CONTENT OF LESSONS		
NO.	LCD	Content of Lesson
1.	LESSON 1	Learn right hand pitch of period/phrase.
2.	LESSON 2	Learn right hand pitch and timing of period/phrase.
3.	LESSON 3	Learn left hand pitch of period/phrase.
4.	LESSON 4	Learn left hand pitch and timing of period/phrase.
5.	LESSON 5	Learn both hands pitch of period/phrase.
6.	LESSON 6	Learn both hands pitch and timing of period/phrase.
7.	LESSON 7	Learn both hands pitch and timing of complete song.
8.	LESSON 8	High score challenge.

The various parts of a song will be learned in lessons 1-6, before learning the whole song in lesson 7. Also, during the lessons, the instrument will pick out those phrases that you are not so familiar with during the learning process, and tailor the practice to fit your progress. The following prompt messages will appear on the display during your learning:

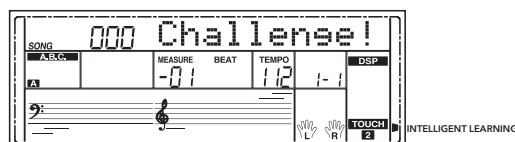

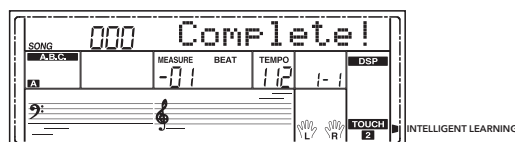

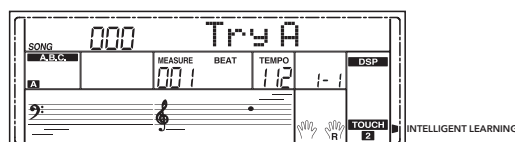

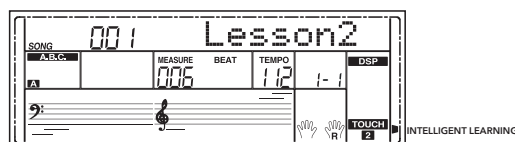

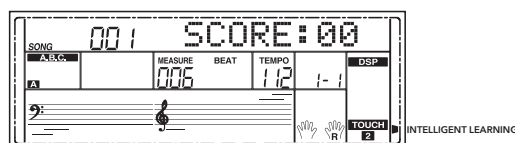

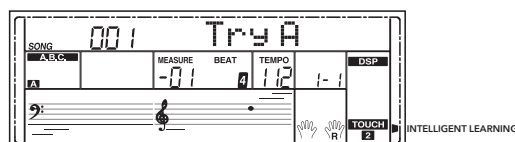

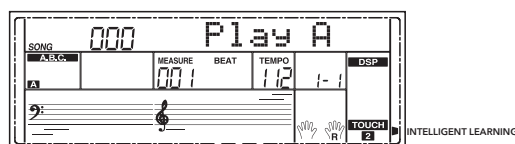

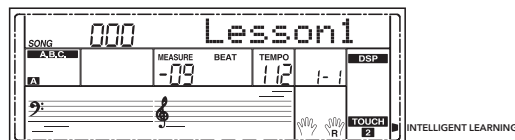

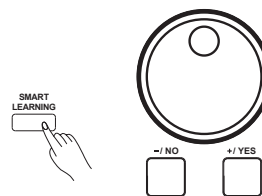

PROMPT MESSAGE	
LCD	Description
Lesson 1	Prepare for the next lesson.
Play A	Preview of the phrase to learn
Try A	Play the phrase being learnt.
Go Ahead	Progress to the next period/phrase
Try Again	Please re-attempt the current period/phrase.
Play A-H	Preview of the period to learn.
Try A-H	Play the period being learnt.
Complete	Learn the complete song in lesson 7.
Test	High score challenge in lesson 8.
Score85	Displays your current high score.
Retry?	Select whether to play again when the challenge is complete.

During the intelligent learning mode, the display shows the highest score of previous learning challenges. Achieve a score of 80 or more points to progress to the next lesson. If you score less than 80 points 3 times in a row, the system will replay the current phrase to help you familiarise yourself to it.

During lessons 1, 3 and 5, the focus will be on melody pitch. After using the data dial or [-/NO] and [+ /YES] buttons to select a song to be learnt, the keyboard will display "Play A" and play the first phrase to be learnt. Each note will be displayed on the relevant staff when played. Next, the display will show "Try A" indicating it is your turn to recite the phrase. If the incorrect note is played, the intelligent learning system will stop the song and resume when the correct note is played. After the phrase is completed, the display will show your score, with scores of 80 or higher allowing progress to the next level.

During lessons 2, 4 and 6, the focus will be on timing as well as pitch. If you repeatedly score less than 80 points, the system will reduce the tempo of the period/phrase being learnt to enable slower practice. Scoring over 80 points will revert to the original tempo.

Lesson 7 will focus on learning full songs, and lesson 8 is a high score challenge to try and perfect your performances.

CHORD DICTIONARY

The chord dictionary function can be used to improve and test your chord knowledge.

DICT 1 (CHORD LEARNING MODE)

Hold down the [SHIFT] button, and then press the [DICT.] button to enter the DICT 1 mode. The displays will show "Dict.1" and the auto bass chord mode (A.B.C) is automatically turned on. In DICT 1 mode, the keys C4-B5 are used to assign the chord type, and keys C6-B6 are used to assign the chord root.

When the chord type and chord root are confirmed, the display will show the chord and its keyboard position. For example, if you want to play a CM7 chord, press key C6 to specify C as the chord root. The root note will be shown on the display but the note doesn't sound.

Press the E4 key to specify M7 as the chord type. The display will show the chord and its keyboard position. A prompt sound will be heard when you play it correctly in the chord area.

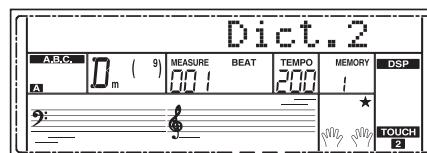

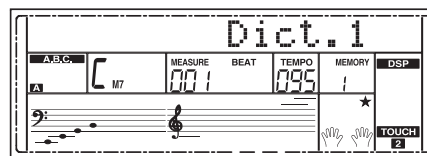

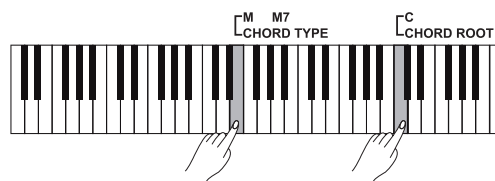

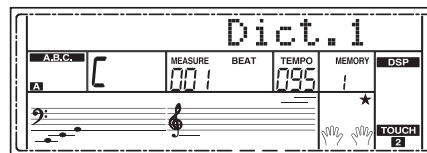

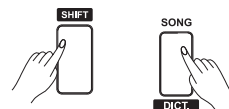

DICT 2 (CHORD TESTING MODE)

Hold down the [SHIFT] button, and then press the [DICT.] button twice to enter the DICT 2 mode. The display will first show "Dict 2" and then will display a chord name in random order for you to play. If the chord fails to be played in 3 seconds, the correct notes will appear on the display. Once the chord is played correctly, a new chord name will appear after a few seconds.

Chords will be displayed in the dictionary mode as follows:
