HOW TO CHARGING SPEAKER?

—— When working (but not charging) ——

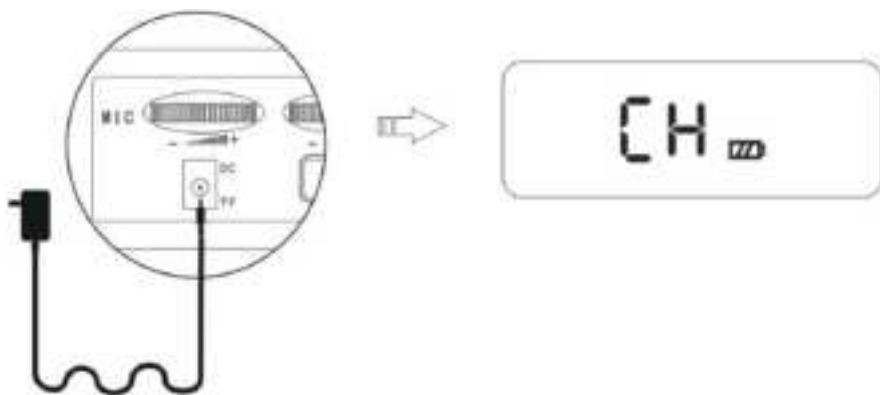

Enough Power indication: the battery sign on the screen normally on 

Low Power indication: the battery sign on the screen Blinks 

—— Charging speaker with plug included ——

In charging status: the indicator  flashes while charging;

Fully charged: the indicator  turn on solid lights after charged fully.

Please note:

- 1** Use the included 9V AC power adapter to charge the speaker internal rechargeable battery.
- 2** Plug adapter into 110~240 AC outlet. Connect the cable end into the DC 9V power input on speaker.
- 3** It will normally take 3–5 hours to fully charge the battery.

- 4 When charging is required, a voice prompt will indicate, “Low battery, please charge.” The battery indicator will blink while charging. It will stop blinking when battery is fully charged.
- 5 Recharge the battery within 48 hours of “low battery” voice prompt. In order to extend the life of the internal battery, please charge it regularly even if system is not being used.
- 6 It is suggested that you charge the internal battery an additional 1–2 hours after fully charged to extend its life.
- 7 Please DO NOT over charge the battery by leaving the system plugged in continuously. This will reduce the life of the internal rechargeable battery and could cause over heating.

HOW TO CHARGING MICROPHONE?

—— Charging speaker with plug included. ——

In charging status: the indicator shows red while charging;

Fully charged: the red indicator goes off after charged fully.
