

SAFETY DATA SHEET

1. Identification

Product identifier	Cidex® OPA Concentrate	
Other means of identification		
SDS number	11340-US	
Product number	20398	
Recommended use	High level disinfection.	
Recommended restrictions	None known.	
Manufacturer/Importer/Supplier/I	Distributor information	
Company name	Advanced Sterilization Products	
Address	33 Technology Drive	
	Irvine, CA 92618	
Country	US	
Telephone number	1-888-783-7723	
E-mail	ASP-SDS@asp.com	
24 Hour Emergency Telephone	CHEMTREC US: 1-800-424-9300 CCN 79587	4
	CHEMTREC International: +1 703-741-5970	
2. Hazard(s) identification		
Physical hazards	Flammable liquids	Category 3
Health hazards	Skin corrosion/irritation	Category 1B
	Serious eye damage/eye irritation	Category 1
	Sensitization, skin	Category 1
Environmental hazards	Hazardous to the aquatic environment, acute hazard	Category 1
	Hazardous to the aquatic environment, long-term hazard	Category 1
OSHA defined hazards	Not classified.	
Label elements		>
Signal word	Danger	
Hazard statement	Flammable liquid and vapor. Causes severe sl skin reaction. Very toxic to aquatic life with lon	
Precautionary statement		
Prevention	Keep away from heat/sparks/open flames/hot closed. Ground/bond container and receiving e electrical/ventilating/lighting equipment. Use of measures against static discharge. Do not brea clothing/eye protection/face protection. Wash clothing must not be allowed out of the workpla	equipment. Use expl nly non-sparking too athe mist/vapors. We thoroughly after han
Response	If swallowed: Rinse mouth. Do NOT induce vo contaminated clothing. Rinse skin with water/s advice/attention. Wash contaminated clothing and keep comfortable for breathing. If in eyes:	hower. If skin irritation before reuse. If inha

Cidex® OPA Concentrate 952858 Version #: 03 Revision date: 23-June-2020 Issue date: 01-May-2020 SDS-11340-US. Rev. A

Storage	Store in a well-ventilated place. Keep cool. Store locked up.
Disposal	Dispose of contents/container in accordance with local/regional/national/international regulations.
Hazard(s) not otherwise classified (HNOC)	None known.
Supplemental information	The product has been reported to cause anaphylactic-like reactions.

3. Composition/information on ingredients

Mixtures

delayed

Chemical name	CAS number	%
Ethanol	64-17-5	20
Phthalaldehyde	643-79-8	5.8

Composition comments All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume. Components not listed are either non-hazardous or are below reportable limits. 4. First-aid measures Inhalation Move to fresh air. Call a physician if symptoms develop or persist. Skin contact Remove contaminated clothing immediately and wash skin with soap and water. Call a physician or poison control center immediately. Chemical burns must be treated by a physician. Wash contaminated clothing before reuse.

Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if Eye contact present. Continue rinsing. Call a physician or poison control center immediately. Ingestion

Call a physician or poison control center immediately. Rinse mouth. Do not induce vomiting. If vomiting occurs, keep head low so that stomach content doesn't get into the lungs.

Burning pain and severe corrosive skin damage. Causes serious eye damage. Symptoms may Most important include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including symptoms/effects, acute and blindness could result. Sensitization. May cause anaphylactic shock. Ingestion may produce burns to the lips, oral cavity, upper airway, esophagus and possibly the digestive tract.

Indication of immediate Provide general supportive measures and treat symptomatically. Thermal burns: Flush with water medical attention and special immediately. While flushing, remove clothes which do not adhere to affected area. Call an ambulance. Continue flushing during transport to hospital. Chemical burns: Flush with water immediately. While flushing, remove clothes which do not adhere to affected area. Call an ambulance. Continue flushing during transport to hospital. Keep victim under observation. Symptoms may be delayed.

Take off all contaminated clothing immediately. Ensure that medical personnel are aware of the

material(s) involved, and take precautions to protect themselves. Wash contaminated clothing

General information

treatment needed

5. Fire-fighting measures

Suitable extinguishing media	Water fog. Alcohol resistant foam. Dry chemical powder. Carbon dioxide (CO2).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	Vapors may form explosive mixtures with air. Vapors may travel considerable distance to a source of ignition and flash back. During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Fire fighting equipment/instructions	In case of fire and/or explosion do not breathe fumes. Move containers from fire area if you can do so without risk.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.
General fire hazards	Flammable liquid and vapor.

6. Accidental release measures

Personal precautions, Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Wear appropriate protective equipment and protective equipment and clothing during clean-up. Do not breathe mist/vapors. Do not touch emergency procedures damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

before reuse.

Methods and materials for containment and cleaning up	Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Keep combustibles (wood, paper, oil, etc.) away from spilled material. Take precautionary measures against static discharge. Use only non-sparking tools. This product is miscible in water. Prevent product from entering drains.
	Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Use a non-combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal. Following product recovery, flush area with water.
	Small Spills: Absorb with earth, sand or other non-combustible material and transfer to containers for later disposal. Clean surface thoroughly to remove residual contamination.
	Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.
Environmental precautions	Avoid release to the environment. Inform appropriate managerial or supervisory personnel of all environmental releases. Prevent further leakage or spillage if safe to do so. Avoid discharge into drains, water courses or onto the ground.
7. Handling and storage	
Precautions for safe handling	Do not handle, store or open near an open flame, sources of heat or sources of ignition. Protect material from direct sunlight. When using do not smoke. Explosion-proof general and local exhaust ventilation. Take precautionary measures against static discharges. All equipment used when handling the product must be grounded. Use non-sparking tools and explosion-proof equipment. Do not breathe mist/vapors. Do not get in eyes, on skin, or on clothing. Avoid prolonged exposure. Wear appropriate personal protective equipment. Avoid release to the environment. Observe good industrial hygiene practices.
Conditions for safe storage, including any incompatibilities	Store locked up. Keep away from heat, sparks and open flame. Prevent electrostatic charge build-up by using common bonding and grounding techniques. Store in a cool, dry place out of direct sunlight. Store in tightly closed container. Store in a well-ventilated place. Keep in an area equipped with sprinklers. Store away from incompatible materials (see Section 10 of the SDS). Recommended storage temperature: 15 - 30 °C.

8. Exposure controls/personal protection

Occupational exposure limits

propriate engineering trols	Explosion-proof general and local exhaust ventilation. Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Eye wash facilities and emergency shower must be available when handling this product.		
vidual protection measure	es, such as personal protective equip	nent	
Eye/face protection	Wear safety glasses with side shield recommended.	ls (or goggles) and a face shield	. Face shield is

952858 Version #: 03 Revision date: 23-June-2020 Issue date: 01-May-2020 SDS-11340-US. Rev. A

Skin protection	
Hand protection	Wear appropriate chemical resistant gloves. Nitrile or butyl rubber gloves are recommended. Be aware that the liquid may penetrate the gloves. Frequent change is advisable. Suitable gloves can be recommended by the glove supplier.
Skin protection	
Other	Wear appropriate chemical resistant clothing. Use of an impervious apron is recommended.
Respiratory protection	If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
General hygiene considerations	When using do not smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Contaminated work clothing should not be allowed out of the workplace.

9. Physical and chemical properties

••••••••••••••••••••••••••••••••••••••	
Appearance	
Physical state	Liquid.
Form	Liquid.
Color	Dark blue. Clear.
Odor	Alcohol-like.
Odor threshold	Not available.
рН	7.5
Melting point/freezing point	< 32 °F (< 0 °C)
Initial boiling point and boiling range	190 °F (87.8 °C)
Flash point	90.0 °F (32.2 °C)
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or exp	losive limits
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Explosive limit - lower (%)	Not available.
Explosive limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	0.99
Relative density temperature	68 °F (20 °C)
Solubility(ies)	
Solubility (water)	Soluble in water.
Partition coefficient (n-octanol/water)	0.677
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.
10. Stability and reactivity	
Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions

Chemical stability Material is stable under normal conditions.

Cidex® OPA Concentrate

952858 Version #: 03 Revision date: 23-June-2020 Issue date: 01-May-2020 SDS-11340-US. Rev. A

Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Avoid heat, sparks, open flames and other ignition sources. Avoid temperatures exceeding the flash point. Contact with incompatible materials.
Incompatible materials	Acids. Alkali metals. Oxidizing agents. Reducing agents.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation	May cause irritation to the respiratory system. Prolonged inhalation may be harmful.		
Skin contact	Causes severe skin burns. May cause an allergic skin reaction.		
Eye contact	Causes serious eye damage.		
Ingestion	Causes digestive tract burns.		
Symptoms related to the physical, chemical and toxicological characteristics	Burning pain and severe corrosive skin damage. Causes serious eye damage. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Sensitization. May cause anaphylactic shock. Ingestion may produce burns to the lips, oral cavity, upper airway, esophagus and possibly the digestive tract.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Local disposal regulationsDispose in accordance with all applicable regulations.Hazardous waste codeThe waste code should be assigned in discussion between the user, the producer and the waste disposal company.Waste from residues / unused productsDispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner.Contaminated packagingSince emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or	Disposal instructions	Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Incinerate the material under controlled conditions in an approved incinerator. Do not allow this material to drain into sewers/water supplies. Do not contaminate ponds, waterways or ditches with chemical or used container. Dispose of contents/container in accordance with local/regional/national/international regulations. CIDEX OPA Concentrate IN USE solution can be discarded down hospital drains per hospital policy. Check local disposal requirements. Undiluted CIDEX OPA Concentrate may be neutralized with 334 grams of glycine per 5 liters. After a reaction time of 24 hours, the neutralized solution can be discarded in accordance with local disposal requirements for non hazardous waste. Container disposal: Discard empty container as hazardous waste per local regulations.
Waste from residues / unused productsDispose of in accordance with local regulations. Empty containers or liners may retain some product residues.
