1 January 2012

To: All Corporate Operators,

Ref. Honeywell Publication A65-8200-001-22

This is our new 2012 issue of the Worldwide Exchange/Rental Program catalog for Corporate Operators (SPEX).

The 2012 Catalog is effective 1 January 2012.

Please be aware that the Worldwide Exchange/Rental Program for Corporate Operators catalog can also be accessed with the following web site:

<http://www.honeywell.com/sites/aero/SPEX.htm>

Honeywell also offers customers the opportunity to access our web portal at <http://www.myaerospace.com> to check SPEX pricing and availability, process SPEX orders, check order status, and to also access the Worldwide Exchange/Rental Program catalog for Corporate Operators.

We thank you for using the Worldwide Exchange/Rental Program to support your requirements.

Sincerely,

Anthony Brancato
Vice President
B&GA Aftermarket

Process for Supporting Battery and Fan Replacements

Honeywell has implemented a new process for Corporate operators and General Aviation to order field replaceable consumable products, such as batteries or fans for Avionics end item products. Operator's or Service Centers may now contact Honeywell Customer Support Operations (CSO) to order replacement items for Avionics LRU's using the same process used to order SPEX LRU's. For LRU's covered under New Product warranty, SPEX warranty, Flight Hour Agreement, or the Honeywell Avionics Protection Plan (HAPP), the items will be provided at no charge. Standard spares parts pricing will apply in all other situations.

Honeywell repair shops will follow the same guidelines when invoicing for the replacement of a battery or fan during the repair of a Corporate operator owned LRU.

This new process will save LRU removal and replacement time when only a battery or fan is required. **There will be no requirement to return a battery or fan core for these specific items.**

Contact Honeywell's Customer Support Operations	
<u>Order Entry</u> Within U.S.A./Canada (Toll Free): Within Europe (Toll Free): Within Europe, Middle East, Africa, & India: From Other International Locations:	<u>Telephone</u> 1-800-601-3099 00-800-601-30999 +420-234-625-500 1-602-365-3099

Contact Honeywell Customer Support Operations to order these consumable items. Please provide the same information as requested on page 3 of this catalog when ordering these items, to allow Customer Support Operations to validate coverage. **No core return is required.**

The following field replaceable components are offered under this new process:

Consumable PN	Description	Used in End Item PN	End Item Description
7020116-1	Battery	7018879-xxxxx 7017000-xxxxx	NZ-2000 IC-615
7014664-902	Battery	7017300-xxxxx	IC-800
700-1693-001	Battery	967-0902-001	MDAU
7023313-2	Fan	SATCOM Tray	SATCOM Tray
7024282-907	Fan	7024404-1913 7024404-1914 7031629-1950	MAU MAU MAU
7024282-908	Fan	7024404-1913 7024404-1914 7031629-1950	MAU MAU MAU
7029795-905	Fan	7029782-1912 7029782-1913 7029782-1920 7029782-1956 7031631-1951	MAU MAU MAU MAU MAU
7029795-906	Fan	7031631-1950	MAU

Note: 1. Batteries are categorized as Hazardous Material, and Honeywell is required to follow special shipping processes for these items.

2. The items covered under New Product warranty, SPEX warranty, Flight Hour Agreement or HAPP will be shipped prepaid. All other shipments will be freight collect.

HONEYWELL EXCHANGE AND RENTAL PROGRAM FOR CORPORATE OPERATORS AND GENERAL AVIATION

The Honeywell Exchange/Rental program for Corporate Operators and General Aviation provides an extensive LRU (Line Replaceable Unit) Exchange and Rental service, which complements a worldwide network of support centers. An inventory of more than 19,000 spare components insures that your Honeywell equipped aircraft will be returned to service promptly and economically. This is available both during and after warranty.

The aircraft owner/operator is responsible for ensuring that units provided through this program have been approved for installation in their aircraft.

All articles are returned to Reconditioned Specification when they are processed through a Honeywell repair facility. All articles are inspected to verify proper workmanship and to certify that the article meets all controlling documentation. Refer to page 89 for Reconditioned Specification criteria. *All Exchange units are updated with the latest SPEX required performance reliability MODs on an attrition basis while in the repair cycle.*

BASIC PROCESSES

Exchanges - Upon receipt of an Exchange request, Honeywell will ship a serviceable unit to the designated Dealership or Service Center and the Customer will be responsible for returning the Core unit within the following guidelines.

1. Consistent with our standard delivery terms, title to Exchange unit will pass to the Customer when Honeywell places the Exchange unit at the disposal of the Customer at Honeywell's facility.
2. The Customer must send the return Core unit, to the designated Honeywell Customer Support Center.
3. Honeywell assumes title to the returning Core unit at the moment the Exchange unit is placed at the disposal of the Customer at Honeywell's facility. However, the returning Core unit will remain either with the Customer or the Dealer performing the required maintenance, so reasonable custodial care must be taken with the Core to prevent further damage.
4. Return units must be received within 14 or 21 (intra-country or inter-country respectively) calendar days from the date Honeywell shipped the Exchange unit to avoid incurring late return penalty charges. See page 10 for details.

Rental - Upon receipt of a Rental request,

1. Honeywell ships a serviceable unit to the designated facility.
2. The Customer then ships the failed customer owned unit to a Honeywell Authorized Support Center (HASC) for service.
3. Once the returned unit has been serviced it will be returned to the designated facility.
4. Once the customer owned unit has been Returned to Service (RTS) it can be reinstalled by an Authorized Dealer.
5. Immediately after re-installing the repaired unit, the rental unit must be returned to the designated Honeywell Customer Support Center within 14 or 21 (intra-country or inter-country respectively) calendar days from the date Honeywell shipped the customers returned unit. Late return of rental units will incur additional late return penalty charges, please refer to page 11 for details.

NOTE: Refer to page 10 and 11 for the Exchange and Rental Core Return Policy.

Worldwide Exchange/Rental Program For Corporate Operators

The LRU Exchange/Rental service is limited to those part numbers included in the price list section of this catalog, as amended. Any part number with the designation of N/A under the Exchange or Monthly Rental price column indicates that particular part number is NOT AVAILABLE for either Exchange or Rental respectively. This means that due to inventory limitations, some units may be available under one part of the program and not the other.

The exchange return unit part number must be identical to the part number of the unit provided by Honeywell under this program. Exceptions may be granted by express written consent of Honeywell.

Exchange and rental prices are based upon the requirement that the return unit must be in repairable condition and be an acceptable core. An acceptable core is a unit that has been repaired by a Honeywell, Honeywell-authorized, or end user repair facility. An end user repair facility is defined as the facility used to repair the unit and is owned by the end user. **Honeywell reserves the right to refuse acceptance of any unit that has been subject to damage beyond normal wear and tear, unauthorized repair actions or inept repair attempts.** If such damage is discovered during repair and recertification, the customer will be contacted within 90 days after receipt of core, and informed of the damages. If Honeywell is able to repair the product, the customer will receive a quote for the additional repairs. The customer will have one week from date of notification to respond to Honeywell and advise whether they intend to accept the additional charges, or agree to provide a different unit with the same PN. If the return unit is non-repairable or the customer is unable to supply another unit as a core return, the customer will be responsible to pay the core value. This applies to units covered under warranty or maintenance contracts.

All exchange units must be installed in the aircraft tail number provided or a new aircraft tail number must be provided to Honeywell Customer Support Operations (CSO). Honeywell reserves the right to charge the customer the purchase value of the unit if the exchange is not installed in the aircraft provided.

Beyond Economic Repair (BER)

A component, an item of Equipment or an LRU will be considered BER when the work or repair costs for that component, item of Equipment, or LRU exceed more than 65% of the Honeywell catalog price to purchase a new component, item of Equipment, or LRU.

Honeywell may not accept units, which have been involved in an accident incident, or subject to severe stress such as fire or fluid ingress. Customers, which return cores that have been subjected to such conditions, may be invoiced at the Core Price listed in this Catalog.

NOTES:

1. The inventory assigned to support the Exchange and Rental service, outlined in this catalog, is not intended to be used in support of MOD update programs.
2. Exchange units should not be issued to an aircraft, which has not been delivered to the aircraft owner. New installation failed units should be repaired at the nearest Honeywell authorized repair facility and returned to the aircraft.
3. Simulator support will depend on availability of LRUs listed in this catalog.

Support of Obsolescence Products

The SPEX program has been designed and structured to support products that are in current production, have reached their maturity, and older units that are still supportable. There comes a time in a product's life-cycle that the affordability to support a given product is no longer feasible. Customers may find the SPEX program supporting a particular product one-year and not the next. Not with standing, should parts obsolescence make it impractical and unreasonable to repair a LRU, then Honeywell shall suggest alternative methods to support the Operator, such as replacements or upgrades. The Parties shall mutually agree on the solutions and commercial aspects thereof. If a customer experiences a situation of this nature, Honeywell recommends contacting your sales representative for possible upgrades.

ORDER PROCEDURES

- **Established Honeywell accounts are required prior to placing orders through the SPEX program. If an account has not been established prior to placing an order, customers can go through an OEM, established Honeywell dealer or service agency, or complete the credit application form on page 79.**

Bailment Agreement

In the event the customer requires a loan unit from Honeywell, based upon availability, the loan unit will be provided under the terms of Honeywell's standard Bailment Agreement.

Agreement

Placing an order and/or providing a purchase order number will be considered an agreement on the caller's part to comply with Exchange/Rental program policies, procedures, and conditions identified in this catalog. The purchase order provided covers Exchange/Rental transaction and any extended use fees.

NOTE: By placing an order with the SPEX Program, customer is agreeing to return an Exchange Core within 14 or 21 (intra-country or inter-country respectively) calendar days, in accordance with the core return policy listed on page 10, to avoid extended use fees.

Extended use fees are also applicable to customers receiving exchange or rental support under warranty or a maintenance contract.

When contacting Honeywell for service under the Exchange/Rental program, the following information regarding the unit and the aircraft is required prior to shipment:

- Complete part number with dash number of return unit
- **Complete serial number of return unit**
- Aircraft type, serial number and registration number
- Aircraft owner
- Reported complaint with return unit
- Service requested (Exchange or Rental)
- Ship to and billing addresses
- Final destination and end user
- Type of contract
- Purchase order number
 - For shipments with a final destination outside the Continental United States, Alaska or Hawaii, in compliance with U.S. export policies, a hard copy P.O. is required to be received by Honeywell prior to shipment.
 - For shipments with a final destination inside the Continental United States, Alaska or Hawaii for non-U.S. registered aircraft, in compliance with U.S. export policies, a hard copy P.O. is required to be received by Honeywell prior to shipment.
 - For shipments with a final destination inside the Continental United States, Alaska or Hawaii for U.S. registered aircraft, Honeywell requests a hard copy P.O. be submitted at time of order or within one (1) business day.
 - Hard copy P.O.'s can be emailed or faxed to: CRC-SPEX@honeywell.com ; +1-602-822-7272.
- Is return unit IN WARRANTY?
 - If yes, type of warranty (NEW PRODUCT or Exchange) and date warranty started
- Is return unit covered under a Honeywell or OEM Maintenance Program?
 - If yes, type of contract

Worldwide Exchange/Rental Program For Corporate Operators

- If return unit is NOT IN WARRANTY, the following is required:
 - Billing address
- Is return unit covered under a Maintenance Contract?

NOTES:

1. If warranty information, failed serial number (unless order is for an Export Controlled item – see section below) and defect of the failed unit cannot be obtained at the time the order is placed, Honeywell will not delay shipment, but is required to follow through with the customer to obtain the information in a timely manner.
2. **Special Requirements for “Export Controlled” Items**
Honeywell must exercise due diligence toward assuring that “Export Controlled” items are not used, exported, or re-exported in violation of applicable laws. The following requirements apply to “Export Controlled” items.

A. Items shipped to non-U.S. Registered aircraft to any destination, or shipped to U.S. registered aircraft with a final destination outside the Continental United States, Alaska or Hawaii.

In order to comply with U.S. export policies, regarding “Export Controlled” items being shipped outside the Continental United States, Alaska or Hawaii, Honeywell requires a valid air waybill number for the failed unit return before the replacement unit can be shipped. See page 7 of this catalog for an explanation of a valid air waybill.

B. Items shipped to U.S. registered aircraft with a final destination inside the Continental United States, Alaska or Hawaii.

For shipments of “Export Controlled” items to U.S. registered aircraft with a final destination within the Continental United States, Alaska or Hawaii, Honeywell is required to confirm the expectation with the customer that the failed unit is to be returned within 14 calendar days using the container and air waybill provided by Honeywell with the unit they receive.

C. Items shipped as Rentals or Loaners

Customers who request an “Export Controlled” item as a loaner will still require coordination through export control for the appropriate export license. This process will remain unchanged. Coordination assistance to pursue this service and/or an export license is available by contacting Honeywell Customer Support Operations.

3. A listing of Export Controlled items can be found on page 7, or by contacting Customer Support Operations at the numbers provided in this catalog.

In order to track the status and location of stock and provide the best service to end users, a simple and effective transaction reporting system is used:

- An Exchange core credit tag will be attached to each unit issued or shipped to a customer for exchange purposes. Fill in the required information on the tag and return with the unit.
- A Rental core credit tag will be attached to each unit issued or shipped to a customer for rental purposes. With Rental shipments, Honeywell also supplies a Customer Repair Advisement tag which customers should use to ensure they ship customer owned units to the appropriate Honeywell site for repair.

The return unit returned in Exchange, or the returned Rental unit, must have the completed Exchange/Rental core credit tag attached. This provides identification of the unit and **ensures that the customer is credited with the core return.**

SHIPPING POLICY

Shipping Charges

Once all required information has been received, the following will apply:

- **Shipments within the U.S. will be shipped same day or next day air P.M. or P-1 if required. If a higher priority shipping method is required, it is at the customer's expense.**
- **Counter-to-Counter services within the U.S. are available at a flat rate fee of \$345 (U.S. dollars), to cover freight and administration costs. This includes customers operating under warranty or maintenance contracts. It is the responsibility of the customer to arrange for Counter-to-Counter pickups.**
- **Next Flight Out Door to Door Service may be available in the U.S., but will be at the customer's expense.**
- **The Exchange Rental Business is unable to arrange for direct Counter-to-Counter shipments internationally, due to Airline regulations. However, Honeywell is able to arrange a freight forwarder to assist with international Counter-to-Counter shipments.**
- **Exchange Rental Business shipments which are required to cross international borders, require the customer ordering the LRU to be responsible for contacting a customs broker to arrange for clearance and delivery of the LRU. Customers that elect not to arrange for customs clearance and delivery, may be subject to recovery penalties incurred by Honeywell.**

In Warranty

Honeywell pays shipping both ways for Exchange or NEW PRODUCT warranty shipments via standard airfreight. Honeywell ships prepaid and the customer ships collect.

Not In Warranty

Honeywell pays shipping one way via standard airfreight for Exchanges and Rentals purchased under the Exchange/Rental Program. Honeywell ships collect and the customer ships collect.

Maintenance Contract

If covered under a maintenance contract, please refer to your contract agreement shipping policy.

International Charges

Shipments which must cross international borders are subject to additional charges. Customs charges, import duties, brokerage fees, and other related charges are the responsibility of and must be borne by the customer.

Shipping Container

All components returned to Honeywell must be packed in the same container in which the component was received or in a Honeywell approved equivalent (as specified in the Handling, Storage and Shipping Procedures Manual Pub. # A09-1100-01). Components, which are received in IMPROPER containers, may be subject to DAMAGE charges.

EXCHANGE/RENTAL SHIPMENT WILL SHIP SAME DAY OR WITHIN 24 HOURS.

Worldwide Exchange/Rental Program For Corporate Operators

Compliance With U.S. Government Laws, Regulations, and Policies

Whether your business is based in the United States or elsewhere, all parties must comply with applicable export/re-export laws and regulations. Honeywell has implemented export/re-export procedures to ensure compliance with the regulations.

Export Control Laws

Honeywell's policy is to fully comply with export control laws of the United States and export/re-export and import laws of the countries where we do business. Under no circumstances will we sell hardware, release technical data or software, or perform a service that is contrary to applicable laws or related Honeywell corporate policies. Failure to comply with export/re-export regulations could subject Honeywell and/or its customers, whether based in the United States or not, and their respective affiliates and employees, to fines, penalties and loss of export privileges.

Honeywell's Export Control Procedures for Products Requiring a License

Honeywell must exercise due diligence toward assuring that export controlled items are not used, exported, or re-exported in violation of applicable laws. See page 7 for a list of Honeywell export controlled (license required) line replaceable units.

Honeywell requires the following information for all international shipments of items requiring a license

- Customer's name, company and country
- End-Use
- End-User
- End-Destination
- Serial number of the failed unit coming to Honeywell
- Customer purchase order
- Aircraft type
- Aircraft tail number
- Aircraft serial number
- The airway bill information for the return of the failed unit to Honeywell

Domestic Shipments

Definition of a domestic shipment is purchaser, end-use, end-user, end-destination are all U.S. including domestic tail number.

It then becomes the responsibility of the domestic customer to comply with U.S. export laws when applicable.

International Shipments

- All international shipments of licensable products will require verification of pick-up by the carrier of the customers' core return. This means prior to Honeywell shipping the exchange unit a valid airway bill number is required.

A valid airway bill is defined as an airway bill that can be verified by Honeywell with the transport company as being pick-up at the customers' location and in transit to a Honeywell location. Verification of pick-up is defined as the unit being returned to and received by Honeywell or is verified as being with a shipper destined for a Honeywell depot, whether in the United States or not.

NOTE: The above process is applicable to licensable items controlled by BIS (Commerce Department); for ITAR controlled items the customers' core return must be received at a Honeywell location for part number, serial number verification before the Honeywell exchange unit can be shipped.

NOTE: Honeywell policy and procedures are subject to change at any time without notice.

NOTE: 1. This list of products is subject to change, or may not be inclusive of all licensable export controlled items. Please contact Honeywell for verification.

2. The Products identified above as ITAR controlled, require the failed core to be received by a Honeywell facility in the United States, as designated by Honeywell Customer Support Operations, for part number and serial number verification prior to Honeywell shipping a replacement LRU.

EXCHANGE/RENTAL PRICES AND CHARGES

All prices and charges listed in the Exchange/Rental catalog are in U.S. dollars, exclusive of any customs duties, taxes, or special handling and are subject to change without notice.

Customers receiving a requested repair quote on non-export controlled LRUs can elect to place an Exchange Order or amend a Rental Order to an exchange. Customers will be required to pay either the exchange price in the catalog or the quoted repair price, whichever price is higher. Customers are responsible for contacting their Honeywell Repair Administrator to advise when Honeywell is requested to keep a customer owned unit as an exchange core.

Exchange prices include a 12-month exchange warranty to Corporate and General Aviation aircraft customers. Simulator customer/operators receive a 6-month exchange warranty.

The rental pricing listed in this catalog is for the one-month minimum fee. If a rental unit is returned late, additional weekly fees will be pro-rated and charged in accordance with the Rental Program Policy outlined on page 11.

Non-repairable products listed in this catalog, are available on an exchange basis only, no rentals are allowed. If Honeywell invoices for a non-repairable product exchange, the LRU provided will have a one-year warranty. *Non-repairable LRUs are identified in this catalog with an "N/R" listed in the Monthly Rental Price column.*

OEMs, Dealers and Service Agencies who place Exchange/Rental orders are responsible for returning exchange cores and rental units within the guidelines specified on pages 10 and 11. Extended use fees accumulated due to non-return of core, will be assessed to the OEM, Dealer or Service Agency responsible for placing the original order.

Return of Equipment – Unused

In the event a unit shipped for an Exchange or Rental requirement must be returned unused, due to changing needs or for any other reason, prior authorization for the return shipment is required. Contact Customer Support Operations (CSO) at 1-800-601-3099 or 602-365-3099 in the U.S. or you may call Customer Support Operations in Europe at 00-800-601-30999 or 602-365-3099. Honeywell will not charge unused return fees when a unit is returned unused within 14 calendar days and the orange shipping container seal is unbroken.

Honeywell has implemented a process to place tamper evident tape over connectors of SPEX owned LRU's. Tamper evident tape will assist Honeywell in identifying SPEX LRU's which have been used by customers, and will assist in determining appropriate charges when an LRU is returned.

If the orange shipping container seal is broken, but the Honeywell tamper evident tape over the LRU connector has not been removed by the customer, Honeywell will charge a \$200 administration fee. This applies to LRU's returned unused within 14 days.

Otherwise, the following fees will apply to cover Honeywell's cost of shipping, recertification, and administration fees.

1. If a SPEX unit is returned unused within 14 days and the tamper evident tape has been removed from the LRU, Honeywell will charge \$800 (U.S. Dollars). If the SPEX exchange price is less than \$800 (U.S. Dollars), customer still pays the SPEX exchange price.

2. If a SPEX exchange unit is returned unused within 15-20 days, Honeywell will charge \$800 (U.S. Dollars). If the SPEX exchange price is less than \$800 (U.S. Dollars), customer still pays the SPEX exchange price. This fee will apply whether or not the orange shipping container seal is broken or the tamper evident tape has been removed. **If a SPEX rental unit is returned unused between 15-20 days, the one month rental fee will still apply for out of warranty transactions.**
3. If a SPEX unit is returned unused within 21-30 days, Honeywell will charge a one month SPEX rental fee. If the monthly rental fee is less than \$800 (U.S. Dollars), Honeywell will charge \$800 (U.S. Dollars). This fee will apply whether or not the orange shipping container seal is broken or the tamper evident tape has been removed. **If a SPEX rental unit is returned unused between 21-30 days, the one month rental fee will still apply for out of warranty transactions.**
4. If a SPEX unit has not been returned by day 31, the exchange and rental return policy applies, see pages 10 and 11.

NOTE: No discount applies.

Return Shipping Procedure

North America Customers

Ship to the designated Honeywell Support Center by the way of Federal Express Standard Air, two-day delivery. If not served by Federal Express, ship by the way of airline direct airfreight, not by the way of a freight forwarder. Shipment by the way of a surface carrier may result in assessment of **LATE CORE RETURN CHARGES**.

Europe and Africa Customers

Return unit to the Honeywell Customer Support Center, which issued the replacement or with prior arrangement to:

Honeywell International Sarl
UK Service Center
Edison Road
Basingstoke
Hants, RG21 6QD, U.K.

or

Honeywell International Sarl
4 Avenue Saint Granier
BP 3009
31024 Toulouse Cedex 3
France

Other International Customers

Return unit to the Honeywell Customer Support Center, which issued the replacement. Shipments returning to the United States should be by the way of Burlington Air Express. If you are not served by Burlington Air Express, ship by the way of Emery Airfreight or by direct airline airfreight. Consign shipments by the way of broker select and ship to the appropriate Honeywell address for Wichita, Kansas listed on page 17.

HONEYWELL WILL NOT PAY NOR REIMBURSE FREIGHT INSURANCE FEES.

Exchange Core Return Policy

The core (“Returning Core”) must be returned to Honeywell within 14 calendar days (21 days for shipments crossing international borders), from the date Honeywell shipped the related Exchange Unit (“Honeywell Ship Date”). If the Returning Core is not received in the specified time frame, the following actions will be taken:

1. Extended Use Fees, calculated at 5% of the Exchange Price* per day, will begin to accrue.
2. If the Returning Core is not received within 30 days after the Honeywell Ship Date, an initial invoice for the Extended Use Fees will be issued and payment will be due immediately upon receipt. A subsequent invoice will be issued for the days beyond the aforementioned 30 days, once the Returning Core is received.
3. If the Returning Core is not received by Honeywell within 60 Days after the Honeywell Ship Date, the Exchange unit will be considered purchased and the Customer will be invoiced at the current Core Value**. This will be in addition to the 60 Days of Extended Use Fees and any upfront exchange fees which will also be due.

NOTES:

- A. No discount(s) apply to any Extended Use Fees
- B. All Extended Use Fees are not subject to the Disputes provision without clear and convincing evidence that the delayed return was beyond the control of the Customer, e.g. waybill information clearly showing control by common carrier.
- C. In addition to non-covered operators, this Policy includes operators that are under warranty or any applicable maintenance/service contracts (e.g. HAPP).
- D. Refer to page 6 regarding core return policy on licensable export controlled items.

*The Exchange Price and the**Core Value are those prices identified as such and provided in the SPEX Price List contained in the current version of the SPEX Catalog.

Requirement for Mechanical Products Returned as Cores

The core return must include detailed reason for removal and all required paperwork, such as Component Maintenance Modification Card (CMMC) and Life Limited Cards (LLC). Honeywell reserves the right to refuse acceptance of any unit that does not include detailed removal reasons or the required documentation. Refer to Service Bulletin TFE731-72-3397 for additional information.

Rental Use Terms and Conditions

1. Terms and Conditions for Use of Rental Unit while Honeywell repairs Customer's unit.

- A. Honeywell will charge a minimum amount equal to one month's rental fees when a Customer-owned unit is submitted to a Honeywell Service Center for repair. To assist the Customer in avoiding additional rental fees charged @25% of monthly rate per week or portion thereof, the following information is provided:
- B. For tracking purposes, the serial number of the Customer's faulty unit must be provided during the placement of the rental order.
- C. The Honeywell Service Center must receive the Customer-owned unit requiring repair within 14 calendar days from the date Honeywell shipped the Rental Unit out to the customer (21 days for shipments crossing international borders).
- D. The Honeywell Service Center must receive the Rental Unit back within 14 calendar days from the date Honeywell shipped the customer-owned serviced unit back (21 days for shipments crossing international borders).
- E. If a Rental Unit is not received within 30 days from the date Customer's unit was shipped, the Rental Unit will be considered purchased and the Customer will be invoiced at the current Core Value. No discount(s) applies, regardless of existing warranty or maintenance contracts.

2. Terms and Conditions for Use of Rental Unit while other than Honeywell repairs Customer's unit.

For rental transactions, for which no Customer-owned unit is submitted to Honeywell for repair, the Customer must pay for the total rental period. The minimum fee will be equal to one month rental; portions of each month will be charge @25% of the monthly fee per week or portion thereof. The total rental period will be from the date Honeywell shipped the Rental Unit until the date the unit is received back at Honeywell.

Note: If returning a rental unit unused, refer to the Return of Unused Equipment section of this Catalog on pages 8 and 9.

Core Recovery Team

Honeywell Exchange and Rental Business has introduced the Core Recovery Team to proactively manage our exchange/rental LRUs by providing customer assistance to reduce the number of delinquent returns. Please contact them with any core return questions or concerns.

PAYMENT PROCEDURES

Please note that not all Honeywell entities share the same billing departments. Always review your Honeywell invoices for the correct payment procedures.

If your company has an established account with Honeywell International Inc., which is not past due, invoices shall be paid in accordance with the terms of the credit agreement. If you have not established credit with Honeywell International, or your account is past due, shipments will be on credit card, C.B.D. (cash before delivery) or Wire Transfer basis. Past due accounts are subject to review and approval by the credit analyst before unit will ship. Customers paying by the way of wire transfer should process the funds to the J.P. Morgan Chase account: listed below:

Payments in U.S. Dollars

J.P. Morgan Chase Chicago
c/o of Honeywell
1 Bank One Plaza
Chicago, IL 60670
Account # 658554399
ABA # 021-000-021
Swift # CHASUS33

Payment must be made in accordance with the invoice. The Currency and “Remit to” address is outlined on the invoice. Changes to currency cannot be made after the order has been placed.

For all payments, Honeywell asks that you provide remittance advises for all payments made to Honeywell Aerospace email: GCTSAERORemittance@honeywell.com. Please indicate the Honeywell invoice number and the amount to apply to each.

All other forms of payment *must reference the appropriate invoice number* and should be mailed to:

Honeywell International Inc.
21380 Network Pl.
Chicago, IL 60673-1213
United States

Payments must be deposited in the appropriate Honeywell International Inc. bank account by the terms payment date. Honeywell International Inc. reserves the right to apply penalties for payments not received within the agreed payment terms. Penalties equal to 5% of the purchase order price may be imposed for each 30-day period the receivable balance is outstanding. If any receivable balance becomes excessive, Honeywell International Inc. may elect to terminate shipment of products and services and may refuse to accept additional purchase orders. All costs associated with collecting past due account balances including collection agency fees, if applicable, shall be borne by the purchaser.

If there are any questions or concerns regarding payment, delays, or establishing your account to pay in a foreign currency, please contact the account representative listed on your monthly Statement of Account, or contact the Regional Manager for your location:

For all payments Honeywell asks that you provide remittance advises for all payments made to Honeywell Aerospace email: GCTSAERORemittance@honeywell.com. Please indicate the Honeywell invoice number and the amount to apply to each.

Payment by Credit Card

Honeywell accepts credit cards as a method of payment for orders that are placed on a payment prior to shipment basis only. Credit card payments are not accepted for orders that are placed with any type of extended payment terms. It is not Honeywell's intent to restrict the usage of credit cards but to ensure we maximize our value to our shareowners.

Note: When a credit card is billed for the SPEX transaction, the same credit card will be utilized to bill any applicable fees related to the transaction. These fees are considered pre-authorized for billing to the credit card when applicable per SPEX policy.

If you currently have open terms with Honeywell, and you wish to utilize a credit card as form of payment, please let us know of your intent to pay by credit card and provide your card information at the time of your order placement.

Orders placed with Net payment terms are required to be paid by check or wire transfer on or before the invoice due date.

- Each transaction must identify cardholder, card number, expiration date, billing zip code, and authorization code.
- Credit card details are required to be provided at the time of order.

**Honeywell accepts payment by the following credit cards:
VISA – MASTERCARD – AMERICAN EXPRESS – DISCOVER**

WARRANTY

Corporate and General Aviation aircraft operators receive a **12-month exchange warranty**, which commences upon the purchase of an Exchange unit at the SPEX catalog exchange price. Simulator Operators receive a **6-month exchange warranty**.

Any Exchange or repair action taken during the **NEW PRODUCT** or **Exchange** warranty period does not extend or otherwise affect the warranty expiration date.

Services provided for a failed unit under **NEW PRODUCT** warranty include:

- No Charge Exchange
- No Charge Repair and/or No Charge Rental (during repair of unit).

Services provided for a failed unit under **Exchange** warranty include:

- No Charge Exchange
- No Charge Repair and Billable Rental

Services provided for a failed unit under **REPAIR** warranty include:

- No Charge Rental if the customer paid for a billable Rental during the initial repair of the failed unit.
- An exchange or rental may be provided at the exchange or rental price listed in this catalog.

Customers ordering SPEX LRUs for Warranty or Maintenance Contract Support, are required to return Exchange cores within 14/21 calendar days to avoid extended use fees. Extended use fees will also be assessed on Rental returns, if returned late. Refer to page 10 of this catalog for the core return policy.

WARRANTY STATEMENT

Honeywell warrants that any article provided under the Exchange program will, at the time of delivery, conform to all applicable specifications and drawings, and be free of defects in material and workmanship. Honeywell's obligation under this warranty, however, shall be limited to repair of, or at Honeywell's option, replacement of any article, which is returned to Honeywell within the stipulated 12- or 6-month warranty period. However, the warranty for LRUs exchanged under new unit or exchange warranty shall not extend beyond the date of expiration of the original or exchange warranty for the given LRU.

WARRANTY WILL BE DENIED IF THE UNIT'S HONEYWELL INSPECTION SEALS HAVE BEEN BROKEN AND/OR THE UNIT HAS BEEN TAMPERED WITH.

EXCEPT FOR THE WARRANTY SET FORTH HEREIN, NO OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING BUT NOT LIMITED TO THOSE OF MERCHANTABILITY AND FITNESS FOR ANY PARTICULAR PURPOSE, SHALL APPLY TO THE ARTICLES FURNISHED HEREUNDER. HONEYWELL SHALL HAVE NO OTHER OBLIGATION OR LIABILITY, WHETHER UNDER THIS ORDER OR OTHERWISE ON ACCOUNT OF SUCH ARTICLES. IN NO EVENT, SHALL HONEYWELL BE LIABLE FOR THE LOSS OF USE OR FOR INCIDENTAL, INDIRECT, OR CONSEQUENTIAL DAMAGES.

Our Singapore office may be contacted at (65) 6549-5759.

Honeywell Avionics Protection Plan (HAPP) and Mechanical Protection Plan (MPP)

Designed for both business and general aviation, the Honeywell Avionics Protection Plan (HAPP) and Mechanical Protection Plan (MPP) are maintenance service plans for that offer coverage of your Honeywell/Bendix King Avionics and Environmental & Cabin Control Systems. HAPP & MPP offer a variety of coverage options. Choose the plan that best meets your needs. A contract can be limited to 12 months, or may be extended over several years. Specially priced plans are also available for fleet operators. Take the uncertainty out of repair and maintenance costs. A fixed-price HAPP/MPP contract guarantees that your repair bills will not exceed your budget.

NOTE: Operators covered under HAPP/MPP, are required to ensure cores are returned in compliance with the core return policy, outlined on 11 of this catalog. Cores that are returned late may result in extended use fees.

For more information about HAPP/MPP, please contact one of your Honeywell Dealers or Authorized Service Centers or contact HAPP-SALES@Honeywell.com

Honeywell Maintenance Service Plan

In 1976, Honeywell's Maintenance Service Plan (MSP) was developed for operators of Honeywell powered business and executive aircraft as a cost and time saving approach to engine maintenance. Expanded to include coverage for Auxiliary Power Units (APU's) in 1980, MSP remains the most comprehensive support program offered anywhere in the world today. This efficient and cost-effective program offers a practical alternative for managing future Engine and APU maintenance expenses.

No other maintenance program offers such comprehensive coverage at an affordable price. With the flexibility of receiving service at over 125 authorized service centers worldwide, you receive the most up-to-date service available anywhere from the company that originally built your Engine or APU. More importantly, you'll be able to eliminate high-cost surprises by accurately forecasting maintenance budgets beforehand. Additionally, the program is fully transferable (a valuable asset is being accrued which is recoverable at the time of aircraft sale). MSP is available to operators of either new or used Engines or APU's.

HONEYWELL NEW CUSTOMER ESTABLISHMENT INSTRUCTIONS

The following request for information is required in order to establish a new customer or request change(s) to an existing customer account. Please read and complete to help us expedite the establishment of your new or changed account.

Customer

1. Complete Part I (pages 81-83)
2. Upon return of the New Customer Set-Up Package, please enclose the following to ensure a timely response:
 - A) Completed New Customer Account Set-Up Form (Part I) including all signatures. Include more current audited financial statements if a credit line and net terms are required.
 - B) End Use Certificate if applicable.
 - C) Tax Exemption Certificate(s) - Please note if your company is tax-exempt, a certificate(s) must be returned with this information. If a complete tax exemption certificate(s) is not received, Honeywell must charge sales tax on your invoices, (except for U.S. Government). For non U.S. customers shipping direct to a non U.S. location, a sales tax exemption certificate is not needed.
 - D) Copy of Purchase or another form of documentation from the customer that validates their address(es).
3. Return the complete package of the above items to your customer representative.

Customer Representative

****If setting up an existing customer that is already in an old legacy system, then the customer representative will complete PART I (page 81 only) by obtaining the data from the legacy system. The credit application part will not be required. The representative will also follow steps 1-3 below.**

1. The Customer Representative will complete Part II (page 84). However, please assist the customer in Part I.
2. Upon receipt of the New Customer Set-Up Package, review the checklist for completeness. Do not forward the package until it is complete. *Incomplete packages will delay customer account set-up.*
3. Upon completion of New Customer Set-Up Package or Change Request, forward set-up package or change requests to Aerospace Credit and Collections. Email address is: **GCTS Aero SAP Customer Master** or Fax to: **1-866-483-3242**.

Worldwide Exchange/Rental Program For Corporate Operators

Customer Representative Checklist

- The form is complete.
 - A) Name, address, zip, state, city, and country must be complete for at least the SOLD TO ACCOUNT.
 - B) General Data area must be filled out completely.
 - C) Sales Data must be filled out completely on required fields.
 - D) Copy of purchase order or another form of documentation from the customer that validates their address(es).
- Completed and signed Credit Application (except for U.S. Government)
- End Use Certificate, if applicable.
- Tax Exemption Certificate(s) - Please note: If your customer is tax-exempt, a certificate(s) must be returned with this information. If a complete tax exemption certificate(s) is not received, Honeywell must charge sales tax on the invoices, (except for U.S. Government). For non U.S. customers shipping direct to a non U.S. location, as sales tax exemption certificate is not needed.

Prices shown are in U.S. dollars exclusive of custom duties, taxes, and special handling charges and are subject to change without notice.
Shaded items are Export Controlled. Refer to Pages 5 through 9 of this catalog for details.

HONEYWELL NEW CUSTOMER SET UP

Please return completed application with customer purchase order or contract, sales tax exemption or value added tax certificate and any additional documents with your New Customer Establishment Package to the address listed on page 1 of the Instructions (Catalog page 101).

PART I - Items in italics are optional. All other information is mandatory.

FINANCIAL RELEASE AUTHORIZATION

I authorize the references named herein, both financial institutions and trade references, to release any financial and credit information known to them to Honeywell International Inc. with the understanding that it will be used solely for credit purposes. Furthermore, if this credit application is accepted, I/We agree to pay for purchases in accordance with the terms and conditions set by Honeywell International Inc.

TERMS OF SALE

Honeywell (the Company) provides agreed goods and services in exchange for payment within terms. It is the Company's normal policy to extend payment terms of 30 days from invoice date to qualified applicants. Payment is expected at the Company's designated address (specified on the invoice) within 30 days of the invoice date. Thirty (30) day terms are upheld. Cash on Delivery (COD), Payment Prior to Shipment (PPS) or any other method of payment, may be required pending receipt and review of a customer's credit application, financials, and references.

It is understood and agreed that, once Honeywell has approved the credit application, payment will be tendered according to the assigned credit terms. Honeywell may take any action required, in case of failure, to make payment as agreed. This may include, but is not limited to, use of outside agencies or attorneys. Costs and fees incurred by outside service agencies or attorneys will be an additional liability on the part of the debtor organization.

STATEMENT OF JOINT AND SEVERAL LIABILITY
Sole Proprietorships, Partnerships, Joint Ventures, Personally Held Corporations

I/We agree that the Sole Proprietorship, Partnership, Joint Venture, or Personally Held Corporation indicated below will pay all invoices in accordance with agreed terms. All signatories for this organization agree, in the event of the failure of the organization to pay invoices as rendered, to personally reimburse the Company for all liabilities incurred.

**HONEYWELL CUSTOMER STATEMENT OF CERTIFICATION
Compliance with United States Export Regulations**

The person executing this letter is assuming the responsibility of complying with these obligations both as an individual and representative of the company that he/she represents. Please ensure the signed letter appears on company letterhead and that all information is complete.

It is Honeywell’s policy to verify the end-use and end-users for all Honeywell product transactions, and in all transfers of technical data or software. This is to ensure compliance with applicable United States export control laws and regulations, specifically Parts 736 and 744 of the Export Administration Regulations, as well as with the laws and regulations of the selling country.

Because the products you are purchasing, or software or technology you are licensing, may be exported and used outside of the United States and/or the selling country, please confirm the following:

Our general type of business is: _____

Our specific end-use is: _____

1. I (We) will not sell, export, re-export, divert or otherwise transfer any Honeywell products, technology or software for use in activities which involve the development, production, use or stockpiling of nuclear activities of any kind, chemical or biological weapons or missiles, unmanned aerial vehicles, or microprocessors for military use, nor use Honeywell products in any facilities which are engaged in activities relating to such weapons or applications, without prior authorization from the U.S. Government and Honeywell notification. If your request concerns any of the activities listed above, identify the activity here _____.

2. I (We) will not sell, export, re-export, divert or otherwise transfer any Honeywell products, technology or software to any entity or country subject to U.S. Government approval, including, but not limited to, Cuba, Iran, North Korea, Sudan, Syria unless otherwise authorized by the U.S. Government. This also applies for the selling country and their respective Debarred List issued by the Government.

3. I (We) acknowledge that United States law and the selling countries law prohibits the sale, export or re-export, diversion or transfer, or other participation in any export transaction involving Honeywell products with individuals or companies listed in the U.S. Commerce Department’s Table of Denial Orders, the U.S. Treasury Department’s list of Specially Designated Nationals or the U.S. Department of State’s list of individuals debarred from receiving Munitions List items and other applicable lists, i.e., Entity List as well as the Denial Person/Company list of the selling country.

4. I (We) will abide by all applicable United States and/or selling country export control laws and regulations for all products purchased from Honeywell and will obtain any licenses or approvals required by the U.S. Government and/or the selling countries Government prior to the sale, export, re-export, diversion or otherwise transfer of Honeywell’s products, software or technology.

DETAILED PROGRAM DESCRIPTION OF RECONDITIONED SPECIFICATION

Reconditioned

All articles are returned to Reconditioned Specification when they are processed through a repair cycle at an authorized Honeywell Support Center. All articles are inspected to verify proper workmanship to certify that the article meets all controlling documentation. The work performed will be in accordance with the latest applicable FAR 145 requirements or other applicable National Aviation authority requirements as required. All Honeywell recommended product improvements shall be incorporated.

Return of Articles to Reconditioned Status

Repair and inspection of the Reconditioned article will be conducted in accordance with the procedures as outlined in the appropriate Component Maintenance Manual (CMM), or other controlling documentation. All Honeywell recommended product improvements shall be incorporated into the article.

All Reconditioned articles will be calibrated, tested, inspected, and certified per the applicable CMM or other FAA approved documentation. Individual articles are to be certified and placed in inventory, as ready for service upon satisfactory demonstration of performance to the Reconditioned Specification.

Units will be supplied with either an 8130-3 Return to service dual release or EASA Form 1 dual release. Tag type is dependent on the location of the Honeywell authorized service center. Limited exceptions may apply for product serviced outside the US or EU.

Airworthiness tags from other NAA's may be available upon request. Additional charges may apply and lead times may change.

Honeywell Record Keeping, Continuing Analysis, Surveillance

The Reconditioned Specification program maintains a real-time database to monitor the status of the inventory. An input to the database is made when a customer requests an exchange article. The following is included: the customer number, aircraft registration number, article part number, and article serial number. An input to the database is also made when a repairable article is received from a customer, returned to Reconditioned Specification and returned to stock. The following information is recorded: the aircraft operator's Name, aircraft registration, article part number, article serial number, and article repair report.

Honeywell has established and maintains a system for record keeping, continuing analysis, and surveillance of the performance and effectiveness of the Reconditioned Specification program as referenced in FAR 121.373.

Reliability Monitoring

The database generates reports to provide visibility for a minimum of two years of problem trends as they develop in the Reconditioned Specification inventory. The information available from the customer is entered into a computer database system, which allows the following reports to be generated:

Worldwide Exchange/Rental Program For Corporate Operators

Aircraft History of Multiple Exchanges of the Same Part Number

The criteria for this report are that more than five shipments have occurred within the past two years for the same aircraft.

The Aircraft Registration Number History Report

This report will provide history of all transactions for a specific aircraft, sorted by article part number sequence. This report prints the total activity for the last two years.

Reconditioned Specification Article Repair Records

These Repair records are retained by the repair facility for a minimum of two years. Repair record data is also recorded in the database.

The repair record contains:

- (a) Operators name, aircraft type, aircraft registration number, and aircraft flight hours
- (b) Article model number, part number, and serial number
- (c) Narrative description of the reason for removal and confirmation of the failure
- (d) The repair technician's name
- (e) The failed component part number and a narrative description of why service was performed.

Availability of Reliability and Repair Records

- (a) Reliability and repair records are available for inspection by the operator, the FAA Administrator, or any authorized representative of the National Transportation Safety Board.
