GBF SentryLink Smart Video Intercom Property Management Manual

(The smart IP intercom system)

Property Manager Login Account:

First please pass your property manager name and email address to GBF support team at <code>info@gbfelectronics.com</code>. GBF support team will create one login account for the property manager to login the following webpage at <code>https://doorbell.push2u.com/admin/index/index.html</code> for editing all tenants information and building information.

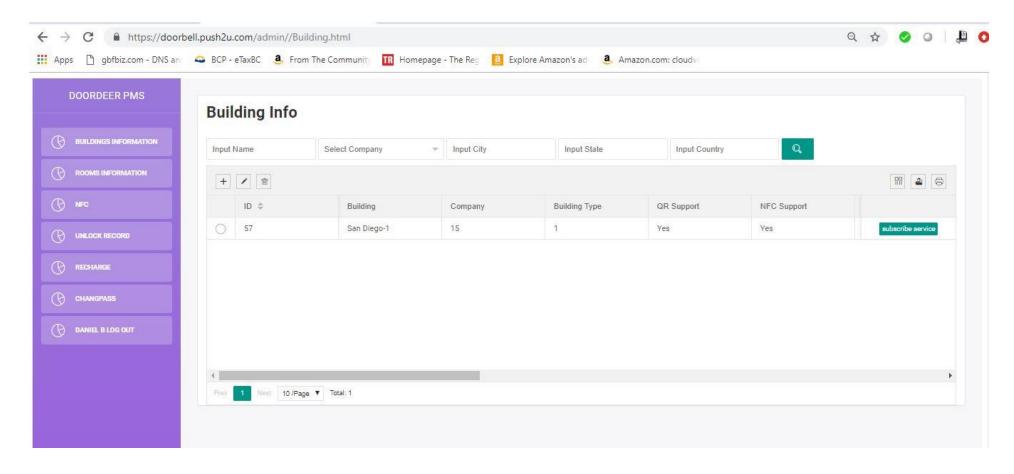

Property Manager Web Interface:

There are five main pages for Property manager account:

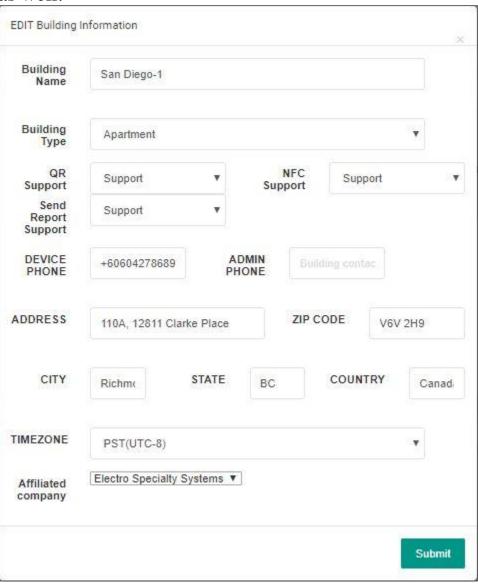

- **Building Information**--- Input this building information detail: address, property manage phone etc.
- Room Information--- Including all tenants information, name, email, phone no. and access keyfob no. etc.
- NFC--- Assign tenant access keycard or keyfob
- **Unlock record**--- For property manage to track the daily gate entry history to know who/when the gate is unlocked.
- **Changepass**--- Property manager can revise this webpage login password. The factory login password for this page is: 999999.

Building Information Page:

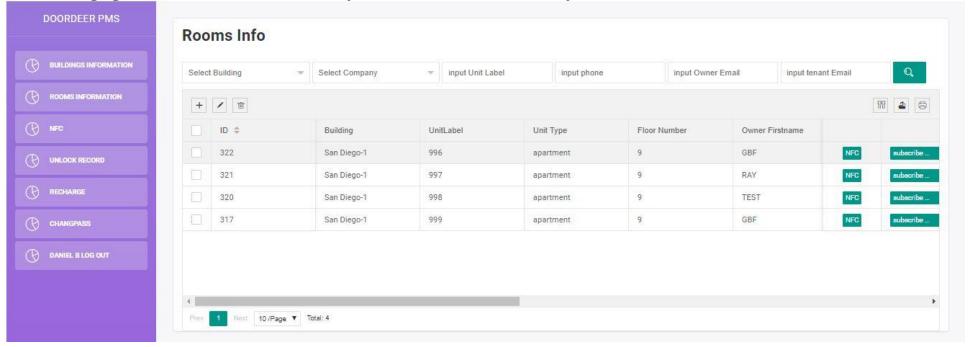

Building Editing Page:

In this page, property manage can edit building name, building address, building manager contact information as well:

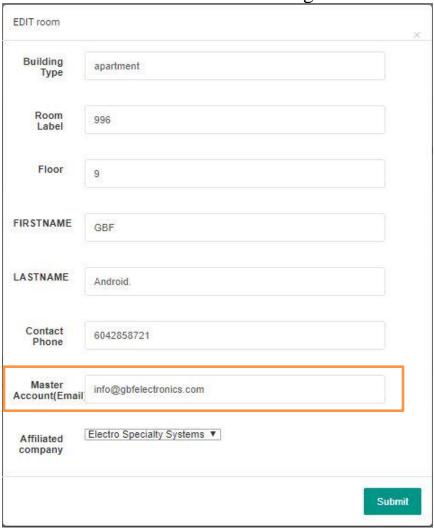

Room Information Page: (Tenant directory)

Each building property manager can add or edit, delete tenant name and information on this tenant directory. Once this page save, it will automatically save this tenant directory into the outdoor station screen.

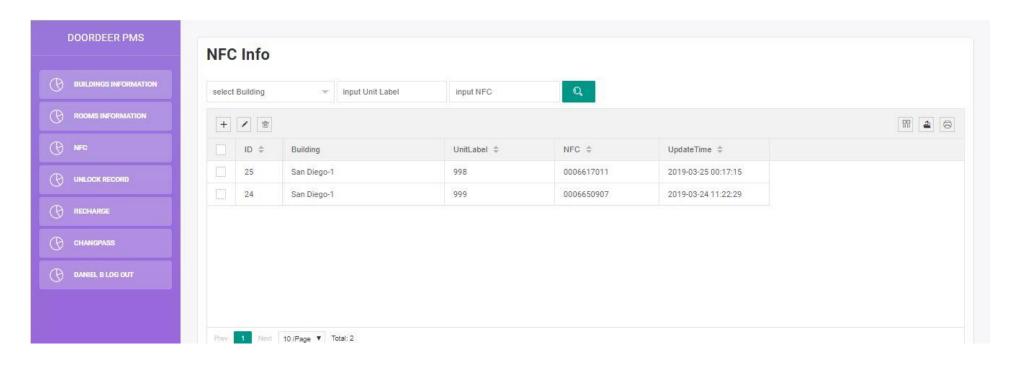

Editing Room Page:

In this page, property manager can create each tenant account and room no. in the database, each tenant will use his or her email address which is registered in this webpage to login their APP to access the intercom system.

NFC Page:

This page shows all access keycards or keyfobs for this building entry system, property manager can add or delete keycards or keyfobs from this NFC directory.

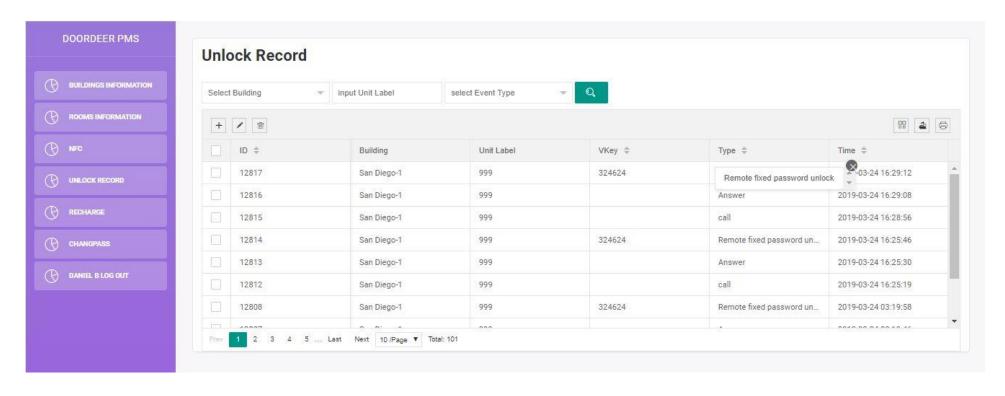

Edit NFC INFO Page:

In this page, property manager can add keycard or keyfob to this system, each access keycard or keyfob will be assigned to specific room.

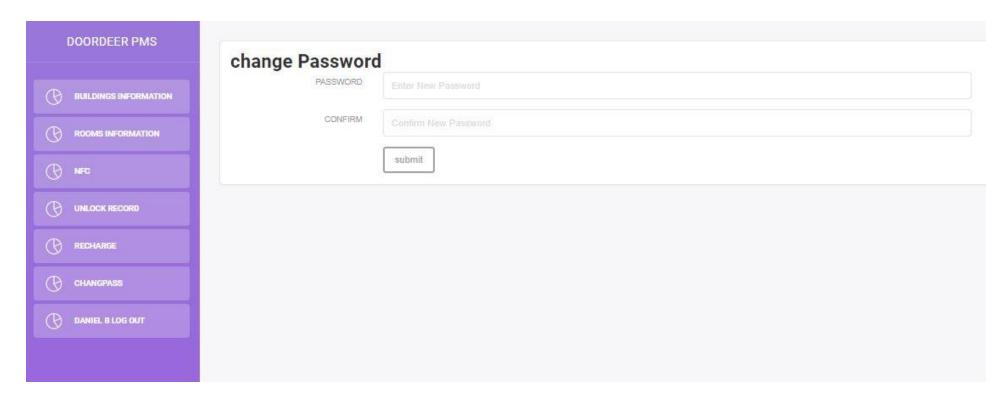

Unlock Record Page:

In this page, for property manage to track the daily gate entry history to know all activities for this smart intercom system, including who/when the gate is unlocked, who/when the door station is used etc.

Changepass Page:

In this page, property manage can change his or her login password for this page.
