Key Accounts Payable Challenges

• Processing Delays

Manual data entry and duplication leads to missed due dates, vendor discounts, late payment penalties and even strain supplier relationships

• Reduced Accuracy

Errors are common in manual processes and can be trouble when it comes to impacting working capital and compliance

• No Visibility & Limited Reporting Capabilities

Lack of process visibility and control makes it harder to assess AP operations and develop strategies and insights required for improvement.

• Difficult Data Retrieval

From audits to vendor inquiries, finding information quickly can be difficult when invoices are processed manually

• High Costs

Resolving processing errors not only decreases staff productivity, it ultimately drives up the average cost per invoice

• Inefficient workflows

Manual workflow for feedback and approval.

How FUJIFILM Business Innovation Australia can help?

Your New and Improved Automated Accounts Payable Process

Our Accounts Payable solution for Schools is a streamlined platform designed to minimise human interaction and errors, reduce document handling and duplication, and integrate disconnected workflows.

Key Benefits

By making a traditionally slow and cumbersome process more efficient, reducing friction and manual intervention, you will derive benefits across your entire school beyond simple time and cost:

- **Reduced costs**

Automation and workflow improvement can reduce process costs by 35-46% on average.

- **Improved productivity**

Drastic increase in the speed of invoice processing. Less manual data entry means more time spent on strategic work.

- **Less human errors**

Less manual data entry means less mistakes, and less duplication of effort. Intelligent data capture and extraction provides standardised processes, enforces internal controls and compliance and delivers complete traceability.

- **Real-time visibility**

Get a complete, real-time view of business expenditure so you can respond more dynamically with up-to-date information and pay on time.

- **Better supplier engagement**

Supplier self-service portal enables real-time tracking of invoices. Less paperwork, shorter processing times and improved payment timeliness further improves the supplier experience.

- **Improved employee satisfaction**

Less manual handling and human intervention means teams can better manage volume fluctuations or staff shortages. More control, increased accuracy and access to information helps improve employee satisfaction.

- **Platform Approach**

Realise the benefits of automating other processes within your school's operations beyond just AP.

Why Choose FUJIFILM Business Innovation?

FUJIFILM Business Innovation understands that paper still play a big role in School processes, even amidst the ever-increasing demand to drive digital transformation. Today, many companies are seeking to convert paper-based processes to digital workflows, improve the efficiencies of both internal processes and customer experiences, drive better management of content with optimised workflows, and effectively use and manage data that's supplemented by analytics.

Accelerate the speed of your School with our comprehensive portfolio of enterprise solutions. With over 60 years of experience in supporting School communication, be it paper or digital, FUJIFILM Business Innovation enables people and Schools to share their knowledge across all platforms seamlessly-and embark on your digital transformation journey effectively.
