Part 2b. Description of Payment Card Business

Describe how and in what capacity your business stores, processes, and/or transmits cardholder data.	<p>The Ultra Call Management System (UCMS) is hosted in multiple Data Centre's and provides, off premise, telephone call management services across the UK. A Contact Centre agent using the UCMS Call Bar desktop application can process card-not-present payments over the telephone by asking their customer to enter payment card information, with their standard telephone keypad buttons, while they are still talking which results in a more personal and reassuring interaction. A fully automated service is also provided for self service payments for when agents are unavailable.</p> <p>The keypad button tones are screened and turned into data within the Ultra Communications off premise solution, and passed to the clients preferred payment service provider (PSP) for authorisation. As a result, payment card details are never processed by the Contact Centre</p>
Describe how and in what capacity your business is otherwise involved in or has the ability to impact the security of cardholder data.	N/A
