Support Information

Thank you for choosing the Freakyforms™ Deluxe: Your Creations, Alive! game for the Nintendo 3DS™ system.

Please read this manual carefully before using the software. Please also read your Nintendo 3DS Operations Manual for more details and tips to help you enjoy your playing experience.

Health and Safety Information

IMPORTANT

Before using this software, read all content within the Health and Safety Information application on the HOME Menu.

To access this application, tap the  icon on the HOME Menu, then tap Open and read the contents of each section carefully. When you are finished, press  HOME to return to the HOME Menu.

You should also thoroughly read the Nintendo 3DS Operations Manual, including the Health and Safety Information section, before using Nintendo 3DS™ software.

CAUTION - STYLUS USE

To avoid fatigue and discomfort when using the stylus, do not grip it tightly or press it hard against the screen. Keep your fingers, hand, wrist and arm relaxed. Long, steady, gentle strokes work just as well as many short, hard strokes.

Protecting Your Privacy

This software allows you to share information with other users via StreetPass communication, local wireless communication, and Download Play. Please keep the following in mind regarding the use of these features:

- To protect your privacy, do not give out personal information such as last name, phone number, birth date, age, school, e-mail, or home address when communicating with others.

When you download or use this software (including any digital content or documentation you download or use in connection with this software) and pay any applicable fees, you are granted a personal, non-exclusive, revocable license to use this software on your Nintendo 3DS system. Your use of this software is subject to the Nintendo 3DS Service User Agreement, which includes the Nintendo 3DS system Privacy Policy and the Code of Conduct.

Your Nintendo 3DS system and this software are not designed for use with any unauthorized device or unlicensed accessory. Such use may be illegal, voids any warranty, and is a breach of your obligations under the User Agreement. Further, such use may lead to injury to yourself or others and may cause performance issues and/or damage to your Nintendo 3DS system and related services. Nintendo (as well as any Nintendo licensee or distributor) is not responsible for any damage or loss caused by the use of such device or unlicensed accessory. Except as authorized, copying of any Nintendo software is illegal and is strictly prohibited by domestic and international intellectual property laws. "Back-up" or "archival" copies are not authorized.

Nintendo respects the intellectual property of others, and we ask Nintendo 3DS software Content Providers to do the same. In accordance with the Digital Millennium Copyright Act in the US, the Electronic Commerce Directive in the EU, and other applicable law, we have adopted a policy of removing, in appropriate circumstances and at our sole discretion, any Nintendo 3DS software that appears to infringe anyone else's intellectual property. If you believe your intellectual property rights are being infringed, please visit

www.nintendo.com/ippolicy to view the full policy and understand your rights.

CTR-P-ATQE-USZ

Welcome to
Freakyforms
Deluxe: Your
Creations,
Alive!

This game lets you create and interact with special creatures called formees. Build them using the colorful forms you collect, and then play with them as you explore your very own planet!

When you create five formees, something will happen. What, you ask? You'll have to play to find out!

As you progress through the game, you'll discover new friends, new forms, and new areas to explore. The more formees you create, the more you can do!

Information-Sharing Precautions

This software allows you to share the formees, formee-creation themes, and images you create with other players. Please note the following when using this software:

- When communicating with others, the information you enter (for example, your planet's name, your formees' names, and the themes you write in Formee Playhouse) may be viewed by many people, so please do not share personal information that could be used to identify you, such as your last name, phone number, birth date, age, school, e-mail, or home address when communicating with others. Likewise, do not enter data that might be offensive to others.

3 Controls

Most of the controls involve using your stylus to interact with the Touch Screen, but there are a few controls for which you can use the buttons.

4 Starting the Game

Tap the Touch Screen at the title screen to proceed to the main menu.

Naming Your Planet

The first time you play, you'll be asked to name your planet.

Once you've given your planet a name, that name cannot be changed, so be sure to choose carefully!

If you activate the StreetPass™ feature, your planet's name will be sent to anyone who receives content from you, so please don't use personally identifying information or language that others might find offensive in your planet's name. To protect your privacy, don't give out personal information, such as your last name, phone number, birth date, age, school, e-mail address, or home address when communicating with others.

As you progress through the game, new menu items become available to you. When a menu item becomes available, a **!** displays over that item.

1 Create

Here you can create and edit formees and scenery (pages 7-8) and try Creation Challenges using challenge packs you've discovered inside eggs (page 9). When you create a formee, you need a formee heart (♥) to bring it to life. You can have five formee hearts at a time; once used, formee hearts recharge at a rate of one per hour.

If you change the date and time in the System Settings, your formee hearts may not recharge properly.

2 Play

Here you can take formees exploring, equip your formees with special powers, take 3D photos, and use AR Card and QR Code® tools (pages 9-12).

3 Collection

Here you can view your formees, guests, friends, photos, accessories, and trophies (page 13).

4 Connect

If you've activated the StreetPass feature (page 14), go here to choose content to send to other players. You can also create formees with up to three other people here, via Download Play (page 15).

5 News

When a news bulletin arrives, icons like 🏠 and 🎁 display here. Tap an icon to view that bulletin.

6 Mailbox

If you've activated the StreetPass feature (page 14), go here to open the letters you receive.

7 Number of formees created

8 Savings

Use coins to shop in the catalog, play minigames, and buy extra copies of the special powers you've found.

Saving Data

When you create or confirm edits to a formee or piece of scenery, buy or equip a special power, finish an exploring trip, or perform other similar actions, your game is automatically saved. When data is being saved, "Saving..." is displayed on the Touch Screen.

Erasing All Data

Select Freakyforms Deluxe: Your Creations, Alive! from the Nintendo 3DS HOME Menu, and press and hold (A) + (B) + (X) + (Y) before the title screen displays to erase all data.

Erasing Specific Data

Erase your formees and guests by finding them in your collection and selecting Good-Bye (page 13). Erase pieces of scenery by finding them in Create Scenery and selecting Erase.

Once erased, data cannot be recovered, so please be careful.

- Data can be lost due to user action such as repeatedly powering off and on the system, or removing the Game Card or SD Card while saving. Data loss may also be caused by poor connectivity, due to dirt or dust in the system's ports. Please be aware that in these cases data cannot be restored.

1 Catalog

Use the catalog to buy new forms and view your guests, friends, and other formees as you create new ones. Tap Buy when a locked friend is selected to unlock it and obtain its forms.

2 Form categories

3 Color palette

4 Transformation tools

5 Menu

Hint	Gives you formee suggestions.
Tweak	Lets you adjust a formee with options like Mutate, Color Swap, and Squish.
Match	Creates a look-alike of one of your formees, friends, or guests, which you can then edit to create someone new.
Erase All	Wipes all forms from the drawing board.
Tutorials	Lets you rewatch Formsby's tutorials.
Undo	Undoes your last action.

How to Create/Edit Formees

Drag and drop forms from the categories at the top of the Touch Screen to create a formee's face, body, legs, etc. Gain access to additional forms by purchasing them from the catalog or discovering them while exploring. You can use up to 20 forms on a formee; how you arrange them is up to you, but your formee must have a mouth.

Note: You can't edit formees who are resting in the sanctuary or your guests.

Transforming Forms

When a form is selected, tap Animate to view its movement if it includes an animation. Tap ◀ / ▶ to switch between different options in its category, and select All to see and choose from all those options at once. Tap 🔍 to center on the selected form and zoom in on it. ⬆ can be used to change the zoom. ⌛ can be used to move around the drawing board. Tap 🔍 to return to normal view.

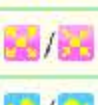

Transformation Tools

Transformation-tool options change depending on which form you select. Here are a few of the most common transformation tools.

 Copy

 Flip horizontally

 Lengthen/shorten vertically

 Widen/narrow horizontally

 Enlarge/shrink

 Rotate

Bringing a Formee to Life

When you're done creating/editing a formee, select Done. A formee heart will breathe life into your creation if it's brand new. You'll then proceed to a series of screens where you'll be asked to pick a name, favorite phrase, and voice for your creation. Once all this has been done, you'll be asked whether you want to equip your new formee with a special power (page 11) before you go exploring together.

① Select an Area

Tap  to select the area for which you want to create or edit scenery, then tap Confirm.

② Select a Kind of Scenery

Obtain new kinds of scenery while exploring to increase your options.

③ Create/Edit Scenery

To create new scenery, tap an empty panel and select Create. To edit existing scenery, tap the panel showing the piece you want to modify and select Edit. Creating and editing scenery is much like creating and editing formees, but you can only use up to 12 forms on a piece of scenery.

Note: When you're repainting a landscape, tap More to change the contents of the color palette.

More

Game Screens

1 Remaining time

When time runs out, your trip ends.

2 Score

This increases as your exploring formee walks, eats food, and does other things.

3 Bonus Chance wheel

When your score reaches 100 points, you get a free spin on the Bonus Chance wheel. As the wheel spins, different bonuses cycle through this box; the one that sticks is the bonus you get. Bonuses include temporary boosts to your exploring formee's speed, jump height, etc.

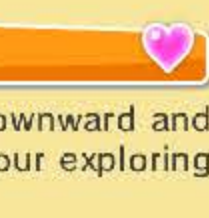

4 Savings

5 Eggs collected

Actions

Walking

Touch to the left or the right of the ● to get your exploring formee to walk in that direction.

Jumping

Grab and pull the ● downward and then release it to get your exploring formee to jump.

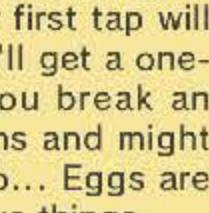

Eating

Grab and pull the ● to stretch your exploring formee in that direction. If you bring a formee's mouth to food, it will eat.

Eggs

Your exploring formee will sometimes lay an egg after eating food. If you bump its body into an egg, you'll pick up the egg. Once your trip is done, you'll proceed to the egg-breaking minigame if you picked up any eggs. Tap an egg to get it cracking. If you're very lucky, your first tap will smash it in two and you'll get a one-shot jackpot! When you break an egg, you'll receive coins and might receive other things too... Eggs are filled with many wondrous things.

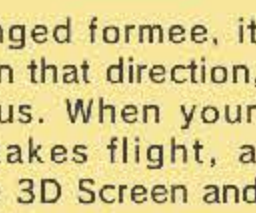

Trash

Your exploring formee will sometimes leave trash behind after it eats. If you bump its body into dropped trash, you'll toss the trash bag into a trash can and earn some extra points.

Flying

Formees that have wings can fly through the sky. If you touch the upper half of the Touch Screen while

Meter

exploring with a winged formee, it will take off and fly in that direction, following your stylus. When your exploring formee takes flight, a meter appears on the 3D Screen and starts to decrease. If it reaches zero, the formee will fall. The meter replenishes when the formee is back on the ground or pops a balloon.

Swimming

When your exploring formee is in water, touch around the ● to direct its swim. Formees with fins can swim freely through the water as long as they like. Formees without fins can only swim for a limited amount of time, so be sure to keep an eye on the meter that appears on the 3D Screen and starts to decrease when they're underwater. If it reaches zero, the formee will start moving very, very slowly. The meter replenishes when the formee is back at the surface or pops a bubble.

Treasure Chests

If you approach a treasure chest while holding a key, you'll open the chest. Treasure chests contain new kinds of scenery, minigames, and more!

Dungeons

If you enter a dungeon, that dungeon's adventure will begin.

10 Taking Photos

You can take 3D photos with formees and pieces of scenery.

① Select a Shot

② Select an Area

③ Set the Stage

④ Take a Photo

Tap Shoot to take a photo.

Note: Photos can be viewed in your photo album (page 13) and shared via the StreetPass feature (page 14).

Special powers are items that can be equipped to your formees. Special powers let formees do amazing things!

① Pick a Special Power

The number on a special power's package tells you how many copies of that special power you're currently holding.

② Choose a Formee

Each formee can be equipped with one special power. If you equip a special power to a formee who already has a special power, the old special power that formee had will be lost. When you equip a formee with a special power, you will be taken to the area-selection screen so that you can go exploring and try out the special power!

Out of Special Powers?

You can use coins to buy extra copies of special powers that you've found.

Taking AR Card Photos

You can use the "?" AR Card that came with your Nintendo 3DS system and your system's outer cameras to take 3D photos in which a formee and scenery objects appear right before you in real life.

Note: Photos taken this way can be viewed using the Nintendo 3DS Camera application on the HOME Menu. For details, please refer to the Nintendo 3DS Camera manual.

When playing AR Card games, you may have to move around the area while holding the Nintendo 3DS system. Make sure you have enough room, and hold the system firmly with both hands while playing.

Reading QR Code Patterns

You can use your Nintendo 3DS system's outer cameras to read QR Code patterns created by Freakyforms: Your Creations, Alive! and Freakyforms Deluxe: Your Creations, Alive!

Note: QR Code patterns can be generated by the My Formees and Guests albums in your collection (page 13).

1 Read a QR Code

Align your Nintendo 3DS system's outer cameras so the QR Code you want to read sits within the frame displayed on the 3D Screen.

2 Save the Formee

When you successfully read a QR Code, the encoded formee will appear on the 3D Screen. Welcome that formee to your planet as a guest to save it.

Loading QR Code Patterns

You can load QR Code patterns that have been saved to the SD Card.

As you progress through the game, you can develop your collection in six different categories: My Formees, Guests, Friends, Photos, Accessories, and Trophies.

My Formees

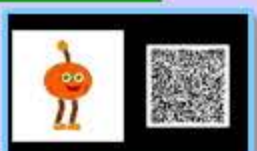

Here you can view all of the formees you've made. Select Good-Bye to erase a selected formee.

Note: You cannot erase formees who are resting in the sanctuary.

Once erased, data cannot be recovered, so please be careful.

Saving a Formee and Its QR Code to the SD Card

Select Save to SD Card to save one of your formees as an image that can be viewed using the Nintendo 3DS Camera application. (Use the arrows on the Touch Screen to select a background for an image.) To generate a QR Code to accompany an image, turn the QR Code setting on before tapping Save. When the QR Code setting is on, you will see a QR Code next to the formee on the 3D Screen.

Note: Formee images and QR Code patterns will be saved in the DCIM folder on the SD Card.

Guests

Here you can view all of the guests you've welcomed to your planet. Guests can be saved onto an SD Card the same way your own formees can be saved. Select Good-Bye to erase a selected guest. You can have up to 120 guests at a time; if you exceed 120 guests, new guests will replace (erase) older ones, starting with the oldest.

Note: Guests you have marked as favorites will not be deleted this way. You can have a maximum of 60 favorite guests.

Photos

Here you can view all of the photos you've taken and received via the StreetPass feature. Photos can be saved onto the SD Card the same way your formees and guests can be saved. Select Erase to erase a photo. You can have up to 30 photos at a time; if you exceed 30 photos, new photos will replace (erase) older ones, starting with the oldest.

Note: Photos you have marked as favorites will not be erased this way. You can have a maximum of 15 favorite photos.

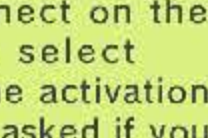

StreetPass Communication

If your Nintendo 3DS system gets close to another Nintendo 3DS system that has this game's StreetPass feature activated, your systems will automatically send and receive content that has been selected to be shared. As each player decides whether or not to share content, this interaction may or may not take the form of a one-for-one exchange. Players who have *Freakyforms Deluxe: Your Creations, Alive!* can communicate via StreetPass with players who have *Freakyforms: Your Creations, Alive!*

Note: For StreetPass communication to take place, both players must have the StreetPass feature activated on their systems and have wireless communication enabled.

Activating StreetPass

You can't activate the StreetPass feature right away, but as you progress through the game this feature will become available. When it becomes available, select **Connect** on the main menu and then select **StreetPass** to begin the activation procedure. You will be asked if you want to activate StreetPass for this title. To choose what content to send via StreetPass, select **Connect** from the main menu and then select **StreetPass**. You can set your formees, guests, and photos to be sent at random or choose what you want to send. Sending something to another player's planet doesn't mean it vanishes from yours. Your formees can visit other planets yet still be on yours, ready to explore whenever you are.

Note: If you send a formee or photo to another planet, please be aware that you cannot delete that content from the receiving player's system or impose limits on how that content is used by the other player.

Note: Please do not share anything that gives away personal information, infringes on others' property rights, includes illegal content, or features content others might find offensive. For more information about information-sharing precautions, please see page 2.

Deactivating StreetPass

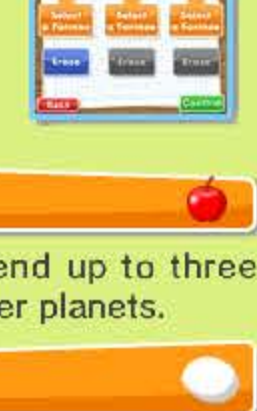

To deactivate StreetPass, open the System Settings, select **Data Management**, and then select **StreetPass management**. Tap the icon for this software title, then select **Deactivate StreetPass**.

Note: You can disable StreetPass functionality via Parental Controls. For more information, refer to the Nintendo 3DS Operations Manual.

If your Nintendo 3DS system contains data for both the card title *Freakyforms Deluxe: Your Creations, Alive!* and the downloadable title *Freakyforms: Your Creations, Alive!*, please note that these games can't send and receive data via StreetPass simultaneously. The game for which you most recently chose data to send via StreetPass will be the game that sends data, and the game you open first after receiving data will be the game that receives it.

My Formees

Use this option to send up to three of your formees to other planets.

Guests

Use this option to send up to three of your guests to other planets.

Photo

Use this option to send a photo to other planets.

Note: AR Card photos cannot be sent to other planets.

Your StreetPass Stats

Top 10 Pen Pals

This ranks the planets you've encountered based on the number of letters you've received from them via the StreetPass feature.

Top 10 Travelers

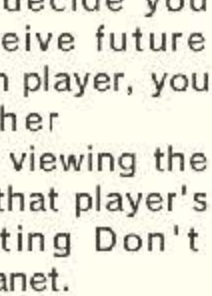

This ranks the formees on your planet based on the number of planets they've visited via the StreetPass feature.

When You Receive a Letter...

Content sent to you by other planets arrives in letters. The number that appears next to your mailbox on the main menu tells you how many new letters you've received. Tap your mailbox to see your new letters.

When you open a letter, you must choose whether or not to save the contents enclosed within. If you choose to keep a letter's contents, that content will appear in the corresponding collection. If you decide you don't want to receive future letters from a certain player, you can block his or her communications by viewing the contents of one of that player's letters and selecting **Don't Receive from This Planet**.

Note: It is possible to unblock a player who has been blocked this way. For details, please refer to the **Blocked-User Settings** section of the System Settings manual.

Formee Playhouse (Local Play & Download Play)

This software supports multiplayer games via wireless communication. At least one player must have a copy of the software.

Setup

● You Will Need:

- One Nintendo 3DS system per player
- At least one copy of the software

Connection Procedures

Every Formee Playhouse session must have a host. The host must have a copy of the game. If more than one participant has a copy of the game, decide who will host before beginning connection procedures.

If you have the game and are going to host:

1. Tap Connect on the main menu, tap Formee Playhouse, and then tap Host.

If you have the game but are not going to host:

1. Tap Connect on the main menu, tap Formee Playhouse, tap Search, and then tap Join.

If you don't have the game:

1. Tap the Download Play icon on the HOME Menu, then tap Open.
2. Tap the Nintendo 3DS logo.
3. Tap Freakyforms Deluxe: Your Creations, Alive!

Beginning a Session

The host chooses which players to welcome into the session. The host can tap Reject to exclude a player and should tap Start when he or she is ready for the session to begin. If themes have been enabled, a player will then be chosen at random to write a theme for the session. If themes have been restricted, this step will be skipped and each player will be taken directly to his or her drawing board.

Each player then makes his or her own new formee. When all the new formees are done, King Roy will invite them onstage so that each player can see what the other players have made. Each player will then be given the opportunity to save the QR Code patterns of the session's formees and take a group photo of them.
