<b>REQUESTING DOCTOR/CLINIC</b> <small>Postal address for test result report</small>	<b>BILL TO / INVOICE ADDRESS</b> <small>Only doctors, laboratories and hospital administration can be invoiced</small>	<b>PATIENT DATA</b> Full name: Birth date, Identity number: (DD-MM-YYYY)	
		<b>GENDER AT BIRTH</b> Man      Woman	
<b>INDICATION / SUSPECTED DIAGNOSIS:</b>		<b>SAMPLING DATE</b>	
		<b>SAMPLING MATERIAL</b> Serum      EDTA-Blood      CSF      EDTA-Plasma	
<b>MAJOR CLINICAL SYMPTOMS:</b>		<b>SPECIMEN COLLECTION INFORMATION</b>  <b>Serum:</b> Blood should be collected in plain tubes (serum tubes) without anticoagulant or other supplements. Centrifuge at ambient temperature and separate serum into plain tubes. 3 mL serum (7 mL blood) will be enough for approximately 15 tests. Samples should be kept cold until transport.  <b>CSF:</b> Always use polypropylene tubes for collecting, centrifuging and transportation. Samples should be centrifuged before transportation. Aliquot as instructed under the test panels.  <b>Blood (Genetic tests):</b> Use an EDTA sample tube and send the sample uncentrifuged.  <b>EDTA-Plasma:</b> The sample should be centrifuged at ambient temperature. Mark the tube "PLASMA"  Transport samples as instructed under each panel.	
<b>TRANSPLANTS (BONE MARROW, TISSUE, STEM CELLS)</b>  No      Yes  <b>If yes, please specify:</b>		<b>DECLARATION OF CONSENT</b>  By signing this form, the patient declares that he/she has received comprehensive information about the genetic background related to the disease in question. He/She understands that he/she has the right to withdraw the consent to genetic analyses.  The patient has been informed and agrees that the personal data and the data obtained in the analysis will be recorded, evaluated and stored in an anonymized form in a scientific database, and further, in accordance with data protection and medical confidentiality and that the request, or parts thereof, may be transmitted to a specialized cooperating laboratory. The genetic report generated by CeGaT will be sent to Wieslab AB in Sweden and thereafter forwarded to me.  The patient has been informed and agrees that all data collected by CeGaT GmbH and Wieslab AB is electronically stored, processed, used and transmitted.  I, the referring physician, confirm that the patient received genetic counseling and agrees with the genetic testing and that the patient's consent was obtained in writing in local language. <i>A form for "Declaration of consent for human genetic analyses" needs to be signed and enclosed: <a href="http://www.svarlifescience.com/hla-request-samtycke">www.svarlifescience.com/hla-request-samtycke</a></i>  _____ Doctor (Surname, First name)      ✓ _____ Doctor (Date, Signature)	
<b>FAMILY MEDICAL HISTORY</b>  Are there other family members who currently have or have had the same or a similar disease as the patient?  No      Yes  <b>If yes, please list the affected family members:</b>			
<b>NAME</b> (not required)	<b>RELATIONSHIP TO THE PATIENT</b> (e.g. mother)	<b>AGE OF ONSET</b>	<b>DIAGNOSIS/SYMPTOMS</b>

### Cooperation between CeGaT GmbH and Wieslab AB

The combination of CeGaT's genetic testing and Wieslab's biomarker analysis brings a new level of clinical diagnostics in various medical areas. This innovative approach helps physicians to make a more precise diagnosis and to select a targeted therapy based on the genetic background of a patient.

**Just select the required tests, fill out the form and send us sample(s) as indicated. You will receive the test results as a Laboratory test report as well as a Genetic report.**

For further information and advice regarding the genetic testing - do not hesitate to contact our Diagnostic Support team.

### Select test panel, on suspicion of:

ALZHEIMER'S DISEASE/DEMENTIA				
567	<b>Biomarkers:</b> Tau, Phospho-Tau, Beta-Amyloid 42 & Ratio Beta-Amyloid 42/40 <i>CSF – aliquot samples divided into one polypropylene tube/biomarker with a minimum of 0,5 mL in for each marker – to be sent frozen (on dry ice)</i>			
994	Neurofilament light protein (NfL) - <i>Please choose sample material</i>	Serum	EDTA-Plasma	CSF
407/NDD16*	<b>Genetic testing of (Alzheimer's):</b> APOE, APP, PSEN1 and PSEN2 <i>EDTA-blood – to be sent at room temperature.</i>			
408/NDD17*	<b>Genetic testing of (Dementia):</b> C9ORF72 (repeat analysis) APOE, APP, CHCHD10, CHMP2B, CSF1R, FUS, GRN, ITM2B, MAPT, NOTCH3, PRNP, PSEN1, PSEN2, QSTM1, TARDBP, TBK1, TREM2, UBQLN2, VCP <i>EDTA-blood – to be sent at room temperature.</i>			
AMYOTROPHIC LATERAL SCLEROSIS (ALS)				
580	<b>Biomarkers:</b> Neurofilament light protein (NfL) and Neurofilament heavy protein (p-NfL) <i>CSF – aliquot samples divided into one polypropylene tube/biomarker with a minimum of 0,5 mL in for each marker – to be sent frozen (on dry ice)</i>			
	Neurofilament light protein (NfL) - <i>Please choose sample material</i>	Serum	EDTA-Plasma	CSF
409/NDD18*	<b>Genetic testing of (ALS):</b> C9ORF72 (repeat analysis), ALS2, ANG, CHCHD10, CHMP2B, DCTN1, FIG4, FUS, HNRNPA1, KIF5A, MATR3, OPTN, PFF1, SETX, SIGMAR1, SOD1, SPG11, SQSTM1, TARDBP, TBK1, TUBA4A, UBQLN2, VAPB, VCP <i>EDTA-blood – to be sent at room temperature.</i>			
INFLAMMATORY BOWEL DISEASE (IBD)				
513	<b>Autoantibodies against ASCA IgA + IgG and IIF ANCA</b> <i>Serum – sent at room temperature in a plain tube.</i>			
040	<b>ANCA -panel (BPI, Azurocidine, Cathepsin G, Elastase, Lactoferrin and Lysozyme) -</b> is recommended as follow-up if IIF ANCA is positive. <i>Serum – sent at room temperature in a plain tube.</i>			
410/PID03*	<b>Genetic testing of Autoinflammatory Diseases (incl. Periodic fever syndromes, Autoinflammatory syndromes without fever, Early-onset chronic inflammatory bowel diseases):</b> ADA, ADAM17, BACH2, CARD14, CECR1, COPA, ELANE, FOXP3, HSPA1L, IL10, IL10RA, IL10RB, IL1RN, IL21, IL21R, IL36RN, LPIN2, LRBA, MEFV, MVK, NFAT5, NLR4, NLRP1, NLRP12, NLRP3, NOD2, OTULIN, PLCG2, PSTPIP1, SLC29A3, TMEM173, TNFAIP3, TNFRSF1A, TTC7A, WDR1, XIAP, ZBTB24 <i>EDTA-blood – to be sent at room temperature.</i>			
AUTOIMMUNE PANCREATITIS TYPE 2 (AIP2)				
575	<b>Autoantibodies against Carboanhydras and Lactoferrin</b> <i>Serum – sent at room temperature in a plain tube.</i>			
411/SPINK1*	<b>Genetic testing of SPINK1</b> <i>EDTA-blood – to be sent at room temperature.</i>			

(\*) Our panels are regularly updated to reflect current scientific research. It should therefore be recognized that there is the possibility that the list of genes on the order form may have changed slightly (genes added or removed) by the time the sample is analyzed in the laboratory. By signing this form, the patient accepts that the list of genes analyzed may be slightly different from what is currently listed. When NGS is utilized more than the requested genes are sequenced for each sample.

Akkred. nr. 1502  
Provning  
ISO 15189
