SECTION V – MODIFICATIONS 65

Section I – Requirements for Participation

To participate in the New York State Medicaid Program, a provider must meet all applicable State, County and Municipal requirements for legal operation. In addition to the policies set forth in this Manual and other directives related to Medicaid policy, the Medicaid Program generally expects of its providers:

- Timely service;
- Rides in duration of less than one (1) hour (barring exceptions based on location or acute circumstances such as inclement weather and unexpected traffic situations);
- Provider employee sensitivity to the population;
- Courteous provider employees;
- Adequate vehicle staffing;
- Clean, non-smoking vehicles;
- Diligent care provided to all passengers (e.g., passenger delivered to a responsible caretaker, not dropped off alone at the curb); and
- Appropriately, adequately heated and air conditioned vehicles (i.e., heat in winter, air conditioning in summer).

Although it is often difficult to accommodate the needs of a medically-fragile population, we expect appropriate transportation for all Medicaid enrollees, and that every effort will be made to meet the needs of those enrollees utilizing Medicaid-funded transportation services.

Department regulation at Title 18 of the New York Code of Rules and Regulations (NYCRR) Section 505.10, which applies to Medicaid transportation services, can be found at:

http://www.health.ny.gov/regulations/nycrr/title_18/.

Qualifications of Ambulance Providers – Category of Service 0601

Only lawfully authorized ambulance services may receive reimbursement for the provision of ambulance transportation rendered to Medicaid enrollees. An ambulance service must meet all requirements of the New York State Department of Health (NYSDOH).

Information regarding NYSDOH ambulance certification is located online at:

<http://nyhealth.gov/nysdoh/ems/main.htm>.

An ambulance service may provide ambulette in addition to ambulance services; however, each ambulance vehicle must meet staffing and equipment regulations of a certified ambulance **at all times**, including occasions when an ambulance vehicle is used as an ambulette.

Qualifications of Ambulette Providers – Category of Service 0602

Only lawfully authorized ambulette services may receive reimbursement for the provision of ambulette transportation. Ambulettes must be in compliance with all New York State Department of Transportation (NYSDOT) licensure, inspection and operational requirements, including those identified at [Title 17 NYCRR §720.3\(A\)](#).

Ambulette drivers must be qualified under Article 19A of the New York State Department of Motor Vehicles' [Vehicle and Traffic Law](#).

Where applicable, proof of licensure by the local Taxi and Limousine Commission is required as a condition of [enrollment](#). In such instances, compliance with local Taxi and Limousine Commission regulations is required.

Potential new vendors should contact the prior authorization official in the area/s in which they intend to operate to inquire about local certification requirements.

Qualifications of Taxi (Category of Service 0603) and NYC Livery (Category of Service 0605) Providers

To participate in the Medicaid Program, a taxi/livery provider must meet all applicable State, County and Municipal requirements for legal operation (including local Taxi and Limousine Commission licensure, where applicable).

Additionally, taxi/livery companies must receive support from the appropriate entity or entities in the area where the taxi/livery intends to operate in order to enroll into the Medicaid Program unless they fall under the purview of a local Taxi and Limousine Commission.

Section II – Transportation Services

Medicaid reimbursement is available to lawfully authorized transportation providers for transportation furnished to eligible Medicaid enrollees when necessary to obtain medical care covered by the Medicaid Program. Transportation services are limited to the provision of passenger-occupied transportation to or from Medicaid-covered services.

The Medicaid Program must assure that necessary transportation is available to Medicaid enrollees. The requirement is based upon the recognition that unless needy individuals can actually get to and from providers of Medicaid-covered services, the entire goal of the Medicaid Program is inhibited at the start. This assurance requirement means that Medicaid will consider assisting with the costs of transportation when the costs of transportation become a barrier to accessing necessary medical care and services covered under the Medicaid Program. The decision to assist with the costs of transportation is called the “prior authorization process.” The Medicaid Program will cover the costs of all emergency ambulance and non-emergency transportation, when necessary, as well as the necessary transportation expenses incurred by a Medicaid enrollee who must travel an extraordinary distance to receive medical care.

The costs of emergency ambulance transportation do not require prior authorization. All other modes of transportation, while available to a Medicaid enrollee, must be prior authorized by the appropriate prior authorization official prior to payment by the Medicaid Program.

Approved requests for prior authorization are communicated to the transportation provider via a weekly [roster](#), which lists the information necessary to submit a valid claim to the Medicaid Program. The information on the claim must match the information on the prior authorization as one condition for the claim to be paid.

Non-emergency transportation services are distinguished by three separate modes of transportation:

- Ambulance (ground and air);
- Ambulette (wheelchair van or van with stretcher-carrying capacity); and
- Taxi/livery.

The mode of transportation used by a Medicaid enrollee may involve a medical practitioner who is best able to determine the most appropriate mode. Each of these categories of transportation providers may provide single, episodic transports. Ambulette and taxi/livery providers may also provide group ride transports to and from a daily program.

The Medicaid Program intends to authorize transports using the least costly, most medically-appropriate mode of transport. If a Medicaid enrollee uses the public transit system for the activities of daily life, then, in most circumstances, transportation for the enrollee should be requested at a mode of transportation no higher than that of the public transit system.

Record Keeping Requirements

In accordance with Title 18 NYCRR §504.3(a) and 517.3(b), transportation providers will be reimbursed only when contemporaneous, complete, acceptable, verifiable records are available upon request to the State in connection with an audit, investigation or inquiry. The

documentation below is required for **every leg** of a trip, and must be maintained for a period of six years following the date of payment. If any of the required information is incomplete, or deemed unacceptable or false, any relevant paid reimbursement will be recouped and the provider may be subject to other statutory or regulatory liability, financial damages and sanctions.

Ambulette, Taxi/Livery Providers

Effective March 1, 2016, in addition to historically required acceptable trip verification, the Department will now require the full printed name and signature of the driver providing the transport attesting that the referenced trip was completed. The full list of required trip verification information now includes, at a minimum:

- The Medicaid enrollee's name and Medicaid identification number;
- The date of the transport;
- Both the origination of the trip and time of pickup;
- Both the destination of the trip and time of drop off;
- The vehicle license plate number;
- The driver's license number;
- The full printed name and signature of the driver providing the transport; and
- An attestation from the driver that the trip was completed.

Electronic Records

The use of electronic record-keeping methodology is becoming more prevalent. Transportation vendors using electronic methods to prepare and maintain contemporaneous documentation to support Medicaid claims must produce documentation with an accurate system-generated, unmodifiable date and time stamp for each leg of a billable trip including the pickup and drop-off, as well as driver attestation as required.

Supplemental Documentation

The following items presented as the only evidence of a trip are not considered acceptable documentation. However, these documents may be considered supplemental to additional required documentation and can be presented to supplement required documentation:

- A driver/vehicle manifest or dispatch sheet;
- Issuance of a prior authorization by an approved official with subsequent checkmarks;
- A prior authorization roster; or
- An attendance log from a day program.

Reminder - Requirements under 505.10 Transportation for Medical Care and Services

Providers must comply with 18 NYCRR § 505.10 in its entirety.

Source: [December 2015 Medicaid Update](#)

Loss of Records Due to Unforeseen Incident

Federal law and State regulations require Medicaid providers to maintain financial and health records necessary to fully disclose the extent of services, care, and supplies provided to

Medicaid enrollees. This is stated in Title 18 of the New York Code of Rules and Regulations at §504.3:

By enrolling the provider agrees:

- (a) *To prepare and maintain contemporaneous records demonstrating its right to receive payment under the Medicaid program and to keep for a period of six years from the date the care, services or supplies were furnished, all records necessary to disclose the nature and extent of services furnished and all information regarding claims for payment submitted by, or on behalf of, the provider and to furnish such records and information, upon request.*

Record keeping requirements for transportation providers can be found in the previous section of this Manual.

Transportation providers whose paper and/or electronic records are damaged by fire, flood or other disaster are required to notify the New York State Office of the Medicaid Inspector General (OMIG) of the loss of their records. This self-reporting notification must include specific details of the event causing the loss of records, type of required records lost, date/s of service impacted by the loss, and documents/photographs substantiating the loss. Information on self-reporting can be found online at <http://omig.ny.gov/self-disclosure>.

Additionally, providers must notify any other State or local regulatory agency of its loss as required by those regulatory agencies, including a Taxi and Limousine Commission (taxi, livery and ambulette providers), or the New York State Department of Health (ambulance providers), and/or the New York State Department of Motor Vehicles (ambulette providers).

Service Complaints

Medicaid enrollees or their representatives, and/or medical practitioners or their representatives file complaints against transportation providers when it is believed that quality transportation services were not provided to a Medicaid enrollee. Additionally, when necessary, transportation providers may register a complaint about a prior authorization official, policy, or other issue relative to their services.

Information regarding the nature of complaints received regarding the services provided by entities transporting Medicaid enrollees is forwarded to the transportation provider or entity regarding whom the complaint was lodged, and/or the county department of social services (DSS), and/or the State's contracted transportation manager, and, where applicable, the Office of the Medicaid Inspector General and/or other enforcement agencies. **Confidentiality of complainant-identifying information is strictly maintained.**

Complaints are received by the Department via the following methods:

Telephone: (518) 473-2160

Fax: (518) 486-2495

Email: MedTrans@health.ny.gov

Reimbursement Fees

The Medicaid transportation fee schedule is located online at:

<https://www.emedny.org/ProviderManuals/Transportation/index.aspx>.

To request a change in the fee schedule, a transportation provider may send an email to MedTrans@health.ny.gov providing justification for the requested change, the fee to which the provider believes services should be reimbursed, and affected services (i.e., ambulance, ambulette, taxi/livery) and procedure code/s. Such requests will generally be considered as part of the next State Fiscal Year's budget process unless extraordinary circumstances exist as substantiated by the State's transportation manager/s.

Medicaid Enrollment Does Not Supplant Local Regulations

Title 18 NYCRR §505.10(e)(6) indicates that providers must, regardless of Medicaid enrollment status, comply with applicable regulatory requirements. For ambulette, taxi and livery companies, this may include local licensure by a municipality or a Taxi and Limousine Commission.

Failure to comply with local regulations may result in termination from Medicaid enrollment, as well as action by the local regulatory entity.

Source: [November 2009 Medicaid Update](#)

Medicaid Managed Care Involvement

Some Managed Care Plans (also referred to as Prepaid Capitation Plans or Medicaid Health Maintenance Organizations) currently include transportation (emergency, non-emergency or both emergency and non-emergency) within their scope of benefits. Covered services are identified in the eligibility verification process. For more information, please consult the Medicaid Eligibility Verification System (MEVS) Manual, online at:

<https://www.emedny.org/ProviderManuals/AllProviders/supplemental.aspx#MEVS/DVS>.

For enrollees covered by plans that include transportation as a covered benefit, claims coming to Medicaid for the transportation of such enrollees will be denied. The provider must contact the Managed Care Plan for reimbursement.

Questions concerning Medicaid eligibility verification should be addressed to the eMedNY Call Center at (800) 343-9000.

Note that one of the Medicaid Redesign Team's (MRT) Transportation Reform initiatives is the carveout of transportation from the Medicaid (mainstream) Managed Care benefit package. As of December 1, 2015, the non-emergency transportation of mainstream managed care enrollees is handled by the Department's contracted Medicaid transportation managers (except Rockland/Fidelis).

Source: [October 2015 Medicaid Update](#)

Managed Long Term Care Involvement

Transportation of [Managed Long Term Care](#) plan members is covered within the Managed Long Term Care plan's scope of benefits. Authorization and reimbursement for services rendered is the responsibility of the applicable Plan.

Concerns regarding Managed Long Term Care plans can be submitted to the Health Department via telephone to (866) 712-7197 or email to mltctac@health.ny.gov.

Prepaid Mental Health Plan Involvement

Transportation services provided to enrollees covered by prepaid mental health plans (PMHP) are considered reimbursable on a fee-for-service basis. PMHPs cover transportation to some services not typically covered by the standard fee-for-service Medicaid population, including, at times, psychosocial settings. So long as the service to which transportation is being requested is included in the enrollee's PMHP service plan, the service is considered covered and requested fee-for-service transportation will be considered based on the enrollees' documented modality needs.

Ambulance Services

Both non-emergency and emergency [ambulance](#) services are covered by the New York State Medicaid Program.

In non-emergency situations, a determination must be made by the appropriate prior authorization official whether the use of an ambulance is medically necessary as opposed to a non-specialized mode such as an ambulette, taxi/livery service or public transportation. The Medicaid enrollee's physician, physician's assistant, or nurse practitioner must order non-emergency ambulance services.

In cases of emergencies, emergency medical services are provided without regard to the enrollee's ability to pay, and no order or prior authorization is required. Payment will be made only if transportation was actually provided to the enrollee.

Ambulance services are bound by the operating authority granted by the [NYSDOH](#). Ambulance services whose operating authority has been revoked by the NYSDOH will be disenrolled from the Medicaid Program, thus precluding Medicaid payment.

Advanced Life Support Assist/Paramedic ALS Intercept/Fly-Car Service

Since Advanced Life Support (ALS) services can only be provided by specific personnel, at times, a responding ambulance company must call upon the services of such personnel. Paramedic ALS Intercept means EMT-Paramedic services provided by a second ambulance service that does not furnish the ambulance transport (Source: [42 CFR Chapter IV §414.601 10/1/02](#)).

Note: ALS-assist services can only be reimbursed if the applicable county has an established, DOH-approved unique reimbursement amount for the service.

This service should **not** be billed at the established Advanced Life Support (ALS) reimbursement fee, which is

established for those providers who deliver ALS **and** transport the enrollee in the provider’s vehicle. It is unacceptable for either ambulance service to bill Medicaid for both the physical trip and the Paramedic Intercept service. Rather, if Service A provides Paramedic Intercept services to Service B, Medicaid should see two bills:

- one from Service B providing the ground transport, and
- one from Service A for the paramedic intercept.

Advanced Life Support First Response Services

Due to **advancing** technology, ambulance service has enabled the provision of emergency care to **move out of the emergency department** to the scene of the emergency. Advanced trained personnel (paramedics) can provide invasive procedures (advanced life support) such as administering drugs, starting **intravenous** solutions, and shocking the heart while in communication with emergency department medical personnel. This onsite and en route care has improved **patient outcomes**.

The Department’s Bureau of Emergency Medical Services now licenses entities called “Advanced Life Support –First Responders (ALSFR),” paramedic-level individuals who can provide advanced life support services but **not** the transportation as the transportation is provided by an ambulance service. Often these ALSFR are municipal fire departments or privately-owned companies. This practice now occurs in rural areas, which are covered by volunteer ambulance services; and in some cities, which are covered by proprietary ambulance services.

ALSFR is *not* Paramedic ALS-assist. An approved ALSFR is not permitted to enroll in and submit claims to the Medicaid Program. Further, only the transporting ambulance service submits a claim to Medicaid.

Paramedic ALS-assist is provided by a Medicaid-enrolled ambulance service licensed to deliver ALS service, while the transporting response ambulance service is licensed to provide only basic life support. In this case, both ambulance services are enrolled in Medicaid and submit a claim specific to the service rendered.

Action Required: Policy for Ambulance Services Cooperating with ALSFRs

Ambulance services that have a cooperative arrangement with an ALSFR shall, in the event of a cooperative emergency response where ALS is provided by the ALSFR, be allowed to submit a claim for ALS and share the Medicaid reimbursement with the ALSFR. Such ambulance services must:

1. Complete and submit to the Department the following form to effectuate affirmation of contract/agreement in place between ALSFR and transporting ambulance service to the Department.
2. Retain copies of any such contracts/agreements to be presented upon request to Department officials.

3. Ensure the ALSFR maintains a copy of the same agreement to be presented upon request of Department officials.
4. Ambulance services certified for basic life support only will submit claims for ALS service when ALS service is rendered by the ALSFR, and reimburse the ALSFR according to the contract/agreement.
5. Only ambulance services who have submitted affirmation of contract/agreement to the Department will be allowed to submit a claim for ALS rendered by an ALSFR.
6. For auditing purposes, maintain complete records, including, but not limited to, claims, contracts/agreements and the amount paid to the ALSFR.

Source: [September 2010 Medicaid Update](#)

**AFFIRMATION OF CONTRACT/AGREEMENT BETWEEN
AMBULANCE SERVICE AND ADVANCED LIFE SUPPORT FIRST RESPONSE SERVICE**

Please complete the attached if your company is currently engaged in a contract or agreement with an Advanced Life Support First Response Service (ALSFR). This form should be completed only by representatives of the ambulance service. This information shall be submitted annually by January 31, and anytime changes or additions are necessary; and will serve as affirmation of such contract or agreement; a copy of which shall be retained by the ambulance service to be provided upon request to representatives of the Department. This form shall be submitted to the Director of the Medicaid Transportation Policy Unit via postal mail to: New York State Department of Health, Office of Health Insurance Programs, Division of Financial Planning and Policy, Corning Tower, OCP-720, Empire State Plaza, Albany, NY 12237; or via email to MedTrans@health.ny.gov.

This information must be submitted to the Department annually by January 31, and whenever an addition or change is necessary.

Advanced Life Support vs. Basic Life Support Services

Ambulance companies may **not** bill for both Basic Life Support (BLS) and Advanced Life Support (ALS) services when ALS is provided. The provision of ALS services **includes** the delivery of BLS services. Therefore, when an ambulance is sent to the scene of an emergency and personnel provides ALS transportation services, only that service may be billed to the Medicaid Program.

Source: November 1999 [Medicaid Update](#).

Advanced Life Support (ALS) services must be provided by an advanced emergency medical technician. If an ambulance company has not been properly certified to provide ALS services to patients, then the company may not bill Medicaid for ALS services.

Questions regarding an ambulance services' approved the level of care can be addressed by the DOH Bureau of Emergency Medical Services staff at (518) 402-0996.

Territory

Ambulance services are certified to operate in an explicit primary geographic area, or territory. Per [Article 30 PHL §3010](#), an ambulance company may receive patients only within the primary territory specified on the operating certificate or outside the territory with the exceptions indicated (i.e., upon approval of the Department of Health and the emergency medical services council to meet an emergency need). Consequently, claims for ambulance service may be submitted only when those services originate within the ambulance services' approved territory of operation or meet the statutorily prescribed exceptions outlined in Article 30 of Public Health Law, including the fulfillment of a mutual aid agreement authorized by the applicable regional council (REMSCO).

Questions regarding a company's primary territory can be addressed by contacting the REMSCO or the Department of Health (DOH) Bureau of Emergency Medical Services at (518) 402-0996.

Source: [February 2010 Ambulance Policy Reminder Letter](#)

Ambulance Transportation of Neonatal Infants to Regional Perinatal Centers

Ground ambulance transportation of critically ill neonates/newborns from community hospitals to Regional Perinatal Centers (RPCs) is the responsibility of the RPC. Regionalization of neonatal services into a single system of care was established by the Department to assure that each infant who requires intensive care receives it as expeditiously as possible in the appropriate facility. RPCs have affiliation agreements with community hospitals in their region.

The RPC will arrange for necessary ground ambulance services from the community hospital to the RPC; and the RPC is reimbursed directly by Medicaid for the costs of such transportation. The RPC is responsible to find a RPC hospital bed and arrange for neonatal transportation of the critically ill infant to the RPC.

At the time of discharge, the RPC will arrange for the transfer of the infant back to the community hospital as needed. Upon discharge of the infant, transportation from the RPC back

to the community hospital is paid fee-for-service by Medicaid. Prior authorization of the transport must be sought from the appropriate Prior Authorization Official.

Neither air transportation of neonatal infants nor maternal transportation is covered under the Regional Perinatal Center Program.

Information regarding the RPC program is available at:

http://nyhealth.gov/community/pregnancy/health_care/perinatal/regionalization_descrip.htm.

Source: August 2008 [Medicaid Update](#)

Air Ambulance Guidelines and Reimbursement

In determining whether air ambulance transportation reimbursement will be authorized, the following guidelines are used:

- The patient has a catastrophic, life-threatening illness or condition;
- The patient is at a hospital that is unable to properly manage the medical condition;
- The patient needs to be transported to a uniquely qualified hospital facility and ground transport is not appropriate for the patient;
- Rapid transport is necessary to minimize risk of death or deterioration of the patient's condition; and
- Life-support equipment and advanced medical care is necessary during transport.

A case-by-case prepayment review of the ambulance provider's Prehospital Care Report will enable the transportation manager to determine if these guidelines are met.

Fixed Wing Air Ambulance

The following fixed wing air ambulance services are reimbursable when the transport physically occurs:

- Base Fee (lift-off/call-out);
- Patient loaded mileage;
- Physician (when ordered by hospital);
- Respiratory therapist (when ordered by the hospital, and only when the hospital is unable to supply); and
- Destination ground ambulance charge (only when the destination is out of state).

The established fees assume the following:

- The provider will be responsible for advanced life support services, inclusive of all services and necessary equipment, except as noted above.
- The provider will be responsible for paying the charges of ground ambulance at the destination portion of the trip only when the destination is out-of-state. When the destination is within New York State, the destination ground ambulance charge must be billed to the Medicaid Program by the ground ambulance provider that provided transportation between the airport and hospital at the established basic life support fee.
- These amounts will be applied regardless of time or date of transport, i.e., day, night, weekend and holiday.
- The provider will not seek nor accept additional reimbursement from the Medicaid enrollee under any circumstance when billing the Medicaid Program, other individuals or a facility, except when a third party insurance is billed, in which case the provider will be reimbursed as follows:
 - For patients covered by Medicare, Medicaid will pay the coinsurance and deductible amount.
 - For patients covered by other third party insurances, Medicaid will pay the coinsurance and deductible amount **up to the established Medicaid reimbursement fee**. If the insurance company pays more than the established Medicaid fee, Medicaid will not make any additional reimbursement.
 - When an air ambulance bill is rejected by a third party insurance with the determination that the trip was medically unnecessary, the provider will not bill the Medicaid Program. If the third party insurance pays at the ground ambulance fee, Medicaid will reimburse as described above.
- The mileage fee will be applied only to patient loaded miles – those miles during which the patient occupies the aircraft. Unloaded miles – those miles when the aircraft is in transit to receive the patient or while the aircraft is returning to base – will not be charged.

Helicopter (Rotary Wing) Air Ambulance

The following helicopter air ambulance services are reimbursable:

- Lift off from base and
- Patient occupied flight mileage.

Please contact the [Medicaid Transportation Unit](#) for currently established reimbursement fees.

Abuse of Emergency Medical Services

Per New York State Penal Code §240.50(2), it is a Class A Misdemeanor to report an emergency where none exists. Therefore, if you suspect that an enrollee is abusing ambulance services, please forward the following information to the Medicaid Transportation Unit via email to MedTrans@health.ny.gov:

- the Medicaid enrollee's name and Medicaid identification number if available, and
- circumstances about the perceived abuse.

The Medicaid Transportation Unit will catalogue the referral, analyze the transportation claim reports of each referred Medicaid enrollee, respond to the reports and intervene with the Medicaid enrollee as determined necessary.

The Office of the Medicaid Inspector General's Recipient Fraud Unit will investigate referrals made by the Medicaid Transportation Policy Unit and, where appropriate, forward the information to the local district attorney for possible prosecution.

Media reports describe the frustration of ambulance service providers when Medicaid enrollees dial 911 in non-emergency situations in order to get a ride to the hospital. These inappropriate calls reduce the availability of emergency responders for true emergencies that may arise, expend staff time and medical supplies, and pose undue risk of operating an emergency response vehicle. It is the Department's intent to guide these enrollees to more appropriate modes of transportation while maintaining their right to seek emergency ambulance service when needed. With continuing intervention, enforcement, and education, we will provide necessary emergency transportation while maintaining the fiscal and programmatic integrity of Medicaid emergency services.

Source: May 2011 [Medicaid Update](#)

Transportation of a Hospital Inpatient

When a Medicaid enrollee is admitted to a hospital licensed under Article 28 of the Public Health Law, the reimbursement paid to the hospital includes all necessary transportation services for the inpatient.

If the admitting hospital sends an inpatient round trip to another hospital for the purposes of obtaining a diagnostic test or therapeutic service, the original admitting hospital is responsible for the provision of the transportation services. Therefore, the admitting hospital is responsible to reimburse the ambulance (or other transportation) service for the transport of the inpatient. For example, an admitting hospital arranges for the round trip of a Medicaid inpatient to another hospital for a diagnostic test. The admitting hospital should reimburse the transportation provider for the transport of the patient/enrollee.

Source: October 2006 [Medicaid Update](#)

Transport from an Emergency Room to a Psychiatric Center

An ambulance may be requested to transfer a Medicaid enrollee undergoing an acute episode of mental illness from an emergency room to a psychiatric hospital.

For the safety of the patient, law enforcement and hospital officials, when dealing with such a person, must use an ambulance vehicle to transport that person to acute psychiatric care; not non-emergency modes of transportation such as ambulance or taxi. The patient is in immediate need of acute psychiatric care to be provided by such a facility. These ambulance transports are considered emergency transports; therefore, prior authorization is not required.

Transport from an Emergency Room to a Trauma/Cardiac Care/Burn Center

An ambulance service may be requested to transfer a Medicaid enrollee from an emergency room to a regional trauma, cardiac or burn center. These ambulance transports are considered emergency transports; therefore, prior authorization is not required.

Transportation from an Emergency Room to an Emergency Room

At times, ambulance service may be requested to transport a Medicaid enrollee from an emergency room to another emergency room. These ambulance transports are considered emergency transports; therefore, prior authorization is not required.

Transportation from an Emergency Room to Another Facility

Those urgent ambulance trips from an emergency department to another facility are also considered by the Medicaid program an emergency and do not require prior authorization.

Submitting a Claim Deemed by the Primary Insurer to be Non-Emergency

When submitting a claim to the Medicaid program for a transport deemed by Medicaid to be emergency pursuant to the policies stated in this Manual, but to be non-emergency by the enrollee's primary insurer, the ambulance vendor submits a claim to Medicaid using the applicable procedure code (i.e., that code used to bill the primary insurer) **with the emergency indicator checked**.

Additionally, the claimant must properly complete the third party payment fields on the claim.

Ambulance Transportation by Volunteer Ambulance Services

Volunteer ambulance services may bill the Medicaid Program for the transportation of an enrollee when the following conditions are met:

- The Voluntary Ambulance Service has been authorized by the Department to bill Medicaid at a fee established for such transportation; and
- The Voluntary Ambulance Service first bills all other applicable third party insurances.

Rules for Requesting Non-emergency Ambulance Transportation

A request for prior authorization for non-emergency ambulance transportation must be supported by the order of a practitioner who is the Medicaid enrollee's attending physician, physician's assistant or nurse practitioner. A diagnostic and treatment clinic, hospital, nursing home, intermediate care facility, long term home health care program, home and community based services waiver program, or managed care program may order non-emergency ambulance transportation services on behalf of the ordering practitioner.

Non-emergency ambulance transportation may be ordered when the Medicaid enrollee is in need of services that can only be administered by an ambulance service. The ordering practitioner must note in the enrollee's patient record the condition which qualifies the use of non-emergency ambulance services. An ordering practitioner, or facilities and programs ordering transportation on the practitioner's behalf, which do not meet these rules, may be sanctioned according to the regulations established by the New York State Department of Health.

Medicare Involvement

Medicare, in many instances, is obligated to pay for ambulance transportation for patients with Medicare Part B coverage. Medicare guidelines require that the patient be suffering from an illness or injury which contraindicates transportation by any other means. This requirement is presumed to be met when the patient:

- Was transported in an emergency situation (e.g., as a result of an accident, injury or acute illness);
- Needed to be restrained;
- Was unconscious or in shock;
- Required administration of oxygen or other emergency treatment on the way to the destination;
- Had to remain immobile due to a fracture that had not been set, or the possibility of a fracture;
- Sustained an acute stroke or myocardial infarction;
- Was experiencing severe hemorrhage;
- Was bed-confined before and after the ambulance trip; or
- Could be moved only by stretcher.

Ambulance services shall submit a claim to the Medicare carrier when transportation has been provided to a Medicare eligible person. Upon approval by Medicare of the claim, a claim may be submitted to Medicaid. Claims for ambulance services will be reviewed by the Medicaid Program to determine if the Medicaid enrollee has Medicare and if the provider billed Medicare prior to submission of the claim to Medicaid.

When an ambulance service has been instructed by the Medicare carrier not to submit a claim to the carrier for the ambulance transportation of a person covered under Medicare Part B because Medicare does not cover that particular service (e.g., the transport of a person to a physician's office), the ambulance service must submit evidence of such instructions to the Prior Authorization Official. The Prior Authorization Official will then determine if Medicaid reimbursement will be authorized.

Ambulance services are covered under Medicare Part A when a hospital inpatient is transported to and from another hospital or freestanding facility to receive specialized treatment not available at the first hospital.

- The ambulance service is included in the hospital's Medicare Part A payment.
- In such situations when an ambulance service transports a hospital inpatient covered under Medicare to medical care not available at the hospital, the ambulance service shall seek reimbursement from the hospital.
- The provider shall not seek authorization from the Prior Authorization Official nor shall the provider submit a claim to Medicaid for reimbursement.

Reimbursement for ambulance transportation of a hospital inpatient covered only under Medicaid to and from another hospital or freestanding facility to receive specialized treatment not available at the first hospital may be included in the hospital's reimbursement or may be available as a separately billed service. The provider shall contact the [Prior Authorization Official](#) to determine whether reimbursement should be sought from the hospital or claimed through eMedNY.

Generally, when an original admitting hospital sends a Medicaid inpatient to another hospital for the purposes of obtaining a diagnostic or therapeutic service not available in the admitting hospital, the original hospital is responsible for the costs of transportation. Neither hospital may bill the Medicaid Program separately for the transportation services. The hospital should reimburse the ambulance or other transportation service for the transport of the patient, as the Medicaid inpatient fee is inclusive of all services provided to the patient. The transport will not be authorized by the Prior Authorization Official, nor paid fee-for-service.

When a patient covered under Medicare is discharged from one hospital and is transported from that hospital to a second hospital for purposes of admission as an inpatient to the second hospital, the ambulance service is paid for under Medicare Part B. The provider shall submit a claim to the Medicare carrier.

Medicaid will not reimburse claims that are not approved by Medicare or other insurance when a determination has been made that transportation by ambulance was not medically necessary.

Regulation 18 NYCRR §360-7.3, applicable to this policy, can be found online at:

http://www.health.ny.gov/regulations/nycrr/title_18/.

Medicare Denied "Excess Mileage"

Medicare will reimburse ambulance providers mileage to the closest hospital. If the ambulance travels to a more distant hospital, only the mileage to the closest hospital is covered; any additional mileage is not covered by Medicare.

For example, the enrollee was in Cortland County when his pacemaker began to fail. His cardiologist, who installed the pacemaker, is in Syracuse, and wanted to see the patient at St.

Francis Hospital (Syracuse) as soon as possible. Medicare only paid for the miles to the nearest hospital in Cortland, leaving the ambulance provider thirty three (33) unreimbursed miles.

Below is Medicaid's policy regarding the 33 miles left unreimbursed by Medicare:

When an ambulance service delivers a transport of a Medicaid enrollee who is also covered under Medicare, the ambulance provider must bill Medicare, and then Medicaid will pay the coinsurance and deductible amounts on the approved Medicare claim.

This issue of unreimbursed miles is an issue between the ambulance provider and Medicare; Medicaid will not authorize reimbursement for extra miles denied by Medicare. These miles are a Medicare-covered service, Medicare has considered them for payment, and adjudicated the claim.

Subrogation Notice

When a Medicaid enrollee has both commercial insurance in which the ambulance company is not a participating provider, and active Medicaid coverage, the ambulance company can send a "Medicaid Subrogation Notice" to the commercial insurance company advising them to pay the ambulance provider as an agent of the New York State Department of Health.

Note: Providers not participating in Medicare cannot bill Medicare regardless of the New York State Subrogation Laws.

The Medicaid Subrogation Notice can be obtained from the [local department of social services](#).

Source: April 2008 [Medicaid Update](#)

National Provider Identifier

Ambulance providers must obtain and register a national provider identifier (NPI).

For emergency claims, ambulance providers must identify themselves as the service provider via their NPI.

For non-emergency prior authorizations and claims, ambulance providers will be identified via **either** their eight-digit Medicaid identification number or NPI.

Source: September 2008 [Medicaid Update](#)

Ambulette Services

Medicaid reimbursement is available to lawfully authorized [ambulette](#) providers for ambulette transportation furnished to Medicaid enrollees whenever necessary to obtain medical care. Transportation services are limited to the provision of passenger-occupied transportation to or from Medicaid-covered services. The Prior Authorization Official must make a determination whether the use of an ambulette, rather than a non-specialized mode of transportation such as taxi or public transportation, is medically necessary. An ambulette may not be used as an ambulance to provide emergency medical services.

Ambulette services are bound by the operating authority granted them by the New York State Department of Transportation (NYSDOT). In accordance with NYSDOT procedures, each service is given the authority to operate within a specific geographic area. In that specified area, unless contraindicated by the ambulette services' NYSDOT-issued license, transportation is to be "open to the public", and is not to be withheld between any points within the boundaries of the service's operating authority when the ambulette service is open for business. Thus, an ambulette service participating in the Medicaid Program at the current Medicaid reimbursement fee may not refuse to provide Medicaid transportation within the ambulette service's area of operation, as this constitutes a violation of New York State Transportation Law §146 which reads

"...It shall be the duty of every motor carrier to provide adequate service, equipment and facilities under such rules and regulations as the Commissioner may prescribe."

Ambulette services found guilty of violating New York State Transportation laws may face fines and possible revocation of operating authority, as determined by NYSDOT. Those ambulette services whose operating authority has been revoked by the NYSDOT will be disenrolled from the Medicaid Program, thus precluding Medicaid payment.

Ambulette Enrollment Changes

Under current Medicaid guidelines, potential Medicaid ambulette providers are denied enrollment in the Medicaid program when the proposed service will operate in New York City, and/or Nassau and/or Suffolk County as it has been determined by the New York State Department of Health that these locations have an adequate number of existing ambulette providers.

The Medicaid program considers an exception to this policy when the new applicant has purchased an existing ambulette provider in one of the counties listed above, or has received a transfer of stock from the existing owner. In these **change of ownership** instances, there is no increase in the number of ambulette providers in the county. The new owner is required to enroll in the Medicaid program, and upon Department approval, a new Medicaid provider identification number is issued effective the final date of sale or transfer of stock.

Effective September 1, 2011, a transfer of ownership from one company or corporation to another, or the addition of new owners, stockholders or partners, for an ambulette provider operating in New York City or any of the counties listed above will only be approved by the Department when the new owner(s) agree in writing to assume all current Medicaid liabilities and any Medicaid liabilities resulting from claims issued during the seven (7) years prior to the purchase.

Source: [March 2011 Medicaid Update](#)

New York City Taxi & Limousine Licensure Requirement for Ambulette Companies Having Contract Carrier Permits Issued by the New York State Department of Transportation

Effective January 28, 2016, the Department no longer requires that New York City ambulette providers who have been granted contract carrier permits by the New York State Department of Transportation (DOT) be licensed by the New York City Taxi and Limousine Commission (NYCTLC).

The Department recognizes that some ambulette providers added sedans and minivans to their fleets in order to transport ambulatory patients in need of curbside-to-curbside transportation billable to the Medicaid program under livery procedure codes. Consistent with current practices of the DOT, all Medicaid transports performed by ambulette providers must be performed in vehicles inspected semi-annually by the DOT and by drivers certified under Article 19A of Vehicle and Traffic Law. Accordingly, ambulette providers may continue to use sedans and minivans to provide livery transports, but must ensure that vehicles and drivers meet ambulette billing criteria for every transport, irrespective of the level of Medicaid reimbursement.

Subcontracting Transports

Medicaid program transportation service providers are personally and directly responsible for transporting Medicaid enrollees. These responsibilities may not be assigned, delegated or subcontracted out. Such an arrangement has the potential of bypassing significant safety and financial controls that are fundamental to the integrity of the Medicaid program and the safety of Medicaid enrollees.

Due to mechanical breakdowns and other acute circumstances, transportation providers may face times when the number of available vehicles registered to the provider does not meet the need for services. Formerly, the Medicaid program allowed on a short-term basis Medicaid-enrolled Provider A to subcontract with or lease vehicles from Medicaid-enrolled Provider B or other entity in order to ensure the provision of services to the enrollee. **The Medicaid program no longer allows these arrangements.**

If a Medicaid transportation provider encounters a circumstance when his supply of provider-registered vehicles does not meet the need for services, the provider must alert the appropriate transportation manager as soon as possible so that the transportation manager may find an available provider to perform the necessary trip or trips. Please be reminded that Medicaid transportation managers are accessible 24/7 by telephone, and can be identified using the contact list available online at

<http://www.emedny.org/ProviderManuals/Transportation/index.html>.

Source: December 2015 [Medicaid Update](#)

Stretcher Ambulette

Stretcher service is considered non-emergency transportation of a Medicaid enrollee who must be transported to and from medical care, is confined to bed, cannot sit in a wheelchair, and does not require medical attention/monitoring during transport.

A stretcher service can transport a person who self-administers oxygen. In turn, the employee of the stretcher service is not to supply oxygen at any time to an enrollee. Further, at no time shall the transportation provider and his/her employees offer oxygen to a passenger.

A stretcher service shall not transport an enrollee who requires medical attention/monitoring during transport for reasons such as isolation precautions, has an active intravenous solution, requires cardiac monitoring, or has a tracheotomy.

A stretcher service shall not transport an enrollee who is medically sedated.

The stretcher service requires at least two (2) employees to transport the enrollee. At all times, the stretcher service must supply the needed personnel to safely lift and transport a Medicaid enrollee.

The stretcher service must be able to move the stretcher over impediments such as curbs and doorways, and up and down steps where an elevator or ramp is unavailable. Necessary personnel must be available to overcome such impediments.

Requirements for Participation as a Stretcher Service

To participate in the New York State Medicaid Program, a provider must meet all applicable State, County and Municipal requirements for legal operation; as well as the quality performance indicators listed in this Manual.

The Department will require certification from stretcher transportation vendors on a form to be provided by the Department that the expectations illustrated in this manual are met or exceeded.

Safety Requirements for Stretcher Service

Safety is the first consideration whether at or on the way to the medical site. Personal safety is foremost, the most important, and must become automatic. Before leaving for the pick-up, the team begins preparing both mentally and physically. In the vehicle, seat belts are worn unless client care makes it impossible. Protection at the pick-up site is also very important. On the way into the building to get the enrollee, ensure that the path is not blocked by obstructions and that if steps are used, they are clear of anything that may cause a stumble or fall.

In most cases, when the team enters a residence to retrieve an enrollee, the team is very likely to move the enrollee from a bed of some sort. Every time equipment is used to move an enrollee, extra steps are required to ensure that neither fellow teammates nor the enrollee is injured. Packaging and handling are technical skills that need to be learned so that the movement is made perfect through practice and training.

- A. The stretcher transport team will be called upon to transport enrollees who may have a variety of communicable or infectious diseases. Most of these diseases are much harder to catch than is commonly believed. Additionally, there are many immunizations, protective techniques, and devices that can minimize one's risk of infection. When these protective measures are used appropriately, the risk of a team member contracting a serious communicable disease becomes negligible.
- B. All team members shall be trained in the handling of blood-borne pathogens and in approaching the enrollee who may have a communicable or infectious disease. Training must be provided for issues including blood and body fluid

precautions, secretion precautions and contamination precautions. It is recommended that universal precautions be used. Universal precautions apply in all situations in which the team member has direct enrollee and/or body fluid contact (including sweat, tears, saliva, urine, feces, vomit, nasal secretions, and sputum); and are designed to approach all body fluids as being potentially infectious. Modes of transmission for infectious diseases include blood or fluid splash; surface contamination; needle stick exposure; oral contamination due to lack of proper sanitation.

- C. Proper hand-washing before and after contact with an enrollee, regardless whether gloves are worn, must be practiced. The longer germs remain on a person, the greater the chance of getting through personal barriers. Gloves and eye protection are the minimum standard for all enrollee care if there is any possibility of exposure to blood or bodily fluids.
- D. Always secure restraints around an enrollee on the stretcher/cot. Unsecured enrollees may fall from the cot and be injured.
- E. Do not disable or modify the auxiliary lock. If the auxiliary lock malfunctions, take the cot out of service until the problem has been corrected. Modifying the cot can cause injury.
- F. Use the auxiliary lock as instructed. Unexpected folding of the cot can cause injury to enrollees or team members.
- G. Support the backrest until the backrest adjustment assembly engages. An unlocked backrest can cause injury to enrollees or team members.
- H. Use the Inclined Position only to load or fold the cot. The Inclined Position increases the risk of the cot tipping.
- I. Do not let helpers control the cot. Team members should maintain control of the cot and instruct helpers how to safely handle the cot. Cot misuse can cause injury.
- J. Operate the cot only as described in the accompanying manual.
- K. Rolling a cot in the Inclined Position increases the risk of tipping. Always roll the cot in the High, Intermediate, or Low position. Improper use can cause injury.
- L. Maintain the cot as described in the manual. Improper maintenance can cause cot malfunction and injury.
- M. Do not use the cot if parts are missing or damaged. Inspect the cot regularly. A damaged cot can cause injury.
- N. Lift and carry the cot by the main frame only. Lifting or carrying the cot by the side arms can damage the cot.

- O. Do not ram the cot into the vehicle's bumper or floor when loading. Rough loading may damage the cot.
- P. Do not use a high pressure washer to clean the cot. Water under high pressure penetrates joints, flushes away lubricants, and causes corrosion.
- Q. Keep fingers and hands away from the areas on the cot indicated with a pinch point label.
- R. Portable stretchers are used when the wheeled cot cannot be maneuvered due to space constraints. They are equipped with two sets of straps to secure the enrollee. When used in combination with a wheeled stretcher that is waiting a smooth and level location, the portable stretcher with the enrollee can be secured to the wheeled stretcher.
- S. Slideboards measure approximately 18" x 36" and are used in transferring an enrollee from a bed to a stretcher. They bridge the gap between the bed and some mobility device, and are made of varnished wood or various types of plastic.
- T. Wheelchairs can serve as an adjunct for moving an enrollee on stairs to the ground floor, where the prepared stretcher is waiting. Transporting a wheelchair safely on stairs is done with two able-bodied attendants.
- U. Restraints – these are belts used across certain parts of the body to ensure that the enrollee does not fall from the stretcher. Belts are generally placed at the chest, abdomen, and knees.
- V. Securement – once aboard the vehicle, securement is achieved with either a belt system or cot fastener system. In either case, securement is necessary to prevent the cot from moving while in transport.
- W. Wheel lock – to brake the wheels so the stretcher does not move in a stationary position.
- X. Storage tray or pouch – to place on the stretcher for the safe-keeping of supplies and/or the enrollee's personal property.
- Y. Slide board – board used to assist in the transfer of an enrollee from a bed to the stretcher.

Equipment Requirements

Wheeled stretchers (i.e., gurney, or cot) can be adjusted to several heights and come with security belts. When the surface is smooth the cot is rolled using one person to guide the head and one person to pull the foot end. If the loaded stretcher must be carried, it is best to use four (4) people. This provides more stability and requires less individual strength. In some narrow areas, it will become necessary to carry with two (2) people. However, those two people must

be strong enough to ensure safe transport and proper balance for the enrollee. Loading and unloading the cot requires skill and practice, and the vendor should be aware of the many accessories available for purchase that can make the job easier.

Features and Standards of the Stretcher

The stretcher to be used should be one manufactured for purposes of a stretcher; i.e., the stretcher device must meet nationally recognized standards for a stretcher. The features and standards listed below are generally acceptable, but are not exclusive of all features and designs offered by manufacturers of a stretcher device. Stretchers produced by different manufacturers with differing design features and standards listed below will be acceptable for Medicaid transportation purposes.

- The strong horizontal rectangular tubular main frame is where all the parts are attached. This main frame or handles are the only place attendants are to use when pulling, pushing or lifting.
- A retractable guardrail is attached along the central portion of the main frame at each side of the stretcher. These guardrails are lowered out of the way when an enrollee is being loaded.
- The underside of the main frame is supported on a folding undercarriage that has a smaller horizontal rectangular frame and four large rubber casters at its bottom end. The folding undercarriage is designed to be adjusted to any height from about 12 inches above the ground, which is the designed height when the stretcher is secured in the vehicle, to 32-36 inches above the ground, which is the desired height when the stretcher is being rolled. The controls for folding are designed so that the cot remains locked at its desired height when the controls are not being activated.
- Generally, stretchers should be either an elevating wheeled style with a minimum length of 191/75 (cm/in), a minimum width of 56/22, and a maximum bed height when collapsed of 38/15 measured to the top of a positioned 8/3 thick mattress; or should be an elevating wheeled style with additional front roll in wheels with a minimum length of 200/79 (cm/in), a minimum width of 56/22, a maximum bed height when collapsed of 13/33 measured to the top of a positioned 8/3 thick mattress. Length and width measurements should be taken at the metal framing, excluding joint fittings. However, these standards may differ by manufacturer, and will be acceptable as long as the standards meet nationally recognized standards.
- Stretchers should have a polyester foam mattress or equivalent mattress covered with vinyl coated, nylon fabric or other non-porous fabric conforming to FMVSS 302, or equivalent, and restraint straps.
- At least three (3) strap type restraining devices (chest, hip and knee) shall be provided per stretcher to prevent longitudinal or transverse dislodgment of the patient during transit. Additionally, the head of the stretcher shall be furnished with upper torso (over the shoulder) restraints that mitigate forward motion of the patient during severe braking or frontal impact accident. Restraining straps shall be incorporated metal-to-metal quick

release buckles, be not less than 51 mm (2 inches) wide, and fabricated from nylon or other materials easily cleaned and disinfected.

- Stretcher fasteners and anchorages shall be a crash-stable side or center mounting stretcher fastener assembly with a quick release latch. It shall secure the stretchers to the vehicle body. The installed stretcher fastener device for wheeled stretchers shall be tested to comply with a 220 lb. pull test in accordance with AMD Standard 004 Litter Retention System.
- Additional stretcher related hardware is permitted, provided the patient compartment exit/entry is not encumbered with the stretcher in place.
- The furnished devices shall have a brightly colored finish if the device presents a tripping hazard in the entry/exit area when the stretcher is removed.

Stretcher Vehicle Requirements

- A. Each vehicle shall comply with applicable requirements of the New York State Department of Transportation, the New York City Taxi and Limousine Commission (when operating in New York City), or any other local agency that regulates the operation of a stretcher carrying vehicle.
- B. Each vehicle shall be staffed with **at least** a driver and one (1) assistant, commensurate with the needs of the individual being transported, and shall only be used to transport an individual who needs transportation to or from a non-emergency medical appointment or service, is convalescent or otherwise non-ambulatory and cannot use a wheelchair, and who does not require medical monitoring, medical aid, medical care or medical treatment during transport.
 - a. The assistant shall be seated in the passenger compartment while the vehicle is in motion, and shall notify the driver immediately of any sudden perceived change in the individual's condition.
 - b. Oxygen shall not be administered by vehicle staff; however, self-administered oxygen shall be permitted as applicable.
- C. Each vehicle shall be equipped with a fully charged certified and non-expired fire extinguisher and first aid kit; shall have functioning interior lights, a functioning horn, and all standard safety equipment such as hazard flashers, and safety belts for all passengers and shall be maintained in an operable condition; and shall have functioning locking mechanisms which ensure that all access doors are capable of being opened from the inside but remained closed and locked during travel. Additionally, each vehicle shall be weather tight and free of leaks. In no event shall any non-emergency stretcher vehicle be equipped with any emergency lights or sirens.
- D. Each vehicle shall comply with the Americans with Disabilities Act (ADA).

- E. The interior of each vehicle, including all storage areas, equipment and supplies, shall be kept clean and sanitary. Waterless antiseptic hand wash shall be available on each vehicle. Following transport and before being occupied by another passenger, all contaminated surfaces shall be cleaned and disinfected using a method recommended by the Centers for Disease Control, and cleaning and disinfecting supplies must be carried on each vehicle. All soiled supplies and used disposable items shall be stored or disposed of in a plastic bag, covered containers or compartments provided for this purpose. Red or orange bags must be utilized for regulated waste. Clean stretcher linen or disposable sheets and pillowcases shall be stored in each vehicle and changed after each use.
- F. Passengers shall not be left unattended, and shall at all times be secured with restraints. In no event shall the stretcher be modified, nor shall the auxiliary lock be tampered with. If the auxiliary lock malfunctions, the stretcher shall be removed from service until satisfactorily repaired. The stretcher incline position shall only be used to load or fold the stretcher, not to transport the passenger. All stretchers shall be inspected regularly for missing or damaged parts. The driver and assistant shall confirm that restraining straps are fastened properly and that the stretcher, stretcher fasteners and anchorages are properly secured.
- G. The design and construction of the vehicle must ensure maximum safety and comfort. The ride on a stretcher in a vehicle must not raise the anxiety level of the enrollee. Excessive speed and sharp cornering is unnecessary and dangerous. What is necessary is safe transportation to an appropriate destination in the shortest practical time.
- H. Vehicle length and width are critical factors in maneuvering, driving and parking. To brake and pass effectively, the driver must know the width and length of the vehicle. Always use someone outside the vehicle as a ground guide if the vehicle must be backed. Vehicle size and weight will greatly influence braking and stopping distances.
- I. The vehicle chassis and engine components are subjected to significantly greater stresses than a typical van or truck. Therefore, the manufacturer's recommendation for periodic maintenance must be strictly followed. Report forms and local/individual differences will affect maintenance procedures. Forms should be developed for the vehicle and filed for inspection and legal documentation.
- J. Radio
- a. As a non-emergency stretcher vendor, employees must be familiar with two-way radio communications and have a working knowledge of the mobile and hand-held devices that can be utilized. Users should know how to use this equipment and what to say when transmitting.
 - b. Cellular telephones may be used, but not by the driver while the vehicle is in motion.

Stretcher Vendor Personnel Requirements

Employees must be trained in the operation of a stretcher, including lifting and navigating the device.

Employee training specific to the operation of a stretcher device must be documented, and submitted to the Department's transportation manager, or the local prior authorization official prior to the assignment of stretcher transports to the provider.

Stretcher service can only be provided to Medicaid enrollees by employees trained in the operation of a stretcher device.

Confidentiality

Vendors have certain professional responsibilities as transport providers. Among those responsibilities is confidentiality, as communication between the provider and Medicaid enrollee is considered strictly confidential and generally cannot be disclosed without permission from the enrollee or a court order. Every provider that provides non-emergency transportation services must have a written policy regarding confidentiality.

Rules, Policies and Procedures to Follow

Vendors are obligated to have written rules, policies and procedures in place prior to providing non-emergency stretcher services. Rules are requirements for certain actions or non-actions. Policies represent consistent guidelines to thinking in management's decision-making. There is no discretion on the part of the person following them. Any deviation results in some form of disciplinary action. Below are some subjects that must be covered by rules of the provider:

- Accident reporting
- Alcohol or drug-related impairments
- Client assessment
- Common supplies
- Communicable diseases
- Confidentiality
- Customer service
- Dealing with family members
- Defensive driving
- Dress code
- Eating while on duty
- Emergency situations
- Falsification of records
- Geriatric needs
- Hazardous materials
- Immunizations
- Infection control
- Insubordination
- Job abandonment
- Loading/Unloading clients
- No smoking
- Non-enrollee passengers other than aides, guardians or spouses
- Personal protective equipment

- Pets
- Pilferage
- Pre/Post trip inspections
- Radio or cell phone use
- Records and reports
- Refusal to be transported
- Requesting assistance
- Restraint
- Securement
- Service animals
- Service area
- Sexual harassment
- Transportation is non-emergency only
- Two-Person service provision
- Universal precautions
- Use of equipment
- Violent behavior
- Weapons
- Working with external staff

Uniform and Protective Clothing

Protective clothing refers to equipment that blocks entry of an organism into the body. The following serve as required protection for non-emergency stretcher team members, when the protection is needed:

- Cover gowns;
- Heavy duty gloves (for cleaning);
- Masks;
- Protective eyewear;
- Vinyl/latex gloves.

Lifts Performed by Stretcher Personnel

Stretcher transportation of a Medicaid enrollee by an ambulette service is allowed under the Medicaid Program; however, the ambulette service is not permitted to render any medical services to the enrollee. Stretcher transport is appropriate when the Medicaid enrollee is not in need of any medical care or service en route to one’s destination and the Medicaid enrollee must be transported in a recumbent position.

The ambulette vehicle must be appropriately configured to securely accommodate a loaded stretcher during transport. The ambulette service should establish a reimbursement amount with the Department prior to commencing this service.

Lift Policy

It is inappropriate to request the stretcher mode of transportation for an enrollee in order for the enrollee to be more easily transferred onto the examination table by the stretcher personnel.

In these situations, stretcher mode is inappropriate for transportation purposes because the enrollee can be safely transported in a wheelchair.

Medicaid will pay for the most appropriate mode of transportation required to transport an eligible enrollee to a Medicaid-covered service. Due to the increasing number of wheelchair users with excessive weight and other disabilities who are unable to transfer out of the wheelchair, the enrollees are faced with the prospect of requiring a lift out of the wheelchair onto an examination table.

When a wheelchair user is unable to move from the wheelchair and needs to be lifted (i.e., transferred) from the wheelchair onto an examination table, **this transfer is the responsibility of a personal aide of the enrollee and/or medical practitioner.** Lifting to the examination table is not the responsibility of the transportation driver.

For wheelchair users who need assistance in getting out of their chair, requestors of transportation must coordinate the enrollee’s medical care among those practitioners who are able to accommodate the lifting of the enrollee onto the examination table.

Transportation vendors should **not** be required to:

- accompany the enrollee throughout their appointment for the purposes of relaying treatment information to the nursing home staff or caregiver;
- enter an examination room for the purposes of transferring the enrollee on or off of an examination table; nor,
- leave provider-owned equipment (i.e., a stretcher) at the treating facility in order for the medical practitioner to render necessary treatment.

Ambulette Stretcher Service in New York City

When an enrollee is unable to ambulate, confined to a bed, cannot sit up or sit in a wheelchair, and does not require medical attention during transport, stretcher ambulette is available in New York City as of May 1, 2012. The following fees apply:

Ambulette Stretcher Service	One Way Fee	Procedure Code	Modifier
7am-7pm Monday-Friday except certain holidays	\$76.00	T2005	-
Weeknights 7pm-7am, weekends & certain holidays	\$98.00	T2005	TU

Source: *April 25, 2012 Transportation Vendor Letter*; [May 2012 Medicaid Update](#)

Ambulettes and Oxygen

An ambulette may transport a person who requires oxygen, as long as the oxygen is individually prescribed and provided, and the passenger self-administers the oxygen.

Ambulette companies may not provide oxygen or oxygen-delivery equipment to riders; and ambulette personnel may not monitor oxygen flow rates.

Source: [BEMS Policy Statement 99-08](#)

Ambulettes and “Star of Life” Logo

The “Star of Life” logo is to be used to identify emergency response vehicles that respond to an emergency situation that may necessitate medical care.

It is inappropriate for this symbol to be affixed to a vehicle operated by a non-medical provider.

Source: [November 2009 Medicaid Update](#)

Policy Regarding Vehicle Ownership or Leasing and Insurance

Medicaid program transportation service providers are personally and directly responsible for their fleet of vehicles. A provider must own the vehicles outright or be personally responsible for the vehicles pursuant to a vehicle lease agreement. The provider may enter into a lease agreement with a motor vehicle manufacturer or with a licensed vehicle dealership. Vehicle leases are acceptable so long as the lease agreement is in the name of the Medicaid-enrolled transportation service provider and the vehicle is registered to the Medicaid-enrolled transportation service provider.

Further, vehicles must be insured and maintained by the Medicaid-enrolled transportation service provider.

It is unacceptable for a Medicaid-enrolled transportation service provider to enter into any arrangement whereby the provider uses or leases vehicles registered to, insured and/or maintained by another individual or entity. Such an arrangement has the potential of bypassing significant safety and financial controls that are fundamental to the integrity of the Medicaid Program and the safety of the Medicaid enrollees.

Providers in violation of this policy must continue to meet these standards concerning vehicle ownership, registration, maintenance, and insurance. Those providers deemed in violation of this policy are subject to penalty, including disenrollment from the Medicaid program. Note: New transportation provider applicants must adhere to these requirements at the time of application.

Ambulette as Taxi/Livery

An ambulette may provide taxi (curb-to-curb) service as long as the ambulette maintains the proper authority and license/s to operate as an ambulette. The Medicaid Program does not require the ambulette to be separately licensed as a taxi/livery services; rather, it operates as an ambulette providing taxi/livery service. In these situations, the ambulette will be assigned the taxi level procedure codes required for billing.

Personal Assistance, Escorts and Carry-Downs

Personal assistance by the staff of the transportation company is required by the Medicaid Program and consists of the rendering of physical assistance to the ambulatory and non-ambulatory (wheelchair-bound) Medicaid enrollees in:

- Walking, climbing or descending stairs, ramps, curbs, or other obstacles;
- Opening and closing doors;
- Accessing an ambulette vehicle; and
- The moving of obstacles as necessary to assure the safe movement of the Medicaid enrollee.

There is no separate reimbursement for the escort of a Medicaid enrollee. Necessary escorts are to be provided by the ambulette service at no additional or enhanced charge.

The Medicaid Program does not limit the number of stairs or floors in a building that a provider must climb in order to deliver personal assistance to a Medicaid enrollee. The ambulette provider is required to provide personal assistance and door-to-door service at no additional or enhanced charge. This means the staff must transport the enrollee from his/her front door (including apartment door, nursing home room, etc.) no matter where it is located; to the door of the medical practitioner from whom the enrollee is to receive Medicaid-covered medical services.

Please note that the Office of the Medicaid Inspector General (OMIG) has conducted preliminary on-site field reviews of various ambulette services, and found that many service providers did not provide personal assistance as required. If, upon audit, the OMIG finds personal assistance was not provided by the ambulette service provider, the provider who billed for ambulette service may be subject to financial or other provider-specific sanctions, as designated by the OMIG.

Card Swipe Program

Effective February 2010, the Office of the Medicaid Inspector General (OMIG) expanded the Card Swipe Program to include ambulette transportation providers. Selected providers will receive a letter detailing the new requirements as well as a description of the program. The Card Swipe Program helps providers determine a Medicaid enrollee's current eligibility at the point of service.

This program is regulated at 18 NYCRR §360-6.2(b)(4) which states:

"A[n enrollee] must present the Medicaid identification card or a Department-approved equivalent to the Medicaid provider before receiving medical services or supplies."

In accordance with 18 NYCRR §514.5(e), providers who participate in the Card Swipe Program are required to use the VeriFone terminal in a significant number of their weekly Medicaid transactions. Minimum compliance with this requirement compels providers to swipe 85% of all eligibility transactions by passing the client benefit identification card through the VeriFone terminal at the beginning **and** end of the service. OMIG will send a letter on a quarterly basis to inform providers of their swipe percentage.

Additional Program information, including device instructions for use, is available online at:

<http://www.omig.ny.gov/> .

Source: [December 2009 Medicaid Update](#)

Surety Bond Requirement

The Office of the Medicaid Inspector General (OMIG) has found that several ambulette providers have gone out of business or changed ownership while having outstanding debts owed to the Medicaid program. Medicaid regulations allow for financial security, provided in the form of surety bonds, to be required as a condition of participation or continued enrollment in the Medicaid program for providers where claims submitted for payment are expected to exceed \$500,000 in a single year or \$42,000 in any month.

The OMIG has determined that applicants for ambulette services located in **Nassau, Westchester, Monroe, Erie, Orange and Suffolk Counties** that submit their applications on or after March 1, 2011 will be required to submit a surety bond prior to enrollment if the ambulette provider is determined to be otherwise eligible for enrollment.

In New York City, ambulette providers enrolled as a result of an ownership change will be required to submit a bond.

The surety bond requirement will apply to all applicants for new enrollment in the Medicaid program with service addresses in the counties listed above, and for enrollment as a result of an ownership change in New York City and the counties listed above where there is a new entity purchasing the company. The initial bond must be submitted prior to enrollment and the term of the bond must be for at least one calendar year.

The applicant will be contacted by the OMIG once an initial determination has been made that enrollment can otherwise be granted. At that time, the provider will be asked to submit a surety bond within 90 days in order to secure enrollment. If an applicant fails to provide a bond, the application will be denied.

The OMIG will request surety bonds for ambulette providers in the amount of \$100,000 per year per applicant, or \$25,000 per year for each ambulette owned or used by the applicant, whichever amount is lower. All surety bonds must be renewed annually. If the amount initially requested is less than \$100,000, the amount of the bond may increase, up to \$100,000, upon renewal if the number of ambulettes owned or used by the applicant increases. It should be noted that surety bonds are issued by insurance companies and the amount of the bond would be much higher than the actual cost to the applicant.

If an applicant estimates that the company will bill less than \$500,000 for ambulette services in the first full year of Medicaid enrollment, the applicant may submit a letter with the company's enrollment application stating this and requesting an exception to the bond requirement. The letter must include an estimate of the company's annual Medicaid billings, as well as the number of ambulettes the company owns or leases, and plans to purchase or lease in the first year of operation. OMIG will review this information, as well as billings of similar companies, to make a determination as to whether the bond will be required.

In addition to the pre-enrollment bond requirement in the counties listed above, all applicants approved for enrollment for ambulette services that submit an application on or after March 1, 2011, **regardless of where the company is located**, will be subject to a review of claims after enrollment to determine if Medicaid billings exceed \$500,000 per year or \$42,000 in any month. If billings exceed that threshold, a surety bond for \$100,000 per year (or \$25,000 per year for each ambulette owned or used by the applicant during the period reviewed if that amount is lower), will be required for continued enrollment. Failure to provide a bond within 90 days will result in termination from the Medicaid program.

All surety bonds must be renewed annually while the provider is enrolled in the Medicaid program. The provider will be given notice that renewal is required at least sixty days prior to the expiration date. **Failure to renew a bond by the expiration date will result in termination from the Medicaid program.** If a provider's billings have dropped below the required threshold of \$500,000 per year for the year that the surety bond was in effect, the provider may submit a request to be relieved of the obligation to provide a bond at the time renewal is required by Medicaid.

Rules for Requesting Ambulette Transportation

Per [18 NYCRR Section 505.10\(c\)\(2\)](#), a request for prior authorization for transportation by an ambulette must be supported by the order of a practitioner who is the Medicaid enrollee's:

- Attending physician;
- Physician's assistant;
- Nurse practitioner;
- Dentist;
- Optometrist;
- Podiatrist or
- Other type of medical practitioner approved by the Department.

A diagnostic and treatment clinic, hospital, nursing home, intermediate care facility, long term home health care program, home and community based services waiver program, or managed care program may order non-emergency ambulance transportation services on behalf of the ordering practitioner.

Ambulette transportation may be requested if any of the following conditions is present:

Note: The ordering practitioner must note in the patient's medical record the Medicaid enrollee's condition which qualifies use of ambulette transportation.

- The Medicaid enrollee needs to be transported in a recumbent position and the ambulette service is able to transport a stretcher as previously described;

- The Medicaid enrollee is wheelchair-bound and is unable to use a taxi, livery, private vehicle or public transportation;
- The Medicaid enrollee has a disabling physical condition which requires the use of a walker or crutches and is unable to use a taxi, livery, private vehicle or public transportation;
- An otherwise ambulatory Medicaid enrollee requires radiation therapy, chemotherapy, or dialysis treatments, which result in a disabling post-treatment physical condition, making the enrollee unable to access transportation without the personal assistance of an ambulette service.

Ambulette transportation may be requested if:

- The Medicaid enrollee has a disabling physical condition other than one described above or a disabling mental condition requiring personal assistance provided by an ambulette service; or
- The ordering practitioner certifies in a manner designated by and submitted to the Department that the Medicaid enrollee cannot be transported by a taxi, livery, private vehicle, or public transportation, necessitating use of an ambulette service.

Any ordering practitioner or entity ordering transportation on the practitioner's behalf that orders transportation which is deemed not to meet the above rules may be sanctioned according to [18 NYCRR §515.3](#).

Rules for the ordering of transportation services on behalf of New York City Medicaid enrollees are available in the Guidelines for Ordering Transportation in New York City manual at:

<http://www.emedny.org/ProviderManuals/Transportation/index.html>.

Taxi and Livery Services

Prior authorization of taxi and livery services is required to ensure that a Medicaid enrollee uses the means of transportation most appropriate to his medical needs. Requests for taxi/livery services shall be made in advance by either the enrollee or the enrollee's medical provider.

All taxi and livery providers transporting Medicaid enrollees must adhere to all local municipal and regulatory agency license plate requirements.

Rules for Requesting New York City Livery Transportation

A request for prior authorization for transportation via New York City livery service must be supported by the order of a practitioner who the Medicaid enrollee's:

- Attending physician;
- Physician's assistant;
- Nurse practitioner;
- Dentist;
- Optometrist;
- Podiatrist or
- Other type of medical practitioner approved by the Department.

A diagnostic and treatment clinic, hospital, nursing home, intermediate care facility, long term home health care program, home and community based services waiver program, or managed care program may order non-emergency ambulance transportation services on behalf of the ordering practitioner.

Note: The ordering practitioner must note in the patient's medical record the Medicaid enrollee's condition which qualifies use of livery transportation.

Please refer to the **Guidelines for [Ordering Transportation in New York City](#)** manual for more information.

Section III – Basis of Payment for Services Provided

Reimbursement fees are approved by the New York State Department of Health, and vary by county. It is critical that, before a transport is provided to a Medicaid enrollee, the transportation provider verify the person's eligibility for Medicaid on the date of service. **Reimbursement will not be made for services rendered to persons ineligible for Medicaid-funded transportation.** To determine who to bill, please consult the local department of social services or State agency identified in the eligibility verification process.

Reimbursement is made to lawfully authorized transportation providers (ambulance, ambulette, taxi and livery) for passenger-occupied services to and from Medicaid covered services for Medicaid payment. Payment will not be made for unauthorized services.

Information regarding the submission of claims is available in the [Billing Guidelines Manual](#) at:

<http://www.emedny.org/ProviderManuals/Transportation/index.html>.

Upon request, the Medicaid eMedNY Contractor provides on-site billing training. To schedule such training, please call (800) 343-9000.

Prior Authorization

Prior authorization is required for all non-emergency transportation. This includes ambulance, ambulette, livery, taxi and group transports. The prior authorization of non-emergency transportation services is required to ensure that the Medicaid enrollee uses the mode of transportation most appropriate to meet their medical needs, and that a medically adequate but less costly transportation plan cannot be arranged.

Payment will not be made for non-emergency transports if the transportation provider does not receive authorization for the transport.

Prior authorization must be obtained from the applicable transportation manager as identified in the [Transportation Contact List](#).

Procedures for requesting and obtaining prior authorization may vary among transportation managers. To determine the appropriate procedures, please consult the transportation manager identified in the eligibility verification process using the contact list available online at:

<http://www.emedny.org/ProviderManuals/Transportation/index.html>.

For NYC authorizations, please consult the [Guidelines for Ordering Transportation in New York City](#) manual, available at:

https://www.emedny.org/ProviderManuals/Transportation/PDFS/Ordering_Guidelines_Manual.pdf.

In most instances, approval must be obtained prior to each trip (or round trip) taken by the Medicaid enrollee. If a Medicaid enrollee requires regular transportation due to extended treatment (such as dialysis) and the enrollee's medical appointment is at the same location, and

if the same provider is to transport the enrollee, a standing order prior approval may be granted for an extended period. Whenever such prior authorization for non-emergency transportation is not obtained, reimbursement will be denied.

Prior authorization does not guarantee payment. Unmet provider and enrollee eligibility requirements may result in the denial of reimbursement. Comprehensive billing information can be found in the Billing Guidelines Manual, available online at:

<http://www.emedny.org/ProviderManuals/Transportation/index.html>.

DOH-Contracted Prior Authorization Official

The Department of Health (DOH) has contracted with professional transportation management entities to manage transportation on behalf of Medicaid enrollees.

DOH-contracted transportation managers have no vehicles and will not provide transportation in competition with existing Medicaid-enrolled transportation vendors. There are **no additional requirements** for Medicaid-enrolled transportation vendors to participate with the contracted transportation manager. **Transportation vendors will not need to contract with the transportation manager or complete a new Medicaid enrollment application to receive trip assignments.** Rather, the manager will use all existing transportation vendors to the extent possible in accordance with contractual obligations.

Through this contract with DOH, the transportation manager is primarily tasked with:

- accepting requests for non-emergency Medicaid-funded transportation in their call center, or via fax, web or email;
- disseminating approvable trips based first upon the medically appropriate mode of transportation, then by enrollee's choice among participating transportation vendors, medical provider's choice among participating vendors, and finally, where no choice is expressed, rotation among participating transportation vendors;
- generating prior authorizations according to the parameters established by the DOH;
- accepting, investigating and resolving complaints from Medicaid enrollees, medical providers and transportation vendors;
- developing grouped rides to common medical destinations;
- referring identified potential abuse and proposing potential cost savings initiatives to DOH; and
- performing quality assurance surveys.

All participating transportation vendors should obtain access to the manager's web-based systems to attest, cancel or request changes to trips, etc.

Upstate

The Department of Health (DOH) has contracted with a transportation manager, [Medical Answering Services \(MAS\)](#), to serve as the Prior Authorization Official in the following counties:

- Albany
- Allegany
- Broome
- Cattaraugus
- Cayuga
- Chautauqua
- Chemung
- Chenango
- Clinton
- Columbia
- Cortland
- Delaware
- Dutchess
- Erie
- Essex
- Franklin
- Fulton
- Genesee
- Greene
- Hamilton
- Herkimer
- Jefferson
- Lewis
- Livingston
- Madison
- Monroe
- Montgomery
- Niagara
- Oneida
- Onondaga
- Ontario
- Orange
- Orleans
- Oswego
- Otsego
- Putnam
- Rensselaer
- Rockland
- St. Lawrence
- Saratoga
- Schenectady
- Schoharie
- Schuyler
- Seneca
- Steuben
- Sullivan
- Tioga
- Tompkins
- Ulster
- Warren
- Washington
- Wayne
- Westchester
- Wyoming
- Yates

Medical Answering Services (MAS) also manages all of the transportation needs of Office of Mental Health (county code 97) and Office for People with Developmental Disabilities (county 98) enrollees residing in the counties above.

Transportation vendors, enrollees and medical providers in affected counties should consult MAS by visiting their website:

<https://www.medanswering.com/>.

New York City

The Department of Health (DOH) has contracted with a transportation manager, LogistiCare Solutions, to serve as the Prior Authorization Official in New York City.

Affected transportation vendors should contact LogistiCare at (877) 564-5924 or via web at <http://www.nycmedicaidride.net/en-us/transportationproviders.aspx>.

Medical facilities and practitioners should consult the Guidelines for Ordering Transportation in New York City manual, located online at:

<http://www.emedny.org/ProviderManuals/Transportation/index.html>.

LogistiCare also manages the transportation needs of Office of Mental Health (county code 97) and Office for People with Developmental Disabilities (county 98) enrollees residing in the five boroughs of New York City.

Long Island

The Department of Health (DOH) has contracted with a transportation manager, LogistiCare Solutions, to serve as the Prior Authorization Official in Nassau and Suffolk Counties.

Affected transportation vendors should contact LogistiCare at (844) 678-1105 or via web at <http://www.longislandmedicaidride.net/en-us/transportationproviders/overview.aspx>.

LogistiCare also manages the transportation needs of Office of Mental Health (county code 97) and Office for People with Developmental Disabilities (county 98) enrollees residing in Nassau or Suffolk County.

Inappropriate Prior Authorization Practices

It is inappropriate for a transportation provider to request prior authorization from the Prior Authorization Official. Requests for prior authorization of transportation services must be initiated by a medical practitioner or other designated requestor.

Requests for Prior Authorization Submitted After the Trip

The Medicaid Program requires all Medicaid providers to submit a claim within ninety (90) days of the date of service unless submission of the claim is outside the control of the provider. Since the prior authorization process is an inherent step in the claiming process, it is also governed by the 90 day claiming regulation at [18 NYCRR §540.6](#).

Many requests submitted greater than 90 days after the date of service are done so because transportation providers cannot confirm an enrollee's Medicaid eligibility as the eligibility determination is pending action by the local department of social services or other eligibility gateway. In these instances, the Medicaid Program considers the request and claim submission to be outside the provider's control. **Consequently, the Medicaid Program expects transportation providers to diligently monitor the eligibility verification system to determine when Medicaid eligibility is retroactively approved, and the date for which eligibility is effective.**

All prior authorizations should be sought within thirty (30) days of the date of service.

Requests submitted beyond this time are subject to payment disallowance.

- If the enrollee does not become Medicaid eligible for transportation services on the date of service, the request for prior authorization will be denied.
- For enrollees with effective retroactive eligibility, up to 120 days from the date eligibility is established on the eligibility verification system will be allowed for requests for prior authorization to be submitted.
 - Requests submitted beyond this 120-day period will be denied.

For requests involving changes to existing prior authorizations, the following applies:

- If the request is submitted within 90 days of the date of service, county staff (or their designee) may approve the request to change the existing prior authorization.
- If the request is more than 90 days from the date of service but less than 30 days from the date the prior authorization was issued, county staff (or their designee) may approve the request to change the existing prior authorization.
- If the request was more than 90 days from the date of service, and more than 30 days have passed since the date that the prior authorization was originally issued, county staff (or their designee) may deny the request for a change in the authorization.

For requests involving third party insurance denials (which pertain primarily to ambulance providers):

- If the request is submitted within 90 days of the date of service, county staff (or their designee) may approve the request to issue a prior authorization.
- If the request is more than 90 days from the date of service but less than 30 days from the date of the remittance statement from the third party insurance company denying payment, county staff (or their designee) may approve the request to change the existing prior authorization.
- If the request was more than 90 days from the date of service, and more than 30 days have passed since the date of the remittance statement from the third party insurance company denying payment, county staff (or their designee) may deny the request for a change in the authorization.

Requests dated more than 90 days beyond the service date must be sent to the Department of Health via any one of the following methods:

Fax: (518) 486-2495

Email: MedTrans@health.ny.gov

Rides Grouped by the Transportation Provider

All ambulette, taxi or van providers who transport more than one Medicaid enrollee at the same time in the same vehicle and who are reimbursed for passenger-laden mileage should claim only for the actual number of miles from the first pick-up of an enrollee to the final destination and drop-off of the last Medicaid passenger.

For example, Ace Company's reimbursement has been established at \$20.00 per one-way pick-up fee plus \$1.00 per loaded mile. Ace is authorized to transport Mrs. Jones to her Friday morning clinic appointment, a one-way mileage of thirteen (13) miles; and Mr. Frank to the same clinic at the same time, a one-way mileage of seven (7) miles.

Ace will pick up both enrollees in the same vehicle as they live along the same route. Ace should claim the base fee and mileage fee of 13 miles for Mrs. Jones, as she was

the first passenger to be picked up. Ace should only claim the base fee for Mr. Frank. The 7 miles authorized for Mr. Frank duplicate the concurrent mileage paid under Mrs. Jones' claims. Ace should not claim these 7 miles.

If a provider is reimbursed on a one-way pickup (i.e., flat) fee only (no mileage reimbursement), regardless of the number of miles transported, then this policy does not apply.

For Medicaid enrollees who reside outside their county of eligibility, the rule for ordering mileage reimbursement is the same as that which applies to all other Medicaid enrollees of the residential county.

Group Rides Developed by the Medicaid Program

Through extensive data analysis, the Department and its transportation manager/s will develop group ride opportunities wherein a transportation provider or providers will be afforded the opportunity to "bid," i.e., propose a flat reimbursement fee to cover all applicable trips. These trips will generally be from a single area or areas to a single area or areas, at around the same timeframe. Providers must be able to meet the Department's expectations including:

1. In general, Medicaid enrollees will not be on a vehicle longer than one (1) hour, except in circumstances outside the transportation provider's control (e.g., weather events, traffic conditions, etc.), or when the expected trip length exceeds one hour in duration based on the pickup and destination locations.
2. On the return/B-leg of the trip, the enrollee will not be made to wait more than one hour and fifteen minutes (1:15:00) for a pickup from their medical site.
3. Neither the Department nor its transportation manager can guarantee availability of a group ride on any particular service date. Regardless of the number of riders on any group route on any given day, when the selected provider is assigned a group ride trip to the group destination, the group fee shall be authorized.
4. The transportation manager will only assign enrollees to the group ride when the modality is medically appropriate for the individual enrollee.
5. The established fee is considered all-inclusive, i.e., no additional compensation will be made for additional pickups performed related to hub-spoke model transportation, add-on mileage, incurred tolls, or otherwise compensable expenses.
6. Designated transportation manager staff will use the group route at no cost to MAS or DOH on at least three (3) occasions, once prior to implementation and twice during the twelve (12) month approval period. The trip will be documented, including any perceived quality infraction or area in need of improvement noted during the trip, number of riders, origination and destination, and any additional information deemed relevant.
7. The applicable group ride fee will be in effect for a period of twelve (12) months without interruption.

8. The selected provider will work closely with the transportation manager to ensure efficient quality, safety and control measures.
9. DOH reserves the right to cancel the endeavor at the discretion of DOH, with notice of no more than five (5) business days.
10. The selected provider must meet all applicable policy requirements related to the category of service in which he is enrolled and the group ride assigned.
11. The selected provider may not reassign any portion of the group ride for any reason to a sibling company or competitor. If any portion of the group ride for any reason cannot be completed by the selected provider, the selected provider must notify the transportation manager.
12. All applicable licensure requirements are solely the responsibility of the selected provider. Neither DOH nor the transportation manager are responsible for any penalties incurred due to the selected provider's lack of appropriate licensure or other infractions.
13. Transportation providers not participating in the group ride endeavor will not be permitted to bill Medicaid at the group fees irrespective of their riders' destinations.

Multiple Riders from the Same Location

Medicaid does not pay for transportation of cohabitants needing transportation to the same destination, even if each cohabitant has a medical appointment. For example, a mother and her son live at 1 Cherry Tree Lane and both have appointments at 7 Murray Avenue on November 30. In this circumstance, the Medicaid program will authorize one trip, and indicate there will be an additional rider. The transportation vendor will not be authorized a separate compensable trip for the additional rider.

Typically, cohabitants that fall under this category are those related by marriage or birth, but may include roommates, friends, etc. who are residing, temporarily or otherwise, at the same address.

This policy does not apply to persons residing in apartment complexes where each person lives in a separate apartment, nor does it apply to adult homes, nursing facilities, etc.

Non-Emergency Transportation of Restricted Enrollees

The county and the Department may restrict an enrollee's access to Medicaid covered care and services if, upon review, it is found that the enrollee has received duplicative, excessive, contraindicated or conflicting health care services, drugs or supplies (18 NYCRR §360-6.4). The State medical review team designated by the Department performs Medicaid enrollee utilization reviews and identifies candidates for the Restriction Program. In these cases, the county and the Department may require that the enrollee access specific types of medical care and services through a designated primary provider or providers.

The primary provider is a health care provider enrolled in the Medicaid Program who has agreed to oversee the health care needs of the restricted enrollee. The primary provider will provide

and/or direct all medically necessary care and services for which the enrollee is eligible within the provider's category of service or expertise. Primary providers include:

- Physicians;
- Clinics;
- Inpatient hospitals;
- Pharmacies;
- Podiatrists;
- DME Dealers;
- Dentists; and
- Dental Clinics.

When a Medicaid enrollee has been restricted to a primary provider, only the primary provider is allowed to order transportation services for the enrollee. This applies to all modes of non-emergency transportation and includes cases where the enrollee's primary physician or clinic has referred the enrollee to another provider. In such situations, requesting transportation remains the responsibility of the primary provider. Transportation providers should use the identification number of the primary provider when obtaining eligibility information and submitting claims.

Toll Reimbursement

The Medicaid Program will reimburse only for the **actual costs** incurred by a transportation provider while transporting a Medicaid enrollee. When tolls are incurred, the toll is assessed per vehicle, not per rider, and should be billed according to the actual toll charged. **Therefore, if a vehicle is transporting more than one rider on the same trip, the provider may bill one unit per charged crossing, not one unit per passenger.**

Source: May 2008 [Medicaid Update](#)

Some counties outside New York City have been assigned unique procedure codes for the authorization of toll reimbursement where applicable. For more information please contact the applicable transportation manager.

New York City Ambulette and Livery Tolls

In New York City, ambulette and livery providers may claim the **actual toll amount** charged, according to the following procedure codes:

Ambulette& Livery
A0170/CG

E-Z Pass Customers

E-Z Pass customers, who are charged less per toll than those who pay tolls with cash, should bill Medicaid for the **actual toll amount charged** to their E-Z Pass account while transporting a Medicaid enrollee or enrollees.

Providers may enroll in the E-Z Pass program online at <http://www.e-zpassny.com>.

Situations Where Medicaid Will Not Provide Reimbursement and/or May Seek Post-Payment Recoupment

Reimbursement is not provided for any mode of transportation when any of the following situations exists:

- The individual is not eligible for Medicaid on the date of service;
- Prior authorization for the non-emergency transport was not obtained;
- The claim is not submitted to the Medicaid Program within the required timeframe in the required format with required information;
- The medical service to which the transportation occurred is not covered by the Medicaid Program (i.e., Medicaid will only consider payment of transportation services to and from care and services covered by the Medicaid Program);
- The transportation service is available to others in the community without charge;
- The Medicaid enrollee is restricted to a primary provider, and the claim identifies another ordering provider's identifying information;
- There is a fee listed but effort is never made to collect the fee from individuals who are not enrolled in the Medicaid Program;
- The provider is out of compliance with applicable licensure requirements;
- The service is provided by a medical institution or program and the cost is included in that institution's or program's Medicaid fee; or
- Transportation services are not actually provided to a Medicaid enrollee.

Reporting of Vehicle and Driver License Numbers

On claims for which an ambulette vehicle was **used**, providers are required to include **both**:

- the driver license number of the individual driving the vehicle; and
- the license plate number of the vehicle used to transport the enrollee.

If a different driver and/or vehicle returns the enrollee from the medical appointment, the license number of the driver and vehicle used for the origination of the trip should be reported on the claim.

Source: November 2005 [Medicaid Update](#)

The Department has reached agreement with the Office of the Medicaid Inspector General and the Attorney General's Medicaid Fraud Control Unit to require that claims submitted by **taxi/livery providers include both the driver license and vehicle license plate number**. The

Department agrees that reporting this information will aid in its intent to ensure quality services and program integrity.

Effective July 1, 2016, claims that do not include the required fields will be denied for edit 00267, "VEHICLE LICENSE PLATE / DRIVER'S LICENSE NUMBER REQUIRED."

Source: December 2015 [Medicaid Update](#)

Transportation Under the Family Planning Benefit Program

Effective November 1, 2012, the Family Planning Benefit Program (FPBP) includes transportation of eligible enrollees to family planning services covered by the FPBP.

Source: November 2012 [Medicaid Update](#)

Programs and Facilities Certified by the Office for People with Developmental Disabilities (OPWDD)

OPWDD Day Treatment and Day Habilitation agencies must provide or pay for transportation to and from their programs using their day program reimbursement.

OPWDD certified Intermediate Care Facilities (ICF/DDs), Supervised Community Residences, and Supervised and Supportive Individualized Residential Alternatives must provide or pay for all resident transportation to medical and clinical appointments at no additional cost to the Medicaid Program.

Ambulance services should not be utilized for routine transportation to medical or clinical visits, or to and from day programs. **Emergency (911-generated) ambulance services, or ambulance discharge from a hospital, may be billed separately to the Medicaid Program on a fee-for-service basis.**

Source: April 2008 [Medicaid Update](#).

Adult Day Health Care (ADHC) Transportation

Most ADHC programs either contract separately with Medicaid-enrolled transportation providers or own vehicles to transport registrants to and from the program. In these cases, the ADHC, **not the Medicaid Program**, reimburses the transportation provider **directly**. Prior authorization for transportation of registrants to and from such programs, excluding transportation for ad hoc medical appointments that take place on the same date as an ADHC visit, will not be granted.

For the remaining programs, the Medicaid Program has assigned specific fee-for-service procedure codes for ADHC transportation. Programs whose transportation providers are paid directly by the State should use the following procedure codes when requesting prior authorization of transportation for Medicaid registrants **to and/or from the ADHC program**:

Ambulette	A0130/HC
-----------	----------

The Department will reimburse ambulette transportation providers at the applicable fee approved for ADHC transportation as follows:

County of Enrollee Eligibility	One Way Pickup Fee
28 - Nassau 37 - Putnam 39 - Rockland 47 - Suffolk 55 - Westchester	\$22.20
66 - NYC	\$25.00
Rest of the State	\$21.56

Ad hoc medical trips originating from the ADHC program (e.g., trip from the ADHC program to a physician’s office) may be requested at the general procedure codes applicable to the county of enrollee eligibility.

Ambulette – Fee Changes Implemented by the Medicaid Redesign Team

The Medicaid Redesign Team (MRT) has identified ways to provide critical health care services at a lower cost, and recommended a series of proposals to fundamentally restructure and reform the New York State Medicaid program.

MRT proposal #29 concerning Medicaid transportation program initiatives contains targeted fee actions that include a reduction of the amount paid for ambulette transportation. The new fees, depicted in the chart below, are effective July 1, 2011:

County/ies	One Way Trip	July 1, 2011 Fee
New York City	Dialysis transportation: 5 miles or less	\$27.00
New York City	Dialysis transportation: over 5 miles	\$30.00
New York City	All other ambulette transportation: 5 miles or less	\$29.00
New York City	All other ambulette transportation: over 5 miles	\$34.70
Nassau & Suffolk	Dialysis transportation	\$40.00
Nassau & Suffolk	All other ambulette transportation	\$48.50
All Other Counties Statewide	All ambulette transportation	All trip unit ambulette fees reduced by \$1.50
Statewide	Ambulette mileage fee	No Change

The table below illustrates the new procedure codes for dialysis transportation in New York City. Ordering practitioners must submit new orders for ambulette transportation of New York City Medicaid enrollees for dates of service or after July 1, 2011.

County	One Way Trip	Procedure Code	Modifier	Description
66-New York City	\$27.00	A0130	AX	All trips to dialysis within 5 miles
66-New York City	\$30.00	A0130	SC	All trips to dialysis over 5 miles

New York City Fee Change Effective March 15, 2014

The Medicaid program has determined that, in order to meet the transportation needs of Medicaid enrollees in New York City, a fee change is necessary to reimburse quality transportation vendors for their service. Effective **March 15, 2014**, the following fees are effective:

Hospital Discharges (All Hospitals)

Service	Procedure Code	Fee
Ambulette (Inside Borough)	A0130/TG	\$45.00
Livery (Inside Borough)	A0100/TG	\$25.00
Ambulette (Outside Borough)	T2004/TN	\$60.00
Livery (Outside Borough)	A0100/TF	\$42.00
Ambulette Mileage*	S0209/TN	\$3.00
Livery Mileage*	S0215	\$3.00

*Applicable after 8.0 passenger-laden miles from mile 8.0 to the end of the passenger-laden trip. Note: tenths rounded to nearest whole mile.

All Medical Trips Other than Hospital Discharges (including Dialysis)

Service	Procedure Code	Fee
Ambulette (Inside CMMA)	A0130	\$33.00
Livery (Inside CMMA)	A0100	\$25.00
Ambulette (Outside CMMA)	A0130/TN	\$45.00
Livery (Outside CMMA)	A0100/TN	\$35.00
Ambulette Mileage*	S0209/TN	\$3.00
Livery Mileage*	S0215	\$3.00
Ambulette Surcharge**	A0130/SC	\$25.00
Livery Surcharge**	A0100/SC	\$25.00

*Applicable after 8.0 passenger-laden miles from mile 8.0 to the end of the passenger-laden trip. Note: tenths rounded to nearest whole mile.

** To be applied at the discretion of the Department and/or its transportation manager, one per trip flat fee add-on per Medicaid passenger for one-way trips exceeding 3.0 miles in duration originating from or ending at destinations below 110th Street in Manhattan.

As part of this new fee schedule, the Department expects that transportation vendors will adhere to the Department's standards concerning trip reroutes, i.e., if a trip cannot be accommodated, the vendor will notify the transportation manager, LogistiCare Solutions (LGTC), within 24 hours of the scheduled pickup time.

Please understand that, if LGTC identifies that a transportation vendor consistently is unable to meet this and other quality standards, administrative action, possibly including cessation of trip assignment, may be pursued by the Department.

Ambulance Services - Use of Claim Modifier

All ambulance providers are required to include procedure code modifiers on submitted ambulance (category of service 0601) claims that include one of the following procedure codes:

Procedure Code	Description
A0426	Advanced Life Support, Non-emergency, Level 1
A0427	Advanced Life Support, Emergency, Level 1
A0428	Basic Life Support, Non-emergency (BLS)
A0429	Basic Life Support, Emergency, (BLS Emergency)

The modifier is not required on the Prior Authorization generated for the service.

Similar to Medicare, for each base line item, the trip origin is reported by using a modifier in the first position and the destination is reported using a modifier in the second, as follows:

- D = Diagnostic or therapeutic site other than P or H when these are used as origin codes
- E = Residential, domiciliary, custodial facility (other than 1819 facility)
- G = Hospital-based End-Stage Renal Disease (ESRD) facility
- H = Hospital
- I = Site of transfer (e.g. airport or helicopter pad) between modes of ambulance transport
- J = Freestanding ESRD facility
- N = Skilled nursing facility
- P = Physician's office
- R = Residence
- S = Scene of accident or acute event
- X = Intermediate stop at physician's office on way to hospital (destination code only)

Air Ambulance Fee Schedule

The enacted 2015-16 New York State Budget authorized the Medicaid program to increase the Medicaid pickup and mileage fees for Air Ambulance trips statewide effective **May 15, 2015** as depicted in the table below:

Service	Procedure Code	Fee Effective May 15, 2015
Rotary Wing – Pickup	A0431	\$5,017.74
Rotary Wing – Mileage	A0436	\$33.65
Fixed Wing – Pickup	A0430	\$4,315.78
Fixed Wing – Mileage	A0435	\$12.60

Source: [June 2015 Medicaid Update](#)

Ambulance Providers: New York City Add-on Mileage

The enacted 2015-16 New York State Budget authorized the Medicaid program to reimburse New York City ambulance providers for add-on loaded mileage at a fee of \$2.75/mile when performing **non-emergency basic life support** trips (i.e., those coded under procedure code A0428). This change became effective **May 15, 2015**.

The Department's transportation manager will apply the applicable mileage code and units to affected prior authorizations according to the parameters of this policy.

No Additional Compensation for a Nursing Home-Provided Attendant

A number of nursing home administrators have inquired as to whether Medicaid residents or their families may be charged a fee when a nursing home staff member accompanies a resident to and from medical appointments outside the facility. For example: Nursing home personnel travels with a resident to a medical appointment to provide necessary personal care services and/or ensure effective communication between residents and medical practitioners.

Nursing homes are prohibited from seeking monetary compensation from Medicaid residents or their family members. The fee-for-service reimbursement paid by Medicaid to transportation and medical providers is considered payment in full for all services rendered to the enrollee both during transit and at the medical appointment. No additional compensation should be sought or accepted.

Source: [October 2010 Medicaid Update](#)

Contracted Billing Agents

Due to the complexities involved with billing insurance companies for services rendered, many transportation vendors use a private billing agent to submit claims to the Medicaid program on their behalf.

Transportation vendors should note that they, not their contracted billing agent, are ultimately responsible for any inappropriate billing identified post-payment which is attributed to their company. Therefore, it is imperative that transportation vendors, in addition to their billing agents, be aware of and compliant with all applicable Medicaid policies.

Additionally, billing agents must enroll as a "Service Bureau" with the New York State Medicaid Program. Even if the billing agent is enrolled as a Medicaid service vendor, they must separately enroll as a Service Bureau in order to submit claims on behalf of another vendor.

Source: [February 2010 Medicaid Update](#)

Transportation Rosters

Both transportation vendors who render transportation services and ordering providers listed as requesting transportation services for Medicaid enrollees will receive a roster identifying the services requested.

Transportation prior authorizations will appear on weekly rosters as they are generated by the county department of social services or the Medicaid fiscal agent (for New York City Medicaid enrollees). These prior authorizations will only appear on the roster when they are first entered into the system or if any subsequent changes are made. In the majority of cases, especially for New York City enrollees, the authorizations will be for up to six months.

The Transportation Provider Roster lists the ordering provider for which prior authorization was requested as well as the information required to complete a claim.

Rosters received by ordering providers list prior authorized transportation services that have been ordered by the provider during a weekly period. The Roster sent to the ordering provider verifies those services that have been prior authorized and identifies the Medicaid enrollee and transportation provider for whom authorization of services was sought.

Description of Fields on a Transportation Provider Roster

All data on the roster will appear as it was data-entered by the Prior Authorization Official. Providers should verify the accuracy of the roster prior to billing for the service. Any errors in the data should be reported to the Prior Authorization Official responsible for data entry as soon as possible. The following is an explanation of each field on the roster:

PROCESS DATE

This is the date that the roster was produced.

BILLING PROVIDER ID

This is the eight-digit Medicaid provider identification number of the transportation company. This is followed by the master file name of the transportation company.

CLIENT ID/NAME

This is the client's Medicaid identification (Example: AB12345C) and name as it appears on the Medicaid master file. Rosters appear in alphabetic order by enrollee's last name.

DATE OF BIRTH

This is the Medicaid enrollee's date of birth from the Medicaid master file.

SEX

This is the Medicaid enrollee's sex (M/F) as it appears on the Medicaid master file.

CNTY FISC RESP

This is the 2-digit county code of the county that established eligibility for the enrollee. A list of county codes is available in the [MEVS Provider Manual](#).

ORDERING PROVIDER NUM

This is the ten-digit national provider identifier or eight-digit Medicaid identification number of the practitioner, facility or program that ordered the transportation service.

PROCEDURE CODE

This is the procedure code authorized for the trip.

MOD

This is the modifier authorized for the trip, if applicable.

PA NUMBER

This is the electronically-generated eleven-digit prior authorization number for this specific trip or trips. This number must be placed on subsequent claims in the appropriate field in order to secure payment.

DETERMINATION

Codes in this field indicate the authorization status.

RSN REJECTED

If the determination is “rejected”, then the rejection code will appear in this field.

PERIOD OF SERVICE FROM/TO

The beginning and ending dates of service are found in this field. If the prior authorization is for one date of service, the dates will be the same.

APPROVED QUANTITY

The number of service units for which a provider has been authorized to provide an enrollee.

APPROVED TIMES

The number of times/days covered by the authorization.

APPROVED AMOUNT

This is the maximum dollar amount that a provider can be paid for providing a unit of service to a Medicaid enrollee. This amount will be \$0.00 unless the Prior Authorization Official has approved a specific amount per unit.

RENDERED QUANTITY

This is the total number of units and claims rendered against this prior authorization.

TOTAL NUMBER OF ENTRIES ON THIS ROSTER

This number is the total number of prior authorization lines of service appearing on this roster.

Multiple Dates of Service

For each date of service a provider transports an enrollee; a separate claim line must be submitted. For example, Mrs. Jones was transported round trip on July 1, 2 and 3. Three separate claim lines should reflect two units on each of date of service.

Note: Claim edit code definitions are listed on the last page/s of a remittance statement.

Additionally, claim edit 700 - PA UNITS OR PAYMENT AMOUNT EXCEEDED - will deny claims which contain more daily units than allowed by a prior authorization.

Source: July 2009 [Medicaid Update](#)

Procedure Codes Changes Effective April 2011

Medicaid implemented new transportation procedure codes contained in the federal Healthcare Common Procedure Code System (HCPCS). **Effective for dates of service on or after April 27, 2011**, transportation claims require new procedure codes and modifiers in order to be processed. Claims with dates of service on or after April 27, 2011 that list the current transportation procedure codes that begin with the prefix “NYxxx” will be denied. Instead, the new procedure codes and modifiers, as described on the following page, must be submitted.

Some authorized transports may use only a solitary HCPCS code, while other transportation services will have a two-letter modifier attached to the same or another HCPCS code. While a solitary HCPCS code will reimburse one amount, the same HCPCS code authorized with a modifier will reimburse a different amount.

Claims submitted on or after April 27, 2011, for dates of service up to and including April 26, 2011, should reflect the authorized “NYxxx” codes.

Department staff, in collaboration with staff of the department of social services in each county, have reassigned the current “NYxxx” procedure codes to the new HCPCS/modifier structure.

Specific guidelines for orderers of New York City transportation services appear in the Guidelines for Ordering Transportation in New York City manual.

The following lists available codes and modifiers, as well as the definition of each, available in each county. Please note that each county may have been assigned different codes based upon the county’s individual transportation needs; and not every HCPCS code or modifier will be used in every county.

Source: [December 2010 Medicaid Update](#)

April 27, 2011 Procedure Coding System with Modifiers

HCPCS Code	Definition	Modifier	Definition
A0100	Taxi: local trip or trip within the common medical marketing area	AX	Dialysis transportation
S0215	Taxi/livery/van mileage	CG	Unassigned – available for extraordinary transports
A0110	Van transportation by county-based provider (e.g., public transit)	HA	Transport to a child/adolescent program
A0120	Van transportation by private vendor	HC	Transport to a geriatric program

Transportation Manual – Policy Guidelines

HCPCS Code	Definition	Modifier	Definition
A0130	Ambulette: local trip or trip within the common medical marketing area	HE	Transport to a mental health program
T2004	Ambulette: One Way Trip	HF	Transport to a substance abuse program
S0209	Ambulette mileage	HG	Transport to an addiction program
T2005	Ambulette Stretcher transportation	HH	Transport to an integrated mental health/substance abuse program
T2049	Ambulette Stretcher mileage	HI	Transport to an integrated mental health/developmental disabilities program
A0170	Parking fees & Thruway/Bridge/Tunnel Tolls	HK	Transport to specialized programs for high-risk populations
		SC	Transportation service not otherwise defined
		TF	Intermediate level of care
		TG	Complex/high level of care
		TJ	Group Ride of children/adolescents
		TK	Extra passenger
		TN	Transport outside the common medical marketing area
		TU	After-hours transportation
		TV	Holiday/weekend transportation

Section IV – Definitions

For the purposes of the Medicaid Program, and as used in this Manual, the following terms are defined.

Advanced Life Support Services

Advanced life support (ALS) services are those ambulance services in which the treatment provided is **invasive to the patient** inclusive and above the level of care provided by a NYS Certified Emergency Medical Technician. Such treatment includes:

- Advanced Prehospital patient assessment and appropriate transport destination determination;
- The initiation and monitoring of intravenous (IV) fluids;
- Cardiac monitoring (ECG);
- Intubation/insertion of an airway tube, manual ventilations or the monitoring of an electronic ventilation device;
- Manual defibrillation and/or electric pacing of the patient's heart;
- Administration or monitoring of medications given by mouth, injection or IV drip as prescribed by protocol and/or a physician's order; and
- Communication with a physician and the transmittal of patient data such as the ECG.

Advanced Life Support Assist/Paramedic ALS Assist/Fly Car Service

An advanced life support assist/fly car service is an emergency ALS response **in conjunction with an emergency ambulance transport** provided by another ambulance service.

In this type of response, an ambulance service employee with ALS training, certification and equipped with ALS equipment is dispatched to the emergency scene to assist with the primary ambulance service by providing necessary ALS in which the primary personnel have no training or certification.

In these circumstances, the ALS assist/fly car service may bill Medicaid for the ALS-assist if the county has an established fee for the service. The primary ambulance company may bill for Basic Life Support transportation.

Advanced Life Support First Response Service

Advanced life support first response service means an organization which provides advanced life support care, but does not transport patients.

Adult Day Health Care

Adult day health care (ADHC) programs are community-based programs licensed by the New York State Department of Health which provide comprehensive medically-supervised care in a congregate setting to individuals with a physical or mental impairment. (Source: http://nyhealth.gov/health_care/medicaid/program/longterm/addc.htm.)

Ambulance

An ambulance is a motor vehicle, aircraft, boat or other form of transportation designed and equipped to provide emergency medical services during transit.

Ambulance Service

An ambulance service is any entity, as defined in [Section 3001 of the Public Health Law](#), which is engaged in the provision of emergency medical services and the transportation of the sick, disabled, or injured persons by motor vehicle, aircraft, boat or other form of transportation to and from facilities providing hospital services and which is certified or registered by the New York State Department of Health as an ambulance service.

Ambulette

An ambulette is a special-purpose vehicle, subject to inspection requirements of the New York State Department of Transportation (NYSDOT) and requiring a certificate or permit for the transportation of passengers from the United States Department of Transportation or the Commissioner of NYSDOT, that is designed and equipped to provide non-emergency care that has either wheelchair-carrying capacity or the ability to carry transit-disabled individuals.

Ambulette Service

An ambulette service is an individual, partnership, association, corporation or any other legally recognized entity which transports the invalid, infirm, or disabled by ambulette to and/or from facilities which provide medical care. An ambulette service provides the invalid, infirm or disabled with personal assistance.

Basic Life Support Services

Basic life support (BLS) services are ambulance services in which the treatment provided to the patient is noninvasive and/or within the scope of practice for a NYS-certified EMT Basic. These services include the following services and all other services that are not listed as Advanced Life Support (ALS) services:

- Use of anti-shock trousers (treatment of shock);
- Monitoring of a patient's blood pressure;
- Administration of oxygen;
- Administration of nebulized Albuterol;
- Administration of Epinephrine Auto-Injector (Epi-Pen) for allergic reactions;
- Control of bleeding;
- Splinting of fractures;
- Cardiopulmonary resuscitation (CPR); and

- Delivery of babies.

Common Medical Marketing Area

The common medical marketing area is the geographic area from which a community customarily obtains its medical care and services.

Community

A community is either the State, or a portion of the State, a city or particular classification of the population, such as all persons 65 years of age and older.

Conditional Liability

Conditional liability is the responsibility of the prior authorization official for making payment only for transportation services which are provided to a Medicaid-eligible individual in accordance with the requirements of Title 18 NYCRR.

Day Treatment Program or Continuing Treatment Program

A day treatment program or continuing treatment program is a planned combination of diagnostic, treatment and rehabilitative services offered by the Office for People with Developmental Disabilities or the Office of Mental Health.

Department-Established Reimbursement Fee

A Department-established reimbursement fee is the fee for any given mode of transportation that the Department has determined will ensure the efficient provision of appropriate transportation to Medicaid enrollees in order for the enrollee to obtain necessary medical care or services.

Emergency Ambulance Transportation

Emergency ambulance transportation is transportation to a hospital emergency department typically generated by a “911” emergency system call or some other request for an immediate response to a medical emergency.

Due to the urgency of the transportation request, insurance coverage or other billing provisions are not addressed until after the trip is completed.

Emergency Medical Services

Emergency medical services are services for the provision of initial, urgent medical care including, but not limited to, the treatment of trauma, burns, and respiratory, circulatory and obstetrical emergencies.

Local Departments of Social Services

The local department of social services (LDSS) is the locality that authorizes the Medicaid enrollee’s eligibility for Medicaid. There are sixty (60) LDSS in New York State, including the five (5) boroughs encompassing New York City, as well as both the New York State Office of Mental Health and the New York State Office for People with Developmental Disabilities.

Locally Established Fee

The locally established fee is the fee for any given mode of transportation which the social services official has determined will ensure the efficient provision of appropriate transportation for Medicaid enrollees in order for the Medicaid enrollees to obtain necessary medical care and services.

Locally Prevailing Fee

The locally prevailing fee is the fee for a given mode of transportation which is established by a transit or transportation authority or commission empowered to establish fees for public transportation, a municipality, or a third-party payer, and which is charged to all persons using that mode of transportation in a given community.

New York State Offices of Mental Health (OMH) and for People with Developmental Disabilities (OPWDD)

OMH and OPWDD are two State agencies operating as local departments of social services in New York State. Upon eligibility verification, OMH is represented by county code 97 and OPWDD by county code 98. These agencies are responsible for the prior authorization of both emergency and non-emergency transportation services for enrollees assigned to them.

Non-Emergency Ambulance Transportation

Non-emergency ambulance transportation is the pre-planned provision of ambulance transportation for the purpose of obtaining necessary medical care or services by a Medicaid enrollee whose medical condition requires transportation in a recumbent position and/or the administration of life support equipment such as oxygen, by medically-trained personnel en route to a medical appointment.

Ordering Practitioner

An ordering practitioner is the Medicaid enrollee's attending physician or other medical practitioner who has not been excluded from or denied enrollment in the Medicaid Program and who is requesting transportation on behalf of the enrollee in order for the enrollee to receive medical care or services covered by Medicaid.

The ordering practitioner is responsible for initially determining when transportation to a particular medical care or service is medically necessary.

Personal Assistance

The provision of physical assistance by the provider of ambulette services or the provider's employee to Medicaid enrollees for the purpose of assuring safe access to and from the Medicaid enrollee's place of residence, ambulette vehicle or Medicaid-covered health service provider's place of business.

Personal assistance is the rendering of physical assistance to a Medicaid enrollee in walking, climbing or descending stairs, ramps, curbs or other obstacles, opening and/or closing doors, accessing an ambulette vehicle, moving of wheelchairs or other items of medical equipment and the removal of other obstacles to assure safe movement of the enrollee.

In providing personal assistance, the provider or provider's employee will physically assist the enrollee which shall include touching, or, if the enrollee prefers not to be touched, guiding ("shadowing") the enrollee in such close proximity that the provider of services will be able to prevent any potential injury due to a sudden loss of steadiness or balance.

A Medicaid enrollee who can walk to and from a vehicle, his or her home, and a place of medical services without such physical assistance is deemed **not** to require personal assistance.

Prior Authorization

A prior authorization official's determination that payment for transportation is essential in order for a enrollee to obtain necessary medical care and services covered by the Medicaid Program and that the prior authorization official accepts conditional liability for payment of the Medicaid enrollee's transportation costs.

Prior Authorization Official

A prior authorization official is an official from:

- The local department of social services or their designated agent;
- The designated agent of the Department of Health;
- the Office of Mental Health; or
- the Office for People with Developmental Disabilities.

Taxicab

Taxi vehicles are defined per New York State Department of Motor Vehicle and Traffic Law (VTL) Article 1, § 148-a. as every motor vehicle, other than a bus, used in the business of transporting passengers for compensation, and operated in such business under a license or permit issued by a local authority. However, it shall not include vehicles which are rented or leased without a driver.

Transportation Attendant

A transportation attendant is any individual authorized by the prior authorization official to assist the Medicaid enrollee in receiving safe transportation.

Transportation Expenses

Transportation expenses are the costs of transportation services and the costs of outside meals and lodging incurred when going to and returning from a provider of medical care and services when distance and travel time require such costs.

Transportation Services

Transportation services are services by ambulance, ambulette, taxi, common carrier or other means of appropriate to the Medicaid enrollee's medical condition; and the transportation attendant to accompany the enrollee if necessary. Such services may include the transportation

attendant's transportation, meals, lodging and salary; however, no salary will be paid to a transportation attendant who is a member of the enrollee's family.

Livery Vehicles

Taxi vehicles are defined per New York State Department of Motor Vehicle and Traffic Law Article 1 § 121-e. as every motor vehicle, other than a taxicab or a bus, used in the business of transporting passengers for compensation. However, it shall not include vehicles which are rented or leased without a driver.

Vendor

A vendor is a lawfully authorized provider of transportation services who is either enrolled in the Medicaid Program pursuant to 18 NYCRR §504 or authorized to receive payment for transportation services directly from a local department of social services. The term vendor does not mean a Medicaid enrollee or other individual who transports an enrollee by means of privately owned vehicle.

Section V – Modifications

This section details the changes made to this Manual since its last online posting.

Page #	Description of Modification
22-23	Updated policy concerning the Department's requirement for New York City ambulette providers to maintain licensure by the Taxi and Limousine Commission.
