Dear **ecom** customer,

Your safety is our top priority!

Devices for use in explosive areas must fulfil specific requirements. ecom has been involved in this field for over 20 years and has acquired extensive expertise in explosion protection for everyday industrial use in potentially explosive atmospheres.

..... mobile experts

This slogan is used by ecom to develop, manufacture and distribute mobile devices for all areas where hazardous substances, such as flammable liquids, gases and dust are involved.

ecom instruments are a manufacturer of equipment for use in various sectors, including oil and gas, chemicals, petrochemicals, mining, pharmaceuticals, energy and the environment.

As a manufacturer of corresponding products and services from a single source, ecom asserts itself to-day through a complete range of products in the four fields of mobile computing, communication, measuring & calibration and portable lamps.

The equipment allows the user to achieve professional results, even in demanding environments.

Distinguishing features include ruggedness, accuracy, ergonomics and various types of certification for the Ex-area. The quality assurance of our products is ensured in our testing facility by using the latest testing apparatus in accordance with our quality management system.

The phrase "Made in Germany" continues to gain in significance. The basic values of safety and reliability are particularly reflected on in times of economic unrest.

Over the past year ecom has invested considerably in Germany, created and safeguarded jobs, supported suppliers and gained new customers.

This strengthens ecom as a company and as a brand.

Specialised and competent sales staff are at your disposal throughout the world.

We would be happy to advise you. Please contact us.

You can find further information online at:

The complete one-stop solution!

ecom instruments is an innovative company characterised by respectability, professionalism, great competence and reliability while handling difficult tasks in the area of Atex-certified products.

ecom instruments is the ideal partner to the chemical industry with its great experience and knowledge. ecom instruments stands for safety inside and outside potentially explosive areas.

ecom engineering established in January 2002 with 22 development engineers and technicians offers:

- · Comprehensive technological Ex-consulting
- Ex-modifications for standard products
- Tailor-made, customer-specific Ex-solutions

Ex designation

Temperature Class:

Gases are divided into temperature classes based on their different ignition temperatures. The electrical equipment in Group II is divided in parallel to this according to the maximum surface temperatures at which the Ex-atmosphere can be reached.

Maximum permitted housing or component temperature of the operating devices

ΤI	T2	T3	T4	T5	T6
450°C	300°C	200°C	135°C	100°C	85°C

Explosion groups:

The equipment group, amongst other items, appears again in this Designation Section. Group I comprises operating devices for coal mining where coal dust and methane atmospheres prevail. Group II applies to the "aboveground" areas such as chemistry, petrochemistry, mills (dusts) etc. Due to the different minimum ignition energies of the various gases, there is a further division into the categories IIA to IIC for the ignition protection classes "personal safety", "pressure resistant casing" and "sand casing"

CENELEC marking	Type of Gas	ignition energy/µJ
1	methane	280
IIA	propane	> 180
IIB	ethylene	60 180
(IIC	hydrogen	< 60 €

Type of protection:

In areas where the occurrence of an explosive mixture of flammable materials and air cannot be prevented by applying primary explosion protection, special measures for the prevention of ignition sources are to be taken. For example: separation (o, q, m), exclusion (p), special mech. construction (d, e), limitation of energy (ia, ib) or other methods (s).

Explosion protection

Use in hazardous areas:

Equipment which are certified according to Directive 94/9/EC (ATEX 95) regulations carries a special marking. The device group appears first, then the device category and finally the atmosphere reference: (G)as and (D)ust.

For category II, the following classification applies:

Category I very high degree of safety / Safety is provided by 2 protective measures — even in cases of rarely occurring machine errors or 2 independent machine errors.

Application in zones 0, 1, 2 or 20, 21, 22, atmosphere G/D / Category 2 high degree of safety sufficient safety in cases of frequent machine errors/ in cases of 1 error

Application in zones 1, 2 or 21, 22, atmosphere G/D / Category 3 normal degree of safety sufficient safety in cases of failure-free operation

Application in zone 2/22, atmosphere G/D* (*non-conductive dusts)

Mark identifying explosion prevention

(required in accordance with Directive 94/9/EC)

ATEX (Atmosphere Explosive)

94/9/EC Directive

Harmonises legal provisions of member states for devices and protection systems for designated use in potentially explosive areas.

New: ATEX 95 (Old: ATEX 100a)

1999/92/CE Directive

Minimum requirements for improving the health and safety protection of the worker at risk from explosive atmospheres. New: ATEX 137 (Old: ATEX 118a)

Designation examples:

Use in gaseous atmospheres: II I G EEx ia IIC T4

Use in dusty atmospheres: II 2 DT90°C IP64

Use for mining applications: I M2 EEx ia I

Temperature classes:

In the event of a malfunction, the maximum temperature of a surface that may be exposed to gas (in normal use with "n" type of protection). (Should not be used for dust ex-designations.)

TI = 450°C

 $T2 = 300^{\circ}C$

 $T3 = 200^{\circ}C$

 $T4 = 135^{\circ}C$

 $T5 = 100^{\circ}C$

 $T6 = 85^{\circ}C$

Explosion group

(Data only for devices used in areas renderedpotentially explosive by gas)

= Methane (mining)

IIA = such as Propane

IIB = such as Ethylene

IIC = most dangerous group (e.g. hydrogen)

IP Code

(Data only for devices used in areas rendered potentially explosive by dust) Figure I Contact and foreign body protection:

5 = Protection against dust deposits

6 = protection against dust penetration

Figure 2Water protection

Protection against:

0 = (no protection)

I = vertically falling drip water

2 = drip water on operating device inclined to 15°

Device group

= Mining

II = all other explosive areas

Category

I = can be used in Zones 0 or 20

2 = can be used in Zones | or 2|

3 = can be used in Zones 2 or 22

MI = Mining

(In case of firedamp, continuation of operation is possible)

M2 = Mining

(Must be switched off in case of firedamp)

Atmosphere

G = Gas

 $\mathbf{D} = \mathsf{Dust}$

(Mining - no details)

Types of protection:

= oil immersion

= high-pressure encapsulation р

= sand encapsulation а

= pressure-resistant encapsulation

= increased safety е

= intrinsic safety(permitted for Zone 0*) *depending on the device category

ib = intrinsic safety (sufficient for Zone I (+ 2))

ma = cast encapsulation (for Zone <math>0*)

mb = (sufficient for Zone I (+2))

= special protection

= normal operation In normal conditions (only for Zone 2)

nA = non-sparking

nC = enclosed break

nR = vapour-proof housing

nL = energy limited

nZ = high-pressure encapsulation

op = optical radiation (is, pr, sh)

tD = protected by housing (dust)

pD = high-pressure encapsulation (dust)

iaD = Instrinsic safety dust (use for Zone 20*)

ibD = Instrinsic safety dust (sufficient for Zone 21 (and 22))

mD=cast encapsulation (dust)

Max. surface temperature

IP64

(Data for devices used in areas rendered potentially explosive by dust - rarely also used in gas ex marking.)

- Maximum temperature of a surface during a machine error (normal operation in the case of category 3 devices) that can be reached by the ex atmosphere. Evaluation by the user:

a.) Limit temperature I=2/3 of min. igniti on temperature of dust present

b.) Limit temperature 2=min. glow temperature of dust present minus 75k (applies for layer thicknesses of up to 5mm)

The smaller value for the limit temperature must be above the indicated max. surface temperature of the device.

Zone

Procedure for determining the housing's leak tightness (A or B)

Explosion Protection

The important principles for integrated safety explosion protection are as follows:

- I. Measures are taken to avoid hazardous atmospheres whenever possible.
- 2. Measures are taken which prevent the ignition of hazardous atmospheres.
- 3. Measures are taken which limit the explosive effect to a safe degree.

This differs from:

Primary explosive protection:

These are precautions taken to prevent or restrict the formation of hazardous explosive atmospheres.

Secondary explosive protection:

This covers the second group of measures, which are intended to prevent the ignition of an atmosphere that is capable of exploding.

Definition in accordance with 1999/92/EC Directive (ATEX 137)	Reference values (not standardised	Zone to CENELEC IEC	A device from the following device category must be used (see 1999/92/EC – ATEX 137 Directive):	Required identification of the resources permitted in accordance with 94/9/EC ATEX 95.
Area in which a potentially explosive atmosphere as a mixture of air and flammable gases, vapours or mists is present either frequently or over a prolonged period.	> 1000 h/a	0	IG	G
Area in which under normal operation a potentially explosive atmosphere as a mixture of air and flammable gases, vapours or mists can occasionally form.	10 1000 h/a	-	2G (IG also possible)	G
Area in which under normal operation a potentially explosive atmosphere as a mixture of air and flammable gases, vapours or mists is not normally present but may occur for just a short period.	<10 h/a	2	3G (1G, 2G also possible)	G
Area in which a potentially explosive atmosphere in the form of a cloud of flammable air-borne dust is present either constantly, over prolonged periods or frequently.	> 1000 h/a	20	ID	D
Area in which under normal operation a potentially explosive atmosphere in the form of a cloud of flammable air-borne dust can occasionally form.	10 1000 h/a	21	2D (ID also possible)	D
Area in which under normal operation a potentially explosive atmosphere in the form of a cloud of flammable air-borne dust is not normally present although may occur for just a short period.	<10 h/a	22	3D (1D, 2D also possible)	D

Division into Temperature Classes

The temperature class indication can be guaranteed only if the ambient temperature specified for the operating device is respected (see Technical Data or Rating Plate). Strict compliance is a mandatory requirement.

Once the maximum surface temperature of any apparatus reaches the ignition temperature of the surrounding hazardous atmosphere an explosion can occur.

Because of this, all equipment classified to Group II is divided into temperature classes. To allow for the possibility of potential hazardous atmospheres, the lowest ignition temperature must always be higher than the maximum surface temperature.

Temperature classes of flammable gases and vapours and permitted surface temperatures of the operating device in accordance with DIN EN 50014							
Temperature class	ΤI	T2	T3	T4	T5	T6	
Ignition temperature in °C	>450	>300	>200	>135	>100	>85	
Maximum Surface temperature in °C	450	300	200	135	100	85	
E.g.	Propane Methane Ammonia	Ethylene Alcohols Acetylene	Petrol Solvents	Ethylether Acetaldehyde	-	Carbon- disulphide	

Explosions are dependent on many parameters.

For only atmospherical conditions and pure substances sufficient comparitive values and data are shown. An explosion can only occur where a flammable substance in the form of gases, vapours, smoke and dust exists along with sufficient oxygen to support combustion and there is a source of ignition.

e.g.

 - Hydrogen
 4,0 bis 77,0% in air
 - Propane
 1,7 bis 10,6% in air

 - Ammonia
 15,4 bis 33,6% in air
 - Methane
 4,4 bis 16,5% in air

Fundamentals of dust explosion protection

Fundamental principles:

The manufacturer of operating devices for areas rendered potentially explosive through dust must indicate the maximum surface temperature of all devices that dust can penetrate (usually expressed in $^{\circ}$ C – indication of the temperature class should be avoided here). This temperature is part of the dust Ex-designation.

Designation examples:

II 2 DT90°C IP64, II 2 D Ex td A2 I T90°C IP64

(If the ignition protection type is based on the housing, the housing protection rating should also be stated as an IP Code) or II 2 D Ex iaD 21 T96 $^{\circ}$ C

(This device has been approved according to the IEC de-jure standard "Intrinsic Dust Safety – "iaD". This de-jure standard specifies that the designation also contains the corresponding zone – in this case 21)

Dust explosion protection – temperature:

Combustion and explosion parameters for dusts depend on their condition. Parameters that affect combustion and explosion behaviour include particle size, particle shape, water content, purity and where applicable the content of the flammable solvents. The particle size distribution and the mean value (value for average particle size) should also be known.

In accordance with 1999/92/EG Directive (ATEX 137), the system operator /employer is obliged to make a hazard assessment and must therefore be aware of the minimum glow temperature of the dust.

There are simple calculations to determine the two "temperatures" and they are carried out thus:

- a) Limit temperature I = 2/3 of minimum ignition temperature
- b) Limit temperature 2 = minimum ignition temperature* minus 75°K

These two limit temperatures must now be examined to confirm which guarantees the greater safety.

Example 1:

Minimum ignition temperature = +330°C, minimum glow temperature = +300°C:

- a) Limit temperature $I = 2/3 \times +330$ °C = +220°C
- b) Limit temperature 2 = +300°C -75°K = +225°C

Greater safety: Limit temperature (I) = +220°C

Here a device with a max. surface temperature in the event of failure <= +220°C must be used. As stated, the device designation includes a corresponding value.

Example 2: Minimum ignition temperature = +186°C, minimum glow temperature = +180°C:

- a) Limit temperature $I = 2/3 \times +186$ °C = +124°C
- b) Limit temperature 2 = $+180^{\circ}$ C -75° K = $+105^{\circ}$ C

Greater safety: Limit temperature (2) = +105°C

Here a device with a max. surface temperature in the event of failure <= +105°C must be used.

*The value for the glow temperature applies with a dust layer thickness of 5mm. The temperature safety distance must be increased for larger layer thicknesses.

Special case - Category 3 devices

In contrast to Category I and 2 devices, potential hazards in the event of failure (e.g. short circuiting, connection break etc.) do not have to be considered for Category 3 devices (for use only in Zones 2 respectively 22). The device is evaluated only in respect of hazards during normal operation. It is relatively unlikely that the device should fail at the same time as a short-term explosive atmosphere is present. No EC Type Approval Test Certificate is therefore required for Category 3 operating devices. The manufacturer may confirm that the operating device complies with the relevant standard. Nonetheless, ecom Category 3 devices are still tested by a certified centre and ecom is then awarded a declaration of conformity.

(- Of course, Category 2 operating devices also offer significantly greater safety in Zones 2 respectively 22..)

Dust explosions – albeit of a predominantly minor nature – occur relatively frequently.

A leaflet issued by the Government Safety Organisation of the Federal Republic of Germany states:

"According to documentation published by property insurers, it can be assumed that an average of one dust explosion per day occurs in the Federal Republic of Germany; around one in four of these explosions are caused by foodstuff or animal feed dusts." Dust explosions are a world-wide problem. Between 1980 and 1990 in the USA, for example, some 200 serious foodstuff or animal feed related dust explosions were recorded, causing 54 deaths, 256 injuries and property damage amounting to 165 million US dollars.

**Figure 1.1

Dust explosions by dust type

**Figure 1.2 Ignition sources by electrical operating device type

Electrical operating devices represent only a small proportion of the ignition sources found to cause dust explosions – not least due to the safety stipulations in the regulations for erecting electrical plants in potentially-explosive areas.

With the introduction of the already outdated "Regulation on electrical equipment in explosive areas, ElexV" [1.4] in 1980, a type approval test certificate by a prescribed nominated body was legally required for electrical equipment intended for use in zone 10 (in zones 20 and 21 from 01/07/2003).

"Dust explosion-protected" operating devices, the surface temperatures of which lies below the acceptable limit for standardised dust thickness of 5mm, can, despite the existence of an official test certificate, become a danger source if, contrary to the conditions, they become covered or completely encased with a thick layer of dust.

Dust explosion protection therefore, more than gas explosion protection, depends on the correct device option, the application conditions and a regular monitoring and maintenance routine.

**Figure 1.3
Example of heavy dust deposits on a screw conveyor.

** Pictures graphics and some text extracts with the kind approval of Danfoss Bauer GmbH and the author of the article entitled "Explosion protection for gear motors", Helmut Greiner.

Types of ignition protection

Type of ignition	Desig- nation	Symbol	Basic principle	Use (zone)	Standard
Explosion protection Basic concepts and methodology			Particular attention should be paid to the following, which applies for Zone 0: Surface temperatures should not exceed 80% of the ignition temperature of the gas, even in the event of rarely occurring malfunctions. (also includes information relating to temperature safety distances for the "Dust-Ex-area")		Still valid
General requirements		€ x	General requirements for the construction and testing of electrical devices in-tended for use in the Ex-area.		EN 60079-0
Special requirements for equipment in Group II Category I in a gaseous atmosphere	Ex ia or Ex ma*	Zone 0	Safety - even during the occurrence of two independent faults or - during failure of a technical protective measure caused by a second independent protective measure	0, I and 2	EN 60079-26
Intrinsic safety	Exi		The development of inadmissibly high temperatures, ignition sparks and arcs are avoided due to the restriction of energy in the circuit. Explanation in detail: ia = use in zone 1, 2, (0) only in consideration of other standards! (depending on the device category) ib = use in zone 1, 2 (depending on the device category) ic = use in zone 2 (normal operation, no faults)	0, 1 or 2	EN 60079-11
Encapsulation	Ex m	[Encapsulating the ignition source in a grouting compound prevents ignition of the atmosphere. Explanation in detail: ma = use in zone 1, 2, (0) - only in consideration of other standards! (depending on the device category) mb = use in zone 1, 2 (depending on the device category)	0, I or 2	EN 60079-18
Increased safety	Ex e	*	Only applies to equipment or their components, which, under normal circumstances do not generate sparks or arcs, do not adopt dangerous temperatures and whose rated voltage does not exceed 11 kV.	l or 2	EN 60079-7
Oil immersion	Exo	4	Equipment or their components are put into an oil filled casing, which separates them from the Ex-atmosphere.	l or 2	EN 60079-6
Pressurisation	Ех рх	7×4×1	The ignition source is sealed by an ignition protection gas which is subjected to overpressure - this prevents penetration by the surrounding atmosphere. Explanation in detail: px = reduction from zone or group to "non-incendive" (within the pressurised enclosure) py = reduction from zone to zone 2 (within the pressurised enclosure) pz = reduction from zone 2 to "non-incendive" (within the pressurised enclosure)	l or 2	EN 60079-2
Powder filling	Ex q	7 4	Ignition source is encased by fine-grain sand - this prevents the Ex-atmosphere that surrounds the enclosure from being ignited, for example, by an arc.	l or 2	EN 60079-5
Flameproof enclosure	Ex d	7 4 [If an ignition occurs inside the casing, the explosion is kept entirely concealed and is not transferred to the surrounding environment.	l or 2	EN 60079-1
Type of protection "n"	Exn	Zone 2	Slightly simplified application of other forms of ignition protection. Equipment in this category ensures the required level of protection during normal operation. Explanation in detail: nA = non-sparking electrical equipment nC = sparking equipment that also has protected contacts nR = restricted-breathing enclosure nL = equipment and circuit with limited energy nZ = equipment with n-pressurisation		EN 60079-15

D	Wire		W	Weather conditions	

Division into zones

Safety is our 1st priority

Safety plays a particularly important role wherever flammable substances are manufactured, processed, transported or stored, – particularly in the chemical and petrochemical industry, during the transportation of crude oil and natural gas and during mining.

In order to ensure as high a safety level in these areas as possible, the legislative bodies of many countries have developed corresponding requirements in the form of laws, regulations and standards. Globalisation has enabled signi-ficant strides to be made in terms of compiling uniform directives for explosion protection.

The European Union has played a pioneering role in this aspect: Directive 94/9/EC created the conditions for complete standardisation when it came into effect on 1 July 2003, as it has resulted in all new appliances for the European market requiring certification according to the directive. The introduction of the new "60 and 61 standards" saw a harmonisation of the European standards with the increasingly accepted worldwide IEC standards.

Meaning of the zone classification:

Zone 0/20: Danger is always present, for a long time or frequently

Zone I/21: Danger is occasionally present

Zone 2/22: Danger is seldom present or present for a short time

Quality Assurance - Production

Physikalisch-Technische Bundesanstalt (Test and Certification Body) Braunschweig and Berlin

Notice of recognition of production quality assurance

(2) Devices or safety equipment or components for intended use in potentially explosive areas – Directive 94/9/EC

(3) Notification No: PTB 97 ATEX Q013-4

(4) Product group(s):

Test instruments, measuring instruments, calibrators, IT, communications, auxiliary equipment, lamps and lights with the determining protective type intrinsic safety "i" as well as the protective types of pressureresistant encapsulation "d", increased safety "e", cast encapsulation "m", sand encapsulation "q" and of dust-explosion protection "tD", "iD" and "mD".

The appointed body keeps a list of the EC type-examination certificates for which this notice applies.

(5) Applicant: ecom instruments GmbH

Industriestraße 2, D-97959 Assamstadt, Germany

(6) Manufacturer: ecom instruments GmbH

Industriestraße 2, D-97959 Assamstadt, Germany

- (7) The Physikalisch-Technische Bundesanstalt (PTB), as the body appointed with No. 0102 for Attachment IV in accordance with Article 9 of Directive of the Council of the European Community 94/9/EC dated 23 March 1994, informs the applicant that the manufacturer maintains a quality-assurance system for production that satisfies Attachment IV of this directive.
- (8) This notice is based on the confidential audit report, No. 06-26316, issued on 8 December 2006 This notice is valid until 5 October 2009 and may be rescinded if the manufacturer no longer satisfies the requirements of Attachment IV.

The results of the regular inspection of the quality-assurance system are constituent to this notice.

(9) In accordance with Article 10 (1) of Directive 94/9/EC, the identification number 0102 of the PTB as the appointed body becoming active during the production monitoring phase must be stated behind the CE symbol.

Certification Body Explosion Protection

Braunschweig, 8 December 2006

Declaration of Conformity

according to

- 2002/96/EC (WEEE Directive) and
- 2002/95/EC (RoHS Directive) and
- The Elektro-Gesetz (German Electrical and Electronic Equipment Law) of 24 March 2005

We, **ecom instruments GmbH**, hereby declare that all electrical and electronic equipment we will supply starting on 1 July 2006 will have been manufactured according to the RoHS Directive and will have to be disposed of by us according to the WEEE Directive.

For you as an industrial customer, this means that after 1 July 2006 we will guarantee conformity with RoHS before any product leaves our premises.

Disposal of the waste electrical and electronic equipment we have supplied is arranged as follows: Electrical devices and "historic" electrical devices of **ecom instruments GmbH** are transported to us for the obligatory disposal at our cost and are disposed free of charge in accordance with the European Directive 2002/96/EC and the German Electrical and Electronic Equipment Law of 24 March 2005. The costs of transporting the equipment to **ecom instruments GmbH** are to be borne by the sender.

For our commercial partners, it basically holds true that the resale of products not compliant with RoHS is still permitted even after 1 July 2006, provided that these products were purchased from us prior to this date or fall into equipment category 3, 5 or 9 due to appropriate integration. Disposal shall also remain unaffected by this.

We are thus fulfilling our obligations according to the Electrical and Electronic Equipment Law as a manufacturer of electrical and electronic products. We would be pleased to answer your questions at any time regarding our Ex and standard products as well as the application of the Electrical and Electronic Equipment Law.

Assamstadt, 8 March 2006

Wolfgang Nusko

(Director Quality Management)

Rolf Nied

(The Management Board)

WEEE-Reg.-Nr.: DE 934 99306

Trend-setting success

The success of our industrial PDA *i.roc*° x20 is an excellent example of how the use of mobile solutions can help optimise profitability and efficiency of your company. Whatever the size and type of business, there exists opportunities to further optimise production flow and data transfer. Customised and wisely applied mobile information technology can detect and utilise these opportunities, thereby helping to make the company more profitable. For process controlling this means continual identification and diagnosing of faults in order to make the correct decision for production flow. At management level, intelligent information systems can prevent the occurrences of standstill and waste, improve production performance and therefore help guide the company to higher efficiencies.

Application of state-of-the-art technology

The XScale processor, the operator interface featuring different Windows mobile operating systems, the impact resistant TFT display with touchscreen function and the extensive range of equipment and accessories all got to make the *i.roc*° the perfect tool. The *i.roc*° product concept is truly impressive, with its innovative power and flexibility allowing the early adoption and application of new ways of working in hazardous areas. The long term product strategy with HP further guarantees investment security for our clients.

Versatility by flexibility

ecom instruments already provide customised and flexible solutions for mobile applications in a variety of industries in co-operation with partners such as HP, Deister electronics, microsensys and Barcodat.

If you have a requirement for a tailored solution - please contact us.

Non-incendive PDA *i.roc*® 520 -Ex while process visualising

Concept Many PDAs provide ecom the possibility to integrate barcode scanners or RFID reading devices via CF card slot. The *i.roc*[®] ×20 features the considerably more flexible way of integrating modules by interface into an individually designed casing. The dustproof and waterproof casing, consisting of three parts, facilitates customised hardware.

Possible applications Visualising of processes Water treatment Management Information System Maintenance Quality assurance Service sector Safety certification authorities and organizations

Active and passive RFID Tags

Especially when using RFID the customer and his application finally decide which kind of frequency, tags and reading devices are used. In cooperation with solution partners ecom instruments has developed optimised RFID modules especially for mobile applications. These guarantee the highest level of flexibility and freedom of decision.

2D barcode imager

All common linear bar codes as well as 2D codes with high amounts of data and integrated security features, such as Aztec or DataMatrix, can be read directly. Complete labels can easily and rapidly be scanned using the integrated CMOS camera. According to the needs and requirements of the client also other reading systems, like classic laser scanners, can be applied.

Interfaces

With the demand for efficiency of production and logistics, it is essential that high quality radio transmission solutions are available. The *i.roc*® x20 provides adaptability, so that the latest technology can be applied. Depending on individual requirements, different ways of communication can be selected on the *i.roc*® x20. Online access can allow direct access into the company. Both WLAN and Bluetooth interfaces are integrated as standard, allowing serial point to point connections or network access.

- · flexibly applicable
- extensive equipment
- individual solutions for customers (even for low quantity requirements)
- integrated WLAN and Bluetooth
- handwriting recognition
- one-hand operation
- open system platform for easy integration

Handwriting recognition for verification of data

Bluetooth connection for data transfer

Radio transmission techniques like WLAN allow wireless control as well as working from a distance

i.roc* 420 in landscape mode with optional RFID module

Overview

Three model types of the $\emph{i.roc}^{\circ} \times 20$ series

i.**roc**® 42×

i.roc® 52×-E×

i.**roc**[®] 62×-E×

Based on HP iPAQ technology

Operating systems Windows Mobile 5

Onboard WLAN (802.11b) chip with a range of up to 300 m (985'), enable access to data wherever and whenever.

Integrated Bluetooth class II chip with a range up to 10 m (33'). Supports the most Bluetoothprofiles

Software package included, AutoInstall, Pre-Config Tool, Kiosk mode, virtual fullscreen keyboard

Programming other infrared enabled devices using

IrDA / SIR / FIR with up to 4Mbit/sec

Highspeed USB 2.0 client connection to a standard desktop PC via Dockingstation DS $\times 10$

10101

Internal serial RS232 interface for connecting optional read/write modules or communication modems

RFID read / write modules for different frequencies like 125 kHz / 134 kHz / 13.56 MHz and technology TROVAN, TIRIS, MIFARE, ISO 14443, ISO 15693

Modules for collecting barcodes using ID Barcode Laser or 2D Barcode Imager

Development of customer specific modules

Barcodemodules

Two main types of barcode reading devices are available. There are laser scanners that record the barcode by means of a reading line. This is more than sufficient for one-dimensional codes, since one line contains all information. After the introduction of two-dimensional codes, the laser scanners were improved in a way in which deflection mirrors create a second scan line that is generated at a certain angle.

This way it is possible to read stacked two-dimensional codes. The second type of device is called an "area imager". Integrated picture record modules record the barcode as if taking a photo. Then software algorithms are applied to find the barcode area within the picture, to recognise type and turning position and finally to identify the bar code. This makes it possible to read matrix codes as well.

The automatic recording and implementing of data to a wide range of concepts is of increasing importance. It is demanded to store as much data as possible in a space as small as possible. In addition it must be possible to read and process this data reliably.

Nowadays there are approximately 30 symbologies on the market. The optional integrable CMOS Barcode Imager BC x10-Ex fitted to the *i.roc*° x20 can read all common barcodes, such as ID linear codes, 2D stacked/matrix codes, OCR fonts, postal codes. This module comprises an omni-directional (360°) scanning range and a double coloured "aimer" that marks the scanning area.

Application of the industrial PDA's *i.roc*[®] 420 in a shipping department.

Technical data BC x	10 -Ex imager:
readable bar codes:	
2D:	PDF417, MicroPDF417, MaxiCode, Data Matrix, QR Code, Aztec, Aztec Mesas, Code 49, EANUCC Composite
Linear:	Code 39, Code 128, Codabar, UPC, EAN, Interleaved 2 of 5, Reduced Space Symbology, Code 93, Codablock F
Postal:	Postnet, Planet Code, British, Canadian, Japanese, KIX (Netherlands)
OCR Fonts:	OCR-A and OCR-B
Focus:	178 mm (7'') from front panel (nominal)
Scan area:	360°
Viewing angle:	±40°
Surround light:	535 lux - 100.000 lux (49' cd - 9292' cd)
Technical data BC x2	21 -Ex laserscanner:
readable bar codes:	UPC/EAN, Code 128, Code 39, Code 93, I 2 of 5, Discrete 2 of 5, Codabar, MSI Plessey
Focus:	min. 30 mm (1.18"), max 760mm (29.92")
Light Source:	Visible Laser Diode 650 nm
Scan Angle:	53° (typical)
Scan Patterns:	Linear
Scan Rate:	39 (± 3) scans/sec (bi-directional)
Ambient Light:	4844 lux - 107640 lux (450' cd - 10000' cd)
Laser Classification:	CDRH/IEC Class 2

Flexible in application and robust, RFID write/read systems provide for quick and reliable identification of objects at various distances.

Primarily developed for application in production, commerce and logistics, the user memory has up to 2kb, depending on the type of transponder, which allows for the recording of information relating to the product to be stored without having to be connected to an external database.

Wherever the mobile storage of data is required, e.g. for object identification, service or storage management, the RFID module is the ideal solution.

- Integration into already existing systems is possible.
- relatively wide reading-range
- anti-collision, logging by more than one transponder in the field
- software updates possible

Basics of RFID technology

RWU (Read/Write/Unit)

Radio Frequency Identification (RFID) comprises wireless data transfer on the physical basis of electro-magnetic alternating fields. A RFID system consists of a transponder and a mobile or stationary write/read unit with antenna.

Transponders feature a micro chip and a coil/antenna in different casings (plastics, glass, coins, key holders, smart label) and work within different frequency ranges. With regard to power supply transponders are distinguished as:

- active (with battery for own power supply)
- passive (power supply for data transfer inductive from write/read unit)

Extract from the technical data: RF x10 -Ex/AD (13.56 MHz)						
Operation frequency:	13,56 MHz					
Write/Read range:	up to 80 mm (3.1"), depending on transponder type and environment					
Speed of data transmissioin:	about 26 kB/sec					
Writing transponder:	< 50 ms per block					
Reading transponder:	< 50 ms per block					
Transponder types:	ISO 15693, Tag-It, I-CODE, EM, SLI, HFI, LRI and Infineon					
Extract from the technical	data: RF x11 -Ex/AC (125 KHz)					
Operation frequency:	125 KHz (134 KHz on request)					
Write/Read range:	up to 80 mm, (3.1") depending on transponder					
Transponder types:	UNIQUE, HITAG-I, HITAG-S, TIRIS, EM 4X25, EM 4X70, Q5 (other types on request)					
Special features:	Software loader for firmware update provides highest flexibility for customer applications					

During field operation while inspecting system parts.

ecom instruments offers a vast variety of very different tags for industrial environments. Each of these transponders is optimised for the scanners we are providing. In order to provide the greatest variety possible, there are very different kinds of chip sets and types in different forms of casing. Therefore a corresponding tag can be delivered for almost every application and purpose. Some of them are also available as off-the-shelf products.

For example the PU Tag. It is available in 3 different sizes and forms. With diameters from 34 mm (1.3") , over 54 mm (2.2") up to 90 mm (3.5"). Special attention has been paid to the chemical resistance and the big reach of application concerning temperatures. Thanks to the special PU grouting and casing (IP 67) they can resist temperatures of up to 120 °C and most acids and bases used in industrial processes. On this page we can only show you a small selection of the possible transponders. Please contact us if you would like to discuss in further detail the complete available range.

Today it is more important than ever that there is a flexible approach to meeting client requirements.

ecom instruments offers this flexibility for clients projects - large or small. Not all projects require a high number of units and need only an individual and customised solution. Small challenging solutions in particular demand dedicated application. On this and the following pages we showcase the versatility of thei.**roc**® x20 by the way of client projects that have already been achieved. Many of these solutions are now part of our standard portfolio.

Please contact us to discuss in confidence your specific application requirements.

868 MHz radio module

Here, one of the main problems was the installation of an omni- directional rod antenna. In addition, it was interesting that the radio module that was to be used, was bigger than a certain mechanical size, which made it impossible to fall back on the previous solution. Finally, the project was realised by the vertical installation of the blanks and the mechanical protection of the antenna. In addition, the radio module was of a size and dimensions that meant it was neccessary to re-design the casing.

CAD production drawing

Non-Ex: Class I Bluetooth Module

High scope if a radio contact is used, global use without national restrictions as with WLAN 802.11b, total robustness and interference resistance, combined with a PDA that is easy to use – that was the profile of demand when the project was started. All this was put into practice by the way of installation of a Class I Bluetooth radio module. The Bluetooth interface still is one of the most secure radio contacts, it can be switched to "invisibility"-mode and cannot be "seen" by anyone anymore and changes the frequency I 600 times per second in the 2.4 GHz band, which is approved all over the world.

Variety via flexibility

This is only a selection of options that have already been realised. Also for you and your application **ecom instruments** can be the flexible partner for the realisation of such a solution.

Note:

Some of the solutions that have been presented on this site and solutions given have not been developed for hazardous locations. For application in hazardous locations only those modules with the designation "Ex" in the title (for example BC $\times 10$ -Ex) are allowed to be used.

The extensive range of accessories (leather carry case, hand strap, USB data transfer set, car holder, additional batteries, charging cable, etc.) further enhances the application and use of the *i.roc*®.

Here is just a selection of accessories currently available. If you have a specific requirement - please contact us.

Leather bag with belt loop and carrying strap

The leather bag combines carrying comfort and easy handling.

Hand strap

This hand strap reduces handling fatigue and helps prevent accidental dropping.

Leather carry case with carrying strap and stylus

Especially made for use with the **.roc**° series, this leather carry case further expands and enhances the usage of the **.roc**°. While providing much higher impact protection as well as comfortable carrying, its flexible design means that it is also suitable for **.roc**° units that are fitted with either RFID or Barcode modules.

Handle

Ergonomically sound handling using the screw-on type handle broadens the possibilities of functions and applications.

Docking Station

The docking station DS $\times 10$ can be used to charge the devices internal battery pack as well as synchronise data with a desktop PC connected via USB. Depending on custom configuration, when inserting the **.roc** $^{\circ}$ $\times 20$, a synchronisation software, like Microsoft Active Sync, will run automatically.

Display-protection

This special antistatic display protection film is made in such a way as to replicate the sense of a pen writing on paper. The soft cushioning effect of the film also helps to protect the screen from scratches. Easily removed and cleaned - so it can be reused many times over.

Charging adapter for vehicles

The *i.roc*° can also be recharged in cars using the charging adapter LG ×10 car.

ecomTools

To set up the *i.roc*° x20 series exactly to customers specifications, *ecom instru- ments* developed some smart software applications and tools. The functions described on these pages are principially available on every *i.roc*° x20. Projects or customer specific programms can be realised easily and quickly.

ecom Edit

With the help of this tool the end-user is able to configure the PDA. With "Auto-Install" and the "SystemBackup", the new configuration will be loaded after next hardreset. The parameters are devided into several chapters like WLAN, Bluetooth, Power, Storage, Keyboard and others. The configuration file can be also modified on the desktop computer before distributing to your mobile devices. This allows an easy way to configure a large amount of devices within a project.

Kiosk-Mode

One of the favorite applications for Pocket PC is to allow only the use of predefined programs - This functionality is called Kiosk Mode. The tool Kiosk Switcher which can be used on every *i.roc*° x20 allows it to set up nearly every custom application in such a Kiosk-Mode.

AutoInstall

One of the best ways to back up and restore all the information you wish to keep on your mobile device. It is safe, easy to install, simple to use and it's developed exactly for the *i.roc*° x20 series efforts. System Super Visors can choose between using an AutoInstall or SystemBackup function, together these two applications fullfill every customers wish to preconfigure

Keyboards

Especially for PDAs for industrial use a reliable and easy method of recording data is required. Responding to these requirements **ecom instruments** decided to take a new road — with virtual full-screen keyboards.

Worn and dirty keypads, ingress of dust and contaminants and a lack of keypad illumination are now no longer a problem.

- three different layouts (numeric, alpha, special) available
- fast-switch key

Perfectly designed for data input while wearing gloves.

Technical Data

Processor

Intel XScale® PXA 270 Processor (520 MHz)

RAM

64 MB SDRAM/128 MB

ROM

Flash ROM 512 MB built-in SD card slot, (fitted with standard I GB SD card), build in CF card slot

Display

3.5" transreflective TFT colour display, 64k, QVGA, 240 \times 320 pixel, portrait and landscape mode, protected by a Makrolon panel

Audio

Integrated microphone and loudspeaker, internal 3.5mm Stereo audio jacket

Power supply

Rechargeable lithium-ion battery, different capacities depending on model type (*i.roc*® 420: 2880 mAh; *i.roc*® 520 -Ex: 2880 mAh; *i.roc*® 620 -Ex: 4000 mAh)

Note: The battery's service life depends on the user's operating habits and the PDA's configuration. The use of radio modules and background lighting significantly reduces operating time (larger batteries available on request).

Charger

LG $\times 10$ (Input: $100\sim240$ VAC, 50/60 Hz, 0.3 A, Output: 5VDC (typical), 2A (typical) different country adapter included in delivery

Keyboard

On/off – switch, reset keys, 5 programmable function keys, 5-way navigation field (customised design on request)

Housing

Protection class IP 65 (immersion for brief periods), antistatic non-corroding housing, shock resistance Im (3,281') onto concrete

Honeywell MCT202 - Intrinsically Safe Configuration and Maintenance Tool

For HART® or DE protocol enabled pressure or temperature transmitters. Comprising of the industrial PDA PC i.roc® 620 complete with integrated HART®/DE Modem and software applications MC Toolkit and SDC 625.

The MCT202 is a mobile configuration tool for all Honeywell ST 3000 series transmitters (pressure, differential pressure, absolute pressure) and series STT 250/350 (temperature). With the use of this MCT202 all Honeywell transmitters with integrated DE protocol or HART® protocol can be configured. The SDC 625 software application utilises DD-IDE/SDC 625 technology and "Open" Tools standard. Each MCToolkit is loaded with all HART® Device Descriptions files so that any HART® device can be configured - including common, universal and specific device commands. It will also allow vendor specific menus to be run. The

intuitive use of the user interface offers detailed explanations and submenus during the whole configuration procedure. As well as the normal diagnostic functions the MCT202 provides transmitter built-in diagnostic routines. Furthermore, all process data can be shown for troubleshooting, calibration and service inspection routine.

- mobile configuration tool compatible with all main manufacturers of HART enabled transmitters.
- comfortable transmitter configuration - well known windows user interface
- closes the gap between PC based applications and uncomfortable "configuration-bones"
- futureproof and reliable, software updates can easily be downloaded by customer via PC connection, new DD's (device descriptions) can be stored on internal SD memory card
- transmitter diagnostic or online monitoring possible
- transmitter calibration possible

- uses the HART® Smart Device Configurator (SDC 625) technology
- supports HART® 5.0/6.0

Content of delivery

- *i.roc*® 620 -Ex with integrated HART®/DE-modem
- Charger LG x10
- USB connection set x11
- Connection cables with clips
- CD containing MCToolkit Software and SDC 625 Software
- Integrated SD card with preinstalled Software and HART Device Descriptions

Optional Accessories

- USB Dockingstation DS x11 with PC connecting cable
- Leather carry case

Intrinsically safe mobile phone x.com 200

The **X.com** 200 is a tri-band mobile phone designed for reliable mobile communications in harsh and hazardous environments. It is protected against water, dust and everyday impacts and is therefore particularly suitable for working in extreme conditions. The **X.com** 200 is extremely durable, which therefore makes it the ideal solution for all applications in the Ex area.

The **X.com** 200 can be connected to various Bluetooth-compatible devices via its Bluetooth® functionality. The PC software can be downloaded free of charge. After the user-friendly installation procedure you can transfer or synchronise data, contacts and schedules easily via Bluetooth® or by using the data cable.

It has a very bright colour, 128×160 pixel resolution display with an anti-glare coating. Another distinctive feature is the extremely loud separate speaker for ringtones and hands free function.

Thanks to its ruggedness, the super display and loud volume the **X.com** 200 is the ideal partner for anyone who has to work under tough conditions, yet appreciates the value of a reliable tool.

- Tri-band mobile phone for GSM 900/ 1800/1900 networks
- LCD display with 65,536 colours
- Bluetooth®
- Data transmission via GPRS
- Rechargeable 1180 mAh Li-ion battery
- Free software for data transfer and synchronisation
- · Integrated Office functionality
- Java™ MIDP 2.0 platform
- WAP 2.0
- Opera Mini Web browser

Optional accessories:

- **X.com** 200
- Battery AMX 20
- Charger LGX 20
- Safety information
- Instruction manual

Ex-data:

Ex-designation:
© II 3 G Ex nA nL IIC T4

The **X.com** 200 mobile phone is an outdoor phone that can withstand extreme environmental conditions. It is ATEX certified for Zone 2 and 22 and it continuously provides the necessary degree of safety for your work - particularly in the Ex-area. The IP 67 protection class underlines the ruggedness of the device. It is waterproof, protected from dust and can withstand severe temperature fluctuations to minus 20 degrees. It is a tri-band phone that supports all 900/1800/1900-MHz networks worldwide. It is therefore flexible and accessible at any time.

Technical data:	
Networks:	Triband GSM 900 / 1800 / 1900 MHz
Data transfer:	GPRS class 8
Display:	LCD Display with 65.536 colours (resolution 128 x 160 pixel)
Power supply:	1180 mAh Li-ion battery
Talk time / standby:	max. 5,5 hrs / max. 220 hrs
Charging time:	ca. 3 hrs
Dimensions:	119 × 57 × 25 mm
Weight:	approx. 160 g
Ambient temperature Ta:	-20 °C +50 °C
IP protection class::	IP 67

Accessories for intrinsically safe mobile phone x.com 200

Intrinsically-Safe Mobile Phone x.com

X.clusive, X.treme X.plosion-proof - the **X.com**. It is the first mobile phone with an integrated acceleration sensor and GPS receiver for providing dead man's alarm and location of workers in emergency situations. The robust housing offers a high level of stability and durability against shocks and is also dust tight and splash proof according to IP64.

The **X.com** mobile phone series provides you with reliable and safe communication for your daily work inside the Ex-area. This extremely robust mobile phone meets your high industrial requirements according to the IP64 protection rating and is specifically suitable for demanding and loud environments.

The **X.com** supports GSM 900/1800 networks worldwide, so that you are flexible and can stay in touch. Besides the classic telephone functions, you can send and receive E-Mails and text messages everywhere. And with predictive text input (T9), messages are quickly written.

The **X.com** can be connected via Bluetooth® to various Bluetooth®-capable devices. For example, connect your mobile phone to a PC and synchronise your contacts. The integrated organiser functionality allows you to note appointments in the calendar or to be reminded about tasks.

X.com versions xxI and higher are fitted with an 3D-acceleration sensor and the most up-to-date GPS chipset. The integrated acceleration sensor detects the position of the **X.com** user and is able to activate an automatic alarm in case of emergency.

The integrated GPS chip supports the exact location of people in an emergency situation. When the mobile phone sends an alarm, the current position data of the GPS chip is transmitted via SMS to a tracking software application. Please note that positioning using GPS is dependant upon the local physical surroundings.

Emergency situations can be recognised quickly and appropriate rescue operations can be initiated.

The **X.com** is available as an industrial version 40x without explosion protection and as the explosion-protected versions for Zones I / 2I (60x) and Zones 2 / 22 (50x). You can also select between the robust standard GSM version **X.com** x00 and the version **X.com** x0 I with an integrated 3D-acceleration sensor and GPS receiver*.

* All versions of the x.com can be combined in any way (e.g. the x.com 601 is a Zone 1/21 mobile phone with an integrated 3D-acceleration sensor and GPS).

- Dual band mobile phone for GSM 900/1800 networks
- LCD display with 65,536 colours
- Bluetooth®
- Data transmission via GPRS
- Java™ MIDP 2.0 platform
- Integrated Office functionality
- Synchronisation with MS Outlook® or Lotus Notes®
- Rechargeable Li-lon battery with 2500 mAh or 2000 mAh in the Ex-versions
- Man down sensor and GPS (version xx1)

Standard delivery:

- · X.com
- Battery X.com AMH x0
- Charger LGX 00
- Codice di attivazione del software
- Safety instructions (in the I.S.-versions)
- Operating instructions

The mobile phone for extreme requirements.

The first mobile phone with integrated position sensor and GPS for alerting and locating workers in emergency situations.

Able to meet the diverse needs and requirements of industry operating both inside and outside of Ex-hazardous areas, the **X.com x0x** available in three different versions - 40x, **50x -Ex** und **60x -Ex** -along with a comprehensive range of Ex-certifications.

Intrinsically-Safe Mobile Phone Ex-Handy 05

Compact and safe! The Ex-Handy 05 combines simple and comfortable use with the flexibility of enabling you to stay in touch wherever you are – even if you work in ex-hazardous areas. Specifically designed for stability and durability, the Ex-Handy 05 is the ideal solution for working in Ex-areas.

Reliable and safe communication is essential to your everyday work in ex-hazardous areas. The Ex-Handy 05 is an ATEX-certified mobile phone for use in Zone 1, 2 and Zone 22, and always provides you with the necessary safety for your work. The compact housing and the integrated rubber parts provide you with a perfect grip and also deliver protection against dust and shocks in accordance with IP54 protection rating.

The Ex-Handy 05 supports all GSM 900/1800/1900 networks worldwide, so that you are flexible and can stay in touch. Besides the classic telephone functions, you can send and receive E-Mails and text messages from any location. And with predictive text input (T9), messages are quickly written.

The Ex-Handy 05 is equipped with Bluetooth® so that it can be connected to a variety of Bluetooth®-capable devices. For instance, connect your mobile phone to a PC and synchronize your mobile's telephone book or transfer files to your mobile phone. The integrated organizer functionality allows you to record appointments in your calendar or have your phone remind you of tasks.

In addition, Bluetooth® allows you to communicate wirelessly with PDAs. For example, you can transmit data via GPRS* (62.4 kbit/s) to a server or connect directly with your software system — and all in the ex-hazardous areas.

An integrated WAP browser (Version 2.0) provides you with fast and easy access to the mobile web.

The Ex-Handy 05 is particularly characterized by its intuitive use and practical functions. It is the ideal partner for use at the office or on site

Intrinsically-Safe Two-Way-Radio Ex-PMR 1000

The Ex-PMR 1000 is a license and charge-free two-way radio for wireless communication in Ex-hazardous areas.

Safe and reliable communication is an important aspect in Ex-hazardous areas. Stringent requirements have to be satisfied by all radio transceivers used, to ensure a safe communication, even over long distances.

The ecom Ex-PMR 1000 portable radio transceiver was developed specifically for this purpose. Featuring ATEX certification in protection class Ex II 2 G Eex ib IICT4 or Ex II 3 DT130°C IP 54, the device can be used in Zones I and 2, or 22.

The frequency band ranging from 446.000 MHz to 446.100 MHz was opened for public use by the ERC with the publication of its decision ERC/DEC/(98) 25, 26, 27 dated I December 1998. All handheld devices with fixed antenna which operate in this frequency range conform to the ETS 300296 licensing standard and are allowed to be used license- and charge-free in many European countries.

The Ex-PMR 1000 fulfils the rigid specifications of IP54 and therefore meets the high demand for industrial ruggedness and reliability especially for applications in Ex-hazardous areas.

The maximum transmission power is limited to 500 mW ERP, giving a range of up to 5 km. The CTCSS and DCS pilot tone systems are configured for selective analogue and digital coding. A variety of pilot tones enables users to communicate within groups.

All functions of the radio unit can be easily preconfigured via a PC using the optional software kit.

- 16 channels
- DCS selective call for transmission and reception
- Up to 5 km range
- Scan function
- Approved for dust-Ex-areas (zone 22)
- Squelch tail elimination (9 levels)
- TOT (transmission time limit)
- Battery save function
- IP54 protection rating

Standard delivery:

Intrinsically-Safe Professional Mobile Radio Ex-PMR 2000

ecom has developed a professional handheld radio specifically for your daily work in ex-hazardous areas. The Ex-PMR 2000 offers safe and reliable voice communication in daily operation or even in emergency situations. Communicate simply and without risk with your colleagues – at any time in all situations.

The Ex-PMR 2000 can be used in the Zones I and 2.

This professional radio operates in two different frequency bands and is available in either the VHF 136-174 MHz or the UHF 400-470 MHz version. The radio's transmission power has been limited to

1.2 watts for safe working in potentially explosive areas and initiating calls even over large distances.

In addition, the Ex-PMR 2000 complies with IP 64 and therefore satisfies high industrial demands on ruggedness and reliability, particularly in ex-hazardous areas. The CTCSS and DCS pilot tone systems and the signalling modes with five-tone signals guarantee that communication is secure thus preventing interference from other radio communication.

The Ex-PMR 2000 is equipped with a variety of mechanisms to protect lone workers. The integrated position sensor enables the monitoring of angles and will in emergency situations trigger an automatic alarm (dead-man's switch). The functions for protecting lone workers as well as the emergency button also allow manual alarms to be triggered by workers in emergency situations.

All parameters for the Ex-PMR 2000 functions may be comfortably set on a PC using the corresponding software kit and can also be saved for programming several units. Thus minimizing work and ensuring that all radios harmonize with each other.

- 16 channels
- Programmable channel spacing
- CTCSS, DCS, 2- and 5-tone signalling
- Scan mode
- · Adjustable squelch levels
- Transmission time limitation (TOT)
- Emergency alarm functions
- Lone worker protection
- Dead-man's switch with position sensor

Intrinsically safe TETRA THR880i Ex handportable radio

The ATEX approved radio has been specially designed for use in the chemical and petrochemical industry, as well as at airports and on oil rigs.

Numerous accessories such as headsets, chargers and leather cases make the unit attractive for many different areas of application.

The THR880i Ex radio fulfills the following specifications for TETRA radio equipment in the temperature range of •20°C to +50°C:

- EN 300 392 V+D air interface
- EN 300 394 V+D conformance testing
- II 2G Ex ib IICT4 ATEX certification
- The ex-protected modification of the handportable radio is conducted by ecom instruments GmbH

Power class

- EN 300392
- 2 compliant, power class 4
- Receiver class A
- RF power control, 4 steps of 5dB

GPS receiver

- Sensitivity -152 dBm
- Cold start accuracy (open sky*)
 - 5 metres (50% confidence level)
- 10 metres (95% confidence level) *measured at -130 dBm

GPS activity indicator

- Automatic position saving
- Position information sending on request or on triggers (e.g. time, distance, status message)
- Position sending during red key calls and public emergency calls

- Waypoints, waypoint guidance
- NMEA routing to serial port
- Support for ETSI location information protocol for TETRA (LIP)

Group communication

- Up to 2000 talk groups
- Up to 200 talk group folders
- Up to 400 groups per folder
- Dynamic Group Number Assignment (up to 200 DGNA groups)
- Up to 10 background groups
- Priority scanning
- Scanning list up to 59 talk groups
- Voice override in group calls (pre-emption)
- · Late entry

Direct mode features

- Up to 180 DMO groups
- 60 DMO channels
- DMO gateway and repeater support
- Scanning
- Red key call to DMO group, red key call to TMO within TETRA network coverage
- Public emergency call within TETRA network coverage
- DMO SCK encryption
- Status messages in DMO

The dual operating concept and the battery, which can be exchanged outside the Ex-area, fulfil the needs of customers in an optimum manner.

Simple standard communication via the radio element and the ability to use all of the conveniences of a mobile phone have already won over numerous customers. It's IP55 protection rating ensures the unit is protected against water splash and dust, and is therefore ideal for use in Ex-Zone I + 2.

Technical data:	
Frequency range:	380 - 400 Mhz, 410 - 430 Mhz, Non-Ex
Display:	High-resolution active TFT color display Supports up to 65,536 colors within 130 \times 130 pixels
Power supply:	Internal Battery BLN-Ex, Li-Poly 1400 mAh
Talk time:	up to 1,5 - 3 h (Duplex operating)
Stand-by:	up to 17 h
Charging time:	up to 2,5 h (with ACP-12, off)
Dimensions:	157 × 57 × 35 mm
Weight:	275 g
Protection rating:	IP 55

Call types

- Phone calls in TETRA network
- Phone calls to public network
- Express and group calls in TETRA networks
- TETRA emergency calls
- Public emergency calls
- Dual operating concept (telephone and radio)
- Direct mode feature
- · Air interface encryption
- GPS receiver
- Text messages
- Group communication with up to 2000 talk groups
- WAP browser and Java support for customised applications!
- · Lightweight and handy design
- Impact resistant, dust and splash water proof

Intrinsically safe headsets - Ex-TRA 300

The Ex-TRA 300 headsets are a new series of explosion-protected headsets for use under extreme conditions. The products have been developed in conjunction with demanding users and subjected to rigorous examination. We are therefore sure that the headsets will fulfil your requirements for industrial capability and reliability.

too loud a noise level. Soft sealing rings and gentle contact pressure ensure high wearing comfort and high insulation values.

The Ex-TRA neckband headset can be easily worn with a helmet without being connected. The speaker is connected to the ear via a soft silicone sound tube, which prevents altering the natural amplification of the ear. The system thus enables clear vocal communication, even in noisy environments.

The Ex-TRA fire brigade headset has been optimally designed for communication between fire-fighters. The rugged design, the waterproof electret goose neck microphone and the splash-resistant transmit button ensure high performance. The universal communication unit can be easily adapted to all common fire-fighter helmets.

The headsets are available for the ecom radio units Ex-PMR 1000 and Ex-PMR 2000, as well as for the Motorola GP series and the THR880i Ex. All headsets are equipped with their own PTT button. The versions applicable for the digital TETRA radio standard have an integrated amplifier circuit. This also ensures clear, loud communication here as well.

Being heard in a noisy environment is very difficult. Without the right equipment it is virtually impossible to relay information and instructions to employees. The head-set series from ecom has been specifically designed for these applications.

Furthermore, the Ex-TRA ear protection headset also protects against subsequent health damage, which can be caused by

Intrinsically safe Bluetooth™ ear protection headset – EX-TRA BT

The intrinsically safe Ex-TRA BT headsets make optimum use of innovative Bluetooth™ technology to facilitate communication in noisy environments. They are on-hand at any time - quickly, easily and wirelessly. No bothersome cables get in the way and you are ensured of constant contact through your phone or radio unit - even if they are not in sight.

are switched on and located within range, communication is effected between them exactly as if they were connected via a cable. When you have connected your headset with your mobile phone, simply press the call button on the headset to answer a call.

If your phone supports voice-activated calling, it is also possible to utilise this function via the headset. The Ex-TRA BT unit is particularly suitable for use with the **Ex-Handy 05** mobile phones from ecom and the entire **X.com** series.

Even existing W-LAN networks can be used for communication when utilised in conjunction with our explosion-protected PDA *i.roc*.

The wireless communication headset with integrated Bluetooth chip enables connection to other Bluetooth units within a radius of approximately 10 metres. No more cumbersome fiddling with cables and connectors: Once the connection has been established full-duplex communication is available at any time - a standard that works around the world. Operation is conducted via four buttons: The function button, call button (PTT/push-to-talk button), volume increase and volume decrease buttons. The headset is even convincing in very noisy environments due to its effective level of sound insulation. It not only ensures hearing protection, but also enables clear, reliable communication at very high noise levels. The efficient noise compensation of the microphone reduces interference from ambient noise. Provided the devices

Intrinsically-Safe ear capsule radio unit Lite Com Pro

Lite Com Pro is a radio unit integrated into the capsules. It enables effective communication up to a distance of 3 kilometres. Two external microphones allow individual adaptation of the ambient noise.

Lite Com Pro is an ear protector with integrated radio unit and electronic level-dependent function. Microphones located on the outside of the headset absorb the ambient noise and relay it to the headphones. The electronics of the ear protector attenuate loud impulse sounds to a safe level, whilst simultaneously facilitating communication with others in the vicinity.

The voice-activated Vox function means you always have both hands free to work.

Lite Com Pro operates at a frequency range of 430 - 470 MHz. The licence-free PMR 446 radio range (at a frequency of 446.000 MHz to 446.100 MHz) can be programmed and used.

A reduction of the transmission power to 10 mW also enables use of the free LPD

frequencies in the 433 MHz frequency band.

Up to 30 channels are available and can be decoded in sub-channels. Individual programming of the frequencies means nothing will interfere when communicating with existing ecom radio units.

The new radio units can be provided with a headband or neckband; a helmet-mounted version is also available.

- 30 channels
- 83 DCS and 38 CTCSS codes for targeted transmitting and receiving
- Up to 3 km range
- Ambient volume can be adjusted over 5 levels
- Receiving volume can be adjusted over 5 levels
- Squelch can be programmed over 5 levels

Intrinsically-Safe LED Stroboscope Tacholite TL 20-Ex

Observe systems at work without shutting them down! The Tacholite TL 20-Ex is a high-performance digital LED stroboscope for daily use in the ex-area. It is especially useful for observing and inspecting systems that exhibit rapid periodic motion sequences. It is certified for use in ex-hazardous areas classified as zone I according to 1999/92/EG (ATEX 137).

The Tacholite TL 20-Ex is a compact, intrinsically-safe LED stroboscope that allows you to inspect your facilities without shutting down the system. It is useful for inspecting maintenance markers on clutches, as well as belt drives and pulleys, roller bearings or compactors. It allows you to see the system at a virtual standstill in order to see what maintenance is necessary. Also making it easier to recognise imbalances and faulty bearings. The TL 20-Ex can also be used to measure engine speed without the need for using reflective markers. As soon as a contrast emerges, engine speed can be determined with high accuracy.

The applications of a stroboscope are nearly endless.

In the field of machine construction, cogwheels and their level of wear or the distribution of coolants and lubricants can be inspected quickly and easily. Of course, clutch slip, drive imbalances and resonance vibrations can also be recognised simply, easily and safely. There are also electrical engineering applications. For instance, cable feeds to vibrating machines can be checked for wear or damage without turning off the machine.

Likewise, mixing and dosage processes can be monitored via a stroboscope. For instance, it can be used to determine the cause of drop formation during automization processes. This helps you quickly get to the root of problems and make settings adjustments.

- · Certified for zone I
- Simple digital control of flash frequency with cursor keys
- · Robust aluminum housing
- Broad field of application up to 21000 U/min or 350 Hz
- Switch from frequency to revolutions with a button

Intrinsically-Safe Laser Tachometer Ex-Tacho 10

For the accurate and fast measurement of shaft rotation or speed with or without contact.

The Ex-Tacho 10 is ideal for fast laser-accurate measurement of the revolution of a shaft (either with or without contact) and speed (utilising the special adapter) in Zone 1. The simple 3 push-button operation and the large clearly-readable display with over-head facility enables a wide, flexible field of application. This light-weight device provides an easy one handed operation and facilitates the carrying-out of measurements after which it can be stowed away in the tool box or jacket pocket.

Applications are to be found in the processcontroled field for the contactless measurement of the revolutions of a shaft at a safe distance using a laser beam. For boiler mixers, the rotor speed can be readoff from the drive shaft at a safe distance and documented. Motor revolutions can be acquired contactlessly in the immediate vicinity without having to open or remove safety fittings such as covers or protective grills. The duration of pulses or the intervals between them can be simply, easily and accurately ascertained. Data can be simply acquired within Ex-protected areas without having to switch machines off because laser-accurate measurements can be made at a safe distance through protective devices thus complying with safety regulations. The transport speed of conveyor belts can be exactly measured using the add-on adapter and thus directly recorded in the documentation.

- · high accuracy
- · handy size
- digital display also for over-head measurement
- types of measurement revolution, speed
- measurement range 3 ... 99,999 rpm

Power supply:	4 x Duracell Procell AAA alkaline	
Battery-Low:	display	
Operating time:	approx. 6 months	

Intrinsically-Safe Ultrasonic Wall Thickness Gauge 1071-Ex

For checking minimum wall thickness of pipes and tanks in Ex-hazardous areas.

With the 1071-Ex measurements of wall thicknesses can be made quickly and accurately in the range of 0.7 to 400 mm.

There are three different probes available to cover this wide measuring range, each of which can be easily and conveniently changed inside the hazardous area.

Due to its compact size and operating time of over 200 hours, this easy to use instrument is essential whenever the continuous supervision of minimum wall thicknesses is required.

For example, it is possible to check the thickness of protective coats or for the erosion of pipe or tank walls even while the plant is operating.

By using the limit value guides, minimum and maximum values can be set and are registered by an audible signal.

The calibration functionality of the instrument means that adjustments can be made to compensate for the type of material being measured, this is done by one of two ways:

- I. entering the sound velocity of the corresponding material
- 2. measuring a material with known thickness and adjusting the instrument to that reference.

These adjusted parameters then stay in the memory even when switching off the instrument. Display resolution and sensitivity are also fully adjustable and as with all the other functions, are easily selected from the straightforward menu.

- Probes can be changed in Ex-zones
- Accuracy ± 0.05 mm
- · limit value guides and monitoring
- · adjustable sensitivity
- easy to use
- · energy saving mode

Standard delivery:

- 1071-Ex
- leather case
- primary cells
- case
- 100 ml of ultrasound couplant gel
- instruction manual

Options & Accessories:

- Standard probe DSE 10,4/6 PB 4
- Handle-collar for standard probe
- Vulcollan films (10 pcs.) for DSE 10.4/6 PB 4
- Low frequency probe DSE 18/25 PB 1,5
- Handle-collar for low frequency probe
- Vulcollan films (10 pcs.) for DSE 18/ 25 PB 1,5
- Mini probe DSE 4,2/4 PB 8
- Vulcollan films (10 pcs.) for DSE 4,2/ 4 PB 8
- ECHOTRACE ultrasound couplant gel 500 ml

Ex-data:

Ex designation:
© II 2 (1) G EEx ia IIC T4

EC-Certificate of conformity: PTB 97 ATEX 2231 X

Technical data:	
Ingress protection:	IP 54
Dimensions:	120 × 65 × 25 mm
Weight:	150 g
Ambient temperature:	-10 °C 40 °C
Storage temperature:	-20 °C 50 °C (without batteries)
Power supply:	2 x AA to IEC LR6, type approved
Operating time:	200 hours continuous operation I-2 years stand-by
Instrument:	operation permitted in Zone I
Probes:	- operation permitted in Zone 0 - can be exchanged in hazardous areas - standard sensor, ambient temperature up to 200 °C for a short time

Intrinsically-Safe Magnet Probe Magnet-Ex 12

For testing solenoid valves, relays, transformers and flow-meters in Ex-hazardous areas.

Magnet-Ex 12 is a pencil sized magnet probe, designed to detect magnetic fields in hazardous areas. Within seconds it is possible to detect whether or not a solenoid valve is electrically activated.

Connection to electronic circuitry or opening of terminal boxes is rendered unnecessary.

The highly sensitive probe point of the Magnet-Ex 12 only needs to be brought near the coil of a solenoid valve, if a magnetic field is detected, the test tip illuminates red. In the same manner tests can be carried out on flowmeters or any other equipment that is working magnetically, even when located in hazardous areas.

The Magnet-Ex I2 comes with an integral test magnet that is securely fitted in such a way that it cannot be easily lost. Using this magnet, tests can be carried out to establish the working state of both unit and batteries.

- highly sensitive probe point
- · no contact with test object required
- · resistant to dirt
- · optical indication
- Built-in test magnet for testing
 Magnet-Ex 12 and for battery check

Standard delivery:

- Magnet-Ex 12
- batteries
- instruction manual

EC-Certificate of conformity: PTB 01 ATEX 2018

After any check the Magnet-Ex 12 will automatically switch off if it is no longer being used. This ensures a long battery life.

The clip attached to the instrument's side secures it from accidental loss and allows the maintenance engineer to easily carry it at all times.

Technical data:	
Detectable magnetic fields:	alternating, direct and permanent fields
Detection:	no contact with test object required
Indication:	optical, built-in LED
Power supply:	2 x LR03 (AAA) according to IEC, type approved
Ambient temperature:	-20 °C +50 °C
Storage temperature:	-40 °C +60 °C
Ingress protection	IP 54
Casing material:	metal/plastic probe point
Dimensions:	150 x Ø18 mm
Weight:	60 g (batteries included)

Intrinsically-Safe Continuity Tester Ex-DT 12

Continuity tester with acoustic and optical indication for fast testing of electrical continuity in Ex-hazardous areas.

- Testing of
 - wiring and electrical contacts
 - resistance
- capacitance
- inductance
- Establishing semiconductor functionality

Standard delivery:

- Ex-DT 12
- protective caps
- batteries
- Instruction manual

Accessories:

- Protective caps
- Spare battery

Ex-data:

Ex-designation: © II 2 G Ex ia IIC T4

EC-Certificate of conformity: TÜV 03 ATEX 2120

The Ex-DT 12 Intrinsically-Safe continuity tester is a handy and robust testing device for use in Ex-hazardous areas. The electronics are housed in the test probe, which means that both hands are free to be able to carry out the test operation.

The combination of optical and acoustic indication allows usage even in noisy environments.

Technical data:	
Ambient temperature:	-20 °C +50 °C
Resistance:	10 Ω - 450k Ω
Inductivity test:	10 mH – 1H
Capacity test:	0.5 μF – 1000 μF
Diode test:	2 diode sections
Max. external inductivity:	IH
Max. external capacity:	1000 μF
Max. error output flow Io:	5 mA
Max. error output voltage Uo:	3.3 V
Max. external voltage resistance outside	$U_m = 420 V_{eff}$
of ex-zone:	
Operating time:	approx. 20 h (continuous)
Visual readout:	4 x LED (in test probe)
Acoustic readout:	loudspeaker
Test probe dimensions (Minus pol):	50 x 180 mm (ø x l)
Overall length:	1.40 m (test probe to test probe)
Weight:	approx. 200 g (including batteries)
Power supply:	2 x LR03 to IEC, type approved

Intrinsically-Safe Loop Calibrator 707Ex

The fast, one-handed tool for loop checks in Ex zones.

The 707Ex is a loop calibrator for use in exhazardous areas classified as Zone I and 2.

- Large display and simple, quickclick push rotary button for easy one-handed operation.
- Simultaneous mA and % readout for quick, easy, interpretation of readings.
- mA accuracy of 0.015 %
- I μA resolution for mA source, simulate and measure.
- Push button with 25 % steps for fast, easy linearity checks.
- 0-100 % "span check" for fast con firmation of zero and span.
- Internal loop supply, so you can power and read a transmitter at the same time.
- Measures up to 28 V dc.
- 0-20 mA or 4-20 mA default start up modes.

 HART®® compatible resistance is connected in series with the loop supply for compatibility with HART®® communicators.

Standard delivery:

- 707Ex
- Ex-Holster
- Safety designed test leads
- Alligator test clips
- Battery
- CD-ROM
- Calibration Certificate
- Instruction manual

Accessories:

- DKD calibration
- Calibration Certificate

Ex-data:

Ex-designation:
If 2 G EEx is IIC T4

EC-Certificate of conformity: ZELM 02 ATEX 0120 X

Intrinsically-Safe Multimeter 87V Ex

For reliable safety inside the Ex-hazardous area: the multimeter 87V Ex. With the robust holster the unit is well protected – even in the toughest conditions.

The 87V Ex is a True RMS Multimeter with electrical safety specifications CAT III 1000 V/CAT IV 600 V according to EN 61010-1.

Measuring technology inside the Ex-hazardous area is always a critical subject. This digital multimeter from ecom instruments GmbH offers a safe, compact solution, as the 87V Ex allows safe measurements both inside and outside (maximum of 10 A/1000 V) the Ex-hazardous area. The multimeter is certified to ATEX (Directive 94/9/EC) for use in Ex-zones I and 2. An additional safety feature is the CAT III 1000 V and CAT IV 600 V approval according to EN 61010 -1.

Designed specifically for industrial applications

This multimeter has been designed using state-of-the-art technology and offers all the functions required in industry. The flexible Ex-holster ensures a safe grip of the measuring device at working. The 87V Ex contains helpful functions such as Min/Max/Avg display and automatic switching between measuring ranges. Rapid changes in the signal can be measured using a bar indicator:

Thanks to its switchable filter (low-pass filter), the multimeter is ideally suited for carrying out precise voltage and frequency measurements on motor drives. Temperature measurements can be made using the accompanying type k thermocouple. The display can be set to either °C or °F.

Special features include an automatic switch-off function to save battery power, Input AlertTM function (giving a warning in the case of incorrect test socket allocation). The display background lighting makes it easier to work in poorly lit conditions.

Flexibility

The option of working on non-intrinsically-safe circuits of up to 1000 V and 10 A can help to reduce the number of devices needed.

Note: existing safety regulations must be observed in any process.

Both fuses (400 mA and 10 A) can be changed by the user outside of the Exhazardous area.

- CAT III 1000 V/CAT IV 600 V
- Min/Max/Avg function
- 4¹/₂" digit display with bar indicator
- Temperature measurement using thermocouple, type K
- Measurements up to 1000 V/10 A (outside the Ex-hazardous area)
- · Background lighting

Standard delivery:

- 87V Ex
- Ex-holster
- Battery
- Measuring leads
- Alligator clips
- Thermocouple, type K
- CD-ROM
- Operating instructions

Optional Accessories:

- Carry case
- Factory calibration certificate
- DKD calibration certificate
- Ex-holster
- Measuring leads
- Alligator clips
- Thermocouple, type K
- Fuses (400 mA and 10 A)

Intrinsically-Safe Multifunction Process Calibrator 725Ex

Simply powerful intrinsically-safe calibration tool

Also available as a standard ,non-Ex' unit.

The 725Ex Intrinsically-Safe Multifunction Process Calibrator is powerful yet easy-to-use. Combined with the 700PEx Pressure Modules, the calibrator is able to calibrate almost any process instrument likely to need service in an ex-hazardous area.

The device is a powerful, multifunction calibration solution that offers:

- Source or simulate volts dc, mA, RTDs, thermocouples, frequency and ohms
- Two channel simultaneous source and measure capability for calibration of transmitters
- Store frequently-used test setups for later use
- Pressure measurement to 3,000 psi/200 bar using any of the 8 intrinsically safe 700PEx Pressure Modules
- Pressure switch test function to capture set, reset and deadband values

Standard delivery:

- 725Ex
- Test leads
- Test clips
- one pair of stackable test leads
- factory calibration certificate
- batteries
- CD-ROM
- instruction manual

Accessories:

- Intrinsically-safe pressure modules of the 700PEx series
- factory calibration certificate
- DKD calibration

Intrinsically-Safe Multifunction Process Calibrator Ex-CAL 8.*

The Ex-CAL 8.* is an all-round calibrator for use in explosive areas in Zone 0. Its wide range of features make it a top class, multi-functional process calibrator.

The documenting process calibrators in the Ex-CAL 8.* series are rugged tools for calibration tasks and troubleshooting measuement in practically all control processes. They enable simultaneous measuring and sourcing of temperature, direct current, DC voltage, frequency, resistance and pressure (measuring only) with an accuracy of up to +0.006% rdg, and are ideally suited for transmitter calibration directly in the field. The Push & Lock clamping system provides direct connection for the transmitter plugs or cables,

which speeds up the measuring process thanks to faster and easier connection of the transmitter. The lightweight, ergonomic and rugged design as well as the large graphic display make working with the Ex-CAL simple, clear and fast.

You can facilitate operating procedures by using the CalpMan calibration software. The calibration tasks to be executed can be created in advance on a PC and transferred to the calibrator. The created calibration task can be started from the Ex-CAL directly on-site and the results stored on the calibrator "As found" and "As left". After transferring the data to the PC the deviations can be viewed in a tabular or graphical format and printed as a certificate with your own logo.

- Accuracy up to ±0.006% rdg
- Push & Lock,TC and 4 mm Industrial Plug Connection
- Internal/External Pressure Modules
- Programmable Tasks
- Documentation function
- Multi-channel data logging
- Simultaneous Measure and Simulation for TRX Calibration
- Large Graphic Backlighted Display

Standard delivery:

- Battery
- Battery charger
- Measuring cable
- Rubber holster
- Instruction manual
- Calibration certificate

Optional Accessories:

- Leather holster
- Rubber holster
- External pressure modules
- Internal pressure modules
- LogMan data-logging software
- LinMan linearisation software
- $\bullet \ \, {\sf CalpMan} \ \, {\sf calibration} \ \, {\sf software} \\$
- Factory calibration
- DKD calibration

Introduction

The Ex-CAL 8.* (Documenting Process Calibrator) Series are rugged hand tools for calibration maintenance and trouble shooting of virtually all the control process instrumentation.

The Ex-CAL 8.* series features:

- Calibrate temperature, pressure, current dc, voltage dc, frequency and resistance
- Dual channel display for simultaneous measure/source
- Measure and source 14 type of thermocouple and 10 RTD's
- I2V loop power supply
- •Connection for internal and external pressure module up to 700 bar
- Pressure switch test and leak test
- •Hold, zero, scale, Minimun, Maximum and Average
- Automatic Ramp/Step with programmable Time, Step and Soak
- HART® ability for Smart Transmitters
- Dual channel input and extended accuracy on Ex-CAL 8.30 models
- Supports customized RTD's curve for enhanced temperature measurement
- Documenting capabilities using CalPMan software Package
- •Scalable 4-20 mA measure/source into effective engineering unit

Programmable generator

- Autoramp and Autostep capability with Start, End, and Step programmable parameters
- •Single and continuous cycle with Start, End, Rises, Soaks, and Falls programmable parameters
- •the signal value setting uses a unique inline single-digit setting mode or a direct numeric entry
- direct keypad access to 10 programmable memory stored values

Transmitter simulation program

The instrument can be used as a temporary signal converter replacement. Any input signal (electric or pressure) can be converted into a 4-20 mA output. The galvanic insulation between the input and output channels also allow the use of this feature on the process.

Built-in calculator

A special calculator function is integrated in Ex-CAL 8.*. You can read the value from the input channel, operate on it, and then write the result on the output channel. All standard maths functions are included.

Multichannel Data logging

The calibrator can be used as a multichannel datalogger for electrical and pressure signals. The graphic mode allows you to display the trend; the Replay function allows you to generate the electrical signal using the data stored. The LogMan PC software allows the data storage on the hard-disk.

TASK

The Ex-CAL 8.* can store and recall up to 10 complete instrument configurations. By pressing 2 keys only you can store or recall the configuration of either the channels and the display (including input and output values too). In this way the work in the field is simpler and quicker:

Pressure modules (INT & EXT)

Single or dual range internal pressure modules can be configured to provide a lot of combinations for gauge, absolute and differential pressure measurements. External interchangeable pressure modules can be connected to extend the pressure range up to 700 bar. The calibrator includes 23 selectable pressure units.

Transmitter Calibration

The Ex-CAL 8.* can be configured to easily manage the check and the calibration of any pressure and temperature transmitter. The wide display lets you simultaneously display the input and output values and to select the right units for the transmitter under test.

The current or voltage reading can be scaled/converted in % of span or in the measuring unit to simplify the verification operations. The measuring circuit is also able to power the loop for a direct connection with the transmitter under test.

With the optional communication HART® module it is also possible to verify and calibrate smart transmitters. All the Ex-CAL 8.* capabilities let the calibrator be useful for all the checks and calibration activities.

Switch test

Temperature, signal and pressure switches can be tested using this advanced procedure. The calibrator will hold the display reading when the contact changes status.

Leak Test

This procedure allows you to measure the pressure fall in a programmable time interval.

CalpMan

CalpMan has been designed to be used in industries, where there are both laboratories and maintenance in field needs. The CalpMan is a Windows™ 2000/XP software designed to plan, manage and document all the calibrations and the certifications of the process instrumentation. The software can manage the automatic procedures of the Ex-CAL 8.* calibrators.

CalpMan

The main features are:

- Easy to use;
- Compliant with ISO9001 requirements;
- Standards and instruments expired date management;
- Automatic procedure run
- Built-in communication with documenting calibrators
- Traceable and editable calibration documents
- Database backup/Restore ability

LogMan

Windows[™] software to download logged data from internal memory to PC. Data can be saved on disks, loaded from disks, exported in Excel format files.

LinMan

Windows[™] software to setup the instrument with TC, RTD special linearization. The program allows highly accurate temperature measurement with a calibrated Pt100/TC loading the coefficients of the Calibration Report.

External Interchangeable Pressure Modules

Connection for remote "SMART" pressure modules. Calibration matrix and range are stored on the sensor. Gauge and Absolute models available. Accuracy $\pm 0.025\%$ F.S.

Keypad

19 key sealed rubber keypad for direct access to the main functions of the instrument.

LCD Graphic Display

Large display with text and graphic capabilities. The rugged LCD is protected by a polycarbonate window from scratches and impacts.

Direct Up/Down Keys

5 dedicated keys for directly increase/ decrease the value of the output signal.

Two Internal Pressure Sensors

Single or Dual AISI316 built-in pressure sensors (up to 20bar).
Gauge and Absolute models available. Barometric reference sensor capability.
Accuracy ±0.025% F.S.

Powerful Documenting Capability

Only ONE KEY to enter in Calibration Procedure Mode. Select the TAG and run the calibration procedure. All procedure data are loaded from the PC and the Calibration report can be downloaded to the PC with the CalpMan software.

2 Channels

Dual simultaneous IN/OUT channels, mV,V, mA (active and passive loop),TCs, 3/4w RTDs, Frequency, Pulse.High accuracy, high repeatability and low drift.

Four operative mode: measure, simulate, measure/simulate and measure/measure (Ex-CAL 8.30 only)

RS232 interface

Integrated HART® Ability

The Ex-CAL 8.* has a built-in option for HART® calibration and maintenance. No external adapter is required. It supports a wide instruction set:

Universal Commands available for all process instruments like the model and the manufacturer reading, the primary variable (PV) and the output current reading.

Advanced Commands available on many (but not for all) instruments like the multiple variables and the damping reading, and the run of the Loop Test.

Specific Commands available on few instruments (verify the updated list on the website) like the sensor trim. The transmitter upgrade can be run in a simple and quick way using the PC software and the RS232/USB serial cable.

Isothermic binding post for TC's with Rj compensation

Report of Calibration

Each Ex-CAL 8.* is factory calibrated and certified against ecom Standards, which are periodically certified by an internationally recognised laboratory to ensure traceability, and shipped with a Report of Calibration stating the nominal and actual values and the deviation errors.

EMC Conformity

The instrument fulfils the prevision of the directive 89/336/CEE Electromagnetic Compatibility.

"Push & Lock" binding posts

The multi-connection binding posts are an exclusive feature designed to connect the calibrator in a simpler and faster way. The 3 different connection system available are:

- Standard 4 mm industrial plugs
- Mini isothermic TC's connectors
- Push & Lock system for wires

Specifications

Measure or Source Voltage

Input impedance:

> i 0 M Ω for ranges up to 2000 mV f.s. >500 k Ω for ranges up to 20 V f.s.

Output impedance (emf output):

less than 0.5 Ω with a maximum current of 0.5 mA

Output noise (at 300 Hz):

<2 µVpp for ranges up to 200 mV f.s., <10 µVpp for ranges up to 2000 mV f.s. <80 µVpp for ranges up to 20V f.s.

Measure or Source Current

Input impedance: $<20 \ \Omega \ I \ mA$ Maximum load resistance:

600 Ω 21 mA Loop Supply: 12V \pm 5 %

Measure or Source Resistance and RTDs

Connections: 2, 3 and 4 wires

Source resistance effects:

 $\pm 1~\mu V$ error for 1000 Ω source resistance

Rtd and Ω simulation excitation current: from 0.100 to 2 mA without incremental error

Rtd and $\boldsymbol{\Omega}$ measurement excitation current:

0.2 mA

Rtd cable compensation:

up to $100 \text{ m}\Omega$ (for each wire)

Rtd cable compensation error (Pt100):

 ± 0.005 °C/ Ω of total wire

Maximum load resistance: 600 Ω at 20 mA

Measure or Source Thermocouples

Engineering unit: °C/°F/K selectable **Resolution:** 0.01°C / 0.01°F

Temperature scale: ITS90 and IPTS68 selectables

Reference junction compensation:

internal automatic from -10 °C to +55 °C external adjustable from -50 °C to +100 °C remote with external Pt100 from -10 °C to +100 °C (only on Ex-CAL 8.30)

Rj compensation drift: $\pm~0.002^{\circ}\text{C}/^{\circ}\text{C}$ (from -10 °C to +45 °C) - Class A Pt100 Input impedance (Tc ranges): >10 Ω

Frequency

Input impedance: >500KΩ

Pressure

Pressure media: AISI 316 SS compatible fluids (water, gas, and oil)

Temperature compensation:

Automatic with built-in calibration matrix. **Engineering units:** mbar, bar, Pa, hPa, kPa, MPa, kg/cm², kg/m², psi, mmH $_2$ O, cmH $_2$ O, mH $_2$ O, Torr, atm, lb/ft², inH $_2$ O, ftH $_2$ O, mmHg, cmHg, mHg, inHg, programmable.

Accuracy: the above accuracies are stated for 365 days and includes non linearity, histeresis, and repeatability. The average temperature coefficient, inside the temperature compensated range, is $\pm 0.002\%$ of rdg/°C (w.t.r. ± 23 °C/ ± 73 °F).

Compensation temperature range:

+0 to +45°C (+32°F +113°F)

Internal sensors

Accuracy: ±0.025% F.S.

Ranges: see table on ordering code **Resolution:** see table on ordering code

Overpressure: 125% F.S. Port: (female) 1/8" BSP

External modules

Accuracy: ±0.025% F.S.

Ranges: see table on ordering code **Resolution:** see table on ordering code

Overpressure: 125% F.S. **Port:** (male) 1/4" BSP

Connection wire lenght: 2 meters

Advanced Functions

Calculation functions: hold, max, min, offset,

zero, average

In/Out data memory: 10 data with manual or

automatic recall

Convert function: displays the electrical equiva-

lent of the engineering unit

Scale factor: setting with zero and span programmable within -399999 and +999999 **Square root:** in combination with scale factor

General Specifications

Calibration: self learning technique with automatic procedure

Channel 1-Channel 2 insulation: 250 Vdc

Common mode rejection:

140 dB at ac operation

Normal mode rejection: 60 dB at 50/60 Hz

Measurement sampling time: 250 ms Digital interface: full bidirectional RS232 Power supply: external charger and rechargeable Ni-MH battery

Battery life (typical):

8 h on Tc and mV input/output (backlight Off) 3 h with 20 mA simulation (backlight Off) **Recharging time** (typical): 10 h at 90% and 12 h at 99% with instrument switched off.

Line operation: 100V - 120 V - 230V - 240 Vac with the external battery charger (outside potentially explosive areas)

Line transformer insulation: 2500 Vac **Operating environment temperature range:** from -20°C to +50°C

Storage temperature range: from 0 °C to +60 °C (excluding batteries)

Humidity: max 95%RH non condensing

Case: Injection molded ATEX approved material

Sealing: IP54

Weights: nett 1.4 Kg gross 2.5 Kg

Dimensions: $290 \times 98 \times 57 \text{ mm}$

Intrinsically-Safe Sensor-Temperature Measuring Unit Ex-Pt 720

For accurate and easy measurement of temperature in Ex-hazardous areas up to Zone 0.

The simple operation enables flexible handling during measuring and ease of use.

The large clearly-readable display enable a smooth reading of the measured value, which can be displayed in °C or °F. With the HOLD-function the measured value can be "frozen" and inscribed in a diagram. An automatic switch-off prevents for unnecessary battery discharge.

There are 4 different standard probes available. For customized solutions all standard probes can be also offered as special probes (different length and dia-

- · high accuracy
- · handy size
- measurement from Zone I into Zone 0
- · large digital display

Operation:

- ON/OFF button, HOLD button
- °C/°F changeover
- Auto-Off after 10 min. (excl. HOLD)

Display:

- 3 digit
- large display
- LOW-batt. display
- sensor break detection

Standard delivery:

- Ex-Pt 720
- carrying strap
- battery
- instruction manual

Accessories:

- leather case
- immersion/insertion sensor
- surface sensor
- immersion probe for tank measurements

Special probes on request

Probe dimensions: >50 mm x >4 mm (w x Ø)

Sensor dimensions: >9 mm (ø) Response time (99 %): 40 sec

Immersion probe for tank measurements

Accuracy: Class A Ex-Zones: 2, 1, 0

Probe dimensions: 235 mm \times 25 mm (w \times Ø) Weight: approx. 400 g (without cable)

Response time (99 %): 10 sec Cable: 1 ... 50 m

Intrinsically safe Non-Contact Temperature Meters Ex-MX2/Ex-MX4 BT

For non-contact temperature measurement and monitoring of temperature processes in Ex-hazardous areas.

The Ex-MX2 and Ex-MX4 BT are the first choice for monitoring temperatures on objects which are difficult to access or for moving materials. The precise and robust measuring instruments measure the temperature without contact, even in Zone 0.

Operation could not be easier: sight on the object, press the measurement button and read the measured value. The sighted measuring area can be very clearly recognised using the 3-point measuring area marking, and the device can be adjusted and matched to the most diverse materials using the emissivity setting (in 0.01 increments). An exact measurement result is obtained in this way. The device has a "High" (the Ex-MX4 BT also a "Low") alarm function which signals the exceeding or falling below of a pre-set value threshold.

Only Ex-MX4 BT:

The values determined can be stored internally (space for 100 measuring spots) and called up on the display afterwards by pressing a button.

Using the integrated Bluetooth function, the data can be transmitted to an intrinsically safe PDA directly in the ex-hazardous area and/or to a PC with integrated Bluetooth interface outside the ex-hazardous area.

The user can select settings such as minimum and maximum value display and difference and average value calculation using the menu buttons.

If the emissivity of a material is unknown, it can be determined using the included measuring sensor. However, this function is only allowed outside the ex-hazardous area!

- quick response time: 250 ms
- 3-point measuring area
- measure from Zone I into Zone 0

Only Ex-MX4 BT:

- data can be transmitted to a PC using the integrated Bluetooth interface
- up to 100 measured values can be stored

Standard delivery:

- Ex-MX2/Ex-MX4 BT
- batteries
- leather case
- wrist strap
- · carrying case
- operating instructions
- software (only Ex-MX4 BT)
- temperature probe type K (only Ex-MX4 BT)

Optional accessories:

· calibration certificate

Intrinsically-Safe Data Logger Ex 171-0/Ex 171-3

For the recording, processing and documentation of temperature and humidity levels in Ex-hazardous areas.

The data logger series Ex 171-0/171-3 is used for the measuring and storing of temperature and humidity levels in exhazardous areas. The robustly designed metal casing that houses the equipment ensures constantly high measurable accuracy over a wide temperature range even under extremely harsh industrial conditions. With its precise measuring and documentation capabilities the Ex171 series has wide ranging applications in the petro-chemical and pharmaceutical manufacturing industries. Particularly in pharmaceutical production, the parameters of temperature and humidity are of critical and vital importance as they effect product quality both during and after the production process. With sensitive products, for example, possible damage can occur due to incorrect storage. This type of situation can be easily monitored and interrogated with the use of the EX171 series of data loggers. Complete data analysis and data integration with other programmes is carried out through the use of menu driven Windows software. Once outside of the hazardous area. data can then be easily transferred into a PC by means of the straightforward serial interface.

- Memory capacity: Up to a maximum of 55,000 measurements (20,000 at version 171-3)
- Real-time storage capability
- · RS 232 serial interface
- · Robust housing
- Simple, straightforward & easy to use

Standard delivery:

- Ex 171-0 incl. internal temperature probe
- battery
- startmagnet
- calibration certificate
- instruction manual
- Ex 171-3 incl. internal temperature probe
- humidity probe
- battery
- startmagnet
- calibration-certificate
- · instruction manual

Intrinsically-Safe Pressure Calibrator 718Ex

Pump Up the Pressure!

The 718Ex is a powerful intrinsically-safe, self contained pressure calibrator for usage in ex-hazardous areas. The calibrator offers:

- Built-in pressure/vacuum hand pump, with vernier and bleed valve
- Pressure measurement to 0.05 % of full span, using an internal pressure sensor
- Pressure measurement to 200 bar using any of the 8 intrinsically-safe 700PEx Pressure Modules
- Wide range of selectable measurement units for pressure
- Pressure switch test function
- Min/Max hold functions

Standard delivery:

- 718Ex
- Ex-holster
- Test leads
- Test clips
- Batteries
- CD-ROM
- Factory calibration certificate
- Instruction manual

Accessories:

- DKD calibration
- Intrinsically safe pressure modules of the 700PEx series

Intrinsically-Safe Pressure Module 700PEx

Choice of gauge, differential and absolute modules.

To measure a wide range of pressure in an explosive endangered area the range of pressure modules is extended with 8 ATEX compliant models. These models are compatible with the 718Ex intrinsically-safe pressure calibrator and the intrinsically-safe multifunction process calibrator 725Ex.

- Ranges from 2.5 mbar to 200 bar
- \bullet Very high accuracy up to 0.025 %
- Compatible with 718Ex and 725Ex
- Rugged cases protect the modules in harsh environments

Standard delivery:

- 700PEx
- Factory calibration certificate
- Adapter
- Instruction manual

Laser Distance Meters 411D, 416D

Professional-grade laser distance measuring tools that are fast, easy to use, and fit in your pocket.

	4IID	416D
Reduction of estimation errors, saving both time and money	•	•
Instant measurement with one-button operation	•	•
Easy targeting with bright laser	•	•
Quick calculation of area (square footage) and volume	•	•
Easy addition and subtraction of measurements	•	•
Improved battery life from automatic shut-off feature	•	•
Pythagoras calculation for determining distance indirectly from two other measurements	•	•
Ability to view more with large, 3-line display with backlight		•
Ability to measure up to 60 m (200 feet)		•
Storage of the last 10 measurements for quick recall of distance		•
MIN/MAX function		•
Enhanced Pythagoras calculation for determining distance indirectly from three other measurements		•
Audible feedback of on and off modes		•
Strong environment protection with IP54 (water spray & dust proof) sealing		•

The Fluke laser distance meters bring you the most advanced measuring technology. These meters are fast, accurate, durable, and easy to use - just point and shoot. Their straightforward design and easy, one-button operation mean you spend less time measuring. Unlike ultrasonic distance meters with laser pointers, the Fluke 411D and 416D use a precision narrow laser beam that can avoid the common errors caused by extraneous objects near measurement targets.

These compact and handy Fluke distance meters are designed for indoor, and limited outdoor applications. Addition, subtraction, area, and volume calculations could not be simpler. The extra bright laser is clearly visible so you can see your targeting point even if an object is hard-to-reach or distant. The Fluke 411D and 416D have a large LCD screen and buttons positioned for onehanded measurements.

Standard delivery:

- 411D, 416D
- Two AAA batteries
- Users manual
- Nylon carrying case

789 ProcessMeter

Double your working power!

Combining the two tools frequently used by every instrumentation technician, the 789 Process Meter will be at home in every instrumentation technician's toolbox. The Process Meter combine a DMM and a Loop Calibrator in one rugged, handheld tool.

With its built-in 24 V loop supply it reduces the need for taking a separate power supply when doing off-line transmitter testing.

Safety Conformance

All inputs are protected to EN61010-1 CAT III 1000 V, CSA, UL and TÜV.

Standard delivery:

- 789 ProcessMeter
- Hard point test lead set
- Alligator clips
- 4 AA alkaline batteries
- Instruction manual

- DMM and Loop Calibrator in one tool
- Precision 1000 V, 440 mA
 True RMS Digital Multimeter
- DC current source and Loop Calibrator
- 24V Loop power supply
- Min/Max/Average/Hold/Relative Modes
- Diode Test and Continuity Beeper
- Manual Step (25 %, 100 %, Coarse, Fine) plus Auto Step and Auto Ramp
- Simultaneous mA and % of scale read out
- Externally accessible battery / fuses
- HART mode setting with loop power and a built-in 250 Ω resistor
- 0 % and 100 % buttons to toggle between 4 and 20 mA sourcing for a quick span check

Technical data:		
Ambient temperature:	-20 °C to +50 °C	
Storage temperature:	-40 °C to +60 °C

MA 400 Loop Calibrator

- Very high accuracy ±0.015 % of reading
- Very high resolution 0.001 mA
- % Error function eliminates manual error calculation
- Extended adjustment range digital knob and user-selectable decade output allow both large and incremental (0.001 mA step) output changes
- Built-in 250 Ohm resistor facilitates calibration of devices
- Automatic Step and Ramp functions
- Simulates, powers, and measures two-wire transmitters

Standard delivery:

- MA 400
- Carrying case
- Test leads
- 9 V battery
- NIST Certificate
- Instruction manual

Accessories:

- Rechargeable battery
- AC adapter
- Protective case

The ecom MA 400 Precision Loop Calibrator provides significantly extended performance when compared to any competitive calibrator. With an accuracy of 0.015 % of reading and 0.001 mA resolution, the MA 400 has the highest accuracy in its class. Unique features, such as a "% Error" function, which eliminates manual error calculation and allows the display of the actual versus ideal error at any calibration point, put the MA 400 way beyond similar instruments.

The calibrators can simulate, power, and measure two-wire transmitters. With automatic Step and Ramp functions, the MA 400 enables remote calibration of 4-20 mA devices.

Technical data: (25°C unless otherwise noted)

mA-Process Clamp Meter 771

The Fluke 771 is the latest innovative approach to measuring mA loop signals without breaking the loop.

With the Fluke 77 I you no longer need to lift a wire from a terminal (break the loop) to measure 4-20 mA which has a direct impact on your maintenance time. With the Fluke 77 I there is no need to call a control room to override the control of a process loop when breaking the loop and you save time when testing analog I/O on a PLC if you do not need to check measurements on a console. In addition, the Fluke 77 I can have another impact on your overall cost by eliminating catastrophic plant outage caused by accidentally opening a critical loop.

- Measure mA signals for PLC and control system analog I/O
- Measure 4-20 mA output signals from transmitters without breaking the loop
- Best in class 0.2% accuracy
- Resolution and sensitivity to 0.01 mA
- Hold function captures and displays changing measurements
- Dual backlit display with both mA measurement and percent of 4-20 ma span
- Measurement Spotlight illuminates hard to see wires in dark enclosures
- Detachable clamp with extension cable for measurements in tight locations
- Measure 10-50 mA signals in older control systems using the 99.9 mA range
- Automatic battery savings features
- Power,
 - 15 minutes automatic power down
- Backlight, 2 minutes, automatic off
- Spotlight, 2 minutes, automatic off

Standard delivery:

- 771
- Soft carrying case
- Instruction manual

Technical data:	
Measuring and troubleshooting 4-20-mA-signals

Battery Life:	20 hours typical
Safety	EMI, RFI, EMC - Meets EN6 326-1

MCAL 4200 Multi-Function Calibrator

The ecom MCAL 4200 Multi-Function Calibrator provides a feature set unmatched in high accuracy, hand-held calibrators in its price range. The calibrator provides measurement and source functions for thermocouples, RTDs, current, voltage, frequency and source pulse trains.

A communication port compatible with 700 Series and ecom pressure modules is provided, as is an isolated mA/V read-back circuit. Arrow keys, direct numeric keypad entry, and three software-driven function buttons, plus a large backlit, menu-driven graphics display combine to provide a highly intuitive, simple yet powerful operator interface. Built-in 250 Ohm resistor for HART compatibility, also with smart transmitters and PLCs, full fuseless protection, and a serial communications port for full control with ASCII commands, are just some of the additional features that make the MCAL 4200 the single, most indispensable tool available for virtually any calibration task.

- Measure and source T/Cs

 (13 types), RTDs (13 types),
 Ohms, current, voltage, frequency;
 source pulse trains
- Isolated mA/V read-back circuit for complete transmitter calibration
- Pressure module communication port compatible with 700 Series and ecom pressure modules
- Built-in 24V supply can drive 4 20 mA loops up to 1000 Ohms

Technical data: (23 °C +5 °C unless otherwise noted)

 Direct entry of custom RTD coefficients (R0,A,B,C)

- All source modes can be programmed with dedicated setpoints to speed calibration and linearity tests
- Highest accuracy in class to 0.015 % of reading

Standard delivery:

- MCAL 4200
- Carrying case
- Test leads
- 4-AA alkaline batteries
- NIST Certificate
- Instruction manual

Accessories:

740B Series Documenting Process Calibrators

Calibrators as versatile as you need them to be.

The 740 series Documenting Process Calibrators are rugged, handheld tools for the calibration and troubleshooting of process control instrumentation. These calibrators:

- Calibrate temperature, pressure, voltage, current, resistance, and frequency
- · Simultaneously measure and source
- Automatically capture calibration results
- Document procedures and results to meet ISO 9000, EPA, FDA, OSHA, and other government requirements
- Measure / simulate eleven types of thermocouples and eight RTDs
- Store up to 8,000 readings in data logging mode (743B +744 only)
- PC interface (743B +744 only)
- Operates in English, French, German, Italian, and Spanish
- Four types of built-in automated calibration procedures; linear transmitter, square root devices, one and two-point limit switches
- User entered values allow users to capture readings measured or sourced by other devices
- Custom units permit capturing data in measurement units not directly supported by the calibrator, e.g. ppm or rpm. Optional shunt supports mA/mA applications
- Built in calculator (four functions plus SQRT) permits readings to be recalled from the measurement function, or to store calculation results to a source function
- Handling of fast pulsed RTD trans mitters and PLCs, with pulses as short as 1 ms.

Safety Conformance

All inputs are protected to EN61010-1 CAT II 300 V. CSA listed.

741B:A complete documenting calibrator

The 741B is the economical choice for plants that don't use PCs or that require traditional paper forms. It has storage capacity for a day's calibration and measurement data. When you're back at the shop, recall the data on-screen to fill out calibration forms.

743B: More memory, plus a PC interface and data logging

The 743B has all the capabilities of the 741B plus a PC interface that lets you download procedures, lists, and instructions created with software—or upload data for printing, archiving, and analysis. With its expanded memory, the 743B can hold a full week of calibrations and procedures.

744: Get HART-ability

The 744 offers all of the capabilities of the 743B, plus the ability to calibrate, maintain, and troubleshoot HART instrumentation with just one tool.

This rugged, reliable tool offers:

- Integrated HART communication functions, permitting you to monitor, control, and calibrate HART instrumentation.
- NiMH battery with 3500 mA hour life and battery indicator.

Instrumentation Management Software

The 743B and 744 are compatible with Fluke 700SW DPC/TRACK software and with software from Blue Mountain, Cornerstone, Fisher-Rosemont, Honey-well, Yokogawa, Prime Technologies and On Time Support.

Standard delivery:

- 741B / 743B / 744
- Industrial test leads (2 sets)
- Test clips (2 sets)
- Test probes (I set)
- Battery pack
- Battery charger
- NIST Traceable calibration certificate
- Serial port cable (only 743B / 744)
- DPC/TRACK Sample Version with free PC communication utility soft ware (only 743B / 744).
- Instruction manual

Accessories:

• Pressure modules

PTC 400 Temperature Calibrator

The PTC 400 Temperature Calibrator is an ideal device to handle all of your temperature calibration needs in a truly rugged, low-cost package. It combines virtually all widely used thermocouples and RTDs in one device.

This is especially true when calibrating "smart" or pulsed RTD transmitters, where many other calibrators fail to work or operate at reduced accuracy specs. The PTC 400 handles those applications with ease.

- Calibrate thermocouples and RTDs
- Direct keyboard entry or scroll control of output
- User-defined setpoints
- High accuracy ±0.4°C JT/C and ±0.3°C 4W PT385 RTD; all errors included
- Ten (10) T/C types and eight (8) RTD types including PT 385 (1,000 Ohm) and Cu (10 Ohm)
- Store up to nine (9) setpoints for each output function
- RS232 interface

Standard delivery:

- PTC 400
- Carrying case
- Test leads
- 4 AA alkaline batteries
- NIST-traceable certificate
- Instruction manual

Accessories:

• Protective case

Handheld Infrared Thermometers 63, 66, 68

For troubleshooting and predictive/preventive maintenance

With so many interconnected systems and delicate load balances in industrial plants these days, any number of things can go wrong. By instituting regular predictive and preventive maintenance, you can spot trouble before it happens and greatly reduce the chances of system failure.

The trick is finding a way to efficiently monitor all of those systems. That's where infrared thermometers come in handy.

Changes in heat often indicate failure, and infrared thermometers make it easy to take frequent, quick temperature measurements

- High-resolution optics
- High accuracy: I %
- Backlit display
- 12-point data logging (only 66/68)
- Selectable MAX, MIN, DIF and AVG functions that display values instantly with Hi/Lo Alarm (only 66/68)
- Adjustable emissivity for more accurate temperature measure ments (only 66/68)

Standard delivery:

- 63 / 66 / 68
- Instruction manual
- Battery

Thermal Imagers Til 0/Ti25

The ultimate tools for troubleshooting and maintenance.

The Fluke Ti10/Ti25 are the perfect tools to add to your problem solving arsenal. Built for tough work environments, these highperformance, fully radiometric imagers are ideal for troubleshooting electrical systems, electromechanical equipment, process equipment, HVAC/R equipment and others.

- Enhanced problem detection and analysis capabilities with patent-pending IR-Fusion®Technology
- Optimized for field use in harsh work environments
- Engineered and tested to withstand a 2 meter drop
- Withstands dust and water tested to an IP54 rating
- Innovative protective lens cover protects the lens when not in use color LCD display
- Delivers the clear, crisp images needed to find problems fast
- Identify even small temperature differences that could indicate problems with excellent thermal sensitivity (NETD)
- Even the smallest details become visible with the large, widescreen full
- Intuitive, three-button menu is easy to use ... simply navigate with the push of a thumb
- No need to carry pen and paper

 record findings by speaking into the camera – comments are saved with the image (Ti25 only)

 Store more than 3.000 screen images (.bmp format) or 1.200 IR-Fusion images on included 2 GB SD memory card

Standard delivery:

- SmartView[™] software
- 2 GB SD card
- SD card reader
- Rugged hard carrying case
- Soft carrying case
- Hand strap
- Rechargeable battery
- AC charger/power supply
- Instruction manual

IR-Fusion® Technology: Infrared and visual images fused together in one image

See things both ways - Infrared and visual (visible light) images fused together communicating critical information faster and easier — traditional infrared images are no longer enough. Patent-pending IR-Fusion®Technology, only available from Fluke, simultaneously captures a digital photo and the infrared image and fuses them together taking the mystery out of IR image analysis.

Imaging enhanced with IR-fusion help identify and report suspect or faulty components enabling repairs to be done as well as prove that the problem was corrected.

Multiple viewing modes

Identify problems quickly using different on-screen models — the user selects the mode that works best for each situation. While some viewing modes are not included in every model, all are available for viewing and analysis in the included free SmartViewTM software.

CP 400 / 420 Pressure Calibrator

The CP 400 / 420 Dual Sensor Pressure Calibrator provides unmatched pressure measurement flexibility with 0.025 % FS accuracy on both internal, isolated, stainless steel pressure sensors (one with CP400).

An external pressure module connection supports all ecom pressure modules for even greater measurement capability. A Pt100 RTD input is provided for temperature measurements accurate to 0.1 °C. In addition, the CP 400 / 420 measures 4-20 mA loop current and up to 30 VDC.

An internal 24 V Loop Power Supply can power a transmitter under test. The CP 400/420 supports up to three simultaneous measurements in any combination, including three pressure measurements. With simultaneous display of two pressure and an RTD temperature measurement, the CP 400 / 420 is ideal for gas flow calibration (custody transfer) applications.

The CP 400 / 420 is available in two standard configurations — I bar/100 bar or 2 bar/200 bar ranges — or customized with any two ranges selected from 300 mbar, 1, 2, 7, 20, 70, 200, 350 or 700 bar.

- Two isolated, stainless steel, pressure sensors with 0.025 % F.S. accuracy (one for CP 400)
- Temperature-compensation ensures accuracy in field applications
- External pressure module connection supports all ecom pressure modules (25 ranges) for even more measurement capability
- Pt100 RTD input for temperature measurement, accurate to 0.1°C
- Measure 4-20 mA input
- Internal 24 V Loop Power Supply can power a transmitter under test
- Measure up to 30 V DC
- % Error and damping functions
- Large graphic style LCD with backlight

- Display can be configured to display up to 3 inputs simultaneously (i.e. pressure 1, pressure 2, and RTD or any combination of inputs)
- · Switch test function
- Up to five frequently used setups to be stored; last setup automatically recalled on power-up

Standard delivery:

- CP 400 / 420
- Soft case
- Batteries
- NIST-traceable certificate
- Test leads
- Carrying case
- Instruction manual

Accessories:

- Pressure Module Adapter
- Pressure Modules

CP 440 Digital Pressure Test Gauge

The CP 440 Digital Pressure Test Gauge takes the concept of an analog Test Gauge, and brings it to a new level.

The CP 440 combines the accuracy of digital technology with the simplicity of an analog gauge, and achieves performance, ease- of-use, and a feature set unmatched in the pressure measurement world. Setup of the CP 440 is fast and straight-forward, through a menu-driven display, with minimal text, and intuitive functions, that is simple enough to allow the gauge to be used anywhere in the world, without the need for multilingual displays.

- Very high accuracy of ±0.05 % F. S.; temperature compensated
- Temperature compensated accuracy over 0 to 50 °C
- Eight (8) standard pressure ranges
- Displays in 18 standard or fully custom engineering units
- Displays ambient temperature in °C or °F
- Large, back-lit, 5-1/2 digit display and 20 segment bar graph
- Rugged stainless steel case meets NEMA 4/IP65
- Password-protected "through the key pad" calibration
- MIN/MAX recall
- Adjustable TARE zeros large system offsets

- User-configurable sample rate maximizes measurement perfor mance and battery life
- User-configurable damping smooths readings from pulsating/ plant air sources
- · Auto Shut-off for extended battery life
- · Low battery indicator

Standard delivery:

- CP 440
- Batteries
- Instruction manual

Accessories:

- Rubber Boot
- External 24 VDC Power Input

Operating time:	1,500 hours without backlight;	
	2,000 hours at slow sample rate	
Weight:	approx. 500 g	

Intrinsically-Safe LED pocket torch Lite-Ex LED 8

The Lite-Ex LED 8 is a compact, robust and easily operated LED pocket torch for close range lighting in Ex-hazardous areas of Zones 2 and 1 according to Directive 1999/92/EC (ATEX 137).

Technical data:	
Ambient temperature:	-20 +50 °C
Storage temperature:	-20 +50 °C
Power supply:	3 x LR 44 as per IEC (type approved batteries)
Protection rating:	IP 54
Dimensions:	approx. 66×14 mm (L × Ø)
Weight:	approx. 35 g (with batteries)

- Operating time >100 hours
- · Robust metal housing
- LED life expectancy up to 100,000 operating hours
- Safety clip prevents unintentional switch-on
- Easy to use thanks to its small size

Scope of delivery:

- Lite-Ex LED 8
- Batteries

Accessories:

- Spare white light emitting diode
- Spare battery LR 44

Ex-data:

Ex designation:

© II 2 G EEx ia IIC T4

EC-Certificate of conformity:

TÜV 01 ATEX 1692

Intrinsically-Safe mini pocket torch Ex-Penlight

Provides a spotlight in the Ex-area when carrying out testing work in restricted places.

The Ex-Penlight with its handy ballpoint pen shape is ideal for close range lighting in the Ex-hazardous area. Whether it is a poorly lit distribution box or conduit box in a dark corner, with this Ex-safe mini po-

cket torch you can bring everything into the right light. It can be comfortably carried in a jacket or shirt pocket and its clip ensures secure retention.

Technical data:	
Ambient temperature:	-20 +40 °C
Light source:	Filament Bulb type 222
Power supply:	2 x LR03 (type-approved batteries)
Protection rating:	IP 54
Operating life:	approx. 4 hours
Dimensions:	147 x 11.6 mm
Weight:	approx. 60 g

- robust and reliable
- ballpoint pen format, fits in a jacket pocket
- simple, practical, one hand operation
- · secure retaining clip

Scope of delivery:

- Ex-Penlight
- Batteries

Accessories:

• Spare light bulb Type 222

Intrinsically-Safe Laser-Pointer Ex-Point 02A

The Ex-Point 02A laser beam pointer is a handy sized device ideal for highlighting objects whilst in an Ex-hazardous area.

Inaccessible and moving parts on plant and machinery can be identified safely during inspections without interruption of the process or endangering personnel. Operation is by simply pressing a button to produce a bright illuminated point visible over a long distance.

- · Robust metal housing
- Dust-Ex zones 22 and 21
- Laser class 2
- Lightweight
- · with retaining clip

Standard delivery:

- Ex-Point 02A
- batteries 2 x LR03 (AAA)

Accessories:

• replacement battery LR03

Intrinsically-Safe LED - Headlamp Lite-Ex KL 10

The Lite-Ex KL 10 is an extremely light and very bright LED headlamp for use in ex-areas. Certified for use in areas classified as zone I and 2 in accordance with norm 1999/92/EG (ATEX137).

The Lite-Ex KL 10 is equipped with a 0.5W power LED and a 2-part elasticated strap which guarantees a comfortable and secure fit either onto a helmet or direct onto the head. A snug, excellent fit

is guaranteed by the middle strap.

Notable for its highly compact and light-weight design (only 90 g with batteries and strap) the lamp needs only 2 microcell LR03 batteries - making it an ideal device for anyone who needs to be handsfree without having to carry a lot of equipment. And when not in use - the Lite-Ex KL10 is so compact that it can be quickly and easily put in a pocket.

- Only 90 g with batteries!
- 0.5 W power LED with 2 brightness settings
- Swivel-mounted lamp head
- Certified for use in Ex-areas in zones 1 and 2
- Comfortable 3-point fitting system

Scope of delivery:

- Lite-Ex KL 10
- Leather case
- Batteries
- Headband
- Operating instructions

CE identification:	CE0102

Intrinsically-Safe LED pocket torch Lite-Ex LED 30

The Lite-Ex LED 30 is a compact, robust and easily operated LED-Torch, certified in accordance with ATEX for use in Ex-hazardous areas classified as Zone 2,1 and 0 as well as 22 and 21.

Compact and easy to handle, the Lite-Ex LED 30 is ideal for inspection lighting in Ex-hazardous areas.

- Operating time 80 hours
- · Robust metal housing
- 3-LED's with reflectors
- LED life expectancy up to 100.000 operating hours
- Certified for use in Dust Ex-Zones 22 and 21

Standard delivery:

- Lite-Ex LED 30
- Batteries
- Nylon case
- Wrist strap

Accessories:

- Spare battery LR I
- Leather holster

Intrinsically-Safe LED torch Lite-Ex PL 30

The Lite-Ex PL 30 LED high performance torch is especially designed to withstand daily use in industrial environments and with the new ,ring-switch' mechanism, operation is made quickly and easily.

The ecom Lite-Ex PL 30 LED torch gives unrivalled high performance.

The 3-watt LED unit is powered by $3 \times LR14$ batteries, providing many hours of use. The anti-static polymer housing of the unit is ergonomically designed to be comfortably and securely held.

The high IP protection rating of IP 65 provides protection against the permeation of dust and jet water. This thereby enables use in harsh conditions.

Switching on the torch could not be easier - simply twist the ,ring-switch'. This innovative switch mechanism means that even when wearing gloves the user can easily operate the torch and because it is a ,non-contact' mechanism the need for repair is reduced - saving time and money.

- Ex-zone 0/20
- 1x high performance LED (3-watt)
- 4000 Lux
- Robust housing
- High protection rating of IP 65

Standard delivery:

- Lite-Ex PL 30
- c/w batteries

Accessories:

• Spare batteries

Dimensions:	approx. 55/42 × 220 mm

Intrinsically safe SHL 100-Ex hand lamp

Rugged and functional, the SHL 100-Ex handlamp has been specifically designed for use in industrial environments with potentially explosive areas (Zone I) in accordance with Directive 1999/92/EC (ATEX 137).

The SHL100-Ex is an ideal cost effective solution for a rugged, explosion protected rechargeable Handlamp. With the innovative single-handed beam focus and switching from ,spot' to ,flood' light, a pivoting lamp head, emergency light function and filament fracture monitoring - all of this goes to providing a safe and indispensable unit.

The rugged plastic housing and durable bulb make the SHL 100-Ex particularly low-maintenance. Should the bulbs and the explosion protected rechargeable battery pack need to be replaced, then this can be done by the user - which further reduces any maintenance costs.

The SHL 100-Ex charger is suitable for all conventional voltages from 12 and 24 V DC to 110 and 230 V AC. Its compact dimensions allowing it to be installed in the minimal of space.

- · Certified for use in Zone I
- · Powerful xenon bulb
- 10,000 Lux (1 mtr) with sharply focused beam
- Can be focused to either spot or flood light
- Filament fracture monitoring for the main bulb
- Automatic switch to the energyefficient bulb in the event of the filament breaking*
- Emergency light function (in conjunction with the charger)
- Microprocessor-controlled charging technology with battery capacity display

Scope of delivery

- SHL 100-Ex
- Rechargeable battery
- Diffusing, colourless disc filter
- Battery charger
- Mains cable
- 12/24 V DC connecting cable
- Operating instructions

Optional accessories

- Belt clip
- Disc filter (red, green, orange, blue)
- Engraving plate black or brass
- Spare main bulb
- Spare energy-efficient bulb
- Spare explosion-protected lead-gel rechargeable battery
- Spare explosion-protected fuse

Ex-data:

Charging temperature:	> 0 °C
Operating time:	3.5 h with charged batteries
Dimensions:	110 × 90 × 296 mm
Weight:	approx. 2.0 kg
CE symbol:	CE 0102
Power supply:	Explosion-protected lead-gel rechargeable battery, maintenance free, 3,5 Ah, discharge protection
Charger:	12/24 V DC / 230 V AC Charging time approx. 12 h
Dimensions, charger	113 mm × 112 mm × 150 mm

Intrinsically Safe Handlamp type SHL 300-Ex

The SHL 300-Ex is a robust Handlamp specifically designed for industrial environments and the firefighting services. Certified for use in potentially explosive areas of Zones 0 and 1 or 20 and 21 in accordance with Directive 1999/92/EC (ATEX 137).

In developing this device, the user was given primary consideration - for ease of carrying and single handed operation whilst providing exceptional high illumination power.

The special design of the SHL 300-Ex means that it is both ergonomic and functional. The handle, the weight distribution ratio, combined with the careful arrangement of switches and displays all go to provide an optimised device.

As a rechargeable LED Handlamp certified for use in Zone 0 / 20, the SHL 300-Ex is truly a unique, world class product that can be easily carried and safely ope-

rated in all manner of locations.

Additionally, the SHL 300-Ex is also highly suitable for use by the fire-fighting services as it fulfils the stringent requirements of the fire-fighting equipment standard - DIN 14642 - for explosion-protected Handlamps.

Utilising 3 high-power 3-watt LEDs not only gave rise to the brightest handheld spotlight of its kind, it also achieved an extremely high operational reliability. This is due, in part, to the LEDs having a service life of around 50.000 hours, but also, to the 'intelligent controller' that assures a high illumination power even in the event of single LED failure.

- Zone 0, I and 20, 21 certified
- approx. 9000 Lux illumination power – generated by 3 highpower LEDs
- LED service life of approx. 50.000 h
- Robust, anti-static housing rated to IP 65
- · Pivoting head
- Optimum distribution of weight ergonomic and comfortable to carry
- Battery capacity display 5 section indicator
- Emergency light function with high brightness
- Flash mode

Standard delivery:

- SHL 300-Ex
- Battery (factory fitted into device)
- Operating instructions
- Carrying strap

Accessories:

- Set of coloured diffusing filters white, red, green, yellow and blue.
- Charging station for mains voltage operation
- Charging station for vehicle / car voltage operation
- Carrying strap

Ex-Data:

Ex-designation:

It I 1G Ex ia IIC T4

It I 1D Ex tD A20 IP65 T108 °C

EC-Certificate of conformity:

ZELM 06 ATEX 0313 X

You can depend on the SHL 300-Ex in every situation, because along with the spotlight there is also the integrated emergency and flashing light functions and the optional diffusing and coloured filters — which are fitted easily into the pivoting head.

The charging station is also designed for easy use and single handed operation. There are no locking mechanisms to have to deal with – simply insert the SHL 300-Ex into the charging station and it is securely engaged. The charging station – available for either mains or vehicle operation – can be fixed in place both horizontally and vertically.

Technical Data:	
Ambient temperature:	-20 +50 °C
Storage temperature:	-30 +60 °C
Operating time with charged battery:	approx. 5 h (100 % light output) approx. 10 h (50 % light output)
Dimensions:	approx. 140 mm x 190 mm x 300 mm
Weight:	approx. 2.2 kg
Protection rating:	IP65
Solvent resistance:	Acetone
ESD protection:	Anti-static housing
CE designation:	C € 0102
Power supply:	ecom-Ex battery pack min. 600 charging cycles with over-discharge and short-circuit protection
Lamp:	3 high-power LEDs

Explosion-protected Inspection Lamp ISL 200-Ex/400-Ex

The ISL 200-Ex and the ISL 400-Ex are robust, cable-connected inspection lamps for industrial use in explosion-prone areas for zones I and 21 according to norm 1999/92/EG (ATEX 137). The inspection lamps are especially notable for their bright and extremely long-lasting illumination.

The ISL 200-Ex and 400-Ex are especially suited to time-intensive maintenance and repair work. The units emit a uniform, bright light which greatly improves the working environment whilst helping to reduce fatigue in explosion-prone areas. The optional attachment clamps allow you to mount the lamp within reach at your office or workshop. You can also attach and orientate the ISL by utilising the integrated revolving hook or by using the optional magnetic fasteners.

The long-lasting cold cathode tubes are known primarily for their use in background lighting for flat screens, and have a very long lifetime. They surpass the longevity of traditional luminescent tubes by far. Since the tubes are also economical in terms of space, the ISL lamps provide more luminosity than ever in a compact, light and robust case.

The lamps are delivered with a 5 m cable end - which gives you the flexibility to connect the ex-plug of your choice.

The ISL 200-Ex and ISL 400-Ex set new standards in the field of repair and inspection lamps.

- Certified for use in zones I and 21
- Compact design thanks to a bright, long-lasting cold cathode light
- Robust, impact-resistant case
- · Available with 2 or 4 lamps
- Available with optional protectivebasket
- Rotating attachment hook

Scope of delivery

- ISL 200-Ex (2 cold cathode tubes)
- ISL 400-Ex (4 cold cathode tubes)
- 5 meter cable (attached), no plug
- Instruction manual

Optional accessories

- Wall-mounting clips
- Magnetic clips

Project Engineering

ecom engineering has the solution!

Evaluating innovations and developing new products and technology has led to the processes – fast and focused on the market. That is our benchmark.

The increasing complexity of measurement and calibration technology, Mobile Computing, torches and telecommunication technology has lead to the development of engineering methods that tailor to a greater extent the objectives and demands of users.

The project engineering team of **ecomengineering** focuses on the planning, control and surveillance of challenging technological projects. We provide our clients with an efficient tool to critically optimise time, resources and costs.

Within the scope of project control, problems can be avoided by risk evaluation and action monitoring from the start and possibilities for optimising can be organised beforehand. During all sequences of the development the ecom client will find our specialists to be a highly qualified coordination and contact partner. Thus the ecom team effectively reduces interface problems in complex international projects.

We develop innovative products for our clients and in co-operation with them. Therefore we are the ideal strategic and system-compatible outsourcing partner for high and middle end engineering: fast reactions, highly flexible and with high performance on any level, from the most detailed task to complex solutions for systems.

Our clients then have the advantage of customer-oriented project execution during the whole development process, from project definition to the start of production. The consequent viewing and observance of the whole process as well as the support with differentiated measures accelerates and optimises every single step between idea and realisation.

ecom engineering, established in 2002 with 22 development engineers and technicians, offers:

- · complete technological consultancy
- modification of standard products
- tailored, customised solutions

Services for product realisation

ecom engineering provides services for product realisation:

Do you want to develop hardware?

ecom engineering can assist you on all levels of development:

- Requirement specifications
- System design and technical specifications
- Development
- Test
- Introduction of production

Consulting

Do you have an idea for a product and want to check the technical possibilities for realising it?

Do you have an outline specification and want to develop a detailed specification? Do you need technical clarification?

We can help with this and other aspects. Please contact us

Project management

Do you want us to take the whole responsibility for the project?

Do you want a contact partner who has the system overview over all technologies?

We have many years of experience and have the ability and determination to drive complex projects through in time - yet cost efficiently.

Client specific development

the objective of **ecom engineering** is to offer products and services of outstanding quality and with highest benefits for our customers.

We want satisfied customers with longlasting trust in our products and services. Our range of services is an all-round package, including consulting, engineering, production and service. For us, the opinion of our clients is the crucial quality benchmark.

Essential factors for achieving optimum satisfaction of our customers are the identification and accomplishment of requirements for the product or the service. These requirements are defined by the customer's task and by effective laws and regulations.

Identifying and accomplishing these requirements are therefore an essential obligation for all members of our staff, and are a primary objective.

During customised development ecom engineering covers all phases:

- Providing requirement specifications
- Development of hardware
 - Development of connections
 - Circuit board layout
 - Construction of apparatus
- Development of software
- Conducting EMC-checks in order to obtain CE label
- Documentation

With high-tech and innovative technologies we are developing groundbreaking solutions for mobile computing, communication, torches and measuring and calibrating technology. Our intelligent products have put us in a leading position all over the world. It is our aim to always have a head start of a few steps for the benefit of our partners.

General Conditions of Delivery and Payment

I. Exclusive Validity of these Conditions

Any and all deliveries - including any and all future deliveries - shall exclusively be governed by these General Conditions of Delivery and Payment. Purchasing Conditions of the Customer's are herewith explicitly rejected to the extent they are in conflict with these conditions.

2. Conclusion and Contents of Contract

- 2.1. Offers made by ecom are to be understood as non-binding. A binding contract shall be deemed to be concluded only upon ecom's written confirmation of an order placed by the Customer
- 2.2. Any amendments and/or supplements to a contract shall likewise become effective only if made respectively confirmed in writing.
- 2.3. Rights deriving to the Customer from this contract must not be assigned without ecom's prior written consent.

3. Prices

- 3.1. Prices are quoted net ex works, exclusive of packing and of VAT.
- 3.2. Unless otherwise explicitly agreed upon, title in tools used by ecom shall fully accrue to respectively remain with it, even if the Customer bears part or all of their costs.

4. Delivery

- 4.1. If a delay in delivery is caused by reasons of force majeure, the period of delivery is automatically extended appropriately. If such delay exceeds one month, ecom shall, by giving the Customer pertinent written notice, be entitled to rescind the contract.
- 4.2. If ecom is in delay with its delivery, the Customer shall be entitled to set ecom an additional time period to effect such delivery which must be reasonable under the circumstances. If ecom then fails to perform such delivery within the additional period described, the Customer shall be entitled, by giving ecom pertinent written notice, to rescind the contract.

5. Notice of Defects, Warranty, Liability

- 5.1. Notice of obvious defects, in particular of defects in the packaging and/or due to transportation as well as those concerning the quantity or the identity of the delivered products or of other obvious defects must be given in writing within one week from the date of delivery. With regard to hidden defects this period shall run from the day of their respective recognizability.
- 5.2. Both for defective deliveries and otherwise, ecom shall, to the exclusion of all other liability, be liable only as follows:
- 5.2.1. If a product turns out to be defective and is properly notified as such to ecom, ecom shall, at its option, either repair such defect or replace the affected component/product ("supplementary performance"). Title in any replaced components/products shall automatically pass to ecom. When two attempts at such supplementary performance have failed, the Customer shall be entitled, at its option, to either reduce the agreed-upon price or to rescind the contract.
- 5.2.2. In addition, if all conditions for such liability otherwise required by the law are satisfied, ecom shall be liable for the following damages:
- All damages caused by an either intentional or at least grossly negligent breach of a contractual duty either by ecom itself or by a person engaged by ecom to perform all or part of such duties on ecom's behalf. Further, all damages resulting from bodily injury as well as all costs incurred through the above-mentioned supplementary performance, so in particular all costs of transportation, travelling, labour and material. This liability does not include any extra costs resulting from the transfer of the defective product from its original point of destination to its present location.
- 5.3. For customers acting in a non-private ("business") capacity, the period of all warranty/liability claims set out under 5.2, above, shall be 12 months from delivery, respectively from approval, for all other customers 24 months. For any product and/components delivered or repaired on a warranty basis, the warranty period shall be three months, but shall in no case expire before the original period of warranty.

6. The Need of Continued Creditworthiness of the Customer

The continued absolute creditworthiness of the Customer is an indispensable precondition for delivery. If, after the conclusion of the contract, ecom obtains information which warrant reasonable doubts in this respect, it shall be entitled to demand, at its discretion, either advance payment or an appropriate collateral or, if a consideration other than payment in cash had been agreed upon, payment in cash. Alternatively, it may terminate the contract, at its discretion, in whole or in part and/or demand performance plus damages.

7. Retention of Title

- 7.1. Ecom shall retain full title in every product delivered until that product has been fully paid.
- 7.2. In return, the Customer is authorized to use such products as an input/component for the manufacture of a new product even before full payment is made. However, such manufacturing/assembly shall be deemed to be carried out by the Customer on behalf and in the name of ecom. With regard to such input/component, the Customer herewith assigns to ecom all rights he thereby obtains in such new product to the extent these rights are to be considered as consideration for the loss/destruction of the pertinent input/component. The Customer shall take proper care of and maintain such new product for ecom.

8. Conditions of Payment

- 8.1. Invoices shall be payable within 30 days of receipt of the products, net, without discount.
- 8.2.The Customer may declare set-offs only with claims that are either uncontested or have become res judicata.
- 8.3. In case of a substantial deterioration in the financial situation of the Customer, the Supplier shall have the right to demand immediate payment of all claims he has against the Customer:

9. Final Provisions

- 9.1. If any provision contained in these conditions is or becomes invalid or ineffective, the remainder of these conditions shall not be affected thereby.
- 9.2. The place of performance for all obligations deriving from this contract shall be the address of the works from which the pertinent delivery shall be respectively has been made.
- 9.3. This contract as well as the entire business relationship between the Parties shall exclusively be governed by German Law.
- 9.4. All disputes arising out of or in connection with this contract shall exclusively be decided by the competent court in Stuttgart/Germany. Notwithstanding this provision, ecom shall alternatively have the right to sue the Customer at the court locally competent for the Customer's principal place of business or for the place for which the delivery in question is destined.
