

Your *all-in-one platform*
to engage, reward, and retain talent

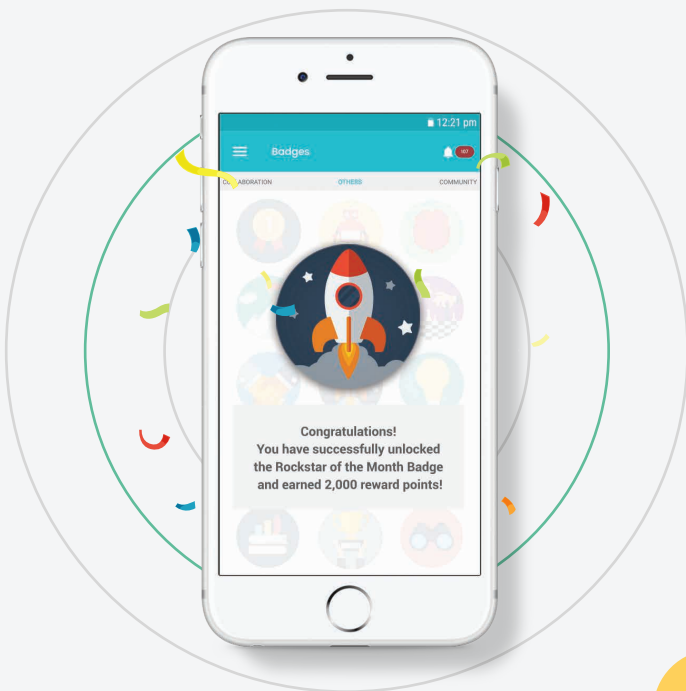

3 KEY DRIVERS TO EMPLOYEE ENGAGEMENT

Engage

"Having a close friend at work can boost employee productivity by up to 7x" - Source: Gallup

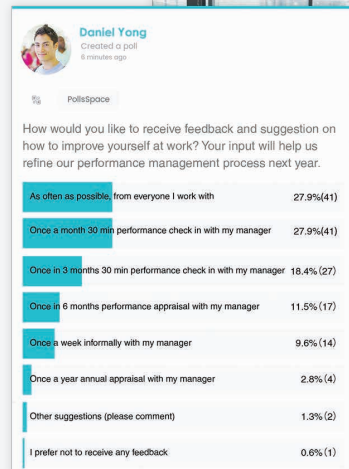

Use gamification to **improve surveys, peer feedback, and performance management** experiences. Integrate your KPI systems to provide real-time performance data to **support effective employee coaching, performance check-ins, and annual reviews.**

Retain

Understand your employees with actionable, measurable insights

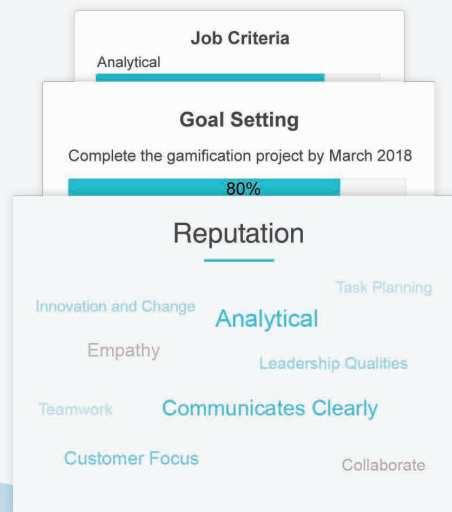

Improve how you listen to the voice of the workforce with **real time surveys, polls and quizzes**. Manage your employee engagement with data-driven, actionable insights. Coach employees to greater performance with **Feedback A.I and Agile Goal-Setting**.

Reward

A person who feels appreciated will always do more than what is expected

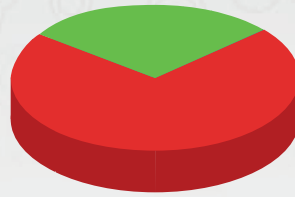

Appreciate and recognize great work, employee contribution and achievements with real world rewards. Celebrate them in **social newsfeeds**. Motivate employees to stay active. All automated on our platform.

WHY ENGAGEMENT NOW?

Make Digital Transformation Work

75% of digital transformation projects fail due to poor employee engagement and resistance to change.

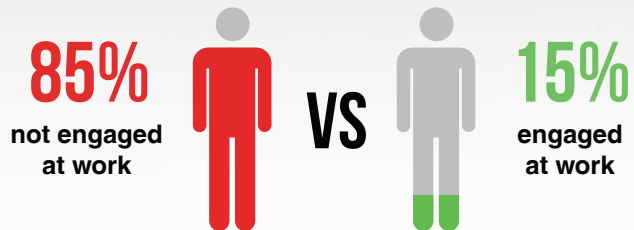

75% Digital transformation projects fail

Poor employee engagement and resistance to change.

Engagement Before Performance

A staggering **85%** of employees are not engaged at work, resulting in approximately \$7 Trillion in lost productivity annually. Want to build a high performing, agile and innovative culture in your organization? Engage your employee first.

Meet Changing Workforce Expectations

Millennials are set to be **50%** of the global workforce by 2020 (KPMG). **61%** of **Gen Z** professionals in Asia Pacific are seeking flexible and contract-based roles (PERSOLKELLY). They need to be engaged differently from traditional employees.

Integration

Our flexible platform is also available in separate components. Integrate our technology into existing systems such as Workplace by Facebook, HRIS, Slack and Atlassian JIRA.

“

What our customers says?

SelfDrvn has helped us bridge communications between the various departments in the company. It is easy to use and the main thing is that the employees enjoy using it. They like the gaming element and are very active.
