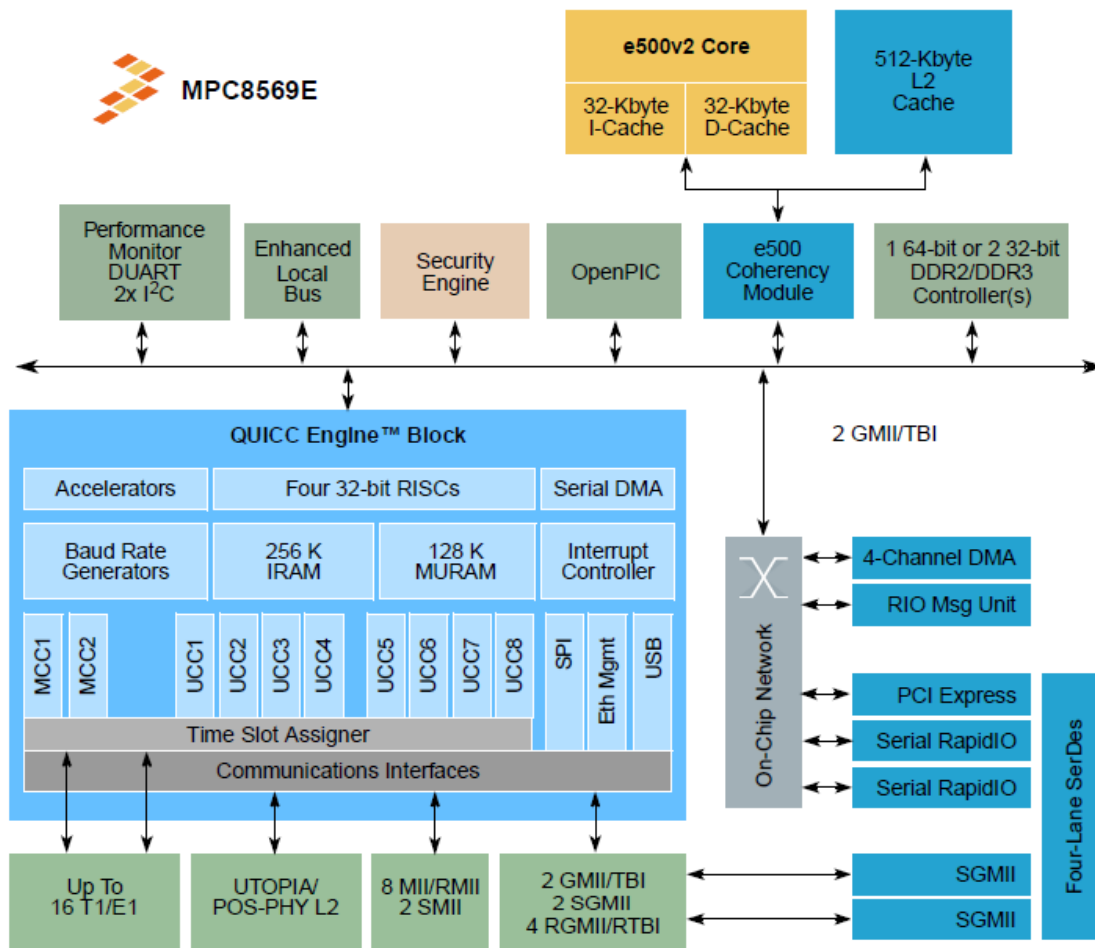

- 32-bit DDR2/DDR3, 667 MHz data rate with ECC
- Integrated SEC 3.3 Security Engine
- Open-PIC Interrupt Controller, Performance Monitor
- 2x I²C, Timers, 16 GPIO, 2x UART
- USB 2.0 Controller Host/Device
- 16-bit Local Bus can boot from NAND Flash
- SPI controller can boot from SPI serial Flash
- SD/MMC card controller can boot from Flash cards
- Three 10/100/1000 Ethernet Controllers (eTSEC) with Jumbo Frame support, SGMII interface
 - IEEE® 1588v2 Support
- QUICC Engine® for protocols and legacy interfaces
 - 4 x TDM interfaces with HDLC support
 - 4 x UCC for Serial Protocols, e.g. PROFIBUS
- Two PCI Express 1.0a Controllers up to 2.5Gbps
- Power Management

► Process & Package

- 45nm SOI, 0.95V+/-50mV, -40C to 125C Tj
- 689-pin TePBGAII

Supports Industrial Ethernet and PROFIBUS, low power consumption

MPC8569E Product Features

- **e500 PowerPC** from 800MHz to 1.33 GHz
 - 512KB L2 Cache w/ ECC
 - 36bit physical addressing
 - Double Precision Floating Point
- **System Interfaces**
 - 64b or 2x32-bit DDR2/3 w/ ECC
 - 800 Mbps/pin data rate
 - 16-bit Local Bus for SRAM/Flash
 - Timers, DUART, 2xI²C, GPIO, SPI
 - USB 2.0 Full Speed
- **High Speed Serial Interfaces**
 - Dual SGMII
 - Single PCI-Ex controller supporting x1, x2, x4
 - Dual serial RapidIO™ interfaces supporting dual x1 or single x4
- **QUICC Engine**
 - 4 RISCs up to 667 MHz
 - Maximum of 8 Ethernet interfaces, one per UCC:
 - Up to 8x 10/100 Ethernet
 - Up to 4x 10/100 Ethernet and 4x GbE
 - Maximum 2 of the 4 total GbE over SGMII
 - Multi-PHY UTOPIA/POS-PHY L2 (16-bit)
 - IEEE1588 Support v2
 - 16 x T1/E1 (512 x 64kbps channels)
- **Security Engine (SEC3.0)**
 - ARC4, 3DES, AES, RSA/ECC, RNG, XOR, Single pass SSL/TLS, Kasumi, SNOW
- **Four-channel DMA**
- **45nm SOI process technology**
- **Power <7W for 800MHz up to 10W for 1.3GHz**

i.MX51 Application Processor

► Specifications:

- CPU: Cortex A8, up to 1GHz
- Process: 65nm, LP/GP
- Core Voltage: 0.7-1.1V
- Package: 13x13 0.5mm, 19x19 0.8mm
- Temp Range: -20 to 85C, -40 to 85C

► Camera

- Camera and Display I/F (legacy)
- Image Sensor Processor (ISP)
- Up to 8Mpixel @ 15fps, Up 133Mpixel/sec
- Resizing, Inversion, Rotation
- Color Space conversion, video/graphics combining

► Display

- Display I/F (legacy and MIPI DSI)
- Up to WXGA display - 24 bit @ 60fps
- Secondary Display Support

► Connectivity

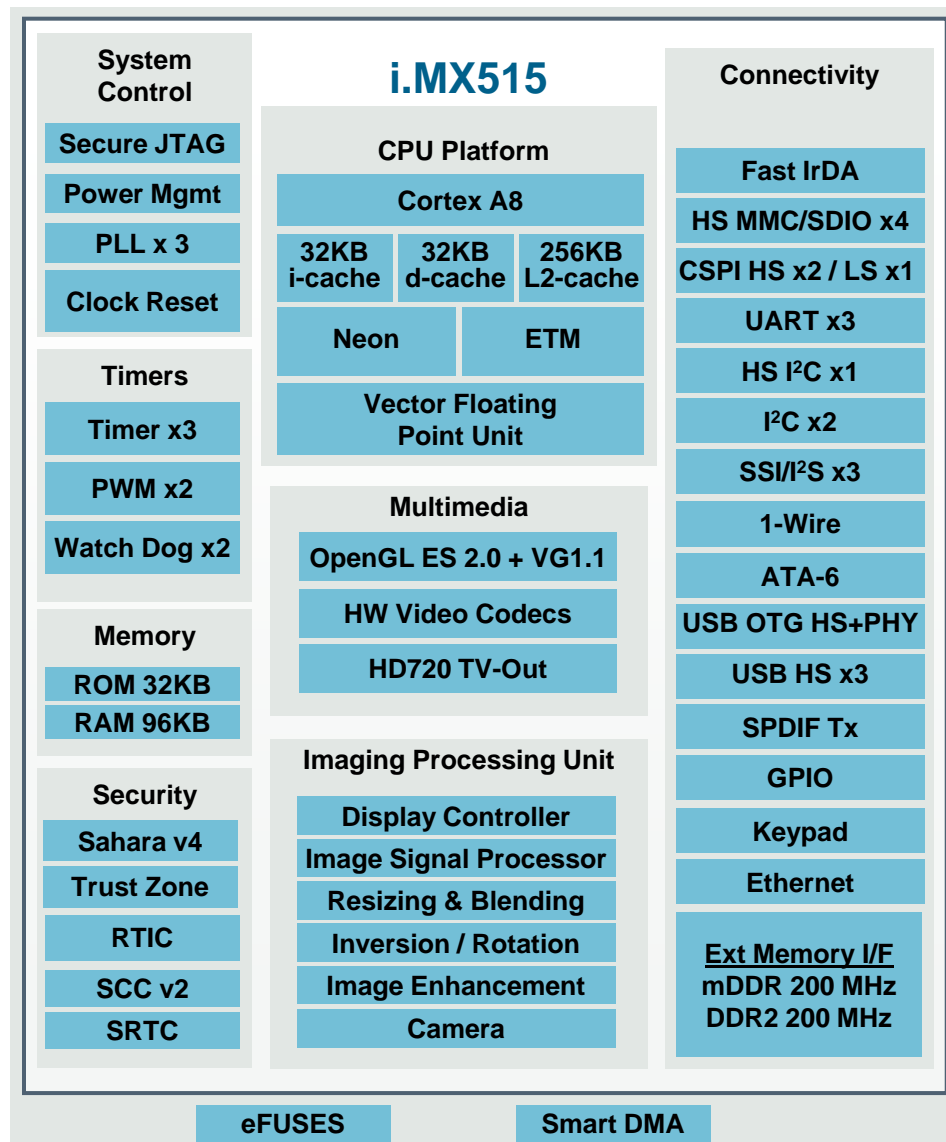

- High speed USB OTG w/ embedded Phy, Host HS x3
- Up to 400Mbps MobileDDR, DDR2
- SLC/MLC NAND Flash 8/16-bit, NAND/NOR
- High speed MMC\SDIO, UART, I2C, SPI
- ATA-6
- 3.3V support on HD, SDIO, and SIM I/F

► Security

- TrustZone
- AES, DES/3DES, SHA-1, SHA-224, SHA-256
- Run time integrity checker (RTICv3)
- Secure High Assurance Boot
- Security Controller (SCC), including Secure RAM and Security Monitor
- Random Number Generator Accelerator
- Secure JTAG Controller
- Secure real-time clock
- Universal Unique Identification
- Tamper Detection

Introducing the Newest Freescale Industrial MPUs

i.MX28x

- ARM9™ architecture
- <0.5 W for hand-held and battery-powered applications
- On-chip power management
- Graphical display controller
- Secure boot
- Linux® OS and Windows® Embedded CE OS

Shared features:

- Extensive connectivity
- Dual 10/100 Ethernet with IEEE® 1588 time-stamping
- 3-port Layer 2 Ethernet switch (L2 Switch)
- <0.5 W for fanless operation
- Industrial Qualification
- Product Longevity –15 years

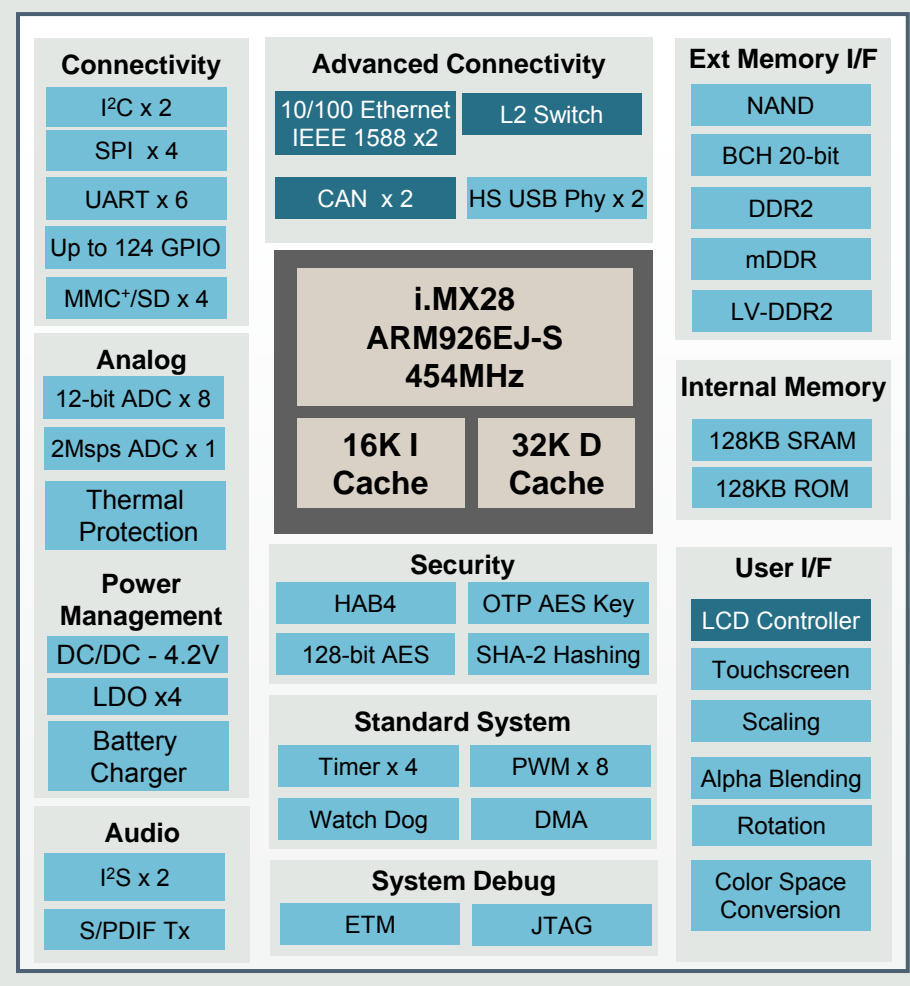

MCF5441x

- ColdFire™ V4 architecture
- Motor control integration - PWM Timers, DACs, ADCs
- 10 serial ports
- DACs for sensors and audio interface
- True Random Number Generator (RNG) for enhanced data security
- MQX™ RTOS, Linux OS, and CodeWarrior™ v10

i.MX28x Applications Processor

► Key Features and Advantages

- ARM9 Core with 454 MHz performance
- <0.5 W maximum power
 - On-chip Power Management for device and external components
 - Freescale Energy Efficiency Mark
- Display interface with touch screen
 - Rich user experience
- Extensive connectivity
 - Dual 10/100 Ethernet with IEEE 1588 hardware timestamp and L2 Ethernet switch
 - Dual CAN controllers
 - Dual USB with integrated PHY
 - Many other IO peripherals
- Real-time control
 - Integrated ADC and PWM
- Secure boot
- Industrial qualification
 - Product longevity – 15 years
 - -40C to +85C ambient operating temperature
- Packaged to reduce manufacturing cost
 - 0.8 mm pitch (289 BGA)
 - Product variants for a range of applications
- Linux and Windows Embedded CE

Pricing: 10K units MSRP from \$5.27 - \$9.90

Not available
on all variants

i.MX28x Development Platform

Hardware Platform

- Ease of Use – BSP and demo images, development environment build demonstration, video tutorials, schematic and layout, documentation
- Small, single-board design with optional add-on LCD module
- MCIMX28EVK – \$399
- MCIMX28LCD – \$199

Full Hardware Evaluation and Development Platform

Software

Linux and Microsoft Windows Embedded CE Operating Systems

- Full-featured, scalable, optimized and proven OS
- Product-worthy software for reference designs and product development
- Simplifies hardware management
- Streamlines software development

Complete software package
Simple download at no cost

- Use EVK to differentiate and accelerate product development
- Broad multimedia codec library
- IEEE 1588 stack from IXXAT
- Growing developer community

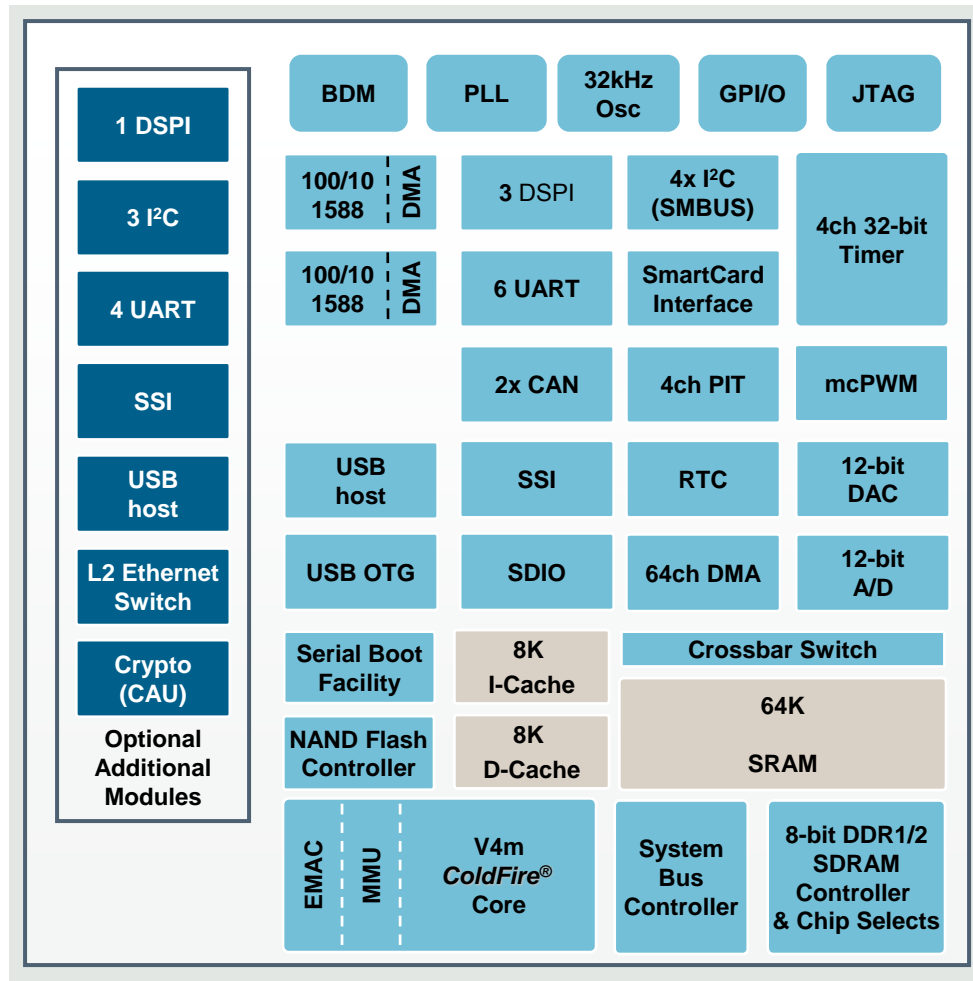

www.imxcommunity.org

Price. Performance. Personality.

MCF5441x Microprocessors

Key Features and Advantages

- V4m Core, Up to 385 Dhrystone 2.1 MIPS @ 250 MHz
- < 0.5 W Power
- Extensive connectivity
 - Dual 10/100 Ethernet with IEEE 1588 hardware timestamp and L2 Ethernet switch
 - Dual CAN controllers
 - Up to 10 serial ports
 - Many other IO peripherals
- Real-time control
 - 2x 4 ch. 12-bit ADC with simultaneous / parallel sampling
 - 2x 12-bit DAC
- True Random Number Generator (RNG) for enhanced data security
- Industrial Qualification
 - Product longevity – 15 years
 - -40° C to 85° C temperature range
- Packaged to reduce manufacturing cost
 - Product variants for a range of applications
- MQX RTOS, Linux OS, and CodeWarrior v10

Pricing: 10K units MSRP from \$4.99 - \$9.49

MCF5441x Development Platform

Hardware Platform

Tower System

- Modular, expandable development platform for 8/16/32-bit MCUs/ MPUs
- Rapid eval, prototyping with maximum hardware reuse
- Supported by range of MCU and peripheral plug-in boards and growing web community

www.towergeeks.org

Enables prototyping application development

Complimentary Operating Systems

Freescale MQX

- Full-featured, scalable, optimized and proven RTOS
- Simplifies hardware management
- Streamlines software development
- Reduces development cost while speeding time to market

Comprehensive OS solutions for embedded control and connectivity

Linux

- Support for 2.6.29 Linux kernel
- u-boot with ColdFire patches
- GNU tools: gcc, eglibc, & binutils.
- GDB debugger
- Wide range of BSP drivers offering broad application scope

Software

CodeWarrior IDE

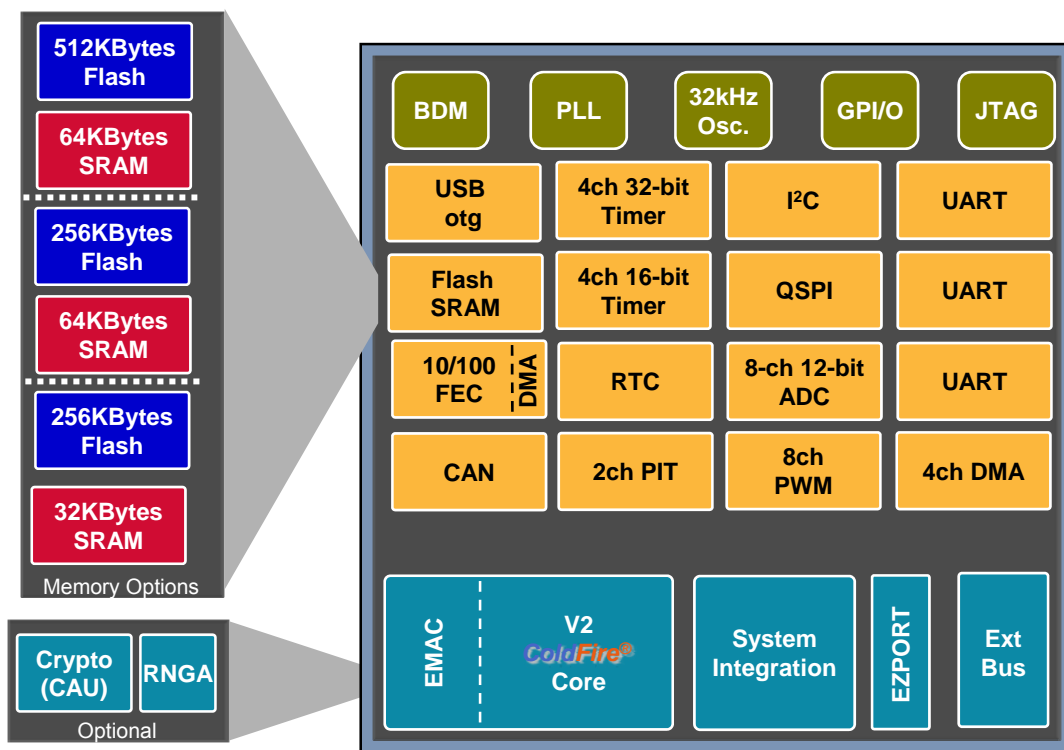

- Eclipse environment
- Processor Expert code generation wizard
- Build, debug and flash tools
- Software analysis
- Kernel-aware debug
- Host platform support

Accelerates development time

Extensive. Enabled. Easy.

MCF5225x ColdFire Processor

- ▶ 76 Dhrystone 2.1 MIPS @ 80 MHz
- ▶ Flash/SRAM options
 - 512K/64K, 256K/64K, 256K/32K
- ▶ MiniBus expansion supports 1MB memory without ALE; 256MB with ALE
- ▶ 10/100 Ethernet controller with encryption; pin-out supports Ethernet in 2-layer board
- ▶ CAN controller
- ▶ USB 2.0 OTG controller
- ▶ 3 x UARTs, I²C, QSPI
- ▶ High precision ADC and many timers
- ▶ eMAC provides low-cost DSP performance
- ▶ Ready-to-go MQX RTOS software

Kinetis Product Family

First available broad-market
MCU samples
based on ARM Cortex-M4!

MCU Family	USB OTG (FS & HS)	LCD (Segment/Graphics)	NAND Flash Controller	Floating Point Unit	Ethernet (IEEE 1588)	Encryption (CAU+RNG)	Dual CAN	Hardware Tamper Detect	DRAM Controller
