INFINITI OWNER SATISFACTION AND ASSISTANCE

Both Infiniti and your Infiniti dealer are dedicated to serving all your automotive needs. Your complete satisfaction is our primary concern. Your Infiniti dealer is available to assist you with all your automobile sales, parts and service requirements.

If, however, a situation arises that you believe has not been addressed to your satisfaction, we ask that you take the following steps.

STEP 1:

Discuss the situation with the dealership management. If a problem still exists, contact the dealership's owner. Your Infiniti dealer is best equipped to resolve the matter for you.

STEP 2:

If the concern has still not been addressed to your satisfaction, please contact our Infiniti Consumer Affairs Department using our toll free number:

1-800-662-6200

The Consumer Affairs Department will ask for the following information:

- Your name, address, and telephone number
- Vehicle identification number (on dashboard and permanent Infiniti Total Ownership program card)
- Date of purchase
- Current odometer reading
- Your Infiniti dealership's name
- Details of the concern

Or you can write to Infiniti with the above information at:

INFINITI DIVISION
Nissan North America, Inc.
Consumer Affairs Department
P.O. Box 47038
Gardena, CA 90247-6838

STEP 3:

In the event that you believe Infiniti has been unable to satisfactorily address the problem, a special automotive complaint resolution program called AUTO LINE is available to you. The AUTO LINE program is independently operated by the Council of Better Business Bureaus, Inc. (BBB).

For information about the BBB AUTO LINE in your area, please call us (Infiniti) at the same toll free number

(1-800-662-6200). We will be happy to provide you with the address and phone number of your local BBB office or any other information about AUTO LINE.

Or you may contact the BBB at:

AUTO LINE
Council of Better Business Bureaus, Inc.
4200 Wilson Blvd.
Arlington, Virginia 22203
1 (800) 955-5100

If you call, the BBB staff will record the details of your complaint by telephone. They will ask for the same information as in Step 2.

The AUTO LINE program consists of two parts: mediation and arbitration. The AUTO LINE Staff will attempt to provide suggestions for resolving the problem during mediation. If a satisfactory resolution has not been achieved during mediation, you will have the opportunity to present your case personally before an impartial person or three person panel. This is the arbitration part of AUTO LINE. The arbitrator(s) will make a decision after the arbitration hearing.

INFINITI OWNER SATISFACTION AND ASSISTANCE

The BBB must send you a final decision in your case within forty (40) days (plus 7 days, if you have not contacted Infiniti) unless you delay the process. If you accept the decision, it will be legally binding on you and Infiniti. If you do not accept the decision, it will not be legally binding on you or Infiniti. However, in some states, if the decision is not accepted, it may be introduced either by you or by Infiniti as evidence in a subsequent court action.

BBB AUTO LINE is an informal dispute settlement mechanism operated to comply with applicable Federal law and regulations. In states where BBB AUTO LINE is available, you are required to use BBB AUTO LINE before exercising rights or seeking remedies under Title 1 of the Federal Magnuson-Moss Warranty Act, 15 U.S.C. §2301, et. seq. If you choose to seek remedies other than those created by Title 1 of the Magnuson-Moss Warranty Act, (for example, under state law), that Federal Act does not require you to first use BBB AUTO LINE. The program is still available to you, however, and may be of considerable assistance. Some states specify that informal dispute settlement mechanisms such as BBB AUTO LINE must be used before you may use state-operated complaint resolution processes, before you may file a law-

suit under state law, and/or before you may have certain other rights or remedies available under state law. In accordance with those states' laws, Infiniti requires the prior use of BBB AUTO LINE in good faith before you resort to such other processes, file a lawsuit, or seek other remedies provided by state law. Please see the "Supplement to 2006 Infiniti Warranty Information Booklet & 2006 Infiniti Owner's Manual" for additional information.

AUTO LINE may not be available in all states. We, Infiniti, can provide you with information about the availability of AUTO LINE in your state, or call the AUTO LINE number listed above.

ELIGIBILITY: Infiniti vehicles less than four years old from date delivered to the first retail buyer or otherwise put into use, and with fewer than 60,000 miles, are eligible for the program.

ASSISTANCE OUTSIDE OF WARRANTY

In support of our commitment to the "Total Ownership Experience," Infiniti may occasionally offer to pay or reimburse for part or all of the cost of making certain, specific repairs beyond or outside of the terms of the warranty for some specific vehicle models. (Some states refer to such programs as

"adjustment programs"). In such circumstances Infiniti mails notices to all known registered owners of affected vehicles. You may additionally inquire of your authorized Infiniti dealer or of Infiniti directly at the number listed below of the applicability of such programs to your vehicle.

Infiniti may occasionally offer special assistance that may pay for part or all of vehicle repairs beyond the expiration of the limited warranty period on a case by case basis. Should you experience unusual difficulties with your vehicle please discuss the situation with your dealer. If your dealer is unable to assist you, you may call the Infiniti Consumer Affairs Department at 1-800-662-6200 to discuss your concern. You will need to provide the Model, Model Year, VIN (Vehicle Identification Number), mileage, maintenance history, a detailed explanation of the concern, and why you believe that Infiniti should be responsible for the repair. Your request will be individually investigated and you will be informed of Infiniti's decision.

Please also review the "Supplement to the 2006 Infiniti Warranty Information Booklet & 2006 Owner's Manual" for important information concerning consumer rights in your state.

The following statement is required to be provided by regulations of the California Air Resources Board.

YOUR WARRANTY RIGHTS AND OBLIGATIONS

The California Air Resources Board is pleased to explain the emission control system warranty on your 2006 vehicle. In California, new motor vehicles must be designed, built and equipped to meet the State's stringent anti-smog standards. Nissan must warrant the emission control system on your vehicle for the periods of time listed below provided there has been no abuse, neglect or improper maintenance of your vehicle.

Your emission control system may include parts such as the fuel-injection system, the ignition system, catalytic converter and engine computer. Also included may be hoses, belts, connectors and other emission-related assemblies.

Where a warrantable condition exists, Nissan will repair your vehicle at no cost to you including diagnosis, parts and labor.

As the vehicle owner, you are responsible for the performance of the required maintenance listed in your Owner's Manual. Nissan recommends that you retain all receipts covering maintenance on your vehicle, but Nissan cannot deny warranty solely for the lack of receipts or for your failure to ensure the performance of all scheduled maintenance.

You are responsible for presenting your vehicle to an Infiniti dealer as soon as a problem exists. The warranty repairs should be completed in a reasonable amount of time, not to exceed 30 days.

As the vehicle owner, you should also be aware that Nissan may deny you warranty coverage if your vehicle or a part has failed due to abuse, neglect, improper maintenance or unapproved modifications.

If you have any questions regarding your warranty rights and responsibilities, you should contact Infiniti's Consumer Affairs Department at 1-800-662-6200 or the California Air Resources Board at 9528 Telstar Avenue, El Monte CA 91731.

Some states do not allow the exclusion or limitation of incidental or consequential damages or limitations on how long an implied warranty lasts, so the above limitations or exclusions may not apply to you. These warranties give you specific legal rights, and you may also have other rights which vary from state to state.

Nissan does not authorize any person to create for it any other warranty, obligation or liability in connection with this vehicle.

2006 INFINITI CALIFORNIA VEHICLE EMISSION CONTROL WARRANTIES

WHAT YOU MUST DO

In order to obtain warranty service you must deliver the vehicle to any authorized Infiniti dealer in the United States at your expense. You are responsible for the required maintenance on your vehicle as outlined in the maintenance instructions in your Owner's Manual. Nissan recommends that you retain all receipts covering maintenance on your vehicle, but Nissan cannot deny warranty solely for the lack of receipts or for your failure to ensure the performance of all scheduled maintenance.

WHAT NISSAN WILL DO

Warranty repairs will be made at no charge for parts and/or labor, including diagnosis and tax. Any needed parts replacement will be made using new or remanufactured parts.

OTHER WARRANTY TERMS

PERFORMANCE WARRANTY CLAIMS PROCEDURE

You may make a claim under the Performance Warranty immediately after the failure of a "smog check" test. You must provide proof of this failure when making your claim in order to avoid additional "smog check" test charges.

You will be told whether Nissan will honor your claim within 30 days of the date you make the claim, unless a shorter time period is required by law. If your claim is denied, Nissan will notify you

in writing of the reason. If we do not notify you within this time period, we will repair your vehicle under this warranty at no cost to you. The time period for notification will not apply if you request a delay or a delay is caused by events not under the control of Infiniti dealers.

No claim will be denied under the Performance Warranty because you use a certified part for maintenance or repair.

MAINTENANCE SERVICE AND REPLACEMENT PARTS

Important information concerning maintenance service and replacement parts is on page 14 of this booklet. No warranty claim will be denied solely because a non-Nissan part was used for maintenance or repair.

CALIFORNIA VEHICLE INSPECTION PROGRAM

Under this program, if your vehicle fails a "smog check" test, you may choose to have diagnosis of the failure and repairs made at an Infiniti dealer or at another service facility. If the inspection failure is the result of a condition covered by these warranties, you must take your vehicle to an Infiniti dealer for warranty repairs. This includes parts, labor and diagnosis. You must pay for diagnostic costs if performed at another service facility except in the case of emergency repairs as outlined below.

You must pay for all diagnostic and repair costs of an inspection failure as required by law if the failure was caused by conditions not covered by these warranties. If the failure is the result of a combination of conditions, you must pay for only the diagnostic and repair costs related to items not covered by these warranties.

After the 4 years/60,000 mile performance warranty has passed, a "smog check" test failure due to a defect in a part which is warranted for 7 years/70,000 miles is covered.

EMERGENCY REPAIRS

In case of an emergency, when an authorized Infiniti dealer is not reasonably available, warranty repairs may be performed at any service facility or by the owner using any replacement parts. Infiniti will reimburse you for such repairs, including diagnosis, up to the amount of Infiniti's suggested retail price for parts and labor charges based on Infiniti's recommended time allowance for the warranty repair and the geographically appropriate hourly labor rate. A part not being available or a repair not being complete within 30 days also constitutes an emergency. You must take the replaced part and paid receipts to an authorized Infiniti dealer for repayment in such emergency situations.

MAINTENANCE RECORDS

Receipts covering the performance of regular maintenance are not required but should be kept in the event questions arise concerning maintenance. The receipts should be transferred to subsequent owners.

IF YOU HAVE QUESTIONS

You may obtain further information concerning these warranties by following the procedure outlined in the "INFINITI OWNER SATISFACTION & ASSISTANCE" section of this booklet. You may also contact or report any violations to the Office of Transportation and Air Quality, Vehicle Compliance Programs Group, U.S. Environmental Protection Agency, Ariel Rios Building (6405J), 1200 Pennsylvania Avenue, N.W., Washington, D.C. 20460 or the Chief, Mobile Source Division, Air Resources Board, 9528 Telstar Ave., El Monte, CA. 91731.

OTHER OBLIGATIONS

Nissan does not authorize any person to create for it any other warranty, obligation or liability in connection with this vehicle.

The Emission Warranty for 2006 vehicles certified for sale in California may be subject to future administrative or judicial action. As a result, this warranty may be changed. Nissan will make those changes required by future law, regulation, or judicial or administrative action. In addition, Nissan reserves the right to change the terms of the warranty to be consistent with these actions.

RECOMMENDATION FOR MAINTENANCE SERVICE AND REPLACEMENT PARTS

RECOMMENDATION FOR MAINTENANCE SERVICE AND REPLACEMENT PARTS

To assure best results and to maintain the original quality built into the emission control systems, it is recommended that parts and accessories supplied by Nissan for use on Infiniti vehicles be used when servicing or repairing the systems.

THE WARRANTY OBLIGATIONS ARE NOT DEPENDENT UPON THE USE OF ANY PARTICULAR BRAND OF REPLACEMENT PARTS AND THE OWNER MAY ELECT TO USE NON-GENUINE NISSAN PARTS FOR REPLACEMENT PURPOSES.

The use of replacement parts which are not equivalent to genuine Nissan parts may reduce the effectiveness of the emission control system.

Therefore, if it becomes necessary to use other than genuine Nissan parts, the owner should assure himself that such parts are warranted by their manufacturer to be equivalent in quality to genuine Nissan parts.

MAINTENANCE, REPLACEMENT OR REPAIR OF THE EMISSION CONTROL DEVICES AND SYSTEMS MAY BE PERFORMED BY ANY AUTOMOTIVE REPAIR ESTABLISHMENT OR INDIVIDUAL USING ANY EQUIVALENT REPLACEMENT PART.

HOWEVER, UNLESS OTHERWISE AUTHORIZED BY LAW, WARRANTY SERVICE MUST BE PERFORMED BY AN AUTHORIZED INFINITI DEALER.

The emission standards may be satisfied by having the vehicle inspected periodically and by following the requirements outlined in the Emission Control System Maintenance Schedules in your Owner's Manual.

REPLACEMENT BATTERY LIMITED WARRANTY

WHAT IS COVERED?

Nissan* warrants your Genuine Infiniti Replacement Battery as described below except as stated under “What is not covered?”

This warranty covers defects in materials and workmanship.

HOW LONG IS THE WARRANTY AND WHAT NISSAN WILL DO

NISSAN will replace your battery without charge if it becomes unserviceable within the first 24 months of service.

If the battery becomes unserviceable after 24 months of use, NISSAN will provide a replacement battery at a reduced price, charging only for the portion of the life of the battery actually used. This is called a “pro-rata adjustment”. NISSAN will pay for all labor charges in replacing the battery if it was originally installed by an authorized INFINITI or NISSAN dealer.

This warranty and the “pro-rata adjustment” end 84 months after the date of the battery’s purchase or installation, whichever is earlier.

WHAT IS NOT COVERED?

This warranty does not cover:

1. Damage or failure resulting from:
 - Accident, theft, fire, or freezing.
 - Misuse of the battery or vehicle in which it is installed, including the use in applications for which the battery was not designed. Proper use is described in the vehicle’s Owner’s Manual.
 - Improper installation or battery charging.
 - Vehicle electrical malfunctions not covered by your New Vehicle Limited Warranty.
 - Modification or improper repair of the vehicle or a part of the vehicle
 - Use of parts not equivalent in quality or design to parts supplied by INFINITI or NISSAN.
 - Environmental conditions, including, but not limited to flood, and salt spray or salt water.
2. Normal maintenance service and recharging of discharged batteries.
3. Batteries in service more than 84 months.
4. Salvage Title. This warranty does not cover damage, failure, or corrosion to any Genuine INFINITI battery installed in the vehicle, if the vehicle is issued a “salvage” or similar title unless state

law expressly states otherwise. (This exclusion does not extend to a new Genuine INFINITI battery installed in the vehicle after the issuance of a “salvage” or similar title).

WHAT YOU MUST DO

In order to obtain warranty service, you must deliver the warranted battery or the vehicle in which the battery is installed to an authorized Infiniti dealer in the U.S. or Canada at your expense, with proof of purchase (parts invoice or service repair order from an authorized Infiniti dealer). The names and addresses of authorized Infiniti dealers are listed in telephone directories or *Infiniti.com*.

If the “pro-rata adjustment” applies, you must pay for the portion of the 84 month warrantable life that you actually used. The amount you pay is computed in two steps. First, the customer pay percentage is determined from the chart shown below based upon the months of actual battery service.

Months In Service	Customer Pay Percentage
0-24	0%
25-32	25%
33-50	50%
51-84	75%

REPLACEMENT BATTERY LIMITED WARRANTY

Second, the current suggested retail price of the new battery is multiplied by the customer pay percentage. For example, should the battery fail after 40 months of service you would pay 50% of the suggested retail price of the new battery.

You must also pay for the labor charge to remove and replace the battery if it was not originally installed in your vehicle by an authorized INFINITI or NISSAN dealer.

Some states do not allow the exclusion or limitation of incidental or consequential damages or limitations, so the above limitations or exclusions may not apply to you. This warranty gives you specific legal rights, and you may also have other rights, which vary from state to state.

Nissan does not authorize any person to create for it any other warranty, obligation or liability in connection with this vehicle.

HOW WILL PRORATED CHARGES BE CALCULATED?

Replacement price will be calculated by multiplying the tire's advertised retail selling price at the time of adjustment by the percentage of usable original tread that has been worn off. You pay for mounting, balancing and applicable taxes.

Example: If your disabled tire had an original 8/32" of usable treadwear and is worn to 4/32" usable tread remaining, you have used 50 percent and, therefore, must pay 50 percent of the current advertised selling price of the replacement tire. If the price of the new replacement tire is \$80, the cost to you would be \$40 plus any additional charges such

as mounting, balancing and applicable taxes.

WHAT IS A COMPARABLE TIRE?

A comparable new Dunlop tire may either be the same line of tire or, in the event that the tire is not available, a tire of the same basic construction and quality with a different side-wall or tread configuration. If a higher priced tire is accepted as replacement, the difference in price will be at an additional charge to you.

ADDITIONAL PROVISIONS

A tire has delivered its full original treadlife and the coverage of this warranty ends when the treadwear indicators become visible (worn to 2/32"), or six (6) years from the date of original tire manufacture or new tire purchase date. (Without proof of purchase, date of manufacture will be used to determine age.)

Any replacement tire provided pursuant to this warranty will be covered by the Dunlop warranty in effect at the time of replacement.

LIMITATIONS

This limited warranty is applicable only in the United States and Canada.

DUNLOP PASSENGER TIRE LIMITED WARRANTY

WHAT IS NOT COVERED BY THIS WARRANTY?

This limited warranty does not cover the following:

- Tires submitted for ride disturbance complaints that are worn beyond the first two thirty-seconds of an inch (2/32") tread depth.
- Dunlop does not warrant or give credit in any adjustment transaction for any kind of material added to a tire (e.g., tire fillers, sealants, balancing substances) after the tire leaves a factory producing Dunlop tires, nor will it adjust any tire that has failed as a result of adding such material.
- Irregular wear or damage due to mechanical condition of the vehicle, improper inflation, overloading, high speed spin-up, misapplication, misuse, negligence, racing, use of tire chains, improper mounting or demounting, improper repair, wreck, collision or fire.
- Road hazards (includes, but not limited to, punctures, cuts, snags, impact breaks, etc.).
- Any tire that after leaving a factory producing Dunlop tires has been intentionally altered to change its appearance (e.g., white inlay on a black tire, regrooving or siping).
- Tires with weather-cracking that were purchased more than four (4) years prior to presentation for adjustment or, if purchase date

cannot be verified, manufactured more than four (4) years prior to presentation for adjustment.

- Loss of time, inconvenience, loss of vehicle use, incidental or consequential damages.

WHAT ARE YOUR LEGAL RIGHTS?

Some states and provinces do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations or exclusions may not apply to you. No representative or dealer has authority to make any representation, promise, or agreement on behalf of Goodyear Dunlop Tires North America, Ltd. (GDTNA), except as stated herein.

Any tire, no matter how well constructed, may fail in service or otherwise become unserviceable due to conditions beyond the control of the manufacturer. Under no circumstances is this warranty a representation that a tire failure cannot occur.

This warranty gives you specific legal rights, and you may also have other rights that vary from state to state and in Canada province to province.

HOW DO YOU OBTAIN AN ADJUSTMENT?

- A. You must present the tire to be adjusted to an authorized Dunlop service facility. Tires

replaced on an adjustment basis become the property of Goodyear Dunlop Tires North America, Ltd. or Goodyear Canada Inc.

- B. You must pay for taxes and any additional services you order at the time of adjustment.
- C. You must submit your claim on a GDNTA claim form supplied by an authorized Dunlop service facility. The form must be filled out completely and signed by you, the owner of the tire presented for adjustment, or your authorized agent.

TIRE CARE AND MAINTENANCE GUIDE

The easiest way to help ensure satisfactory mileage and performance from your Dunlop tires is to give them a simple but frequent inspection for proper inflation, even treadwear, and the presence of any damage.

DO MAINTAIN PROPER INFLATION PRESSURE IN YOUR TIRES

Proper inflation pressure is necessary for optimum tire performance, safety and fuel economy. To maintain proper inflation pressure, frequently check tires (when they are cool) with an accurate tire pressure gauge.*

For example, it is difficult to tell just by looking at radial tires whether they are underinflated.

(cont'd next page...)

DUNLOP PASSENGER TIRE LIMITED WARRANTY

Furthermore, when operating a vehicle equipped with radial tires, it is difficult to notice when a tire has gone flat or nearly flat since the “feel” of the vehicle does not change significantly.

***Evidence of air loss or repeated underinflation always requires expert inspection to determine the source of leakage and tire removal to determine repairability.** To avoid injury, **NEVER** attempt to reinflate a tire that has been run severely under-inflated.

Progressive air loss may result from punctures, cuts, curbing, impacts or partial bead unseating. Some fitment causes for air loss are (1) incomplete bead seating, (2) bead tearing caused by a machine tool due to insufficient lubrication or improper adjustment, (3) leaking valve core or rubber valve components. These should be replaced when problems are detected and whenever tires are replaced.

Always maintain inflation pressure at the level recommended by the vehicle manufacturer as shown on the vehicle placard or in the owner’s manual:

Underinflation is the leading cause of tire failure and may result in severe cracking, component separation or “blowout.” It reduces tire load capacity, allows excessive sidewall flexing and increases

rolling resistance, resulting in heat and mechanical damage. Maintaining proper inflation pressure is the single most important thing you can do to ensure tire durability and maximum treadlife.

Overinflation increases stiffness, which may deteriorate ride and generate unwanted vibration. Overinflation also increases the chances of impact damage.

DON’T OVERLOAD YOUR VEHICLE

Check your vehicle owner’s manual to determine the load limits. Overloading your vehicle places stress on your tires and other critical vehicle components. Overloading a vehicle can cause poor handling, increased fuel consumption and may cause tire failure.

Never fit your vehicle with new tires that have less load capacity than shown on the vehicle tire placard and remember that optimum rim width is important for proper tire load distribution and function.

The maximum load capacity stamped on the sidewalls of P-Metric tires is reduced by 10 percent when used on a light truck, utility vehicle or trailer. Never fit P-Metric tires to light trucks that specify LT-type replacement tires.

DON’T SPIN YOUR TIRES EXCESSIVELY

Avoid excessive tire spinning when your vehicle is stuck in snow, ice, mud or sand. The centrifugal forces generated by a free-spinning tire/wheel assembly may cause sudden tire explosion resulting in vehicle damage and/or serious personal injury to you or a bystander. Never exceed 35 mph/60 km/h as indicated on your speedometer. Use a gentle backward and forward rocking motion to free your vehicle for continued driving. Never stand near or behind a tire spinning at high speed as, for example, while attempting to push a vehicle that is stuck or when an on-the-car spin balance machine is in use.

DO CHECK YOUR TIRES FOR WEAR

Always remove tires from service when they reach two thirty-seconds of an inch (2/32”) remaining tread depth. All new tires have treadwear indicators which appear as smooth banks in the tread grooves when they wear to the two thirty-seconds of an inch (2/32”) level. Many wet weather accidents result from skidding on bald or nearly bald tires. Excessively worn tires are also more susceptible to penetrations.

SIDEWALL TREATMENTS

Dunlop sidewalls are specially compounded to resist ozone cracking or weather-cracking.

DUNLOP PASSENGER TIRE LIMITED WARRANTY

Use a mild soap solution to clean sidewalls, white striping or lettering, and rinse off with plain water. Instruct service personnel and customers never to apply any other material to enhance sidewall appearance. These may degrade rubber and remove inherent ozone resistance.

DO CHECK YOUR TIRES FOR DAMAGE

Frequent inspection of your tires for signs of damage and their general condition is important for safety. If you have any questions, have your tire dealer inspect them. Impacts, penetrations, cracks, knots, bulges, or air loss always require tire removal and expert inspection. Never perform a temporary repair or use an innertube as a substitute for a proper repair. Only qualified persons should repair tires.

PROPER TIRE REPAIR

NOTE: Dunlop does not warrant any inspection or repair process. The repair is entirely the responsibility of the repairer and should be made in accordance with established Rubber Manufacturers Association (RMA) procedures.

DON'T ATTEMPT TO MOUNT YOUR OWN TIRES

Serious injury may result from explosion of tire/rim assembly due to improper mounting procedures. Follow tire manufacturer's instructions and match tire diameter to rim diameter. Mount light truck radi-

als on rims approved for radial service. Do not apply bead sealer. This can inhibit bead seating. Lubricate beads and tire rim (including tube or flap) contact surfaces. Lock assembly on mounting machine or place in safety cage. STAND BACK and never exceed 40 psi to seat beads. Never use a volatile substance or a rubber "donut" (also known as a bead expander or "O-Ring") to aid bead seating. Only specially trained persons should mount tires.

DON'T MIX TIRES OF DIFFERENT SIZES AND TYPES ON THE SAME AXLE

For optimum handling and control, Dunlop recommends fitment of four (4) tires of the same type and size unless otherwise specified by the vehicle manufacturer.

FOLLOW THESE ADDITIONAL GUIDELINES:

Fit newest tires on rear axle. If radials and non-radials must be fitted to the same vehicle, fit radials on rear axle. Never mix radials and non-radials on the same axle. When fitting snow tires or all-season tires to performance vehicles, always fit in sets for four. Do not fit tires with different speed ratings.

Use of lift kits with some vehicle/tire combinations can cause instability. When changing tire sizes, always consult dealer for optimum rim width and carefully check vehicle/tire clearances.

RETRADED TIRES

Retreaded passenger and light truck tires are not warranted by Dunlop for any reason. Dunlop speed ratings and U.S. Department of Transportation test compliance certifications are voided for retreaded tires.

DO MAINTAIN VEHICLE SUSPENSION, WHEEL ALIGNMENT AND BALANCE AND ROTATE YOUR TIRES

Lack of rotation, worn suspension parts, underinflation/over-inflation, wheel imbalance, and misalignment can cause vibration or irregular tire wear. Rotate your tires according to your vehicle manufacturer's recommendations or at maximum intervals of 6,000 miles/10,000 km.

LIGHTWEIGHT TEMPORARY SPARE TIRES IMPORTANT SAFETY INSTRUCTIONS

- Limit vehicle speed when using the lightweight temporary spare tire to 50 mph/80 km/h or less.
- Check the inflation pressure before using and at least weekly. Maintain cold tire pressure in accordance with that molded on the tire sidewall or found in your vehicle owner's manual. When inflating or adding air to light-weight temporary spare tire, be very careful, since the smaller tire volume can gain pressure quickly. Leave valve core in place and add inflation air in short bursts. Check the pressure often with (cont'd next page...)

DUNLOP PASSENGER TIRE LIMITED WARRANTY

an in-line or hand gauge until the specified pressure is reached.

- The lightweight temporary spare tire may lower ground clearance when used. Reduce speed and avoid driving over large obstacles or through chuckholes and other road hazards.
- Check your car owner's manual for other special clearance precautions when using the lightweight temporary spare tire provided in your vehicle.
- Because your lightweight temporary spare tire was specifically designed for your car, it should not be used on any other vehicle.
- Do not use snow chains on your lightweight temporary spare tire. This could cause damage to your vehicle.
- Your lightweight temporary spare has very limited wear potential (up to 300 miles/500 km).
- In order to conserve tire treadlife, the lightweight temporary spare tire should be returned to your trunk as soon as the standard tire has been repaired or replaced. Never use the spare if treadwear indicator (TWI) bars are exposed or it is worn to the last 2/32" tread depth.
- Do not use your original equipment lightweight temporary spare tire on any other than its original equipment rim. The replacement lightweight temporary spare tire must match the

original equipment tire removed from your lightweight temporary spare rim. Check the tire for the lightweight temporary spare tire size marking designation and compare size markings with those found on both your original lightweight temporary spare and rim.

NOTE: Your original equipment lightweight temporary spare tire and rim combination is not the same size as the other tires and rims with which your vehicle is equipped. Standard tires, snow tires, conventional wheel covers or rim rings should not be fitted to your lightweight temporary spare tire rim or assembly.

- Improper mounting can cause tire/rim assembly explosion and serious injury. Tire Fitters: Follow tire manufacturer's instructions and match tire diameter to rim diameter. Mount the lightweight temporary spare tire only on a rim originally fitted with a temporary spare of the same size. Lubricate beads and rim contact surfaces. Lock assembly on mounting machine or place in a safety cage. **STAND BACK;** inflate in short bursts with extension hose, clip-on chuck on in-line gauge. Never exceed 40 psi to seat beads or use a volatile substance or a rubber "donut" to aid bead seating. Only specially trained persons should mount lightweight temporary spare tires.

Dunlop brand tires are serviced by The Goodyear Tire & Rubber Company and Goodyear Canada Inc. through authorized Dunlop outlets.

You must go to an authorized Dunlop outlet for replacement tires and all warranty service.

GOODYEAR PASSENGER TIRE LIMITED WARRANTY

ELIGIBILITY

You are eligible for the benefits of this policy if you are the owner or authorized agent of the owner of new Goodyear highway auto tires bearing Department of Transportation prescribed tire identification numbers, and if your tires have been used only on the vehicle on which they were originally installed according to the vehicle manufacturer's recommendations.

COVERAGE (REPLACEMENT FREE)

Any new Goodyear highway radial auto tire covered by this policy, that does not deliver satisfactory highway service due to a workmanship or material related condition (see Adjustment Policy Limitations) during the first 25% of usable treadwear, or twelve months from date of purchase, whichever comes first, will be replaced with a comparable new Goodyear tire without charge. Mounting and balancing are included.

Any Goodyear temporary spare tire that does not deliver satisfactory highway service due to a workmanship or material related condition during the first 50% of usable tread depth (1/32 of an inch) will be replaced with a comparable new Goodyear temporary spare tire without charge. Mounting is included. After the first 50% of usable treadwear, you pay only an adjustment charge for the tread-

wear received, plus any mounting charge.

COVERAGE (PRORATED ADJUSTMENT)

Tires not eligible for no charge adjustment that do not deliver satisfactory service due to a workmanship or material related condition will be replaced with comparable new Goodyear tires on a pro rata basis. The replacement price will be calculated by multiplying the current Goodyear "predetermined price for adjustment" or current advertised price at adjustment location (whichever is lower) by the percentage of usable original tread that has been worn off at the time of the adjustment. You pay for mounting, balancing, and an amount equal to the full current Federal Excise Tax applicable to the comparable new replacement tire.

The "predetermined price for adjustment," available at all Goodyear Auto Service Centers and participating dealers, fairly represents the actual regular retail selling price of the comparable tire at the time of adjustment. If a "predetermined price for adjustment" is not available, adjustment will be based on the price at which you are entitled to buy at the time of adjustment.

A tire has delivered its full original tread life and this warranty ends when the treadwear indicators become visible, regardless of age or mileage.

DEFINITION OF COMPARABLE TIRE

A "comparable" new Goodyear tire may either be the same line of tire or, in the event the disabled tire is out of production, the same basic construction and quality with different sidewall or tread configuration.

If a higher priced tire is accepted as replacement, the difference in price will be additional.

Any tire replacement under this warranty will be covered by the Goodyear warranty in effect at time of replacement.

ADJUSTMENT POLICY LIMITATIONS

This limited warranty is applicable only in the United States and Canada.

No representative or dealer has authority to make any representation, promise, or agreement on behalf of Goodyear, except as stated herein.

The following are not covered by this policy:

- Goodyear does not warrant and will not give credit in any adjustment transaction for any kind of material added to the tire after leaving a Goodyear factory, nor will it adjust any tire which has failed as a result of adding any such material. (Example: Tire fillers, sealants, or balancing substances.)

GOODYEAR PASSENGER TIRE LIMITED WARRANTY

- Irregular wear or tire damage due to:
 - Road hazards (including punctures, cuts, snags, impact breaks, etc.).
 - Wreck, collision, or fire.
 - Improper inflation, overloading, high speed spinup, mis-application, misuse, negligence, racing, chain damage or improper mounting or demounting.
 - Mechanical condition of the vehicle.
 - Ride disturbance after the first 25% of usable treadwear or due to damaged wheels or any vehicle condition.
 - Temporary spare tires used on vehicle used in racing and on passenger cars in special applications, such as police pursuit service.
 - Any tire intentionally altered after leaving a Goodyear factory to change its appearance. (Example: White inlay on a black tire.)
 - Tires with weather cracking which were purchased more than four (4) years prior to presentation for adjustment. If you have no proof of purchase date, tires manufactured four (4) or more years prior to presentation are not covered.
- Loss of time, inconvenience, loss of use of the vehicle or consequential damage.

Some states do not allow the exclusion or limitation of incidental or consequential damages so the above limitations or exclusion may not apply to you.

Any tire, no matter how well constructed, may fail in service or otherwise become unserviceable due to conditions beyond the control of the manufacturer. This warranty is not intended as a representation that a tire failure cannot occur.

OWNER'S OBLIGATIONS

- a. You must present the tire to be adjusted to a Goodyear Auto Service Center or Goodyear Tire Dealer. (Please consult you telephone directory for locations.) Tires replaced on an adjustment basis become the property of The Goodyear Tire & Rubber Company.
- b. You must pay for taxes or any additional service you order at the time of adjustment.
- c. No claim will be recognized unless submitted on a Goodyear claim form (supplied by Goodyear dealer or Auto Service Center) completely filled out and signed by you, the owner of the tire presented for adjustment, or your authorized agent.

Note: For your convenience, your nearest authorized Infiniti dealership will also assist you with your tire service requirements.

MICHELIN PASSENGER AND LIGHT TRUCK TIRE LIMITED WARRANTY

ABOUT THIS WARRANTY

As the original purchaser of a Michelin® passenger or light truck tire, you are covered by all the benefits and conditions (subject to the maintenance recommendations and safety warnings) contained in this booklet. To ensure your understanding of and compliance with the terms and conditions of this warranty, please read it carefully. It is essential that you also read and understand the safety and maintenance recommendations for tires contained in this booklet.

WHAT IS COVERED AND FOR HOW LONG

Passenger and Light Truck Tires

Michelin® Passenger and Light Truck tires, used in normal service on the vehicle on which they were originally fitted and in accordance with the maintenance recommendations and safety warnings contained in the attached owner's manual, are covered by this warranty against defects in workmanship and materials for the life of the original usable tread, or 6 years from the date of purchase, whichever occurs first. At that time, all warranties, express or implied, expire. The usable tread is the original tread down to the level of the tread wear indicators -2/32nds of an inch (1.6mm) of tread remaining. Date of purchase is documented by new vehicle registration or tire sales invoice. If no proof of purchase is available, coverage will be based on the date of manufacture.

Replacement will be made in accordance with the terms and conditions described under "How Replacement Charges are Calculated". Note: your vehicle manufacturer may provide additional tire warranty coverage over and above what is provided by Michelin®. Consult your vehicle owner's manual for further information.

Temporary Spares

Michelin® temporary spare tires are covered by this warranty for 6 years from the date of purchase or until the first 2/32nds of an inch (1.6mm) of the original tread is worn off. Date of purchase is documented by new vehicle registration or tire sales invoice. If no proof of purchase, coverage will be based on date of manufacture. At that time, all warranties, express or implied, expire.

WHAT IS NOT COVERED

Tires which become unserviceable due to:

- Road hazard injury (e.g., a cut, snag, bruise, impact damage, or puncture);
- Incorrect mounting of the tire, tire/wheel imbalance or improper repair;
- Misapplication, improper maintenance, racing, underinflation, overinflation or other abuse;
 - Uneven or rapid wear which is caused by mechanical irregularity in the vehicle such as wheel misalignment, (a measured tread difference of 2/32nds of an inch (1.6mm) or more across the tread on the same tire);

- Accident, fire, chemical corrosion, tire alteration, or vandalism;
- Flat spotting caused by improper storage;
- The addition of liquid, solid or gaseous materials other than air, nitrogen or carbon dioxide (for example, waterbase sealers or balancing substances);
- Ozone or weather checking.

HOW REPLACEMENT CHARGES ARE CALCULATED

Passenger and Light Truck Tires

A tire which becomes unserviceable due to a condition covered by this workmanship and materials limited warranty will be replaced with a comparable new Michelin® tire, free of charge, when 2/32nds of an inch (1.6mm) or less of the original tread is worn, (or 25% or less, whichever is more beneficial to the user) and within 12 months of the date of purchase. Mounting and balancing of the tire is included. **You pay the cost of any other service charges and applicable taxes.**

When more than 2/32nds of an inch (1.6mm) of original tread has been worn (or more than 25%, whichever is more beneficial to the user) or after 12 months from the date of purchase, you must pay the cost of a comparable new Michelin® passenger or light truck replacement tire on a pro rata basis. The retailer will determine the charge by multiplying the percentage of the original usable tread

MICHELIN PASSENGER AND LIGHT TRUCK TIRE LIMITED WARRANTY

worn, by the current selling price at the adjustment location or the price in the current Michelin® Base Price List, whichever is lower. This list is based on a predetermined price intended to fairly represent the actual selling price of the tire. **You pay the cost of mounting, balancing and any other service charges and applicable taxes.**

Temporary Spare Tires.

A Michelin® Temporary Spare used in temporary service on the vehicle in which it was originally installed, which becomes unserviceable due to a condition covered by this warranty, will be replaced with a comparable new Michelin® Temporary Spare tire, free of charge, when it is worn less than 1/32nd of an inch (0.8mm). The cost of mounting and balancing is included. **You pay the cost of any other service charge and applicable taxes.**

When 1/32nd of an inch (0.8mm) of the original tread has been worn but less than 2/32nds of an inch (1.6mm) the tire will be replaced at 50% according to current actual selling price at the adjustment location. **You pay the cost of mounting, balancing, and any other service charges and applicable taxes.**

WHAT YOU MUST DO WHEN MAKING A CLAIM

When making a claim under the terms of this limited warranty, you must present your tire(s) to a participating Michelin® retailer. The vehicle on which the

Disregarding any of the safety precautions and instructions contained in the Owner's Manual or the Important Tire Safety Information in this booklet may result in tire failure or explosion causing serious personal injury or death.

CONTINENTAL/GENERAL TIRE LIMITED WARRANTY

GENERAL TIRE LIMITED WARRANTY AND ADJUSTMENT POLICY

This Limited Warranty and Adjustment (the “Policy”) is issued by Continental Tire North America, Inc. (the “Company”) and is applicable for General-brand original equipment tires and is a promise of replacement under certain specified conditions. This Policy applies to tires in normal service displaying adjustable conditions (see Section 4) and does not require the existence of a workmanship or material related condition in order to qualify for adjustment. THIS POLICY IS NOT A WARRANTY THAT YOUR TIRE WILL NOT FAIL OR BECOME UNSERVICEABLE IF NEGLECTED OR MIS-TREATED.

1. ELIGIBILITY

- This Policy applies to the owner of Passenger Car, Light Truck and Serva-Spare tires bearing the General brand name and serial numbers, and operated in normal service.
- Eligible tires must be the original equipment tires, used on the vehicle on which they were originally installed by the vehicle manufacturer.
- Tires branded “used” are not eligible under this Policy.

2. WHAT IS THE ADJUSTMENT POLICY AND FOR HOW LONG?

Limited warranty coverage is for a maximum period of 72 months from the date of purchase*, determined by the new vehicle registration date or new vehicle sales invoice showing date of purchase.

If an eligible Passenger or Light Truck or Serva-Spare tire, used in normal service, becomes unserviceable from a condition other than those listed under section 4, during or after the time or treadwear period shown below, it will be replaced with a comparable** new General brand tire according to (A) and (B) below.

(A) Free Replacement Policy:

	Time*	Treadwear
Passenger Tire	First 12 Months or First 2/32nds, (whichever comes first)>	Mounting & balancing included free of charge. Owner pays all applicable taxes.
Light Truck Tire	First 12 Months or First 2/32nds, (whichever comes first)>	Mounting & balancing included free of charge. Owner pays all applicable taxes. (Excluding F.E.T.)

Serva-Spare Tires

No Time Limit First 1/32nd Mounting & balancing included free of charge. Owner pays all applicable taxes.

(B) Pro Rata Replacement Policy: Passenger/Light Truck Tires

After the “Free Replacement Policy” expires (set forth in section 2A), and the tire is still within 72 months from the date of purchase*, you will pay, on a pro rata basis, for a comparable** new General brand replacement tire. A tire is eligible for an adjustment on a pro rata basis until the tread is worn down to the tread wear indicators (2/32nds of an inch of tread remaining). The tire tread is worn out at this point and this Policy ends regardless of time period. Owner pays all applicable taxes (including F.E.T.), mounting and balancing charges.

Serva-Spare Tires

After the “Free Replacement Policy” expires (set forth in section 2A), no adjustment will be made.

* At the time of claim, you need to present your new vehicle registration or new vehicle sales invoice showing date of purchase. If satisfacto-

CONTINENTAL/GENERAL TIRE LIMITED WARRANTY

ry proof-of-purchase date is not provided, the D.O.T. certificate on date of manufacture (the serial number) will be used.

** A “comparable” new General brand tire may be either the same tire line or the same basic construction but with a different sidewall or tread configuration. If a higher-priced tire is acceptable as replacement, the owner will pay the difference in price. Any tire replaced under this Policy will be covered by the current General Tire Limited Warranty and Adjustment Policy.

3. HOW A PRO RATA PRICE IS CALCULATED

The replacement tire price will be determined by multiplying the percentage of the usable tread worn by the Dealers Selling Price (excluding all applicable taxes) at the time of the adjustment or the General brand current published Adjustment Base Price, whichever is lower. The usable tread is the original tread down to the tread wear indicators (2/32nds of an inch of tread remaining). The Adjustment Base Price is intended to fairly represent a Dealer’s Selling Price for the same or comparable tire.

4. WHAT IS NOT COVERED BY THE ADJUSTMENT POLICY

a. The following conditions are not covered:

Road Hazard: Cuts, snags, punctures, bruises or impact breaks and any damage caused by puncture or tire repair

Ride/Vibration: After “Free Replacement Policy” (set forth in section 2A) expires.

Tire Damage or Failure Resulting From Improper Operation or Maintenance: Load, speed, and inflation practices causing excessive operational temperatures to exceed the tire capabilities.

Tire damage (including irregular treadwear) or failure resulting from: improper mounting or demounting, damaged rim, wheel alignment, tire trueing, chain damage, brakes or any similar mechanical problem, extreme temperature exposure, misuse, negligence, and abusive driving such as tire spinning, racing or accident damage.

Tire failure resulting from intentional alterations: such as adding a white inlay on a blackwall or sealant materials

Age Conditions: Weather checking/cracking coverage is for a maximum period of 48 months from the date of purchase.

b. General Exclusions-

Tire(s) submitted for an adjustment in service for longer than 72 months from date of purchase*, are not covered by this policy.

Tire(s) on any vehicle registered and normally operated outside the United States and Canada are not covered under this Policy. For tires on vehicles normally operated outside the United States and Canada, see the nearest General Tire dealer or distributor for local coverage.

Tire(s) transferred from the vehicle on which they were originally installed are not covered under this Policy.

Company does not offer tread wearout coverage up to a predetermined mileage under this Policy.

Tire(s) used on racing related activities or competitive events are not covered by this Policy.

5. COMPANY'S OBLIGATIONS

Any replacement qualifying under this Adjustment Policy will be made by any General brand authorized dealer or vehicle dealer authorized to handle General brand tire adjustments. Company will replace the tire pursuant to the terms of this Adjustment Policy.

6. OWNER'S OBLIGATIONS

To make a claim under this Policy concerning any tire which is covered by this Policy, you must present your claim with the tire to any General brand tire dealer or vehicle dealer authorized to handle General brand tires. For the nearest General brand tire dealer, check the Yellow Pages or use the General brand internet address, or one of the "800" numbers shown under "For Customer Assistance."

To be eligible for the terms of this Policy, you need to present your new vehicle registration form or new vehicle sales invoice showing date of purchase. Tires replaced on an adjustment basis become the property of the Company. You will be required to sign the Company Limited Warranty Claim Form or

dealer replacement sales receipt.

You are responsible for payment of applicable taxes, demounting, mounting and balancing charges set forth under this Policy. You are also responsible for payment of local tire-disposal fees and any parts or service regardless of mileage or months of service. This includes payment for tire rotation, alignment, towing, road service, valve stems and tire repairs.

Owner is responsible for maintaining proper tire air pressure and for proper maintenance of the tire.

SAFETY WARNING

Disregarding any of the safety precautions and instructions contained in the Owner's Manual or the Important Tire Safety Information in this booklet may result in tire failure or explosion causing serious personal injury or death.

IMPORTANT TIRE SAFETY INFORMATION*

Any tire, no matter how well constructed, may fail due to improper maintenance or service factors. This could create a risk of property damage and serious or fatal injury. Disregarding any of the safety precautions and instructions contained in this manual may result in tire failure or explosion causing serious personal injury or death. For your safety, comply with the following:

TIRE INFLATION

Keep tires inflated to the pressures recommended on the tire data placard. (See your Owner's Manual for location.) These inflation pressures must be maintained as a minimum. However, do not exceed the maximum pressure rating indicated on the tire sidewall.

CHECK INFLATION PRESSURES ON ALL YOUR TIRES, INCLUDING THE SPARE, WHEN TIRES ARE COLD, AT LEAST ONCE A MONTH BEFORE DRIVING

Failure to maintain correct inflation may result in improper vehicle handling and may cause rapid and irregular tire wear, sudden tire destruction, loss of vehicle control and serious personal injury. Therefore, inflation pressures should be checked at least once a month and always prior to long distance trips.

Pressures should be checked when tires are cold. The tires are cold when your vehicle has been driven less than a mile at moderate speed after being stopped for three or more hours.

CHECKING PRESSURE WHEN TIRES ARE HOT

If you must add air when your tires are hot, add four pounds per square inch (psi) (28kPa) above the recommended cold air pressure. Recheck the inflation pressure when the tire is cold.

For Example Only:

Gauge reading of hot tire: 32psi

If recommended pressure is: 30psi

Desired gauge reading of hot tire $30 + 4\text{psi} = 34\text{psi}$

Check cold pressures as soon as possible, at least by the next day. Never "Bleed" air from hot tires as your tire will be underinflated. Use an accurate tire gauge to check pressures. Never allow children to air up tires.

DRIVING ON ANY TIRE THAT DOES NOT HAVE THE CORRECT INFLATION PRESSURE IS DANGEROUS.

For replacement tires, the correct inflation pressure will be provided by your tire dealer, if not, refer to the vehicle decal.

Underinflation produces extreme flexing of the sidewalls and builds up heat which may result in sudden tire destruction and serious personal injury. Overinflation can cause the tire to be more susceptible to impact damage.

LOAD LIMITS

DO NOT OVERLOAD. DRIVING ON ANY OVERLOADED TIRE IS DANGEROUS. Never load your tires beyond the load carrying limits molded into the sidewall of the tires or the maximum vehicle load limit as shown on the vehicle tire data placard, whichever is less. Overloading causes heat to build up which can lead to sudden tire failure and serious personal injury.

SPEED LIMITS AND SPEED RATED TIRES

HIGH SPEED DRIVING CAN BE DANGEROUS. Never operate your vehicle in excess of lawful speeds or the maximum speeds justified by the driving conditions. Excessive speeds or racing can cause heat buildup in a tire leading to possible failure and serious personal injury.

*Provided by and published at the request of the tire manufacturers/warrantors.

IMPORTANT TIRE SAFETY INFORMATION*

Correct inflation pressure is especially important. However, at high speeds, even with the correct inflation pressure, a road hazard, for example, is more difficult to avoid and if contact is made, there is a greater chance of causing tire damage than at the lower speed. Moreover, driving at high speed reduces the reaction time available to avoid accidents and bring your vehicle to a safe stop. If you see any damage to a tire or wheel, replace it with your spare tire and see your tire dealer at once.

Tire speed ratings do not imply that a vehicle can be safely driven at the maximum speed for which the tire is rated. In addition, some damages or improper repairs may cause a speed-rated tire to lose its speed rating. Exceeding the tire's maximum speed rating will cause the tire to build up excessive heat which can cause tire damage that could result in sudden tire destruction and rapid air loss. Failure to control a vehicle with sudden air loss can lead to an accident. In any case, you should not exceed reasonable speeds as indicated by the legal limits and driving conditions.

SPEED SYMBOLS - are shown on the sidewall of some tires. The following table shows the maximum speed corresponding to the symbol.

SPEED RATINGS		
Speed Rating	Maximum km/Hr	Maximum mph
M	130	81
N	140	87
P	150	93
Q	160	99
R	170	106
S	180	112
T	190	118
H	210	130
V*	240	149
Z**	240	149

***Some V (or VR) rated tires may have a speed capacity of greater than 149 mph (240 km/h).** Consult your tire manufacturer for maximum speed ratings if your vehicle capability exceeds this speed.

****Z (or ZR) rated tires are designed for use on cars with maximum speed capabilities in excess of 149 mph (240 km/h).** Consult your tire manufacturer for maximum speed capabilities.

†Although a tire may be speed rated, we do not endorse the operation of any vehicle in an unsafe or unlawful manner. Speed ratings are based on laboratory tests which relate to performance on the road, but are not applicable if tires are underinflated, overloaded, worn out, damaged, altered, improperly repaired, or retreaded. Furthermore, tire speed ratings do not imply that vehicles can be safely driven at the maximum speed for which the tire is rated, particularly under adverse road and weather conditions or if the vehicle has unusual characteristics. Most highway passenger tires that do not have a speed symbol in the sidewall have a maximum speed rating of 105 mph. Light truck highway tires that do not have a speed symbol on the sidewall of the tire have a maximum speed of 87 mph. Some light truck tires may have higher maximum speeds; consult your tire dealer. The speed and other ratings of retreaded tires are assigned by the retreader and voids the original manufacturer's ratings.

*Provided by and published at the request of the tire manufacturers/warrantors.

IMPORTANT TIRE SAFETY INFORMATION*

IMPORTANT: In order to maintain the speed capability of the vehicle, replacement tires must have speed ratings equal to or higher than those fitted as original equipment (as indicated on the vehicle placard or owners manual). If tires with lower speed ratings are fitted, the speed capability of the vehicle will be lowered to the maximum speed capability of the replacement tire as indicated on the above table.

Remember...High speed driving can be dangerous and may be damaging to your tires.

And...When driving at highway speeds, correct inflation pressure is especially important.

Contact the manufacturer of your tires for their position and assistance on the repair of speed-rated tires. When you are replacing tires that have a speed rating, you must replace with tires of the same or higher speed rating if the speed capability of the vehicle is to be maintained.

VISUAL INSPECTION

INSPECT YOUR TIRES. DO NOT DRIVE ON A DAMAGED TIRE OR WHEEL. Check your tires frequently for scrapes, bulges, separations, cuts, snags, cracks, penetrations or excessive localized wear from hard braking. Also check for abnormal tire wear particularly on the edges of the tire tread which may be caused by misalignment or underinflation. Impacts can damage the inner portion of the tire without being visible on the outside. If damage can be seen on the tires or wheels, or if you suspect that possible impact damage may have occurred, replace with

spare at once and have your tire store or dealer inspect your tires immediately. Use of a damaged tire could result in tire destruction. When inspecting your tires, including the spare, check your air pressures. If your pressure check indicates that one of your tires has lost pressure of two pounds or more, look for signs of penetrations, valve leakage, or wheel damage that may account for the air loss.

All tires will wear out faster when subjected to high speeds as well as hard cornering, rapid starts, sudden stops, frequent driving on roads which are in poor condition, and off-road use. Roads with holes and rocks or other objects can damage tires and cause misalignment of your vehicle. When you drive on such roads, drive on them carefully and slowly, and before driving again at normal or highway speeds, examine your tires for any damage, such as cuts, bulges, penetrations, unusual wear patterns, etc.

WEAR BARS: Tires contain "Wear-Bars" in the grooves of the tire tread which **show up when only 2/32nds of an inch (1.6mm) of tread is remaining. At this stage, your tires must be replaced. Tires worn beyond this stage are dangerous.**

HAZARDS

Objects in the road that threaten a tire should be safely avoided. These objects are potholes, glass, metal, rocks, wood debris and the like. Unavoidable contact should prompt a thorough tire inspection. You may not always recall hitting an object that can damage or injure your tires. If while

driving, your vehicle experiences any unusual vibration, ride disturbance or noise and/or you suspect that possible damage to the tires or vehicle has occurred, **DO NOT JAM OR LOCK YOUR BRAKES!** Rather reduce your speed and drive with caution until you can safely pull off the road. Stop and inspect the tires. If the tire is underinflated or damaged, deflate, remove the tire and rim assembly and replace it with your spare. If you cannot detect a cause, have the vehicle towed to the nearest Infiniti dealer to have the vehicle inspected.

REPAIRING, MOUNTING AND DEMOUNTING OF TIRES

Do not attempt to repair, mount or demount a tire yourself. Tire changing can be dangerous and must be done by professionally trained persons using proper tools and procedures as specified by the Rubber Manufacturers Association (RMA). **Follow these mounting recommendations.** Your tires should be mounted on wheels of correct size and type and which are in good, clean condition. Bent, chipped or rusted wheels may cause tire damage. The inside of the tire must be free from foreign materials. **Have your dealer check the wheels before mounting new tires.** Mismatched tires and rims can explode during mounting. Also, mismatched tires and rims can result in dangerous tire failure on the road. If a tire is mounted by error on the wrong-sized rim, do not remount it on the proper rim - scrap it. It may be damaged internally (which is not externally visible) by being dangerously stretched and could fail on the highway.

IMPORTANT TIRE SAFETY INFORMATION*

Old valves may leak. When new tubeless tires are mounted, have new valves of the correct type installed. Tubeless tires must be mounted only on wheels designed for tubeless tires, i.e., wheels which have safety humps or ledges.

Never perform a temporary repair, use an innertube or inject sealant as a permanent substitute for a proper repair. Only qualified persons should repair tires.

Be sure that all your valves have suitable valve caps. This will keep valve cores clean and clear and guard against leakage.

REPAIRS

WHENEVER POSSIBLE, SEE A TIRE DEALER AT ONCE. *Some tire manufacturers do not warrant any inspection or repair process. The repair is entirely the responsibility of the repairer.* Punctures in the tread of a passenger tire which do not exceed 1/4 of an inch (6mm) in diameter can usually be repaired by following the Rubber Manufacturers Association (RMA) Passenger and Light Truck Repair procedures. *Contact the manufacturer of your tires for its position and assistance as to the acceptable location for a proper repair and the repair of speed rated tires.*

Do not use plug repairs. They may cause further damage to the tire. They are not always air tight and the plug may fail. Do not exceed posted speed limits on any repaired tire. Certain tire manufacturers speed ratings are voided if the tire is repaired.

Although a tire was properly repaired, internal structural damage resulting from the puncture may have occurred. Some time later the damage may cause the tire to be removed from service. If the tire has a puncture in the tread which exceeds 1/4 inch (6mm), the tire must be replaced. If any tire has sustained a puncture, have the tire inspected internally by a tire dealer for possible damage that may have occurred.

Improper mounting and inflation procedures can cause an explosion of the tire/rim assembly. Only specially trained persons should perform these tasks. Contact your tire store or dealer for assistance.

CAUTION - Never, under any circumstance, introduce a flammable substance into a tire.

WHEEL ALIGNMENT AND BALANCING

Wheel alignment and balancing are important for safety and maximum mileage from your tires. Check how your tires are wearing at least once a month. If your tires are wearing unevenly, such as the inside shoulder of the tire wearing faster than the rest of the tread, or if you detect excessive vibration, your vehicle may be out of alignment or balance. These conditions not only shorten the life of your tires, but adversely affect the handling characteristics of your vehicle which could be dangerous. If you detect irregular wear or vibration, have your alignment and balance checked immediately.

Tires which have been run underinflated will show more wear on the shoulders than in the center of the tread.

HARD BRAKING

You must inspect your tires after any hard braking circumstances or after tires have slid on the pavement. This can cause a flat spot in a section of the tire tread.

TIRE SPINNING

Never spin your tires above a speedometer reading of 35 mph (55 km/h) if your vehicle becomes stuck. The centrifugal force generated by the free spinning tire/wheel assembly may cause a sudden tire explosion; resulting in vehicle damage and/or serious personal injury or death. Never allow anyone to stand near or behind a tire spinning at high speed while attempting to push a vehicle that is stuck. When in mud, sand, snow, ice or other slippery conditions, do not indulge in excessive wheel spin. In such conditions, with automatic transmission vehicles, by accelerating the engine excessively, it is possible to spin one of the drive tires beyond its speed capability. This is also true when balancing a drive tire/wheel assembly using the engine of the vehicle to spin the wheel.

TIRE TREAD

Tires must be replaced when the depth of the tread reaches 2/32 inch (1.6 mm). Tires are manufactured with tread wear indicators molded into the tire grooves which indicate tread wearout. As tires

IMPORTANT TIRE SAFETY INFORMATION*

approach 2/32 inch (1.6 mm) wearout, the tread gauge becomes thinner and more vulnerable to the effects of road hazards. Also, worn tires are more subject to hydroplaning, which can cause loss of control. Therefore, visual tire inspection becomes more crucial as the tires wear out.

WORN TIRES

Never drive on worn tires. Tires should be replaced by trained personnel when 2/32nds of an inch tread depth remains, as indicated by the tread wear indicators molded into the tread grooves. In most states, it is illegal to drive with less than 2/32nds of an inch of tread remaining.

TIRE MIXING

For best performance *select tires similar in size and load rating to the original equipment tires*. It is recommended that the same size and type of tire be used on all four wheel positions. In certain tires, casing ply material and ply construction may vary as indicated on the sidewall of the tire. When changing or replacing tires, it is preferred that all four tires are the same construction type (i.e., High Performance, All Season, Mud & Snow) and construction (Radial or Bias Ply). Tires which meet the Rubber Manufacturer's Association (RMA) definition of mud and snow tires are marked M/S, M+S, M&S.

On such tires, this designation is molded into the sidewall. Tires without this notation are not recom-

mended for mud and/or snow driving.

Before mixing tires of different types on a vehicle in any configuration, be sure to check the vehicles owner's manual for its recommendations.

If snow tires are needed, it is necessary to select tires equivalent in size and load rating to the original equipment tires. Always fit performance snow tires in sets of four (4) for optimum mud and snow traction and maintenance of vehicle handling characteristics. If you do not, it may adversely affect the safety and handling of your vehicle. It is also important to check the vehicle owner's manual before mixing or matching tires on 4-wheel drive vehicles as this may require special precautions.

Please refer to your Owner's Manual for more information on tire replacement precautions.

TIRE ROTATION

Tires on your Infiniti vehicle should be rotated every 7,500 miles or as irregular wear develops. If irregular wear becomes apparent or if the wear rate on the tires is perceptibly uneven, the tires should be rotated in such a way to alleviate the problem. Check your vehicle for any mechanical problems and correct if necessary. Any rotation pattern or procedure may be followed including those indicated in the Owner's Manual. Some tires have arrows on the sidewall showing the direction in which the tire should turn. When rotating this type

of tire, care must be taken to maintain the proper turning direction as indicated by the arrows. *Some vehicles have different tire sizes specified for front and rear axles. Tires on these vehicles should be rotated side to side.* Where a temporary type spare tire is available, it should not be included in the tire rotation schedule. Such tires are intended for temporary use only. Whenever only two tires are replaced, the new tires should be put on the rear axle *of vehicles equipped with the same size tire on all four wheel positions.*

TRAILER TOWING

If you anticipate towing a trailer, you should see a tire dealer for advice concerning the correct size of tire and pressure. Tire size and pressure will depend on the type and size of the trailer and hitch utilized, but in no case must the maximum cold inflation pressure or the tire load rating be exceeded. Check the tire decal and your Owner's Manual for further recommendations on trailer towing.

TIRE ALTERATIONS

Do not perform any alterations on your tires. Alterations may prevent proper performance, leading to tire damage, which can result in an accident. Tires which become unserviceable due to alterations such as truing, whitewall inlays, addition of balancing or sealant liquids, may be excluded from warranty coverage. Consult your tire warranty.

IMPORTANT TIRE SAFETY INFORMATION*

HIGH PRESSURE TEMPORARY SPARE TIRES

- 1) The high-pressure spare tire in your Infiniti vehicle is designed for temporary use only and must not be used continually as a regular tire. The standard tire should be repaired and/or replaced as soon as possible.
- 2) Avoid driving over obstacles that may damage the tire through impact or cutting, such as potholes, glass, metal, etc.
- 3) Speed must not exceed 50MPH (80km/h) for non-speed-rated temporary spare tires.
- 4) Temporary spare tires have a limited treadlife which can vary depending on road conditions and your driving habits. The spare tire should be returned to the trunk as soon as the standard tire can be repaired or replaced.
- 5) Because the high-pressure spare tire was specifically designed for your car, it should not be used on any other vehicle.
- 6) Do not use snow chains on your high-pressure spare. This could cause damage to your vehicle.
- 7) Check the tire's cold inflation pressure monthly and maintain at 60psi (4.2kg/cm²) even when not in use.

- 8) The high-pressure spare tire should not be used with any other rim nor should standard tires, wheel covers, or trim rings be used on the high-pressure spare tire rim which was originally installed.
- 9) When the tread wear indicator appears on the tire, replace it only with the same type spare tire.
- 10) Do not enter an automatic carwash with a temporary spare tire fitted.
- 11) Do not make a sharp turn or apply the brakes suddenly when driving on a high-pressure temporary spare.

Note: When using *any* temporary type spare tire, be sure to follow the vehicle Owner's Manual instructions.

TIRE STORAGE

All tires should be stored in a cool dry place indoors so that there is no danger of water collecting inside them.

When tires are stored they should be stored in a cool place away from sources of heat and ozone such as hot pipes and electric generators. Be sure that surfaces on which tires are stored are clean and free from grease, gasoline or other substances which could deteriorate the rubber. (Tires exposed to these materials during storage or driving could be subject to sudden failure.)

TO AVOID DAMAGE TO YOUR TIRES AND POSSIBLE ACCIDENT:

- Check tire pressure at least once a month when tires are cold and before long trips.
- Do not underinflate/overinflate.
- Do not overload.
- Drive at moderate speeds, observe legal limits.
- Avoid driving over potholes, obstacles, curbs or edges of pavement.
- Avoid excessive wheel spinning.
- If you see any damage to a tire, replace with spare and see the tire manufacturer's dealer or your Infiniti dealership.

IMPORTANT TIRE SAFETY INFORMATION*

INFORMATION SPECIFIC TO YOUR BRIDGESTONE RUN-FLAT TIRES

SAFETY WARNING

When in “run-flat” mode, serious injury or death may result from:

- Tire failure due to excessive operation while running flat.
- Aggressive driving, or driving at speeds greater than 55 mph and/or distances greater than 50 miles.
- Tire failure preceded by vibration. If the vehicle begins to vibrate, gradually reduce speed and stop at a safe location. Tire must be replaced before proceeding.
- Handling tire immediately following run-flat operation. Due to the significant amount of heat generated, allow tire to cool before handling.
- Tire or system failure due to service performed by anyone other than specially trained personnel. For assistance, contact Bridgestone/Firestone at 1-800-847-3272 or your Infiniti dealer. Call 1-800-662-6200 for the location of your nearest Infiniti retailer.

CARE OF YOUR RUN-FLAT TIRES

Because of the unique, state-of-the-art technology in your run-flat tires, the low pressure warning system, and the Infiniti wheel on which they are mounted, it is important that you return to your Infiniti dealer or Bridgestone/Firestone Certified Run-Flat retailer service center for each of the following:

- Any tire problem.
- Tire rotation.
- Tire replacement. We recommend that you not mix run-flat tires with conventional non-run-flat tires as the handling characteristics of run-flat tires and conventional tires are different. Clearly you will not have the run-flat capability with the conventional tires.
- Any problems with the low tire pressure warning system.

SAFETY WARNING

Your run-flat tires are designed for limited operation in a run-flat mode. The tires are not designed for continual or repeated driving with air pressure below that recommended by Infiniti. In that situation, your tires will get overheated. This can cause premature failure of your run-flat tires that could lead to serious personal injury or death.

TIRE REPAIRS

Your Bridgestone run-flat tires should not be repaired. If they are damaged, they should be replaced by your Bridgestone/Firestone Run-Flat Certified Retailer under the terms of the Bridgestone/Firestone Run Flat Tire Warranty or by your Infiniti dealer.

For further information, the Consumer Tire Guide on passenger tire care, safety and mileage performance is available in the United States by writing the Tire Industry Safety Council, Box 1801, Washington, D.C. 20013.
