Preparation

Installation

Install filter components

Remove the filter components

Remove the packaging bags of filter components.

Install the filter components

Operation

Note:

1. PM2.5 when the unit is on, the Air Quality indicator will light up to show the current air quality:

Air Quality Indicator	Green	Orange	Red
Air Quality	Good	Moderate	Unhealthy

2. To achieve better purification, make sure to keep the purifier 30 centimeters / 11.8 inches away from walls, furniture and so on and at least 50 centimeters / 19.7 inches away from metals / electrical appliances.
3. In sleep mode, press the Sleep Button once to check the current settings. Press twice to turn off the sleep mode.
4. In automatic wind mode, the unit will adjust the fan speed according to the results read by the dust sensor (dust concentration).

Operation

Power Button

Press the Power Button to turn on / off the unit.

Fan Speed Button

1. Press the Fan Button to cycle through Turbo/ High /Middle / Low wind modes.
2. Press and hold it for 3 seconds to enter automatic wind mode where all the wind indicators will light up.

Timer Button

Press the Timer Button to set 1h, 2h, 4h, 8h timer and turn the timer off.

Sleep Button

Press the Sleep Button to turn on the sleep mode. In sleep mode, all the indicators except the sleep indicator will turn off. Press twice to turn off the sleep mode.

ION Button

Press the ION Button to activate or turn off the ION mode.

Change Filter Reminder

1. Change the filter when this indicator flashes.
2. Press and hold the ION Button for 3 seconds to reset the unit after Installing of the new filter.

Cleaning and Maintenance

Clean the purifier at least once every month with a clean, dry, soft cloth. More frequent cleaning may be required depending on environmental conditions.

Note:

- Do NOT stick any foreign objects or your fingers inside of the unit.
- Do NOT use gasoline, benzene, and other abrasive or harsh cleaners, etc. on and/or in the unit while cleaning as they will damage the product.
- NEVER use alcohol or other solvents.

Maintaining the Filters

The True HEPA filter should be cleaned once each month by a vacuum cleaner.

Note:

- Filter should be replaced at least once each 3 to 6 months. More frequent cleaning and replacing may be required depending on environmental conditions.
- The air purifier works the best in a closed environment. Its performance may be compromised in a well-ventilated room.
- Air the filters under the sun for an hour before using it again if the purifier has not been used for a long time.

Removing the Filter

1. Use soft brushes to dust off the filter regularly for better purification. Don't wash it with water.
2. Replace the filter when the Change Filter Reminder flashes:

① Unplug the power source.

② Remove the rear grille.

③ Take out the old filter by pulling the tabs.

④ Install a new or the cleaned filter and put the rear grille back on.

⑤ Press and hold the ION Button for 3 seconds to reset the unit. The Change Filter Reminder will turn off.
