

AT&T Invests More Than \$825 Million Over Three-Year Period to Keep Oklahoma Connected

OKLAHOMA CITY, OKLAHOMA, JULY 28, 2020 – AT&T* is proud to have the nation’s best and also fastest wireless network,¹ as well as the largest network in North America.² From 2017-2019, we invested more than \$825 million in our wireless and wireline networks in Oklahoma to expand coverage and improve connectivity in more communities.

That investment has increased reliability, coverage and overall performance for residents and businesses, which is essential for connecting our customers with family, friends and colleagues – no matter the distance. It’s also improved critical communications services for Oklahoma’s first responders using the [FirstNet](#) network.

Today, our 4G LTE network covers more than 330 million people.³ That’s more than 2.61 million square miles and over 99% of all Americans.⁴

We also expanded access to high-speed internet in Oklahoma by building more than 240,000 additional fiber connections.

“There is not a single aspect of our economy that does not directly benefit from advanced communications networks,” said Chad Warmington, CEO of the State Chamber of Oklahoma. “From family-owned businesses to major corporations, the job creators of Oklahoma depend on the type of advanced networks AT&T is building.”

“We know that our continued investment in Oklahoma is vital to keeping people connected – from public safety personnel during a crisis to friends, family and loved ones on a daily basis,” said AT&T Oklahoma President Steve Hahn. “We’re committed to keeping you connected when and where you need it most. We show up for our customers and communities. That’s what we do. It’s who we are.”

More details about our wireless coverage in Oklahoma, and anywhere in the U.S., can be found on the [AT&T Coverage Viewer](#). For updates on the AT&T wireless network, please visit the [AT&T network news page](#).

Building the Future of Wireless Connectivity, Today

5G is the future of wireless technology and is poised to jumpstart the next wave of unforeseen mobile innovation. Oklahoma customers are already experiencing the power of 5G in communities like Grant County, and we’re committed to bringing next-generation 5G coverage to more communities across the state as we build toward nationwide coverage this year.

We deliver the 5G experience to both consumers and businesses by deploying two types of 5G technology:

- **5G** over sub-6 spectrum is expected to enable faster responses over broader distances on new devices and is now available in 355 markets.
- **5G+** delivers ultra-fast speeds and response times, capable of 1+ Gbps, using 5G technology and new millimeter wave spectrum, unlocking unprecedented experiences in iconic destinations and key venues. It's ideal for businesses, universities, hospitals and sports venues and is currently deployed in parts of 35 cities.

FirstNet: Transforming Public Safety Communications

We're honored to work with the First Responder Network Authority (FirstNet Authority) to build and manage FirstNet – the *only* nationwide, high-speed broadband communications platform dedicated to and purpose-built for America's first responders and the extended public safety community. And we take our responsibility to deliver FirstNet seriously.

Building upon our current and planned investments in Oklahoma, we continue to extend the reach, and [increase the coverage](#), capacity and capabilities of the FirstNet network:

- **Purpose-built network enhancements** – Across Oklahoma, we've boosted the network with high-quality Band 14 spectrum in communities such as Oklahoma City, Tulsa, Grant and Garvin. Band 14 is nationwide, high-quality spectrum set aside by the government specifically for FirstNet. We look at Band 14 as public safety's VIP lane: in an emergency, this band – or lane – can be cleared and locked just for FirstNet subscribers. In addition, since beginning of the FirstNet network expansion, we've launched new FirstNet cell sites in McIntosh, Tillman and Okmulgee Counties, among others.
- **Reaching rural Oklahoma** – FirstNet is built for every first responder in the country – career or volunteer; federal, tribal, state or local; urban, suburban or rural. That's why we're collaborating with rural network providers to help connect [remote parts of America](#) and build out additional FirstNet LTE coverage in Oklahoma.
- **Public safety-specific advanced capabilities** – FirstNet is providing Oklahoma public safety with dedicated access when they need it, as well as an entire communication ecosystem with unique benefits like mission-centric devices, certified applications, *always-on* priority and preemption and high-quality Band 14 spectrum. These advanced capabilities enable FirstNet to perform faster than any commercial network⁵ and bring its subscribers the unthrottled connectivity they need.
- **Unparalleled emergency support** – Oklahoma agencies on FirstNet also have 24/7 access to a nationwide fleet of 76 deployable network assets. These assets can either be deployed for planned events or called upon in [emergencies](#) at no additional charge to help first responders stay connected and operate faster, safer and more effectively when lives are on the line. FirstNet Response Operations – led by a group of former first responders – guides the deployment of the FirstNet deployable assets based on the needs of public safety.

- **Free Smartphones for Life for Public Safety Agencies** – We have a responsibility to public safety unlike any other wireless carrier. That’s why Oklahoma agencies spanning law enforcement, fire, EMS, healthcare, hospital emergency departments, emergency management and 911 operations on FirstNet can stay up-to-date with [smartphones for life](#) at no additional cost.⁶ This means first responders across agencies of all sizes will have affordable access to *their* network.

The FirstNet network expansion across Oklahoma is being done with direct feedback from state and public safety officials. This helps ensure FirstNet meets the short- and long-term needs of the public safety community.

Our commitment to Oklahoma

In addition to the programs mentioned above, AT&T’s commitment to Oklahoma includes programs like:

- **IEEW** - The Institute for Economic Empowerment of Women (IEEW) is an Oklahoma-based nonprofit that empowers women entrepreneurs from around the globe economically, socially, and politically. IEEW’s Peace Through Business program, created in 2006, is a business training and mentorship program for women entrepreneurs in Afghanistan and Rwanda that focuses on the education and promotion of business and leadership skills among women to help build stable democracies.

AT&T’s sponsorship enables the IEEW to take 30 of the top students from each annual in-country business training course to the AT&T University Las Colinas Campus for Leadership Development, an intensive two weeks of additional training that includes one-on-one coaching from volunteers that include AT&T employees and executives, an attendance at tech day at AT&T headquarters and graduation gala.

- **Believe** - AT&T Oklahoma has a legacy of responding to local needs, including its “Believe Oklahoma” campaign, in coordination with the Oklahoma Business Roundtable, to provide free meals to hundreds of first responders at restaurants in Oklahoma City, Tulsa and Norman.

In the last year, AT&T partnered with ReadOKC, an initiative of the Oklahoma City Public Schools Compact, to develop a culture of reading and promote the love of reading for students and community. Volunteers from AT&T provided thousands of hours as “Reading Buddies” to third graders in Oklahoma City in eight different schools.

Additionally, AT&T donated \$40,000 to the Coat-A-Kid initiative, helping Oklahoma City Public Schools and The Foundation for Oklahoma City Public Schools provide all students from Martin Luther King Jr. Elementary School with a winter coat.

This is all made possible by our talented, dedicated AT&T team members who are committed to being there and are the driving force behind our efforts to expand wireless connectivity both in Oklahoma and across the country. That's why we believe in investing in our employees and workforce. In 2019, *Fortune* and Great Place to Work named us one of the [Best Big Companies to Work For](#).

¹ Best Network based on 2019 GWS OneScore. Fastest based on analysis by Ookla® of Speedtest Intelligence® data median download speeds for Q1 2020. Ookla trademarks used under license and reprinted with permission.

² Based on comparison of carrier owned & operated networks. No AT&T on-net coverage in select countries, including Canada.

³ Coverage includes non-AT&T network areas covered by roaming agreements with third parties.

⁴ Based on overall coverage in U.S. licensed areas. Coverage not available everywhere. AT&T's 4G LTE coverage is not equivalent to its overall network coverage.
