Cooling & Heating

CONTENTS

Welcome to Hitachi Cooling and Heating, climate control solutions

Over 100 years of history and culture

Hitachi is the global brand for premium climate control solutions, renowned for its ability to create unique spaces, understand installation requirements and meet customer demands.

Japanese technology

By designing, engineering and manufacturing reliable, efficient, high-quality heating and cooling systems, we help people find their optimal air conditioning solution, always meeting their expectations.

24 factories around the world

Born in Japan, with a global presence

Our goal is to create a world where, thanks to our cutting-edge Japanese technology, people can live in harmony with themselves, with their families, and with the environment around them.

To ensure it reaches all over the world, Hitachi has 24 factories around the globe to produce its different climate control ranges and components: residential, commercial, heating, VRF, chillers and compressors.

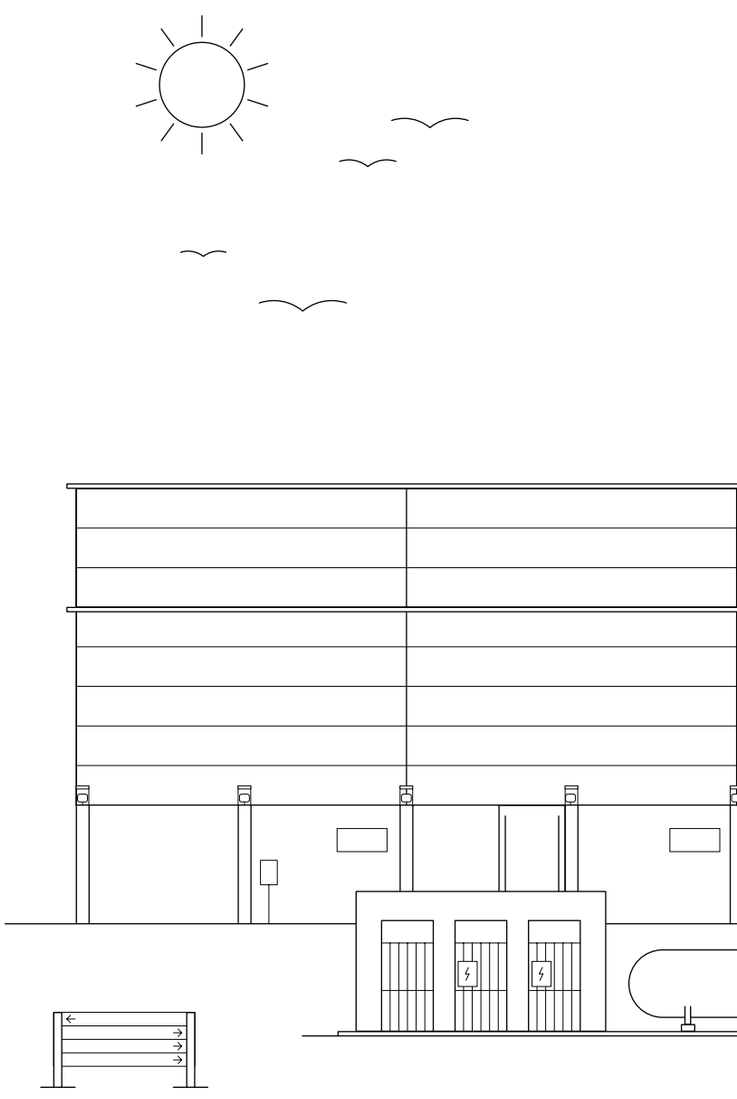
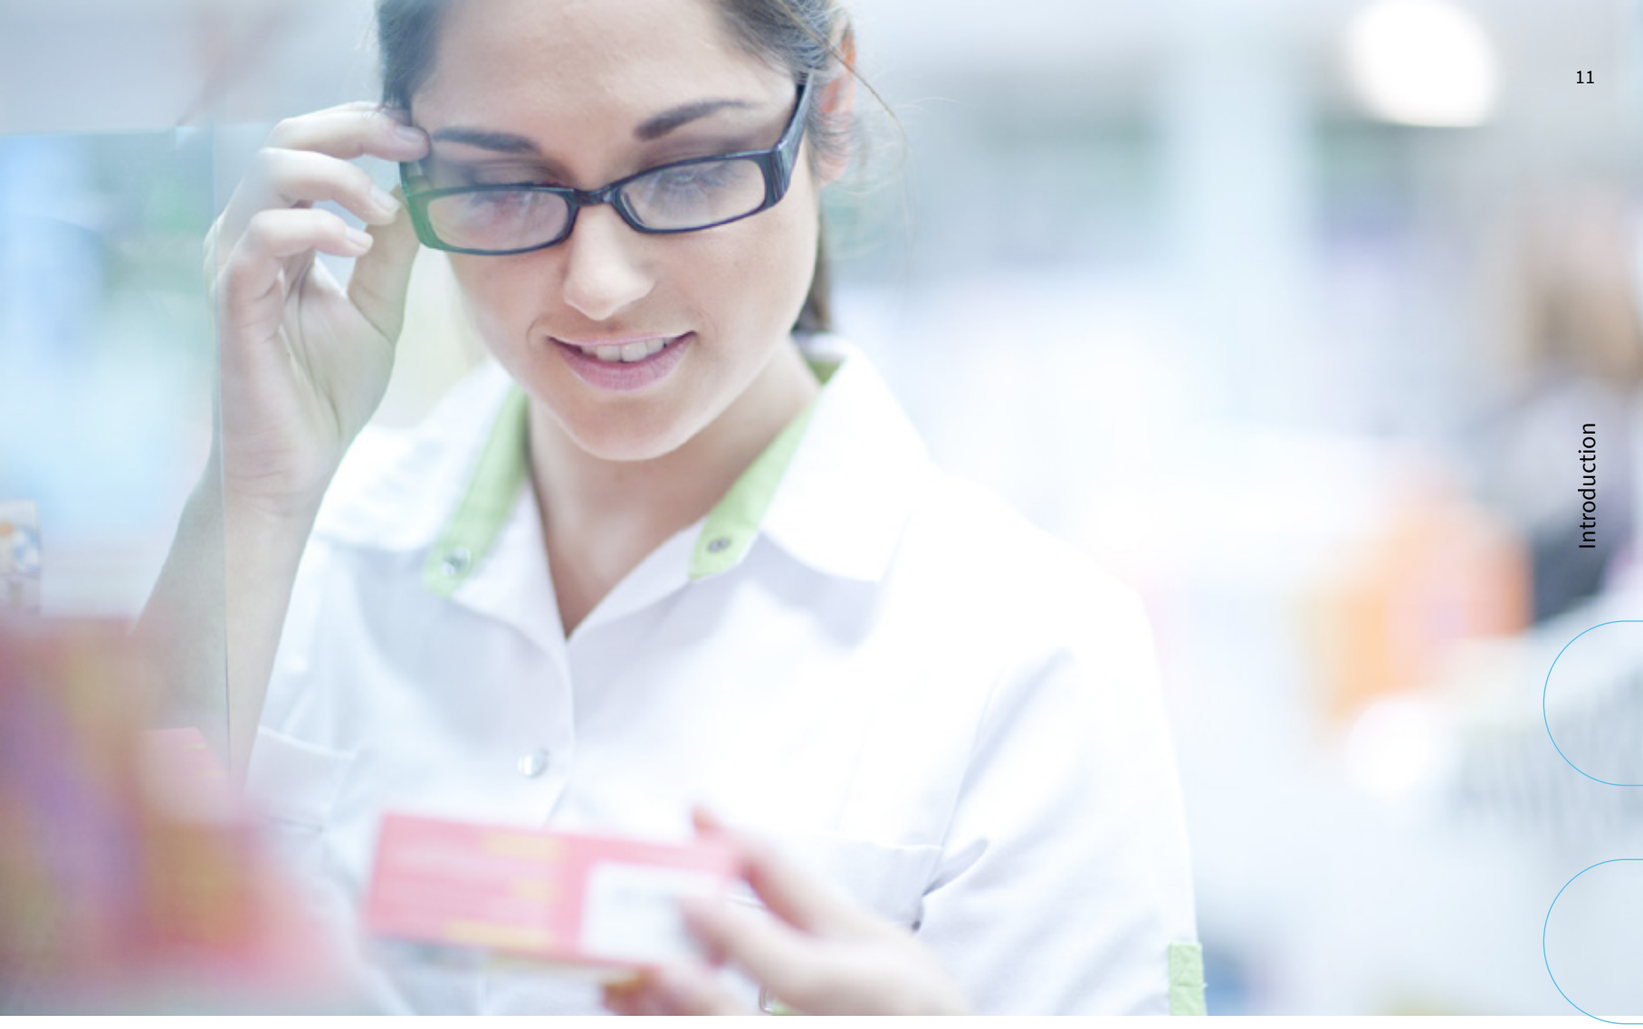
Hitachi's European climate control solutions factory, based in Spain

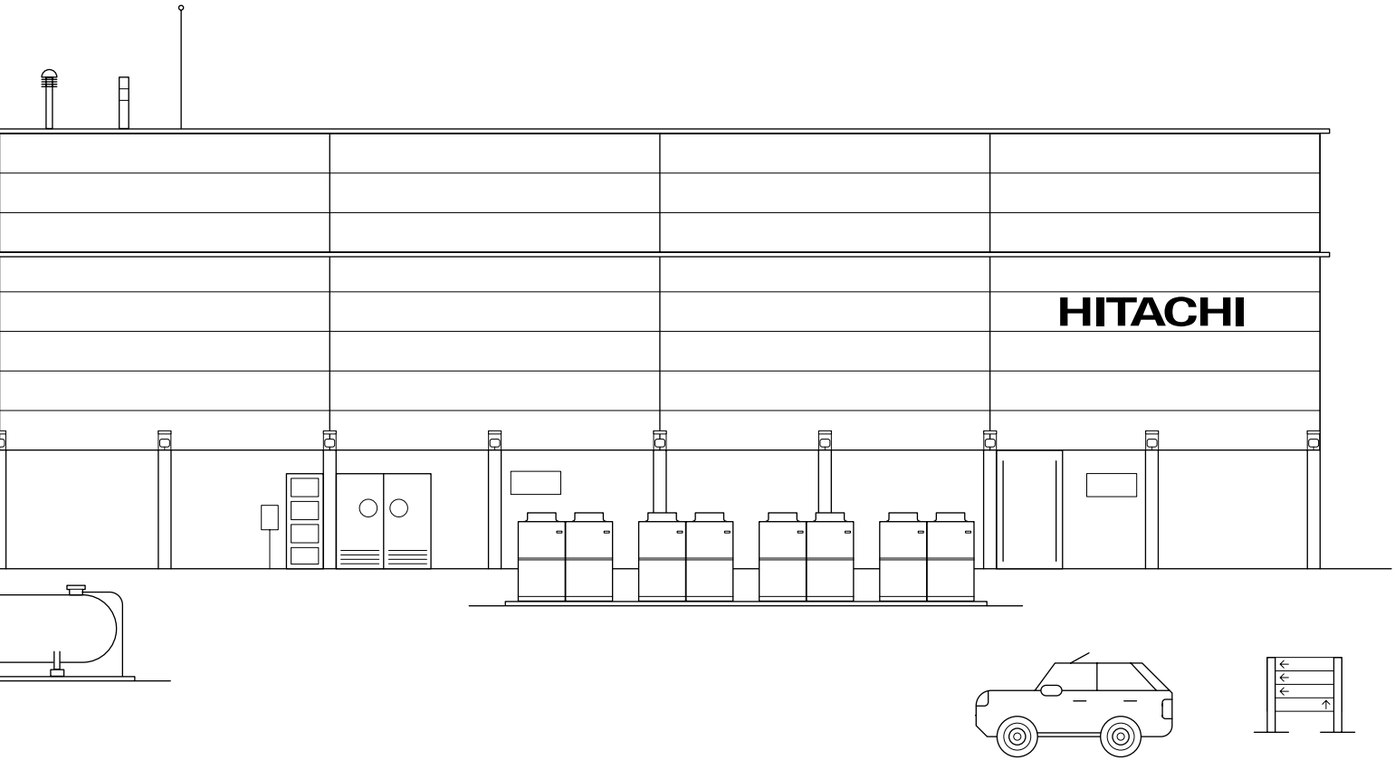
The Spanish factory in Vacarisses, Barcelona is responsible for designing, manufacturing and quality checking all climate control equipment made in Europe. It also supplies equipment to Africa, Australasia and parts of South America.

Its location within Europe means we can control the design and manufacturing process to ensure we meet the specific needs of our market. We also offer high availability of spare parts for fast replenishments.

The factory currently produces the following lines: Samurai L Chillers, VRF systems, Yutaki heat pumps, IVX commercial range and the System Free indoor units. This represents almost the entire Hitachi portfolio manufactured here in Europe for the European market.







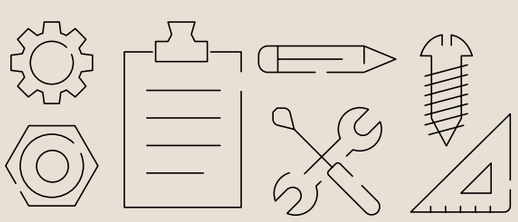
HITACHI

We design cutting-edge technology to meet your needs and desires

Quality you can count on

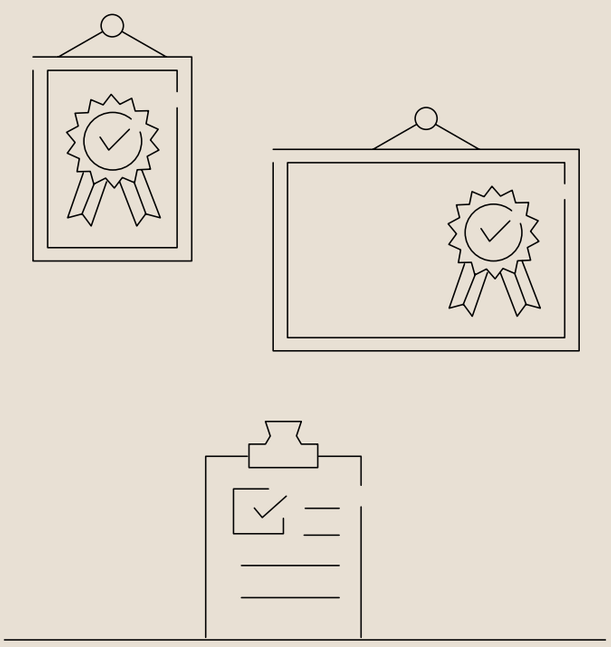
Quality guarantee

How do our products achieve this quality?



All components in our equipment are manufactured with the highest quality materials, provided by carefully selected suppliers. This guarantees the durability of our systems for lifetime climate control.

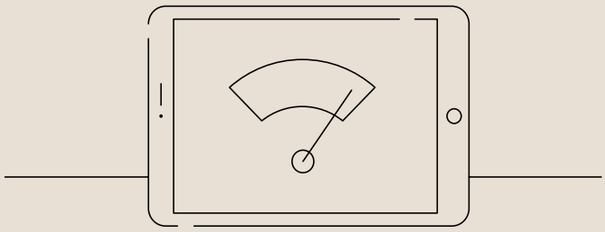
Quality assurance



All air conditioning systems are tested one by one rather than by sampling, ensuring the required quality standards and the reliability of all our units.

We support you to support the environment

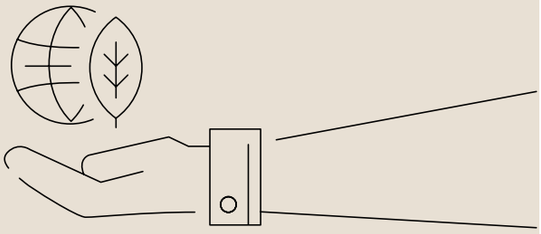
Certified performance



Several Hitachi ranges have the best seasonal performance on the market.

Environmental management certificate

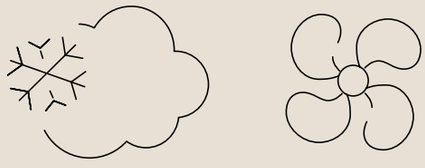
AENOR
Gestión Ambiental
UNE-EN ISO 14001



No waste goes to landfill

100% of waste generated in the factory is recycled or recovered. Our factory puts all waste to good use, helping to ensure the sustainability of the environment.

Refrigerant



As a sign of Hitachi's commitment to the environment, many of our systems require less refrigerant to operate, making a positive contribution to both nature and society.

We're here to help you

Trusted systems with the customer service that you deserve

A variety of useful tools are available for your use from our website

https://www.hitachi-hvac.co.uk/apps

Hi-toolkit for home
Online selection software for air to water heat pumps for domestic applications.

Yutaki Schematics
Access to hydraulic schematics and terminal board configuration for simplified installations.

Erp labels for Eco design
Generate energy labels for all products covered by the EcoDesign Directive, including Lot 1, Lot 2, Lot 6, Lot 10 and Lot 21 products.

Alarm Codes
24/7 Troubleshooting with explanations and error code descriptions.

BIM Library
Find BIM files of our products for your projects.

Eurovent Certification. First Japanese manufacturer to certify its products at Eurovent

Hitachi's climate control systems are Eurovent certified for full reassurance in all types of installations. Certification guarantees the performance of our systems under the most demanding conditions giving consultants, installers and end users the peace of mind that the Hitachi systems they have selected will perform as specified.

Discover the meaning of the technology icons.

We make your work selecting which units are suitable for your project easy by using technology icons to differentiate our models from each other.

Refer back to these icons to understand the unique features of each product.

Heating
This unit can operate in heating mode.

A+++
The highest possible energy class as certified by Eurovent.

Energy saving
The unit will operate in the most energy efficient way possible.

Power consumption
The consumption of your device will be displayed in heating and cooling modes.

Compatible with H-Link
The unit has an H-Link interface for connection to centralised controllers and a common communication bus.

Free Cooling
The unit uses the outside air for cooling.

External Expansion Valve
The external expansion valve can be installed away from the unit (in an adjoining corridoor) in order to reduce noise.

Independent Louvre Control
Individual control of the exhaust louvres to manage the airflow.

Compatible with all System Free indoor units
Flexibility in the combination of indoor units and outdoor units.

Passivhaus Ready
Suitable for use in passive houses.

Wide operating range
Systems can perform in a wide range of ambient temperatures.

Cooling
This unit can operate in cooling mode.

Smart Cascade
Adjusts the operation automatically according to the thermal requirements.

80°C
The Yutaki S80 produces water up to 80°C.

Automatic filter cleaning
Integrated filter self-cleaning robot.

4 Way Swing
For ideal air distribution, the air can be distributed in 4 different directions.

External Pressure
Adaptive pressure that allows installation with different sizes and lengths of ducts.

Constant air flow
The fan motor adjusts the air pressure whilst maintaining a constant air flow.

Adaptable
Change the air outlet easily depending on installation requirements.

Independent Control
Control the individual temperature from each indoor unit.

Air Curtain
Compatible with a range of commercially available air curtains.

R32
Equipment uses new sustainable R32 refrigerant.

Hot water
Produces hot water for your house.

ECO-Motion sensor
Detects movements in the room and adjusts the operation of the unit to save energy.

Hi-Kumo
Compatible with the control app from Hitachi.

7 day schedule
Program the units operation for a whole week.

CO2-Sensor
Control the air quality with connection to CO2-Sensors.

Compact
The cassette panel fits perfectly into a standard ceiling tile.

Guaranteed comfort
The new louvres guarantee the best comfort for users.

Independent louvres control
Amend the louvre direction to adjust the air flow.

Energy Recovery
Produces hot water for free by the use of heat recovery.

Product Certification
Eurovent and Keymark certification ensure products are tested to the highest standards in Europe for piece of mind installations.

Reduced dimensions
Compact and lightweight equipment for easier more aesthetic installations.

Renewable technologies
Climate friendly solutions without direct CO2 emissions.

Silent
Unit has very quiet operation.

Energy Class
Unit meets the high requirements of EU directives.

Integral H-Link
Integrated H-link control protocol and ability to connect to central controls.

Multizone compatibility
Indoor unit is compatible with Multizone outdoor units.

Exclusive to Hitachi
Unique and exclusive products to Hitachi.

Smooth Drive
Compressor speed is regulated in steps of 0.1Hz. This enables pinpoint accuracy in power control and comfort.

Heat pump or Heat recovery
Units can be used as either 2 pipe heat pumps or as 3 pipe heat recovery systems with CH boxes.

High H Speed
An extra speed setting has been added to make 4 in total. Ideal for applications with high ceilings.

New to Hitachi
Discover Hitachi's latest range of innovative products.

Frost Wash
Automatic cleaning of the heat exchanger in the indoor unit for fresher air.

New products

RAC

R32 PREMIUM WALL

Exclusive design and features to meet new market opportunities

RAK-PSE(W/S) 2.5~5.0kW

RAC-WSE 2.5~5.0kW

R32 STANDARD WALL

The most discreet and flexible unit on the market

RAK-(Q/R)PE 1.5~5.0kW

RAC-WPE 1.5~5.0kW

R32 HI-END WALL

Economic heating solution with a differentiated design

RAK-(Q/R)XE 1.8~5.0kW

RAC-WXE 1.8~5.0kW

R32 HI-END FLOOR

Exclusive design and high performance to match end-user requirements

RAF-RXE 2.5~5.0kW

RAC-FXE 2.5~5.0kW

R32 DUCTED

Wide, complete and consistent range to match all applications

RAD-(Q/R)PE 2.0~7.0kW

RAC-NPE 2.0~7.0kW

R32 CASSETTE

Wide complete and consistent range to match light commercial applications requirements

RAI-RPE 2.5~6.0kW

RAC-NPE 2.5~6.0kW

R32 MULTI SPLIT

One of the widest R32 multi ranges on the market

RAM-NP-E 3.3~10.6kW

MULTI + YUTAMPO

The first multi on the market providing triple comfort heating, cooling and domestic hot water

Tanks available in 190 litre & 270 litre*

* Hot water tank shown is not currently available in the UK

RAM-90NYP5B 8.5 kW

CONTROLS

HI-KUMO PRO

An intuitive web platform to remotely check the status of Hitachi units from anywhere

A platform dedicated to remote maintenance for professionals

To find out more about Hitachi's new products contact your Area Sales Manager or call Hitachi Direct Sales on 020 3901 0912

CHILLER

SAMURAI (AH2-WH1 SERIES)

Now with improved expanded options

R(C/H)ME 60-140AH2 — **60.0~140.0HP**

RCME 40-70WH1/CLH1 — **40.0~70.0HP**

SAMURAI S

Modular DC Inverted heat pump

RHMA 4-7AVN — **4.0~7.0HP**

SAMURAI M

Hybrid chiller combining the best of monobloc and modular flexibility

R(C/H)MA 18-24AN — **18.0~24.0HP**

R(C/H)MA 90-100AN — **90.0~100.0HP**

PAC / VRF

SIDE FLOW VRF

The first side flow VRF on the market providing simultaneous heat pump and heat recovery from 22.4 to 33.5 Kw

RAS-FS(V)NME — **12.1~15.5kW**

RAS-FSXNME — **24.4~33.5kW**

HEATING

YUTAKI S

Environmentally friendly refrigerant within a versatile heat pump range

Widest range on the market

RWM-2.0~3.0NRE — **2.0~3.0HP**

YUTAKI S COMBI

The all-in-one compact product, best seller of the heating range

Best in class performances for new housing market

Solar version, standard version

RWD-2.0~3.0NRW(S)E-(200/260)S(-K) — **2.0~3.0HP**

YUTAKI M

Plug and Play solution requiring no indoor space

Operating range improved for R32 models

RASM-2-3VRE — **2.0~3.0HP**

CONTROLS

WIRED REMOTE CONTROLS

Wired individual controllers with new functions

- Energy saving modes
- Frost protection
- Power consumption estimation
- Comfort functions (gentle cool / off coil control)

PC-ARH1E

PC-ARFP1E

HI-KUMO PRO

An intuitive web platform to remotely check the status of Hitachi units from anywhere

A platform dedicated to remote maintenance for professionals

The Yutaki range is part of the product group know as air source heat pumps, systems that use the latent heat in ambient air to generate energy and provide all the heating and hot water needs in the home.

Begur Son Rich housing development, air conditioned with Hitachi's Yutaki air to water heat pumps

Yutaki Air to water heat pumps

Heating, cooling and domestic hot water (DHW) with renewable energy

Yutaki S

Yutaki S Combi

Yutaki S80

Yutaki M

Yutaki T

Quick selection table

	Yutaki S	Yutaki S Combi	Yutaki S80	Yutaki M	Yutaki T
					
	Heating, cooling and hot water	Heating, cooling and hot water	Heating and hot water	Heating, cooling and hot water	Hot water
Range	**RWM-2~10 NE**	**RWD-2~6 NW(S)E - (200/260)K(S)**	**RWH-4~6 (V)NF(W)E**	**RASM-3~6(V)NE**	**TAW-(190/270)NHB**
Applications	Low temperature radiators, underfloor heating, fan coil, hot water and pool heating. Ideal for new builds and for replacing wall-mounted boilers.	Low temperature radiators, underfloor heating, fan coil, built-in hot water and pool heating. Ideal for homes with little space, thanks to the integrated hot water tank.	High and/or low temperature radiators, underfloor heating, fan coil (heat-only), hot water and pool heating. Ideal for installations requiring high temperatures, e.g. replacing diesel boilers.	Low temperature radiators, underfloor heating, fan coil, hot water and pool heating. Compact unit, ideal for installations with little indoor space.	Hot water production.
Heating capacity kW (built-in min/max)	1.85 - 32.00	1.85 - 17.80	4.30 - 17.80	2.10 - 17.80	—
COP up to 7 °C out/ 30 - 35 °C water	5.25	5.25	5.00	5.00	3.20
Cooling capacity (built-in min/max)	3.80 - 20.60	3.80 - 13.70	—	6.00 - 13.70	—
EER up to 35 °C out/ 7 - 12 °C water	3.54	3.54	—	3.54	—
Production temperature (up to) °C	60	60	80	60	—
Heating operating range °C	-25 ~ 25	-25 ~ 25	-25 ~ 25	-25 ~ 25	—
Cooling operating range °C	10 ~ 46	10 ~ 46	—	10 ~ 46	—
Domestic hot water operating range °C	-25 ~ 35	-25 ~ 35	-25 ~ 35	-25 ~ 35	-15 ~ 37
Compressor	Scroll DC Inverter	Scroll DC Inverter	Scroll DC Inverter	Scroll DC Inverter	Rotary
Efficiency	A+++	A+++	A+++	A+++	—

Benefits

Yutaki air to water heat pumps

1 Your needs change, Yutaki adapts

The day to day needs of your customers will change from heating in winter to cooling in summer and sanitary hot water water all year round. They may want to connect solar panels and heat their swimming pools. It's therefore important to have a system able to meet all these needs; able to connect to any style of emitter, new or existing: radiators, underfloor or fan coils.

Able to supply two different zones with different flow temperatures simultaneously such as underfloor downstairs and radiators upstairs.

2 Renewable energy, guaranteed savings

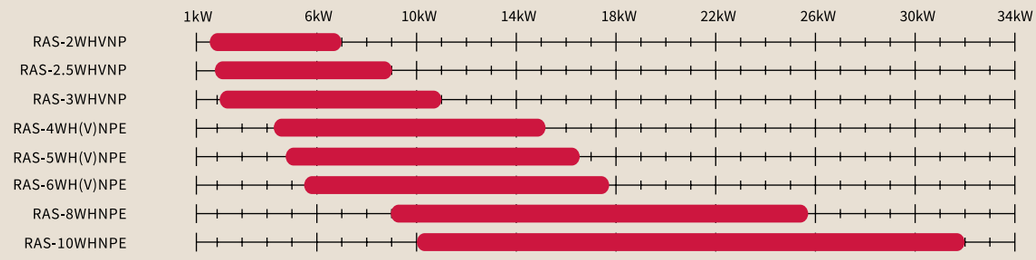
A+++

Air source heat pumps are considered one of the most energy efficient technologies around, on account that they produce more energy in heat than they consume in electricity.

The Yutaki range has the maximum A+++ energy classification in all its ranges ensuring you make savings on your energy bills, reduce electricity consumption and the impact on the environment.

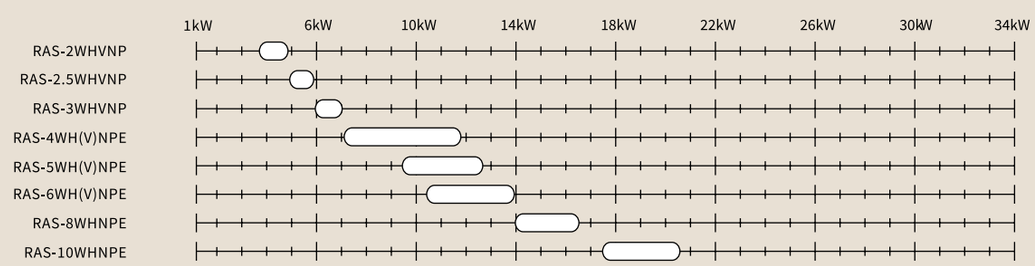
3 Hitachi now offers the widest range of R32 air source heat pumps on the market. The new 4.3 kW R32 monobloc is ideal for new builds

	Min - Max
RAS-2WHVNP	1.85 - 7.0
RAS-2.5WHVNP	1.95 - 9.0
RAS-3WHVNP	2.1 - 11.0
RAS-4WH(V)NPE	4.3 - 15.2
RAS-5WH(V)NPE	4.8 - 16.7
RAS-6WH(V)NPE	5.5 - 17.8
RAS-8WHNPE	9.0 - 25.5
RAS-10WHNPE	10.0 - 32.0



Heating capacity range under the conditions: water input/output: 30/35 °C; outside temperature: 7/6 °C (WB/DB).

	Nom-Max
RAS-2WHVNP	3.8 - 4.9
RAS-2.5WHVNP	5.0 - 5.8
RAS-3WHVNP	6.0 - 7.0
RAS-4WH(V)NPE	7.2 - 11.8
RAS-5WH(V)NPE	9.5 - 12.6
RAS-6WH(V)NPE	10.5 - 13.7
RAS-8WHNPE	14.0 - 16.4
RAS-10WHNPE	17.5 - 20.6



Cooling capacity range under the conditions: water input/output: 23/18 °C; outside temperature: 35 °C (DB).

4 Hitachi high-efficiency Scroll Compressor

The Hitachi DC Inverter Scroll compressor has been designed to increase seasonal performance and reliability while reducing energy consumption.

The compressor is particularly efficient in intermediate seasons, offering high performance at low partial charges.

5 Proven quality

SG Ready

Hitachi heat pumps can be integrated into the smart energy grids of the future to help provide the low cost heating systems required to meet carbon reduction targets.

Proven quality

All heat pumps and water heaters in the European market are continuously tested by various certification schemes. These are usually the basis for qualifying for state subsidies. Hitachi heat pumps meet the high standards of the following quality accreditation schemes: Eurovent, MCS, Keymark, NF PAC, KIWA, EHPA.

Benefits

Yutaki air to water heat pumps

6 Savings from the very first bill

	Conventional gas boiler	Condensation gas boiler	Diesel boiler	Electricity (radiators)	Heat pump (Yutaki S 6 HP)
Performance (%)	92%	109%	89%	100%	457%
Energy consumption (kWh/year)	21,042.39	17,760.55	21,751.69	19,359.00	4,236.11
Energy cost (£/kWh)	0.0542	0.0542	0.08	0.15	0.15
Energy cost (£/year)	1,140.50	962.62	1,740.13	2,903.85	635.42
Gas emissions (kg CO2/kWh)	0.252	0.252	0.311	0.331	0.357
Gas emissions (tonne CO2/year)	5.30	4.48	6.76	6.40	1.51
Easy installation	Medium	Medium	High	Low	Medium
Maintenance	Medium	Medium	High	Low	Low
Additional energy costs compared to the heat pump installation	**505.08**	**327.21**	**1,104.72**	**2,268.43**	**–**

Estimate based on a 150 m^2 single-family property:
Energy demand for heating + hot water (kWh/m^2): 129.06.
Energy demand for heating + hot water (kWh/year): 19,359.

Information sources:
- CO_2 emission values taken from the report prepared by the Ministry of Energy, Tourism and Digital Agenda.
- Energy prices taken from the Energy Prices Report: Fuels. Data correct at 20th December 2016.

7 Hitachi Experience

Hitachi has more than 60 years' experience in manufacturing heating equipment, with over 4.5 million ASHP systems produced and in excess of 400,000 customers throughout Europe. Our European factory produces the entire Yutaki ASHP range, designing it to meet the needs of the local European market. Its nearby location means we can control the whole design and manufacture process, thus guaranteeing the highest levels of quality, reliability and durability in all our equipment.

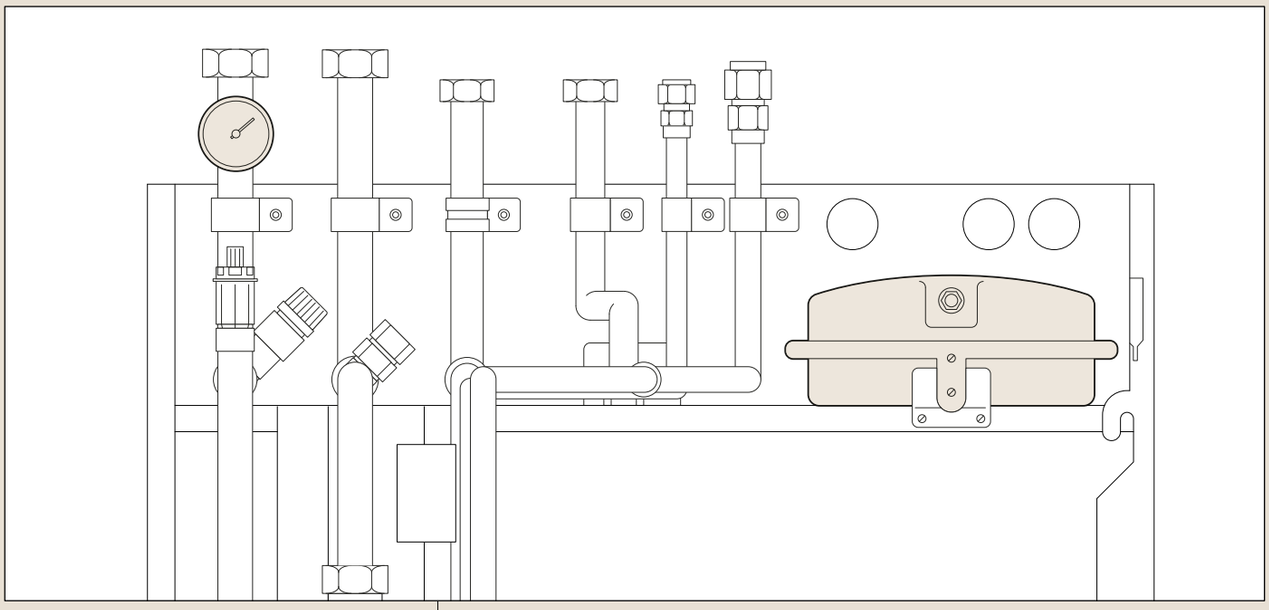
8 Optimised performance with the highest efficiency

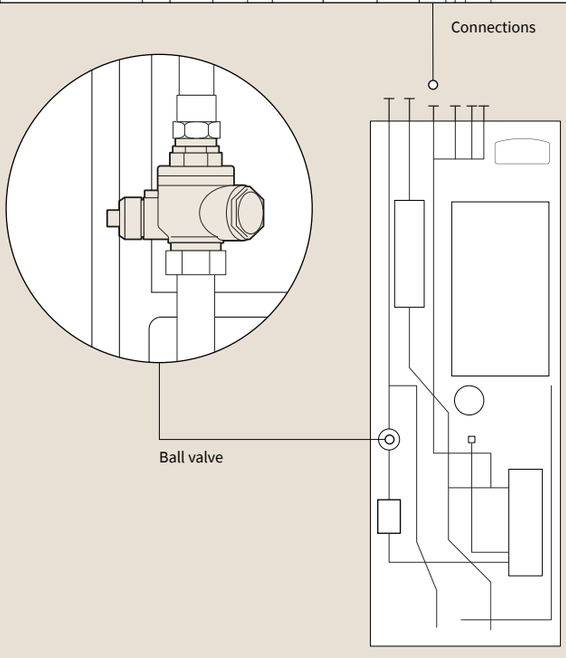
The Yutaki range can provide heat with outside temperatures down to -25, uniquely to the market. It can also produce hot water up to 60c without the need for a backup heater.

Yutaki systems are designed to work without backup electrical heaters but some have them factory fitted and for others they are an optional extra. Even when fitted the user can use the simple control systems to disable them.

9 Simple installation with easy maintenance

Unlike other models on the market, all Yutaki systems are designed for easy access to the components, thus allowing straightforward maintenance and ensuring cost savings.





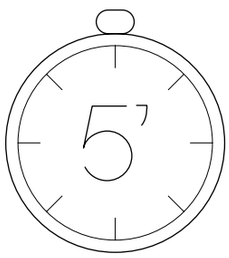
– Filter Plus shut-off valve: Yutaki units are fitted with a ball valve containing an interchangeable cylindrical filter that is easy to inspect and remove for maintenance work. The individual valve has two important functions: to perfectly seal the ball valves and to carefully filter the fluid, with its high-reliability protecting all the components in Hitachi's Yutaki systems.

– Compared to traditional use of three components (one filter and two shut-off valves), the Filter Plus guarantees lower charge losses, in addition to the obvious benefits in terms of cost, installation and space.

– Accessibility: easy access to all components from the front of the machine.

– Pipes: the pipes are perfectly aligned at the back of the unit, making installation much easier compared to other manufacturers.

10 Yutaki, configured in under 5 minutes



Quick, easy configuration thanks to its intuitive new wizard set-up interface.
Having the same control throughout the range means any Yutaki can be configured in just 5 minutes.

Benefits

Yutaki air to water heat pumps

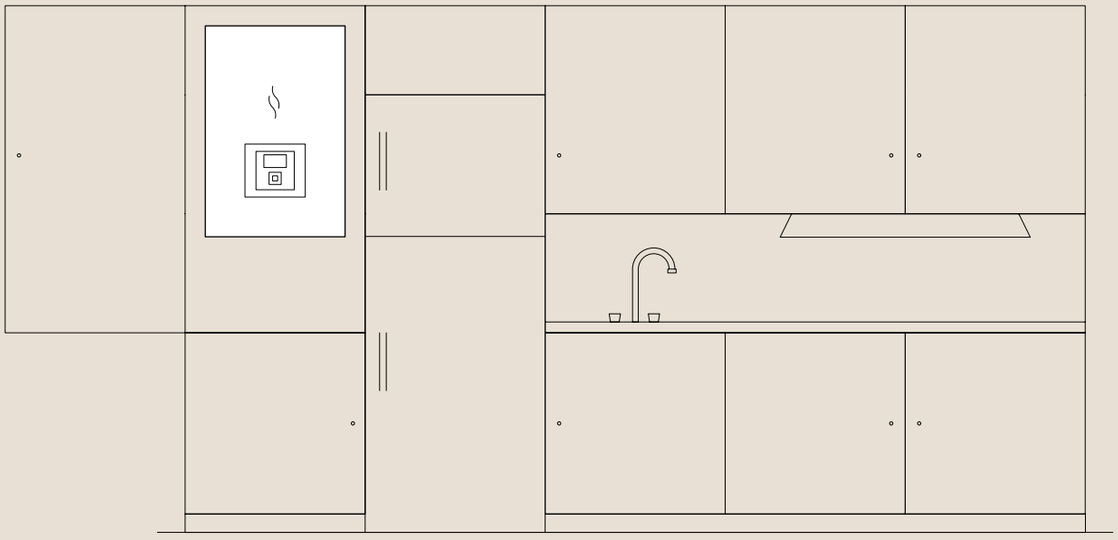
11 Easy, smart control

Hitachi has the same controller and functions for all ranges.

Designed to be user-friendly, handling all system functions: heating, cooling, hot water and swimming pool settings.

The control, with an LCD display and thermostat, centralises all applications without the need for external elements. It can be used for straightforward control of operations such as daily and weekly programming, managing water production temperature, operating modes, etc. It can also be used as a zone thermostat, and even combined with Hitachi's wireless thermostat.

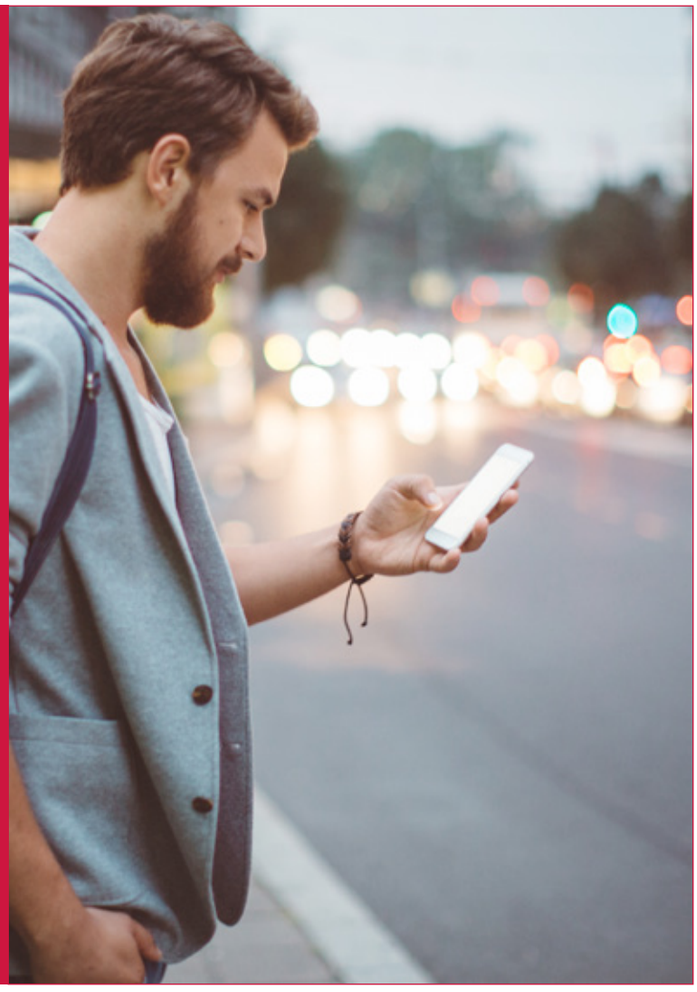
12 Yutaki adapts to the needs of modern properties



All Yutaki models have been designed to ensure space is not a problem. Their compact size means they can be hidden away in confined spaces, even inside a kitchen cabinet.

Yutaki models are compact and lightweight, designed for smaller surfaces, without sacrificing power and efficiency.

13 No matter where you are

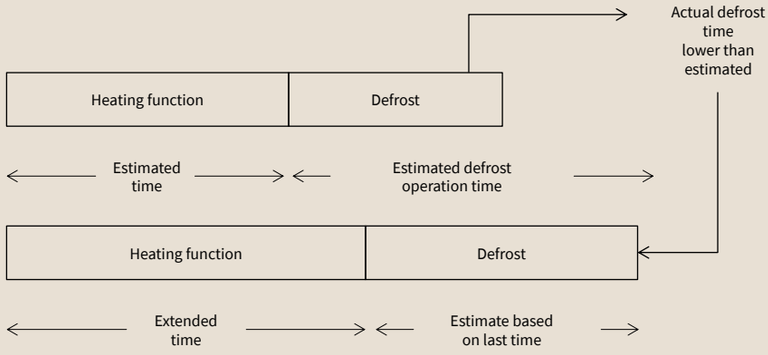


Turn the system on and off and regulate the temperature, or turn on pool heating from anywhere thanks to Yutaki's Hi-Box pack and the free Hi-Kumo app.

14 Smart defrost cycle

Optimised refrigerant cycle thanks to smart defrost control and a hot gas bypass to the outdoor unit's heat exchanger, making defrosting virtually unnoticeable.

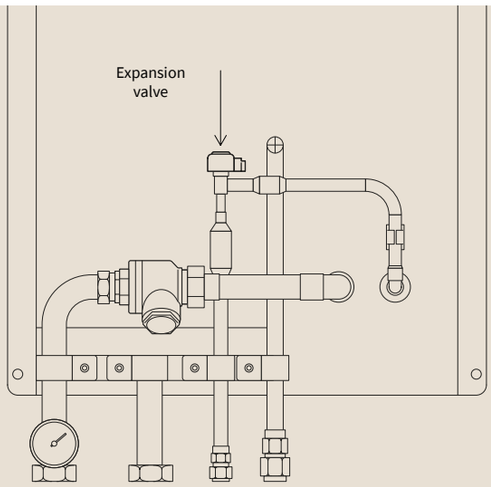
This exclusive improvement reduces time between defrosts, improves energy efficiency, and guarantees machine power at low temperatures, avoiding the need for the backup heating element.



15 Additional benefits

Having an expansion valve in the indoor unit allows longer pipe installations while minimising energy losses in the cooling section.

Thanks to the longer pipe length, the Yutaki range can supply greater cooling power to the installation in the summer cycle without affecting the system's electrical consumption.



Resources

Yutaki air to water heat pumps

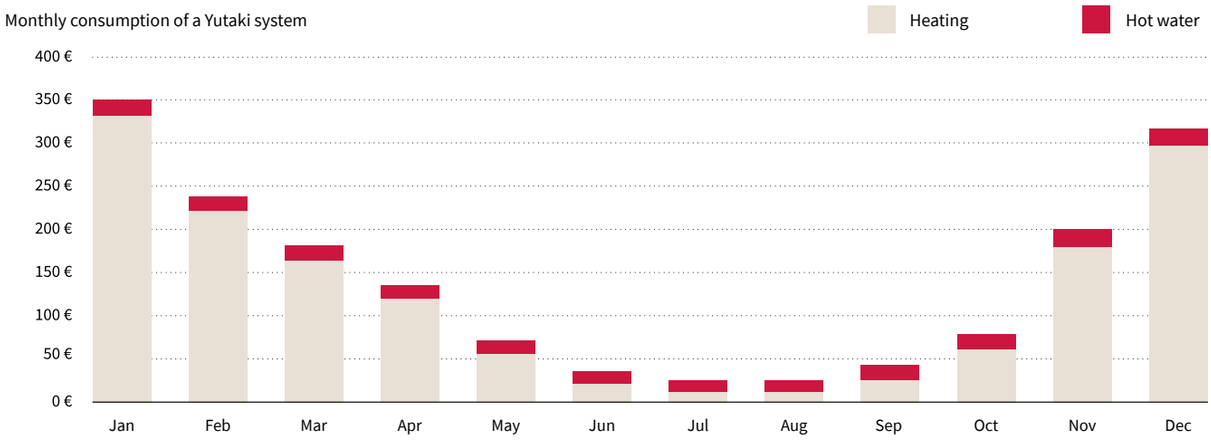
Hi-Toolkit for Home

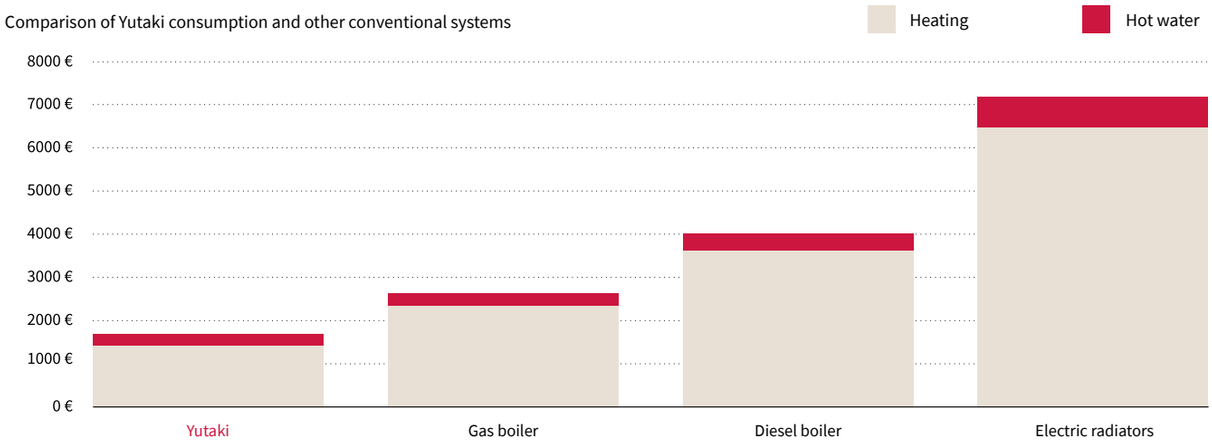
Yutaki ASHP energy simulation and sizing software

This functional software can be used to quickly and easily select all the systems in Hitachi's Yutaki Air source heat pump range, generating a detailed report with information about the selected machine.

It has a complete database of the main cities in the UK & Ireland and their annual temperatures, in order to carry out an annual energy simulation for the 8,760 hours of the year. Once the simulation is complete, the software compares energy consumption and CO2 emissions with other conventional heating systems in order to evaluate the energy savings that can be achieved when installing Yutaki Air source heat pump equipment.

The website can be found at:
www.hitachi-hitoolkit.com/heating





Hitachi has a free online tool for simplified hydraulic configurations of its whole Yutaki ASHP range.

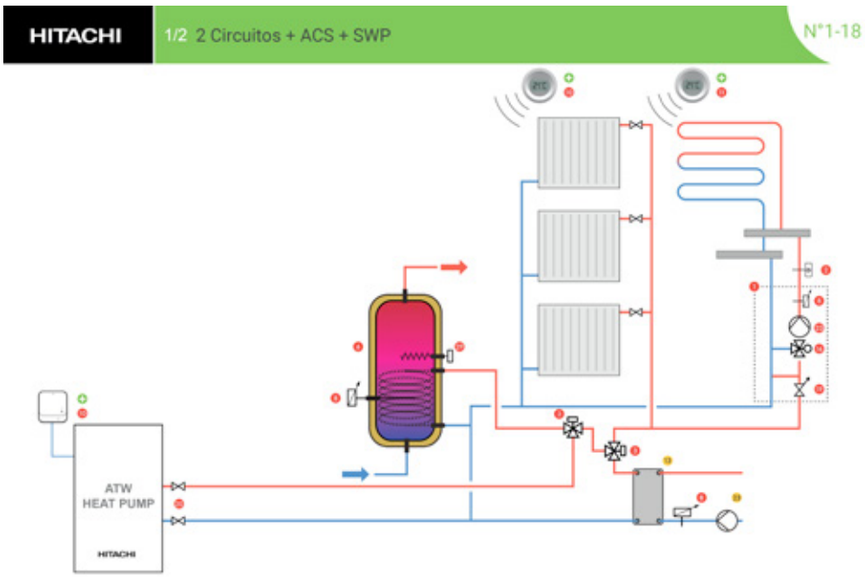
The main elements of the installation can be configured in a few simple steps by simply answering a series of basic questions.

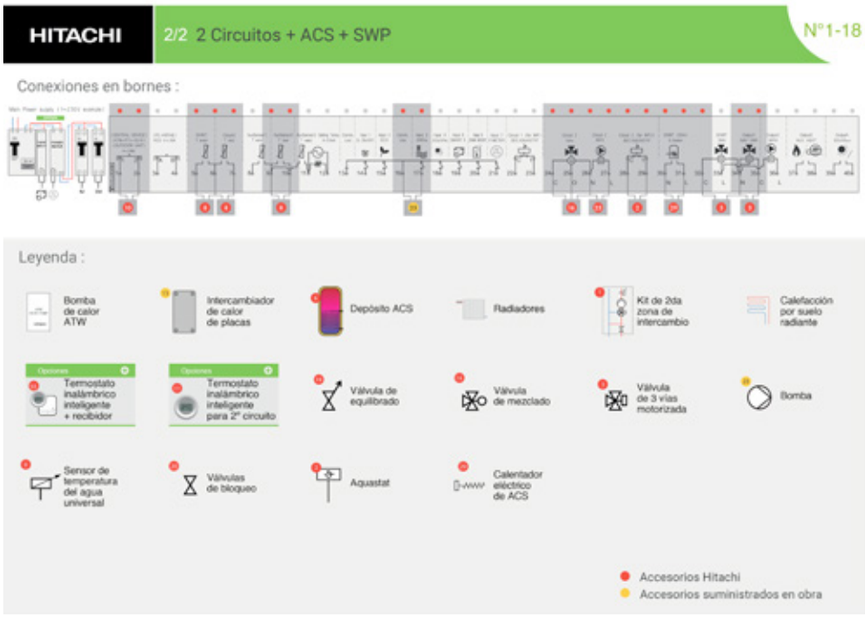
This also makes it easier to install the system, as it indicates directly where each sensor, pump and all other elements on the machine's connections board go.

The website can be found at:
www.yutaki-applications.com/en

Hydraulic diagrams

Contact your usual Hitachi direct sales contact or distributor for more detailed hydraulic layouts or any special configurations your installation requires.



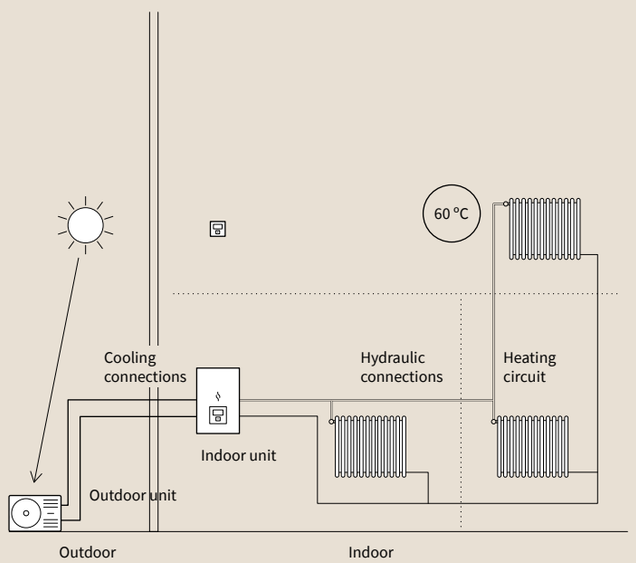


Multiple installation options
Yutaki air to water heat pumps

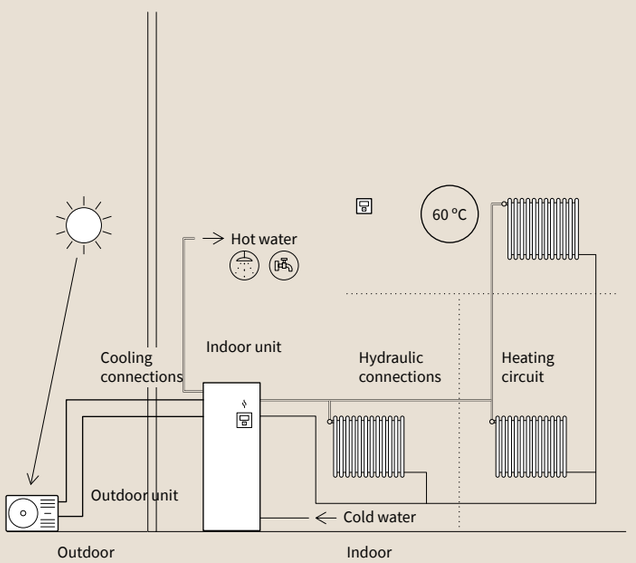
All your projects have different requirements and so you need flexible solutions. The Yutaki range is adaptable to the needs of each project from the simplest heating only set up to more complex configurations.

Below are some simplified configurations, as examples of the most common installations. Please contact our Technical Service team department if you would like further details about them or their components, or information about more complex configurations.

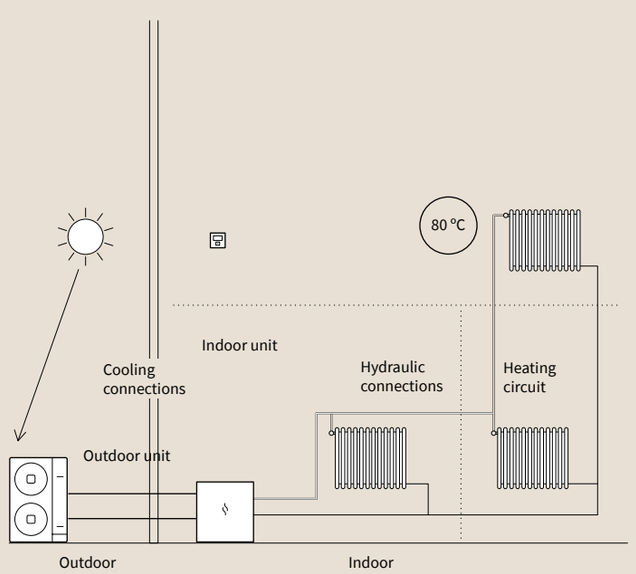
Yutaki S
Heat-only or reversible operation (heat/cold)



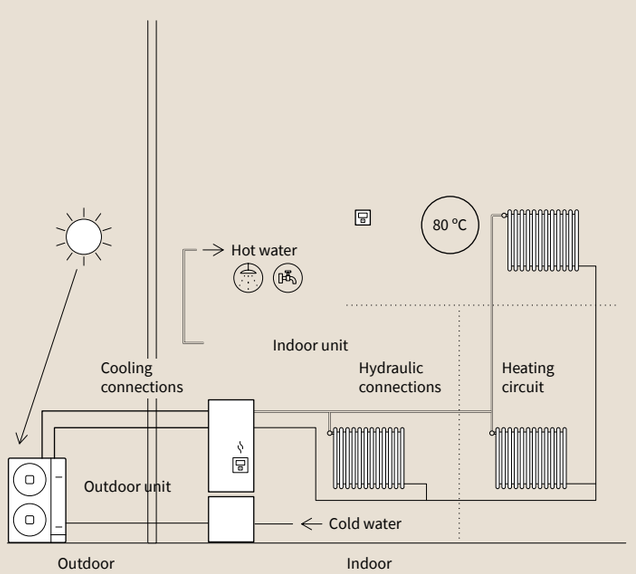
Yutaki S Combi
Heat-only or reversible (heat/cold) operation with built-in hot water



Yutaki S 80
Heat-only operation

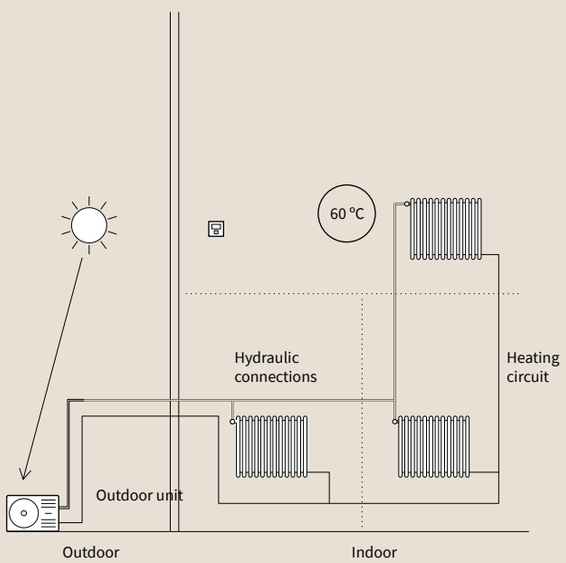


Yutaki S 80 Combi
Heat-only operation with built-in hot water



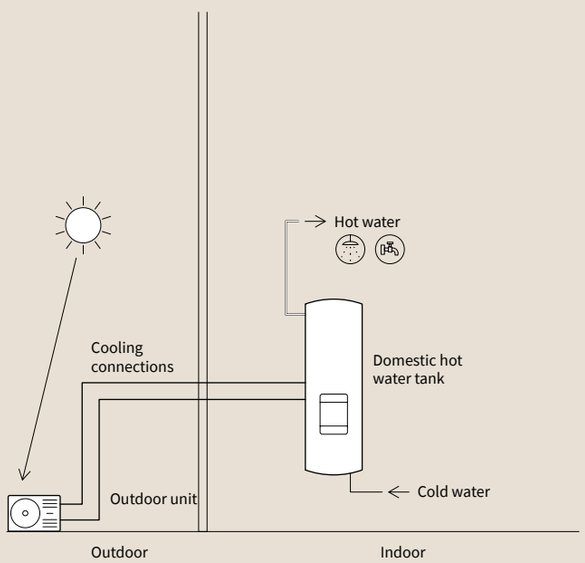
Yutaki M

Heat-only or reversible operation (heat/cold)



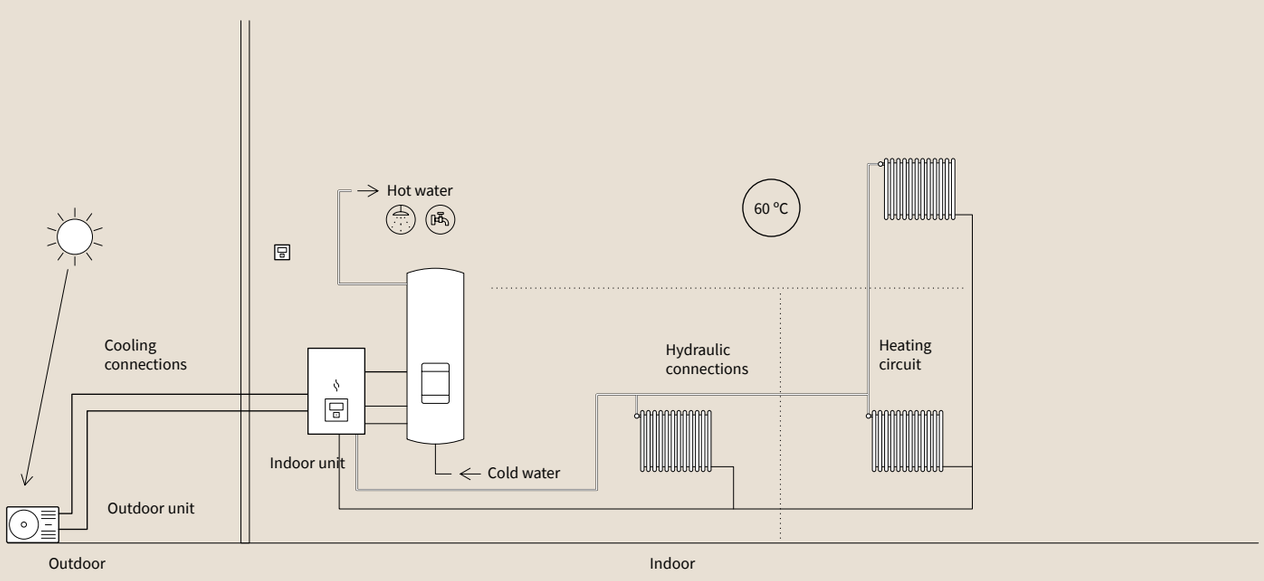
Yutaki T

Hot water only



Yutaki S + external tank

Heat-only or reversible (heat/cold) operation with separate hot water



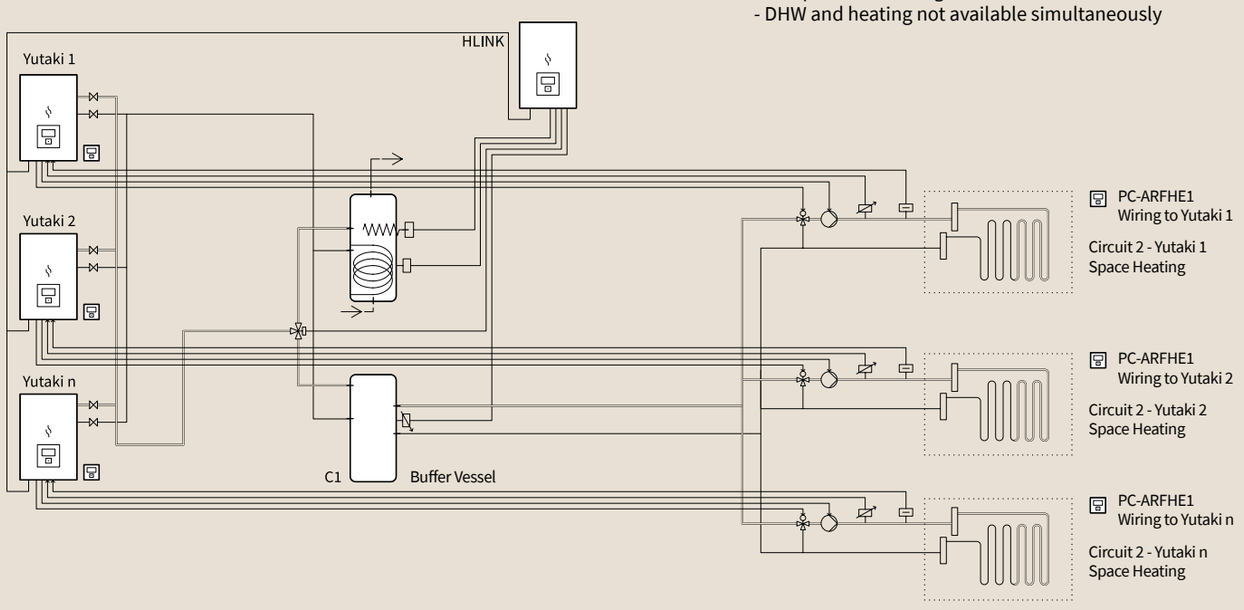
Multiple installation options

Air source heat pumps with cascade control

To cover the larger installations where a high thermal load is required an optional cascade controller can be installed (ATW-YCC-01). This intelligent controller manages up to 8 Yutaki ASHPs capable of producing 256 kW of renewable heat. Each unit works together as one to deliver the most efficient solution for your building whatever the requirements.

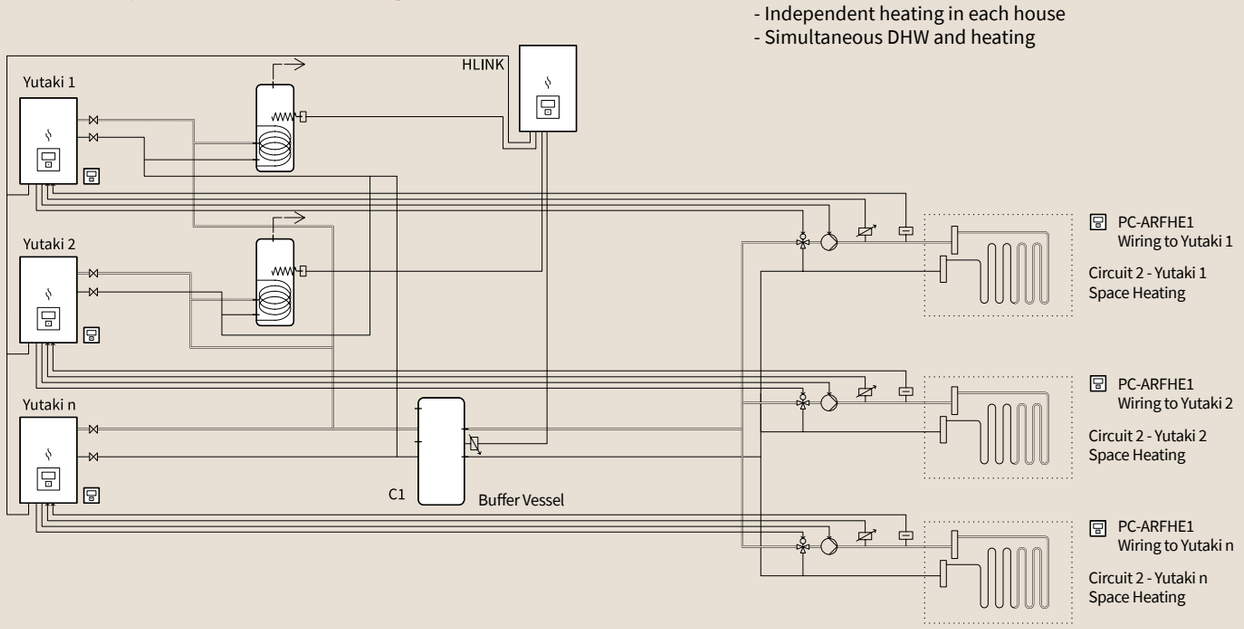
Three Yutakis producing domestic hot water and heating

- Same demand for DHW
- Independent heating demand in each house
- DHW and heating not available simultaneously



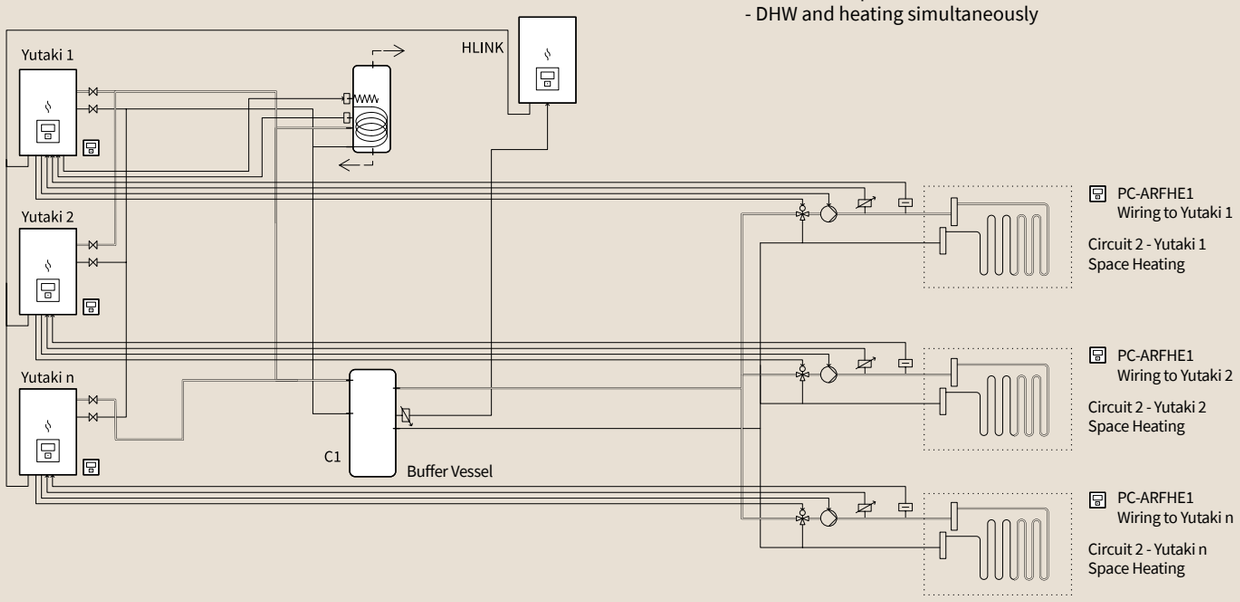
Individual DHW production and cascade heating with three Yutakis

- Different demand for DHW
- Independent heating in each house
- Simultaneous DHW and heating



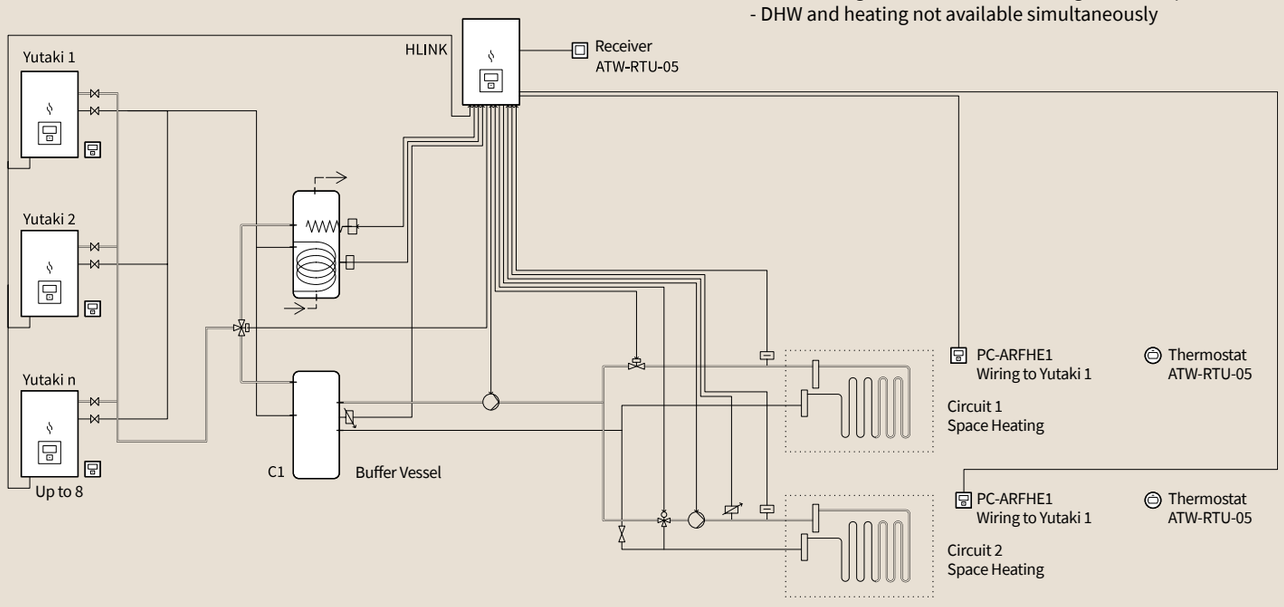
Cascade DHW production with one Yutaki and hetaing with three

- Same demand for DHW with one Yutaki
- Different setpoints for each houese
- DHW and heating simultaneously



DHW production and cascade heating with three Yutaki

- Same demand for DHW
- Two heating zones at different leaving water temperatures
- DHW and heating not available simultaneously



Yutaki S

Compact, highly efficient system: heating, hot water and cooling

Satisfies all demands

Extensive range of outputs from 1.85 kW to 32.00 kW for heating, and from 3.80 kW to 20.60 kW for cooling.

25.50 and 32.00 kW models are unique on the market.

Compact dimensions

Its compact size and easy installation make it the perfect system for confined spaces. Models from 4.30 to 7.50 kW, even fitting in a kitchen cabinet. (Fig. 1)

Best performance on the market*

The Yutaki S has the highest COP compared to competing systems, which translates into lower energy consumption and bigger savings. All units have up to A+++ maximum energy efficiency.

*Depends on model.

Exclusive design to work in the most extreme conditions

Its broad operating range means the system can work in extreme outdoor conditions: from -25°C to +46°C.

Reduced consumption

Unique on the market - water temperature up to 60 °C without the need for a backup heating element, achieving significant savings compared to other manufacturer models.

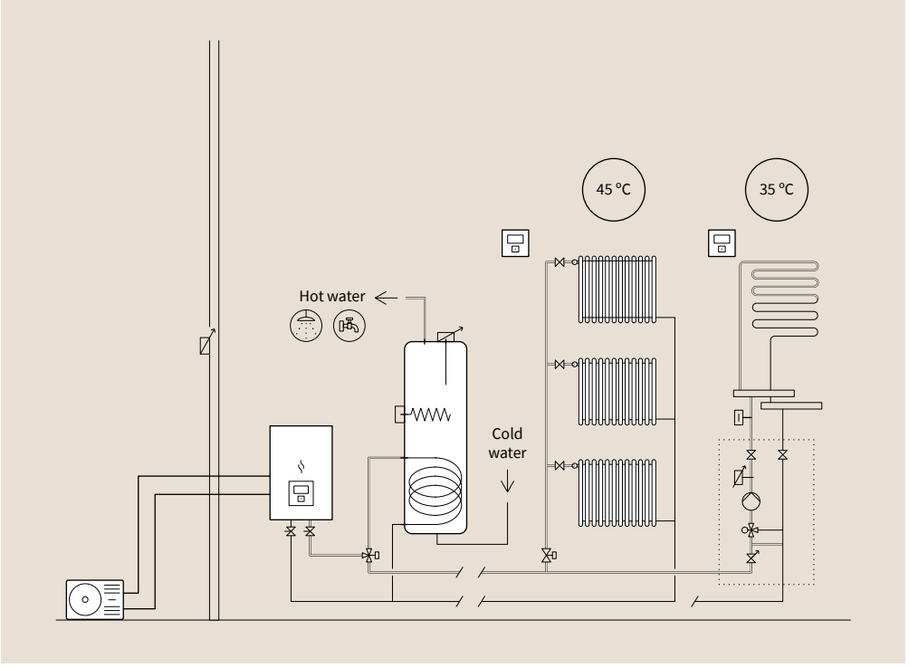
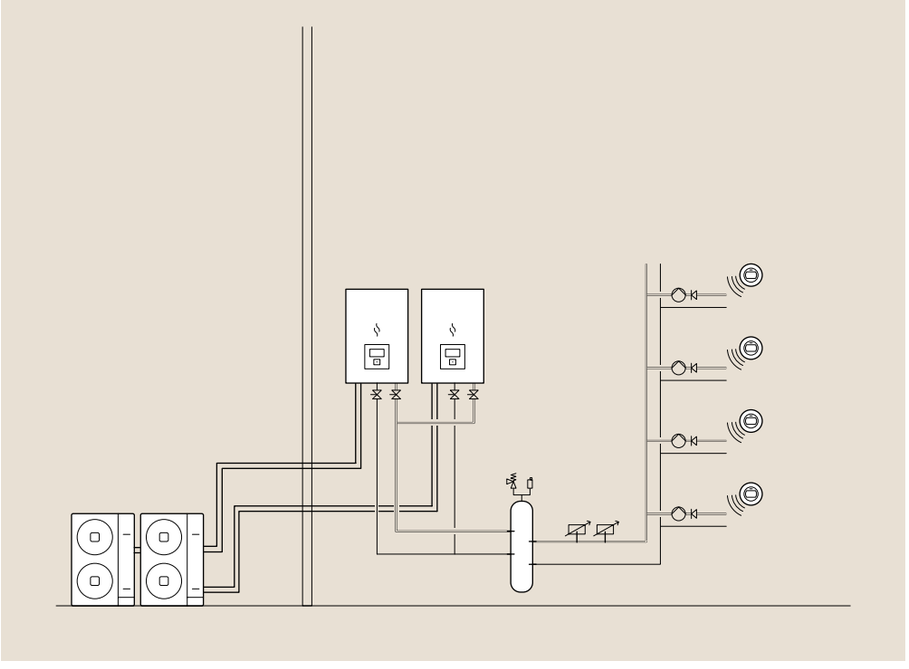
Radiator and underfloor heating at different temperatures; two zones + hot water by external tank.



Cascade operation. Heating or cooling.



Yutaki S Combi

Compact all-in-one system: heating, hot water and cooling with integrated stainless steel tank

Extensive range of models

The Yutaki S Combi is designed for any type of installation thanks to its wide range of models.

From 1.85 kW to 17.80 kW for heating, and from 3.80 kW to 13.70 kW for cooling.

Space-saving and ultraquiet

The Yutaki S Combi unit can be installed in the kitchen thanks to its compact size and low noise level.

The large space saving of up to 70 % compared to other system is due to the innovative hot water tank integrated into the indoor unit.

Choose your size

The Yutaki S Combi includes 2 tank models: 200 and 260 L

Moreover, the 2nd temperature kit can be incorporated into the 200 L unit.

Easy installation and maintenance

Compared to a split system (indoor unit-hot water tank), the Yutaki S Combi allows fast installation with minimal costs since:

- All water and refrigerant connections are aligned at the top. (Fig. 1)
- Most components are accessible from the front of the unit.
- Easy access to information from the LCD control without having to open the indoor unit.

Stainless steel tank with built-in heating element

The only compact model fitted with a hot water tank with backup heating element for emergency hot water, activated with a single button.

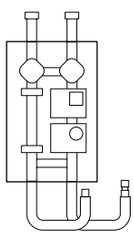
Cooling Kit

ATW-CKSC-01

Can be used to switch machine operation to cold.

Price: £ 54



2nd temperature kit

ATW-2TK-06

Only compatible with built-in Yutaki S Combi 200l.

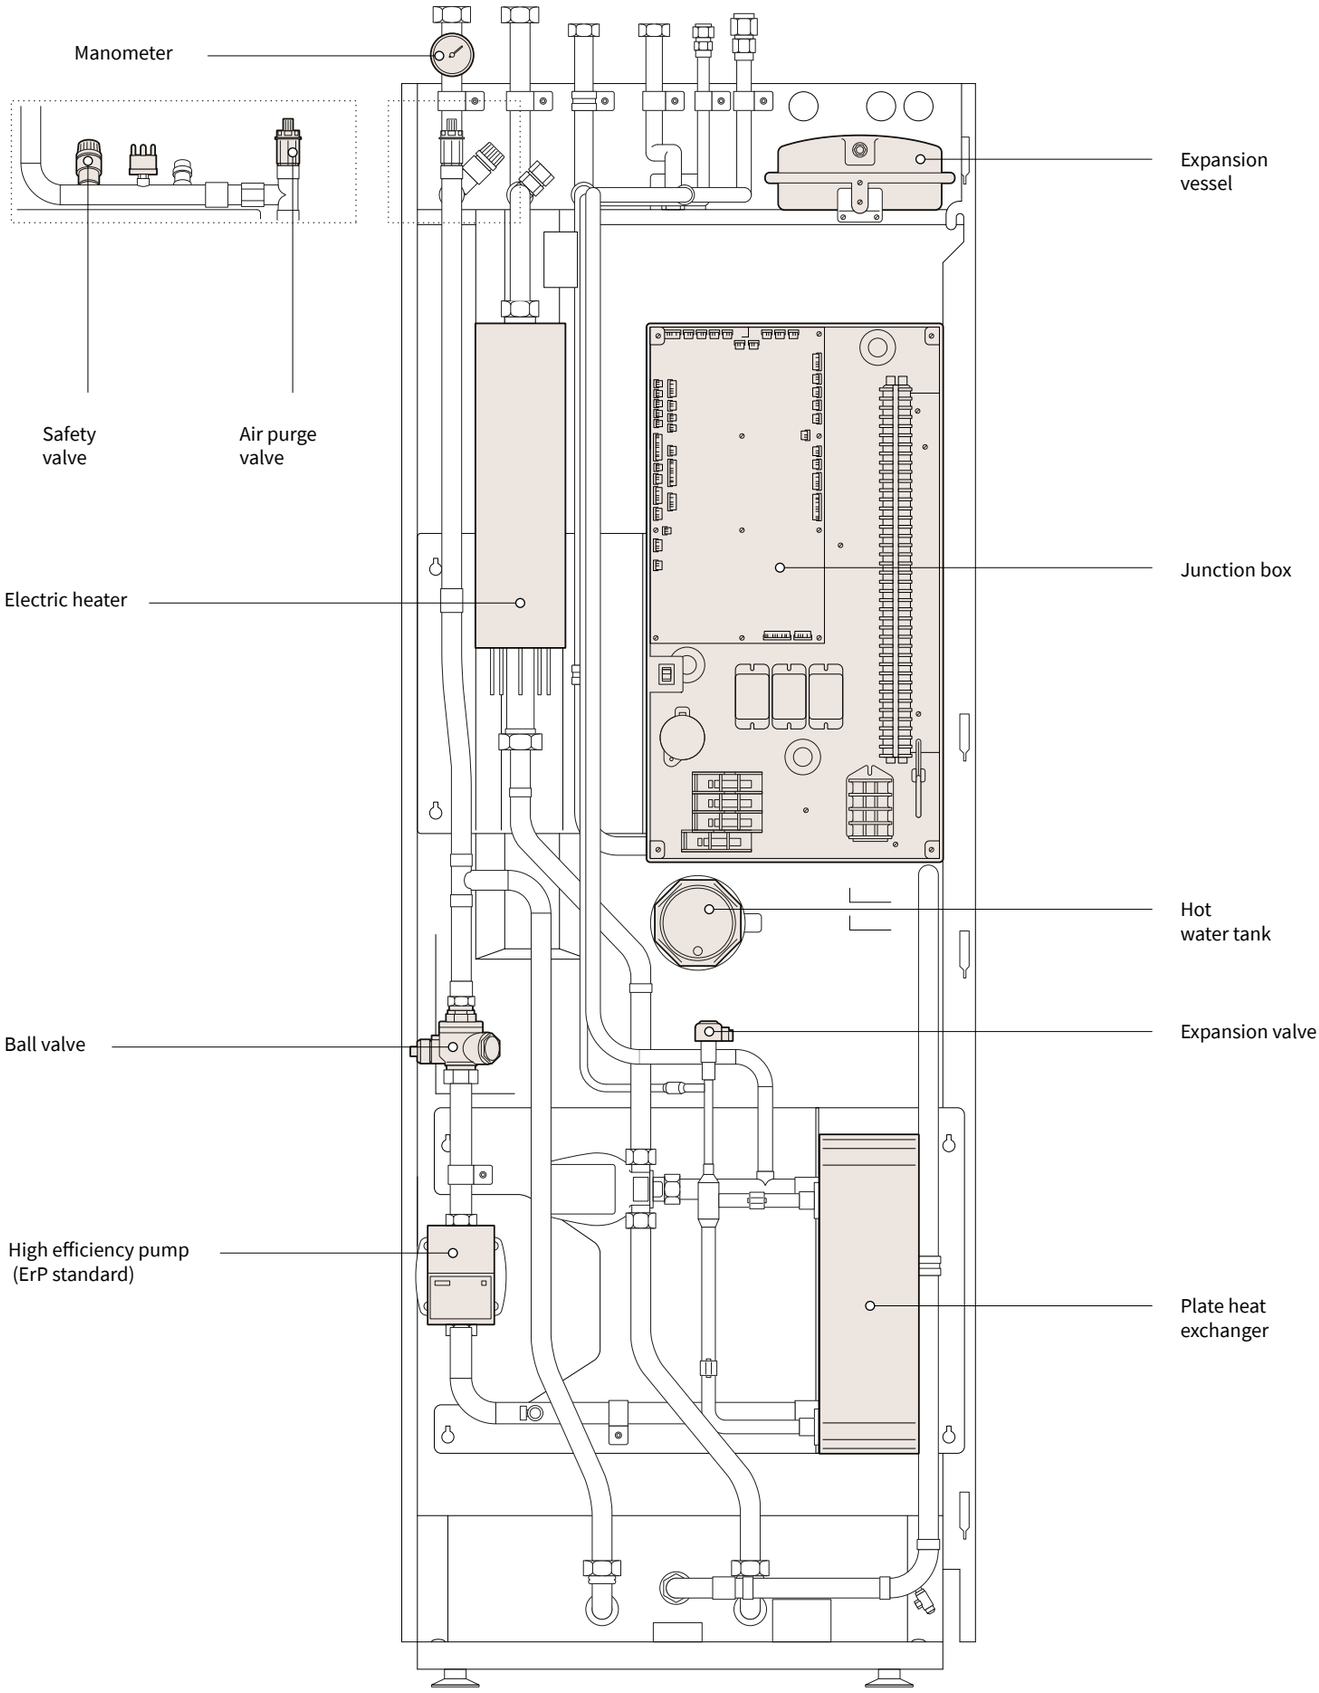
Price: £ 674

ATW-2TK-07

For wall-mounting. Compatible with the entire Yutaki range

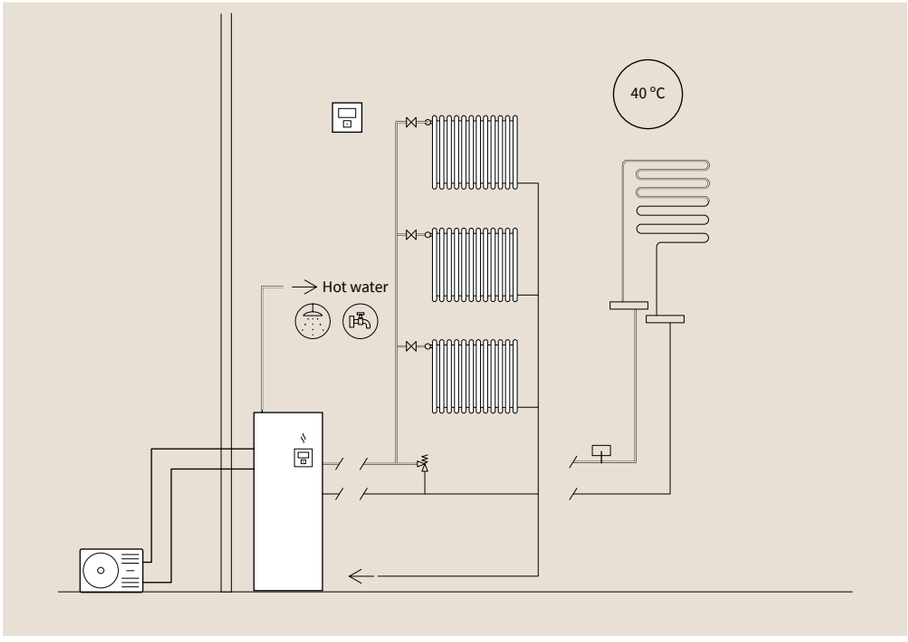
Price: £ 607

Internal design

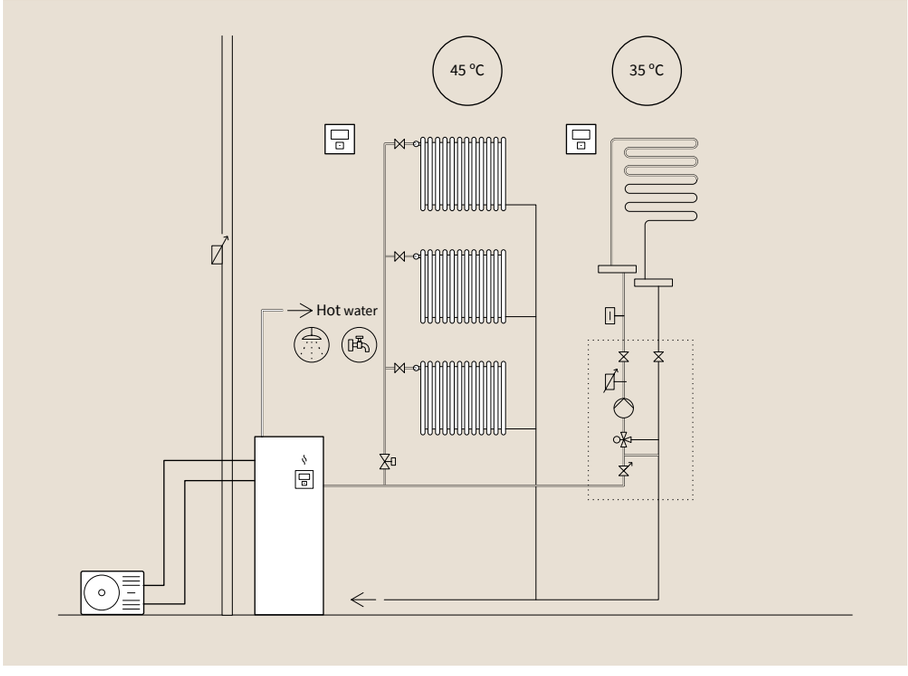


Configurations

Radiator and underfloor heating at the same temperature; one zone + hot water by built-in tank.



Radiator and underfloor heating at different temperatures; two zones + hot water by built-in tank.



Yutaki S80

Water temperature up to 80 °C for heating and hot water without an electric heater

Maximum efficiency with smart cascade cycle

Yutaki S80 uses two refrigerants: R410A and R134a. Thanks to the unique Smart Cascade cycle, the equipment automatically adjusts operation according to heating requirements. When the heating requirement is lower (water temperature up to 53 °C), it only uses the R410A refrigerant; when this requirement increases (water temperature up to 80 °C), it activates the second cycle of R134a refrigerant. Consumption is under control and comfort is guaranteed at all times. (Fig. 1)

Adapted to each installation

The Yutaki S80 is available in two models, adapting to any needs which may arise: one for heating, and one for heating and hot water.

There are two tanks, with 200 and 260-litre capacity, that can be installed as a built-in unit on or next to the indoor unit. (Fig. 2) *

Maximum heating capacity

It can heat water up to 80°C using renewable energy, even at extreme temperatures down to -25°C.

Easy installation and maintenance

Its design allows easy access to the water and refrigerant connections, which are fitted in the top of the indoor unit and at the back of the tank unit.

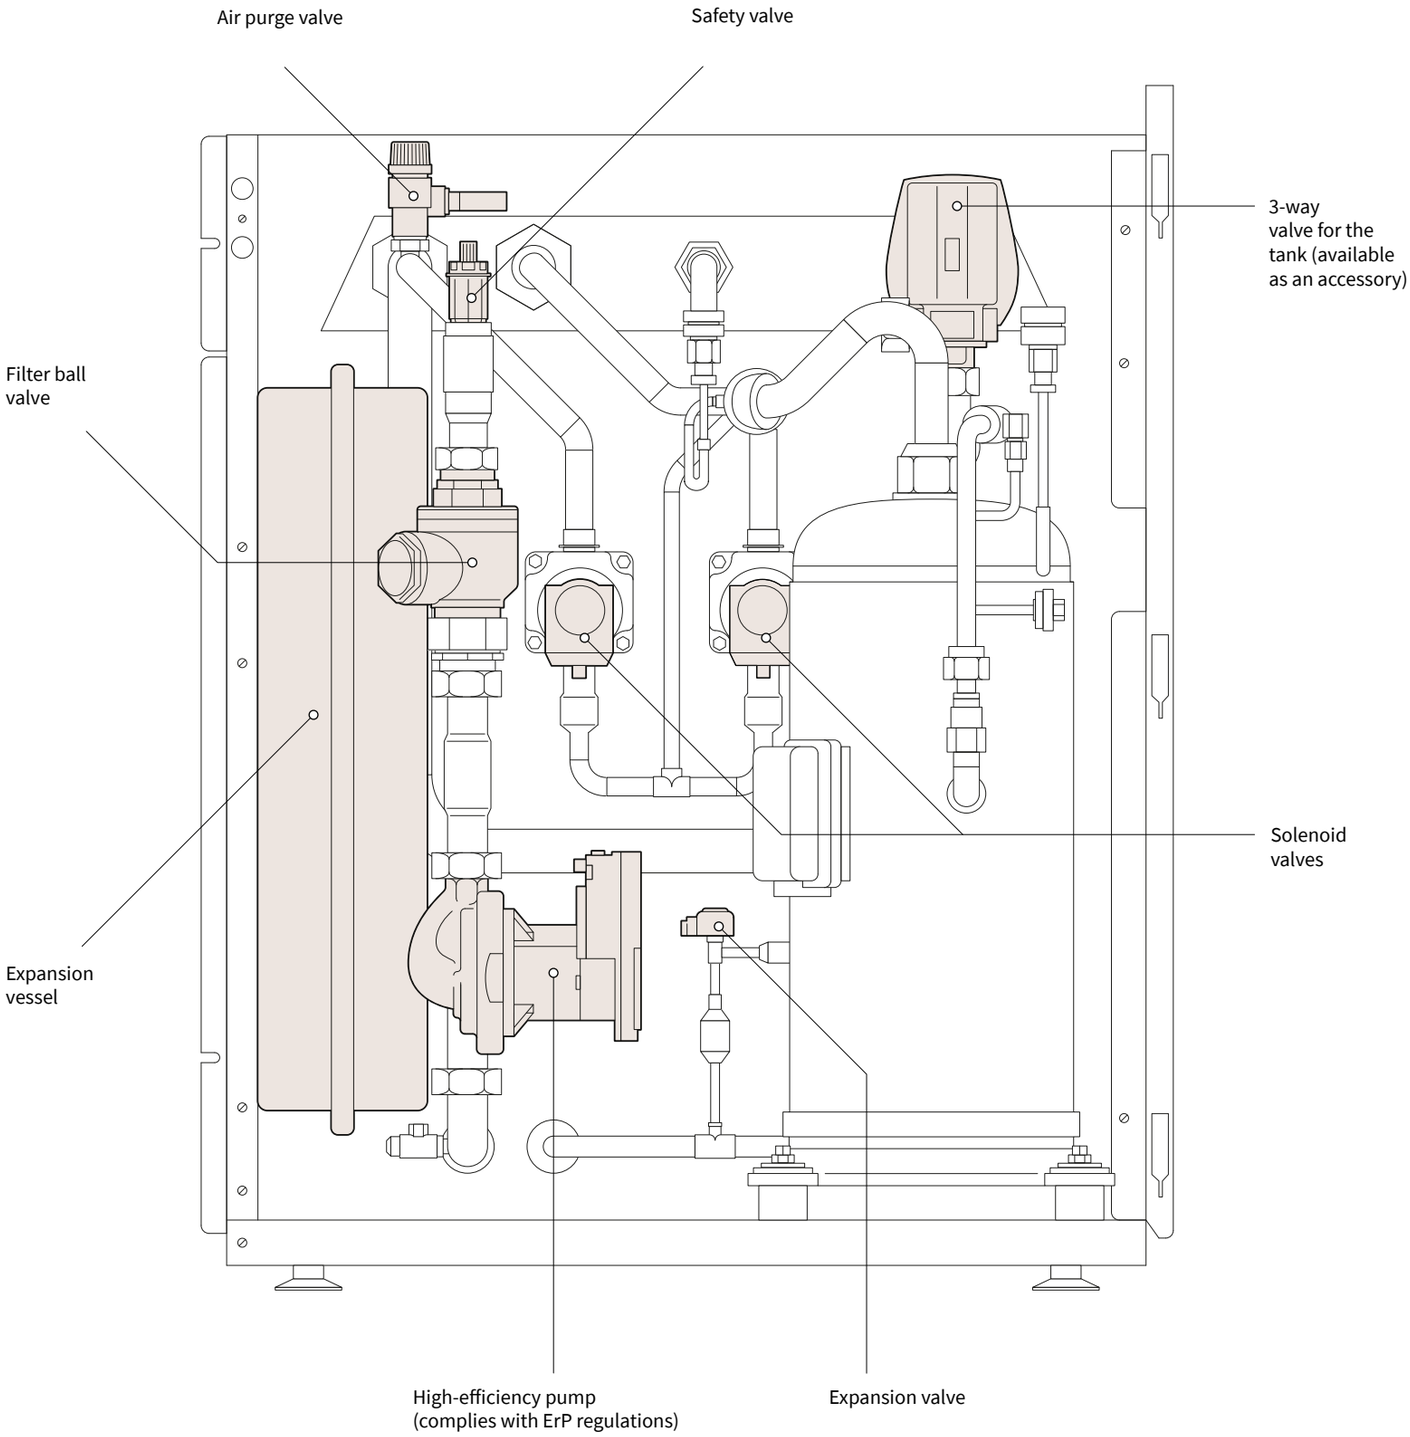
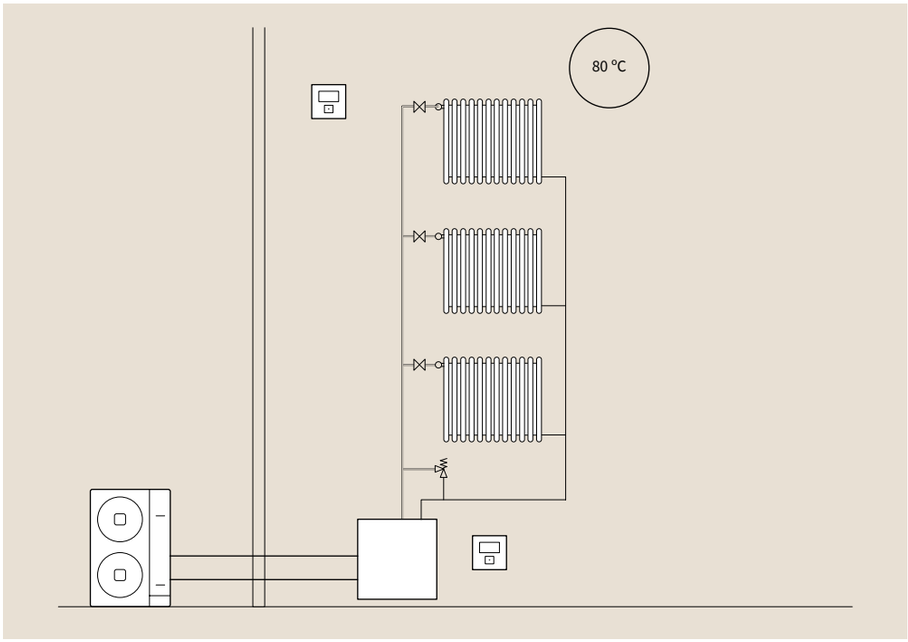
  Price: £ 54

Internal design

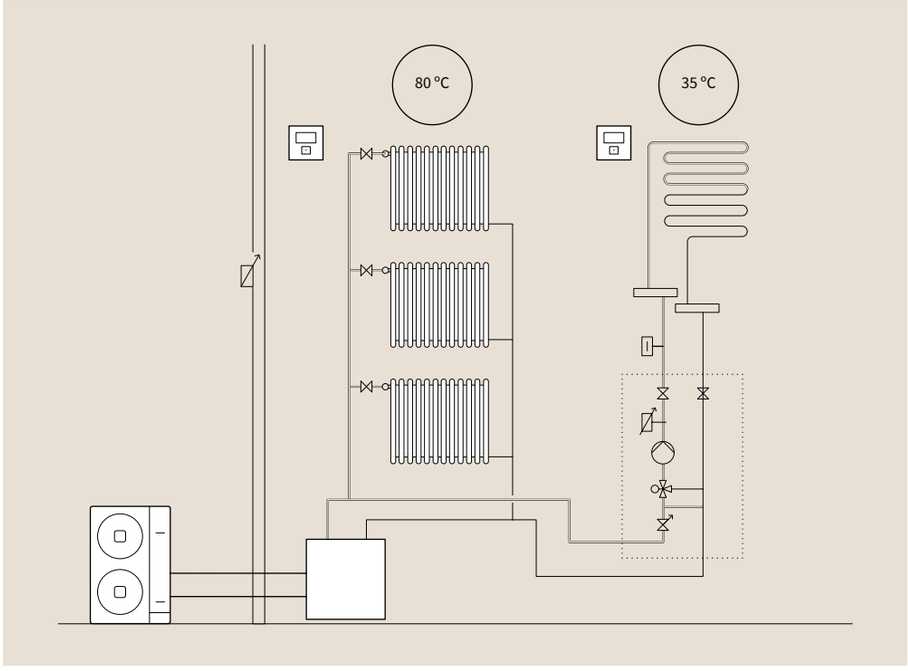


Its flexible design allows different installation possibilities and flexible pipe connection.
– Hydraulic module.
– Hydraulic module + built-in Hitachi hot water tank (not available in the UK).
– Hydraulic module + Hitachi hot water tank on one side (not available in the UK).
– Hydraulic module + third-party hot water tank.

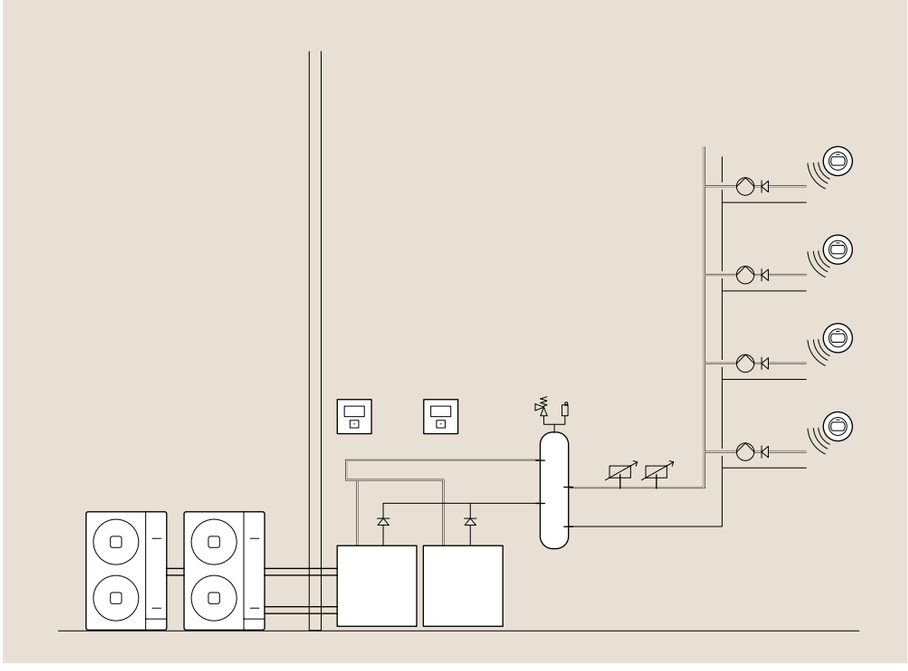
Configurations



Heating, one circuit.



Heating, radiators and underfloor heating at different temperatures; two zones.



Heating, cascade operation.

Yutaki M

Compact unit for heating, hot water and cooling without refrigeration connections

Perfect for small spaces

The Hitachi monobloc system is designed for installation in any type of property, especially homes with limited space.

Being a compact system with a single unit installed outdoors means the available space indoors remains unchanged.

Easy to install

The monobloc system ensures all functions are achieved with a single outdoor unit, bringing significant cost savings. Furthermore, installation time is much shorter since practically no pipes are required, there are no cooling connections, and the product is pre-charged at the factory.

Heating and cooling in a single system all year round

By combining the Yutaki M and the Cooling Kit, the accessory used to reverse heat pump operation ensures maximum comfort can be enjoyed all year round. The system therefore offers heating in winter and cooling in summer, all with straightforward installation.

Easy, smart control

The control with LCD screen can be used for daily and weekly programming, managing water production temperature, operating modes, etc. (Fig. 1)

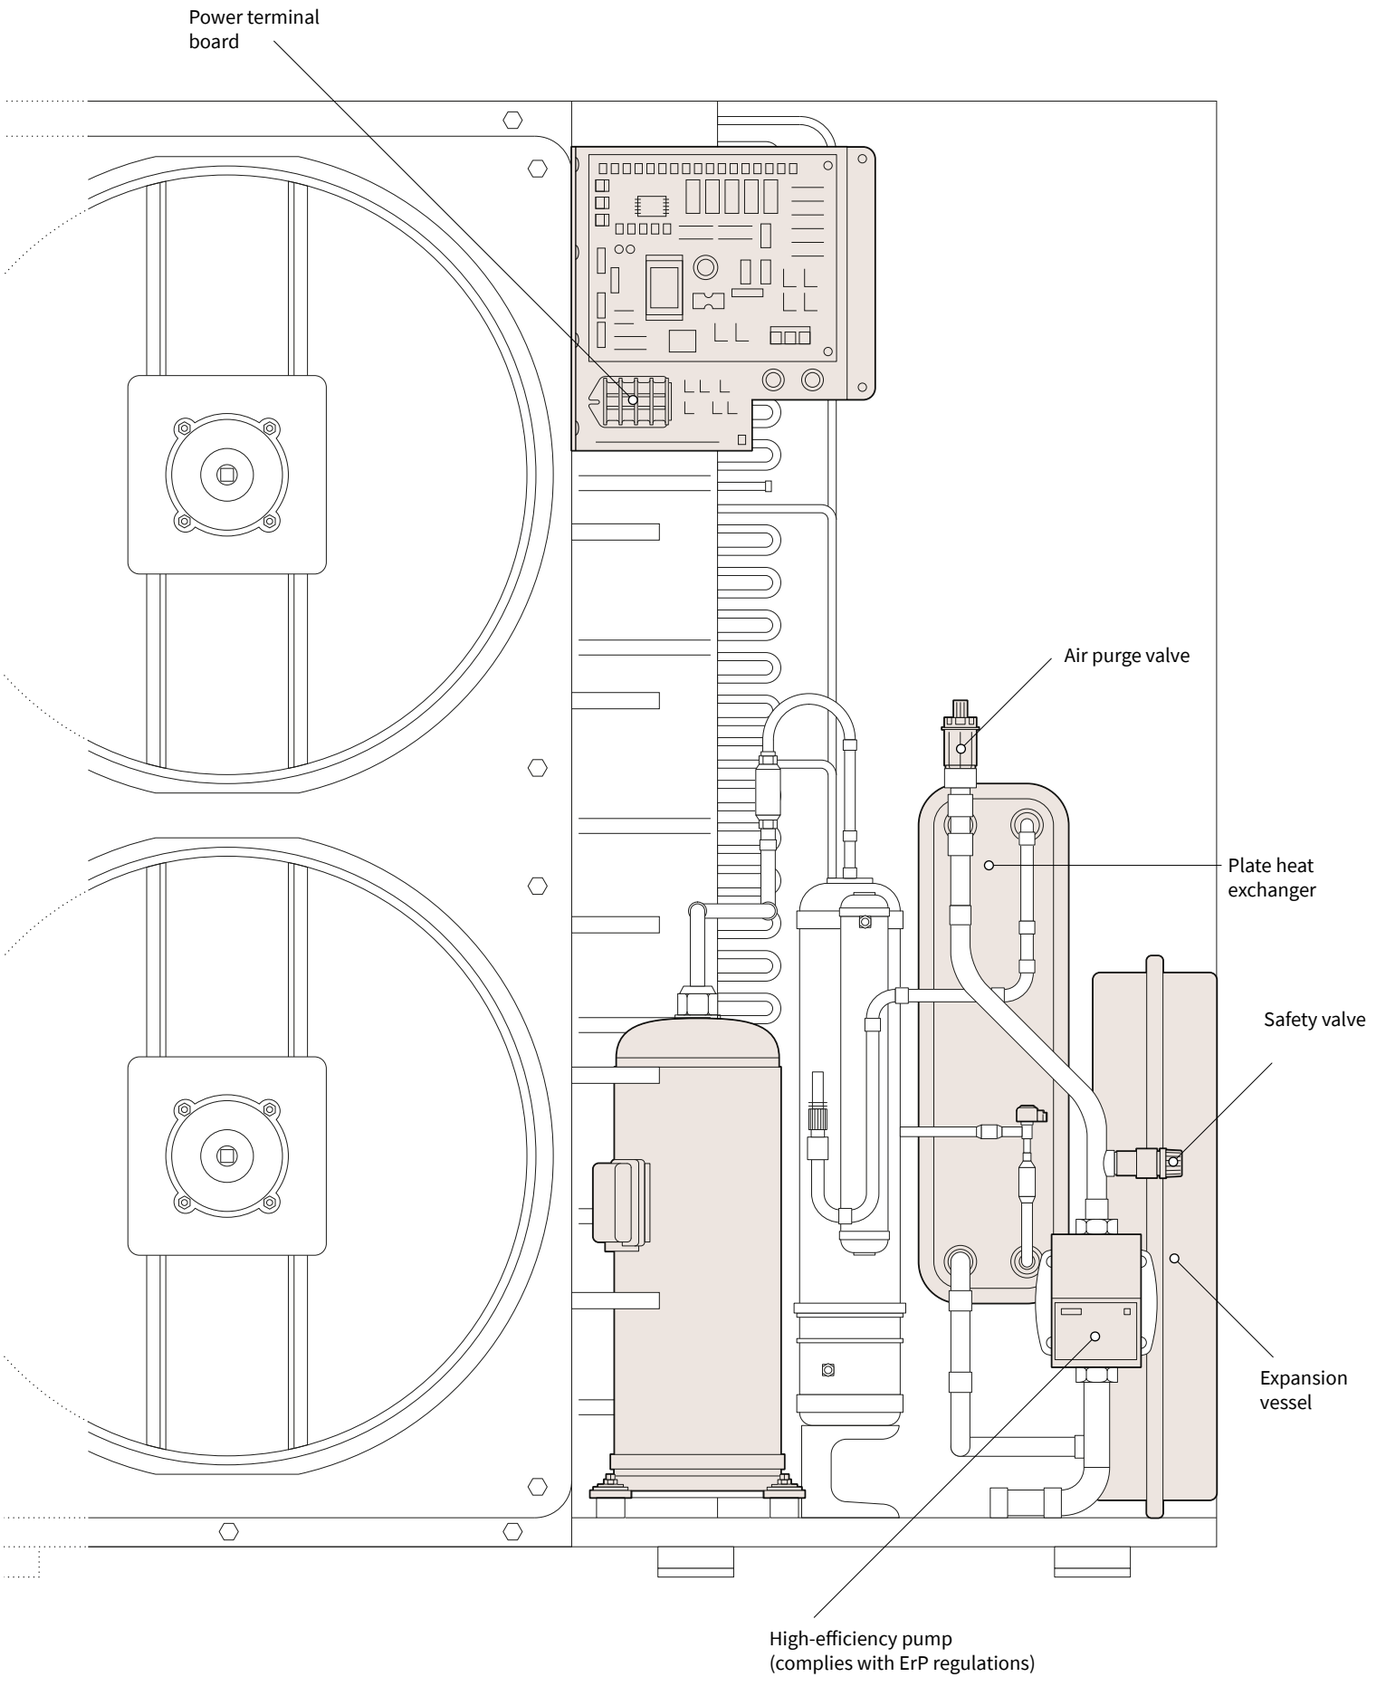
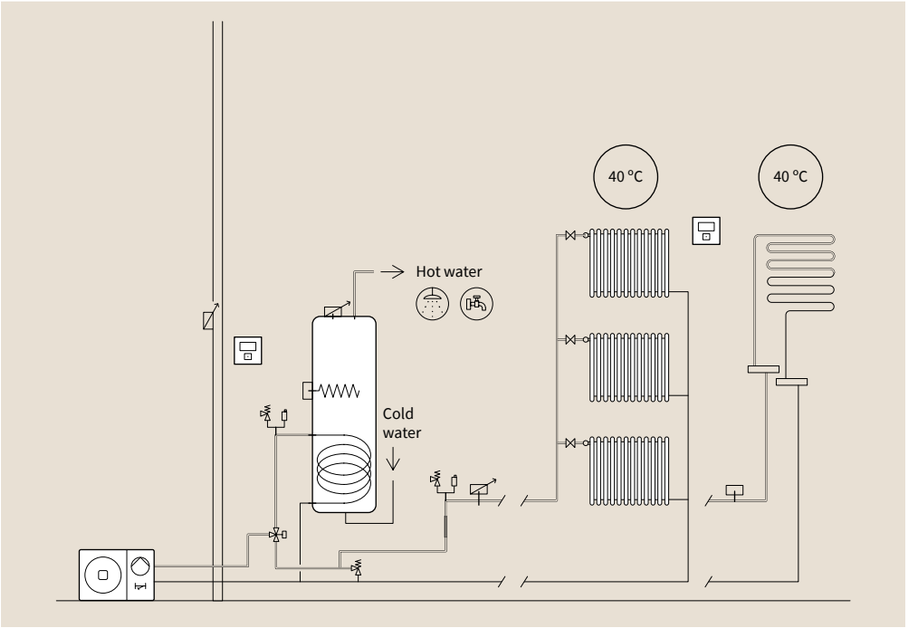
Price: £ 607

Internal design

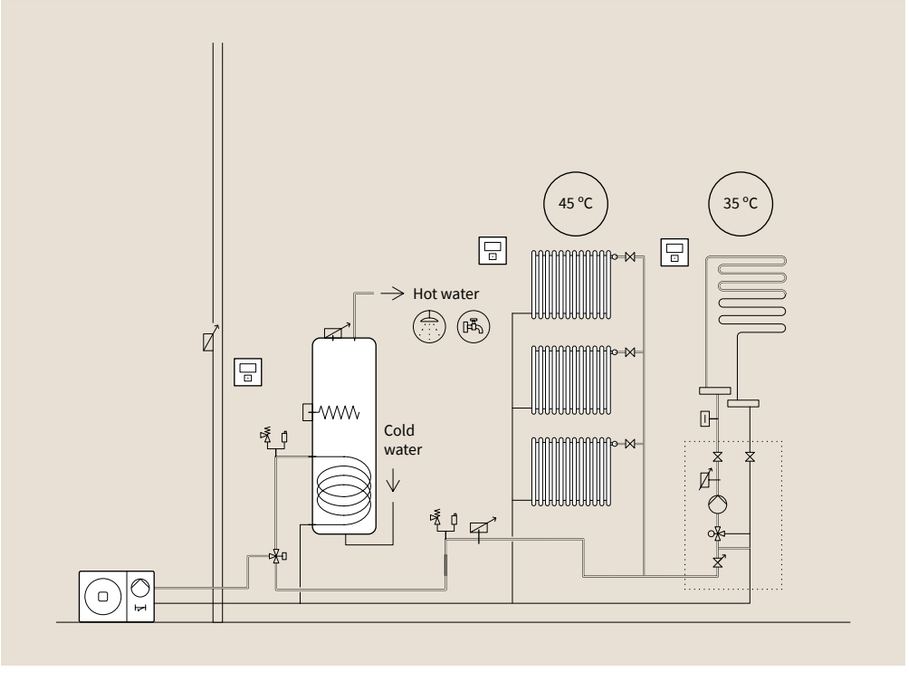


Configurations

Radiator and underfloor heating at the same temperature; one zone + hot water by external tank.



Radiator and underfloor heating at different temperatures; two zones + hot water by external tank.



Yutaki T

The simplest and most economical way to produce hot water

Maximum comfort, minimum consumption

The unit absorbs heat from the outdoor air, and transfers it to the tank to heat the water up to 55 °C. This achieves savings of 70% compared to traditional heaters.

Greater durability

Yutaki tanks are now coated with duplex stainless steel, a material that offers greater resistance to high temperatures and corrosion.

More ecological

By using renewable energy to heat the water, it does not emit CO_2, and allows smart management of operation thanks to the weekly programmable clock.

Bespoke tank

The Yutaki T range is made up of two models, 190 and 270 litre-capacity, tailored to the needs of each home. The compact 190 litre model can be installed in standard 600 x 600 mm cabinets.
It is now also 10 kilos lighter and has a refrigerant coil on the outside, thus increasing the volume of refrigerant.

Control operation from anywhere

The smart function allows operation to be programmed in advance, bringing significant savings in consumption. It can also be connected to MODBUS for home automation.

Error identifier

The equipment has a self-diagnostic system, allowing errors to be identified easily thanks to the flashing LED on the indoor and outdoor units.

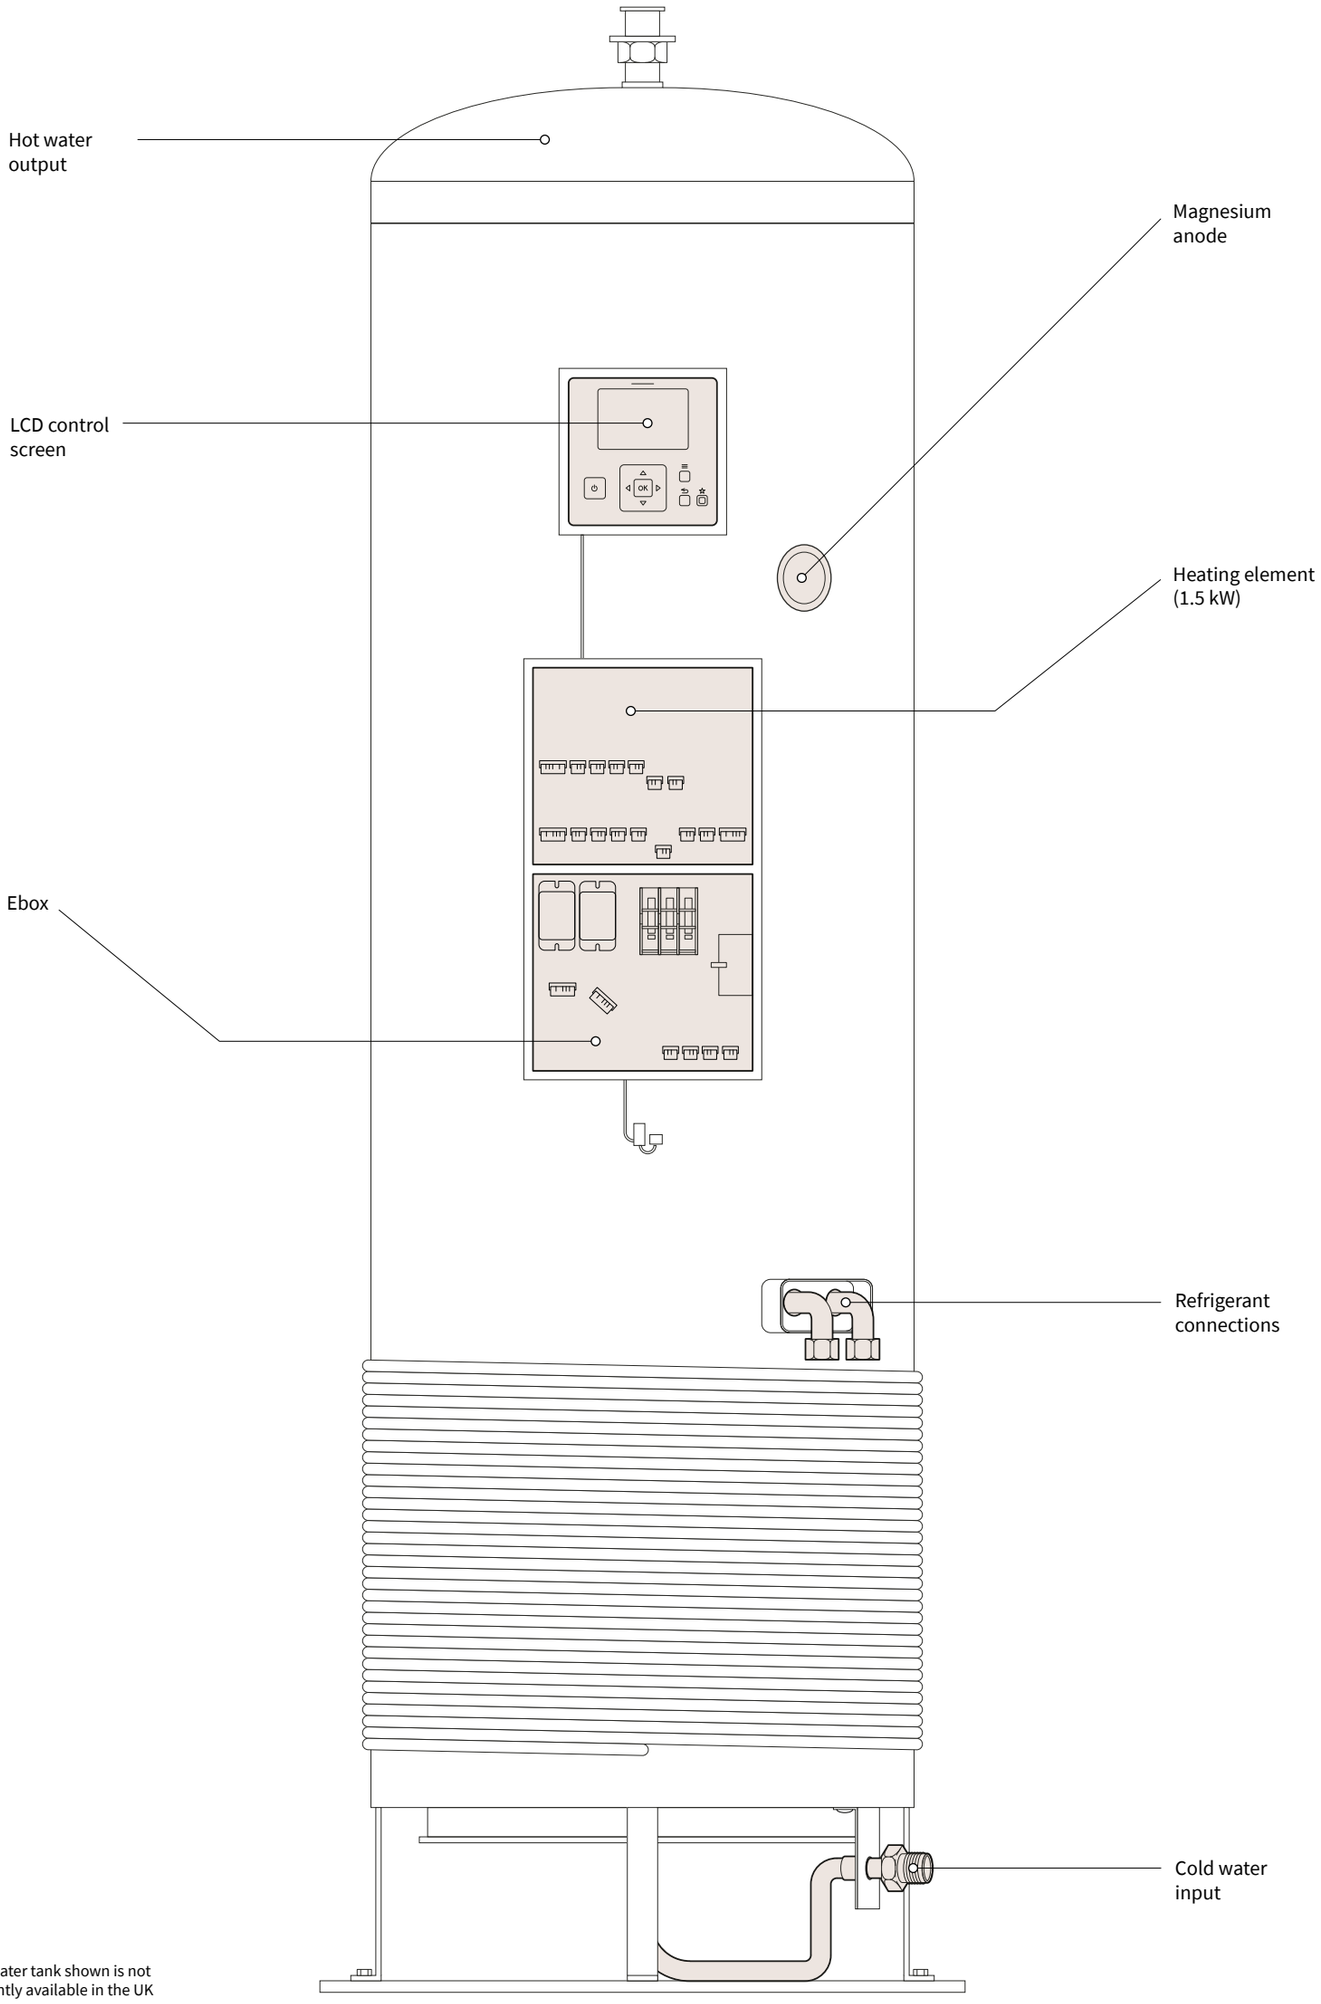
Hi-Kumo

Internal design



Hot water tank shown is not currently available in the UK

Controls

Wireless thermostat ON/OFF

ATW-RTU-04

– Includes receiver.
– ON/OFF function.
– Easy to install.

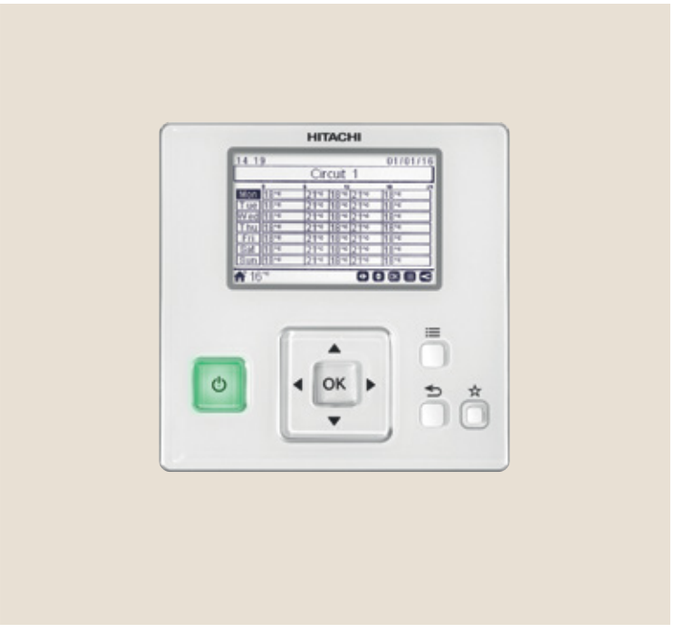
Compatibility: Entire Yutaki range.
Price: £ 140

Smart wireless thermostat

ATW-RTU-07

– Includes receiver.
– Multifunction.
– Easy to install.

Compatibility: Entire Yutaki range.
Price: £ 240



Wired control

PC-ARFH1E

– Weekly programming.
– Multifunction: modes, temperatures.
– Eco mode.
– Configure, set and display operating parameters.
– Several languages.
– Can work as a thermostat.
– On-screen error codes.

Compatibility: Entire Yutaki range.
Price: £ 135

Wireless thermostat for second circuit

ATW-RTU-06

– Multifunction.
– Easy to install.
– To control the temperature of a second circuit.

Compatibility: Entire Yutaki range.
Price: £ 99

KNX Interface

ATW-KNX-02

– Centralises the control.
– Allows the Yutaki range to be integrated in KNX home automation systems.

Compatibility: Entire Yutaki range.
Price: £ 327

Modbus for Yutaki

ATW-MBS-02

– Centralises the control.
– Allows the Yutaki range to be integrated in Modbus systems.

Compatibility: Entire Yutaki range.
Price: £ 250

Cascade control

ATW-YCC-01

– Suitable for high power installations.
– Centralised control of up to 8 Yutaki units.
– Different control options: cascade, rotary, smart defrost...

Compatibility: The entire Yutaki range except for Yutaki T.
Price: £ 494

Wi-Fi adapter for Hi-Kumo app

ATW-TAG-02

– Connect the Yutaki range using the Hi-Kumo app in order to manage it from any mobile device.
– Requires Hi-Box AHP-SMB-01.

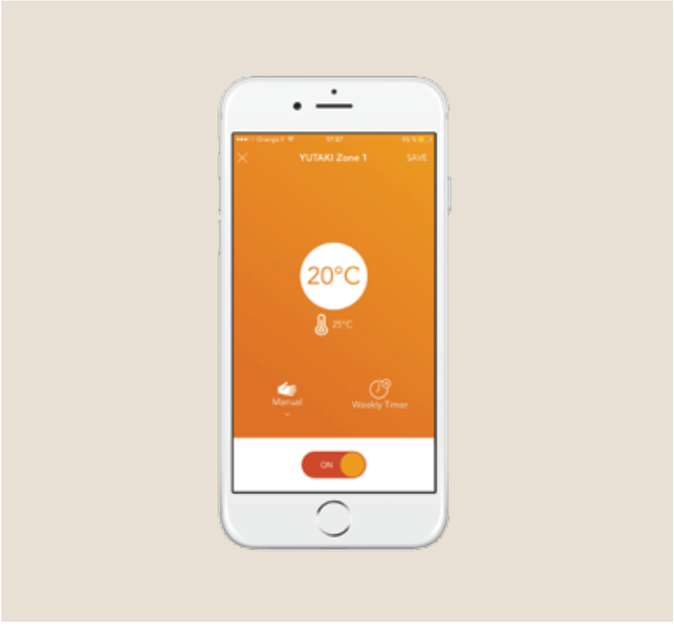
Price: £ 100

Hi-Box Yutaki

AHP-SMB-01

– Accessory for the ATW-TAG-02 Wi-Fi adapter.
– Ensures compatibility with the Hi-Kumo app, in order to manage the Yutaki system from any mobile device.

Price: £ 55

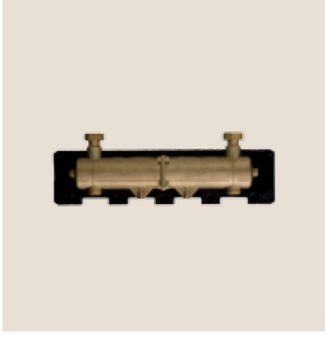


How to enjoy Hi-Kumo

1. Connect the Hi-Box to the router and the adapter to the Yutaki.
2. Download the app to your smartphone, tablet or computer.
3. Configure by simply searching for connected units and pairing them with the app.

Price: FREE

Accessories



Hydraulic separator

ATW-HSK-01

– Non-corrosive (brass).
– 4 connection paths.
– With insulation.

Compatibility: Entire Yutaki range.
Price: £ 359

Second temperature kit

ATW-2TK-06

– Incorporated into 200 L hot water tank.

Compatibility: Yutaki S Combi with 200 L hot water tank.
Price: £ 674

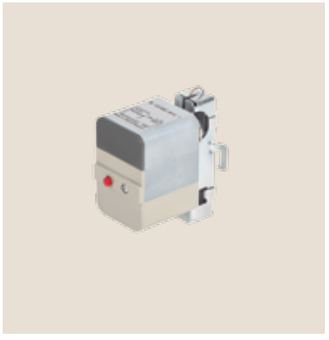
Second temperature kit

ATW-2TK-07

– Wall-mounted model.

Compatibility: Entire Yutaki range.
Price: £ 607

Accessories



Safety aquastat

ATW-AQT-01

– Recommended for underfloor heating applications.

Compatibility: Entire Yutaki range.
Price: £ 132

3-way valve

ATW-3WV-01

– Valve to allow operation in heating/ hot water.

Compatibility: Entire Yutaki range.
Price: £ 144

Proportional discharge valve

ATW-DPOV-01

– Proportional for variable flow installations.
– Included as standard in UK version tanks.

Compatibility: Entire Yutaki range.
Price: £ 97

Second outdoor ambient temperature sensor

ATW-2OS-02

– Used to measure outside temperatures in the area where the outdoor unit is installed.

Compatibility: Entire Yutaki range.
Price: £ 84

Wired wall-mounted sensor for indoor ambient temperature

ATW-ITS-01

Compatibility: Entire Yutaki range.
Price: £ 26

Universal water temperature sensor

ATW-WTS-02Y

Compatibility: Entire Yutaki range.
Price: £ 54

Backup heating element

WEH-6E

– 6 kW single/three phase.
– 3 x 2 kW stages.
– Built-in power relay.
– Steel body with external insulation.

Compatibility: Yutaki S80, Yutaki M.
Price: £ 660

Unit controller cover

ATW-FCP-01

– Used to cover the gap left in the indoor unit when removing the programmer control and using it as a thermostat in any area.

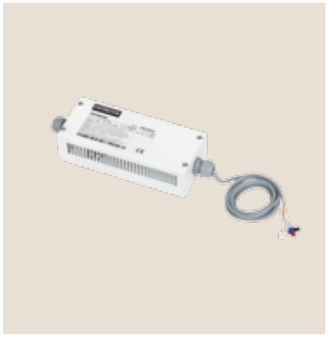
Compatibility: Entire Yutaki range.
Price: £ 26

Mirror box

ATW-YMM-01

– Simplifies installation when the Yutaki M is far from the property, avoiding the need to install large cable runs, using just two communication cables.

Compatibility: Yutaki M.
Price: £ 356

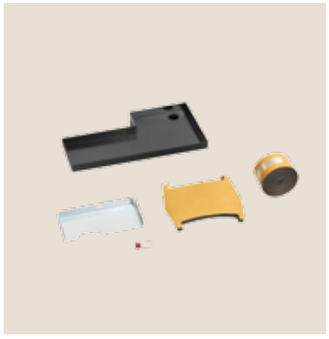


Auxiliary output signal box

ATW-AOS-02

– Relay box for additional output signals.

Compatibility: Entire Yutaki range.
Price: £ 175



Yutaki Range Cooling Kit

ATW-CKS-01/ATW-CKS-02/ATW-CKS-03/ATW-CKSC-01/ATW-CKM-01

– Used to switch the Yutaki range to work in both heat and cold.

ATW-CKS-01 (Yukaki S 2-3HP): **£ 87**
ATW-CKS-02 (Yukaki S 4-6HP): **£ 54**
ATW-CKS-03 (Yukaki S 8-10HP): **£ 54**
ATW-CKSC-01 (Yukaki S Combi): **£ 54**
ATW-CKM-01 (Yukaki M): **£ 39**
Compatibility: The entire range except for Yutaki S80.

Domestic hot water tank 200/300 L

DHWT-200/300 S-3.0H2E

Compatibility: Yutaki S, Yutaki S80, Yutaki M.

Hitachi tanks not currently available in the UK. G3 compliant Kingspan DHW cylinders are optional - speak to your Hitachi area sales manager or distributor for details.

Hitachi's new R32 systems are the answer to an increasingly sustainable world and our commitment to the environment. We have been preparing for this change since 2013 by developing R32 equipment in Japan. Our new systems comply with F-GAS regulations and are designed to create harmony between people and their environments.

Benefits

R32

1 New regulation, new R32 refrigerant for a sustainable environment

European regulation F-GAS (517/2014) came into force on 1st January 2015, in order to reduce greenhouse gas emissions. It aims to reduce the amount of HFC (hydrofluorocarbon) refrigerant used in cooling and heating systems by 79% by 2030.

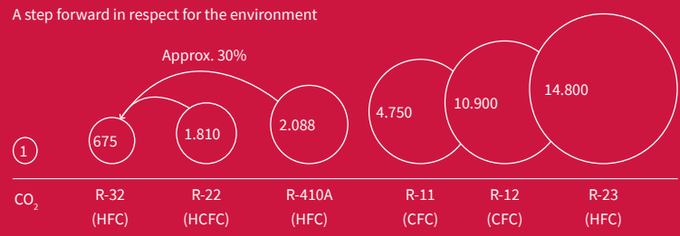
Although R32 is part of the HFC refrigerants group, its properties mean it is a more environmentally friendly and efficient refrigerant.

These properties mean that:

- It is easier to recover and recycle, as it is a pure refrigerant (without mixture).
- It is more environmentally friendly as it has a lower PCA than other refrigerants.
- It has no impact on the ozone layer.
- With this refrigerant, the system needs 30% less refrigerant than with other systems.
- Its cost and associated tax are significantly lower than for other refrigerants.
- It works more efficiently, reducing electrical con sumption and making it easier to attain high energy ratings in A+++ equipment.

Consumption of HFC compared to CO_2 equivalent tonnes

A step forward in respect for the environment



2 The new R32 range looks to protect the environment

At Hitachi we want to be part of this change and provide future systems which connect to the environment, creating harmony between people and their sustainable lives, something we've been working on since 2013. Our goal is to complete the R32 range by 2025.

3 Discover the latest Hitachi devices with R32

Our indoor climate range includes different styles of indoor units between 2 to 7 kW. Attention is always paid to energy efficiency, appealing aesthetics and quiet operation.

4 Frost Wash

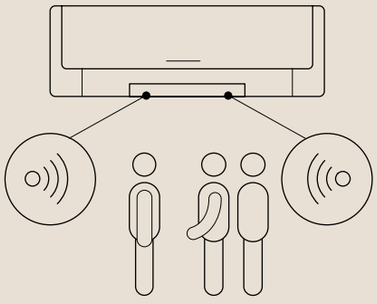
This unique patented technology allows the unit to self clean the heat exchanger by freezing it and then melting the ice to wash away the dust and allergens.

https://youtu.be/qNH_YXhWM2o

5 Compatible with Hi-Kumo App

The whole indoor climate range is compatible with the Hi-Kumo app. Your smartphone becomes a remote control and you can switch your unit on and off, set the temperature and alter the schedule from anywhere in the world.

6 ECO - Human sensor



The Human sensor detects movement in the room and automatically adjusts the operation of the unit to save unnecessary operating costs.

High-efficiency and simplicity

Compatible with Hi-Kumo Wi-Fi control

This control can be used to turn the unit on or off, increase or decrease the temperature, or programme the system from anywhere in the world. All you need is a mobile phone, internet connection and Wi-Fi equipment (optional) to connect to the air unit.

Full use of space

It can be installed discreetly thanks to its compact size. For instance, above a door it is only 780 mm long. (Fig. 1)

Ultraquiet operation

Its low noise level of just 19dB means you will enjoy a comfortable environment without even noticing that the indoor unit is on.

Performance

Compact size and high performance

Enhanced comfort with 4-Way Swing

The vertical and horizontal movement of the slats ensures a more uniform distribution of air for greater comfort in the room.
(Fig. 1)

Presence sensor

These units are fitted with a presence sensor to ensure optimal consumption in accordance with the number of people in a room. This sensor gradually decreases energy consumption as the room empties, and increases it as human movement is detected.
(Fig. 2)

Compatible with Hi-Kumo Wi-Fi control

This control can be used to turn the unit on or off, increase or decrease the temperature, or programme the system from anywhere in the world. All you need is a mobile phone, internet connection and Wi-Fi equipment (optional) to connect to the air unit.

Full use of space

It can be installed discreetly thanks to its compact size. For instance, above a door it is only 780 mm long.
(Fig. 3)

Ultraquiet operation

Its low noise level of just 19dB means you will enjoy a comfortable environment without even noticing that the indoor unit is on.
*check model

First-class energy efficiency

Lower energy consumption thanks to its A+++ energy rating. Use your air conditioning while barely noticing its effect on your electricity bill.

Light Commercial Wall-Mounted

High performance and built-in presence sensor

Enhanced comfort with 4-Way Swing

Air distribution is more uniform thanks to the vertical and horizontal movement of the slats, thus improving comfort in the room. (Fig. 1)

First-class energy efficiency

Lower energy consumption thanks to its A++ energy rating.* Use your air conditioning while barely noticing its effect on your electricity bill.
*check model

Presence sensor

Air conditioning without any unnecessary consumption thanks to the presence sensor, which decreases the system's energy consumption gradually when the room empties, and puts it back into operation when it detects human movement.
(Fig. 2)

Enhanced comfort

This system allows us to choose where to measure the setpoint temperature (in the control, in the return, or the average of both values). This feature ensures enhanced comfort in the room.

Flexible installation

There is up to 30 m of cooling pipe between the indoor and outdoor units, meaning the system can be installed almost anywhere in the building. Furthermore, the height difference between them can reach up to 20 m.

Compatible with Hi-Kumo Wi-Fi control

This control can be used to turn the unit on or off, increase or decrease the temperature, or programme the system from anywhere in the world. All you need is a mobile phone, internet connection and Wi-Fi equipment (optional) to connect to the air unit.

Compact indoor unit

The indoor unit is only 900 mm wide, which means it can be installed virtually anywhere without interfering with other elements. Other systems on the market are around 1,000 mm wide, and some of them even exceed this width.

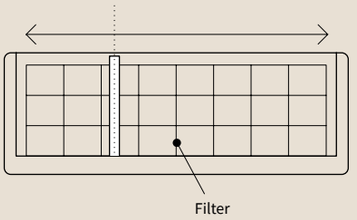
S-Premium

An air conditioner for life, with stainless steel interior and automated self-cleaning.

Clean, more efficient air conditioning

The interiors of the premium indoor unit series are made from stainless steel reducing the accumulation of dust by 51% compared to plastic models. The stainless steel air filter is self cleaned automatically on a regular basis (Fig. 1). The new Frost wash function automatically cleans the heat exchanger ensuring the purest air possible for your rooms.

Fig. 1 Hitachi "Self-cleaning " robot



Energy class A+++*

High efficiency for optimal performance and significant running cost savings.

*2.5 and 3.5kW units

Excellent Design

Premium series wall mounts are available in silver and matt white. The simple design and classy finish ensures the unit blends in perfectly to your premises.

GOOD DESIGN AWARD 2018

Increased comfort through Human sensor

Air conditioning without any unnecessary consumption thanks to the presence sensor, which decreases the system's energy consumption gradually when the room empties, and puts it back into operation when it detects human movement.

Everything at a glance

The LCD display is integrated into the front of the device, which on request, can display information about the operation such as temperature setting and mode.

Light Commercial Cassette

High performance control options

Condensate pump included

The LC cassette is fitted with its own pump to automatically remove condensate liquid. No need to purchase additionally. (Fig. 1)

First-class energy efficiency

Lower energy consumption thanks to its A++ energy rating.* Use your air conditioning while barely noticing its effect on your electricity bill.
*check model

Enhanced comfort

This system allows us to choose where to measure the setpoint temperature (in the control, in the return, or the average of both values). This feature ensures enhanced comfort in the room.

Flexible installation

There is up to 30 m of cooling pipe between the indoor and outdoor units, meaning the system can be installed almost anywhere in the building. Furthermore, the height difference between them can reach up to 20 m.

Compatible with Hi-Kumo Wi-Fi control

This control can be used to turn the unit on or off, increase or decrease the temperature, or programme the system from anywhere in the world. All you need is a mobile phone, internet connection and Wi-Fi equipment (optional) to connect to the air unit.

Individual louvre control

Each louvre of the cassette can be individually controlled for a comfortable air flow and adaptability to all room configurations. (Fig. 2)

Light Commercial Ducts

Operation down to -15ºC

Condensate pump included

The LC duct is fitted with its own pump to automatically remove condensate liquid. No need to purchase additionally. (Fig. 1)

First-class energy efficiency

Lower energy consumption thanks to its A++ energy rating.* Use your air conditioning while barely noticing its effect on your electricity bill. *check model

High static pressure

Since the unit has 150Pa pressure, the ducts unit can be installed wherever they cause least disturbance. The user therefore does not have to worry about not getting enough air to the room furthest away.

Flexible installation

There is up to 30 m of cooling pipe between the indoor and outdoor units, meaning the system can be installed almost anywhere in the building. Furthermore, the height difference between them can reach up to 20 m.

Compatible with Hi-Kumo Wi-Fi control

This control can be used to turn the unit on or off, increase or decrease the temperature, or programme the system from anywhere in the world. All you need is a mobile phone, internet connection and Wi-Fi equipment (optional) to connect to the air unit.

Enhanced comfort

This system allows us to choose where to measure the setpoint temperature (in the control, in the return, or the average of both values). This feature ensures enhanced comfort in the room.

Shirokuma Console

A unit with discreet design and high performance

Extended air flow

The air can reach every corner of the room thanks to its greater dynamic air flow. The room is air conditioned (heated or cooled) at the touch of a button on the remote control.
(Fig. 1)

Flexibility with Multizone range

The Shirokuma console is compatible with all Multizone outdoor units, so more than one can be installed in multiple rooms with a single outdoor unit.

High performance

The system has A++ energy rating, ensuring high performance with low running costs.

Control options

The system is fitted with Eco Control as standard. It is also compatible with the wired remote control with 12 h timer and with the H-Link adapter.

Compatible with Hi-Kumo

The entire Hitachi residential range is compatible with the Hi-Kumo system, which allows the system to be controlled from any mobile device as if it were a remote control.

The R410A 1x1 systems are the ideal solution for high performance and maximum discretion in properties, shops or small independent spaces within large facilities. Its simple but precise technology ensures optimal comfort whatever the season.

R410A 1x1 Systems

Wall-mounted IVX

Quiet and compact perfect for homes and businesses

Improved performance at extreme temperatures

This system can work down to -20 °C in heating, and up to 46 °C in cooling.

Built-in expansion valve in the indoor unit

Being located inside the indoor unit ensures a more efficient process and more accurate temperature control.

Smart defrost control

The machine remembers previous defrost cycles and so can use intelligent predictions on when to start the cycle to reduce the length of time heating is suspended. It also detects ice buildup and sends hot gas to the OU so as to avoid activating the defrost cycle at all. (Fig. 1)

Compact unit

Up to 14 kW (6 HP) with a single fan;
0.35 m^2 of floorspace occupied.

Greater flexibility

The installation of 3 and 4 HP units allows up to 70m of pipe run and 30m of height difference. (Fig. 2)

Easy installation of up to 4 units

Allows independent climate control of up to 4 different spaces. Installation is simplified thanks to a common refrigerant circuit.
See the VRF section for combinations and connections

Primairy ducts

The best value for money

Highly flexible installation

The Primairy range of ducts allows the outdoor unit to be installed up to 50m away from the indoor unit and has a potential height difference of 30m: great for installing on roofs out of sight.
(Fig. 1)

Built-in drain pan

The new built in drainage tray reduces dust accumulation and prevents water leakage and mold buildup.
(Fig. 2)

Extensive static pressure range

Greater flexibility thanks to the extensive range of optional static pressures for long ducts and multi-zone applications.

Extensive range for all types of installations

The extensive Primairy range of 3, 4, 5, 6 and 6.5 HP ducts has up to A++ energy efficiency.

Flexible air return from the underneath or at the back

Different circumstances can require flexibility of air intake depending on needs such as space constraints. This intake can be changed without changing the unit.

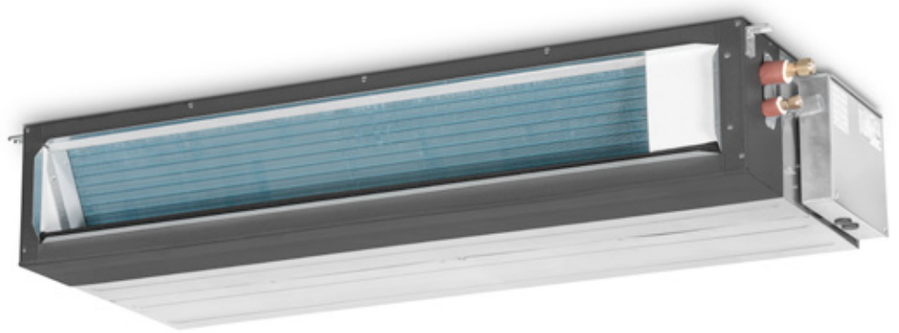
IVX ducts

Quiet and compact, perfect for homes and businesses



Built-in condensate pump

Hitachi ducts are fitted with a built-in pump to drive the condensate to a downpipe.

Compact unit

Up to 14 kW (6 HP) with a single fan;
0.35 m² of floorspace occupied.

Built-in expansion valve in the indoor unit

Being located inside the indoor unit ensures a more efficient process and more accurate temperature control.

Smart defrost control

The machine remembers previous defrost cycles and so can use intelligent predictions on when to start the cycle to reduce the length of time heating is suspended. It also detects ice buildup and sends hot gas to the OU so as to avoid activating the defrost cycle at all.
(Fig. 1)

Greater flexibility

The installation of 3 and 4 HP units allows up to 70m of pipe run and 30m of height difference.
(Fig. 2)

Easy installation of up to 4 units

Allows independent climate control of up to 4 different spaces. Installation is simplified thanks to a common refrigerant circuit.

Uniform distribution of air in the room

The Primairy range cassette-type units allow the air flow to be adjusted according to the user's preferences: horizontal or vertical. The air conditioning flow can also be directed for optimal comfort: it can be distributed throughout the room or positioned so it is directed at a particular point.
(Fig. 1)

Cool, ventilated environment

These units have a fresh air input from outside to keep the environment fresh and ventilated. They allow approximately 15 m3/h of fresh air flow.

Clean air thanks to the washable easy-access filter.

The cassette filter is washable for easier cleaning and maintenance, always assuring fresh, clean air.
(Fig. 2)

Straightforward control of the unit

The units have a built-in remote sensor for easy control from the remote control.
(Fig. 3)

Smart temperature setting

Fan speed can be adjusted according to the height of the cassette installation using the wireless control. This function corrects any temperature difference in the room to ensure user comfort.

HRBA31NEGH

Included

IVX Cassette

Quiet and compact, perfect for homes and businesses

Built-in condensate pump

Hitachi cassettes are fitted with a built-in pump to drive the condensate to a downpipe.

Presence sensor

A presence sensor can be fitted in order to optimise energy consumption.
(Fig. 1)

Built-in expansion valve in the indoor unit

Being located inside the indoor unit ensures a more efficient process and more accurate temperature control.

Smart defrost control

The machine remembers previous defrost cycles and so can use intelligent predictions on when to start the cycle to reduce the length of time heating is suspended. It also detects ice buildup and sends hot gas to the OU so as to avoid activating the defrost cycle at all.
(Fig. 1)

Greater flexibility

The installation of 3 and 4 HP units allows up to 70m of pipe run and 30m of height difference.
(Fig. 2)

Easy installation of up to 4 units

Allows independent climate control of up to 4 different spaces. Installation is simplified thanks to a common refrigerant circuit.

Primairy floor-ceiling

The best value for money

Greater durability of the units

Integrated high strength steel and PS design enhances the durability of the drain pan and improves both thermal insulation and condensate removal functions.
(Fig. 1)

Less noise in the room

The plastic fan housing is effective in reducing noise level.

Fresh air inlet

Allows fresh air intake to improve indoor ventilation and air quality.

Flexibility in positioning: allows floor or ceiling installation

The Hitachi Primairy range console can be installed both on the floor and on the ceiling, allowing the user to choose the most optimal room location for maximum comfort.

HRBA31NEGH

Included

Ceiling-mounted IVX

Quiet and compact, perfect for homes and businesses

Improved performance at extreme temperatures

This system can work down to -20 °C in heating, and up to 46 °C in cooling.

Uniform temperature without drafts

The new design of the large automatic louvre achieves a more uniform temperature in the room and reduces cold drafts.

Flexible installation in high ceilings

The system is fitted with additional speed, high 2, now allowing 4 speeds. High speed does not need to be set using the remote control in the case of high ceilings.

Presence sensor

A presence sensor can be fitted in order to optimise energy consumption.
(Fig. 1)

Greater flexibility

The installation of 3 and 4 HP units allows up to 70m of pipe run and 30m of height difference.
(Fig. 2)

Easy installation of up to 4 units

Allows independent climate control of up to 4 different spaces. Installation is simplified thanks to a common refrigerant circuit.
See the VRF section for combinations and connections.

Compatible controls and accessories:

Wired control with timer

PC-ARFP1E

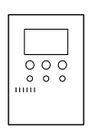
Price: £ 104

Wireless remote control

PC-AWR

(Receiver required)

Price: £ 121



Simplified remote control

PC-ARH

Price: £ 140

Others:

- SOR-NEP presence sensor kit. Compatible with RPC-FSN3: **Price: £ 299**
- Optional functions connector (5 units) PCC- 1A: **Price: £ 18**

Controls

Residential

Wired control

SPX-RCDA

– Wall-mounted.
– 12 h timer.
– "Away-from-home" mode.
– Multifunction: operating modes, temperatures, ventilation, night mode.

Compatibility:
All Ducted RAD units.

Price: £ 50

Wired control

SPX-RCDB

– Wall-mounted.
– 12 h timer.
– "Away-from-home" mode.
– Multifunction: operating modes, temperatures, ventilation, night mode.

Compatibility:
All Wall mounted RAK, Cassette RAI and Console RAF units.

Price: £ 50

Eco Control

SPX-RCKA, SPX-RCKA1, SPX-RCKA2, SPX-RCKA3

– LCD screen.
– Weekly timer.
– Away-from-home mode.
– Eco mode.
– Sleep (7h).
– Multifunction: Weekly timer, range of operating modes, temperature control, ventilation, self-diagnosis and more...

Compatibility:
SPX-RCKA: RAD 50-70PPA, RAD 18-50RPA.
SPX-RCKA1: RAD 18-50QPB, RAD 18-70PPD, RAD 25-60RPE.
SPX-RCKA2: RAK 50-70PPD, RAK 50RPE1, RAK 60RPE.
SPX-RCKA3: RAI 50-60PPD, RAI 25~60RPE.

Price: £ 65

Wired control

SPX-WKT3

– Wall-mounted.
– Weekly timer.
– Away-from-home.
– Multifunction: modes, temperatures, ventilation, night mode.
– Management of up to 13 indoor units.
– With choice of temperature sensor location.

Compatibility: RAK-50~60PPD, RAK 18~35PSB, RAK 18~35PSC, RAI 25~50QPB, RAK 15QPB, RAK 15QPC, RAK 18~50RPB, RAK 35~50RPC, RAK 18~25RPC, RAK 15QPD, RAK 18~50RPD, RAK 18QXB, RAK 25~50RXB, RAK 18QXD, RAK 25~50RXD, RAD 18~50QPB, RAD 50~70PPD, RAI 25~50QPB, RAI 50~60PPD, RAF-25~50RXB.

Price: £ 104

Primairy Range

Primairy range wireless control

HRBA31NEGH

– Wireless.
– Simple timer.

Price: £ 95

Primairy range wired control

HCWA21NEWH

– Wall-mounted.
– Weekly timer.
– Multifunction.
– Blocking function.
– With choice of temperature sensor location.
– Alarm codes.

Price: £ 95

1x1 Commercial Range

Wired control

PC-ARH

– LCD screen.
– Two or more units can be controlled simultaneously. The units must be interconnected with control cables.
– Multifunctions: mode, temperature, ventilation, clock, etc.
– Specific function, "Identification of parallel indoor units".

Compatibility: vRF range - residential range indoor units, System Free indoor units.

Price: £ 140

Wireless remote control

PC-AWR

– Control of 1 to 16 indoor units (master and slave).
– Compact size.
– Simplified functions: ON/OFF, mode, temperature, ventilation.

Compatibility: PC-AWR, VRF range - indoor units range 1x1 VRF IVX systems (Comfort and Premium), System Free indoor units.

Price: £ 121

Wired control with timer

PC-ARFP1E

– Weekly Timer.
– Operating parameters configuration and adjustment.
– Multifunction: Timer for remote ON/OFF options, fault report, automatic routing.
– Control of 1 to 16 indoor units.
– Self-diagnosis, anti-freezing and temperature reduction.
– Built-in environmental sensor.
– Several languages.
– LCD screen.
– Easy to use

Compatibility: Combinations of the VRF IVX Comfort and VRF IVX Premium ranges.

Price: £ 104

Infra-red receiver for ceiling

PC-ALHP1

– Infra-red receiver for remote control.
– Seamless integration in the unit.

Compatibility: PC-AWR control Ceiling-mounted RPC-FSN3.

Price: £ 190

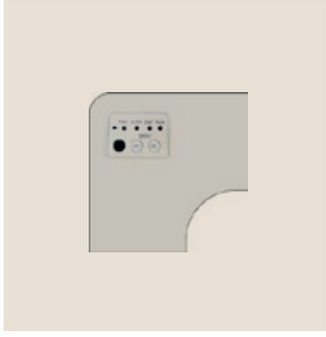
Infra-red receiver for wall

PC-ALHZ1

– Infra-red receiver for remote control.
– Seamless integration in the unit.

Compatibility: PC-AWR control RPI-FSN(3~5)(P)E, RCI-FSN4 RCIM-FSN4E, RCD-FSN3 RPK-FSN(H)3M, RPC-FSN3.

Price: £ 140



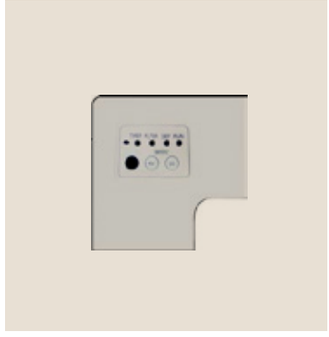
Infra-red receiver for cassette

PC-ALH3

– Infra-red receiver for remote control.
– Seamless integration in the unit.

Compatibility: PC-AWR control RCI-FSN4 Cassette.

Price: £ 219



Infra-red receiver for cassette

PC-ALHC1

– Infra-red receiver for remote control.
– Seamless integration in the unit.

Compatibility: PC-AWR control RCIM-FSN4E cassette.

Price: £ 141

Accessories

Residential

Wi-Fi adapter

SPX-WFG01

– Wi-Fi adapter for Hi-Kumo app.
– Connect the air conditioning using the Hi-Kumo mobile app.

Compatibility: SPX-WFG01, RAK-18 ~ 35PSB, RAK-25 ~ 50RXB, RAK-18QXB, RAK-18 ~ 50RPC, RAK-15QPB, RAF-25 ~ 50RXB, RAI-25 ~ 50QPB, RAD-18 ~ 50QPB.
All R32 Units

Price: £ 89

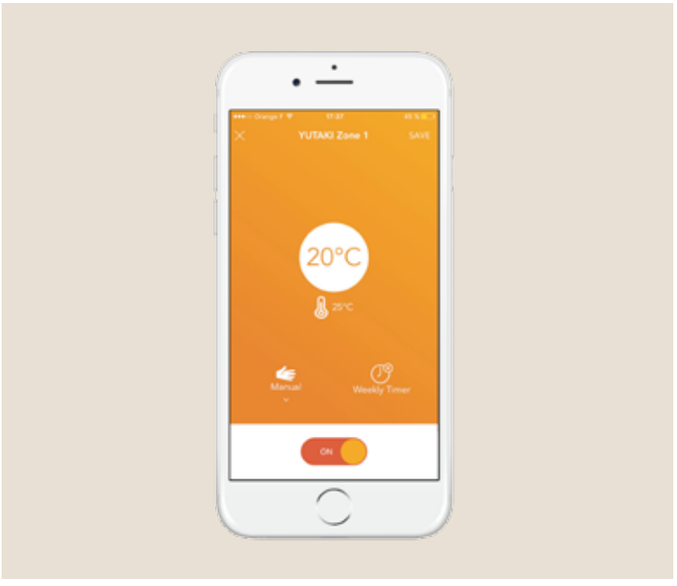
Wi-Fi adapter

SPX-TAG01

– Wi-Fi adapter for Hi-Kumo app.
– Connect the air conditioning using the Hi-Kumo app.
– Requires Hi-Box AHP-SMB-01.

Compatibility: SPX-TAG01, RAK-RPB, RAK-RPC, RAK-PPA, RAK-QXB/RXB, RAK-PSB, RAK-PSC,RAF-RXB, RAF-RPA, RAI-QPB, RAD-RPA/PPA, RAD-QPB, RAI-RPA.

Price: £ 100



How to enjoy Hi-Kumo?

1. The Hi-Box pack, made up of two accessories, can be used to connect the units to a Wi-Fi network.

2. Download the app to your smartphone, tablet or computer.

3. Configure by simply searching for connected units and pairing them with the app.

Price: Free

Hi-box

AHP-SMB-01

– Accessory for SPX-TAG-01 Wi-Fi adapter.
– This ensures compatibility with the Hi-Kumo app to manage the air conditioning installation from any mobile device.

Compatibility: **AHP-SMB-01:** RAK-RPB, RAK-RPC, RAK-PPA, RAK-QXB / RXB, RAK-PSB, RAK-PSC, RAF-RXB, RAF-RPA, RAI-QPB, RAD-RPA / PPA RAD-QPB, RAD-QPB.

Price: £ 55

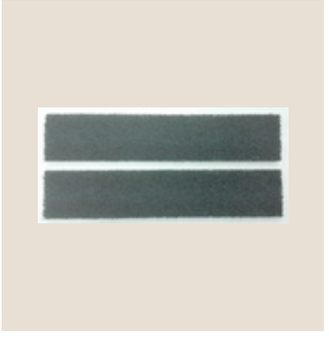
H-Link Box

PSC-6RAD

– Allows the indoor units of the residential range to be connected to an H-Link network.

Compatibility: **PSC-6RAD**
The entire residential range.

Price: £ 125



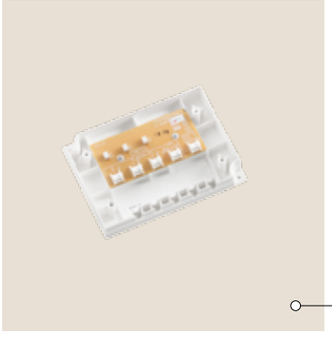
Filter with active carbon base

SPX-CFH25 / SPX-NTW3 / SPX-NTW4

– This filter is mixed with a silver-based antibacterial substance.
– Long-lasting antimicrobial effect.
– Inhibits the growth of bacteria.
– Blocks any kind of smell.
– Can eliminate viruses, thus ensuring hygiene on the surface of products.

Compatibility: **SPX-CFH25** RAK-18~35PSB, RAK-18~35PSC, RAK-15QPB, RAK-18~50RPB, RAK-18~50RPC, RAK-15QPC, RAF-25~50RPA, RAF-25~50RXB, RAK-25~50RXB, RAK-18QXB,
SPX-NTW3: RAK-60PPA, RAK-RPA, RAI-QPB.

Prices: POA



Distributor

SPX-DST1

– Accessory required to connect up to 13 indoor units with the SPX-WKT3 remote control.
– Use the SPX-WDST8M cable if more length is needed

Compatibility: **SPX-DST1** RAI 25~50QPB, RAD 18~50QPB, RAK 18~35PSB, RAK 18~35PSC, RAF 25~50RXB, RAK 15QPB, RAK 18~50RPB, RAK 18~50RPC, RAK 15QPC.

Price: £ 24

1x1 Commercial Range

Remote temperature sensor

THM-R2AE

– Fitted with a diverted sensor, regulating relative to ambient temperature.

Compatibility: Combinations of the VRF IVX Comfort and VRF IVX Premium ranges.

Price: £ 21

Drainage pipe connection kit

DBS 26

– Evacuation drainage 32 mm.
– One kit per module.
– For VRF IVX Premium, it is only used in roof-mounted installations.

Compatibility: DBS26
RAS - 3HVNPE.
RAS - 4 ~ 6H(V)N(P/C)E
RAS 8 ~ 10H(V)N(P/C)E
12HN(P/C).

Price: £ 17

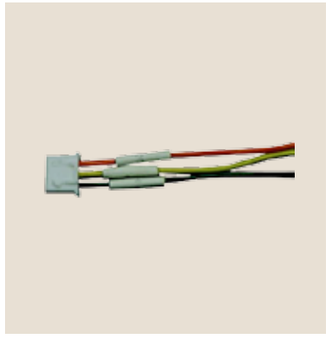
Drainage pipe connection kit for IVX

DBS 12L

– Evacuation drainage 15 mm.

Compatibility: DBS 12L
RAS - 2~2.5 HVNP.
RAS - 3HVNC.

Price: £ 16



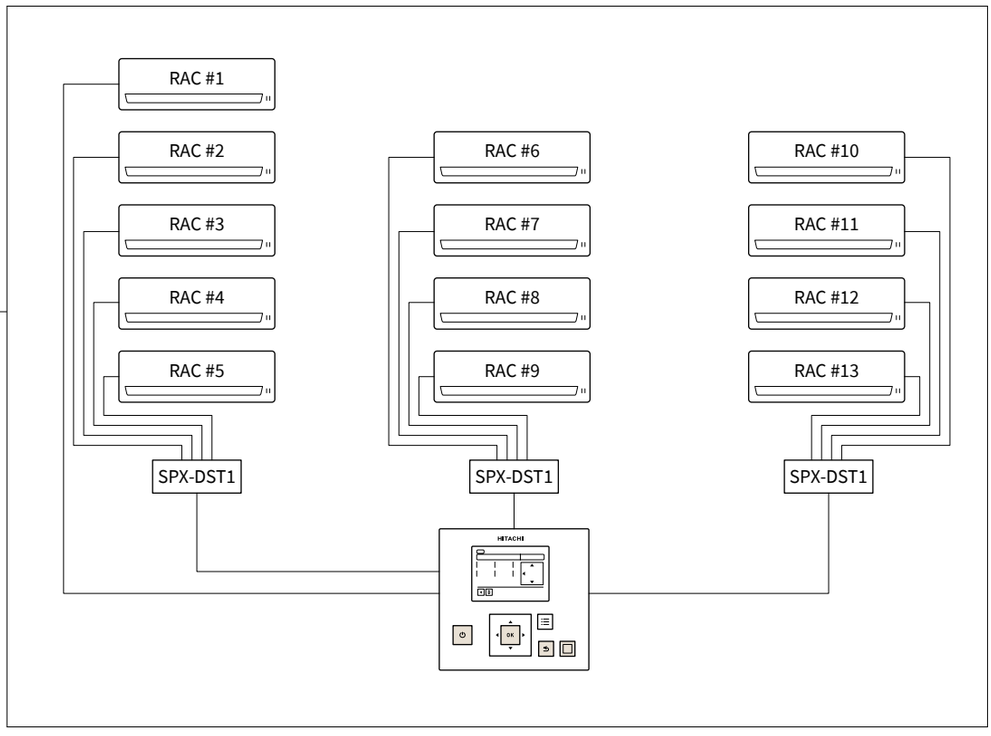
Optional functions connectors

PCC-1A

– Delivered in bags of 5 connector units.
– They allow all available contacts in the outdoor groups and the indoor units and centralised commands to be used (fault report, start/stop, remote).

Compatibility: Combinations of the VRF IVX Comfort and VRF IVX Premium ranges.

Price: £ 18



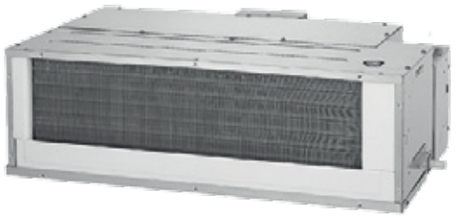
*All 1x1 accessories are compatible with Multizone

Thanks to its flexibility and high capacity, the Multizone range can condition up to 6 different spaces with a single outdoor unit. Its wide range of combinations ensures freedom to adapt to the installation

R32 Multizone

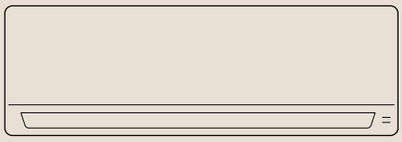
Multizone + ACS

Multizone



Benefits
Multizone

1 Suitably sized systems to fit perfectly in any space

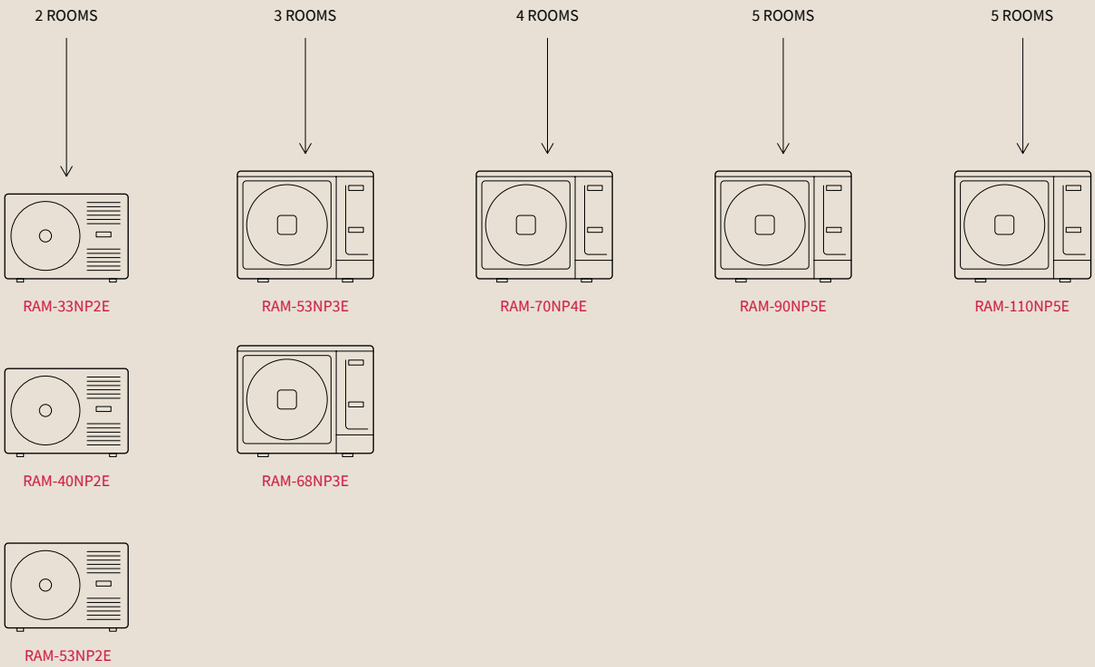


Ideal for small properties, reducing consumption and ensuring the installation is not oversized.

2 Air conditioning system that simplifies installation and maintenance

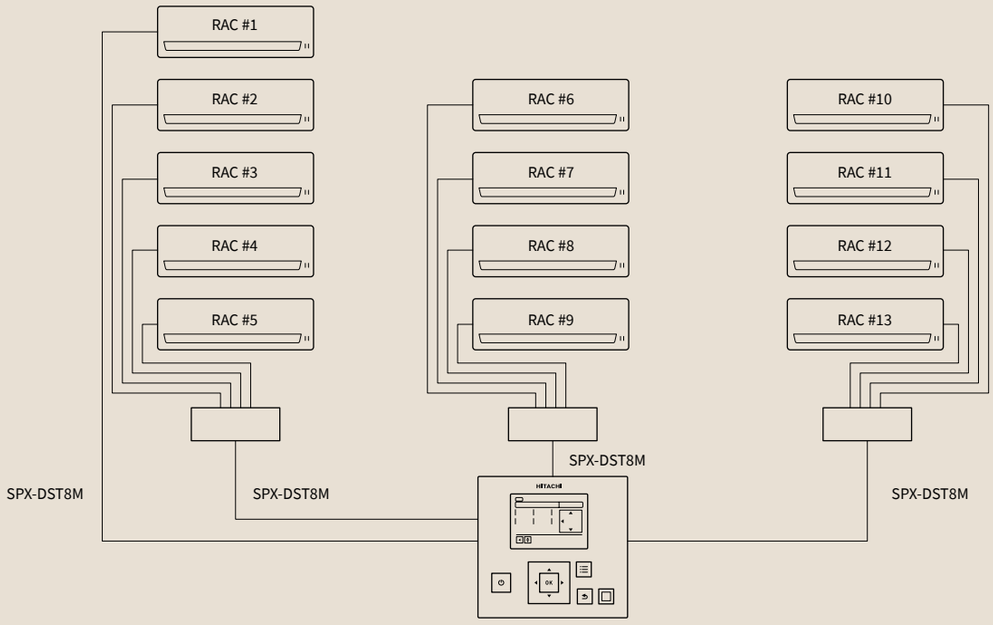
- The duct-type units allow the static pressure to be modified according to the needs of each installation.
- Reduced pipe diameter, bringing installation cost savings thanks to having smaller pipes.
- Refrigerant pre-charged at factory for 2x1 outdoor units, bringing savings in terms of installation time and cost by removing the need to add further refrigerant.
- Alarm code indicator, saving diagnosis time.

3 Extensive range



More than 300 possible combinations with the Multizone indoor units range. 8 outdoor units can be combined with 5 indoor units.

4 Air conditioning solutions that fit perfectly with the characteristics of each installation



– Long pipe distances between the outdoor unit and the indoor unit. The longest on the market.
– Offset value setting from the Eco Control.
– Operation in cold mode up to -10 ºC.

– Centralised control of up to 13 indoor units with the SPX-WTK3 cable control and the SPX-DST1 + SPX-DST8M distributor.

5 Low-power, high-performance systems

When you're considering the ideal solution for business facilities (from small businesses or premises at street level, through to large commercial offices), think of Hitachi VRF systems.

These systems allow connection to up to 64 indoor units, each with their own individual control. There is also a large range of options to match the requirements you define for each installation such as wall mounts, cassettes, ducts and hydro modules as well as a huge range of control options.

KNX

VRF Outdoor units

VRF IVX

– VRF simplified alternative at a competitive price for small commercial applications.
– With independent control for up to four rooms, allowing temperatures to be selected for different spaces and times and with varying fan speeds.
– Ideal for: small- and medium-sized businesses.

VRF IVX Centrifugal

– Perfect for conditioning high street premises thanks to its being hidden away within the building facade (false ceiling).
– Can be used to connect up to 6 indoor units, achieving greater savings and comfort thanks to independent temperature control.
– Ideal for: restaurants, dental clinics, offices, shops, commercial businesses, etc.

VRF Set Free Mini

HI HI T_2 T_1 ST.1 NEW

- The only 3 pipe heat recovery sideflow VRF on the market for horsepowers 8 to 12.
- Can now achieve world leading efficiencies with a much smaller footprint and gas charge.
- Wide choice of indoor units available with Hitachi exclusive 0.4 hp for maximum flexibility.
- Connect up to 39 indoor units
- 30 Pa of pressure available for the ultimate discrete installation.
- Ideal for hotels, small medium and large commercial applications.

VRF Set Free Sigma

HI HI T_2 T_1 ST.1

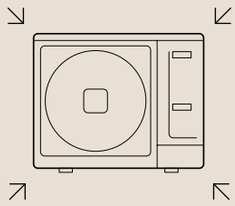
- New VRF Set Free Sigma Standard and High-Efficiency range: the most flexible 2- and 3-pipe VRF on the market. Flexible design with modular combinations up to 268.80 kW (96 HP). With individual modules up to 67.20 kW (24 HP), ensuring space and cost savings when roof space is limited. Extension of cooling operation from 43°C to 48°C in the standard range, and 52°C in the high-efficiency range.
- Ideal for: hotels, restaurants, office buildings, gyms, etc.

Benefits
VRF IVX

1 The smallest mini VRF on the market, in the most extensive range of its category.

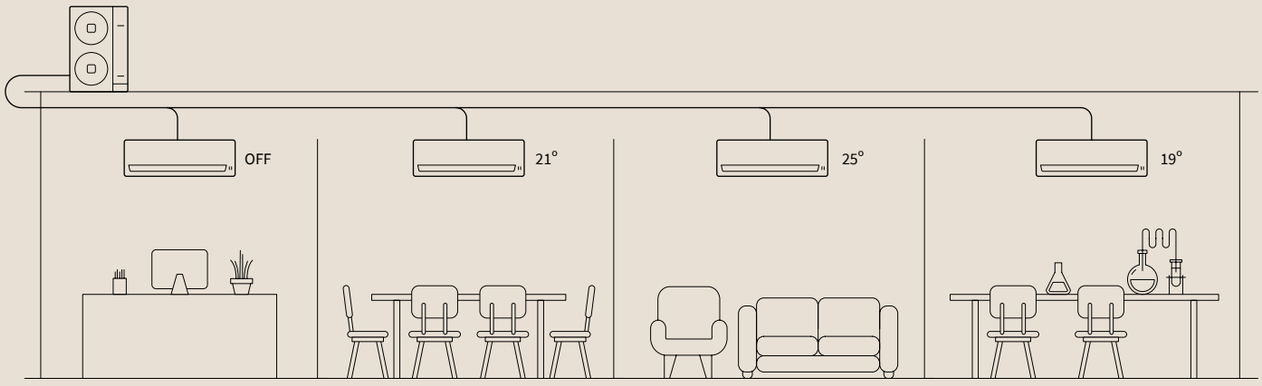
The Premium version of Hitachi's VRF IVX is the smallest VRF on the market. The range starts at just 5 kW cooling capacity, reaching 30 kW in its highest power model. Japanese VRF technology that adapts to the needs of all your projects, regardless of the space available.

2 Compact units, more free space in buildings.



The VRF IVX Comfort range is so compact that it can deliver 14 kW of power (6HP) with a single fan, and takes up just 0.35m^2 of floorspace.

3 Customised businesses with independent temperatures in each zone.



Air-conditioning requirements vary greatly within the same premises, depending, for example, on the activity being carried out in the different rooms, their orientation or the number of windows. Hitachi's VRF IVX range ensures maximum comfort in all zones, since their temperature can be chosen individually.

VRF IVX units are ideal for small- and medium-sized businesses, as up to 8 spaces can be conditioned at different temperatures using a single outdoor unit.

4 Flexibility in the choice of indoor units

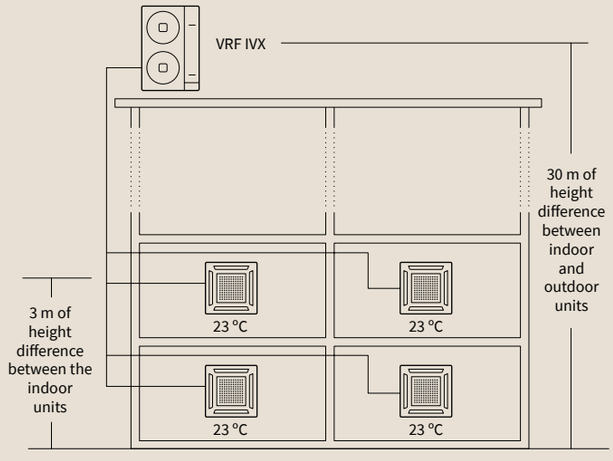
The aesthetic or space requirements differ from room to room within the same premises. The VRF System Free range of indoor units ensures this is not a problem, as all indoor units are compatible with the VRF IVX range, and can be mixed and matched as required (with wall-mounting, duct, cassette, console, ceiling-mounting or DX Kit units).

5 Easy installation of the refrigerant piping

VRF IVX units are easier to install than other "multi" types on the market. The refrigerant piping is in a single line with the same diameter throughout the main section using splitters to connect to the different indoor units, each with their own pipe sizes.

This reduces the amount of refrigerant piping, reducing installation costs and saving your valuable time.

6 Wide range of cooling distances



Example of a building conditioned with VRF IVX

The VRF IVX units have a total pipe run of up to 100 m, and a height difference of 30 m between the indoor and outdoor units. This makes it much easier to place the outdoor unit in a suitable location (e.g. on the roof of the building) without interfering with the aesthetics of the premises.

It is also possible to install indoor units on different floors connected to the same cooling line. Commercial premises with up to 2 floors can therefore be conditioned with a single outdoor unit.

7 Smart defrost control. More comfort in winter with improved energy efficiency

The VRF IVX range has two interesting functions to reduce the number of defrosts and ensure high performance during extreme temperatures in winter.

The system carries out "smart defrosting" by adjusting defrosting time in accordance with the time required in the previous cycle, thus extending heating operation and avoiding any problems in terms of comfort indoors.

It also counts on hot gas injection in the coil as standard, preventing ice from forming in the coil and, in consequence, removing the need to defrost.

VRF IVX

Competitively priced VRF technology for small commercial applications

Independent control

Independent operation of up to 4 indoor units. A different type of indoor unit, each with its own control and temperature, can be installed in each room. Furthermore, it is also possible to use the same control for several indoor units working independently of each other.
(Fig. 1)

Wide range of lengths

Up to 100m of refrigerant pipe run and 30m of height difference. 3m of height difference between indoor units.
(Fig. 2)

Improved performance

Operation at extreme temperatures. The best performance even at extreme temperatures, -20°C in heating and 46°C in cooling.

Compact unit

Up to 14 kW (6 HP) with a single fan; 0.35 m² of floorspace.

Flexibility

Compatible with the entire range of System Free indoor units. H-link communication protocol which can be managed via all control systems; individual and/or centralised.

Easy to install

Installation is made simple thanks to a single piping line common for all 4 indoor units.

VRF IVX Centrifugal

Hidden air conditioning for high street premises

Complying with regulations

The Hitachi VRF IVX Centrifugal system meets all air discharge regulations for air conditioning, as the air flow does not exceed 3,600 m² (depending on model).

Guaranteed comfort and savings

It conditions up to 6 different zones and ensures greater comfort and savings thanks to independent control of each indoor unit.

Designed for every need

The air input and output grilles are interchangeable, increasing the options for installation anywhere in the premises.

Greater flexibility

This system allows a connection ratio between 75% and 120%. IVX VRF Centrifugal has Eurovent-certified EER and COP, and also complies with the ErP Lot 21 Ecodesign Directive, offering high seasonal energy efficiency values certified by EUROVENT: SEER/SCOP.

Lower bills and ultraquiet operation

It is fitted with the Premium Inverter Compressor for smart defrosting and a fan regulated by a variable speed drive. Thanks to this, it: significantly reduces energy consumption, extends the working life of motors operating at reduced speed, and, above all, achieves an unrivalled noise level without any vibration.

Adjustable

The IVX VRF Centrifugal's variable speed drive adjusts speed in line with requirements and keeps motor consumption to a minimum.

Control systems

Compatible with any Hitachi control systems, BMS systems and Modbus protocols, KNX.

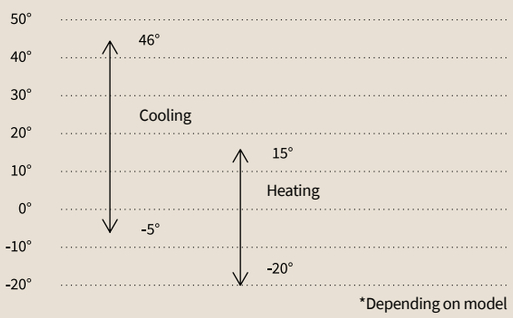
Benefits
VRF Mini

1 Extended temperature range

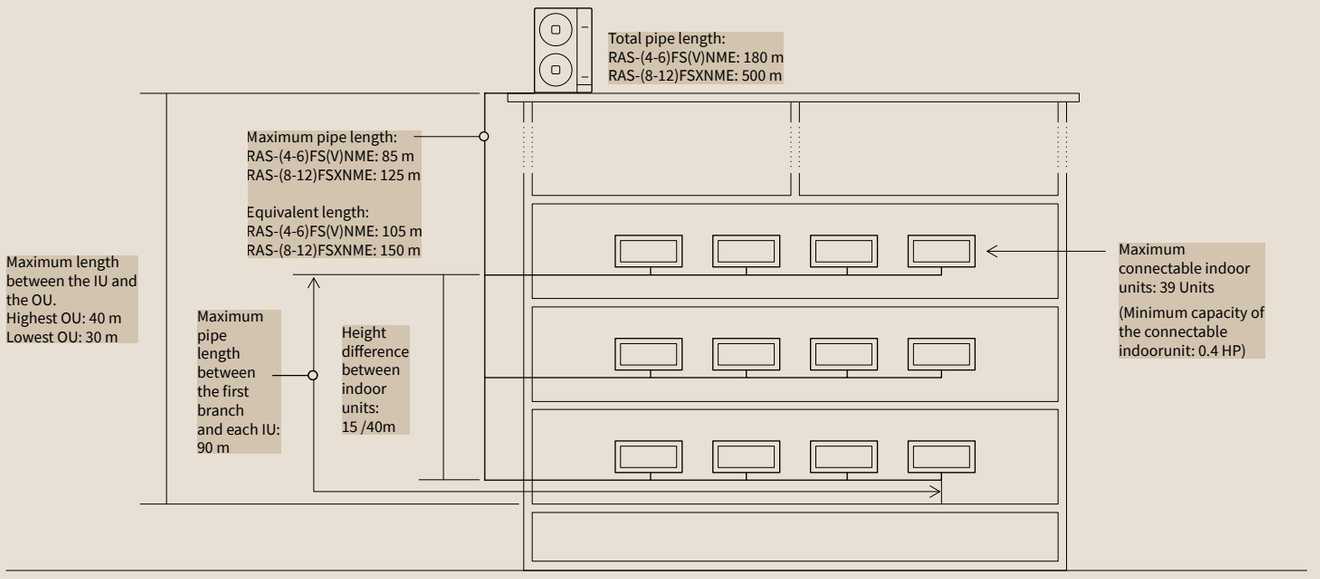


– Can work with a broad operating range.
– From -5°C to 46°C in cooling and from -20°C to 15° in heating.

2 Conditions up to 39 rooms at different temperatures

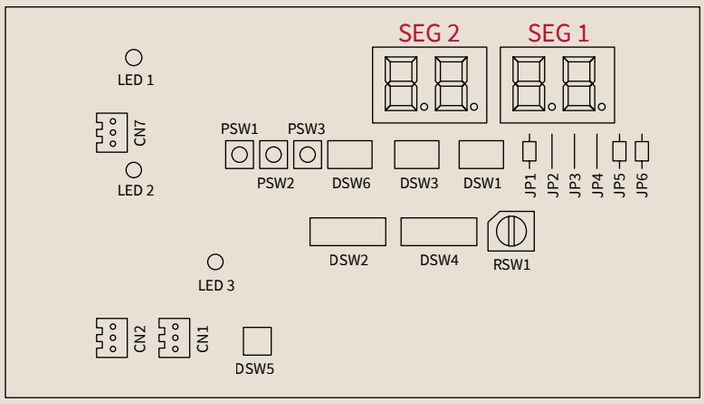
Independently conditions and maintains the temperature in up to 39 zones, each with its own individual control. This means climate control can be adapted to the specific needs of your premises or home.

3 Flexibility and ease of installation due to longer pipe lengths



Maximum total length of the pipes: 500 m
Combined capacity ratio: 50-130%

4 Fast, accurate diagnosis

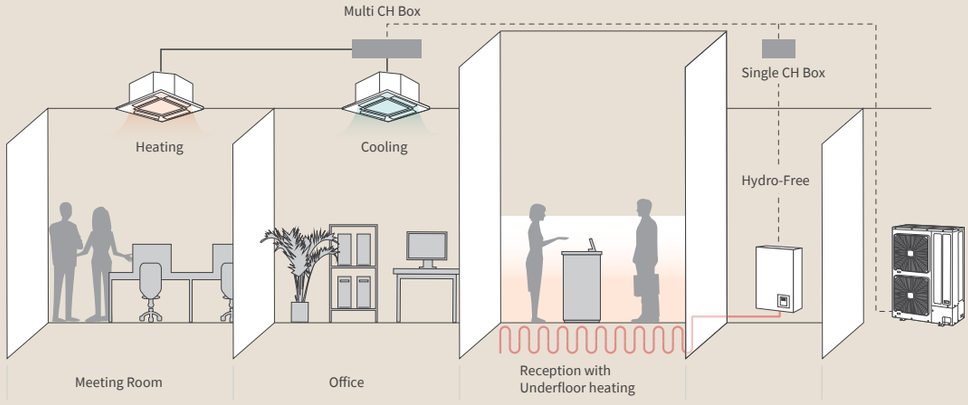


The outdoor unit's PCB board is fitted with a 7-segment display showing different parameters sequentially, e.g. outdoor air temperature, condensation temperature, discharge pressure, etc. This allows fast, accurate diagnosis of the installation and makes maintenance easier.

*In accordance with model.

5 Energy Efficiency optimised

Class 8 to 12 HP heat recovery systems work by transferring excess heating or cooling energy from areas it's being wasted to areas that it's required. This enables one system to have simultaneous, separate heating and cooling zones depending on the needs and comfort of the occupants.



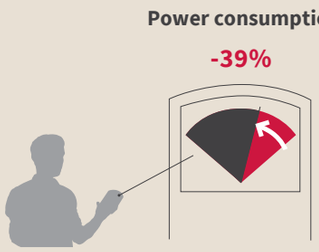
6 Smooth Drive Control for an optimised refrigerant circuit

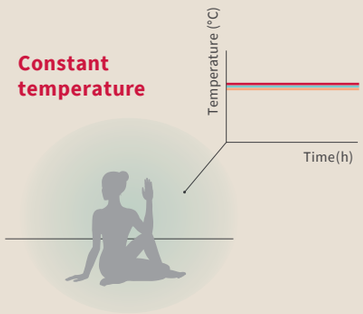
The newly developed VRF technology Smooth Drive Control is available exclusively from Hitachi and sets new standards in terms of performance and efficiency. What does that mean for you?

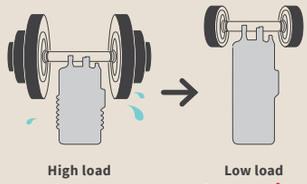
Efficiency
Electricity consumption is reduced by 39%.

Comfort
A constant room temperature is kept due to minute adjustments to the compressor frequency as the loads change.

Reliability
Less load on the compressor as the unit no longer switches on and off at low loads. The system can run just one 0.4 HP indoor unit.







VRF Set Free Mini

Compact air conditioning for all types of installations without having to install the outdoor unit on the roof

Improved air flow with minimum noise

Its new aerodynamic design makes it the quietest on the market, with a noise reduction of up to 4 dB(A). The combination of a 3-blade propeller and fine-tuned fan reduces the noise level and increases reliability.

Moreover, with its Side-Flow Technology, the fan speed achieves uniform air distribution, resulting in considerable energy savings.
(Fig. 1)

High-efficiency Scroll compressor

The Scroll DC Inverter compressor has been designed by Hitachi to increase efficiency and reliability while reducing energy consumption. More efficiency at partial loads and low speeds. Greater energy savings and 50% weight reduction thanks to a compact design with high performance in intermediate seasons.

Straightforward installation

Greater simplicity and flexibility through distributors without the need for manifolds, achieving significant savings in installation costs.

Easily transportable

The new design of the outdoor units, which are 30% more compact, means they can be easily transported in a lift, without the need to hire a crane. This lightweight design with reduced size ensures convenience in delivery and installation, along with significant savings.

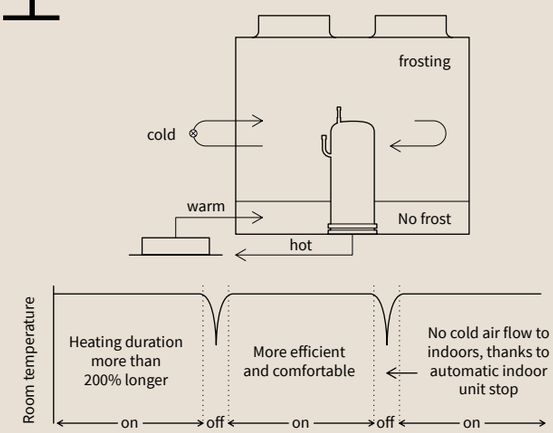
Benefits
Set Free Sigma

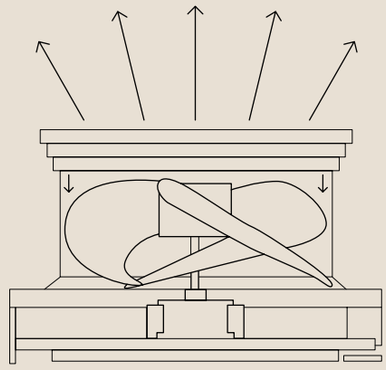
1 Guaranteed heating performance



Thanks to Set Free Sigma technology, the temperature drop during a defrost cycle is restricted to an imperceptible 0.1ºC.

This is achieved with a new and improved sensor, which intelligently manages when the units go into defrost, a hot gas bypass through the bottom half of the heat exchanger which prevents ice from forming, alternating defrost in groups of outdoors and the indoor units automatically stopping the fans to protect user comfort.

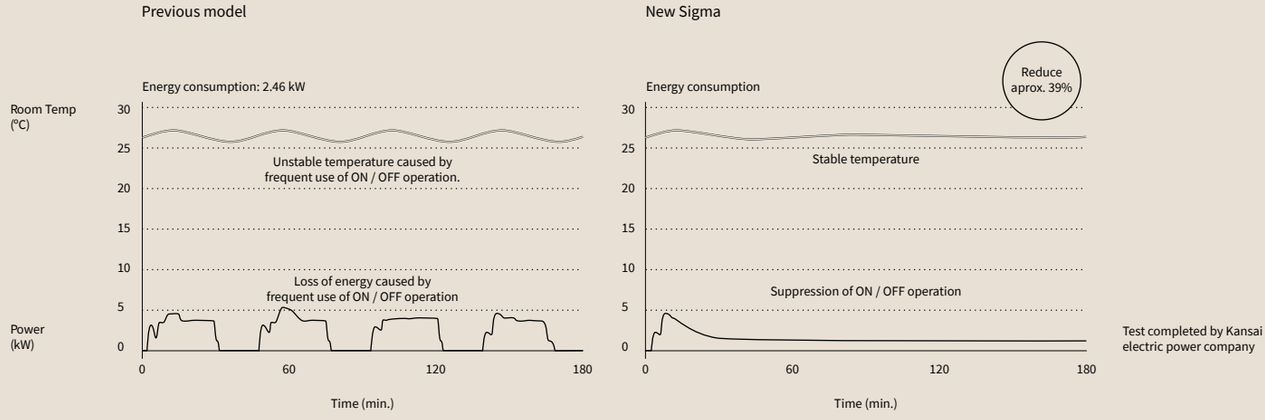
2 Leading performance



Set Free Sigma complies with the efficiency requirements of the ErP Directive, and more specifically with Lot 21 for VRF units.

The improvements in this range, namely the Sigma heat exchanger, fans, control and compressor, mean SEER values of up to 8.33 and SCOP of up to 5.06 can be achieved.

3 Smooth drive control



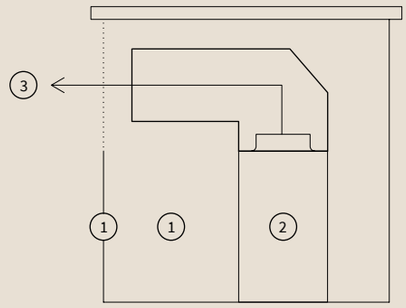
One of the features of VRF technology is that it can use the inverter compressor to adjust cooling system capacity, making it a precise, efficient technology. Smooth drive goes further and revolutionises inverter compressor operation by adjusting its capacity in steps of 0.1Hz.

This further increases energy efficiency and temperature accuracy, thereby improving energy savings and comfort.

The estimated energy saving for the tested case is 39%, as can be seen in the previous figure.

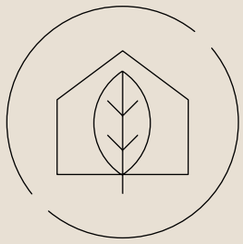
4 Flexibility in installation

1. Wall-mounted
2. Outdoor unit
3. Duct



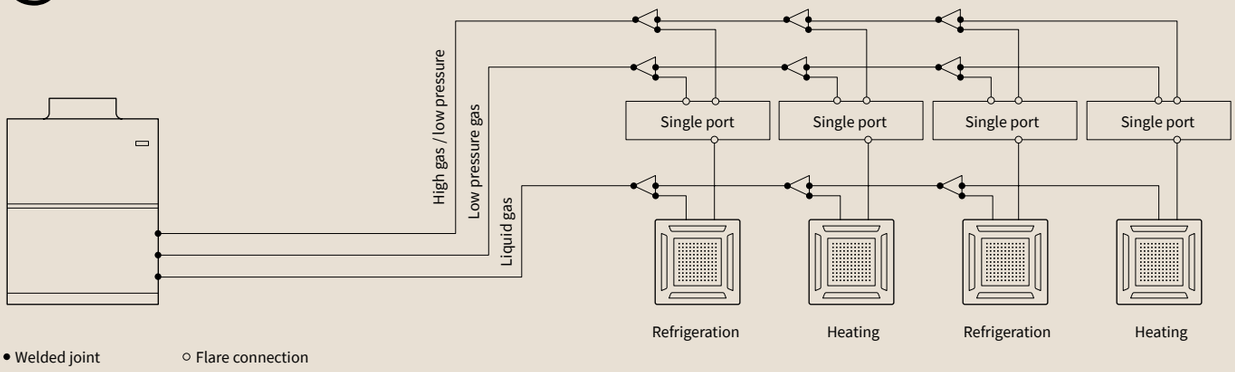
The system can be installed outdoors, which ensures good ventilation, or indoors inside a specific room. Thanks to the static pressure of its fans, which can be adjusted in steps of 0, 30, 60 or 80 Pa, the system can be installed indoors with an air output system.

5 Prepared for Passivhaus

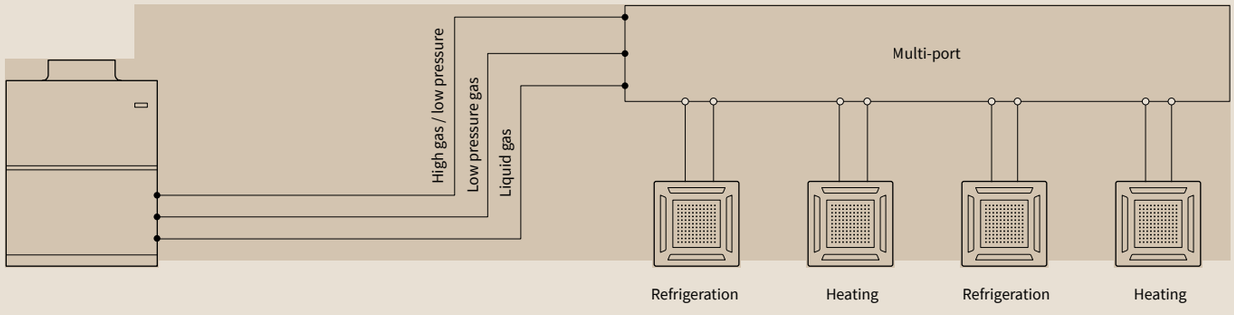


The improvement in the quality of new buildings means they have lower energy needs. 0.4 HP System Free units (1,100W) are ideal for these applications with lower gas charges and reduced energy consumption.

6 Adapted to the needs of each project



• Welded joint ○ Flare connection



• Welded joint ○ Flare connection

Extensive range of heat recovery boxes, from single-output boxes to multiple boxes with up to 16 outputs. The most compact and lightest on the market.

Our systems are easy to install thanks to:
– Simplified cooling connections: fewer connections to be welded.
– No need for connection to a drainage network.
– Reduced installation time and cost.

*Available in the fourth quarter of 2018.

VRF Set Free Sigma Standard

The most flexible heat recovery range

It offers the widest range of recovery boxes, from single-output boxes to multiple boxes with up to 16 outputs. It is the most compact and lightest on the market.

Installation is also much more straightforward and economical, since the insulation used removes the need to install a condensate tray, the liquid line goes directly to the indoor unit without passing through the box, thus meaning fewer connections.

Leader in energy efficiency

The heat exchange surface has been enlarged thanks to the new "Sigma" shaped condenser battery, which, combined with the improvement in the compressor at low partial charges and also the new fan, makes it the most efficient VRF on the market.

Extensive range available for 2 and 3 pipes

Up to 268 kW (96 HP) in combination with several modules.

Individual modules up to 67 kW (24 HP) ensure space and cost savings when roof space is limited.

Extensive operating ranges

Extended operating range in cooling mode, up to 48°C in summer and -10°C in winter.

VRF Set Free Sigma High-Efficiency

The VRF that can be installed in the tallest buildings.

The new Set Free Sigma allows greater height differences between the outdoor and indoor units of up to 110 m.

Extensive range available for 2 and 3 pipes

The only 14 kW and 16 kW (5 and 6 HP) outdoor units on the market, with very high-efficiency.

No operating limits

Extended operating range in cooling, up to +52°C in the High-Efficiency range.

Maximum comfort

Maintains a comfortable temperature during absence from the room, guaranteeing energy savings without any loss of comfort.

The most extensive range on the market

– From the smallest single module on the market, just 5 HP, to the largest 72 HP combination.

– Moreover, the whole range has common heat pump and heat recovery, exclusive to Hitachi.

Outdoor units (individual module)

VRF Indoor units

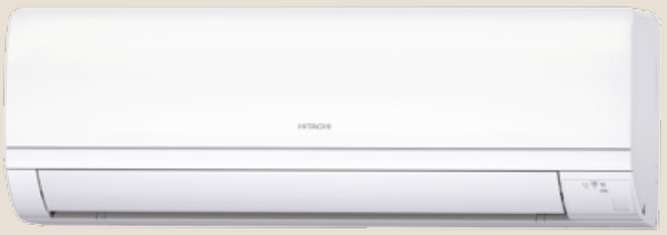
Cassette

- Compact dimensions (RCIM model): 285x570 mm.
- Energy saving with presence sensor.
- Greater comfort thanks to the design of the slats with independent control.
- High-performance exchanger.
- Drainage pump with direct current motor.

Ducts

- Easy installation in low false ceilings with low silhouette ducts: 197 mm.
- Condensate pump: allows installation up to 850 mm above the unit.
- Lower air return in the mini and medium pressure ducts.
- Separate air filter in three parts for easy maintenance on both sides with high pressure ducts.

Wall-mounted



- Prevents noise thanks to its expansion valve outside the room (optional).
- 4 air flow speeds.
- Centralised control without the need for wired thermostats.

Console

- Compact design: just 220 mm deep, occupying minimum floorspace.
- Optional remote control that can be integrated in the unit enclosure under the casing cover.

Ceiling-mounted

- Improved air distribution throughout the room thanks to the optimised louvre.
- 4 air flow speeds.
- Energy savings.

DX-Kit

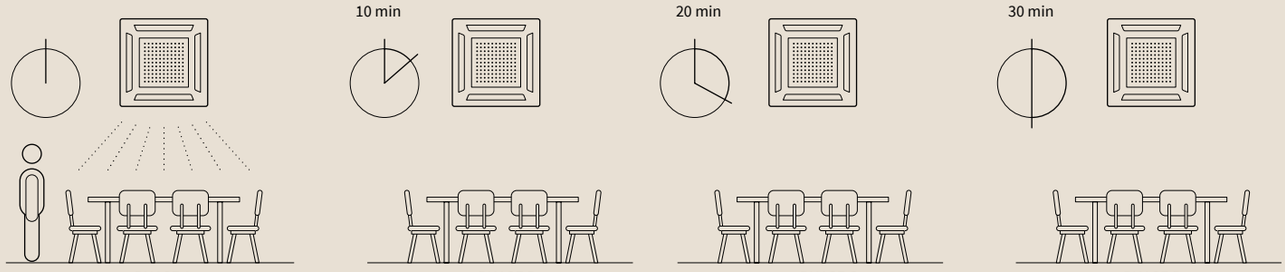
- Simplifies the installation of third party AHUs and Air Curtains without the need to install hydraulic systems.
- Option to regulate capacity in accordance with Inlet Air Temperature, Outlet Air Temperature, Incremental reference duty control and Absolute reference control depending on application.

Hydro Free

- Ideal for installations that need hot water production, pool heating, fan coils, AHUs or underfloor heating.
- Operation in heat pump and heat recovery.
- Easy installation and maintenance, plug & play. All components are built-in.
- High temperature and low temperature models available

Benefits
VRF Indoor units

1 Energy saving with presence sensor



PHASE A
Activity

The cassette will work with the setpoint temperature and the chosen fan speed.

PHASE B
10 minutes unoccupied

—Set temperature drops by 1ºC
—Fan speed drops by 1 level (low is minimum speed)

PHASE C
20 minutes unoccupied

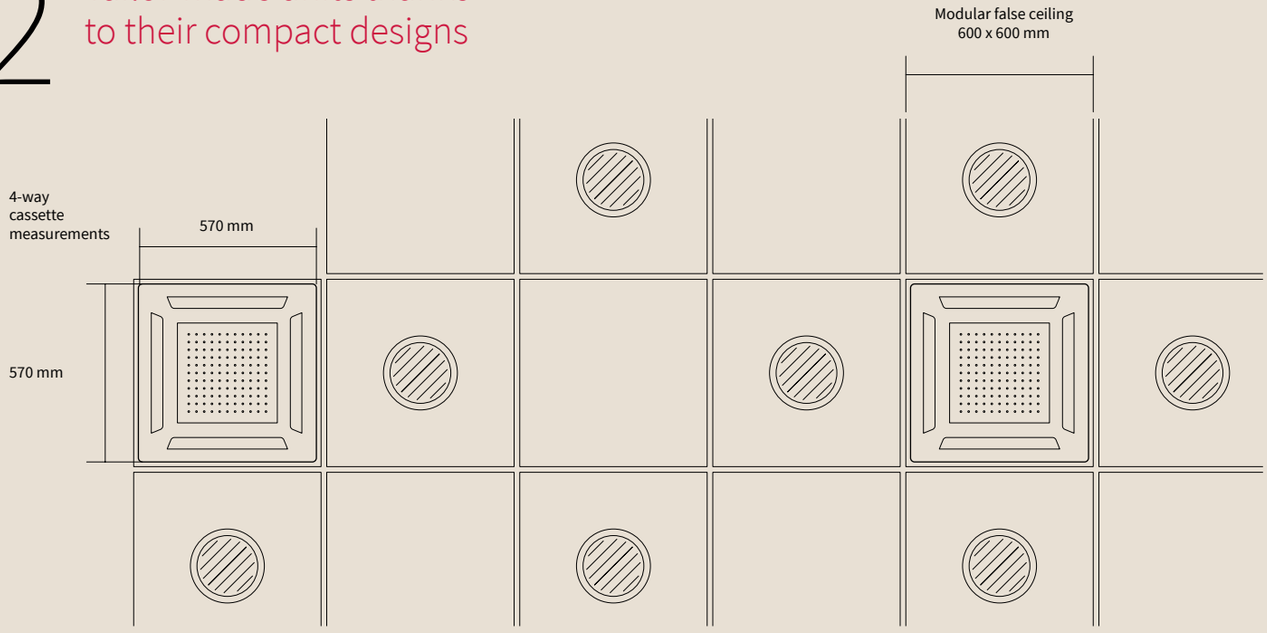
—Set temperature drops by 2ºC
—Fan speed drops by 2 levels (low is minimum speed)

PHASE D
30 minutes unoccupied
3 OPTIONS:

—1. ON MODE. Maintains operation of PHASE C
—2. STAND-BY MODE. The I.U. switches to Thermo-off, returning to normal operation when presence is detected
—3. OFF MODE. The I.U. goes off and it is turned on manually (ask Hitachi for further details)

In VRF indoor units, such as cassettes, ceiling-mounted and ducts, the presence sensor allows the unit to be adapted in accordance with room occupancy. If the unit is installed in a room where people are constantly coming and going, it regulates operation automatically as if there were nobody present, without the need to turn the indoor unit off by hand. This reduces unnecessary consumption and generates significant energy savings.

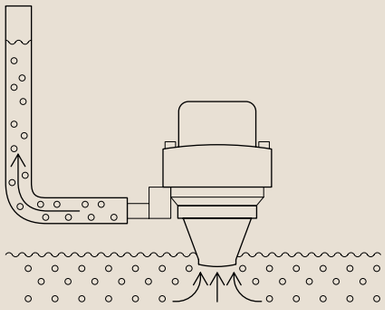
2 Tailor-made units thanks to their compact designs



The RCIM- FSN4E, a 4-way cassette, has the perfect dimensions: 285 mm high by 570 mm wide, for installation in standard modular false ceiling openings measuring 600x600 mm. This makes it the ideal system for installation in confined spaces, adapting to these requirements without having to remove any light fittings. Moreover, the console-type units are only 220 mm deep and can be installed on a wall, taking up minimal floorspace.

3 More economical thanks to the built-in condensate pump

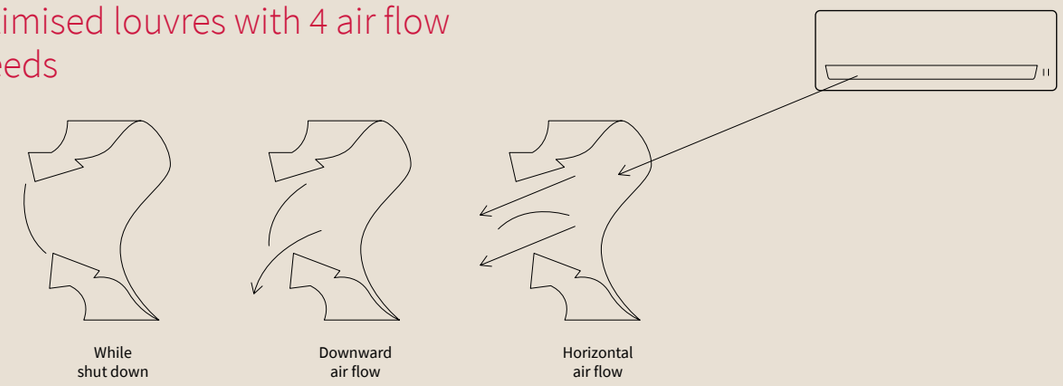
The duct units have a built-in condensate pump, allowing them to be installed up to 850 mm above the unit. The pump is enabled automatically when the accumulated water level is excessive.



4 Low noise level with the expansion valve

In wall-mounted indoor units, the expansion valve can be installed outside the room to avoid any noise indoors.

5 Maximum comfort thanks to the optimised louvres with 4 air flow speeds



The ceiling-mounted units have louvres shaped to distribute the air around the room, ensuring maximum comfort throughout the air conditioned zone. This ensures a uniform thermal sensation for all people in the room, whether they are next to the indoor unit or far away. Moreover, "High H" speed covers the entire room, even in high ceilings, removing the need to adjust speed with the remote control.

Cassettes

Smallest capacity on the market

The RCIM indoor unit has the lowest capacity on the market, with just 1.1 kW in cooling operation.

This makes it ideal for buildings with low energy demand, such as Passivhaus buildings.

New air flow

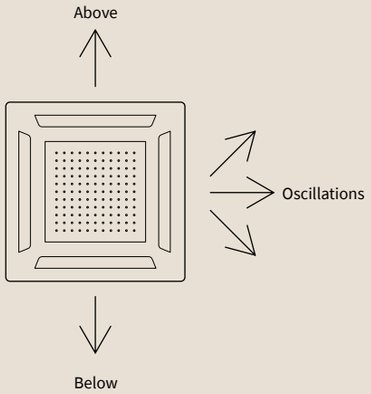
Perfect for rooms with high ceilings, thanks to a new upper air flow.

Easy installation in standard modular false ceiling openings measuring 600x600 mm

The RCIM is perfectly sized for installation in confined spaces: just 285 mm high and 570 mm wide. It can therefore adapt to the 600x600 mm standard European panel without interfering with the other panels or installations.

Fig. 1

Adjusting the individual control of each louvre



Individual air off temperature control

Each fan coil can have its own tailored air off comfort setting easily changeable by local control for maximum comfort.

More comfort thanks to independent louvre control

All cassette units have had the louvres designed to prevent air turbulence and reduce load loss.

This renewed design enhances the COANDA effect, avoiding cold air flows and improving comfort.

(Fig. 1)

Energy savings of up to 14 % thanks to the presence sensor

The built-in presence detector adapts consumption to occupancy in the room where it is installed, keeping the environment comfortable and generating important energy savings.

With condensate pump

The RPIM (0.6-1.5) FSN4E-DU systems have a built-in condensate pump, with a drain pump to raise condensate up to 850 mm above the unit. The pump is enabled automatically when the accumulated water level is excessive.

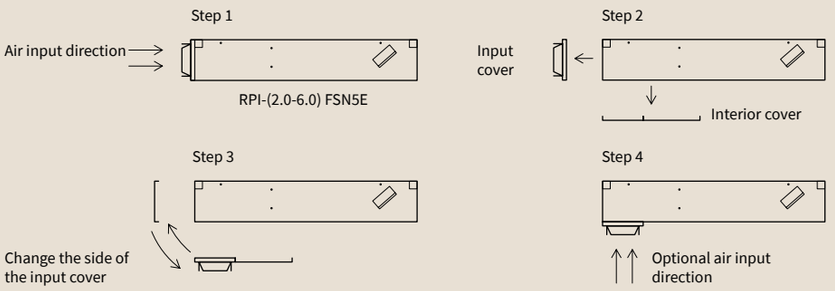
Individual air off temperature control

Each fan coil can have its own tailored air off comfort setting easily changeable by local control for maximum comfort.

Easy installation and maintenance

Access in the duct units is quick and easy:
- The electronic board is accessed from outside the unit.
- The filter does not have to be removed, and there is no need for additional access hatches. (Fig. 1)
- The cooling and drainage connections are located at the rear.

Fig. 1a



Air input direction can be changed in the RPI-(2.0-6.0) FSN5E system by altering the position of the interior cover as shown in the image.

Air input direction can be changed in the RPI-(0.4-1.5) FSN5E systems by adding an optional accessory specially designed for this purpose.

SMILE

Wall-mounted

Centralised control

Units can be group controlled with a mixture of wired and wireless controllers.
(Fig. 1)

Quieter units

In wall-mounted indoor units, the expansion valve can be installed outside to avoid any noise indoors.

4 air flow speeds

The "HIGH", "MEDIUM" and "LOW" air flow volumes have been supplemented with "HIGH H" in order to cover the whole room, even with very high ceilings.

Easy installation and maintenance

In wall-mounted units, there is no need to remove the front panel in order to handle the wiring and adjust the DIP switches.

Consoles

Compact design

The RPF(I) units are only 220 mm deep by 620 mm high and can be installed along the wall, taking up minimum floorspace. Moreover, it can be installed in confined spaces inside buildings.

Remote control

These units have an optional remote control which can be integrated under the enclosure's plastic cover.
(Fig. 1)

Adjustable direction

In RPFI units the air output direction can be adjusted in line with requirements.

Ceiling-mounted

Energy savings

Energy savings of 14% thanks to the presence sensor. The presence sensor in model RPC (1.5-6) FSN3 adjusts operation in accordance with occupancy in the room.

Versatile installation

A second valve has been added to make it easier to install the drainage system, and to increase installation and positioning options.

Convenience

The new drain kit (optional) allows the drain to be installed 600 mm above the top of the indoor unit. (Fig. 1)

High G Speed

Function that can launch the air even further and condition the whole room.

DX-Kit

Compatibility

The DX-KIT interface is the device that connects the direct expansion heat exchangers of the ATUs, air curtains and high-flow duct units to Hitachi outdoor units, in order to work in heating and cooling mode.

Regulation

With the option to regulate capacity according to the heat exchangers input and/or output temperature or using an external analogue signal, in accordance with cooling/heating requirements.

Total integration

Its integration means air curtains with direct expansion heat exchangers can also work in cooling, unlike conventional curtains that only operate in heating mode.

Precise temperature

The combination of DX-KIT with RAS-XH(V)NP(E) guarantees the highest levels of precision on the market in terms of maintaining the target temperature (air flow or room temperature).

All elements included

This kit includes: expansion valve, temperature sensors and electronic regulation devices. Compatible with the Commercial range and VRF Set Free Systems.

Hydro Free

All applications in one system: heating, cooling, hot water and swimming pool

Built-in components

The hydraulic components are all built-in (pump, expansion valve, air purge valve, safety valve, filter, pressure gauge). It is also fitted with a valve with filter for protection and to allow cleaning, removing the need to empty the water from the hydraulic circuit in order to clean the filter. Similarly, there is no need for shut-off valves.

Smart cascade cycle

Thanks to the smart cascade cycle, the high temperature Hydro Free can generate hot water up to 80°C without the need for a heating element. It is fitted with a second R134 compressor which can raise water temperature up to 80°C.
Furthermore, the smart cascade cycle oversees operation of this second compressor so it only works when required due to temperature demand, meaning the Hydro Free can work at two temperatures: 45 or 80°C according to needs, thus maximising energy efficiency.
(Fig. 1)

High flexibility

High and low temperature modules that can be connected to the VRF range (2/3 pipes).

Energy savings

With Hitachi's Hydro Free, hot water will be freely generated in applications requiring cooling only installations such as hotels, restaurants and server rooms.

Wired control for Hydro Free

PC-ARFWE

Price: £ 104

Controls

Simplified wired remote control

PC-ARH

– Control of 1 to 16 indoor units (in master and slave).
– Compact size.
– Simplified functions: ON/OFF, mode, temperature, ventilation.
– Preferred function with centralised control or CS-NET Web.

Compatibility: PC-ARH, VRF range - residential range indoor units, System Free indoor units.

Price: £ 140

Remote control for Hydro Free module

PC-ARFWE

– Multifunction control, with optimised software to set up the Hydraulic Module.
– LCD screen.
– User-friendly.

Compatibility: RWLT-3.0VN1E, RWLT-5.0VN1E, RWLT-10.0VN1E, RWHT-5.0VNF1E.

Price: £ 104

Wired control with programmer

PC-ARFP1E

– Weekly programming.
– Operating parameters set-up and adjustment.
– Multifunction: Programming for remote ON/OFF options, fault report, automatic routing.
– Control of 1 to 16 indoor units (in master and slave).
– Self-diagnosis, anti-freezing and temperature reduction.
– Built-in environmental sensor.
– Several languages.
– Bespoke air off temperature control per fan coil.
– Power consumption estimation.
– LCD screen.
– User-friendly.

Compatibility: PC-ARFP1E. VRF range System Free indoor units.

Price: £ 104

Wired control with timer

PC- AWR

– Control of 1 to 16 indoor units (in master and slave).
– LCD screen.
– Two or more units can be controlled simultaneously. The units must be interconnected with control cables.
– Works with an infra-red receiver (not included). Check the model suitable for the indoor unit below.
– Multifunctions: mode, temperature, ventilation, clock, etc.

Compatibility: PC-AWR, VRF Range System Free indoor units.

Price: £ 121

Receivers

Receiver to combine with wireless remote control in the panel:
PC- ALH3
– Compatibility: RCI- FSN4.
– Compatible wireless remote control: PC- AWR.
Price: £ 219

Receiver to combine with wireless remote control:
PC- ALHC1
– Compatibility: RCIM- FSN4E.
– Compatible wireless remote control: PC- AWR.
Price: £ 141

Receiver to combine with wireless remote control:
PC- ALHD1
– Compatibility: RCD- FSN3.
– Compatible wireless remote control: PC- AWR.
Price: £ 140

Receiver to combine with wireless remote control:
PC- ALHP1
– Infra-red receiver for wireless remote control.
– Compatibility: RPC- FSN3.
– Compatible wireless remote control: PC- AWR.
Price: £ 190

Receiver to combine with wireless remote control on the wall:
PC- ALHZ1
– Infra-red receiver for wireless remote control.
– Compatibility: RPI- FSN3-5, RPIM- FSN4E, RPF(I)- FSN2E, RCI-FSN4, RCIM-FSN4E, RCD-FSN3, RPC- FSN3(E).
– Compatible wireless remote control: PC- AWR.
Price: £ 140

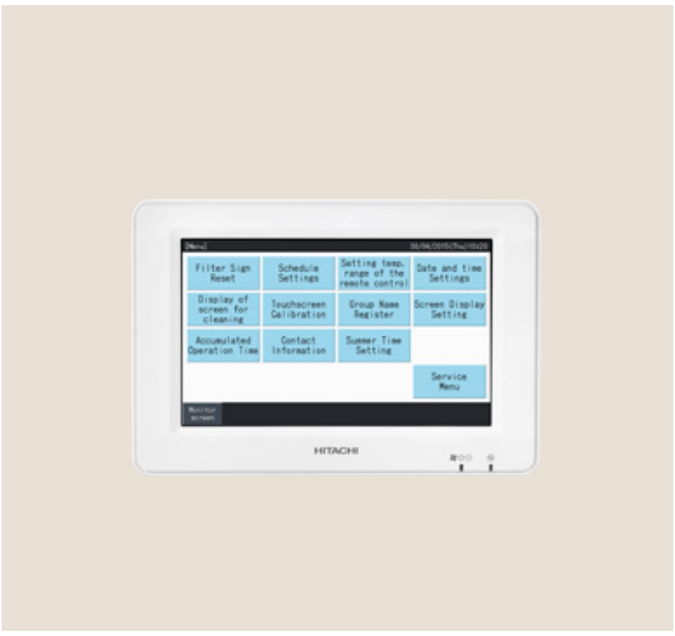
Touchscreen. Centralised system

PSC-A32MN

– Colour touchscreen.
– Monitor operating conditions by blocks/groups.
– Up to 32 groups can be controlled, with up to 16 indoor units per group and a maximum of 160 indoor units per H-link system.
– Up to 8 PSC-A32MN units to a single H-link.
– Main functions: on/off, change operating mode, fan speed control, louvre control, etc.
– Optional functions: restrict operating temperature range, operation schedules, system operation time, etc.

Compatibility: System Free indoor units range, commercial range (VRF IVX), VRF Set Free range.

Price: £ 1,444



Touchscreen. Centralised system

PSC-A64GT

– Colour touchscreen.
– Monitor operating conditions by blocks/groups.
– Up to 64 groups can be controlled, with up to 16 indoor units per group and a maximum of 160 indoor units per H-link system. Up to 8 PSC-A64GT units to a single H-link.
– Main functions: on/off, change operating mode, fan speed control, louvre control, etc.
– Optional functions: restrict operating temperature range, operation schedules, system operation time, etc.

Compatibility: System Free indoor units range, commercial range (VRF IVX), VRF Set Free range.

Price: £ 2,323

Presence sensor

SOR- MSK (Compatibility RPI- 0.4-0.3 FSN5E), PS- MSK2 (Compatibility RCI-FSN4), SOR- NEP (Compatibility RPC- FSN3), SOR- NEC (Compatibility RCIM- FSN4E), SOR- NED (Compatibility RCD- FSN3)

SOR- NED (RCD-FSN3): **Price: £ 252**
SOR- NEC (RCIM-FSN4E) **Price: £ 248**
SOR-NEP (RPC-FSN3): **Price: £ 299**

PS-MSK2 (RCI-FSN4): **Price: £ 86**

Centralised control

PSC-A64S

– Control of up to 4 zones with a maximum of 16 groups per zone, i.e, up to 64 groups.
– 16 indoor units per group, with a maximum of 160 indoor units per H-link system. Up to 8 PSC-A64S units to a single H-link.
– In addition to the basic functions, operating mode and temperature setting, the air flow rate and louvre can also be adjusted.
– An alarm code is displayed automatically with detailed information about the error whenever a problem comes about.
– The option of sending and receiving external signals is included, along with the possibility of connecting to the PSC-A1T timer.

Compatibility: System Free indoor units range, commercial range (VRF IVX), VRF Set Free range.

Price: £ 644

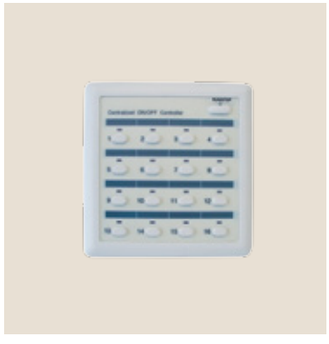
Weekly programming

PSC-A1T

– Programmable weekly timer designed to work with other remote controls that do not have a built-in weekly timer.
– All 7 days of the week can be set, and start/stop can be programmed up to 3 times a day.
– There are two weekly programmes, A and B, which can be easily modified for winter and summer.

Compatibility: System Free indoor units range, commercial range (VRF IVX), VRF Set Free range.

Price: £ 223



Centralised control ON/OFF

PSC-A16RS

– On/Off controller to manage the status of 16 groups
– Simple operating orders
– Two switches for on/off function
– Individual on/off: to order a group to start up or stop
– Simultaneous on/off: to order all groups to start up or stop Up to 16 groups of units at the same time.
– Up to 8 controllers can be connected to a single H-link.
– Maximum 16 indoor units per group, with a maximum of 160 indoor units per H-link.

Compatibility: System Free indoor units range, commercial range (VRF IVX), VRF Set Free range.

Price: £ 612

Controls

CSNET Manager 2 T10

- Connect up to 16 H-link lines and 1,024 indoor units (16 x 64).
- 10"(15") Capacitive touch screen for the centralised CSNET Manager system.
- Light and compact with high quality screen resolution.
- Improved user interface.
- Web access available through a computer, tablet and Smartphone.
- Modbus included as standard
- Energy management, programmable optional functions.

Compatibility: VRF, IVX
System Free indoor units.

Price: £ 2,911

CSNET Manager 2 T15

- Connect up to 16 H-link lines and 1,024 indoor units (16 x 64).
- 10"(15") Capacitive touch screen for the centralised CSNET Manager system.
- Light and compact with high quality screen resolution.
- Improved user interface.
- Web access available through a computer, tablet and Smartphone.
- Modbus included as standard
- Energy management, programmable optional functions.

Compatibility: VRF, IVX
System Free indoor units.

Price: £ 3,363

CSNET Manager 2 SL

- Connect up to 16 H-link lines and 1,024 indoor units (16 x 64).
- Hardware system for the centralised CSNET Manager with an external screen.
- Same features as CSNET Manager when used with external screen.
- No dedicated computer required. One Ethernet port, two USB ports and an HDMI display connection.
- Web access via a computer, tablet and smartphone possible.

Compatibility: VRF, IVX
System Free indoor units.

Price: £ 1,414

CSNET Lite

- Connect up to 64 indoor units on one H-link line.
- H-link gateway to connect to the centralised CSNET Manager system.
- Simplified solution for small installations.
- Din rail installation.
- No need for a dedicated computer.
- Web access available through computer, tablet and Smartphone.

Compatibility: VRF, IVX
System Free indoor units.

Price: £ 950

Pasarela H-Link

HC-A64NET

- Connect up to 64 indoor units in one H-Link line.
- H-Link gateway to connect up to centralised CSNET Manager system.
- Necessary for CSNET Manager 2 T10 & T15 or SL.

Compatibility: VRF, IVX
System Free indoor units.

Price: £ 386

Accessories for CSNET Manager

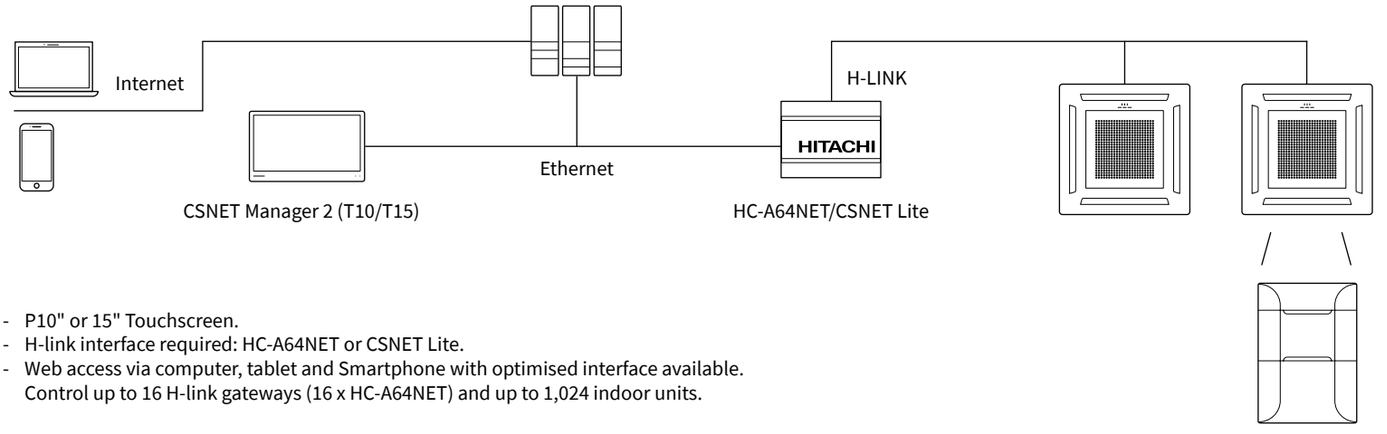
CSNET Manager2
Centralised control system

NEW

Central control systems that allows the remote operation and supervision of multiple installations, leading to potential reduced operating costs and more effective maintenance.

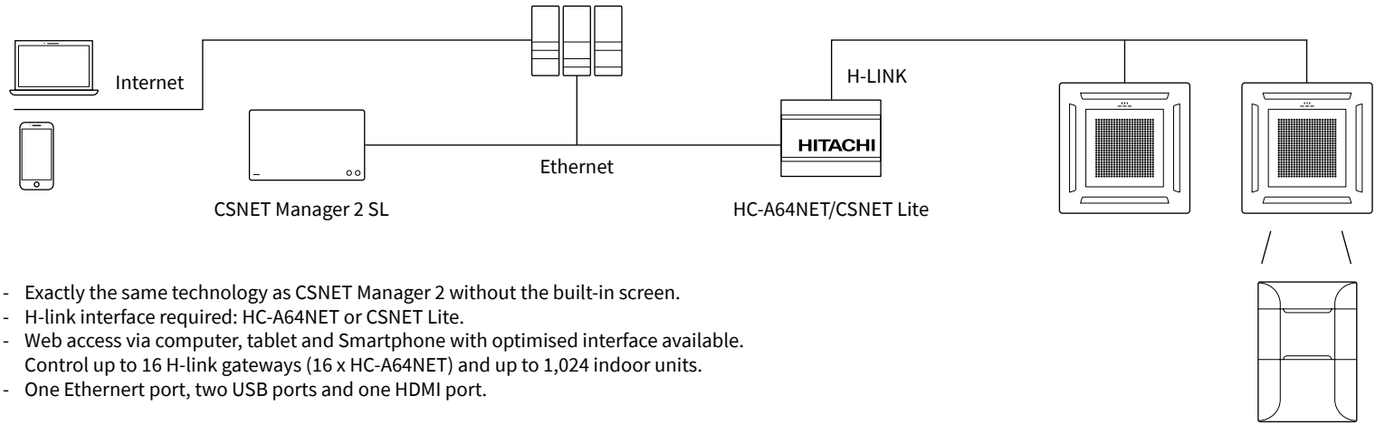
Different installation possibilities

1. With a touchscreen



- P10" or 15" Touchscreen.
- H-link interface required: HC-A64NET or CSNET Lite.
- Web access via computer, tablet and Smartphone with optimised interface available. Control up to 16 H-link gateways (16 x HC-A64NET) and up to 1,024 indoor units.

2. Screenless



- Exactly the same technology as CSNET Manager 2 without the built-in screen.
- H-link interface required: HC-A64NET or CSNET Lite.
- Web access via computer, tablet and Smartphone with optimised interface available. Control up to 16 H-link gateways (16 x HC-A64NET) and up to 1,024 indoor units.
- One Ethernert port, two USB ports and one HDMI port.

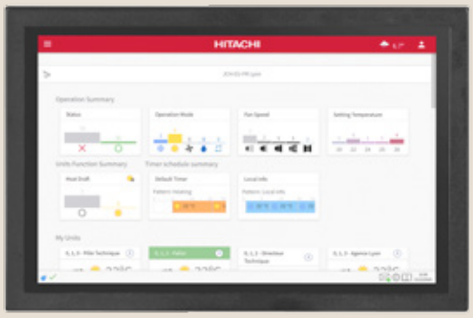
RCS WEB
(Virtual remote control available)

- Control the system from your desk for maximum convenience.
- User-friendly interface.
- One or more indoor units controllable from same virtual remote.
- User accounts can be set up with specific rights for specific indoor units.

New Touchscreen with clear, customisable display

Choose from either a 10" or 15" inch screen and enjoy the following benefits:

- New menu view.
- Direct access to optional functions such as remote on/off and alarm signal.
- Power consumption analysis as standard including 3rd party devices.
- Intuitive configuration wizard.



Remote access with smartphone

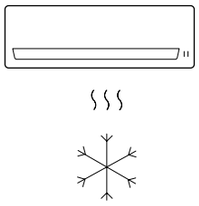
The system can be accessed at any time via a smartphone.

- Improved usability.
- Identical functions to Touchscreen.
- Graphical representation of units status.

Improves user comfort all year round

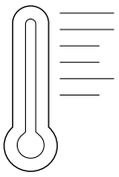
Gentle Cool function

In cooling mode a minimum air off temperature can be set per fancoil that will automatically reset to ventilation mode if the air gets too cool for the comfort of the user.



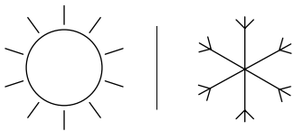
Heat draft function

In heating mode, the indoor unit will remain fan off until air off temperature has reached a pre-set level to avoid cold drafts for occupants.



Auto Cool/Heat function

Depending on the conditions in the rooms, CSNET decides when to adjust the system in cold mode or in heat mode, based on detailed control settings.



Control and monitoring for management of buildings

Consumption estimates

Energy consumption estimate for an indoor unit or group of indoor units, with the associated cost.* This is achieved either with an optional built-in energy meter, or by entering the energy consumption data by hand.

The data can be displayed in graphs for a more detailed view of the power data and easier analysis of consumption.

*Approximate costs.

Annual programming

The operation mode and set point temperatures for the individual indoor units can be set for an entire year, ensuring maximum comfort and efficiency.

Outdoor unit control options

CSNET can enable functions to reduce the noise level or limit energy consumption for the outdoor units, in accordance with a set schedule or by way of a manual command.

Compatible with Oracle Opera PMS (Fidelio)

CSNET can be linked to FIDELIO (hotel management system) in order to use the check in/check out signal to send commands to the indoor units.

Interlock control

CSNET can be programmed with complex algorithms to bring on units in duty rotation, lead lag and auto changeover on failure for critical systems safety.

You are in control everywhere

Your remote access options

1

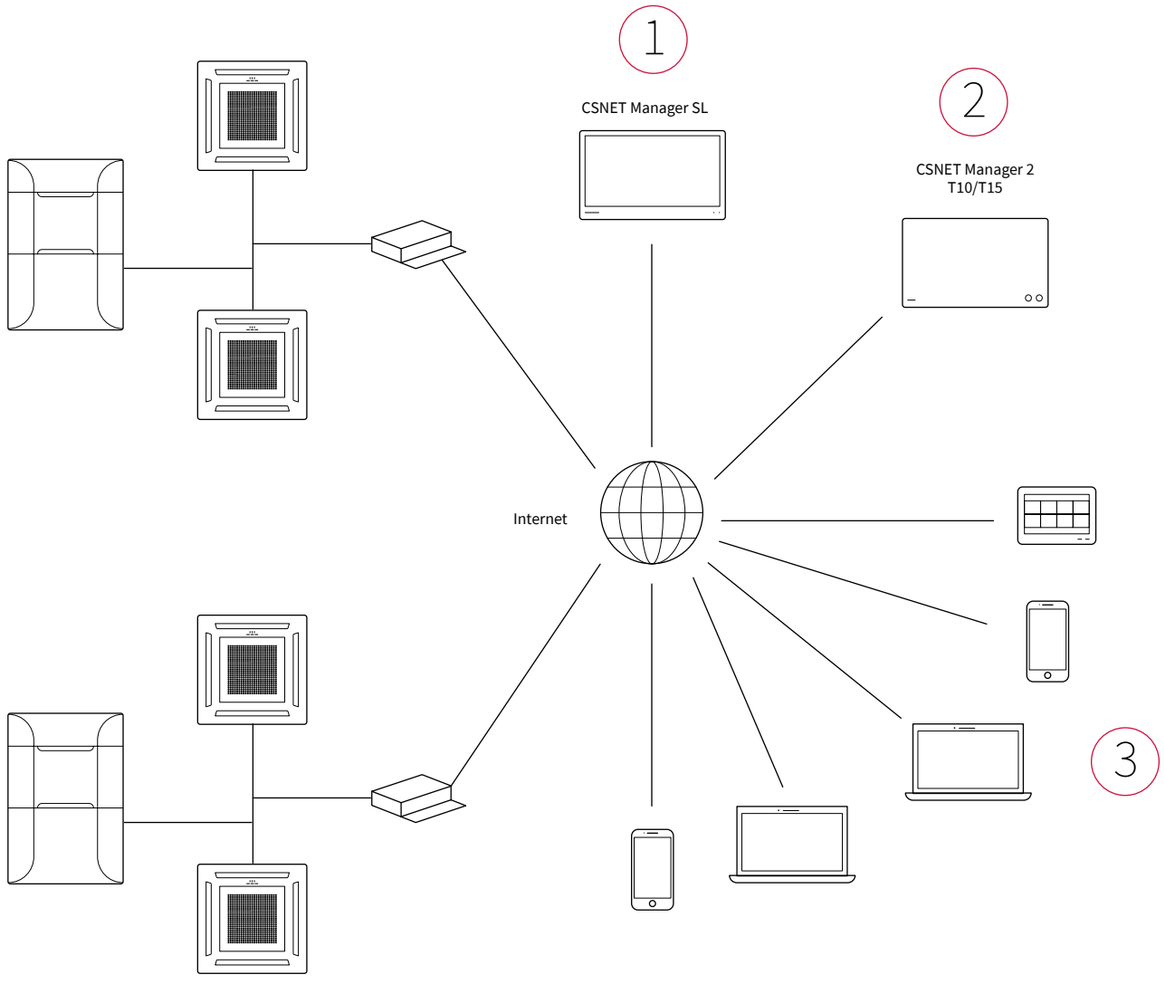
Remote access with external screen:
- Access from your computer or smartphone (CSNET network or Internet connection necessary).
- Simultaneous control of up to 16 devices.
- Possibility to connect 3rd party screen.

2

Remote access with integrated screen:
- Control via Touchscreen
- Access from your computer or smartphone (CSNET network or Internet connection necessary).
- Simultaneous control of up to 16 devices.

3

Remote access with multiple devices:
- Simultaneous access from multiple devices.
- Compatible with previous generations of CSNET Manager and web systems.



Email notifications

Receive a daily report and emergency alerts in case of alarms.

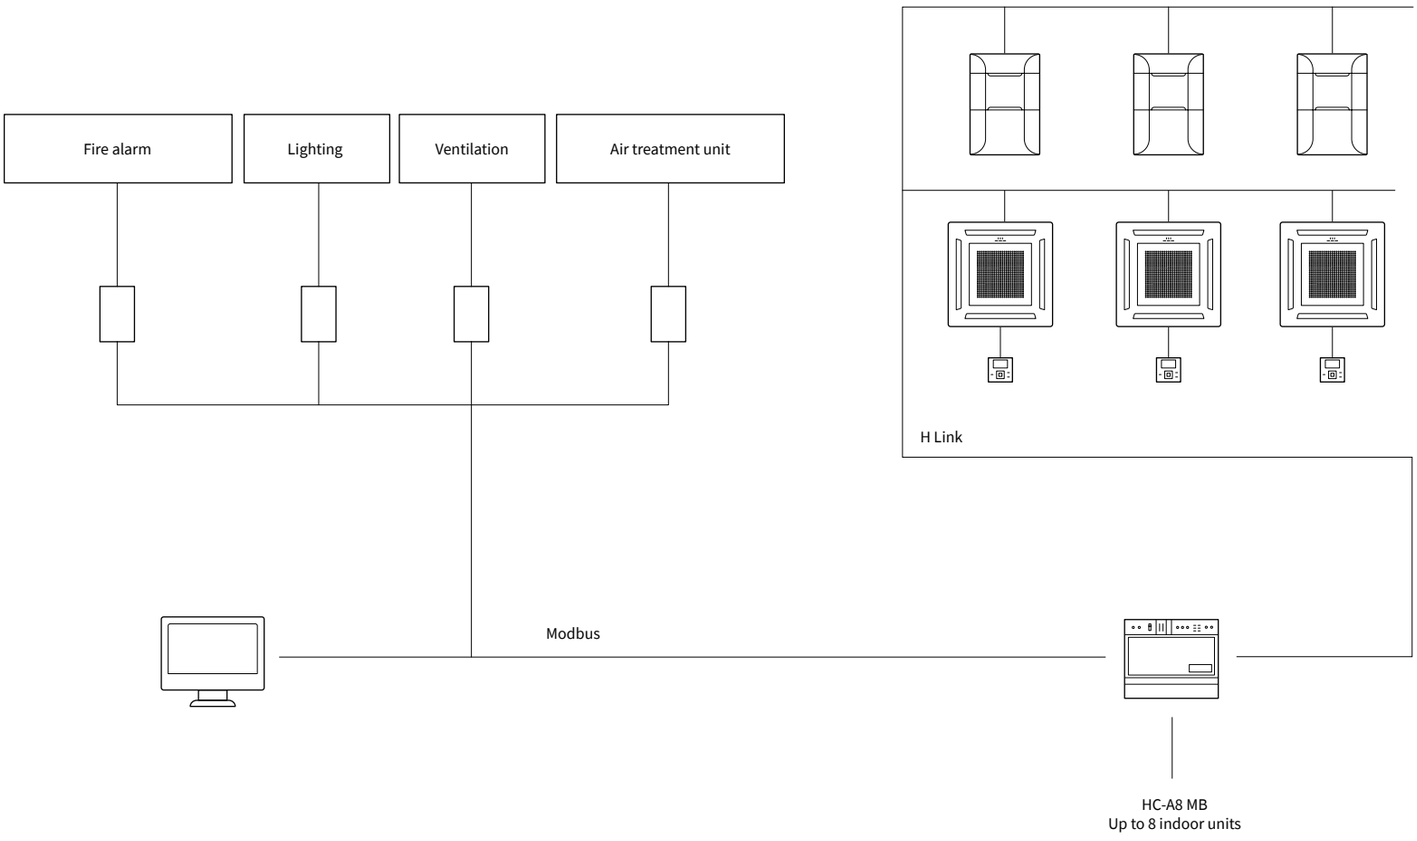
Data logging history

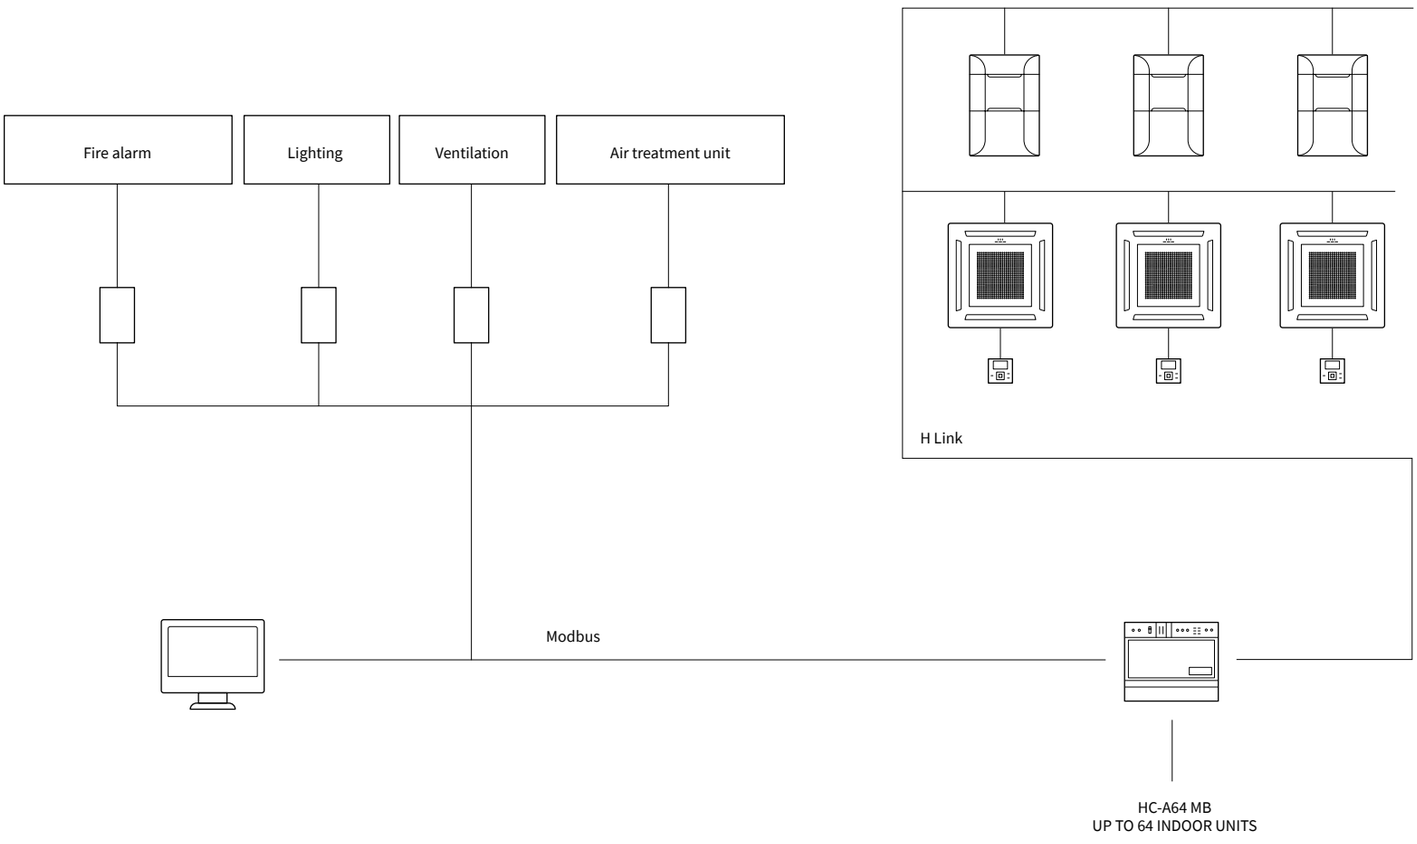
Allows an in-depth analysis of the system performance in order to improve efficiency and use preventative maintenance effectively.

Automatic updates of the software

Modbus protocol

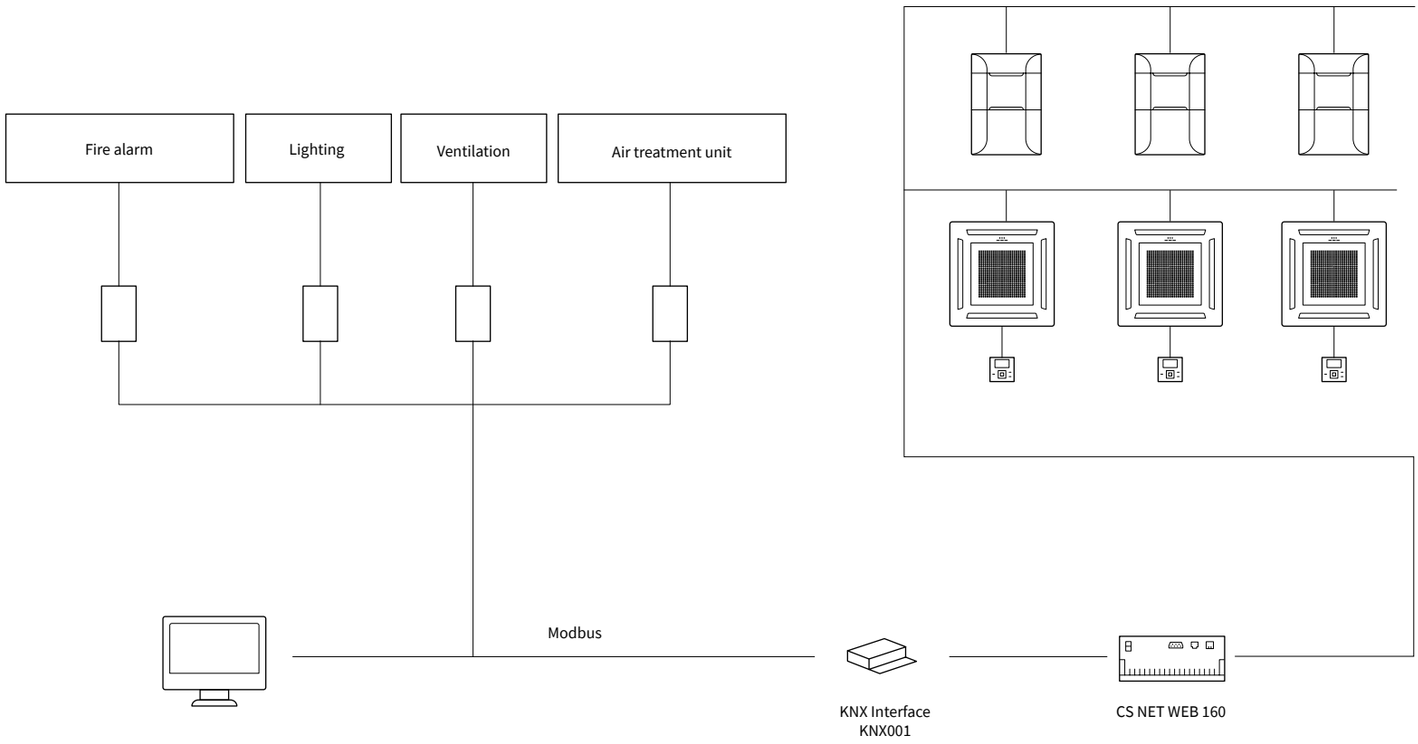
Most building supervision systems use a Modbus connection. The Modbus protocol is a serial dialogue protocol based on a hierarchical structure between a master unit and slave units. It is also a standard in industrial applications.

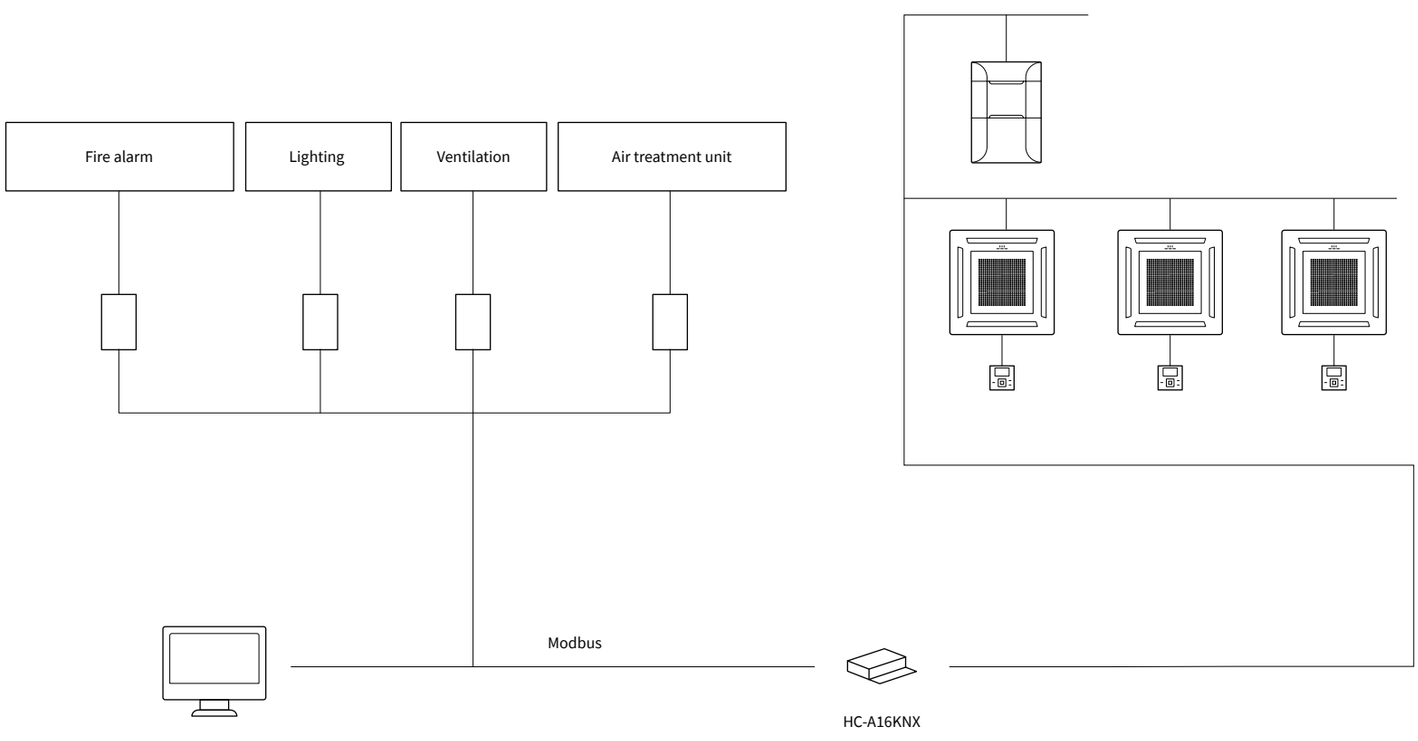




KNX Protocol

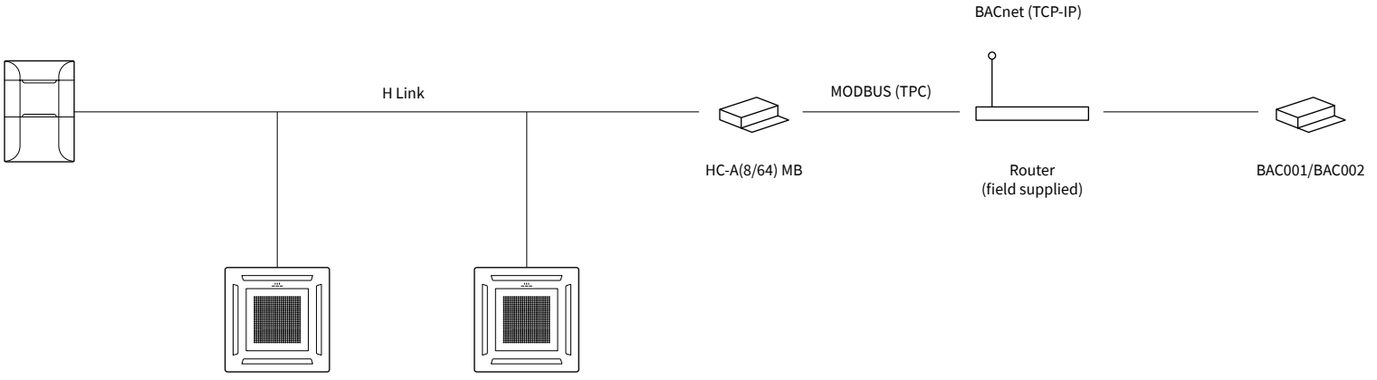
The KNX is a bus which is dedicated to the "Building", and is standardised and independent of the manufacturers (lighting, heating, security, energy management, metering, etc.). Based on standard EIB, EHS, Batibus buses, the KNX guarantees the interoperability of all products bearing the KNX logo. It is an ISO standard.
Orientation: Large- and medium-sized buildings, home automation.





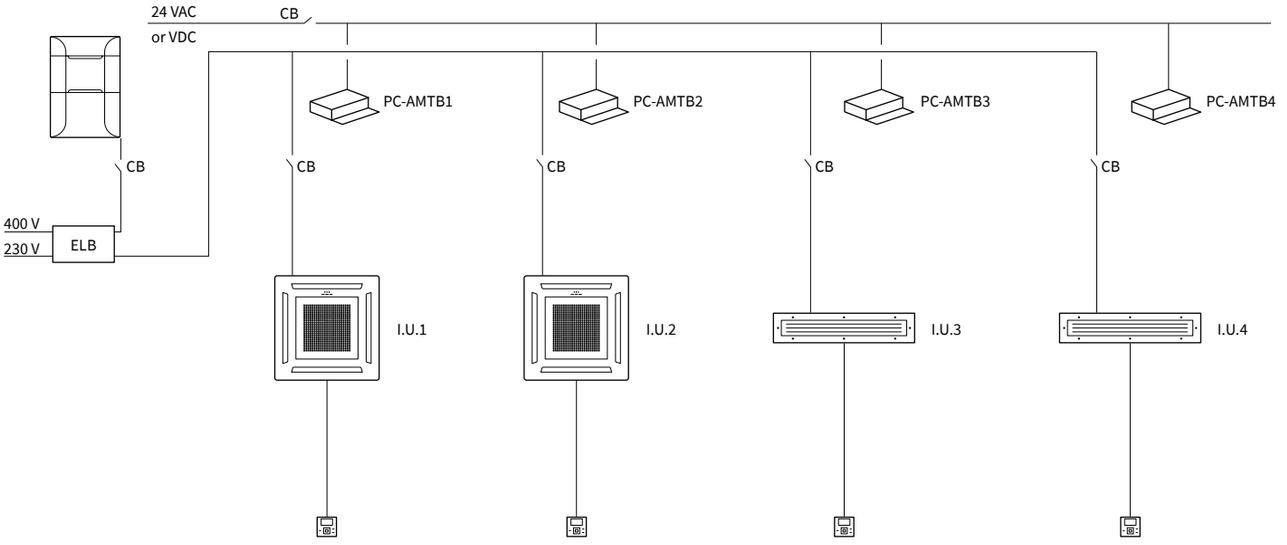
Bacnet

Connects our Modbus interface to a BACNETsystem.
For further details, please ask.



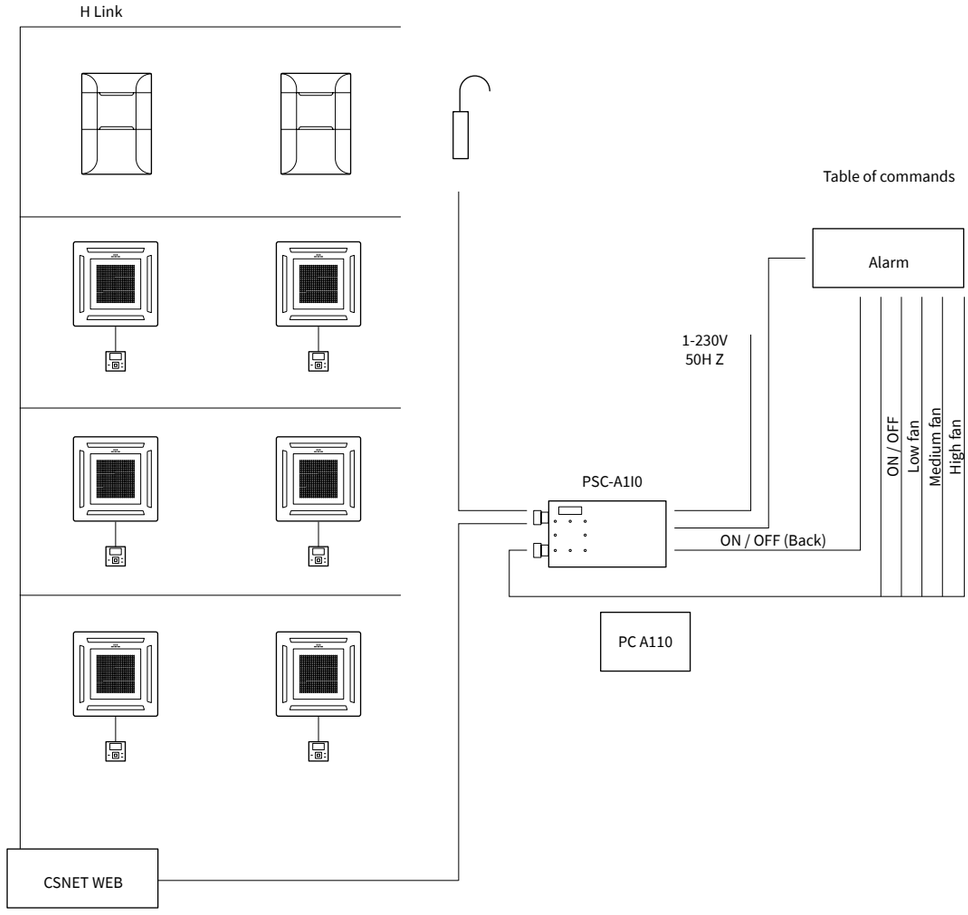
Multitenant

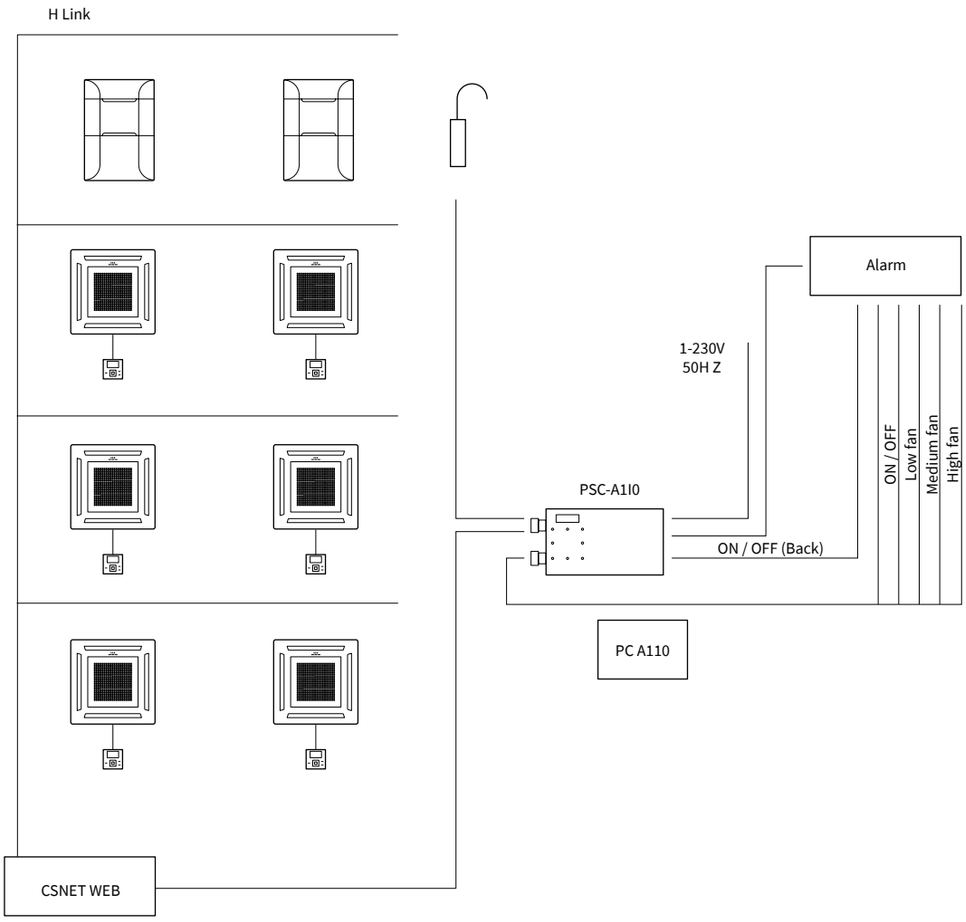
Suitable for multi-property buildings in which there are indoor units which do not have power because the properties are not occupied, e.g. an office building where the units are considered independent at user level but which share the same outdoor conditioning unit. This accessory prevents the outdoor unit from detecting a power failure in the indoor units.



PSC-A1I0 to manage and dialogue with third party systems

Most building supervision systems.
This interface can be used to integrate both air treatment units and non-Hitachi ventilation units in Hitachi's centralised management system.





Renewing the indoor air in premises is key to achieving a good environment, both in terms of air quality and comfort. The Hitachi air renewal range not only ensures high indoor air quality, but also saves energy when using the climate-control system

Air renewal

Air renewal

Heat recovery units

KPI High-efficiency air recovery

Option to control an external back-up heating element

The heating element starts operating when the temperature drops below -5 °C. Operation is recommended when high air discharge temperatures are required.

Noise reduction

Noise attenuator available, achieving a reduction of up to 5 dB(A) (see accessories).

Automatic by-pass

The KPI units have an automatically controlled internal by-pass damper which removes the need to add thermal load with the ventilation air supply when outdoor conditions are unfavourable for heat recovery.

Versatile ventilation systems

The user can choose from three operating options to ensure maximum comfort and also improve indoor air quality through renewal: forced energy recovery, free ventilation and automatic ventilation (default).

G3 and F7 filters to purify the air

KPIs are supplied from the factory with two G3 filters, one for the air input and one for the output. In addition, a high-efficiency F7 air filter (classified according to EN779) is available as an accessory for installations where an additional filter section is required to ensure indoor air quality, reducing the effects of outdoor pollution.

Static pressure adjustment

KPIs are designed for installation in almost any facility.

The ventilation pressure level can be adjusted quickly and easily using the base plate, in accordance with installation requirements. This guarantees that ventilation flow is reached.

KPIs also have an extra-high speed for installations with long duct runs or for additional filters.

Compliance with standard

Compliance with the ErP Ecodesign Directive Lot 6 for ventilation units with requirements in force as of 1st January 2018.

CO_2 sensor for automatic ventilation

Two options available:
- Automatic speed mode
  For CO_2 sensors with proportional output. Fan speed is adjusted automatically via the output sensor, always ensuring high indoor air quality without any user intervention.
- High CO_2 concentration mode
  The KPI unit will operate at its set ventilation speed unless the CO_2 concentration exceeds the sensor's detection threshold, in which case it will operate at maximum speed, helping to reduce CO_2 levels. It will return to set speed once the sensor signal goes off.

Heat recovery units

Active KPI. High-efficiency recovery with direct expansion coil

Active KPI-X4E

With direct expansion coil, which conditions the outdoor air in accordance with indoor requirements.

Compliance with standard

Compliance with the ErP Ecodesign Directive Lot 6 for ventilation units with requirements in force as of 1st January 2018.

G3 and F7 filters to purify the air

KPIs are supplied from the factory with two G3 filters, one for the air input and one for the output. In addition, a high-efficiency F7 air filter (classified according to EN779) is available as an accessory for installations where an additional filter section is required to ensure indoor air quality, reducing the effects of outdoor pollution.

Versatile ventilation systems

The user can choose from three operating options to ensure maximum comfort and also improve indoor air quality through renewal: forced energy recovery, free ventilation and automatic ventilation (default).

Static pressure adjustment

KPIs are designed for installation in almost any facility.

The ventilation pressure level can be adjusted quickly and easily using the base plate, in accordance with installation requirements. This guarantees that ventilation flow is reached.

KPIs also have an extra-high speed for installations with long duct runs or for additional filters.

Flexibility

Active KPI is compatible with:
- 2 and 2.5 HP Utopia.
- VRF Mini and VRF Set Free Sigma

Air adaptation

Additional treatment beforehand adapts the air to the conditions required in the room.

Air flow temperature control

The Active KPI acts just like another indoor unit. The control will take the temperature set using the remote control as the required discharge temperature.

Automatic by-pass

The KPI units have an automatically controlled internal by-pass damper which removes the need to add thermal load with the ventilation air supply when outdoor conditions are unfavourable for heat recovery.

Econofresh

Free cooling for duct units

Free cooling

Energy savings are achieved by taking advantage of the outside air when the outdoor air temperature is below the indoor setting temperature.

System Free ducted units

The Econofresh kit connects to RPI System Free series 4, 5 and 6 HP duct units.

Operation by enthalpy control

An enthalpy sensor can be installed in the fresh air supply duct to improve free cooling regulation and control. The amount of fresh and recirculated air is controlled by input air enthalpy instead of temperature, resulting in much more precise, comfortable control.

Operation via CO_2 sensor

A CO_2 sensor that regulates the amount of fresh air to be supplied indoors can be installed to guarantee high air quality.

Versatile operation

The system can operate in two modes in order to meet different user needs: "standard", ideal for intermediate seasons (spring and autumn), and "all fresh", ideal for buildings with a high internal load all year round.

Thermo on control

Function available in either of the two operation modes, ensuring the outdoor unit comes on if the free cooling cannot reach the required conditions.

Adjustable minimum ventilation

A minimum air flow renewal % can be set, regardless of temperature conditions.

Energy savings

Studies carried out using specific energy simulation software have estimated savings of 40% thanks to this use of outside air, compared to the same installation without Econofresh.

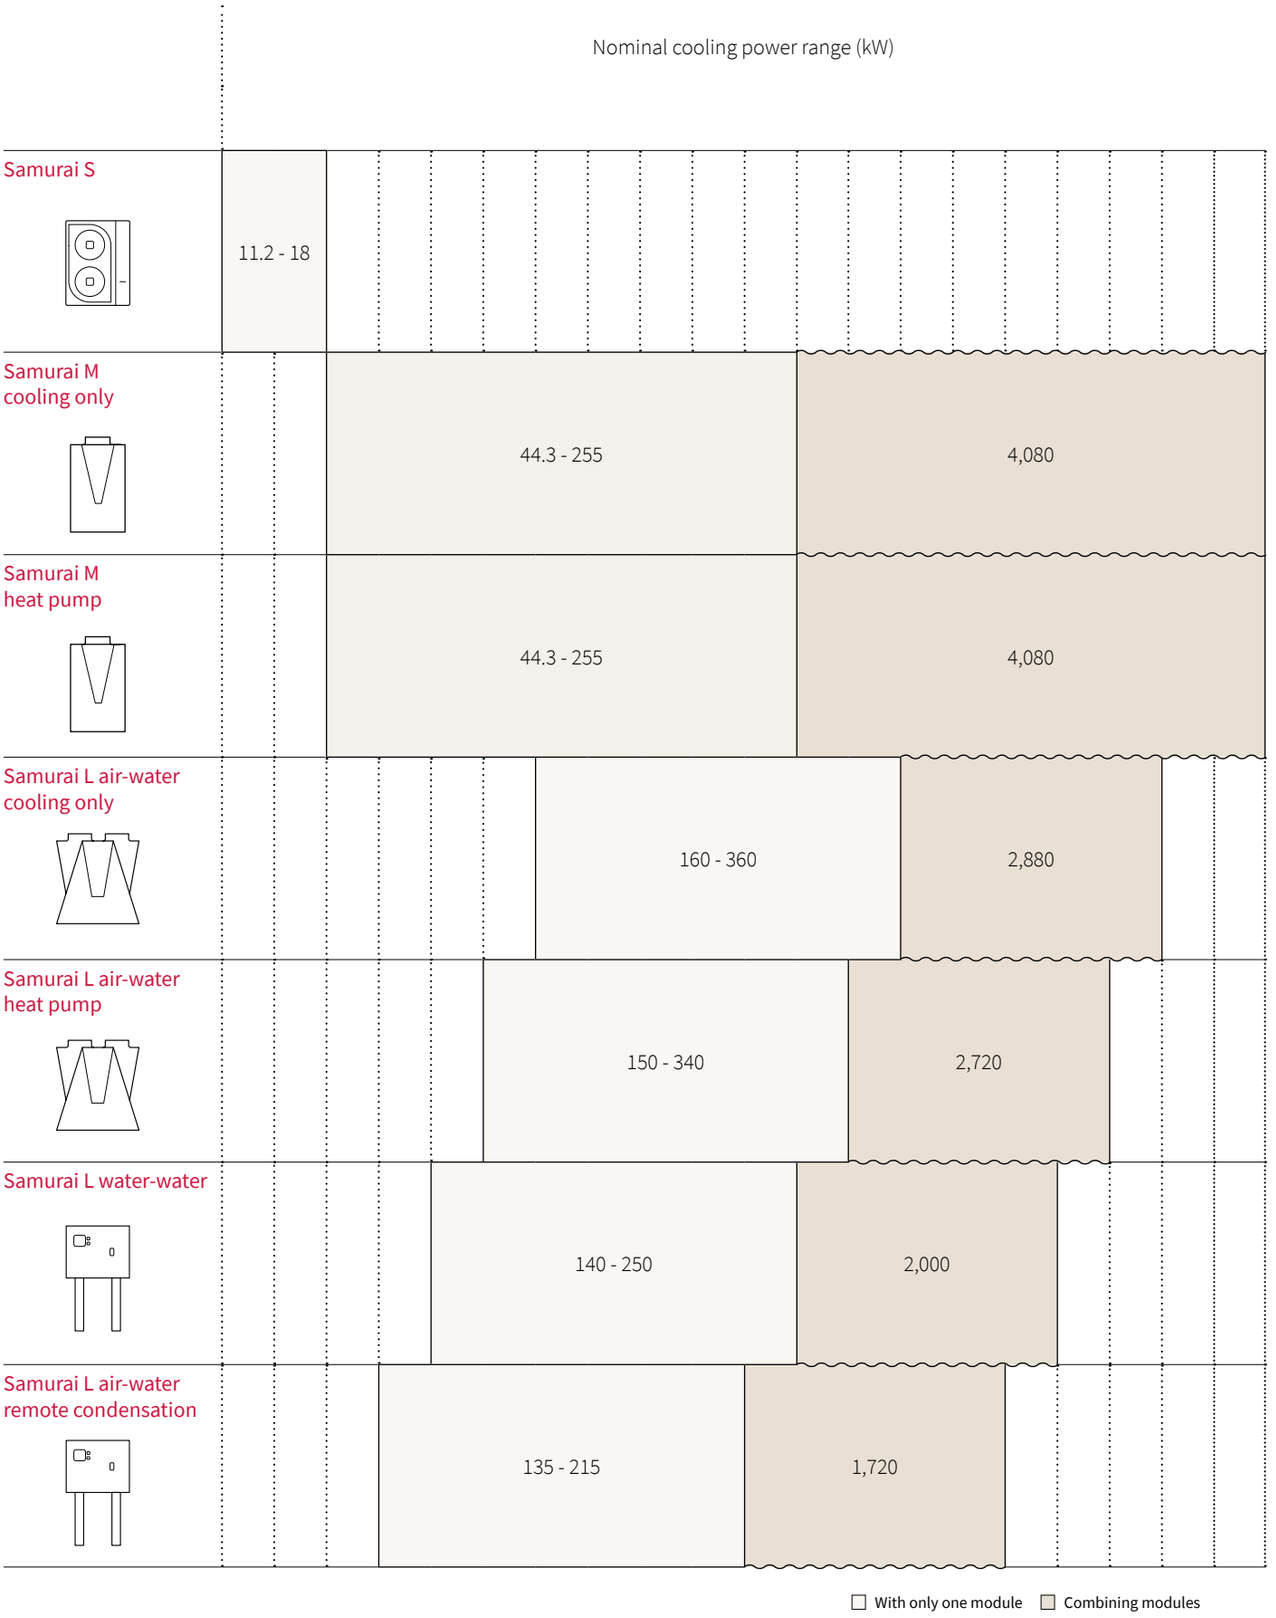
There is not one space or project like another. Every day your customers propose a different challenge, therefore, we have expanded our range of chillers and commercial heat pumps to suit all your projects regardless of the size or the demands of performance, reliability and precision.

Chillers

Quick selection table

Chillers



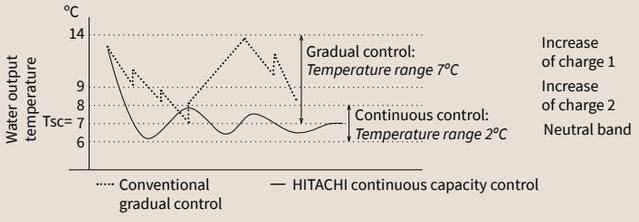
Benefits
Chillers

1 Modular design that adapts to each space

Thanks to their modular design, Hitachi chillers are ideal for quick, compact installations where the machines must adapt to the space available. The high-efficiency units must be adaptable to reach the required power, thereby guaranteeing continued operation in the event of partial failure.

2 Accurate temperature control

The combination of Hitachi's "continuous capacity control compressor" and exclusive electronic controls allows precise control of the water output temperature, regardless of the cooling load, which is particularly important in industrial processes.



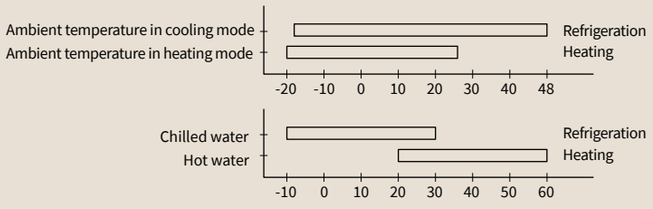
3 Maximum safety

Hitachi chillers feature the latest technology in order to ensure fault-free operation and maximum safety. The improved safety functions include smart defrosting, automatic restart after power failure, anti-freeze protection, automatic on/off fan cycle for greater protection from snow, and remote control of alarms.

4 High-efficiency, Tier 2 compliant (2021)

High levels of efficiency in both cooling and heating modes. Meets or exceeds all Tier 2 Ecodesign requirements for:
Reg. 813/2013 for heat pumps (2017)
Reg. 1095/2015 for chillers for medium temperature industrial processes (2018)
Reg. 2016/2281 for comfort cooling and for high-temperature industrial processes (2021).

5 Wide range of working temperatures



Depending on the model, the units can produce cold water from -10 to 30°C and hot water from 25 to 60°C. Furthermore, operation remains unchanged with outside temperatures of -17.8 to 48°C in cooling and -20 to 25°C in heating, depending on the model.

Samurai S Heat Pump

Scroll inverter chiller

Up to 4 combinable modules

This system can be used to combine up to 4 modules of up to 18 kW under a single control for large spaces.

Exceeds Tier 2 requirements

High levels of efficiency in both cooling and heating modes. Exceeds all Tier 2 Ecodesign requirements. Reg. 2016/2281 for comfort cooling and for high-temperature industrial processes (2021).

Built-in hydraulic kits

Pump and flow switch assembled at factory. The safety valve, water filter and automatic balancing valve are shipped separately and assembled at start-up.

High-power fans

The fan motor can provide pressure up to 30Pa to prevent air flow recirculation.

Samurai M Cooling Only

Scroll inverter chiller

Very compact size

The Samurai M's compact size makes it ideal for replacements, as it fits almost anywhere.

Exceeds Tier 2 requirements

High levels of efficiency in both cooling and heating modes. Exceeds all Tier 2 Ecodesign requirements. Reg. 2016/2281 for comfort cooling and for high-temperature industrial processes (2021).

EC fans. Less noise and more efficiency

Electronically commutated fans use more efficient motors and have better aerodynamics, improving the performance of the whole system while also reducing noise levels, especially at partial charge.

Very low noise level

All models are available in a "low noise" version for optimal user comfort.

Extended operational limits

The system includes operation in cooling mode down to -17ºC and production of cold water down to -8ºC as standard.

High performance as standard

Built-in Bacnet/Modbus/N2 gateway, electronic expansion valve, flow switch, water filter, etc.

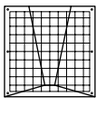
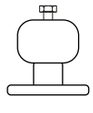
Compatible controls and accessories:

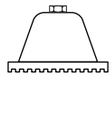


Condenser battery protection grilles

Wired remote controller



1" or 2" spring anti-vibration mounts



Neoprene anti-vibration mounts

Others:

- Modular kit: required for modular applications.

Samurai M Heat Pump

Scroll inverter chiller

Very compact size

The Samurai M's compact size makes it ideal for replacements, as it fits almost anywhere.

Exceeds Tier 2 requirements

High levels of efficiency in both cooling and heating modes. Exceeds all Tier 2 Ecodesign requirements. Reg. 2016/2281 for comfort cooling and for high-temperature industrial processes (2021).

EC fans. Less noise and more efficiency

Electronically commutated fans use more efficient motors and have better aerodynamics, improving the performance of the whole system while also reducing noise levels, especially at partial charge.

Very low noise level

All models are available in a "low noise" version for optimal user comfort.

Extended operational limits

The system includes operation in cooling mode down to -17ºC as standard.

High performance as standard

Built-in Bacnet/Modbus/N2 gateway, electronic expansion valve, flow switch, water filter, etc.

Samurai L
Air Cooled, Hi-Efficiency, Cooling Only

Double screw compressor, continuous capacity control

Accurate temperature control

The combination of Hitachi's "continuous capacity control compressor" and exclusive electronic controls allows precise control of the water outlet temperature, regardless of the cooling load, which is particularly important in industrial processes.

Modular design

The combination of up to 8 modules allows production to be adapted precisely to the needs of the installation.

Very compact dimensions

The new 80 and 90 HP modules (with 6 fans) help reduce the footprint required for the machine.

(Fig. 1)

Two operating modes

There are two standard operating modes configurable in the system:
-Standard mode
-High-efficiency mode

Chilled water output from -10°C to 30°C

The output temperature range for the chilled water has been increased during cooling, offering the option of high and low water output temperatures.

(Fig. 2)

Heat recovery option

Optionally, the unit can be ordered with a partial heat recovery device.

Samurai L
Water Cooled, Hi-Efficiency

Double screw compressor, continuous capacity control

Continuous capacity control

Hitachi's continuous capacity control system uses advanced electronic controls to position the infinitely variable slide valve on each compressor, thus ensuring accurate control of the charge and, thereby, of the chilled water temperature.

Compact unit

Reduced operating space and easier access to machine rooms. Moreover, the compressor is located in an easily accessible space for more straightforward maintenance.

Accurate temperature control

The combination of Hitachi's "continuous capacity control compressor" and exclusive electronic controls allows precise control of the water output temperature, regardless of the cooling load, which is particularly important in industrial processes.

New compressor

The range incorporates a new double screw compressor with the latest advances in Hitachi screw compressor technology and continuous capacity control from 25% to 100%. This modulation ensures the right charge at all times.

Energy savings of up to 20%

The exclusive continuous capacity control brings energy savings of 15-20% compared to gradual regulation systems, since the cooling load is adjusted more precisely, frequent compressor starts and stops are eliminated, and the system benefits from the high-efficiency of partial load performance.
(Fig. 1)

Cooling only with heat pump option

The system can also work as a heat pump.
An optional accessory can be used to regulate water output temperature on the condenser side rather than on the evaporator side.

Technical tables additional notes

Yutaki air source heat pumps

The nominal heating and cooling capacities are based on Standard EN 14511:

- Cooling: water input temperature 12°C, output temperature 7°C and outside temperature 35°C DB.
- Heating: water input temperature 30°C, output at 35°C and outside temperature 7°C DB, 6°C WB.
- Pipe length: 7.5 metres; Height of pipes: 0 metres.

The heating capacity and performance are shown with integrated values (with defrost correction factor included).

The acoustic data are based on the following conditions:

- Outdoor ambient temperature (DB/WB): 7/6 °C.
- Water input/output temperature: 30/35 °C.
- Unit distance from measuring point: 1 metre from the front surface of the unit and 1.5 metres above ground level.

The acoustic pressure level has been measured in an anechoic chamber, meaning reflected sound must be taken into account when installing the unit.

The acoustic power level has been measured in a reverberant room in accordance with Standard EN12102. The environmental conditions used are those specified in Standard EN14511 for performance testing.

The SCOP heating seasonal performance values are calculated in accordance with ERP Directive 2009/125/CE, and more specifically with Standard 813/2013 (LOT 1) according to UNE EN 14825.

The seasonal performance value in domestic hot water production is calculated in compliance with ERP Directive 2009/125/CE, and more specifically with Regulation 814/2013 (LOT2) according to Standard UNE EN 16147.

All energy efficiency documents and the energy label (LOT 1 AND LOT 2) can be downloaded from the website: https://www.hitachi-hvac.co.uk/apps

Domestic 1x1 range units

(cooling power < 12kW)

The nominal heating and cooling capacity is the combined capacity of HITACHI's standard Split system, and is based on Standard ISO 5151:

- Cooling: indoor temperature 27°C DB, 19°C WB, outside temperature 35°C DB.
- Heating: indoor temperature 20°C DB, outside temperature 7°C DB, 6°C WB.
- Pipe length: 5 metres; Height of pipes: 0 metres.

The acoustic pressure level in indoor units is based on the following conditions:

- Wall-mounted units: 0.8 metres below the height centre of the indoor unit and 1 metre from discharge grille.
- Console units: half the height of the unit and 1 metre from the discharge grille
- Ducts: 0.8 metres below the height centre of the indoor unit and 1.5 metres from the discharge grille.
- Cassette: 0.8 metres below the height centre of the indoor unit and 1.5 metres from the discharge grille.

This data has been measured in an anechoic chamber and takes into account the reflected sound of the location.

The acoustic pressure level in outdoor units is based on the following conditions:

- 1 metre from the front surface of the unit and 1 metre above ground level

The SEER/SCOP seasonal cooling and heating values are calculated in compliance with Directive ERP 2009/125/CE, and more specifically with Standard 206/2012 (LOT 10), according to UNE EN 14825.

All energy efficiency documents and the energy label (LOT 10) can be downloaded from the website: https://www.hitachi-hvac.co.uk/apps

Commercial 1x1 range and VRF Systems units

(cooling capacity > 12kW)

The nominal cooling and heating capacity is the combined capacity of the outdoor unit and the indoor units, and is based on Standard EN14511, under the following operating conditions:

- Cooling: indoor temperature 27°C DB, 19°C WB, outside temperature 35°C DB.
- Heating: indoor temperature 20°C DB, outside temperature 7°C DB, 6°C WB.
- Pipe length: 7.5 metres; Height of pipes: 0 metres.

The acoustic pressure level in indoor units is based on the following conditions:

- Wall-mounted units: 1 m below the unit and 1.5 m from the discharge grille.
- Console units: 1 m above ground level and 1 m from the front of the unit.
- Ducts: 1.5 m below the unit (without a ceiling below it) with the suction duct at 1 m and the discharge duct at 2 m.
- Cassette: 1.5 m below the unit
- Ceiling: 1 m below the unit and 1 m from the discharge grille.

The acoustic pressure level has been measured in an anechoic chamber, meaning reflected sound must be taken into account when installing the unit.

The acoustic pressure level in outdoor units is based on the following conditions:

- The measurement point is 1.5 metres above the ground and 1 m from the front surface of the unit.
- Units operating at their rated voltage.

The acoustic pressure level has been measured in an anechoic chamber, meaning reflected sound must be taken into account when installing the unit.

The acoustic power level has been measured in a reverberant room in accordance with Standard EN12102. The environmental conditions used are those specified in Standard EN14511 for performance testing.

The SEER/SCOP seasonal cooling and heating performance values are calculated in compliance with ERP Directive 2009/125/CE, and more specifically with Standard 2281/2016 (LOT 21), in accordance with Standard UNE EN 14825 and calculated with RCI-FSN4 model cassette units.

All the energy efficiency documents (LOT 21) can be downloaded from the website: https://www.hitachi-hvac.co.uk/apps
The energy label (LOT 10) can be downloaded from the website: https://www.hitachi-hvac.co.uk/apps

Indoor units

The nominal cooling and heating capacity is the combined capacity of the outdoor unit and the indoor units, and is based on Standard EN14511, under the following operating conditions:

- Cooling: indoor temperature 27°C DB, 19°C WB, outside temperature 35°C DB.
- Heating: indoor temperature 20°C DB, outside temperature 7°C DB, 6°C WB.
- Pipe length: 7.5 metres; Height of pipes: 0 metres.

The indoor units have different cooling and heating capacity in the VRF IVX and VRF Set Free systems.

In the case of the VRF IVX system, the nominal capacity shown in the following tables is for combinations of an indoor unit with an outdoor unit of the VRF IVX Premium or IVX Comfort series [RAS-(2-6)HVNP1(E), RAS-(4-12)H(V)NP(1)(E), RAS-(3-6)H(V)NC1(E) and RAS-(4-12)H(V)NC(1)(E)], provided such a combination is permitted.

The acoustic pressure level has been measured in an anechoic chamber under the following conditions:

- Indoor units RCI (M), RCD: 1.5 m below the unit.
- RPI indoor units (M): 1.5 metres below the unit (no ceiling below the unit), with the suction duct at 1 m and the discharge duct at 2 m.
- RPC and RPK indoor units: 1 m below the unit, 1 m from the discharge grille.
- RPF indoor units (I): 1 m above ground level, 1 m from the front of the unit.

The acoustic power level has been measured in a reverberant room in accordance with Standard EN12102. The environmental conditions used are those specified in Standard EN14511 for performance testing.

Dx-Kit

The nominal cooling and heating capacity is the combined capacity of the outdoor unit and the associated DX interface (EXV-0E2), and is based on Standard EN14511, under the following operating conditions:

- Cooling: indoor temperature 27°C DB, 19°C WB, outside temperature 35°C DB.
- Heating: indoor temperature 20°C DB, outside temperature 7°C DB, 6°C WB.
- Pipe length: 7.5 metres; Height of pipes: 0 metres.

The acoustic pressure level in outdoor units is based on the following conditions:

- The measurement point is 1.5 metres above the ground and 1 m from the front surface of the unit.
- Units operating at their rated voltage.

The acoustic pressure level has been measured in an anechoic chamber, meaning reflected sound must be taken into account when installing the unit.

The acoustic power level has been measured in a reverberant room in accordance with Standard EN12102. The environmental conditions used are those specified in Standard EN14511 for performance testing.

The outdoor units of the "RAS-XH (V)NP(1)E" series have been designed for specific applications that require the combination of a Series 2 DX Interface and are not Eurovent certified. They may vary depending on each particular application.

Hydraulic module

The heating and cooling nominal capacities are based on Standard EN 14511 and show the data in integrated values (with defrost correction factor included).

The acoustic data are based on the following conditions:
- Outdoor ambient temperature (DB/WB): 7/6 °C.
- Water input/output temperature: 30/35 °C.
- Unit distance from the measuring point: 1 metre from the front of the unit and 1.5 metres above ground level.

The measurements were made in a reverberant room in accordance with Standard EN12102. The environmental conditions used are those specified in Standard EN14511 for performance testing.

Units in the air renewal range – KPI and KPI Active

The sound pressure level has been measured in an anechoic chamber, with the measuring point located 1.5 m below the unit, without a ceiling over it and using a soundproof duct. Suction duct at 1 m and discharge duct at 2 m.

Reflected sound should be considered when installing the unit. The sound pressure level measured in the installation may be higher than specified.

In the case of KPI-X4E units with direct expansion battery, the nominal cooling and heating capacity is the combined capacity of the outdoor and indoor units of the system and is based on Standard EN14511, under the following operating conditions:

- Cooling: indoor temperature 27°C DB, 19°C WB, outside temperature 35°C DB.
- Heating: indoor temperature 20°C DB, outside temperature 7°C DB, 6°C WB.
- Pipe length: 7.5 metres; Height of pipes: 0 metres.
- Active KPI unit operating at its nominal air flow.

Chiller range units

The capacity data are based on European standard EN14511 under the following conditions:

In cooling mode:

- Cold water input/output temperature: 12/7 °C.
- Condenser input air temperature: 35 °C.

In heating mode:

- Hot water input/output temperature 40/45°C.
- Condenser input air temperature: 6°C (WB).

All sound pressure level data are measured at a height of 1.5 m, at 1 m from the front panel of the unit.

The low water temperature option requires brine (ethylene glycol or propylene glycol-type antifreeze mixture).

For more information, please see the technical manuals for each range at https://www.hitachi-hvac.co.uk/resources

Conditions of Sale
Johnson Controls Hitachi Air Conditioning Europe S.A.S.

1. DEFINITIONS
In these conditions;
(1) "HITACHI" means: Johnson Controls Hitachi Air Conditioning Europe SAS, UK Branch, (registration no. FC030594), with registered office located at Whitebrook Park, Lower Cookham Road, Maidenhead, SL6 8YA, United Kingdom.
(2) "Buyer" means: the person, firm or company specified overleaf, to whom HITACHI's Quotation, Sales Confirmation or Invoice is addressed.
(3) "Goods" means: the goods to be sold by HITACHI to the Buyer under the Contract.
(4) Contract" means: the contract of sale hereby formed between HITACHI and Buyer.

2. CONSTRUCTION OF CONTRACT
(1) The terms of the Contract shall consist of the particulars overleaf and these conditions. Any term overleaf which is at variance with these conditions shall prevail over these conditions, which shall be construed accordingly, except with regard to price in respect of which provisions of sub clause 6 (2) shall prevail.
(2) No other terms (whether contained in any document issued by the Buyer or in any written or oral communication between the parties) shall apply to the Contract nor shall these conditions or the particulars overleaf be modified without HITACHI's written agreement.

3. QUOTATIONS AND ORDERS
(1) Unless accepted before lapse or withdrawal, or renewed in writing by HITACHI, quotations shall lapse automatically after 60 days, but may be withdrawn earlier by HITACHI.
(2) Quotations are for information only and are not firm offers. There shall be no binding contract until HITACHI has accepted the buyer's order by dispatching HITACHI's official sales confirmation.

4. DELIVERY
(1) The scope of supply by HITACHI under the Contract shall be strictly limited to those specified overleaf, and no other goods or services are included.
(2) HITACHI will use all reasonable endeavors to deliver the Goods on or before the delivery date specified overleaf, however, HITACHI does not undertake, guarantee or warrant that delivery will be made on the delivery date specified.
(3) Any such delivery date specified shall be extended by any period or periods during which the manufacture or delivery of the Goods or other work by HITACHI in connection with this Contract is prevented, hindered, delayed or rendered uneconomic by reason of a Force Majeure Event (as defined in clause 18 below).
(4) The Buyer acknowledges that, in the case of semiconductor products, optoelectronic products and other electronic components, due to the advanced technology in the Goods and the specialist nature of the manufacturing process, manufacture of the Goods by HITACHI's normal means may result in a loss of yield. In the event of such a loss of yield HITACHI shall notify the Buyer and shall use its reasonable endeavors to supply the Goods in accordance with this Contract. If due to a Force Majeure Event or due to loss of yield HITACHI has insufficient stocks to meet all its commitments HITACHI may apportion stock between its customers at its sole discretion.
(5) If any delivery time specified overleaf is so extended by more than 90 days then the Buyer shall be entitled to give written notice to HITACHI requiring the Goods to be delivered within 30 days of the date of such notice, failing which the Buyer shall have the right to give further written notice determining the Contract forthwith.
(6) HITACHI shall be entitled to deliver the Goods in one or more instalments. Where delivery is effected by instalment each instalment shall be treated as a separate contract. Delay in delivery or other default of any instalment shall not relieve the Buyer of its obligations to accept and pay for the remaining deliveries.
(7) In the case of the Buyer residing in the United Kingdom, unless otherwise stated, HITACHI will at its own expense deliver to the Buyer's premises. In the case of exports, unless otherwise stated, delivery will be FOB (Incoterms 2010) at a UK port designated by HITACHI.
(8) The delivery by HITACHI of a greater or lesser quantity of the Goods than the quantity provided for in the Contract, the delivery of other goods not provided for in the Contract, or the delivery of the Goods only some of which are defective, shall not entitle the Buyer to reject all of the Goods delivered. In order that HITACHI can comply with its carrier's conditions any claim in respect of error in quantity or type of Goods or in respect of damage to the Goods in transit must be made in writing to HITACHI and the carrier notified in both cases within 3 days of receipt of the Goods. Failure to make such claim shall constitute unqualified acceptance of the Goods and waiver by the Buyer of all claims relating to error in quantity or type of goods delivered or relating to the condition of Goods delivered. Similarly, if any Goods invoiced by HITACHI are not delivered, in order that HITACHI can claim against its carriers where appropriate the Buyer must notify HITACHI within 10 days of the date of invoice, failing which the Buyer will be liable to pay for the Goods in full. Where liability for error in quantity, or type of Goods or in respect of damage to the Goods in transit is accepted by HITACHI, HITACHI's only obligation shall be, at its option, to make good any shortage or non-delivery and/or as appropriate to replace or repair any Goods found to be damaged or defective and/or to refund the cost of such Goods to the Buyer.
(9) If the Buyer refuses or fails to take delivery of Goods tendered in accordance with this Contract HITACHI shall be entitled to terminate this Contract with immediate effect, to dispose of the Goods as HITACHI may determine, and to recover from the Buyer any loss and expenses incurred as a result of such refusal or failure.
(10) Section 32 (2) of the Sale of Goods Act 1979 shall not apply. HITACHI shall not be required to give the Buyer the notice specified in Section 32 (3) of the Act.
(11) Unless expressly agreed in writing by HITACHI, all Goods shall be packed in accordance with HITACHI's standard practice. The Buyer shall meet the costs of any special packaging requested by the Buyer or any packaging rendered necessary by delivery by any means other than HITACHI's normal means of delivery.

5. RISK AND TITLE
(1) NOTWITHSTANDING DELIVERY, PROPERTY IN THE GOODS SUPPLIED SHALL REMAIN WITH HITACHI UNTIL THOSE GOODS HAVE BEEN PAID FOR IN FULL (TOGETHER WITH ANY ACCRUED INTEREST).
(a) RISK IN THE GOODS SHALL PASS ON DELIVERY. The Buyer shall store the Goods separately or in such a way as will show clearly that they are HITACHI's property and the Buyer will ensure that they are kept in good condition and insured against loss or damage for HITACHI's benefit. Until property in the Goods passes to the Buyer, the Buyer shall hold the proceeds of any claim on the insurance policy on trust for HITACHI and shall immediately account to HITACHI with the proceeds.
(b) THE BUYER SHALL HOLD THE GOODS IN A FIDUCIARY CAPACITY AND AS BAILEE FOR HITACHI WHO MAY WITHOUT PREJUDICE TO ANY OTHER OF ITS RIGHTS REPOSSESS THE GOODS TO WHICH IT HAS RETAINED TITLE AS AFORESAID and thereafter re-sell the same and for this purpose the Buyer hereby grants an irrevocable right and license to HITACHI's servants and agents to enter upon all or any of its premises with or without vehicles during normal business hours for the purpose of inspecting and/or repossessing Goods to which it has retained title. This right shall continue to subsist notwithstanding the termination of this Contract for any reason and is without prejudice to any accrued rights of HITACHI hereunder or otherwise.
(c) The Buyer agrees to provide HITACHI, within twenty-four hours of a written request made by HITACHI, a certificate stating (i) the Goods that the Buyer still holds and that the Buyer has its custody, directly or through a third party depositary; and (ii) the names and contact information (address, telephone number and email) of any subsequent purchasers of the Goods, and the amounts owed by such purchasers to the Buyer.
(d) HITACHI may at any time detach or separate any of its Goods which may have been incorporated in or attached to goods belonging to the Buyer or any third party.
(2) HITACHI reserve the right, exercisable at its option by notice in writing to the Buyer, to waive the provisions of sub clause 5 (1) above at any time before payment has been made for the Goods supplied by the Buyer and to declare that property in the Goods shall have passed to the Buyer.
(3) Notwithstanding that property in the Goods shall not have passed to the Buyer, HITACHI, without prejudice to any other of its rights, may sue for the price of the Goods supplied in the event that payment is not made on the due date.
(4) Any return of Goods wholly or partly by the Buyer to HITACHI, except in the case of defective Goods pursuant to Clause 8, shall be subject to HITACHI's prior written consent and

Buyers payment to HITACHI of interest charges for the period from the date of HITACHI's shipment of such Goods to the Buyer to the date of HITACHI's receipt of such Goods. Freight, insurance and any other expenses incurred in connection with such return shall be borne by the Buyer.

6. PRICES

(1) Unless otherwise stated overleaf, prices of the Goods shall be exclusive of VAT, export duty and foreign import duty and any other import or other taxes, which shall where applicable be paid by the Buyer.

(2) Prices stated in any quotation or in HITACHI's Sales Confirmation are provisional only and subject to adjustment to take account of increases in HITACHI's costs and overheads, including, without limitation, costs of carriage and labor costs. The Contract price shall be HITACHI's price ruling at the date of dispatch. All quotations/sales confirmations and invoices are issued subject to the unconditional reservation of HITACHI's right to adjust prices in respect of the following:-

(a) Changes in the prevailing exchange rate between the currency in which the price is to be paid and the Japanese Yen; (b) Changes in the current EU import duty.

7. PAYMENT

(1) If HITACHI has granted the Buyer credit facilities, the payment of the price must be made in full within 30 days of the date of invoice, unless otherwise specified overleaf or agreed to by HITACHI. Any extension of credit allowed for the Buyer may be changed or withdrawn at any time. Where no credit has been granted, payment must be made in full in cash prior to delivery. Payment shall be made in full direct to HITACHI in the currency invoiced. The Buyer shall not be entitled to exercise any right of set-off, counterclaim, abatement or analogous deduction against payment due to HITACHI. Time of payment is of the essence of a Contract. HITACHI reserves the right to suspend the provision of Goods to the Buyer where any amounts are overdue under any Contract with the Buyer until all such amounts have been paid.

(2) HITACHI is authorized to invoice daily interest (penalties for late payment) on any amount unpaid at the rate stipulated by the Late Payment of Commercial Debt Regulations 2013 (as amended) from the due date until the date of actual payment of all unpaid amounts (including interest) (after, as before, judgment). Costs in excess may also be claimed if justified.

(3) If, in the opinion of HITACHI, the creditworthiness of the Buyer shall have deteriorated prior to the delivery, HITACHI may require full or partial payment of the price prior to delivery or the provision of security for payment in full (including any accrued interest) by the Buyer in a form acceptable to HITACHI notwithstanding any credit terms that may have been agreed between HITACHI and the Buyer.

(4) Notwithstanding any purported contrary appropriation by the Buyer, all payments made by the Buyer to HITACHI shall be appropriated first to Goods which have been resold by the Buyer and then to Goods which remain in the possession or under the control of the Buyer.

(5) HITACHI is entitled to offset any amount owing to it from the Buyer against any amount owed to the Buyer by HITACHI.

8. WARRANTIES

(1) If the Goods are defective on delivery, and the defects arise from faulty materials or workmanship and are not caused by fair wear and tear, abnormal or unsuitable conditions of storage, transportation or use, or the combination of the Goods with any goods not supplied by HITACHI or any act, neglect or default of the Buyer or any third party and HITACHI is given written notice of the defects promptly upon discovery by the Buyer and at any rate within six months (or such other period of time as may specifically be agreed to by HITACHI for certain types of Goods) after delivery then, unless otherwise specified overleaf, HITACHI's sole obligation shall be (at its option) to repair or replace the defective item or allow the Buyer the price thereof and to pay or reimburse the reasonable carriage charges for the return of defective Goods to the Buyer and for delivery of the replaced or repaired item.

(2) Unless otherwise agreed between HITACHI and the Buyer, if any of the Goods are not HITACHI made, the provisions of sub clause 8 (1) above shall apply only to the extent covered by any warranty made by the supplier of such Goods to HITACHI.

(3) The Buyer shall retain the Goods at its premises until instructed by HITACHI to return them. Goods alleged to be defective shall be subject to inspection and testing by HITACHI at its own or (if HITACHI so chooses) at the Buyer's premises and the Buyer shall allow HITACHI adequate facilities at the Buyer's premises to investigate the complaint.

(4) Subject to sub clause 8 (1) above, HITACHI gives no representation or warranty and there is not incorporated in the Contract any condition whether express or implied, statutory or otherwise, as to the Goods other than the statutory warranty of title, and any such representations, conditions or warranties are hereby expressly excluded and HITACHI shall be under no liability to the Buyer for any loss, damage or injury (including special, direct, indirect or consequential loss and loss of profit) resulting from defective materials, faulty workmanship or otherwise howsoever arising and whether or not caused by the negligence of HITACHI, its employees or agents SAVE THAT HITACHI shall accept liability for death or personal injury caused by the negligence of HITACHI.

(5) Subject to sub clause 8 (1),the warranty for RAC products shall be 36 months after delivery of the Goods or from the date of invoice ,whichever is earlier.

(6) Subject to sub clause 8 (1) , the warranty for Utopia and Set Free Systems shall be 60 months from delivery of Goods or from the date of invoice, whichever is earlier.
