STEEL STRIPS WHEELS LIMITED

4. Members / proxies / authorized representatives should bring the duly filled Attendance Slip enclosed herewith to attend the meeting. Route map of the venue of the Meeting (including prominent land mark) is annexed to the notice.
5. In case of joint holders attending the meeting, only such joint holder who is higher in the order of the names will be entitled to vote.
6. The Register of Members and Share Transfer Books of the Company will remain closed from **22.09.2018 to 28.09.2018** (both days inclusive) for the purpose of Annual General Meeting and for determining the names of members entitled to dividend, if declared at this meeting.
7. The dividend, as recommended by the Board of Directors, if declared at this Annual General Meeting will be paid within a period of 30 days from the date of declaration, to those members whose name will appear on the register of members/depository records as at the closing hours of business on **21.09.2018**.
8. Reserve Bank of India has introduced National Electronic Clearing Service (NECS) to facilitate credit of dividend directly to the shareholder's bank account. This facility eliminates loss of dividend warrants sent by post due to pilferage in transit, delay in receipt of dividend warrants and ensures quick credit of the dividend. Members holding shares in electronic form may note the bank particulars registered against their respective depository accounts will be used by the Company for payment of dividend. The Company or its Registrar and Transfer Agents cannot act on any request received directly from the members holding shares in electronic form for any change of bank particulars or bank mandates. Such changes are to be advised only to the Depository Participant of the members. Members holding shares in physical form and desirous of either registering bank particulars or changing bank particulars already registered against their respective folios for payment of dividend are requested to write to Company/ Registrar and Transfer Agents of the Company.
9. Members holding shares in electronic form are requested to intimate immediately any change in their address to their Depository Participants with whom they are maintaining their De-mat accounts. Members holding shares in physical form are requested to advise any change in their address along with Pin code number and proof immediately to the Company/ Registrar and Transfer Agents of the Company.

The Securities and Exchange Board of India (SEBI) has mandated the submission of Permanent Account Number (PAN) by every participant in securities market. Members holding shares in electronic form are, therefore, requested to submit the PAN to their Depository Participants with whom they are maintaining their demat accounts. Members holding shares in physical form can submit their PAN details to the Company/Registrar and Share Transfer Agent.

In reference to SEBI circular no. SEBI/HO/MIRSD/DOP1/CIR/P/2018/73 dated April 20, 2018, in which SEBI has directed all the listed entities to record the PAN and Bank Account Details of all their shareholders holding shares in physical mode through their RTA. Accordingly, your Company has initiated steps for registering the PAN details of all the shareholders (including joint holders, if any) and the Bank Account Details of the registered shareholders. Members are requested to submit their KYC details with the Registrar and Share transfer agent of the Company.

Electronic copy of the Annual Report for 2017-18 is being sent to all the members whose email IDs are registered with the Company/Depository Participant(s) unless any member has requested for a physical copy of the report. For members who have not registered their email address, physical copies of the Annual Report for 2017-18 are being sent by the permitted mode.

Members who have not registered their e-mail addresses so far are requested to register their e-mail addresses with Registrar and Share Transfer Agents of the Company/ Depository Participant (s), for receiving all communication including Annual Report, Notices, Circulars, etc from the Company electronically.

Members may also note that the Notice of the 32nd Annual General Meeting and the Annual Report for 2017-18 will also be available on the Company's website www.sswlindia.com for their download. The physical copies of the aforesaid documents will also be available at the Company's Registered Office for inspection during normal business hours (9.00 am to 5.00 pm) on working days.

10. The Company is maintaining the "INVESTORS SERVICE CELL" at its Head Office at SCO 49-50, Sector 26, Madhya Marg, Chandigarh 160019.
11. Members having any queries relating to Annual Report are requested to send their queries at least seven days before the date of the Meeting.
12. Members can inspect the register of directors and key managerial personnel and their shareholding, required to be maintained under Section 170 of the Companies Act, 2013 and register of contracts or arrangements in which the directors are interested, to be maintained under Section 189 of the Companies Act, 2013 during the course of the meeting at the venue.
13. This year the Unpaid/Unclaimed Dividend for the financial year 2010-11 shall be transferred to the "INVESTORS EDUCATION AND PROTECTION FUND" (IEPF). The due date of such transfer is 5th November, 2018. Members who have not encashed their dividends are requested to claim the dividend from the Company immediately.

As per Section 124(6) of the Act read with the IEPF Rules as amended, all the shares in respect of which dividend has remained unpaid/unclaimed for seven consecutive years or more are required to be transferred to Demat Account of IEPF Authority. The Company has sent notice to all the members whose Dividends are lying unpaid / unclaimed against their name for seven consecutive years or more. Members are requested to claim the same on or before 4th November, 2018. In case the dividends are not claimed by the said date, necessary steps will be initiated by the Company to transfer shares held by the members to IEPF without further notice. Please note that no claim shall lie against the Company in respect of the shares so transferred to IEPF. It may also be noted that unpaid/unclaimed dividend for the financial year 2009-10 has been transferred by the Company to IEPF Authority.

The Members/Claimants whose shares and unclaimed dividends have been transferred to IEPF may claim the same from IEPF by submitting an online application in the prescribed Form IEPF-5 available on the website www.iepf.gov.in and sending a physical copy of the same duly signed to the Company along with the requisite documents enumerated in the Form IEPF- 5. Members can file only one consolidated claim in a financial year as per the IEPF Rules.

Pursuant to the provisions of Investor Education and Protection Fund (Uploading of Information regarding unpaid and unclaimed amounts lying with Companies) Rules 2012, the Company has uploaded the details of unpaid and unclaimed amounts lying with the Company as on 28th September, 2017 (date of last Annual General Meeting) on the website of the Company (www.sswlindia.com) and also on the website of the Ministry of Corporate Affairs.

14. M/s Link Intime India Pvt. Limited, at 44 Community Center, 2nd Floor, Naraina Industrial Area, Phase-I , Near PVR Naraina, New Delhi - 110028 are acting as the common agency to carry out the dematerialization and physical transfer of shares. The shareholders are requested to send the shares for transfer at the above-mentioned address of the Registrar.

15. **Voting through electronic means**

In compliance with the provisions of Section 108 of the Companies Act, 2013 and Rule 20 of the Companies (Management and Administration) Rules, 2014 as amended from time to time and as per Regulation 44 of the SEBI (Listing Obligations And Disclosure Requirements) Regulations, 2015 and any amendment thereto, the Company is pleased to provide members, a facility to exercise their right to vote on the resolutions proposed to be passed in the 32nd Annual General Meeting (AGM) by electronic means through remote e-voting services provided by Central Depository (Services) India Limited (CDSL). - (i) *The % of shares pledged/encumbered represents % of shares pledged/encumbered as a % of the total Shares of the Company.
- (ii) **Steel Strips Leasing Ltd (now known as Steel Strips Industries Ltd), Munak Financiers P. Ltd, Steel Strips Ltd and S.A. Holdings P. Ltd (now known as S.J. Mercantile P. Ltd) have sold 500, 400, 300 and 50 shares (totaling 1250 shares) respectively long back, but not yet lodged by the purchasers in public category with the Company. These shares are still standing in the name of above stated promoters in physical forms in member register.
- Further as per our member register, Munak International Pvt. Ltd (MIPL) is holding 2250 shares. However out of this, 50 shares have already been sold by MIPL long back, however the same is still outstanding in its name.
- (iii) During the financial year 2017-18, the Company has allotted 22750 equity shares under Employee Stock Option Scheme 2014 (ESOS-2014), consequently paid up capital of the Company has been increased from Rs. 15,53,35,200/- to Rs. 15,55,62,700/-. Therefore % of shareholding of certain promoters slightly reduced as on 31.03.2018.

MANAGEMENT

DISCUSSION & ANALYSIS

The Indian economy seems to have started on the road to recovery as it reclaimed the position of the fastest growing economy. According to data released by the Central Statistics Office (CSO) India's Gross Domestic Product (GDP) grew by 7.7 per cent in the fourth quarter of fiscal year 2017-18. Courtesy to the rise in the GDP growth in the quarter ended March 2018, India surpassed China's GDP growth of 6.8 per cent reported for the quarter ended March 2018.

The automobile industry is one of the key drivers that boost the economic growth of the country. Since the de-licensing of the sector in 1991 and the subsequent opening up of 100 percent FDI through automatic route, Indian automobile sector has come a long way. Today, almost every global auto major has set up facilities in the country. The world standing for the Indian automobile sector, as per the Confederation of the Indian industry is as follows:

- Largest three-wheeler market
- Second largest two-wheeler market
- Tenth largest passenger car market
- Fourth largest tractor market
- Fifth largest commercial vehicle market
- Fifth largest bus and truck segment

Future Trends in the Automobile Industry

As the auto-show starts, the industry promised a blend of technology and automotive. With the recession trend breaking its leashes from the past two years, 2016 is expected to get back on track with the sales of automobiles in the country.

- Almost Self-governing cars are predicted to be on the streets by 2020
- More than half the cars on the streets are going to be powered by diesel by 2020
- Industry watcher Gartner indicates that 30 percent of motorists want parking info. The facility is likely to come up after glitches in the infrastructure catch up.
- High Performance Hybrid cars are likely to gain greater popularity among consumers.

The Indian automobile industry has a prominent future in India. Apart from meeting the advancing domestic demands, it is penetrating the international market too. Favored with various benefits such as globally competitive auto-ancillary industry; production of steel at lowest cost; inexpensive and high skill manpower; entrenched testing and R & D centre etc., the industry provides immense investment and employment opportunities

KEY HIGH GROWTH POTENTIAL FOR SSWL

Your company has taken the capacity to a new high to target maximum market share and global footprint in a growing automobile market globally. The alloy wheel segment is expected to add healthy Rs.480-500 crore to the revenue in FY 2019-20 with 85% utilization and we expect this to happen in FY 2019-20 with higher profitability matrix adding to company financials. The additional CV expansion was done and we expect this to add additional Rs. 400 crore the revenue in FY 2018-19.

Indian Automobile Niche

Automobile makers have exited FY 2017-18 on a strong note, with most segments reporting a strong double-digit growth in domestic sales.

With the exception of passenger vehicles, which grew at 7.89 per cent, segments, including commercial vehicles, two and three-wheelers, have grown in double-digits. Sales of passenger and commercial vehicles, two and three-wheelers hit a new record during the year.

Industry body, the Society of Indian Automobile Manufacturers (SIAM), expects passenger vehicle sales to grow at a high single-digit in FY 2018-19, while commercial vehicles are likely to grow at low double-digit. Within two-wheelers, motorcycle sales could moderate in the current fiscal.

Passenger vehicles (cars, utility vehicles and vans) closed the year with sales of 3.28 million units, growing at 7.89 per cent, against 9.23 per cent in FY 2016-17. Cars grew at 3.33 per cent to 2.17 million units, while utility vehicles expanded at a healthy 21 per cent to 0.92 million units. Total production of passenger vehicles crossed 4 million for the first time during the year in March,2018, while sales grew 6.38 per cent to 300722 units. Around 747287 units were exported.

The automobile industry expanded even as it was grappling with the after effects of demonetization and challenges from the transition to the Goods and Services Tax (GST) from July 2017 and the shift to Bharat Stage IV emission norms (in case of two-wheelers and commercial vehicles).

The industry produced a total 29,075,605 vehicles, including passenger vehicles, commercial vehicles, three wheelers, two wheelers and quadricycle in April-March 2018, against 25,330,967 in April-March 2017, registering a growth of 14.78 per cent over the same period last year, according to a data released by (SIAM).

The sales of passenger vehicles grew by 7.89 per cent in April-March 2018 over the same period last year. Within the passenger vehicles, passenger cars, utility vehicles and vans grew by 3.33 per cent, 20.97 per cent and 5.78 per cent, respectively during April-March 2018 over the same period last year.

The overall commercial vehicles segment registered a growth of 19.94 per cent in April- March 2018, compared to the same period last year.

Medium & Heavy Commercial Vehicles (M&HCVs) grew by 12.48 per cent and Light Commercial Vehicles grew by 25.42 per cent during April-March 2018 over the same period last year.

Three Wheelers sales grew by 24.19 per cent in April-March 2018 over the same period last year. Passenger Carrier sales registered a growth of 28.65 per cent and Goods Carrier sales grew by 7.83 per cent in April-March 2018 over April-March 2017.

Two Wheelers sales registered a growth of 14.80 per cent in April-March 2018 over the same period last year. Within the Two Wheelers segment, Scooters and Motorcycles grew by 19.90 per cent, 13.69 per cent, while Mopeds declined by (-) 3.48 per cent in April-March 2018 over April-March 2017.

In April-March 2018, overall automobile exports increased by 16.12 per cent. Two and three wheelers segments registered a growth of 20.29 per cent and 40.13 per cent, respectively, while Passenger and Commercial vehicles declined by (-) 1.51 per cent and (-) 10.53 per cent, respectively in April-March 2018 over the same period last year.

Sectoral Outlook

India's automobile market has grown steadily over the last seven to eight years, with the exception of the previous two years where the effects of the global downturn were felt, primarily in sales of commercial vehicles. However, even during the downturn, the two-wheeler and three wheeler segments, which were until then experiencing low growth or losing volumes, bucked the trend. India's vehicle demand is quite different from other top automobile markets, with the exception of China in that, two-wheelers constitute a significant portion of vehicle demand (more than 3/4th of the Indian market is in two-wheelers).

The Indian automotive industry is set to further improve its performance in FY 2018-19, compared to FY 2017-18. The industry forecasts the sales growth of passenger vehicles in FY 2018-19 at 8-10 per cent, with utility vehicles growing at 14-15 per cent and cars up between 8-9 per cent in the domestic market. The two-wheeler industry is slated to deliver a better performance at 11-13 per cent, with motorcycles up by 9-11 per cent and scooters growing higher between 13-16 per cent. Commercial vehicles, on the other hand, are pitted to continue their growth momentum in double-digits at 10-12 per cent, with M&HCVs up by 9-11 per cent and light commercial vehicles growing at 10-12 per cent.

More infrastructure development will spike up this business. Buses, meanwhile, will continue to grow at less than 10 per cent. A revival of the economy post-demonetization and enforcement of GST are putting the country back on track. For instance, the GDP and economic reform programs of the government are indicating positive signs of recovery. A strong cyclical recovery in the global economy with the world growth projected at 3.7 per cent in 2018, bank recapitalization, rural revival, and reforms such as Insolvency and Bankruptcy Code by the government will also give a fillip to the auto sector. While the overall investment outlook is expected to improve, a full-fledged private sector investment recovery is likely to be delayed. Two successive good monsoon years have put the rural economy on the growth track, boosting utility vehicles, motorcycles and small commercial vehicle sales in the rural markets.

Overall, FY 2018-19 is expected to bring positive sentiments back into the market and rev up overall vehicle sales.

Commercial Vehicle Segment:

We expect M&HCV (goods) volume and tonnage CAGR of 15% over the next three years due to infrastructure spending push, better freighter profitability, GST-led warehousing rejig, pick-up in construction trucks demand (coal/bauxite mining and RMC trucks), obsolescence of old trucks due to rising entry restrictions in major cities and customer-driven switch to younger fleet. We also expect buses volume CAGR of 15% on renewed focus on urban transportation by entire country. Current shift to higher tonnage vehicle and fast replacement demand is expected to continue and is driven by poor operating economics of old trucks and lower tonnage vehicle. Replacement demand is also aided by the restriction imposed by large customers and enforcement of entry norms in New Delhi (population of 60k trucks) on vehicle age to improve the supply chain efficiency and city's air quality respectively.

Tractor Segment

Riding on the back of two high growth years, the Indian tractor industry is pegged to grow between 8-10 per cent in FY 2018-19. The forecast of a normal monsoon by the IMD has set the ball rolling further with a positive outlook in the agricultural sector, which is expected to keep the market

STEEL STRIPS WHEELS LIMITED

sentiment positive. Though general productivity improvement in the agri sector will be witnessed in FY 2018-19, the double-digit run in the tractor market may not sustain as farmers are unable to generate money. The increase in alternate use of tractor will keep pushing the demand and we expect the replacement demand will ensure 10% growth trend for the sector. FY 2017-18 had closed with a 22 per cent growth and sales volumes of 711,478 units, compared to 582,846 units a year ago.

Export Outlook

India's exports crossed the \$300 billion mark after a gap of two years in FY 2017-18 even as shipments declined in March and higher imports pushed the trade deficit for the full year to a five-year high. Exports declined nearly one percent in March after four months of rise to \$29.1 billion from \$29.3 billion a year ago. India's trade deficit widened to \$156.8 billion in FY 2017-18 compared with \$108.5 billion in FY 2016-17 amid rising global trade tensions. Imports were up 7.2% to \$42.8 billion in March, yielding a traded deficit of \$13.7 billion against \$10.7 billion in March last year. For the full FY 2017-18, exports rose 9.8% to \$302.8 billion while imports were up 19.6% at \$459.7 billion, a trade deficit of \$156.8 billion against \$108.5 billion in FY 2016-17. India's global trade increased by 16.32% to \$767.9 billion in FY 2017-18, in FY 2016-17, the trade stood at \$660.2 billion.

India's passenger vehicle exports declined for the first time in seven years in FY 2017-18 with a dip of 1.51 per cent as major exporters focus on domestic market, while lingering impact of GST refund also affected overseas shipments.

Passenger vehicle (PV) exports in FY 2017-18 were at 7,47,287 units as against 7,58,727 units in the previous year.

The reasons behind the fall is that some major exporters of PVs have prioritized the domestic market over exports and are focusing here due to huge demand surge. Moreover, the exporters are struggling with the GST refund issue and the auto industry has a total of around Rs. 1,000 Cr pending refund.

Your Company achieved export volume of 14.06 Lacs wheels in FY 2017-18. The main driver for trend is tough European markets and increasing localization from the western world for trade protection. The factor still remains as the Centre stage of trade and we expect the trade war of US and China will give benefits to India, we expect a huge bonanza in exports of truck and tractor wheels due to trade war of US and a lot of countries putting anti-dumping on Chinese products. The Company expects to enter US truck markets in a major way with the help of extra CV wheel capacity to make mark and penetrate in large US trailer market.

Financial Analysis

Gross revenues stood at Rs. 1570.60 crore in FY 2017-18 as compared to Rs. 1498.67 crore in FY 2016-17. The Company performed in line with industry standards and we are expecting the growth in revenue to be on track for 18-20% growth. The volume growth for the Company stood at all-time high and we are expecting this trend to continue and the 2 new plants add a lot of performance muscle for the company. We expect a lot of focus on CV export markets with addition of capacity and larger footprint on global front. The Profit after Tax for FY 2017-18 stood at Rs. 75.09 crore as compared to Rs. 55.68 crore YoY. We expect the trend of 17-18% profit growth to be maintained by the Company and outperform the automobile sector. The Company is constantly moving towards adding newer products to the portfolio of SSWL products and will continue to move towards this aggressively in FY 2018-19 to target maximum penetration in automobile sector.

FUTURE TRENDS TOWARDS THE WAY CAR WILL RUN: GREEN REVOLUTION

Green Vehicles in India

As with conventional automobiles, the Indian industry has taken a path different from that of the global industry in the development of green vehicles. The development of cleaner vehicles in India began with a regulatory push for CNG buses and three-wheelers in New Delhi more than a decade ago. In all other segments of the automobile market, demand has grown largely based on customer awareness and a pull for products motivated largely by perceived economic benefits. For instance, LPG kits were available in the market more than a year before the first entrant in the field, Maruti Suzuki, introduced factory-fitted vehicles in 2004. In recent times, electric 2 wheelers have ridden on the back of customer demand for vehicles with lower running costs, as well as some incentives to users in the form of little or no duties on electric vehicles (and parts) in areas such as New Delhi. "When there is consensus it will have to be a public-private partnership because the government alone doesn't have the capacity to build the infrastructure." He argues that the government must bring manufacturers on board and finalize a 10-20 year blueprint for the introduction of greener vehicles. Nevertheless, the Indian auto industry today seems to be evaluating two paths in its move towards greener vehicles:

- CNG/ Dual Fuel Vehicles
- Electric/ Hybrid Vehicles

CNG/Dual Fuel Vehicles

This part of the industry has developed largely based on legislative and judicial activism and the subsequent availability of CNG fueling outlets across major parts of the country.

While there is debate over the effectiveness of CNG in reducing pollutant emissions, there seems to be support for CNG-based vehicles in New

Delhi. India has the world's fifth largest number of natural gas vehicles, amounting to a little less than a million vehicles. It is believed that at least 5% of new car buyers opt for a CNG variant where available. This could grow in the future as the demand increases for vehicles with lower running costs, although currently most LPG/CNG variants of passenger cars cost about INR 15,000 to 50,000 more than their conventional counterparts. The higher purchase price of dual-fuel cars is normally compensated in less than two years based on cost per km, because dual-fuel cars offer up to 50% savings based on current prices of petrol and CNG. The increasing availability of fueling stations in cities and on major highways is also encouraging sales.

Electric/Hybrid Vehicles

Battery powered/plug-in hybrid electric vehicles (BEV/PHEV) have continued their steady growth worldwide, despite accounting for only about 1 percent of all vehicles sold in FY 2009-2012. In India, electric vehicles have just begun making some inroads into the market. In passenger cars, there is only one established domestic manufacturer, Reva, whose sales account for less than 1 percent of all passenger cars sold in India. However this could change soon with Mahindra & Mahindra's (M&M) acquisition of a majority stake in Reva. In the two-wheeler market, an electric scooter is available for less (about USD 600) than a conventional scooter (about USD 900). Soon, Indian electric vehicle manufacturers are expected to launch electric motorcycles. Given that motorcycles account for more than 80 percent of all two-wheelers sold in India, the introduction of electric motorcycles could have a significant impact on the market for electric vehicles. However, electric two-wheelers have seen a recent reversal of fortunes, with sales dipping from a high of more than 26,000 vehicles in FY 2008-09 to around 3,000 in FY 2009-10, attributed by industry sources to the rush of cheap, but low-quality vehicles which flooded the market in FY 2008-09 but then were subsequently rejected by consumers. Electric/hybrid commercial vehicles are mostly in the experimental stage at the time of writing so it is not yet clear how this industry will shape up in India.

Other Fuels

As in Brazil, where more than 90 percent of new vehicles sold can run on either ethanol or gasoline, India has been exploring the prospect of reducing its dependence on crude oil. There are mandatory blending requirements for ethanol and the government has announced a policy for biofuels (such as biodiesel/biopetrol) from various sources. However, none of these have taken off in a sustainable manner. As with any developing market trend, greener vehicles face several challenges to their growth in India. Addressing them would help expand the market manifold.

Domestic Sales Forecast for FY 2018-19 by SIAM

The (SIAM) forecast a 8-10% growth for the domestic passenger vehicle sales in the FY 2018-19, expecting support from 7th pay commission payout and overall global tailwinds of good economic growth with sustain this trend. SIAM expects motorcycles sales to grow moderately in FY 2018-19 with demand in rural segment keeping pace with urban demand. The good monsoons will also play a crucial role in farm output improving the trend line and giving a push to 2-3 wheeler demand. The segment is expected to grow at 11-13% based on good macro factors. The overall commercial vehicle segment is expected to grow by 10-12% with the help of very good govt spending on infrastructure and private capex also improving after a decade of sluggish growth. The key concerns still remain the increasing commodity prices, higher vehicle finance rates and adhoc changes in policy environment that could affect profitability of OEMs.

Your Company is moving forward in this year with 2 new plants to capture Alloy wheel and higher share of business in commercial wheel segment. We expect this year to be around the highest exports ever with very good demand from the western world.

Risk & Outlook

Steel & Aluminum is the primary raw material for the products of the company, and is a very significant part of the final product cost of steel & aluminum wheel. Rising steel & aluminum prices continue to be a reality and pose a challenge to the margins of the company in this competitive auto component sector.

Factor of global growth has become a key linkage between economies and the consumer sentiment. Global growth is still limping on weak wicket and manufacturing output is still shrinking for a large part of the globe. The world economies are making a base after financial crisis and will keep the growth parameters for Company in check as the cross border trade is suffering due to low consumption. We are constantly de-risking ourselves by broadening our product reach and extending our reach to across the globe to avoid geographical slowdown risk.

Top customer concentration is a risk as 85% of revenues come from domestic market customers and Company is increasing its foot print in Export markets by catering to wide ranges of segment and customers. Company has ventured into alloy wheel segment to improve the product category to de-risk itself from being only in steel wheel segment.

Foreign currency movement also poses the risk towards the corporate performance as global currencies swings are extreme due to various macro issues persisting in current environment. This may act as a headwind for some time to come till situation becomes normal and volatility among global currency recedes to normalized levels.

To mitigate the risk, the Company continues to strive to improve its operational performance and develop new components, which are technologically superior and have an edge over the competitors.

STEEL STRIPS WHEELS LIMITED

The following table gives the key risk faced by Company:

Risks Type	Key Risks	Impact on SSWL	Mitigation
Strategic Risk	Global Economic Scenario	Vehicle purchase across different segment has strong correlations with GDP growth. The decision to purchase a passenger vehicle comes under customers' discretionary spending (Passenger Vehicle) which is linked to their perception of business outlook. Depressed economic outlook can impact this spending and thereby constrain the Company's growth potential.	Diversified product mix, segment mix and customer mix. Target newer market segments which might provide counter-cyclical support.
	Long term growth dependent on of capacity expansion	Capacities utilization across all the plants are inching up gradually and with business environment turning favorable growth in long term will be dependent on Capacity addition.	Debottlenecking exercise across all the facilities are being carried every quarter. Optimum scheduling of production across different products thereby improving yield. Possibility of setting up new lines wherein company has project management expertise.
Operation Risk	Supply chain disruption.	The raw material (Steel) accounts for 60-65% of the cost, poses a key risk as it may be subject to supply disruption and market price volatility.	The Company maintains significant integration of raw materials for its Operations. To achieve greater raw material security, company enters into long term MOU with suppliers. Development of alternate sources for uninterrupted supply of key raw material.
	Employee Productivity and retention	Employee involvement and productivity is one of the key factors to be competitive in industry. Being a labour intensive sector employee welfare assumes significance.	Company has strong commitment towards creating and providing safe working environment for its employee and stakeholders. Focussed approach to retain key talent through multiple initiatives including providing cross functional access and experience. Focus on employee engagement. Increased focus on offering learning opportunities with allocation of funds for training requirements.
Financial Risk	Currency Volatility	Volatility in currency exchange movements resulting in transaction and translation exposure.	Board approved Currency hedging policies and practices in place. Close monitoring of hedging strategy by risk management committee. Quarterly assessment of foreign exchange exposure by Board.
	Debt Burden	The Company's outstanding indebtedness in an adverse environment can have significant impact on financial flexibility and business as a whole.	Close monitoring of debt profile and continuous effort to bring the cost in line with industry. Continuous effort to maintain the impeccable credit history. Quarterly review of financial leverage and efforts are on to move towards industry benchmark.
	Credit Rating	Failure to maintain credit ratings could adversely affect cost of funds.	Regular exchange of information and updates with agency. Focussed approach to work on area's of improvement and to build upon area's of strength. Close monitoring of triggers highlighted in rating rationale.
	Social costs	SSWL's assumptions while estimating social cost like gratuity funding are subject to capital market and actuarial risks and any shortfall could put pressure on financial performance.	A framework to manage social cost risks has been deployed to ensure that obligations remain affordable and sustainable, whilst protecting the asset market exposure.
	Credit Risk	Customer default can pose a significant challenge and impact the bottom line of the Company.	Systems are in place to assess the credit worthiness of new as well as existing customers.
	Financial Fraud	Financial fraud can challenge the reputation as well existence of the Company besides denting the confidence on the systems in place.	Adequate Internal financial control system in place. Adequate accounting records are in place to safeguard the assets of Company and for preventing and detecting frauds. Vigil Mechanism in place that provides a formal mechanism for all Directors, employees and vendors of the Company to approach the Ethics Counsellor/Chairman of the Audit Committee of the Board and make protective disclosures about the unethical behaviour, actual or suspected fraud.
Legal Risk	Regulatory environment & compliance	The Company is subject to numerous laws, regulations and contractual commitments. Any failure to comply with same may impact the adversely.	The Company has policies, systems and procedures in place with a strong commitment from the Board and the Executive Committee towards compliance.

INTERNAL CONTROLS AND THEIR ADEQUACY

The Company has a robust internal control and audit system to provide adequate assurance regarding the effectiveness and efficiency of its systems and operations. The controls are commensurate to the needs of the organization given its size and complexity of operations. The standard operating procedures ensure compliance to local regulation and statutes as applicable to the Company. The Company strictly ensures adherence to all internal control policies and procedures as well as compliance with all regulatory guidelines.

SEGMENT REPORTING

The Company is primarily engaged in the manufacturing business of wheel rims catering to different segment of automobile industry. The inherent nature of activities is governed by the same set of risk and returns; hence these have been grouped as a single segment. The said treatment is in accordance with the principle enunciated in the Accounting Standard on Segment Reporting (AS 17).

Annexure B to Independent Auditors' Report

Referred to in paragraph 10 (f) of the Independent Auditor's Report of even date to the members of Steel Strips Wheels Limited on the financial statements for the year ended 31st March, 2018.

Report on the Internal Financial Controls under Clause (i) of sub-section 3 of Section 143 of the Act

1. We have audited the internal financial controls over financial reporting of Steel Strips Wheels Limited ("the Company") as of March 31, 2018 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

2. The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India (ICAI). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the act.

Auditors' Responsibility

3. Our responsibility is to express an opinion on the company's internal financial control over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on audit of internal financial control over financial reporting (the "Guidance Notes") and the standards on auditing deemed to be prescribed under section 143(10) of the act to the extent applicable to an audit of internal financial controls, both applicable to an audit of internal

STEEL STRIPS WHEELS LIMITED

financial controls and both issued by the ICAI. Those standards and the guidance notes require that we comply with ethical requirements and planned and performed the audit to obtain reasonable assurance about whether adequate internal financial control over financial reporting was established and maintained and if such controls operated effectively in all material respects.

4. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls system over financial reporting included obtaining an understanding of internal financial controls system over financial reporting, assessing the risks that material weakness exists, and testing and evaluating the design and operating effectiveness of the internal control based on the assessed risk. The procedure selected depend on the auditor's judgement, including the assessment of the risks of material misstatements of the financial statements, whether due to fraud or error.
5. We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion on the company's internal financial controls system over financial reporting.

Meaning of Internal financial controls over financial reporting

6. A company's internal financial controls over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls over financial reporting includes those policies and procedures that (1.) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company (2.) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditure of the company are being made only in accordance with authorization of management and directors of the company ; and (3.) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitation of Internal financial controls over financial reporting

7. Because of the Inherent limitation of internal financial controls over financial reporting, including the possibility of collusion or improper management over-ride of controls, material misstatements due to error or fraud may occur and not be detected. Also, projection of any evaluations of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial controls over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

8. In our opinion, the company has, in all material respects, an adequate internal financial controls over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31st, 2018 based on the internal financial controls over financial reporting criteria established by the company considering the essential components of internal control stated in the guidance note on audit of internal financial controls over financial reporting issued by the Institute of Chartered Accountants of India.

STEEL STRIPS WHEELS LIMITED

Significant Accounting Policies for the period ended 31st March, 2018

1) CORPORATE INFORMATION

Steel Strips Wheels Limited (the Company) is a public limited Company registered in India under the Companies Act 2013 (erstwhile Companies Act 1956). Its Shares are listed on both BSE Limited (Formerly Bombay Stock Exchange Limited) and National Stock Exchange of India Ltd. (NSE). The Company is a leading manufacturer of Automotive Wheel rims.

2) SIGNIFICANT ACCOUNTING POLICIES

1) BASIS OF PREPARATION

The financial statements have been prepared in accordance with Indian Accounting Standards ('Ind AS') notified under section 133 of the Companies Act 2013, read together with the Companies (Indian Accounting Standards) Rules, 2015.

For all the periods up to and including the year ended 31 March, 2017, the Company prepared its financial statements in accordance with accounting standards notified under the section 133 of the Companies Act 2013, read together with Rule 7 of the Companies (Accounts) Rules, 2014 ('Previous GAAP'). These are the Company first Ind AS financial statements and the date of transition to Ind AS is 01 April, 2016. Detailed explanation of how the transition from previous GAAP to Ind AS has affected the Company Balance Sheet, financial performance and cash flows is given under Note 3.22.

The Standalone financial statements have been prepared under the historical convention, on the accrual basis of accounting except for certain financial assets and financial liabilities that are measured at fair value at the end of the each reporting period, as stated in the accounting policies below. The accounting policies have been applied consistently over all the periods presented in the Standalone financial statements.

The accounting policies have been consistently applied by the Company and except for the changes in accounting policy discussed more fully below, are consistent with those used in the previous year.

2) REVENUE RECOGNITION

Revenue is recognized to the extent that it is probable that economic benefits will flow to the Company and the revenue can be reliably measured.

A. SALE OF GOODS

Revenue from sale of goods is recognized when the significant risks and rewards of ownership in the goods are transferred to the buyer of goods as per the terms of contracts, the Company retains no effective control of the goods transferred to a degree usually associated with the ownership and no significant uncertainty exists regarding the amount of the consideration that will be derived from the sale of goods. The Company collects CST/VAT/GST on the behalf of the Government and therefore these are not economic benefits flowing to the company. Hence they are excluded from Revenue.

However, the revenue up to Q1 of the F.Y. 2017-18 includes the excise duty amounts that have been collected from customers, which is shown separately in the expenditure head of the statement of profit & loss as per the disclosure requirements.

Thereafter, with the introduction of Goods & Service Tax as on 01 June 2017, the tax amounts are excluded from the revenue for the period from Q2 to Q4 of F.Y. 2017-18.

B. INTEREST INCOME

Interest income from a financial asset is recognized when it is probable that the economic benefits will flow to the company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

C. OTHER INCOME

- (i) Dividend Income is accounted in the period in which the right to receive the same is established, which is generally when shareholders approve the dividend.
- (ii) Revenue in respect of claims is recognized when no significant uncertainty exists with regard to the amount to be realized and the ultimate collection thereof.

D. DUTY DRAWBACK AND EXPORT INCENTIVES

Income from duty drawback and export incentives is recognized on an accrual basis.

3) Leasing

As a Lessee

Leases of property, plant and equipment where the Company, as lessee, has substantially all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalised at the lease's inception at the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding rental obligations, net of finance charges, are included in borrowings or other Financial liabilities, as appropriate. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to the profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The property, plant and equipment acquired under finance leases is depreciated over the asset's useful life or over the shorter of the asset's useful life and the lease term if there is no reasonable certainty that the Company will obtain ownership at the end of the lease term. Leases in which a significant portion of the risks and rewards of ownership are not transferred to the Company as lessee are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to profit or loss on a straight-line basis over the period of the lease unless the payments are structured to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases.

Significant Accounting Policies for the period ended 31st March, 2018

As a Lessor

Lease income from operating leases where the Company is a lessor is recognized in income on a straight-line basis over the lease term unless the receipts are structured to increase in line with expected general inflation to compensate the lessor for the expected inflationary cost increases. The respective leased assets are included in the balance sheet based on their nature.

4) ACCOUNTING FOR TAXES ON INCOME

Tax expense comprises current and deferred tax. Current income-tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India and tax laws prevailing in the respective tax jurisdictions where the company operates. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

Deferred income taxes reflect the impact of timing differences between taxable income and accounting income originating during the current year and reversal of timing differences for the earlier years. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted at the reporting date.

Deferred tax liabilities are recognized for all taxable timing differences. Deferred tax assets are recognized for deductible timing differences only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. In situations where the company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that they can be realized against future taxable profits.

At each reporting date, the Company re-assesses unrecognized deferred tax assets. It recognizes unrecognized deferred tax asset to the extent that it has become reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which such deferred tax assets can be realized.

The carrying amount of deferred tax assets are reviewed at each reporting date. The Company writes-down the carrying amount of deferred tax asset to the extent that it is no longer reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which deferred tax asset can be realized. Any such write-down is reversed to the extent that it becomes reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available. Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set-off current tax assets against current tax liabilities and the deferred tax assets and deferred taxes relate to the same taxable entity and the same taxation authority.

MAT credit is recognized as an asset only when and to the extent there is convincing evidence that the company will pay normal income tax during the specified period. In the year in which the **Minimum Alternative tax (MAT)** credit becomes eligible to be recognized as an asset in accordance with the recommendations contained in guidance Note issued by the Institute of Chartered Accountants of India, the said asset is created by way of a credit to the profit and loss account and shown as MAT Credit Entitlement. The Company reviews the same at each balance sheet date and writes down the carrying amount of MAT Credit Entitlement to the extent there is no longer convincing evidence to the effect that Company will pay normal Income Tax during the specified period.

5) IMPAIRMENT OF NON FINANCIAL ASSETS

A. At each Balance Sheet date, the carrying amount of assets is tested based on internal/external factors, for impairment so as to determine:

- (i) The provision for impairment loss, if any; and
- (ii) The reversal of impairment loss recognized in previous periods, if any,

B. Impairment loss is recognized when the carrying amount of an asset exceeds its recoverable amount. Recoverable amount is determined:

- (i) In the case of an individual asset, higher of the net selling price and the value in use.
- (ii) In the case of a cash generating unit (a group of assets that generates identified, independent cash flows), at the higher of the cash generating unit's net selling price and the value in use.

(Value in use is determined as the present value of estimated future cash flows discounted to their present value at the weighted average cost of Capital, from the continuing use of an asset and from its disposal at the end of its useful life).

Post impairment, depreciation is provided on the revised carrying value of the asset over its remaining useful life.

6) CASH AND CASH EQUIVALENTS

Cash and cash equivalents balances include cash in hand, fixed deposits, margin money deposits, earmarked balances with banks, other bank balances such as dividend accounts, which have restrictions on repatriation, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in value.

7) INVENTORIES

Inventories are valued at cost or net realizable value, whichever is lower. The cost in respect of the various items of inventory is computed as under:

- a) In case of raw materials at weighted average cost plus direct expenses. The cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition.
- b) In case of stores and spares at weighted average cost plus direct expenses. The cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition.
- c) In case of work in progress at raw material cost plus conversion costs depending upon the stage of completion.
- d) In case of finished goods at raw material cost plus conversion costs, packing cost, excise duty (if applicable) and other overheads incurred to bring the goods to their present location and condition.

8) FINANCIAL INSTRUMENT

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

STEEL STRIPS WHEELS LIMITED

Significant Accounting Policies for the period ended 31st March, 2018

Initial recognition and measurement

On initial recognition, all the financial assets and liabilities are recognized at its fair value plus or minus, in the case of a financial asset or financial liability not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability except trade receivables which are recognized at transaction price.

Subsequent measurement

Non-derivative financial instruments

(i) Financial assets carried at amortised cost

A financial asset is subsequently measured at amortised cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

(ii) Financial assets at fair value through other comprehensive income

A financial asset is subsequently measured at fair value through other comprehensive income if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

(iii) Financial assets at fair value through profit or loss

A financial asset which is not classified in any of the above categories is subsequently measured at fair value through profit or loss.

(iv) Financial liabilities

The financial liabilities are subsequently carried at amortized cost using the effective interest method. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

Derivative financial instruments

The Company holds derivative financial instruments such as foreign exchange forward and option contracts to mitigate the risk of changes in exchange rates on foreign currency exposures. The counter party for these contracts is generally a bank.

Although the Company believes that these derivatives constitute hedges from an economic perspective, they may not qualify for hedge accounting under Ind-AS 109, Financial Instruments. Any derivative that is either not designated a hedge, or is so designated but is ineffective as per Ind-AS 109, is categorized as a financial asset or financial liability, at fair value through profit or loss.

Derivatives not designated as hedges are recognized initially at fair value and attributable transaction costs are recognized in the statement of profit and loss when incurred. Subsequent to initial recognition, these derivatives are measured at fair value through profit or loss and the resulting exchange gains or losses are included in statement of profit and loss. Assets/ liabilities in this category are presented as current assets/current liabilities if they are either held for trading or are expected to be realized within 12 months after the balance sheet date.

Equity Share Capital

(i) Equity shares

Equity shares issued by the Company are classified as equity. Incremental costs directly attributable to the issuance of new ordinary shares are recognized as a deduction from equity, net of any tax effects.

De-recognition of financial instruments

A financial asset is derecognized when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for derecognition under Ind-AS 109. A financial liability is derecognized when the obligation specified in the contract is discharged or cancelled or expired.

Fair value measurement of financial instruments

The fair value of financial instruments is determined using the valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

Based on the three level fair value hierarchies, the methods used to determine the fair value of financial assets and liabilities include quoted market price, discounted cash flow analysis and valuation certified by the external valuer.

In case of financial instruments where the carrying amount approximates fair value due to the short maturity of those instruments, carrying amount is considered as fair value.

9) PROPERTY, PLANT AND EQUIPMENT (PPE)

Fixed assets are stated at original cost net of tax/duty credit availed, if any, less accumulated depreciation and cumulative impairment and those which have been revaluated are stated at the values determined by the valuers less accumulated depreciation and cumulative impairment. Cost of acquisition is inclusive of freight and other incidental expenses and interest on loan taken for the acquisition of qualifying assets up to the date of commissioning of assets.

Subsequent expenditure related to PPE is capitalized only when it is probable that future economic benefits associated with these will flow to the company and cost of the item can be measured reliably. All other expenses on existing fixed assets, including day to day repair and maintenance expenditure and cost of replacing parts, are charged to the statement of profit and loss for the period during which such expenses are incurred.

Gain or losses arising from de-recognition of fixed assets are measured as the difference between the net disposable proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is derecognized.

The exchange differences arising on reporting of long term foreign currency monetary items at rates different from those at which they were initially recorded during the period, or reported in previous financial statements, in so far as they relate to the acquisition of a depreciable capital asset, have been added to or deducted from the cost of the asset and shall be depreciated over the balance useful life of the asset.

Significant Accounting Policies for the period ended 31st March, 2018

Die Tooling, developed in-house, includes cost of material and other direct/ incidental expense on in-house development.

Tangible Assets not ready for the intended use on the date of the balance Sheet are disclosed as "capital work in progress". (Also refer to policy on leases, borrowing costs, impairment of assets and foreign currency transactions infra.)

Transition to Ind AS

For transition to Ind AS, The Company has elected to continue with the carrying value of all of its PPE recognised as of 01 April, 2016 (transition date) measured as per the previous GAAP and use that carrying value as its deemed cost as of the transition date.

10) DEPRECIATION / AMORTIZATION ON TANGIBLE FIXED ASSETS

Depreciation is the systematic allocation of the depreciable amount of an asset over useful life. The depreciable amount of an asset is the cost of an asset or other amount substituted for cost, less its residual value.

A. OWNED ASSETS

- (i) Pursuant to applicability of Schedule II, of Companies Act 2013, with effect from 1st April 2014, Management has reassessed the useful life of tangible assets based on the internal and external technical evaluation. The Depreciation on fixed assets is provided on straight line method in accordance with applicable Schedule of the Companies Act, 2013.
- (ii) Depreciation for addition to/deductions from, owned assets is calculated on pro-rata basis from the date of such addition or, as the case may be, up to the date on which such asset has been sold, discarded, demolished or destroyed.
- (iii) Residual values of assets have been considered at 5% of the original cost of the assets.
- (iv) Difference of Exchange Rate fluctuation on imported plant and machineries procured out of long term foreign currency loans is amortized over the residual life of relevant plant and machineries.
- (v) Depreciation on assets carried at carrying amount as on 01.04.2014 and is depreciated as per Straight line method over the remaining useful life of the assets. Further the assets whose remaining useful life are nil, has been recognized in the opening balance of retained earnings. Refer the same as transitional provision
- (vi) The depreciation calculation is based on the balance useful lives of assets and shift working. Depreciation on assets used on double shift basis have been increase by 50% for that period and Depreciation on assets used in triple shift basis have be calculated on the basis of 100% for that period, Except for assets in respect of which no extra shift depreciation is permitted (indicated by NESD in Part C of the schedule).
- (vii) Management has reassessed the useful life of plant and machineries based on the internal and external technical evaluation which is higher than useful life prescribed under the act. The reassessed useful life is tabulated as:

Location	Useful Life as per Act (in Years)	Average useful life (in years)	Balance Avg. useful Life as on 01/04/2014
Dappar	15.00	23.85	17.11
Chennai	15.00	23.29	19.72
JSR	15.00	24.96	23.17
Seraikella	15.00	15.00	15.00

B. LEASED ASSETS

Land acquired under long term lease is classified under "Tangible Assets" and is amortized over the period of lease.

11) INTANGIBLE ASSETS AND AMORTIZATION

Intangible assets are stated at original cost net of tax/duty credit availed, if any, less accumulated amortization and cumulative impairment. Intangible assets are recognized when it is probable that the future economic benefits are attributable to the asset will flow to the enterprise and the cost of asset can be measured reliably. Intangible assets are amortized over their estimated useful life. The estimated useful life of an identifiable intangible asset is based on number of factors including the effects of obsolescence etc.

Intangible Assets not ready for the intended use on the date of balance sheet are disclosed as "intangible assets under development.

12) BORROWINGS

Borrowings are initially recognised at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in profit or loss over the period of the borrowings using the effective interest method. Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw down occurs.

To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalised as a prepayment for liquidity services and amortised over the period of the facility to which it relates. Borrowings are removed from the balance sheet when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a initial liability that has been extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss as other income or finance costs.

Borrowings are classified as current liabilities unless the Company has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period.

13) BORROWING COST

Borrowing costs that are directly attributable to acquisition, construction or production of a qualifying asset are capitalized/inventorised as part of cost of such assets till such time the asset is ready for its intended use/or sale. Qualifying asset is one that necessarily takes substantial period of time to get ready for its intended use.

All other borrowing costs are expensed in the period in which they are incurred.

14) PROVISION

Provisions are recognised when the company has a present obligation (legal or constructive) as a result of a past event, it is probable that the company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

STEEL STRIPS WHEELS LIMITED

Significant Accounting Policies for the period ended 31st March, 2018

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

15) CONTINGENT LIABILITIES

Contingent liabilities are disclosed when there is a possible obligation arising from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognised because it cannot be measured reliably.

16) EMPLOYEE BENEFITS

Short-term obligations

Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognised in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the balance sheet.

Provident Fund & Employee State Insurance

Contribution towards provident fund and employee state insurance for employees is made to the regulatory authorities, where the Company has no further obligations. Such benefits are classified as Defined Contribution Schemes as the Company does not carry any further obligations, apart from the contributions made on a monthly basis.

Superannuation fund

The Company have a superannuation plan for the benefit of its employees. Employees who are members of the defined benefit superannuation plan are entitled to benefits depending on the years of service and salary drawn. The Company contributes up to 12% of the eligible employees' salary or `1,00,000, whichever is lower, every year. Such contributions are recognised as an expense as and when incurred. The Company does not have any further obligations beyond this contribution.

Gratuity

The Company provides for gratuity, a defined benefit plan (the "Gratuity Plan") covering eligible employees in accordance with the Payment of Gratuity Act, 1972. The Gratuity Plan provides a lump sum payment to vested employees at retirement, death, incapacitation or termination of employment, of an amount based on the respective employee's salary and the tenure of employment. The gratuity plan in Company is funded through annual contributions to Life Insurance Corporation of India (LIC) under its Company's Gratuity Scheme where as others are not funded. The liability or asset recognised in the balance sheet in respect of defined benefit gratuity plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The Company's liability is actuarially determined (using the Projected Unit Credit method) at the end of each year. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of government bonds. Re-measurement gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to equity in other comprehensive income in the period in which they arise. They are included in retained earnings in the statement of changes in equity and in the balance sheet. Past-service costs are recognised immediately in profit or loss.

Compensated Absences

Accumulated compensated absences, which are expected to be availed or encashed within 12 months from the end of the year end are treated as short term employee benefits. The obligation towards the same is measured at the expected cost of accumulating compensated absences as the additional amount expected to be paid as a result of the unused entitlement as at the year end. Accumulated compensated absences, which are expected to be availed or encashed beyond 12 months from the end of the year end are treated as other long term employee benefits. The Company's liability is actuarially determined (using the Projected Unit Credit method) at the end of each year. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of government bonds. Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in profit or loss in the period in which they arise. Past-service costs are recognised immediately in profit or loss.

17) SHARE-BASED PAYMENT ARRANGEMENTS

Equity-settled share-based payments to employees and others providing similar services are measured at the fair value of the equity instruments at the grant date. Details regarding the determination of the fair value of equity settled share-based transactions are set out in note 12. The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight line basis over the vesting period, based on the Company's estimate of equity instruments that will eventually vest, with a corresponding increase in equity. At the end of each reporting period, the Company revises its estimate of the number of equity instruments expected to vest. The impact of the revision of the original estimates, if any, is recognised in the statement of profit and loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to the equity settled share option outstanding account. Equity-settled share-based payment transactions with parties other than employees are measured at the fair value of the goods or services received, except where that fair value cannot be estimated reliably, in which case they are measured at the fair value of the equity instruments granted, measured at the date the entity obtains the goods or the counter party renders the service. For cash-settled share-based payments, a liability is recognised for the goods or services acquired, measured initially at the fair value of the liability. At the end of each reporting period until the liability is settled, and at the date of settlement, the fair value of the liability is re-measured, with any changes in fair value recognised in profit or loss for the year.

Significant Accounting Policies for the period ended 31st March, 2018

18) TRANSACTIONS IN FOREIGN CURRENCY

A) Functional and Presentation currency

The functional currency of the Company is Indian Rupee. These financial statements are presented in Indian Rupee (rounded off to lakhs).

B) Transaction and balances

The foreign currency transactions are recorded, on initial recognition in the functional currency, by applying to the foreign currency amount the spot exchange rate between the functional currency and the foreign currency at the date of the transaction.

The foreign currency monetary items are translated using the closing rate at the end of each reporting period. Non-monetary items that are measured in terms of historical cost in a foreign currency shall be translated using the exchange rate at the date of the transaction. Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous financial statements shall be recognised in profit or loss in the period in which they arise.

Foreign exchange differences recorded as an adjustment to borrowing costs are presented in the statement of profit and loss, within finance cost. All other foreign exchange gains and losses are presented in the statement of profit and loss on net basis.

19) SEGMENT REPORTING

Operating segments are reported in a manner consistent with the internal reporting to the Chief Operating Decision Maker "CODM" of the Company. The CODM is responsible for allocating resources and assessing performance of the operating segment. The Company has monthly review and forecasting procedure in place and CODM reviews the operations of the Company as a whole.

20) EARNING PER SHARE

Basic earnings per share are calculated by dividing the net profit or loss for the year attributable to equity shareholders (after deducting attributable taxes and dividend on cumulative preference shares for the year) by the weighted average number of equity shares outstanding during the year. Partly paid equity shares are treated as a fraction of an equity share to the extent that they were entitled to participate in dividends relative to a fully paid equity share during the reporting period. The weighted average number of equity shares outstanding during the period is adjusted for event of bonus issue/right issue etc; bonus element in a rights issue to existing shareholders; share split; and reverse share split (consolidation of shares).

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

21) OPERATING CYCLE

Based on the nature of products / activities of the Company and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.

22) SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS

In the process of applying the Company's accounting policies, management has made the following estimates, assumptions and judgments which have significant effect on the amounts recognized in the financial statement:

a) Contingencies

Judgment of the Management is required for estimating the possible outflow of resources, if any, in respect of contingencies/claim/litigations against the Company as it is not possible to predict the outcome of pending matters with accuracy.

b) Allowance For Uncollected Accounts Receivable And Advances

Trade receivables do not carry any interest and are stated at their normal value as reduced by appropriate allowances for estimated irrecoverable amounts. Individual trade receivables are written off when management deems them not collectible. Impairment is made on ECL, which are the present value of the cash shortfall over the expected life of the financial assets.

c) Defined Benefit Plans

The cost of the defined benefit plan and other post-employment benefits and the present value of such obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in future. These includes the determination of the discount rate, future salary increases, mortality rates and attrition rate. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

d) Fair Value Measurement Of Financial Instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the Discounted Cash Flow (DCF) model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

Note:- 48. Financial risk management objectives and policies

The Company's principal financial liabilities comprise loans and borrowings, trade and other payables. The main purpose of these financial liabilities is to finance the Company's operations and to support its operations. The Company's financial assets include loans, trade and other receivables, and cash & cash equivalents that derive directly from its operations.

The Company is exposed to market risk, credit risk and liquidity risk. The company's senior management oversees the management of these risks. The company's senior management is supported by a Business Risk Management committee that advises on financial risks and the appropriate financial risk governance framework for the Company. This Business Risk Management committee provides assurance to the Company's senior management that the Company's financial risk activities are governed by appropriate policies and procedure and that financial risks are identified, measured and managed in accordance with the Company's policies and risk objectives. The Board of Directors reviews and agrees policies for managing each risk, which are summarised as below:

STEEL STRIPS WHEELS LIMITED

Market risk

a) Price Risk

Fluctuation in commodity price in global market affects directly and indirectly the price of raw material and components used by the Company in its products. The key raw material for the Company's business is HR Steel. The Company has arrangements with its major customers for passing on the price impact. The Company is also regularly taking initiatives like VA VE (value addition, value engineering) to reduce its raw material costs to meet targets set up by its customers for cost downs.

b) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to the risk of changes in market interest rates relates primarily to the Company's long term debt obligations with floating interest rates. The Company is carrying its borrowings primarily at variable rate.

Particulars	31 March 2018	31 March 2017	1st April 2016
Variable rate borrowings	61,039.21	45,397.42	22,693.43
Fixed rate borrowings	-	-	-
Total Borrowings	61,039.21	45,397.42	22,693.43

Interest rate sensitivity

For the Purpose of computing interest rate sensitivity on the above borrowings, management has estimated a reasonably possible change in interest rate as 50bps based on current as well as expected economic conditions. This analysis is based on Long Term Risk exposures outstanding at the reporting date and assumes that all other variables, in particular foreign currency exchange rates, remains constant. The period and balances are not necessarily representative of the average amounts outstanding during the periods.

Impact on Profits

	31 March 2018	31 March 2017	1st April 2016
50 bp decrease would Increase the profit before tax by	305	227	113
50 bp increase would decrease the profit before tax by	(305)	(227)	(113)

c) Foreign currency risks

The company tries to manage the foreign currency risk by attaining natural hedge. The company also does selective hedging to hedge its risk associated with foreign currency and to address the timing difference in foreign currency collections & payments.

i) The derivative outstanding as at the reporting date is as follows:-

ii) Mark to market losses / (gain) on foreign currency borrowings:

	(Rs in Lacs) For the Year Ended 31st March 2018
Mark to Market losses/(gain)	67.76

d) Credit risk

The credit risk is the risk of financial loss to the Company if a customer or counter party to a financial instrument fails to meet its contractual obligations towards the Company and arises principally from the Company's receivables from customers and deposits with banking institutions. The maximum amount of the credit exposure is equal to the carrying amounts of these receivables. The Company has developed guidelines for the management of credit risk from trade receivables. The Company's primary customers are major Indian automobile manufacturers (OEMs) with good credit ratings. Non-OEM clients are subjected to credit assessments as a precautionary measure, and the adherence of all clients to payment due dates is monitored on an on-going basis, thereby practically eliminating the risk of default. The Company has deposited liquid funds at various banking institutions. Primary banking institutions are major Indian and foreign banks. In long term credit ratings these banking institutions are considered to be investment grade. Also, no impairment loss has been recorded in respect of fixed deposits that are with recognised commercial banks and are not past due.

Liquidity risk

The liquidity risk encompasses any risk that the Company cannot fully meet its financial obligations. To manage the liquidity risk, cash flow forecasting is performed in the operating divisions of the Company and aggregated by Company finance. The Company's finance monitors rolling forecasts of the Company's liquidity requirements to ensure it has sufficient cash to meet operational needs while maintaining sufficient headroom on its undrawn committed borrowing facilities / overdraft facilities at all times so that the Company does not breach borrowing limits or covenants (where applicable) on any of its borrowing facilities.
