RPB20
PORTABLE BLUETOOTH SPEAKER

Thank you for purchasing this Rockville RPB20 Portable Bluetooth Speaker.

The RPB20 by Rockville After many months of engineering, Rockville is finally ready to introduce an entire line of portable Bluetooth speakers. Rockville's line of portable Bluetooth speakers are the most premium on the market. The RPB20 comes in black or white. It has a beautiful design that will look great on any table or desk.

The Rockville RPB20 has an amazing 30 watts of power! This is more powerful and has better bass than Bluetooth speakers that cost \$100! I personally tested this side by side with 10 other Bluetooth speakers. The clarity of this was on another level! The bass hit 10 times harder and this speaker went 10 times louder without any distortion at all!

Please read this guide carefully for proper use of your Rockville RPB20 Portable Powered Bluetooth Speaker. Should you need technical assistance please call our technical help line at 1-646-758-0144, Monday through Friday, 9am to 5pm EST.

FEDERAL COMMUNICATIONS COMMISSION COMPLIANCE INFORMATION

Responsible party name: Rockville

Address: 600 Bayview Ave,
Entrance A,
Inwood, NY 11096

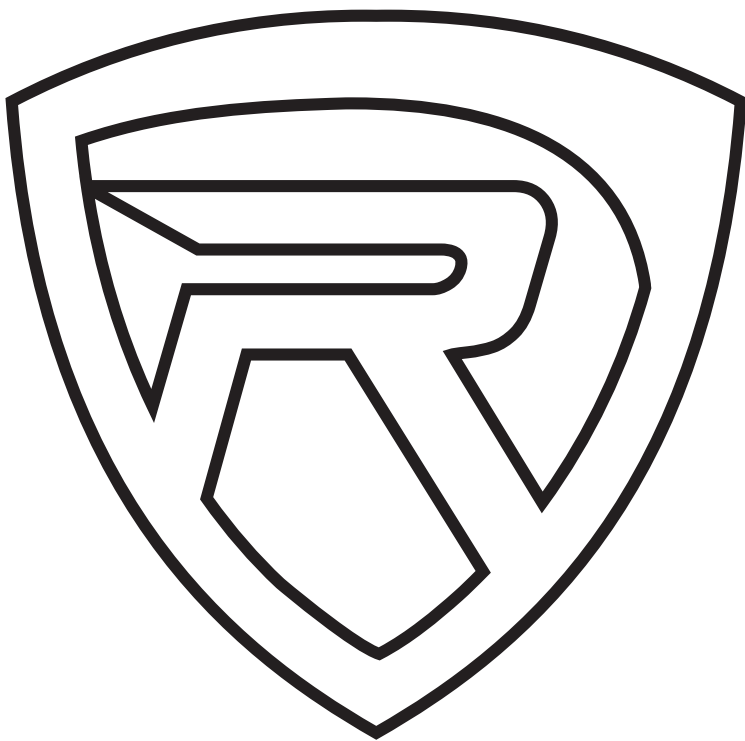

Hereby declares that the product Rockville RPB20 portable Bluetooth speaker complies with FCC rules as mentioned in the following paragraph:

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
