

CELEBRATING 75 YEARS

LIGHTING PRODUCTS QUICK REFERENCE GUIDE

3 GENERATIONS OF FAMILY OWNERSHIP

Left: Ira Greenberg, CEO | **Center:** Marvin Spielman, Founder | **Right:** Fred Greenberg, President

In 1945, my grandfather Marvin Spielman, and great uncle Harold Fox, started Keystone with little more than a dream, a prepaid purchase order, and an attic. From the beginning, they instilled an entrepreneurial, customer-first spirit into our DNA, which continues to be reflected in our philosophy of Light Made Easy and reputation for startup-like flexibility.

We've learned from the generations of Keystone team members who've helped build our solid foundation, while simultaneously looking toward the future and daring to ask, "Can we provide you with an even better experience?"

While Keystone has grown out of Harold's attic, expanded beyond ballasts, and invested across the globe, we remain ever-committed to the customer-first foundation Marvin and Harold laid 75 years ago.

To our loyal customers, suppliers, team members and partners, on behalf of the entire Keystone family, thank you for a bright 75 years. Looking ahead, you can continue to count on us to exceed your expectations, raise industry standards, and be the easiest lighting manufacturer to do business with.

Sincerely,

Ira Greenberg, CEO

BACK AND FRONT VIEWS

RETROFIT INSTALLATION INSTRUCTIONS FOR 2'x2' AND 2'x4' DOORFRAME TROFFER FIXTURES

STEP 1: Shut off power to the fixture. Open the fixture lens and remove the existing fluorescent lamps, ballast cover, and lens. Disconnect the ballast from the building's line voltage.

STEP 2: Install the support brackets (x2) and secure with tek screws. **(Optional):** Install side plates (x2). This step is dependent on whether or not there are gaps between the fixture and the existing ceiling grid.

STEP 3: Insert the doorframe of the retrofit into the keyholes of the support brackets and slide the unit into place. Connect power from building to quick disconnect on retrofit kit.

STEP 4: Swing the doorframe assembly up into the fixture frame.

STEP 5: Secure the doorframe kit by locking in the latches.

STEP 6: Restore power to the fixture.
