

AD Series and CO Series

Lever and cylinder compatibility

Overview

AD Series and CO Series electronic locks come standard with the Schlage® 6-pin Everest 29™ S123 keyway and two patented keys. The Everest 29 keyway's patent-protected undercut design with protection through 2029 is available in open and restricted keyway families. Patented restricted keyways, such as the Everest 29 R and T families, deliver a higher level of security by requiring authorization to access blanks for duplication. Improve both administrative and physical security with the application of Primus XP cylinders and gain the option to also employ high security UL 437 cylinders. The Everest 29 design enables a key blank that is backwards compatible to legacy Everest keyways allowing Everest 29 keys to work with existing Everest systems aiding the key system migration process.

The AD Series and CO Series can also be ordered with other popular Schlage keyways or prepared to receive Falcon® Conventional key-in-lever cylinders or Small Format Interchangeable Core (SFIC) cylinders. Less cylinder options are available to provide compatibility with Conventional, FSIC or SFIC cylinders of other manufacturers including, Sargent®, Corbin Russwin®, Medeco® and Yale®

Conventional key-in-lever
P, P6, Z,
L, L-SAR, L-FA7

Full Size Interchangeable Core
R, M, J-SAR,
J-CO6, J-CO7, J-MED,
J-YA6, J-YA7

Small Format Interchangeable Core
G7, B

Features and benefits

- The key-in-lever design of AD and CO Series fits a full range of Schlage cylinders featuring administrative security options from open to patented and patented restricted keyways¹
- Primus cylinder and key options provide enhanced physical security in the cylinder including a UL 437 listed high-security option and a patent protected key design with geographic exclusivity
- Levers are offered in a wide variety of finishes and styles
- Cylindrical, mortise, mortise deadbolt and exit trim options available
- Compatible with all Schlage Conventional, FSIC, SL (as Conventional and FSIC), and SFIC formatted cylinders including many competitive OEM cylinders
- SL cylinder option allows an Everest 29 R or legacy Everest B keyway facility to gain a Primus program level security
- AD and CO 993 exit trim is compatible with a variety of exit devices including rim style from Von Duprin, Falcon, Sargent®, Precision™, Corbin Russwin®, Dorma® and Yale®

¹ Available on AD Series only.

Lever and cylinder compatibility
