#### ITEM 1000 - DESCRIPTION OF GOVERNING CLASSIFICATION AND EXCEPTIONS

The term "Uniform Freight Classification" when used herein means Freight Tariff UFC 6000-series.

#### ITEM 1010 - STATION LISTS AND CONDITIONS

This tariff is governed by OPPL 6000-series to the extent shown below:

- A. For additions and abandonments of stations and except as otherwise shown herein, for prepay requirements, changes in names of stations, restrictions as to acceptance or delivery of freight and changes in station facilities.
- B. When a station is abandoned as of a date specified in the above named tariff, the rates from and to such station, as published in this tariff, are inapplicable on and after that date.

#### ITEM 1020 - EXPLOSIVES, DANGEROUS ARTICLES

For rules and regulations governing the transportation of explosives and other dangerous articles, also specifications for shipping containers and restrictions governing the acceptance and transportation of explosives and other dangerous articles, see BOE 6000-series.

#### ITEM 1030 - REFERENCE TO TARIFFS, PRICE AUTHORITIES, ITEMS, NOTES, RULES, ETC.

Where reference is made in this tariff to tariffs, price authorities, items, notes, rules, etc., such references are continuous and include supplements to and successive issues of such price authorities and reissues of such items, notes, rules, etc.

#### ITEM 1040 - TERMINAL OR TRANSIT PRIVILEGES OR SERVICES

1. Shipments made under the rates contained in this tariff are entitled also to terminal and transit services and privileges, and are subject to the charges, allowances, rules, and regulations legally applicable thereto.
2. When such charges, allowances, rules, or regulations are provided for in separate price authorities; corresponding or conflicting provisions contained in this tariff will not apply.

**ITEM 1050 - CONSECUTIVE NUMBERS**

1. Where consecutive numbers are represented in this tariff by the first and last numbers connected by the word "to" or a hyphen, they will be understood to include both of the numbers shown.
2. If the first number only bears a reference mark, such reference mark also applies to the last number shown and to all numbers between the first and last numbers.

**ITEM 1060 - CAPACITIES AND DIMENSIONS OF CARS**

For marked capacities, lengths, dimensions and cubical capacities of cars, see Official Railway Equipment Register (RER 6413-series).

**ITEM 1070 - NATIONAL SERVICE ORDERS**

This tariff is subject to provisions of Tariff NSO 6100-series.

**ITEM 1080 - REVISION NUMBERS**

This tariff will be amended by reprinting the page and showing a revised effective date. A revised page cancels any uncanceled revised or original pages which bear the same page number.

**ITEM 1090 - DEFINITION OF TERMS USED IN CONNECTION WITH CHARGES NAMED HEREIN**

**COMPETITIVE TRAFFIC** - Competitive traffic is where the industry is located on a railroad performing the switching service and such road does itself or in connection with another road or roads, form a route via which local or joint through rates apply under which the switching road may secure a line-haul between the industry and the point of origin or destination of the shipment (SEE EXCEPTION).

EXCEPTION: Provisions of this Item will not apply in connection with the CSXT. (See Item 1330)

**CONSTRUCTIVE PLACEMENT** – When, due to some disability on the part of the consignor or consignee, a car cannot be placed for loading or unloading at a point previously designated by the consignor or consignee, and is placed elsewhere, it is considered as being under constructive placement and subject to demurrage rules and charges, the same as if it were actually placed at the designated point.

**INDUSTRIAL TRACKS** - A track serving a particular industry, whether located upon the property of NS or upon property owned or leased by the industry.

**INTERCHANGE TRACKS** - Interchange tracks are tracks on which cars are interchanged between NS and connecting lines.

**INTERMEDIATE SWITCHING** - A switching movement between interchange tracks of one carrier to interchange tracks of another carrier within the switching limits of the same station

**INTERSTATE TRAFFIC** -Traffic moving from a point in one state to a point in another state, or a shipment moving from a point in a state to another point in the same state but moving outside the state while in transit.

**INTER-TERMINAL SWITCHING** - A switching movement between an industrial track or team track on the tracks of NS and an industrial track or team track on connecting lines on traffic having origin and destination within the switching limits of the same station or industrial switching district. Charges of connecting carriers will be in addition to charges provided herein.

**INTRASTATE TRAFFIC** - Traffic moving from a point in a state to another point in the same state that does not move outside of the state while in transit.

**INTRA-PLANT SWITCHING** - A switching movement from one track to another or between two locations on the same track within the confines of the same (single) plant or industry.

**INTRA-TERMINAL SWITCHING** - A switching movement of traffic originating at and destined to points located on the tracks of this company within the switching limits of one station or industrial switching district.

**LINE-HAUL** – Movement between stations that are not located within the switching limits of the same station.

**NON-COMPETITIVE TRAFFIC** - Non-competitive traffic is where the industry is located on a railroad performing the switching service, and such road does not itself or in connection with another road or roads form a route via which local or joint through rates apply, under which the switching road may secure a line-haul between the industry and the point of origin or destination of the shipment. Where reconsigning, stop-off, or transit privileges accorded on other lines prevent NS from participating in the movement as an originating or terminating line-haul carrier, such traffic will be considered to be non-competitive. (See Exception)

EXCEPTION: Provisions of this Item will not apply in connection with CSXT (See Item 1330)

**RECIPROCAL SWITCHING** - An arrangement between carriers serving the same station or switching district where the carrier physically serving the industry performs switching service for loading or unloading on behalf of the other carrier on shipments having an immediately preceding or following line-haul movement via the other carrier. Line-haul shipments to or from NS customers not listed in Section 5 must move in NS line-haul service.

#### ITEM 1110 - NON-APPLICATION OF RATES ON SCRAP AUTOMOBILE BODIES

Charges provided in this tariff will not apply on Scrap Automobile Bodies, crushed flat, loose or in bundles, loaded on flat cars.

#### ITEM 1120 - SWITCHING CHARGE ON RAILROAD COMPANY MATERIAL

The charge will be made for one direction only.

When due to consignor's inability to take delivery of the entire train in one cut for loading, any additional cuts provided by NS will be assessed at a charge of **\$8,500.00** per cut which will be in addition to the line-haul charges.

At Destination:

#### ITEM 1220 - SWITCHING WITHOUT CHARGE

No charge will be made for switching carload shipments to or from tracks or private or assigned sidings served by NS or interchange tracks of industries connected with NS when the switching service immediately precedes or follows a revenue line-haul over NS.

#### ITEM 1230 - CHANGES IN OR ADDITION OF FIRMS OR INDUSTRIES AT STATIONS IN THE UNITED STATES

NS will only switch line haul traffic to or from connections and firms, individuals, and industries on NS named herein. New firms, individuals, or industries which locate on NS will not be subject to reciprocal switching unless and until listed herein.

**EXPLANATION OF NOTES:**

Note 1 - If consignees are on the authorized credit list, they will be assumed, for the purpose of this item, to have paid all charges referred to.

**ITEM 1270 - PREPAYMENT OF CHARGES**

1. All charges under this tariff must be prepaid or satisfactorily arranged for.
