GDPR

Cell Press is committed to data privacy, and we've updated all our commercial business practices to comply with EU privacy law, the General Data Protection Regulation (GDPR), which took effect on May 25, 2018. We see GDPR as building on Cell Press's commitment to responsible data privacy and security practices. As part of our GDPR program, we evaluated and, where necessary, made enhancements to, our products and services to ensure that we treat personal data in line with GDPR. During this transition, we kept our commercial partners front of mind, and you can be assured that leads generated through Cell Press products not only are high quality but also were collected with the proper care to adhere to today's data privacy standards.

If you have any questions about Cell Press's privacy program and how it affects our commercial products, please contact your sales representative.

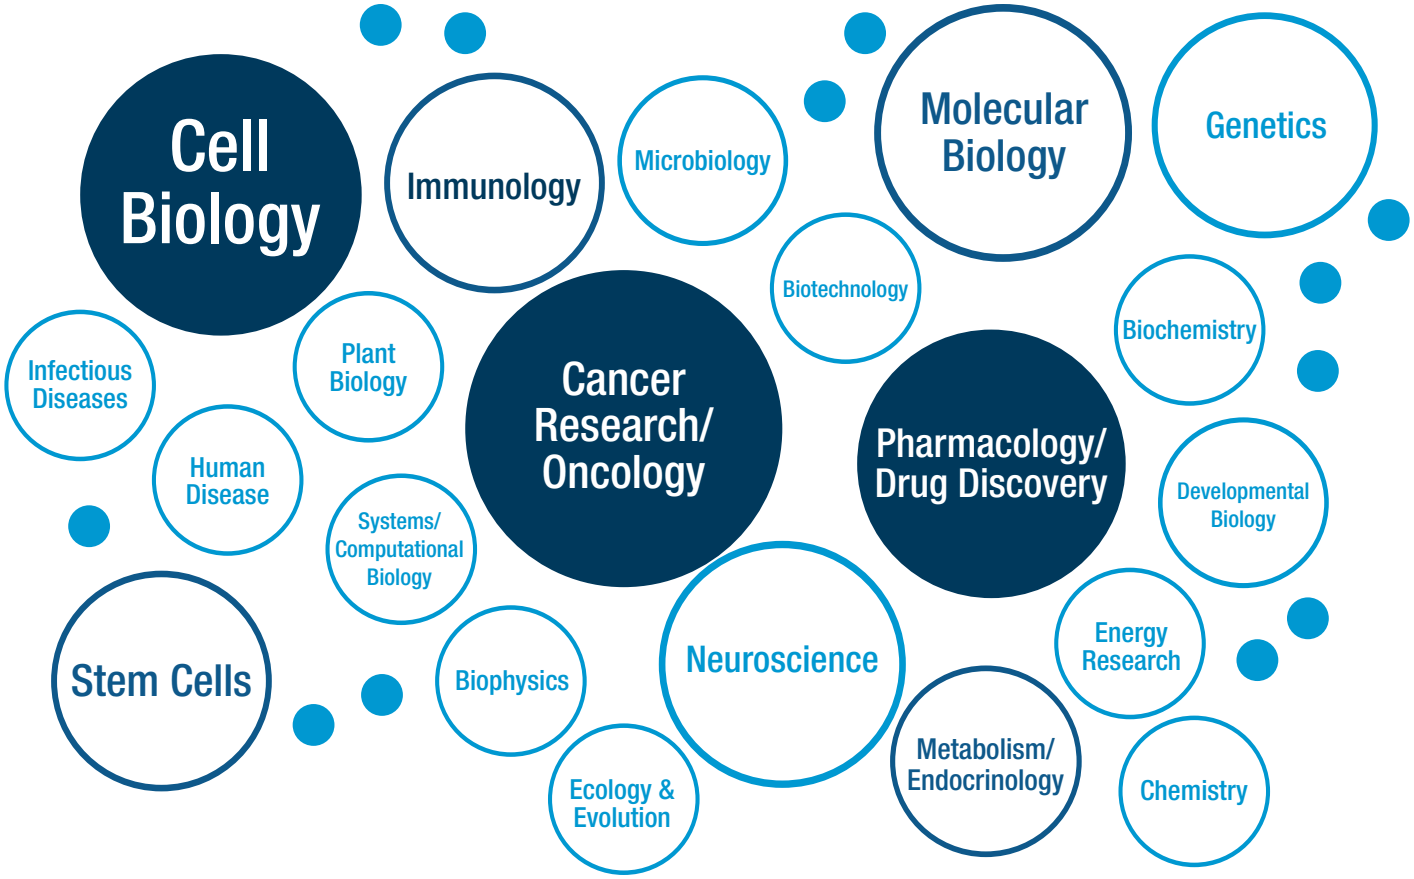
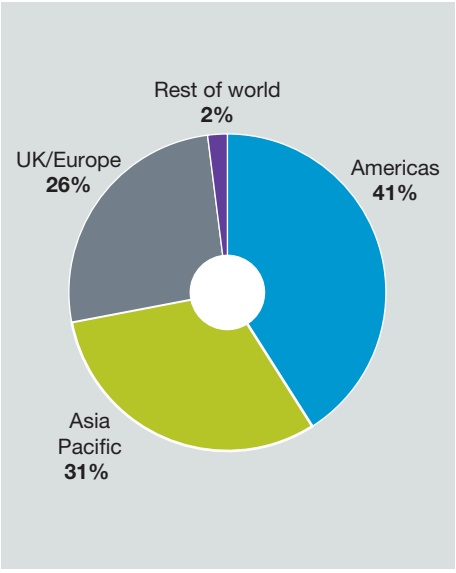
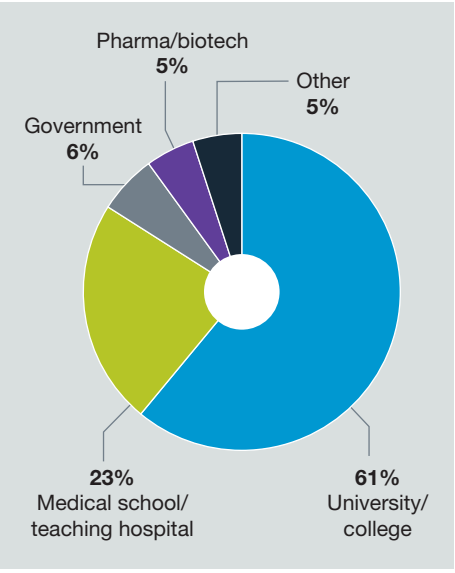
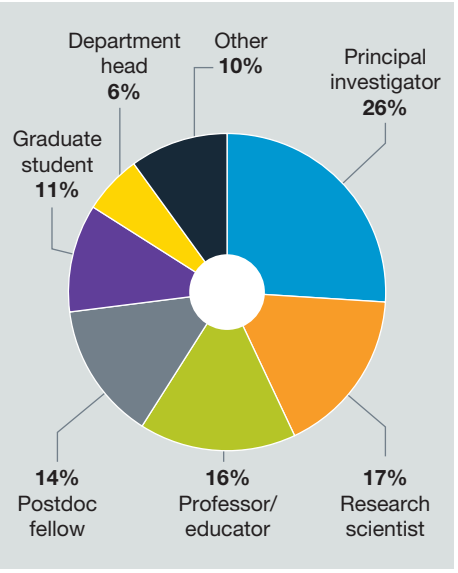
Demographics



Our readers, your target audience







Introduction

2020. What an incredible year it was as the COVID-19 pandemic reached every corner of the globe and changed the lives of almost each and every resident on the planet. Labs sat empty, research on hold. University campuses were shuttered for the safety of students and faculty. Hospitals pivoted their staff, both clinical and research, to care for the sick and the infirmed. And we all were separated from our friends, families, colleagues, and collaborators.

Yet through the changes, scientists found themselves in the fight of their lives, a fight they were uniquely prepared to fight: and through this fight we've seen incredible scientific achievement and growth, redefined ideas about vaccinology, and unprecedented research speed and collaboration.

Cell Press was proud to be a part of this fight, as we fast tracked and made all SARS-CoV-2 research freely available to all global researchers. We created the Coronavirus Resource Hub, a centralized COVID-19 platform including virtual conferences, webinars, lectures, and, of course, the most highly regarded research and reviews from around the globe. These resources set usage and citation records and helped fuel the global scientific fight against the pandemic.

Of course, human health research of all disciplines must be enabled, and 2020 presented a unique challenge there as well: with travel bans and the necessity of personal distance, symposia and scientific conferences were cancelled, and much of the idea sharing that drives scientific innovation was paused. Cell Press is uniquely suited to handle this challenge and did so by creating virtual content hubs for cancer research and neuroscience, publishing more than 30 freely available special issues, 15 webinars, and 2 virtual LabLinks to help bring the community together while we're apart.

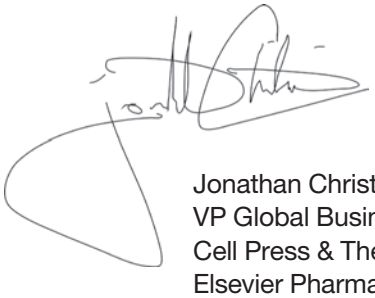
We continue to bridge the distance from the bench to the clinic, with journal launches such as *Med* and *Cell Reports Medicine*, along with strengthening our collaboration with our colleagues at *The Lancet*. And we follow the trends in sciences with journal launches in AI and big data with *Patterns* and environmental science and sustainability with *One Earth*.

Addtionally, we have made strides to help our valued biotech and lab equipment partners weather this environment. We've onboarded PubGrade contextual advertising across the Cell Press journals, bringing technical notes and content closer than ever before. And our suite of best practice content/lead generation platforms—through webinars and Cell Press Selection special issues—have generated more than 25,000 actionable leads for our corporate partners while bringing technical content and discovery to the forefront with our expanded protocols and methods portfolio.

What didn't change in 2020, and never will, is our commitment to working closely and cooperatively with our corporate partners to deliver best-in-class marketing and analytics solutions that help drive your business and help the scientific community face any challenge in 2021 and beyond.

We hope that you find continued health, success, and scientific discovery and look forward to assisting you to drive results as we put 2020 behind us.

In good health and science,



Jonathan Christison,
VP Global Business Development
Cell Press & The Lancet
Elsevier Pharma and Life Sciences

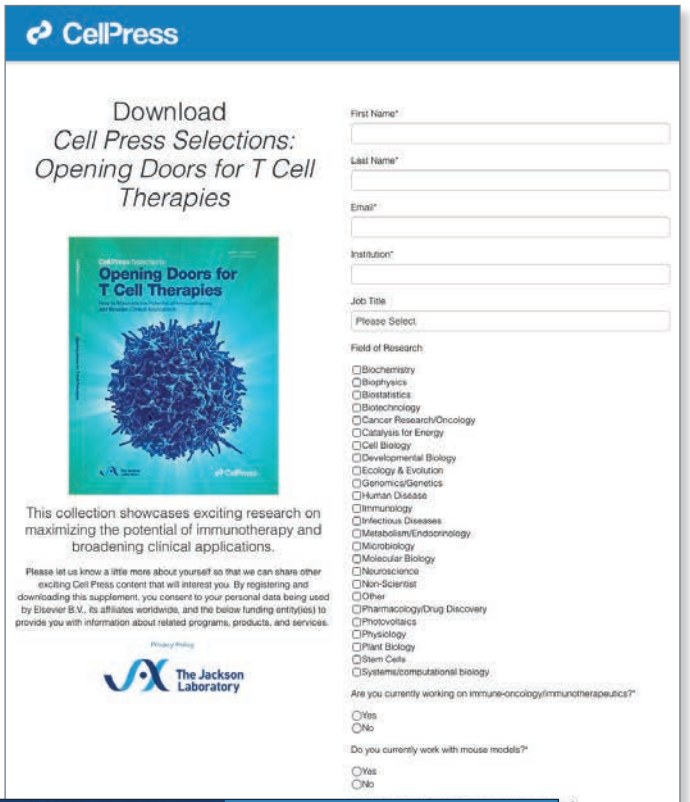
HubSpot capabilities

Optimized for your needs

For more than 40 years, Cell Press has set the standard in peer-reviewed life-science publishing. But we recognize the need to keep adapting in order to maintain this record of excellence. We want to support you as scientific content and user behavior evolve, and we're proud to partner with HubSpot to give you unparalleled access to your customers.

HubSpot is the most advanced inbound marketing software on the market. HubSpot's CRM allows us to track user behavior across cell.com and qualify leads by the pages they visit, links they click, and forms they complete. By learning how our audience behaves, we can help steer your messaging to the most qualified leads and help you drive your business.

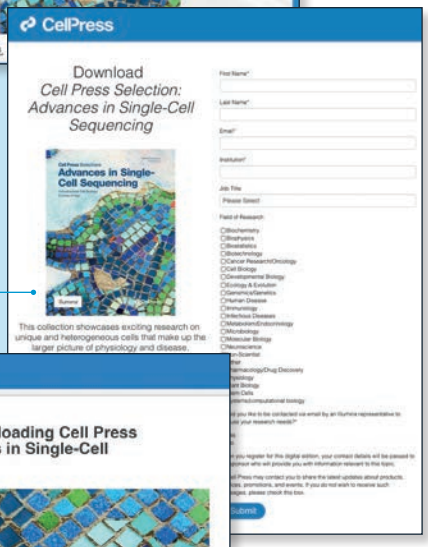
Look for the HubSpot sprocket next to products throughout this kit that can be enhanced with HubSpot marketing capabilities.



HubSpot case study

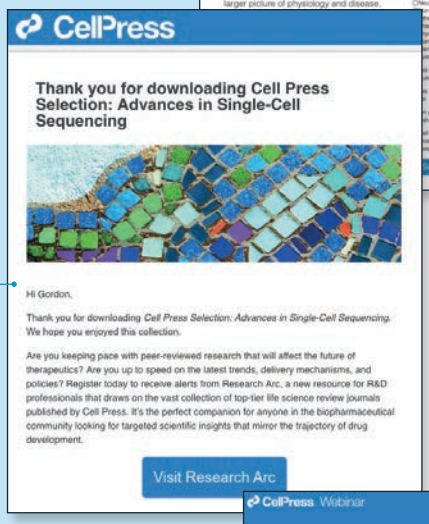
Step 1: Create compelling content

Work with your sales representative and the Cell Press editorial team to create a compelling piece of content to interact with our qualified audience. Products like Cell Press Selections (page 14) and webinars (page 22) can all be equipped with lead generation and nurturing capabilities.



Step 2: Qualify your leads

Our HubSpot-certified marketing team will help you create a registration campaign to ensure that we are gathering the most qualified leads. We will find new content to share with your customers in order to promote multiple layers of interaction and information gathering.



Step 3: Follow up with more great content

By delivering more impactful research and products to your new leads, we can further determine their lab needs and help understand their research.

Step 4: Gather your leads, dig into the data

Each one of your leads tells a story and helps you learn about your audience. Work with our team to gain insights about the behavior and trends of your leads, drive sales, and enhance your pipeline.

Step 5: Keep the conversation going!

Now that you know your audience, keep them moving down the funnel. Further segment your audience and gather new early-stage leads with a consistent, relevant stream of content.

Lead generation campaigns are all custom built and priced.

Traditional media

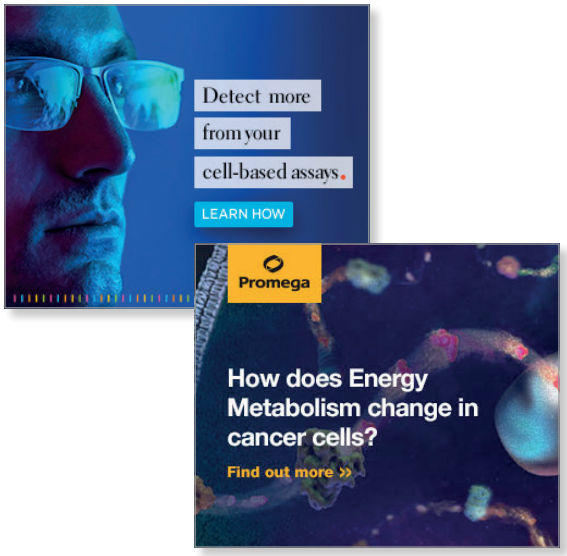
Eliminate the competition

With Sponsorship Roadblock advertising, you can own all of the advertising space on any journal page. Utilize the different advertisement units to deliver an incredibly powerful advertising experience. Talk to your sales representative to explore the possibilities!

Banners

Our banners are now responsive! To improve ad visibility, the leaderboard banner will hover with content on desktop and mobile devices.

As screens gradually permeate each aspect of our lives, banner advertising generates awareness for your brand or product in the moment your targeted customer is in their "science zone". Readers come to cell.com, individual journal homepages, and the Elsevier online platform ScienceDirect to read and research the latest great science. Choose from standard banners, flash banners, and rich media.



Geotarget your markets. Select regional targets to push specific examples and messaging. Cater to international customers with distinct messaging!

Specifications

Standard banner

- Acceptable formats: .gif and/or .jpeg
- Animations should run for less than three rotations or 30 seconds
- All ads with a white background must include a colored border
- 336 x 280 (300 x 250 pixels acceptable)
- 728 x 90 pixels
- 200 kb max ad file size
- Mobile – 300 x 50 pixels

Flash banner

- Animations should run for less than three rotations or 30 seconds
- All ads with a white background must include a colored border
- Flash ads should use Click-Tag. When submitting rich media, an alternate .gif is required
- 336 x 280 (300 x 250 pixels acceptable)
- 728 x 90 pixels

Electronic table of contents (eTOCs)

Cell Press produces eTOCs for all 50+ journals that we publish. Reach your target audience right in their inboxes. With an average open rate of 35% and an active subscriber base, Cell Press eTOCs are a proven vehicle for presenting your marketing message.

Marketplace Recommendations

It's contextual, with a PhD. Discover a comprehensive marketing solution and generate maximum awareness through Marketplace Recommendations. Our readers turn to Cell Press for landmark discoveries and a host of fascinating article formats, including our highly popular previews, minireviews, and reviews. Marketplace Recommendations uses carefully selected targeting to place your messaging adjacent to relevant content in our journals.

With granular targeting comes deeper relevance and greater impact. Marketplace Recommendations offers an unrivaled opportunity to drive Cell Press readers directly to your applications and products relevant to their work.

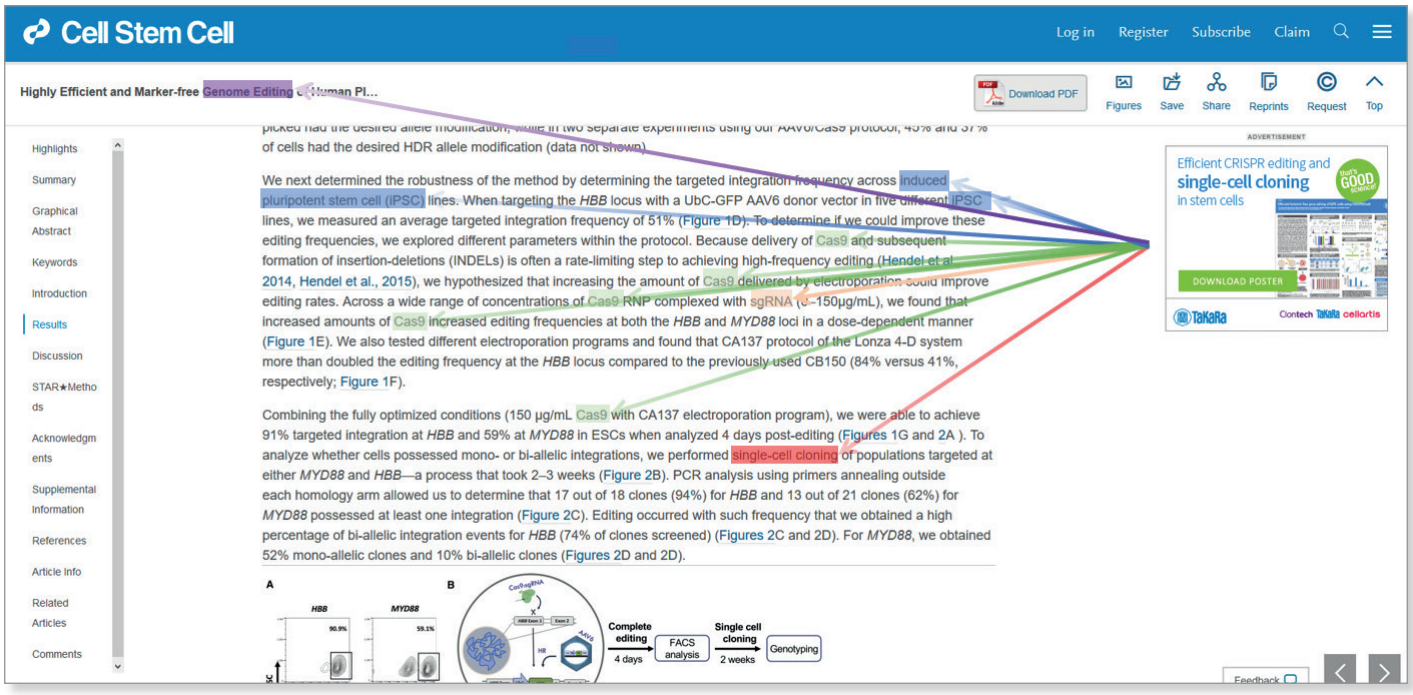
Rather than guessing where your messaging should land, our Marketplace Recommendations platform, now powered by PubGrade, reads every article in real time and matches it to keywords and desired target market information that you've supplied. This ensures that every reader is being shown your relevant product lines at every juncture of their research journey.

CellPress
Science that inspires

pubgrade

Advertising package includes

- Contextual ad campaign placing your ads alongside relevant premium content on cell.com
- Customized campaign with campaign optimization from PubGrade team
- Ability to alternate ad creative through duration of the campaign
- Comprehensive analytics

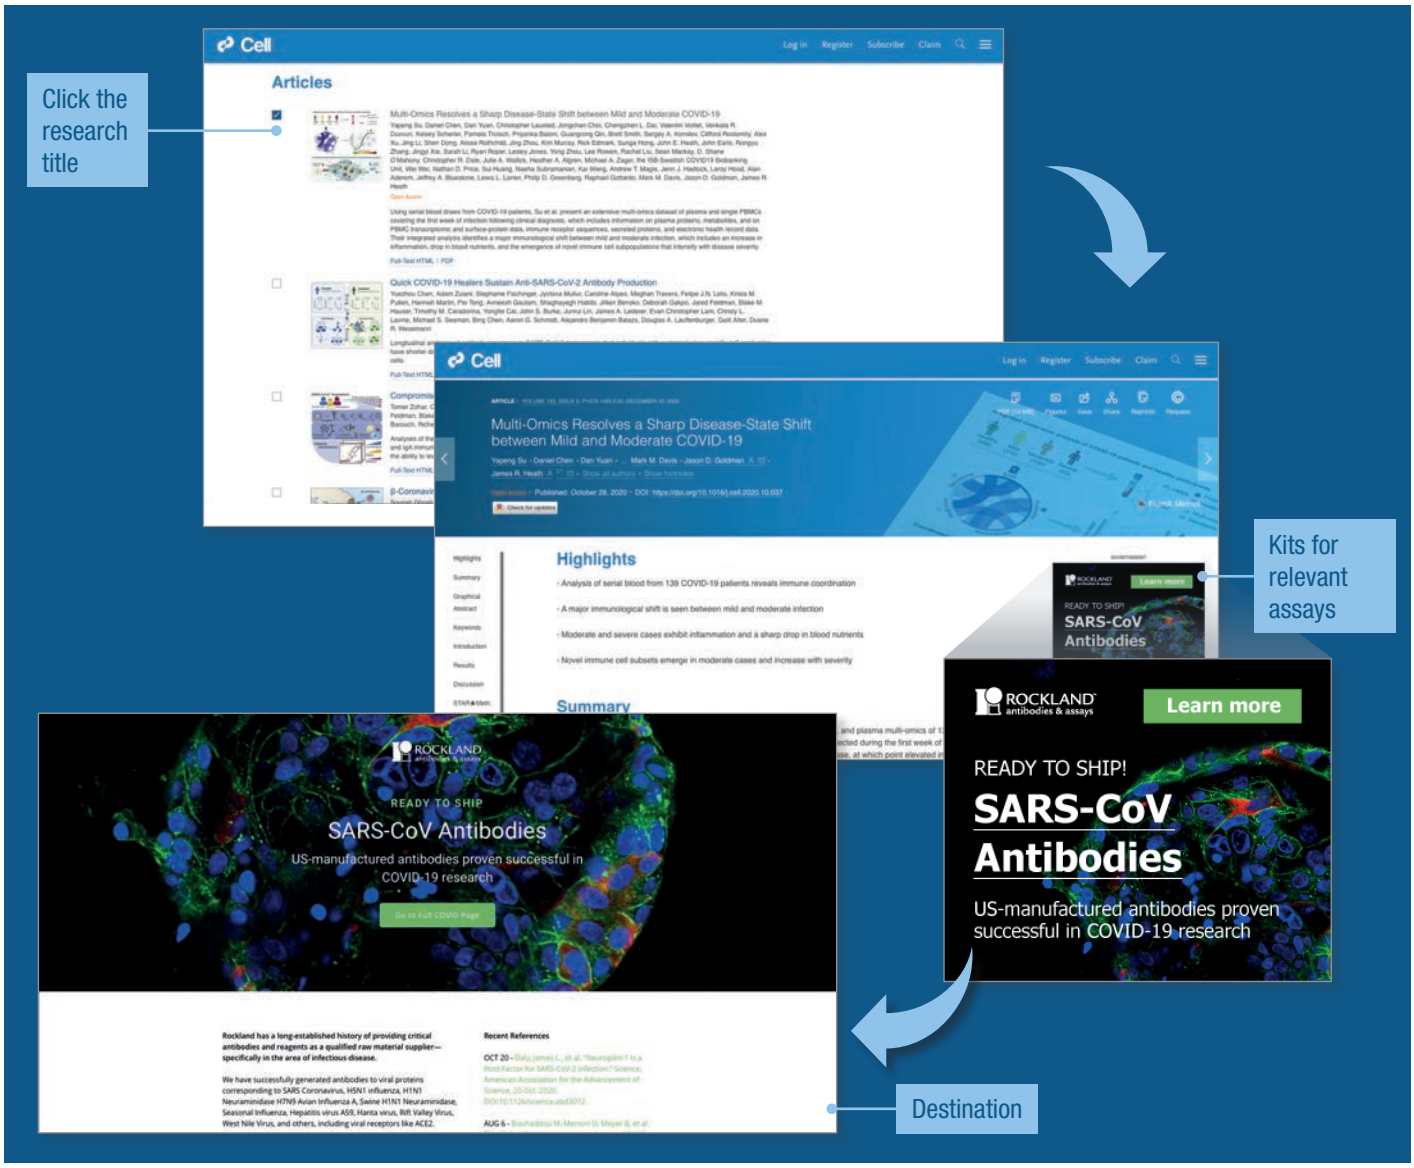


PubGrade

Incorporate your ads alongside relevant premium content on cell.com to connect with the reader in the most relevant moment. Each time a visitor views editorial content that is related to your organization/ad message, PubGrade delivers your ad, getting the right message to the right person at the right time.

Features

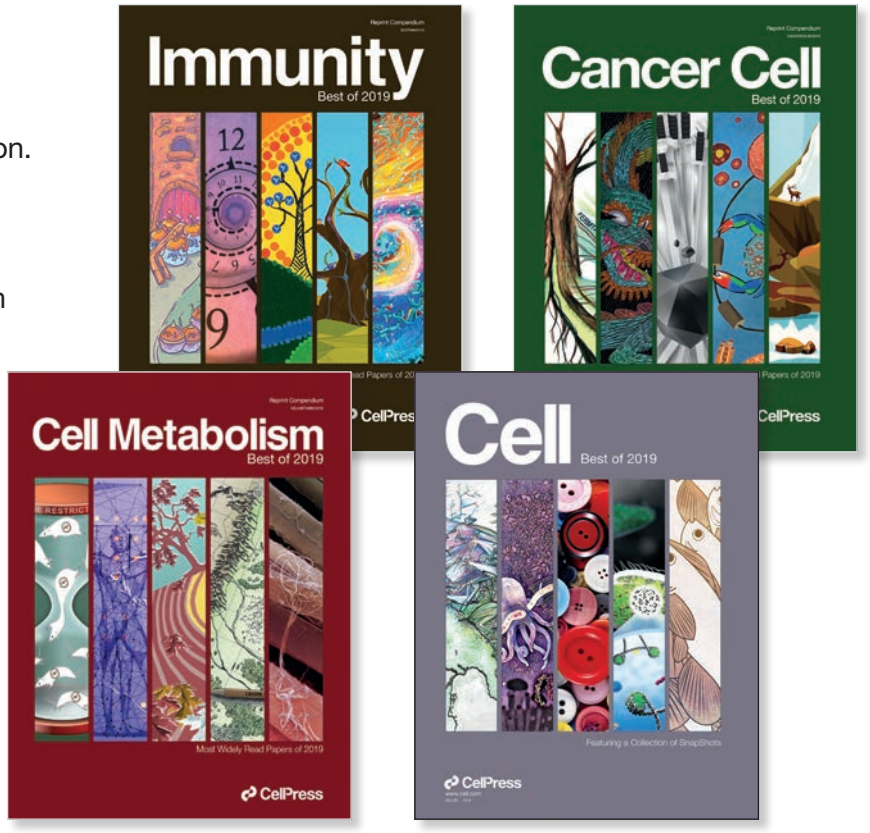
- Drive highly qualified traffic to your website from a robust content-rich environment
- Deliver a focused and targeted message alongside first-rate, peer-reviewed content
- PubGrade's systems analyze the content of Cell Press journals and matche them against large databases of relevant scientific concepts and client-provided keywords to drive traffic to your specifically chosen URL



Best Ofs

Align your brand with the best

The Best Of series is a Cell Press institution. These highlight collections bring together the top research and reviews from across our portfolio of high-impact journals. Papers in each Best Of edition are chosen based on citations and reader download data, ensuring a top-flight collection of research that your audience will love. Best Ofs are distributed at every major conference throughout the year and are made available as lead-generating digital editions as well.



Best Of editions are distributed to your audience at all of the following events:

Edition	Target audience	Tentative ad deadline
Best of Molecular Cell TECH	SLAS	04-Jan
Best of Biophysical Journal	Biophysical Society	02-Feb
Best of Cell Metabolism	ENDO	03-Mar
Best of Cancer Cell	AACR	22-Mar
Best of Molecular Therapy	ASGCT	23-Apr
Best of Immunity	AAI	21-Apr
Best of Cell Host & Microbe	ASM Microbe	14-May
Best of Cell Stem Cell	ISSCR	04-Jun
Best of Stem Cell Reports	ISSCR	04-Jun
Best of AJHG	ASHG	08-Oct
Best of Neuron	SFN	27-Oct
Best of Cell	ASCB	22-Nov
Best of Cell Reports	ASCB	22-Nov

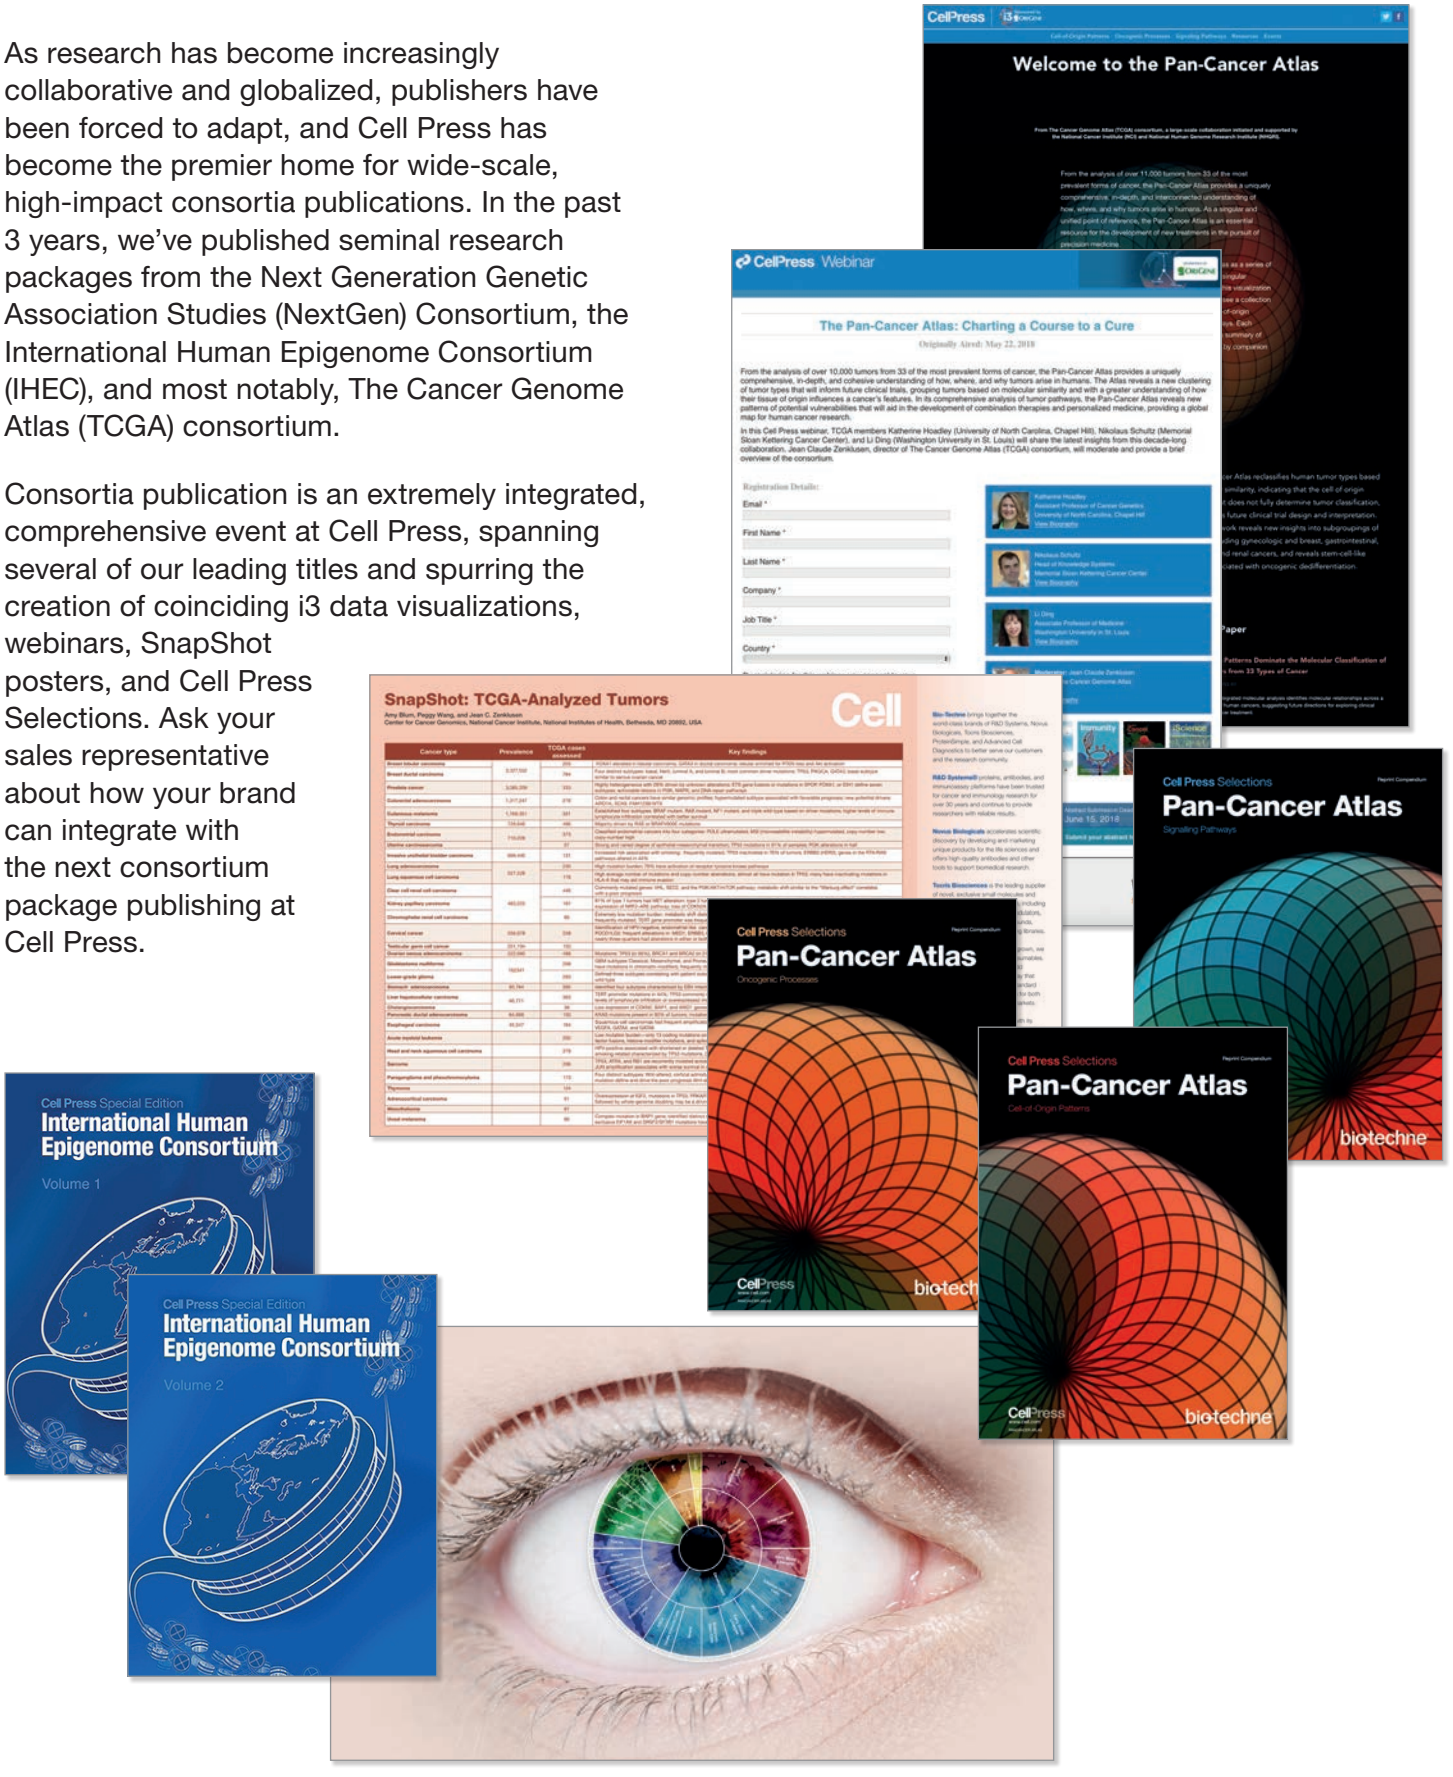
Consortia publishing

As research has become increasingly collaborative and globalized, publishers have been forced to adapt, and Cell Press has become the premier home for wide-scale, high-impact consortia publications. In the past 3 years, we've published seminal research packages from the Next Generation Genetic Association Studies (NextGen) Consortium, the International Human Epigenome Consortium (IHEC), and most notably, The Cancer Genome Atlas (TCGA) consortium.

Consortia publication is an extremely integrated, comprehensive event at Cell Press, spanning several of our leading titles and spurring the creation of coinciding i3 data visualizations, webinars, SnapShot posters, and Cell Press Selections. Ask your sales representative about how your brand can integrate with the next consortium package publishing at Cell Press.



Cell Press Selections

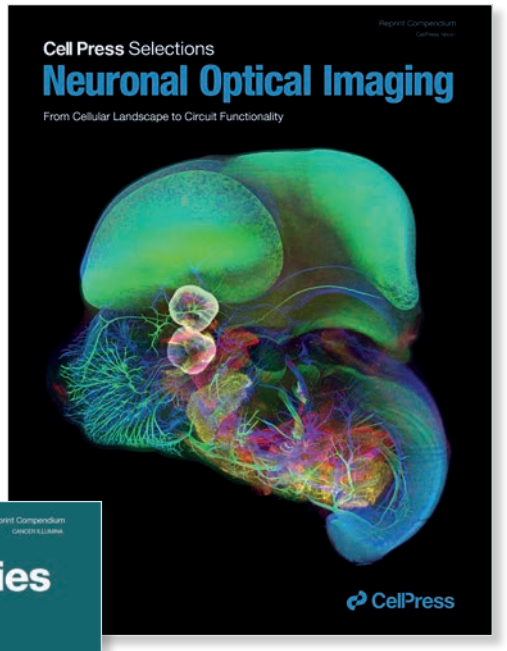
Choose your target, own the topic

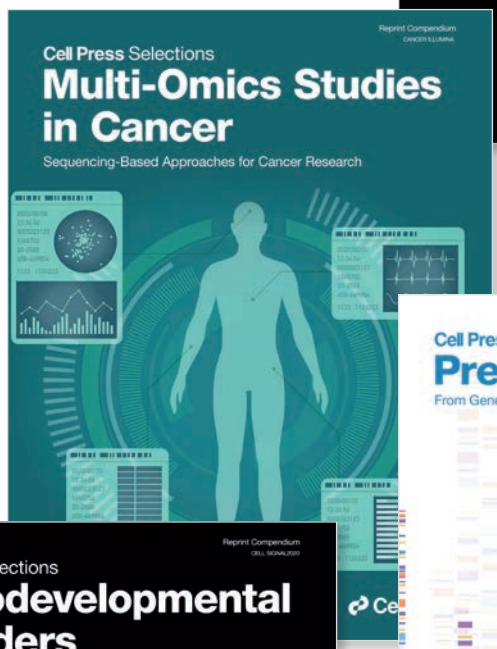
Align your product or brand with the highest-impact research and reviews on a topic of your choice. Selections are editorially curated reprint collections that highlight a particular area of science customized to highlight your brand's expertise through content. Selections come in both print and lead-generation digital formats and are designed to capture the most exciting science published across all our journals.

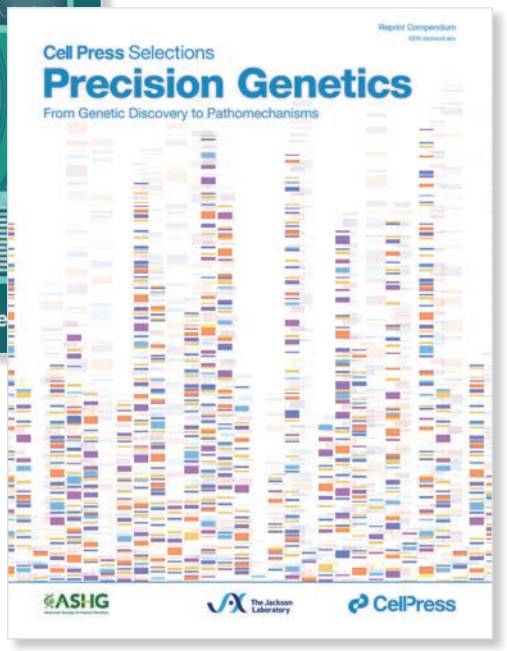
Each Selection is accompanied by an aggressive marketing campaign that drives the audience to your messaging, which includes:

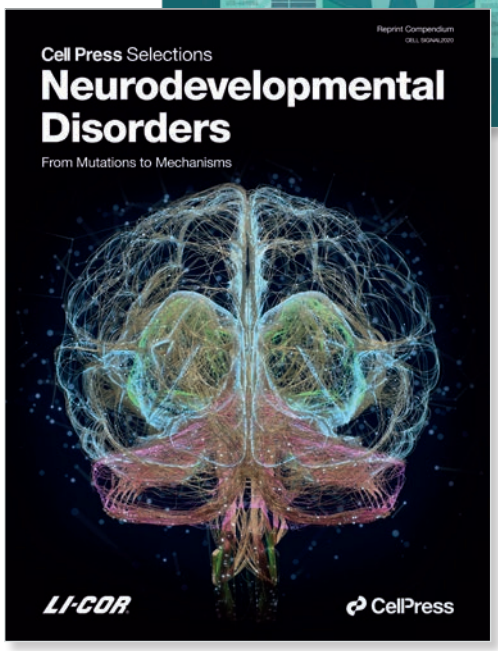
- Digital ads on cell.com
- Digital ads on relevant journal issue eTOC email alerts
- Social media posts across Facebook, Twitter, and LinkedIn
- Booth distribution at relevant conferences, LabLinks, and Cell Symposia
- Featured promotion on relevant journal homepages
- Optional – polybag Selection with journal issue to personal subscribers

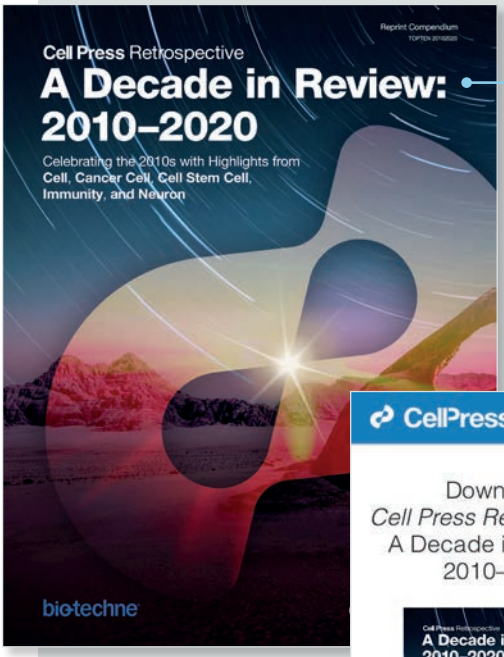
www.cell.com/selections





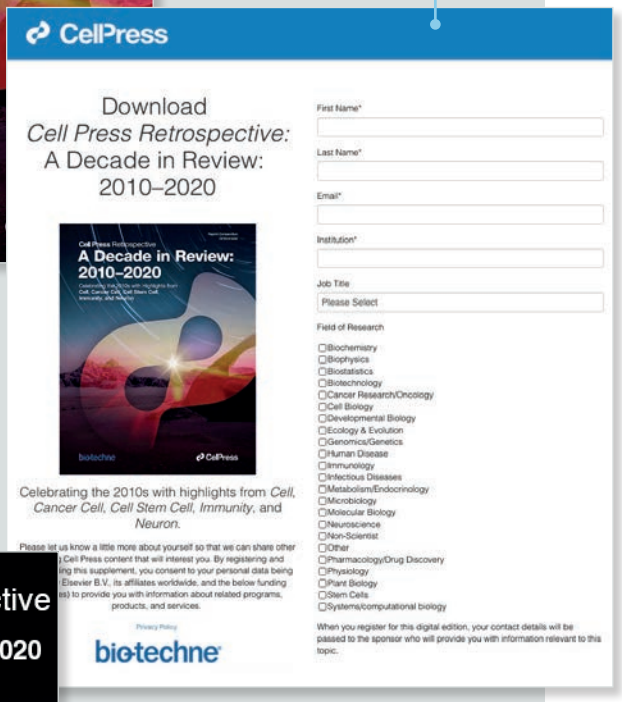






Print edition

Download form



Web banners

Digital edition

Features

- Exclusively branded compendium incorporating high-impact articles and reviews
- Print edition for promotional distribution or at exhibitions
- Fully interactive digital edition with lead generation
- Print copies provided to sponsor
- Optional branded SnapShot poster inserted into Selection

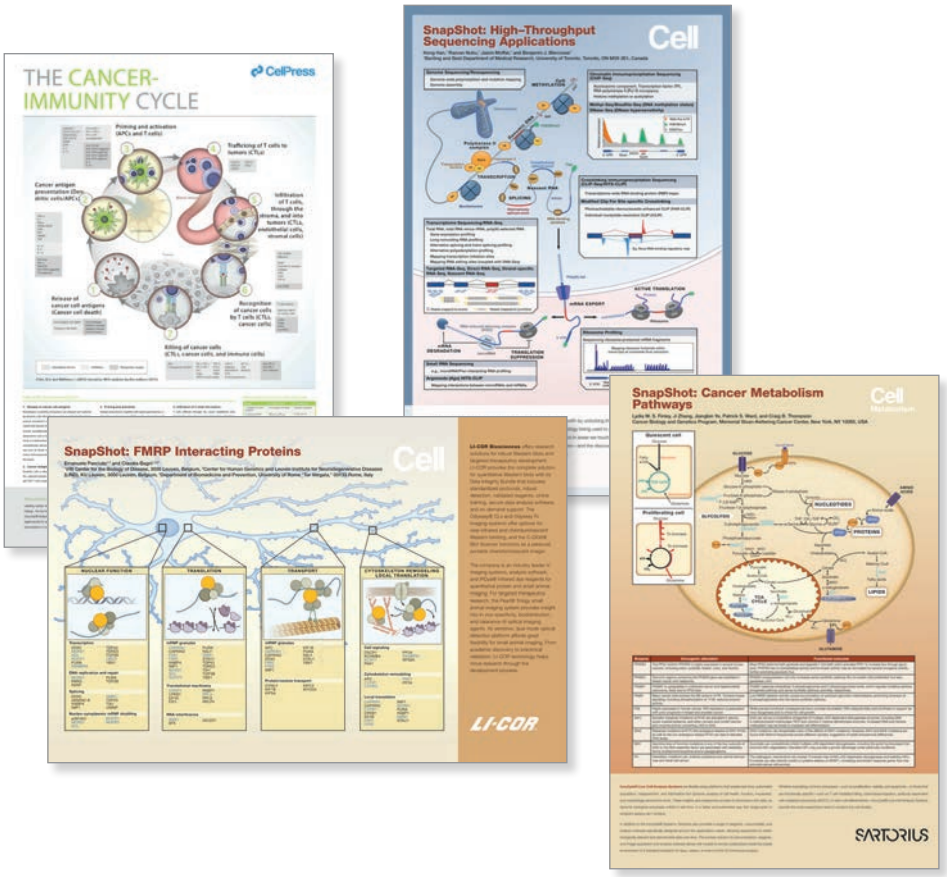
Custom capabilities

Anything is possible with Cell Press

Cell Press is your partner in custom publishing. Though we offer a multitude of off-the-shelf options for you to purchase, we're also keen to work with brands on developing new custom products that leverage our content and multimedia assets. Schedule a chat with your sales representative about how we can leverage our talents and audience to help serve your marketing needs.

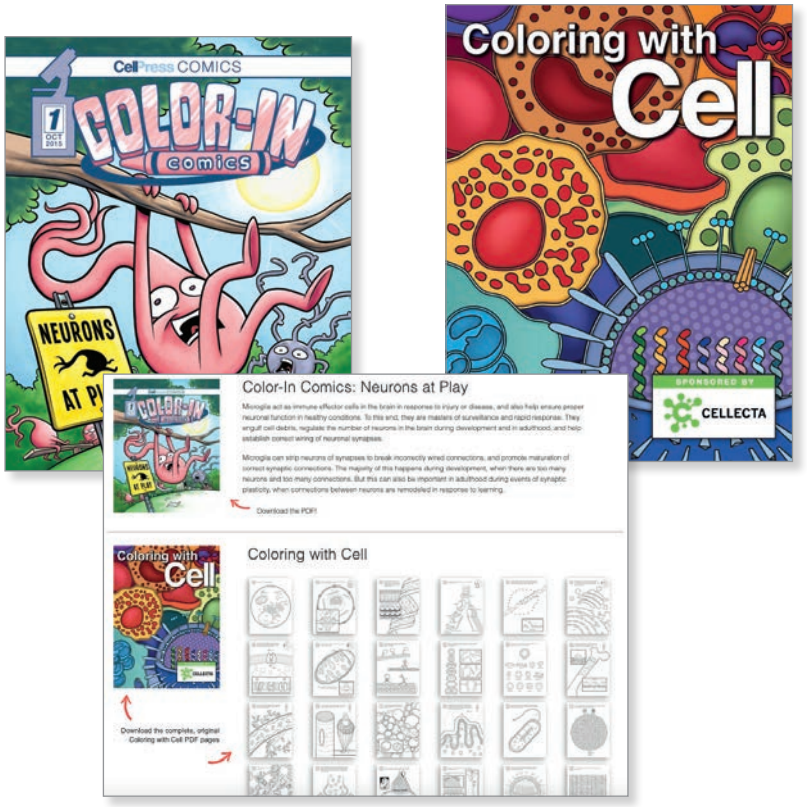
Posters

Our editors and art team will work together to create intuitively designed posters to showcase your brand alongside a relevant process or pathway that resonates with your target audience. Custom posters can be polybagged or blown in to any issue of a Cell Press journal or developed in conjunction with a Best Of, Cell Press Selection, or Special Issue. Time your poster with a key annual meeting to maximize the number of leads visiting your booth.



Calendars

The annual Cell Picture Show calendar is one of the most anticipated booth giveaways. Scientists love to pin these calendars up and mark down their key dates for the year. Do you want a spot on their wall? Talk to your sales representative about compiling a custom calendar that matches your business goals.



Coloring books

Several years ago, we created *Coloring with Cell*, a coloring book exploring Sammy the Cell's world of cellular biology. This became so incredibly popular with scientists, educators, and children that we're at it again! We are excited to bring a series of Color-In Comics to our readers. These comics will be graphical representations of a scientific process, left black and white for your coloring pleasure.

These books are our most popular giveaway at shows and events. Take an opportunity to have exclusive branding and show your support for science education in an alternate environment, connecting with the local community and educational establishments.

www.cell.com/comics

Websites

Own a corner of cell.com with a custom website. We created products like Cell Picture Show—a gallery series featuring striking images in cell, developmental, and molecular biology—and Cell Press Videos—a portal to all the greatest video content published in Cell Press journals—to drive eyes to our sponsors' products, and we can do the same for you. Talk to your sales representative about creating a custom visual, digital solution on cell.com.

Research Arc

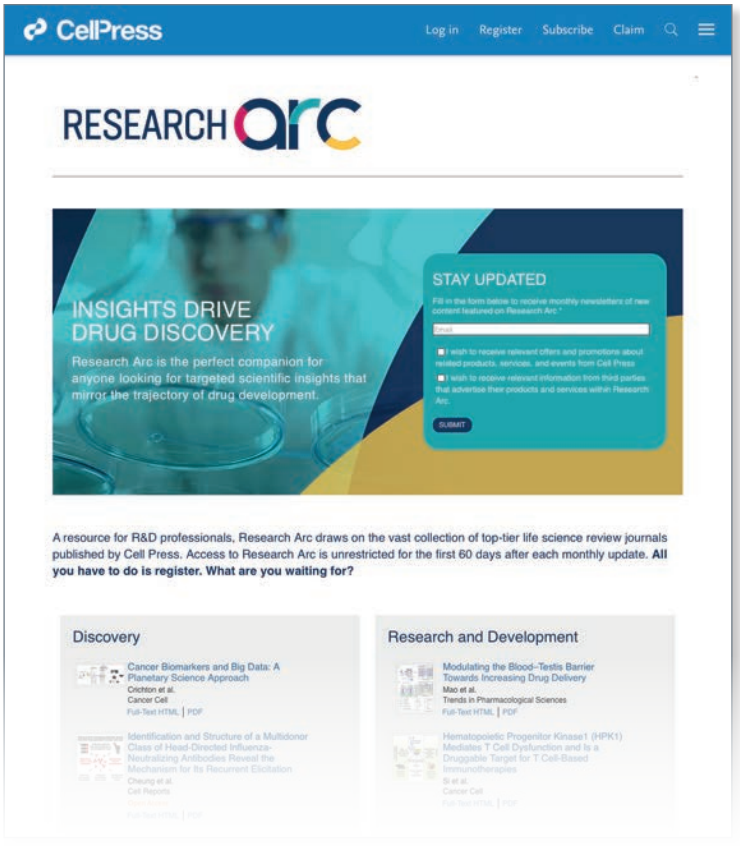
Your gateway to the biopharma market

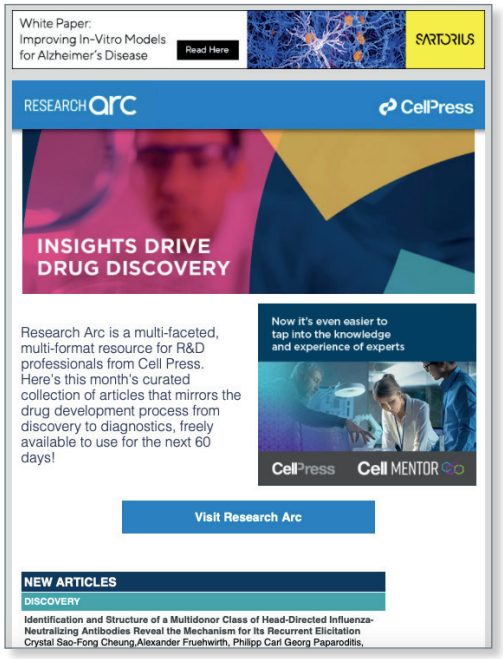
Research Arc is Cell Press's newest product, offering our sponsors access to R&D professionals in the biopharmaceutical community. Research Arc is the destination for up-to-date peer-reviewed research on the latest trends, delivery mechanisms, and policies that will affect the future of therapeutics.

Targeted to support innovation from discovery to diagnostics, Research Arc gives you access to the well-funded non-academic market.

Homepage

Research Arc's homepage is updated monthly with new papers, infographics, videos, and collections tailor-made for the R&D community. Papers are categorized based on which step in the drug development process they apply to (Discovery, Research and Development, Preclinical, Clinical Trials, Diagnostics, and Policy), making them easy to browse and digest.



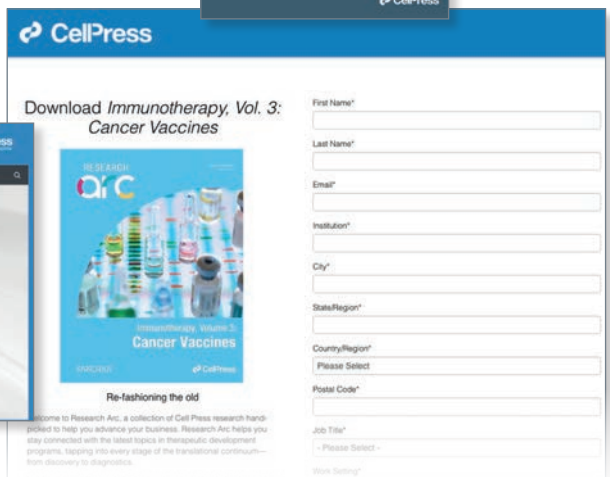


Email newsletters

R&D scientists are even more pressed for time than their counterparts in academia, so we made Research Arc subscribable. A reader simply inputs their email address, and they're delivered a monthly update of all the new content added to the homepage. Avg monthly subscribers: 13,653 – Avg open rate: 14%.

Digital collections

For researchers that prefer to browse by subject, Research Arc routinely publishes print collections focused on the most emergent topics and techniques translating from the bench to therapeutics. Print collections contain only need-to-know advances, and Cell Press is constantly releasing new volumes and distributing them for free at key meetings to keep R&D scientists updated on how academia is pushing industry forward.

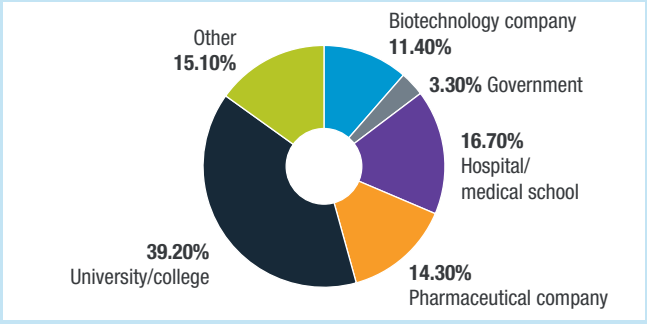


Research Arc audience report

Meet the users of Research Arc, the new resource for R&D professionals in biotech and pharma from Cell Press.

Work setting

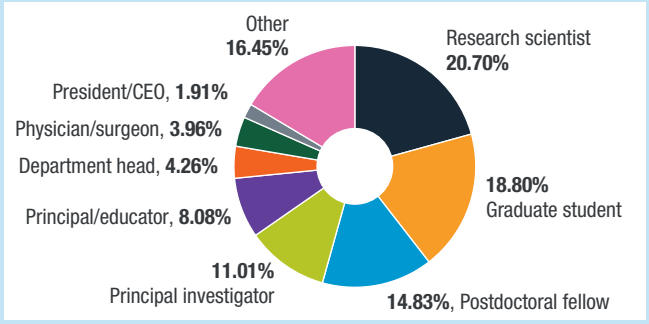
Research Arc's audience is 60.8% non-academic, giving you access to the well-funded biotech, pharma, and medical companies who use your products.



Job title

Research Arc reaches a translational audience of biomedical lab techs, pharma execs, policymakers, and physicians—not just PIs and postdocs.

Research Arc also attracts a multitude of science-adjacent business leaders such as capital investors, industrial scientists, and independent consultants.



i3 data visualizations

Bring your customers' curiosity to life

Information, interpretation, and insight: these are the three tenants that make up our data visualization product, i3.

i3 visualizations offer you the opportunity to captivate and delight your audience, allowing them to quickly navigate and absorb mounds of data in an instant. Using a d3 JavaScript library, Cell Press can create totally custom resources that bring customer-relevant data to life and keep users actively engaged.

We can transform any spreadsheet of data points into a beautiful, unique visualization. Users spend 12 times longer viewing an i3 than an average webpage, meaning your brand will get maximum exposure to a curious audience.

For the latest i3 visualization, visit

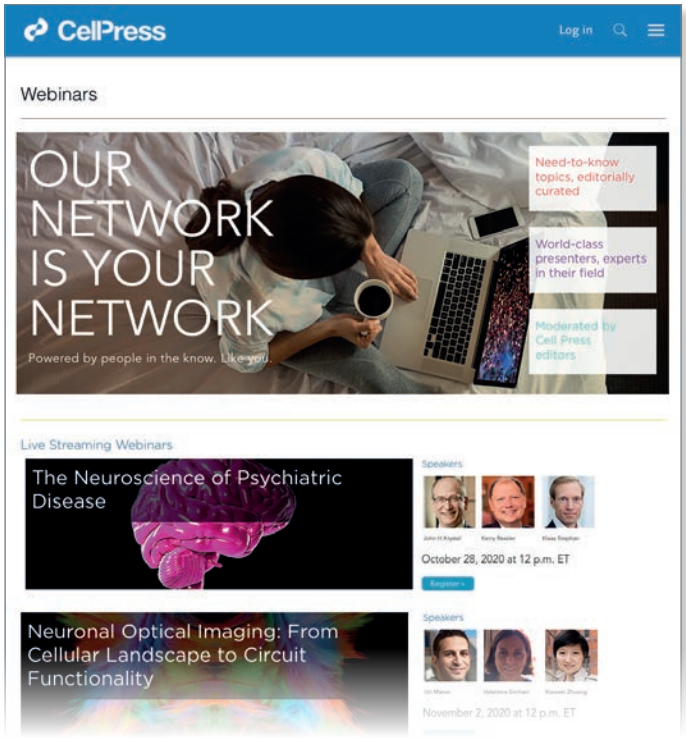
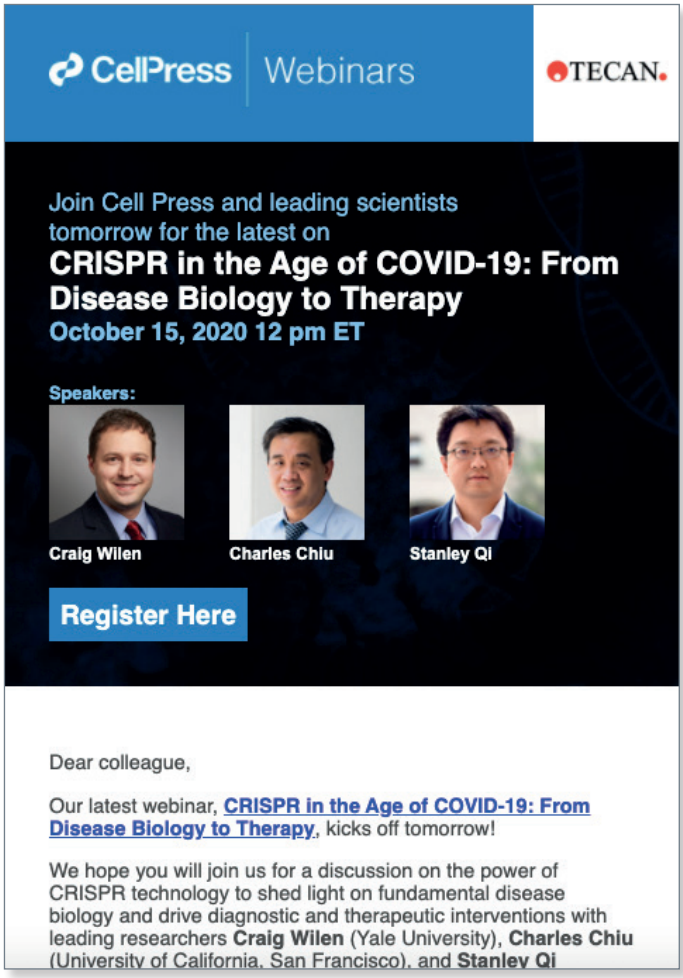
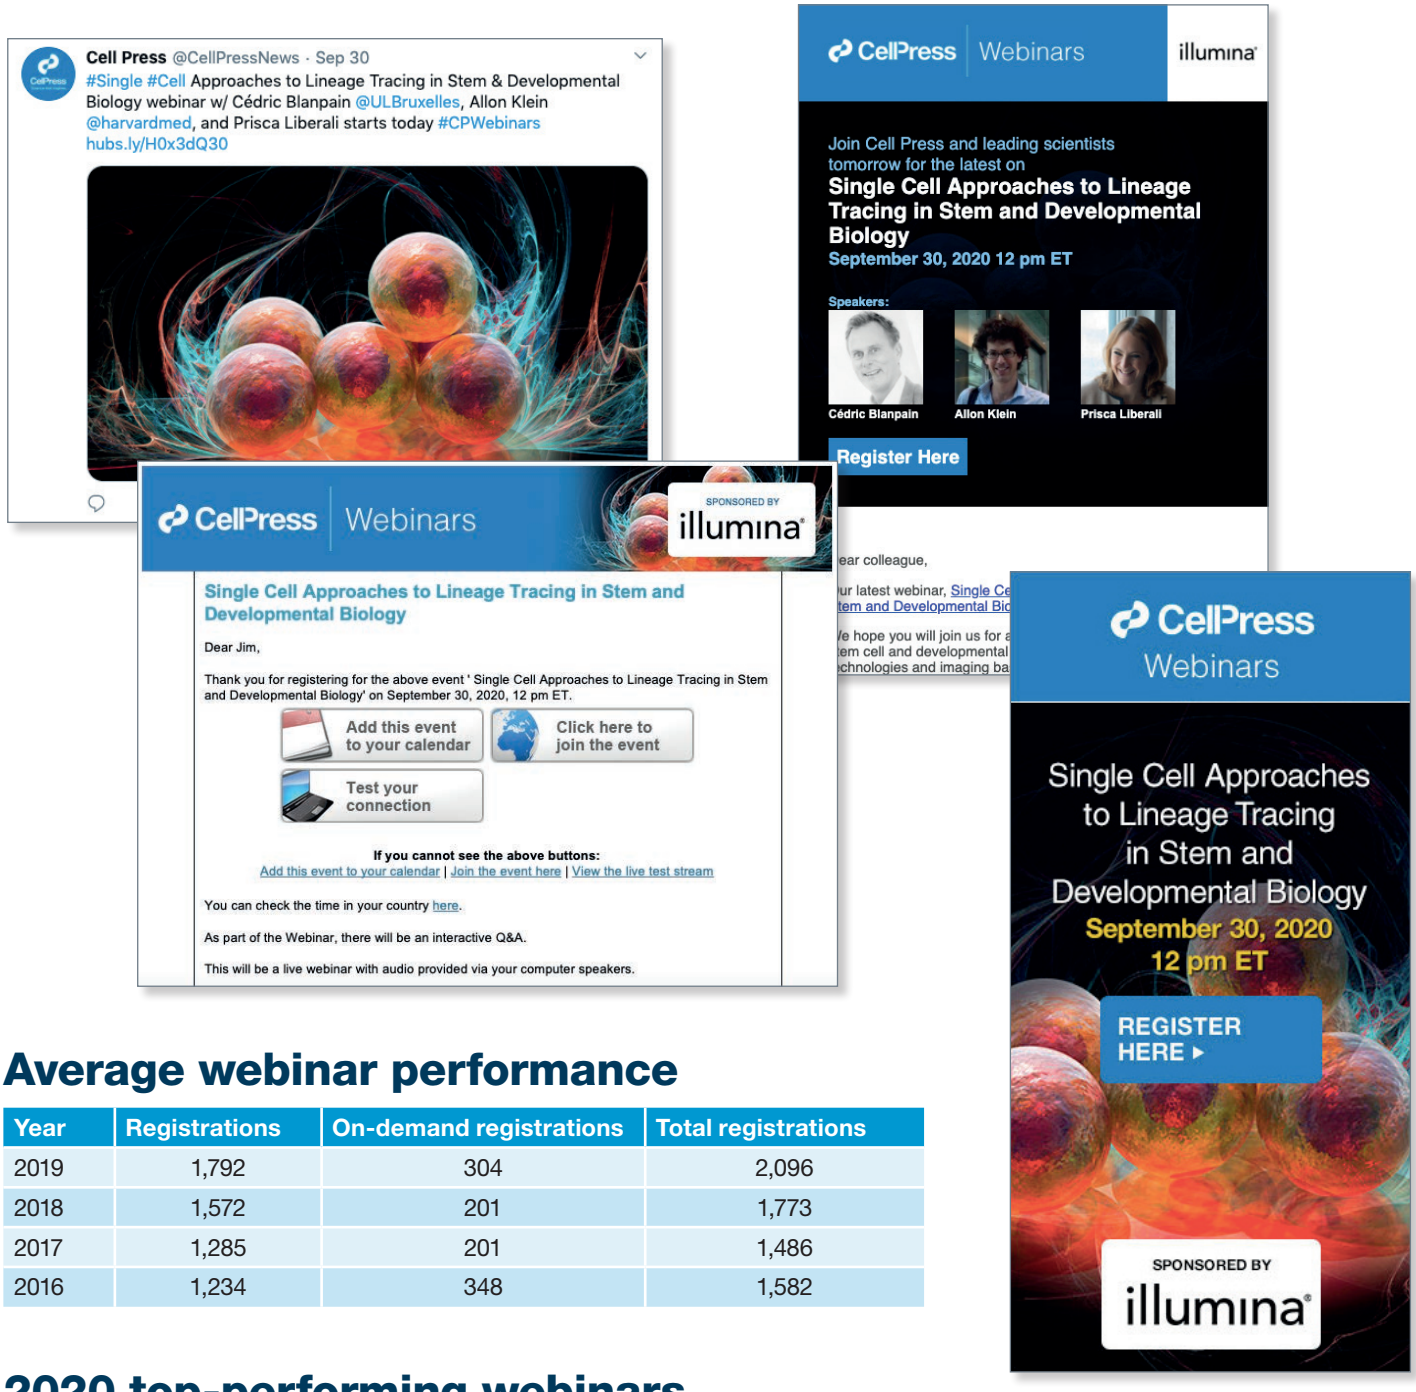
Webinars

Our network. Your audience. Together live.

Connect with our highly qualified audience of senior scientists and researchers through educational Cell Press webinars. For the scientist, webinars are free access to the top researchers in their field. For your brand, webinars are a pipeline of qualified, active leads. We will work with you to align speakers, content, and audiences to generate maximum impact. The recorded webinar then becomes available on demand at cell.com, meaning your audience will continue to grow long after the event takes place.







Average webinar performance

Year	Registrations	On-demand registrations	Total registrations
2019	1,792	304	2,096
2018	1,572	201	1,773
2017	1,285	201	1,486

Cell Press Conversations

An unparalleled brand opportunity

Arranged to bring the top minds in a given field together, Cell Press Conversations are unique branding and partnership opportunities. At one of the major scientific events of the year, we create an evening of impactful discussion and discovery by gathering a panel of the most revered and influential key opinion leaders (KOLs) to discuss the state of science.

The entire evening is turned into a networking and social event with unrivaled access to top names in the field, leading editors, and peers in an elegant environment of celebration and learning. Cell Press Conversations started in 2012 with Hallmarks of Cancer, and since then, they have become highly anticipated evenings in the annual conference cycle.

Contact your sales representative to discuss sponsoring a Cell Press Conversation at your target meeting.

Research journals

Cell Press: Science that inspires

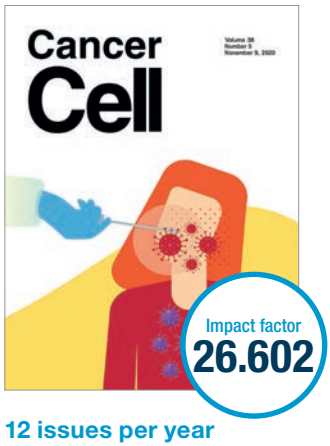
- 47% of our readers are the lead decision makers in their company or lab
- Consistently the highest impact factor in the biology category
- Discipline-leading journals in all life science verticals
- Increased translational content offerings
- Trends and review content provide invaluable insights

Relevance and impact factor

At Cell Press, we understand that impact factor is just one measure of journal performance, and you can find additional metrics at **cell.com/impact**

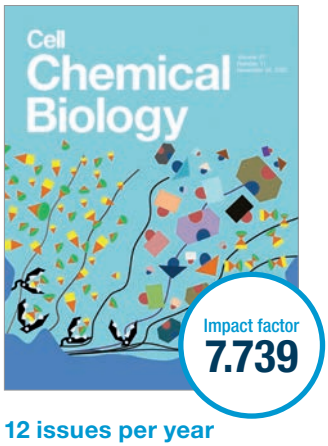
26 issues per year

- Molecular biology (transcription, RNAi splicing, RNA editing, DNA replication and repair, protein synthesis and editing, protein modification and degradation, and chromatin)
- Cell biology (cell cycle, subcellular organization, protein and membrane transport, protein folding and stability, and signal transduction)
- Systems biology
- Stem cells
- Human disease (infectious diseases including HIV and other viruses, cancer, and human disease genes)
- Developmental biology (differentiation and morphogenesis, organogenesis, sex determination, stem cell biology, apostosis, and embryology in all model organisms including plants, mice, fish, flies, chicks, and worms)
- Genetics and genomics (bacterial regulation, fly and worm genetics, and eukaryotic genomics)
- Proteomics
- Cancer research
- Immunology (T cell selection, lymphocytes and immunoglobulins, and somatic hypermutation)
- Neuroscience (learning and memory, neuronal guidance and connections, and synaptic transmission)
- Structural biology
- Microbiology
- Virology
- Physiology (receptors, hormone action, obesity, and lifespan)
- Evolution
- Biophysics
- Computational biology



12 issues per year

- Genetics, epigenetics, and genomic instability
- Cell signaling and communication
- Cell cycle and DNA repair
- Diagnostics (molecular profiling and pharmacogenomics)
- Telomerase and transformation
- Apoptosis
- Angiogenesis and metastasis
- Animal models
- Cancer therapy (rational drug design and small-molecule and biological-molecule therapeutics)

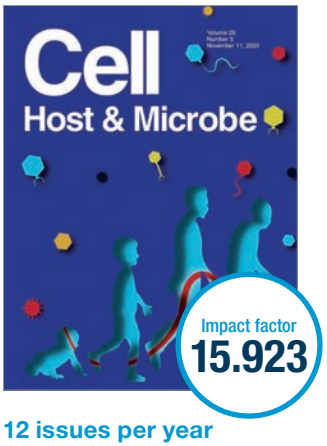


12 issues per year

- Chemical insights into signaling, catalysis, and gene expression
- Novel chemical and biological methods for molecular design, synthesis, and analysis
- Glycomics
- Chemical genetics
- Chemistry and biology of natural and unnatural biopolymers
- The use of natural and designed molecules as probes of cellular pathways
- Drug design
- The nature of molecular recognition in biological systems
- Novel procedures for the large-scale analysis of genes and proteins
- Functional and structural genomics
- Molecular basis of evolution

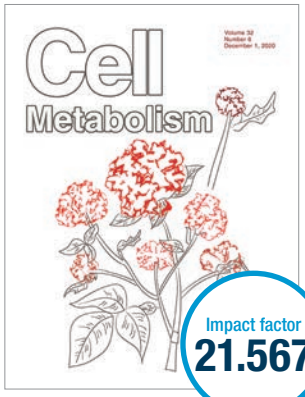
12 issues per year

- Human genetics
- Cancer genomics
- Precision medicine
- Genome technology
- Single-cell genomics
- Genome editing
- Computational genomics
- Functional genomics
- Genomes and comparative genomics
- Agricultural genetics
- Population and evolutionary genetics
- Genetics and society



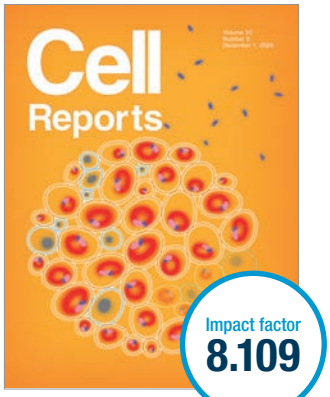
12 issues per year

- Molecular and cell biology of microbes
- Microbial pathogenesis
- Host cellular and immune response to microbes
- Immune evasion
- Therapeutics
- Evolution, epidemiology, and natural history of microbes
- Vaccine design, development, and trials
- Emerging pathogens



12 issues per year

- Diabetes
- Obesity
- Energy balance
- Cardiovascular disease
- Adipocyte and lipid biology
- Aging and stress response
- Mitochondria
- Hypertension
- Bone homeostasis
- Molecular endocrinology



52 issues per year

- Open access, online only
- High-quality papers across life science spectrum
- Focus on shorter, single-point articles, entitled Reports, in addition to longer articles
- The primary criterion for both types of formats is new biological insight

12 issues per year

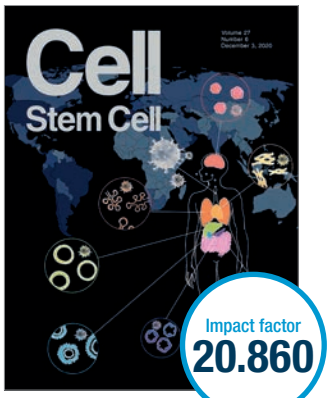
- Open access, online only
- Translational and clinical biomedical sciences
- Genomics, biomarker discovery, and developments in technology that contribute to diagnostics, treatment, and healthcare
- Focus on impactful, single-point papers called reports, in addition to longer articles and reviews

12 issues per year

- Innovations in sequencing
- Imaging technologies
- Genome editing
- Single-molecule approaches
- Computational methods
- Biotechnology
- Synthetic biology

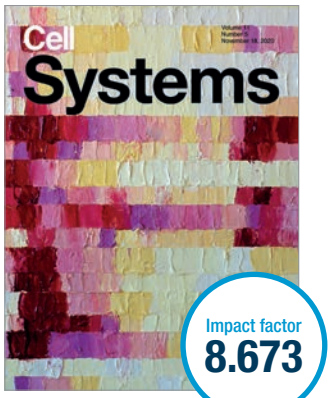
12 issues per year

- Open access, online only
- Showcases high-quality research from across the physical sciences
- Including chemistry, physics, materials science, energy science, engineering, and related interdisciplinary work
- Focus on impactful, single-point papers called reports, in addition to longer articles and reviews



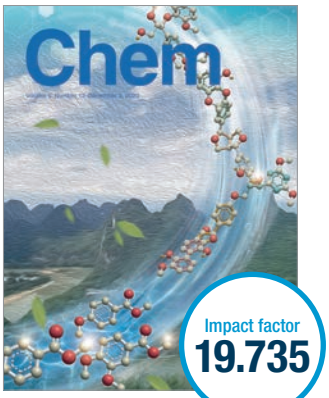
12 issues per year

- Embryonic stem cells
- Pluripotency
- Germline stem cells
- Tissue-specific stem cells
- Stem cell differentiation
- Epigenetics
- Stem cell genomics and systems biology
- Genome reprogramming
- Cancer stem cells
- Stem cell niches
- Stem cell-based disease models
- Nuclear transfer technology
- Bioengineering
- Drug discovery
- *In vivo* imaging of stem cells
- Therapeutic applications
- Regenerative medicine
- Clinical and translational insights
- Stem cell research policies, ethical issues, and technical or resource-based innovations



12 issues per year

- Systems at all scales
- Microbiology
- Cancer
- Immunology
- Plant biology
- Computational biology
- Genomics
- Proteomics
- Translational medicine
- Digital healthcare
- Biological engineering
- Systems and synthetic biology



12 issues per year

Chem publishes work from across the chemical sciences and at the interfaces between chemistry and other disciplines. *Chem* showcases how fundamental studies in chemistry and its sub-disciplines may help in finding potential solutions to the global challenges of tomorrow.

- Organic chemistry
- Inorganic chemistry
- Physical chemistry

- Atmospheric chemistry
- Food chemistry

24 issues per year

- Cell biology, including cell signaling, cell-cycle regulation, and apoptosis
- Developmental biology
- Cellular and systems neuroscience
- Neurobiology and behavior
- Cancer biology
- Gene expression, including genomics and proteomics
- DNA and RNA metabolism, including transcription and translation
- Immunology
- Ecology and evolution

24 issues per year

- Cell migration
- Cell polarity
- Cell proliferation
- Developmental roles of genes or pathways
- Differentiation
- Evolutionary relationships
- Genome-wide analysis
- Intracellular targeting
- Membrane traffic
- Morphogenesis
- Signaling pathways

12 issues per year

- Open access journal publishing research across life, physical, social, and medical sciences
- Sections include applied biosciences, clinical research, engineering, food science, microbiology, pharmacology, and social science

12 issues per year

- Immune cell development and senescence
- Signal transduction
- Gene regulation
- Innate and adaptive immunity
- Cytokines and inflammatory responses
- Autoimmunity and tolerance
- Infectious disease
- Tumor immunology
- Vaccine biology
- Transplantation biology
- Allergy and asthma

12 issues per year

- Polymer science

Environmental sciences

- Climate science
- Atmospheric science
- Ecology and evolution
- Hydrology
- Solid earth science

12 issues per year

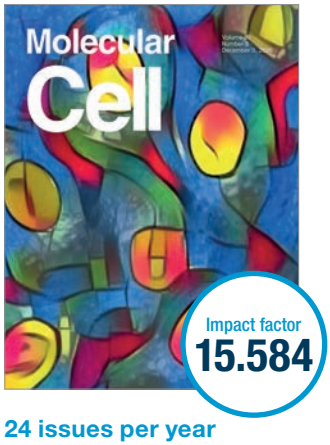
- Batteries and supercapacitors
- Biofuels and biotechnology
- Carbon capture and storage
- Energy access, security, and behavior
- Energy grids and networks
- Energy-harvesting devices
- Energy policy and economics
- Fuel cells and electrocatalysis
- Geothermal energy
- Hydrogen storage and energy
- Materials for energy systems
- Nuclear power
- Solar energy
- Techno-economic analysis and life-cycle assessment
- Transportation fuels
- Wave energy, wind energy, and hydroelectricity

12 issues per year

- Covers the general field of materials science, from nano to macro, fundamentals to application
- Transformative research related to fundamental structure, synthesis and assembly, properties, and performance of emerging material systems
- Novel characterization methods
- Materials of focus can be any state, any scale, any composition

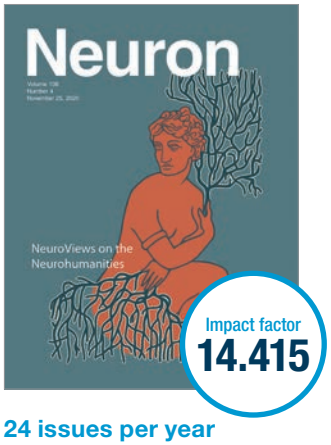
12 issues per year

- Clinical and translational research
- Aging and health-span interventions
- Biomedical engineering
- Cancer
- Cardiovascular and metabolic disease
- Genetics and cell-based therapies
- Health economics and public policy
- Human microbiome
- Immunology
- Infectious diseases
- Neurology



24 issues per year

- Gene expression and transcriptional and epigenetic regulation
- DNA replication, recombination, and repair
- RNA processing
- Translation
- Protein folding, modification, and degradation
- Signal transduction
- Cell cycle
- Cell death
- Systems biology



24 issues per year

- Developmental neurobiology
- Cellular and molecular neuroscience
- Synaptic transmission and plasticity
- Ion channel structure and function
- Behavioral and systems neuroscience
- Cognitive neuroscience
- Neurological and psychiatric disease
- Computational neurobiology

12 issues per year

- Climate change dynamics, mitigation, and adaptation
- Air, water, and soil pollution
- Global change ecology, biodiversity, and conservation
- Food and water security
- Renewable energy systems
- Land use, land use change, and forestry
- Governance, policy, and international relations
- Societal resilience, risk management, and sustainable communities
- Urban metabolism, the built environment, and societal well-being
- Sustainable production, consumption, and waste management
- Industrial and technological innovations for the Earth system

12 issues per year

- Open access journal across full breadth of data science
- How to best develop and run data science infrastructures, tools, and services
- Communicate solutions and best practices for data science algorithms and methodologies
- Discuss the human and environmental impact of decisions made using data science
- Develop new cross-disciplinary methods for efficient data analysis, processing, archiving, and use

12 issues per year

- Providing complete, authoritative, and consistent instructions on how to conduct experiments
- Reproducibility and transparency are the cornerstones for building on published research
- Primary criteria are usability and repeatability

12 issues per year

- Atomic resolution analysis
- X-ray crystallography
- Nuclear magnetic resonance spectroscopy
- Computational analyses, simulations, and predictions
- Electron microscopy
- Neutron scattering
- Hydrodynamics
- X-ray absorption spectroscopy
- Biochemical studies
- Biophysical analyses
- Fluorescence energy transfer
- Design, construction, and analysis of novel protein and RNA structures
- Catalytic activities
- Medium- to low-resolution structural analysis
- Single-molecule analysis
- Small-angle X-ray scattering
- Emerging methods in structure determination

Review journals

Trends in Biochemical Sciences

highlights recent advances in biochemistry and molecular biology through succinct articles. The goal of TIBS is to provide thought-provoking articles that stimulate new ideas.

Trends in Biotechnology

is the leading reviews journal in useful biology. The journal publishes reviews and perspectives on the applied biological sciences: technologies derived from or inspired by living systems.

Trends in Cancer

is a review journal publishing concise and engaging expert commentary articles that address key frontline research topics and cutting-edge advances in the rapidly changing field of cancer discovery and oncology.

Trends in Cell Biology

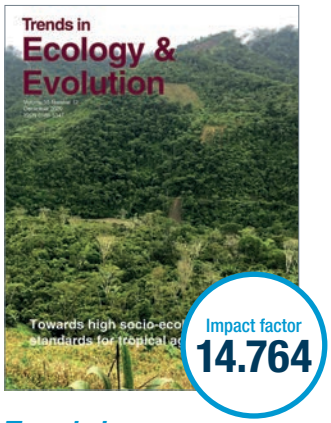
publishes review and opinion articles monitoring the breadth and depth of current research in cell biology. The journal reports on new developments, integrating methods, disciplines, and principles.

Trends in Chemistry

is the latest Trends journal and the first in the physical sciences. The journal offers thoughtfully designed review, opinion, and short articles covering the breadth of chemistry in an accessible, low barrier-to-entry manner.

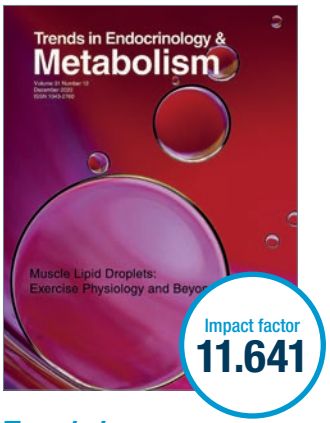
Trends in Cognitive Sciences

brings together research in psychology, artificial intelligence, linguistics, philosophy, anthropology, and neuroscience, providing a platform for the interaction of these fields and the evolution of cognitive science as an independent discipline.



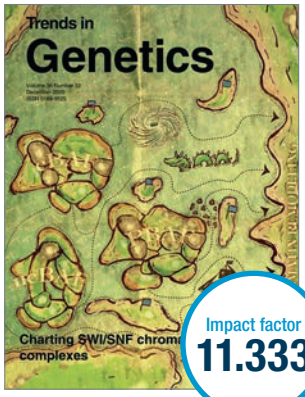
Trends in Ecology and Evolution

serves as an invaluable source of information in all areas of ecology and evolutionary science – from the pure to the applied and from molecular to global.



Trends in Endocrinology and Metabolism

publishes polished, concise, and cutting-edge topics covering basic, translational, and clinical aspects of metabolism and endocrinology. The journal covers areas from state-of-the-art treatments of diseases to new developments in molecular biology, methods, disciplines, and principles.



Trends in Genetics

publishes articles that provide an overview of the latest developments in the fields of genetics and genomics, encompassing various model organisms and themes that span molecular, cellular, clinical, and systems-level hierarchies.

Trends in Immunology

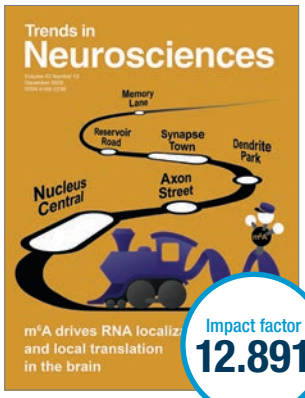
publishes broad-perspective, succinct reviews and hypothesis-driven viewpoints, monitoring cutting-edge advances in diverse areas of basic and clinical immunology, and offering a complete overview of the field.

Trends in Microbiology

is a leading reviews journal that aims to publish engaging and emerging trends across bacteriology, virology, and mycology, covering areas such as molecular biology, pathogenicity, biodiversity, and broad-range societal impact.

Trends in Molecular Medicine

offers a distinguished venue for concise reviews and commentaries that contextualize recent advances across the translational and clinical research continuum. Articles have clear implications for diagnostics, therapy, and disease prevention.



Trends in Neurosciences

is a monthly journal publishing inspiring reviews and commentaries across all areas of neuroscience. It serves as a voice for the neuroscience community, and highlights contributions of neuroscience to medicine and society.

Trends in Parasitology

is a highly regarded journal publishing reviews and short surveys in all disciplines of parasitology, covering medical and veterinary parasites of global importance, as well as their transmission vectors and susceptible hosts.

Trends in Pharmacological Sciences

covers the most exciting recent developments in pharmacology and therapeutics research. The journal broadly publishes content in pharmacology, pharmaceutics, and toxicology with keen interest in biopharma regulatory landscape, science policy, and bioethics.

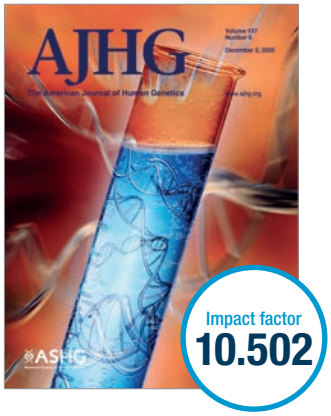
Trends in Plant Science

is the original and leading monthly review journal in plant science, featuring readable, thought-provoking, and cutting-edge reviews and opinions and providing overviews of current thinking and developments across all aspects of plant biology.

Society partner journals

Cell Press is proud to publish 12 journals on behalf of learned societies, including the American Society of Human Genetics, the American Society of Gene and Cell Therapy, the Biophysical Society, and the International Society of Stem Cell Research as well as partner institutions such as the Institute of Plant Physiology and Ecology, the Shanghai Institutes for Biological Sciences, the Chinese Academy of Sciences, and the Chinese Society of Plant Biology.

ASHG American Society of Human Genetics



12 issues per year

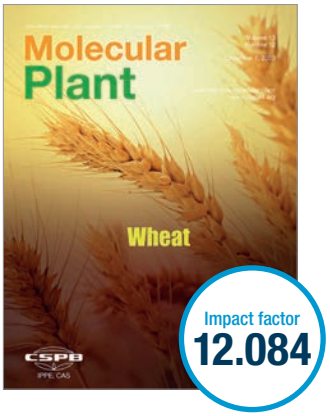
• Polygenic traits • Mendelian phenotypes • Genomic medicine • Functional genomics • Statistical genetics • Evolution and population genetics • Cancer genomics • Bioinformatic approaches

Biophysical Society

24 issues per year

• Channels, receptors, and electrical signaling • Proteins • Biophysical theory and modeling • Cell biophysics • Photobiophysics • Membranes • Spectroscopy, imaging, and other techniques • Muscle and contractility • Supramolecular assemblies • Bioenergetics • Nucleic acids • Electrophysiology

CSPB



12 issues per year

• Cellular biology • Physiology • Biochemistry • Molecular biology • Genetics • Development • Plant-microbe interaction • Genomics • Bioinformatics • Molecular evolution

ASHG American Society of Human Genetics

4 issues per year

• Mendelian phenotypes • Polygenic traits • Evolution and population genetics • Statistical genetics • Bioinformatics • Cancer genomics • Reproductive genetics • Molecular diagnostics • ELSI • Genetic counseling

Biophysical Society

12 issues per year

• Single molecule biophysics • High resolution molecular and cellular imaging • Signaling • Assembly of higher order complexes • Cryo-EM methods and analysis • Cell and tissue mechanics • Bioengineering • Computational modeling

CSPB

6 issues per year

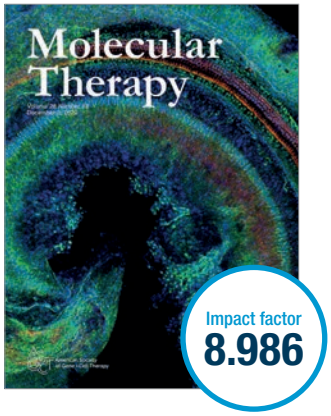
• Evolution • Ecology • Physiology • Biochemistry • Development • Reproduction • Metabolism • Molecular and cellular biology • Genetics and Genomics • Environmental interactions • Biotechnology and breeding of both higher and lower plants, as well as their interactions with other organisms throughout the biosphere

ISSCR
INTERNATIONAL SOCIETY FOR STEM CELL RESEARCH

12 issues per year

• Embryonic stem cells • Adult stem cells • Reprogramming to pluripotency and lineage conversion • Directed differentiation • Germ cells • Genetic and epigenetic mechanisms • Stem cells in development • Stem cell niche • Cancer stem cells • Disease modeling and drug screening • Stem cell therapy • Clinical studies in regenerative medicine • Tissue engineering and biomaterials • Imaging and diagnostics • Stem cell products, manufacturing, and quality control • Ethical, legal, and social issues

AMERICAN SOCIETY of GENE & CELL THERAPY



12 issues per year

Molecular Therapy is the leading international journal for research on the development of molecular and cellular therapeutics to correct genetic and acquired diseases, including but not limited to research on gene transfer and editing, vector development and design, stem cell manipulation, vaccine development, preclinical target validation, safety/efficacy studies, and clinical trials.

AMERICAN SOCIETY of GENE & CELL THERAPY

4 issues per year

Molecular Therapy – Methods & Clinical Development is an open access journal publishing top-quality, novel methods, as well as significant improvements to established research techniques in basic, translational, and clinical cell and gene therapy. Topics of interest include gene vector engineering and production, methods for targeted genome editing and engineering, technology development for cell reprogramming, and directed differentiation of pluripotent cells.

INNOVATION

4 issues per year

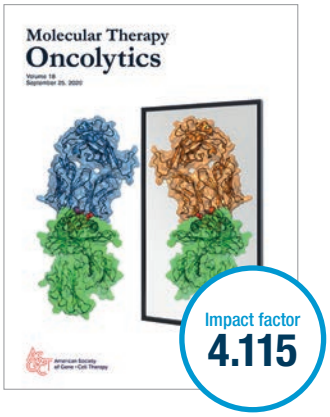
Promotes scientific application by publishing cutting-edge research and high-quality reviews across all scientific disciplines, such as • Physics • Chemistry • Materials • Nanotechnology • Biology • Translational medicine • Geoscience • Engineering

AMERICAN SOCIETY of GENE & CELL THERAPY

4 issues per year

Molecular Therapy – Nucleic Acids publishes research targeted to the advances in nucleic acid-based therapeutics to treat and/or correct genetic and acquired disease. Subject areas include development of therapeutics based on nucleic acids and their derivatives, vector development and design for the delivery of RNA-based therapeutics, and applications of gene-modifying agents.

AMERICAN SOCIETY of GENE & CELL THERAPY



4 issues per year

Molecular Therapy – Oncolytics is an international, open access journal focusing on the development and clinical testing of viral, cellular, and other biological therapies targeting cancer. While providing a unique forum for work in the burgeoning fields of oncolytic virotherapy, as well as T cell- and stem cell-based therapies, the journal will consider all top-quality research that employs innovative molecular and cellular approaches that target cancer cells for destruction.

Cell Symposia

The global network of scientists in academia, business, and government is targeted to generate a highly qualified audience from the Cell Press community. Our sponsors and exhibitors have the opportunity to network with some of the leading names in the field and to build brand awareness and partnerships with international delegates.

10 YEARS
Connecting the best and the brightest

These are challenging times, and it is our hope the pandemic will recede and international travel will be safe again. Therefore, we are proceeding with plans to hold as many of our Cell Symposia as allowed under current WHO and CDC guidelines. We are also identifying virtual exhibit and networking opportunities to allow continued engagement with our highly qualified readership.

Use your presence to:

- Increase brand awareness via both onsite/ virtually and pre-event exposure
- Enhance relationships with existing customers and meet new ones
- Generate sales leads and educate the market
- Demonstrate products or services and launch new products
- Seek international partners and form new alliances
- Elevate your company profile within the community
- Increase visibility in focused markets
- Communicate your message to a highly qualified scientific community

For further information on sponsorship and exhibition opportunities, please contact your sales representative. See back of media kit.

1/2 page vertical	–	3.25" x 9.25" (82 mm x 235 mm)	–

Welcome to ADS4ELSEVIER!

Ads4Elsevier is a web-based submission site for display advertisers...

- easily accessible from MAC or PC
- supports a host of web browsers*
- allows convenient access—at any time

** for optimal experience, please use Chrome, Firefox, or Safari*

Getting started

1. Go to **www.ads4els.com**
2. Create your account
3. Select Submit a New Ad
4. Search for your journal by title or acronym
5. Enter your ad details
6. Upload your ad file and check the dimensions against the space reserved
7. Review your pre-flight report (sent within 1-2 minutes)
8. Approve your ad, or make necessary fixes and resubmit

Added benefits:

- Select Pickup Ad: Your ad will be available for repeat (pick-up) in future issues
- Print specs for all titles, additional help, and Elsevier contact information
- My Digital Ads feature: Provides a history of all your insertions—new & pick-ups
- Thumbnails of each ad for easy identification
- At-a-glance details of your submissions and access to your original digital files

Need help?

For general submission queries or questions related to specific journal specs or deadlines, please contact your Elsevier advertising sales coordinator or sales representative.

For first-line technical support or system assistance, please contact Anne Colombo (a.colombo@elsevier.com).
