# SOFTWARE UPGRADE 18.2 HIGHLIGHTS

## NEW

More than 400,000 codes, data, test and tips added for technicians to handle more systems like Diesel, TPMS, Electric Steering and Hybrid Power Systems with the most comprehensive OEM-specific coverage for 100 vehicle systems and 49 manufacturers.

40% of this new software upgrade covers contemporary OEM safety and advanced driver's assistance systems to help body shops, used car dealerships, repair shops and mobile diagnostic businesses to take on new opportunities as well as handle collision-related insurance requirements:

- Intelligent Cruise Control
- Occupant Classification
- Airbag
- Parking Assist Systems
- Collision Mitigation Sensor Systems
- Pedestrian Impact Detection
- Electronic Parking Brake
- Radar Sensor
- Head Up Display
- Surround View Monitor
- Lane Departure Warning
- And More

## Get The Information You Need Right On The Tool

- **New topic-specific Help for ZEUS™, VERUS® and VERDICT®**
  - The new HELP button takes users to a dedicated topics page. Topics selected have step-by-step instructions using guided overlays to make getting help easy.

## • Quick Lookups for Edge Series and ZEUS™

- **Tire and Wheel Service** – Informational reset procedures, Scanner reset procedures, Tire Fitment and Repair procedures.

At-the-fender access during tire installation to find the torque and inflation specifications offers safety benefits above just accelerated procedure speed. Properly torqued wheels and inflated tires ensure customer safety and satisfaction.

- **Oil Change and Service Resets** now included on ALL Edge series platforms in addition to ZEUS. Saves a walk to the PC to find out how much oil a vehicle takes. Eliminates leaving the bay to perform an oil change reset. All this is a game changer—it quickens an oil change, gets the job done faster and drives more profit because more jobs can be completed in a day.

# SOFTWARE UPGRADE 18.2 HIGHLIGHTS

## ENHANCED

Exclusive access to SureTrack®, providing Real Fixes and verified parts replacement records from millions of successful repair orders\*\*

Powerful bi-directional control, plus scripted functional tests to automatically run through multi-step tests in no time

Direct access from Home screen to Component Test Meter (CTM) Training including Power User Tests, How To's and more

## ALWAYS

High-performance software that starts up in less than 5 seconds, providing results in as little as 30 seconds\*\*

Auto-ID means vehicles will identify themselves to the scan tool automatically, saving time and eliminating entry errors

One-Touch Code Scan for a quick and complete health check of all available systems, plus clear codes with one touch, saving time and preventing comebacks

Exclusive Fast-Track® Guided Component Tests\*\* show how to test, where to connect and what results to look for

Continuous software options to access the most comprehensive software available for Asian, European and domestic

Comprehensive support programs, including a Customer Care hotline, extended warranty and online Training Solutions®

\*\* Eligible platforms only. See the Coverage Guide for details at [diagnostics.snapon.com/18.2](http://diagnostics.snapon.com/18.2)

## INTELLIGENT DIAGNOSTICS SOFTWARE

**Comprehensive enough to provide all the diagnostic and repair tips you need, smart enough to skip the ones you don't!**

All the functions and repair tips you need to diagnose, repair and manage any issue. But unlike any software before, it practically anticipates your next move by guiding you through every step needed to find the solution, while avoiding the steps you don't. It displays only the information that's relevant to the specific vehicle and fault code. From Technical Service Bulletins and scanner Smart Data to SureTrack® Expert Information, Intelligent Diagnostics is the most sophisticated and intuitive software we've ever created. Accessing all the Intelligent Diagnostics functions requires an applicable software agreement, which more than pays for itself through its depth of information and time savings.

*Intelligent Diagnostics is limited to eligible tools. See pages 10–15 for software purchase options.*

## SureTrack® – The Fastest Path to Fixed

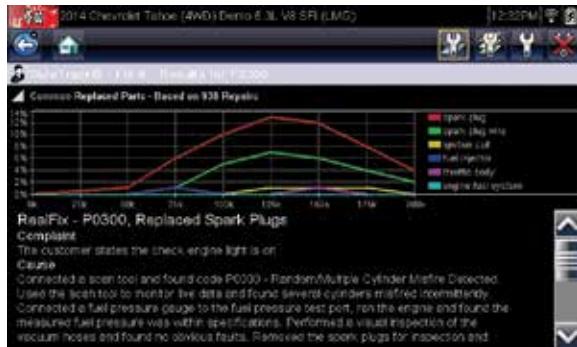

Available in Snap-on diagnostic tools and online, SureTrack delivers expert information with the latest Snap-on Software Upgrade. Get Real Fixes and verified parts replacement records harvested from millions of actual repair orders.

New content is continually added and with the latest software you instantly access:

- Verified parts replacement records showing successful fixes
- Expert information hot-linked directly from diagnostic trouble codes
- Exclusive insight based on experience from millions of repair orders
- Vehicle-specific fixes based on symptoms, codes and mileage
- Definitive, reliable answers, validated by SureTrack expert technicians

*NOTE:* Online access requires authorization code, which is included on the customer's software purchase receipt.

## Avoid Gaps in Coverage and Get All New Features

### Live 3-Year Data Plan†

Three years of Intelligent Diagnostics software with complete data services, all available domestic, Asian and European upgrades, SureTrack, three-year warranty and online upgrades for eligible platforms.

### 1-Year Coverage Upgrade Program†

Twelve months of all available coverage for domestic, Asian and European vehicles, including Intelligent Diagnostics with complete Data Services for eligible platforms, plus SureTrack and online software upgrades.

### 6-Month Coverage Upgrade

Six months of all available coverage for domestic, Asian and European vehicles, plus SureTrack.

*For pricing and availability see pages 10–15*

## Sell More Software Faster with CE+

You can sell both regular software upgrades and 1-year program enrollments using Chrome Express+. Enjoy the independence and freedom to have an assistant do the selling while you tend to other customers, plus save time and offer customers the ultimate convenience to download and install software "over the air".

See page 16 for How to Sell with CE+.

# EXTENDED WARRANTY PROTECTION

Snap-on offers peace of mind and protection for some of your customer's most valued business assets – their Snap-on diagnostic tools. Snap-on is proud to offer this comprehensive and flexible extended warranty coverage for ZEUS™ and the VERUS®, MODIS™, SOLUS™, ETHOS® and VANTAGE® families of products for an additional 12, 24 or 36 months<sup>11</sup> – it's your customer's choice.

## Here are some key reasons why the Extended Warranty Program is right for your customer:

- Coverage equal to the original factory warranty
- Continuous protection for pennies a day
- Flexible financing available
- Protection against future parts and labor cost increases
- Increased resale value
- Can pay for itself in cost savings with just one repair
- Provides years of worry-free use
- 12, 24 or 36 month extended coverage<sup>11</sup>
- Genuine Snap-on service parts and expert service technicians
- Complimentary shipping and handling

The Snap-on Extended Warranty Program is the most comprehensive extended warranty in the business that offers the same complete coverage as the original warranty. Whether customers choose 12, 24 or the 36 month extension, its universal protection remains the same!

<sup>11</sup> Extended Warranty Program available with new diagnostic tool purchases as well as any diagnostic tool while under its original Snap-on warranty

# OPTIONAL HARLEY-DAVIDSON®

## Vehicle Software Coverage and Smart Vehicle Interface P/N EAK0347L01A List Price \$750

Offer diagnostics coverage for Harley-Davidson motorcycles compatible with Snap-on® diagnostic platforms with Upgrade 18.2. Platforms include ZEUS™ and VERUS®, VERDICT®, MODIS™, SOLUS™ and ETHOS® family platforms with current software.

Deliver comprehensive coverage for all major systems on 2000 and newer motorcycles, including: Engine, ABS, Hands-free, Security, Turn Signal, Hand Control Module, Body Controls, Instrument, Speedometer, Tachometer.

The Smart Vehicle Interface includes both Harley-Davidson adapters in one, and provides secure activation for scan tool software. A handy support hook helps keep the Smart Interface safe from hot pipes and moving parts.

Read and clear OEM-specific fault codes. Perform One-Touch Code Scan for all available systems. Display live data in digital and graphing views. Perform powerful functional tests.

Control vehicle systems and verify component operation with a wide range of functional tests and more, such as obtaining the mileage at which a code was set with new Engine Extended DTC Data Coverage. And that's not all, get... Radio Configuration, Throttle Position Test, Cruise Control Diagnostics, Idle Speed Adjust, Bleed Brakes, ABS Actuation, Fuel Pump, Turn Signals, Horn, Reset PIN, Reprogram Key Fobs, Alarm, Side Car Configuration, Dash Lights and LCD Segments, Speedometer and Tachometer.

## Customers Who Are Interested in This Coverage

- Motorcycle Repair Specialty Shops
- Technicians who do motorcycle side jobs
- Any technician who owns a Harley-Davidson

**MICROSCAN<sup>®</sup> III EESC720 ..... \$439.95**

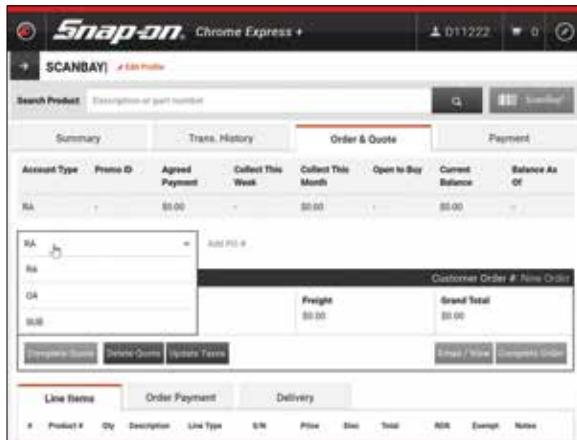

# HOW TO SELL WITH CE+

## Start Here

Download the “Snap-on CE+ Scanner” app from the Apple app store (Apple devices only at this time)

1. Log into CE+
2. Select the customer and start a new order and select account Type: RA, EC or SUBS
3. Connect device
4. Launch ScanBay
5. Open the CE+ Scanner app
6. Scan the unit’s barcode\*. Press the “Back” button on the top left of the screen once the barcode has been scanned successfully

## For 6-Month Coverage Upgrade Software

7. Select the desired software product and any accessories to add to the order
8. Once all items are on the order, click “Complete Order”

## For 1-Year Coverage Upgrade Program\*\*

### Enroll New Device

7. Select the product to be subscribed and any accessories to be added to the order
8. Select <OK> in Data Ready for Contract page to return to the Order and Quote tab

### Complete Enrollment Contract

9. Select the <Complete Order> button to navigate to the Subscription tab and review the estimated Monthly Payment. Select the <Complete Order> button again
10. Enter optional Direct Debit information
11. Follow prompts to open, review, sign and complete the Contract (similar to the EC process). Select <Submit>
12. Email SUB Order Receipt and contract copy to the customer

### Complete RA Order

For Enrollment Fee and optional Accessories

13. See open RA Order containing the Enrollment Fee and any selected accessories. Review, add more items and select <Complete Order>
14. Complete the “Please have customer enter their initials” screen with your customer
15. Email customer the additional RA order receipt

Email receipts include instructions on how to download the software upgrade using ShopStream Connect or ShopStream Updater Tool

\* Barcode resides under the grip of the VERUS® platforms except VERUS PRO. The barcode on the VERUS PRO is found on its base/bottom

\*\* Live 3-Year Data Plan sale not available using CE+. Use Chrome to sell Live for eligible platform products

## 1-Year Program to 1-Year Program

1. Log into Chrome
2. Select the customer, start a new order and for Trade-In select previous subscription/Debtor ID in Account Type  
<SUB – [followed by the current Debtor Number]>

### Subscribe New Device

3. Connect new device
4. Launch ScanBay
5. Select the subscription product and any accessories to be added to the order
6. In the next windows follow the prompts to review your selection
7. Select <Finish> to complete the Agreement

### Complete SUB Contract

8. On the Subscription tab, review the estimated Monthly Payment.  
Select <Print Contract> to open and display the Subscription Contract
9. Enter optional Direct Debit information
10. Follow prompts to open, review, sign and complete the Contract (similar to the EC process). Click <Print/Submit>
11. Close the contract PDF window

### Programming New Device

12. Choose the <Complete Order> button to continue the transaction
13. ScanBay wizard screens are displayed. Follow the prompts to complete software programming

### Unsubscribe Old Device

In the Select Product window, choose the platform type. Connect the originally subscribed device. Select <Next> again, follow prompts. On the Select Action screen choose <Next> to cancel the subscription and convert the old unit into upgradeable Truck Stock

### Complete RA Order

After selecting <Finish>, you are returned to Chrome where the subscription enrollment fee and accessories for the newly enrolled device are displayed on a separate RA order. Review, add more items and complete the sale

### Most Important Step

Perform ScanBay Sync to communicate transaction to ScanBay

## 1-Year Program to Live 3-Year Data Plan

1. Log into Chrome
2. Select the customer, start a new order and select RA or EC Account Type
3. Connect new device
4. Launch ScanBay
5. Select <3-Year Data Plan>
6. Follow ScanBay prompts
7. Connect device being traded in to unsubscribe and select <Next>
8. The ScanBay wizard provides prompts to complete the transaction

### Most Important Step

Perform ScanBay Sync to communicate transaction to ScanBay

# INSTALL SOFTWARE UPGRADES FASTER

## ScanBay™ Software Upgrade using MicroSD Card

### For MODIS, SOLUS, ETHOS and VANTAGE family platforms

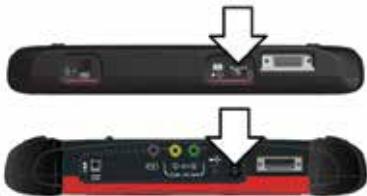

The following instructions describe how to upgrade diagnostic tool software using the tool's MicroSD card and your Chrome/ScanBay laptop.

#### **IMPORTANT! Read Before Proceeding**

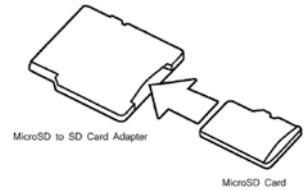

- To perform this upgrade a MicroSD-to-SD card adapter is required.
- The diagnostic tool must be powered by the AC power supply during the upgrade process. If the tool loses power during the upgrade process, the tool may be damaged.
- The diagnostic tool MUST have been placed into “Connect-to-PC” mode and connected to a PC with its MicroSD card inserted at least once before.
- Do NOT turn the diagnostic tool on BEFORE inserting the card. The diagnostic tool MUST be off when the card is inserted.
- Secure digital cards (MicroSD, SD, etc.) are sensitive to electrostatic discharges (ESD) and can easily be damaged by static electricity. Before handling the card, ground yourself by touching a metal object that is grounded to discharge any static electricity.
- The diagnostic tool is inoperable without the MicroSD card. Do not lose, damage, or allow the card to fall into the housing during removal or installation.
- Be careful when inserting the Micro SD card into the diagnostic tool. If the card is inserted at an angle the card may be damaged.

#### **Upgrade Instructions**

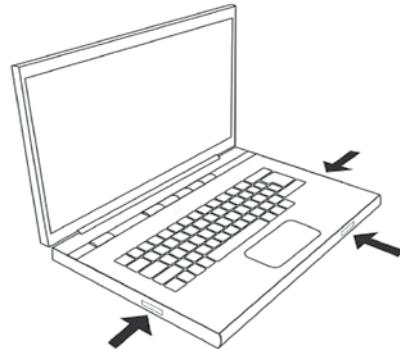

1. Turn off the diagnostic tool.
2. Remove the MicroSD card from the diagnostic tool by gently pressing it down and then releasing. The card will pop-up and can be removed.

3. Insert the MicroSD card into the MicroSD-to-SD card adapter.

4. If required, remove the SD slot protector (simulated card) from the Chrome/ScanBay laptop card slot, then insert the MicroSD-to-SD card adapter (with MicroSD card) into the laptop card slot.
5. Start ScanBay and complete the software upgrade delivery process.
6. After the upgrade is complete, remove the MicroSD-to-SD card adapter from the laptop, and remove the MicroSD card from the adapter.
7. With the diagnostic tool off, insert the MicroSD card into the diagnostic tool.
8. Connect the AC power supply to the diagnostic tool. The tool will automatically turn on.
9. Follow the on-screen prompts to complete the upgrade installation process on the diagnostic tool.
10. If required, reinstall the SD slot protector (simulated card) into the laptop SD card slot to prevent damage.

## ZEUS, VERUS Edge, VERUS PRO, VERDICT

1. **Communication or Software Challenge?** Disconnect the scanner or wireless scan module from vehicle and restart the diagnostic suite.
2. **Other Communication Issues?** Try second DA-4 Cable (except ZEUS). Verify the power LED on the DA-4 Cable is illuminated (does not apply to VERUS). For ZEUS verify a green LED illuminates when you plug the compact scan module into the OBD connector of the vehicle. Verify vehicle has 12 volt and ground at the correct pin locations (pin #4 is ground and pin #16 is 12 volt on standard 16-pin OBD-II style connectors).
3. **Coverage Verification?** Check the software version on the tool and refer to the Coverage Guide to verify coverage support of vehicle and system.
4. **General Performance Issues?** Check for viruses at [Snap4help.com/virus](http://Snap4help.com/virus) (VERUS PRO and VERDICT) or perform a Microsoft Security Essentials scan (VERUS Edge and ZEUS). The VERUS Edge and ZEUS should be rebooted everyday (Note: Sleep and Wake is NOT a reboot).
5. **Wireless Scanner Calling for Keys?** Verify the wireless scan module is Bluetooth® paired to the scanner. On ZEUS a blue LED light will blink once the Compact Scan Module has connected to the platform.

## MODIS Edge, MODIS Ultra, SOLUS Edge, SOLUS Ultra, ETHOS Edge, ETHOS PRO, ETHOS Tech, ETHOS Plus

1. **Platform or Software Challenge?** Disconnect from vehicle, power off for at least 45 seconds and reboot the unit.
2. **Other Communication Issues?** Try second DA-4 Cable. Verify the power LED on the DA-4 Cable is illuminated which indicates the vehicle has 12 volt and ground at the correct pin locations (pin #4 is ground and pin #16 is 12 volt on standard 16-pin OBD-II style connectors).
3. **Coverage Verification?** Check the software version on the tool and refer to the Coverage Guide to verify coverage support of vehicle and system.
4. **Unit is Locked Up or Will Not Power Down?** Press and hold the power button until unit powers down, then reboot. After connecting to the vehicle wait for a second beep before navigating to the vehicle selection in the scanner.
5. **Correct Connection to Vehicle?** Verify DA-4 Cable or vehicle-specific adapter being used match what is being requested by the software.
