maker pace everything maker leveryone making...

Encourage & Support Student-Driven Making

Project-based learning was happening at Mineral Point Middle School (WI) before they got the TeacherGeek® Maker Cart, but Library Media Technology Specialist Kris McCoy saw an opportunity for improvement.

Not only was it difficult to plan maker activities, it was hard to find the supplies and tools needed. When she first saw the TeacherGeek cart, a fully loaded mobile makerspace, she saw a lot of potential not just for her own instruction in the library, but for project-based learning throughout the middle and high schools.

There are other mobile carts with storage bins available, so what made this one so special? The research-backed, effective, efficient, and affordable TeacherGeek system. Designed by a teacher, the system includes real hand tools and dozens of different building components.

"The cart is a good fit for our school because it is portable and easy to get to various classrooms in the building. It also provides resources for open-ended learning and traditional lessons."

- Kris McCoy, Library Media Technology Specialist

One cart includes enough materials to support the entire school. It's also versatile enough to be used across multiple subjects. "We are using TeacherGeek in our Makers Club and library, and it is checked out to classrooms for use. It has been used to facilitate traditional STEM projects but has also been used in reading and language arts classes during nonfiction reading units and skill building," says McCoy.

There's more to this story! Read about how TeacherGeek transformed hands-on learning in Mineral Point's schools at **ideas.demco.com** (search *teachergeek*).

Start Small or Go Big with TeacherGeek

Only need supplies for one project? Want to try out TeacherGeek before investing in a cart? Flip to **pp. 6–7** to explore 12 affordable Activity Kits, as well as the Maker Cart.

Meaningful Making Made Easy

Deluxe Maker Collection with Challenge Guide

Démco[®]

160+ pages of educator-designed challenges plus all the maker tools

Start making right out of the box with this curated collection of maker tools and supplies — complete with more than 20 hands-on, leveled challenges.

Originally developed for New York City school libraries by a team of practicing maker educators led by Stanford FabLearn Fellow Mark Schreiber, the Challenge Guide is organized into three sections: Low-Tech Making, Robotics, and Energy & Power. Each lesson includes detailed teacher and student guides that follow the Demco Maker Framework. As students work through three increasingly challenging levels, they progress from instructor-led exploration to inventing their own solutions, reflecting on what they've learned and building valuable 21st century skills along the way.

Designed to encourage student-driven learning as stations in the classroom or library, activities support up to 30 makers working in groups of 3–5. Add in a few consumables and commonplace items like cardboard and scissors, and students will have everything they need right at their fingertips. Items can be stored neatly in their original packaging or the included storage

What's in the guide?

- 23 leveled maker challenges with extension suggestions, adaptable for age and skill level
- Challenges are grouped into three sections: Low-Tech Making, Robotics, and Energy & Power

Make your collection mobile! See cart

and storage options @demco.com,

Low-Tech Making Collection with Challenge Guide

Create amazing learning experiences with low-tech challenges and maker tools

Get your students designing, building and learning with this curated collection of popular, low-tech maker tools, which includes 7 hands-on, layeled lessons

The Challenge Guide was originally developed for New York City school libraries by a team of practicing maker educators led by Stanford FabLearn Fellow Mark Schreiber. Each lesson includes detailed teacher and student guides that follow the Demco Maker Framework. As students work through three increasingly challenging levels, they progress from instructor-led exploration to inventing their own solutions, reflecting on what they've learned and building valuable 21st century skills along the way.

Designed to encourage student-driven learning as stations in the classroom or library, activities support up to 30 makers working in groups of 3–5. Add in a few consumables and commonplace items like cardboard and scissors, and students will have everything they need right at their fingertips. Items can be stored neatly in their original packaging or the included storage boxes.

What's in the guide?

- 7 leveled maker challenges with extension suggestions, adaptable for age and skill level
- Each challenge includes teacher and student guides and requires 30–120 minutes
- 50+ pages
- For grades 3-7
- Guide also sold separately

What's in the collection?

- 1 littleBits™ STEAM Student Set
- K'NEX Building Sets
- 2 Strawbees® Inventor Kits
- 1 Makedo™ Tool Set
- 2 Strictly Briks® 1,008-Piece Sets with four 6 qt. ClearView™ Storage Boxes

STEM Activities

Building & Engineering

Hands-on, student-centered learning has long been valued by educators. Think back to science labs that may have been part of your own early learning experiences. Studies have shown that children who are involved in hands-on projects demonstrate a deeper understanding of what they're learning.

The educator-tested building and engineering products in this catalog increase students' understanding through hands-on learning experiences and support the design thinking process, a solution-based approach to problem-solving.

If you aren't sure where to begin, the following products are a great place to start:

• Engineering Concepts: TeacherGeek® (pp. 6–7) and Kid Spark STEM Labs (p. 8)

- Prototyping: Rigamajig
 Builder Kits (p. 9),
 Strawbees® (p. 10–11),
 Makedo™ cardboard
 construction tools (p. 12),
 and K'NEX (p. 13)
- Free Building: KEVA Planks (pp. 14–15), Strictly Briks® (pp. 16–17), and PowerClix® Building Sets (p. 18)
- **3D Design**: 3D Pens and 3D Printers (pp. 20–23)

Demco MakerHub is your key to using these learning tools, offering hundreds of projects that span all grade levels and subjects. Create a free account and start your search at **makerhub.demco.com**.

Grow Big Ideas

Brackitz building pieces connect at any point and any angle, enabling students to design 3D structures, simple machines, animals, buildings and more. As they build, kids are immersed in design thinking, creativity, and the foundations of math, science, architecture and engineering. They'll be developing their spatial reasoning skills along the way, boosting STEAM

Every Brackitz build starts with Structures, the base individual kit. Add any or all of the other individual kits (Gears, Sprockets & Chains; Wheels & Axles; and Pulleys & Cranks) to support specific instruction and themed units. Get all four individual kits when you buy the Complete STEAM Center.

Access a growing collection of easy-to-customize, project-based lesson plans, student resources and video tutorials online. Lessons include easy setup instructions, clear learning objectives, standards alignments (NGSS, ECERS-R), ideas for differentiating instruction and more. Each kit comes in a sturdy, lightweight bin. For grades Pre-K through 8.

Brackitz Structures Base Kit

Give kids a foundation to start designing and building an endless variety of creations, from skyscrapers to submarines to dinosaurs. Includes 320 building pieces.

STOCK

Product No. Price \$199.99 ND137-7384

Brackitz Complete STEAM Center

The perfect launching pad for special challenges and schoolwide design/build projects

The Complete STEAM Center includes all four individual kits: Structures; Gears, Sprockets & Chains; Wheels & Axles; and Pulleys & Cranks. Includes 1,224 building pieces.

FedEx

Product No. Price ND137-7388 \$649.99

Brackitz Wheels & Axles Kit

Empower students to add motion to their structures and explore authentic STEM and design thinking concepts as they experiment. Requires Structures Base Kit for building. Includes 196 building pieces.

Requires Structures Base Kit for building. Product No. Price ND137-7385 \$149.99

Brackitz Gears, Sprockets, & Chains Kit

When students learn to design and build with simple machines like gears and chains, they gain hands-on understanding of the principles of motion. Requires Structures Base Kit for building. Includes 503 building pieces.

Requires Structures Base Kit for building. Product No. Price ND137-7387 \$149.99

Brackitz Pulleys & Cranks Kit

Budding engineers will have fun creating contraptions that will haul, lift, slide and move up and down — including a zip line that spans more than 4 feet! Requires Structures Base Kit for building. Includes 205 building pieces.

Requires Structures Base Kit for building. Product No. Price ND137-7386 \$149.99

NEW!

TeacherGeek® Maker Cart 2.0

All-inclusive cart provides an incredibly comprehensive, unparalleled STEM solution

- 16-gauge steel frame with a semigloss paint finish; gray uppers and yellow panels
- Overall dimensions are 71"H x 52"W x 17"D
- · Side panels are perforated for hanging tools
- 34 translucent plastic, 121/4"H x 163/4"L bins in 3 heights (3"H, 6"H, and 9"H) and your choice of 4 bright color options
- 18 clear plastic side bins measure 4"H x 3"W x 71/4"L
- Sign header can be colored and recolored with included dry-erase cravons
- Includes over 17,000 components, such as screws, nuts, wire cutters, hammers, soldering irons, gears, pulleys, wheels, motors, wires, and more
- Use components to create a wide range of STEM projects, like a rubber band racer, electromagnet crane, hovercraft, weather station, and electronic circuits
- A variety of build guides, design challenges, and lab activities are available for free download
- Activities intended for ages 9+ (adult supervision recommended)
- 3" dia. casters, 2 locking

Prepare Kids for STEM Success with Kid Spark Mobile STEM Labs

Rokenbok Education is now Kid Spark Education, but the STEM labs are the same. Each lab features a collection of ROK Blocks, carefully engineered and reusable 3D building blocks that connect on all sides and are compatible across labs, offering endless STEM learning opportunities. Labs align with Kid Spark Education's STEM-Maker Curriculum, a comprehensive online library of project-based lesson plans, student resources, video tutorials and more. Combine labs to teach the complete PreK–8 progression.

- Each lab supports up to 4 students
- Durable and secure storage cases include inventory and organization guides
- Make labs mobile by adding the Rolling Base (sold separately)

Learn more

about Kid Spark's online curriculum and professional learning library at **demco.com** (search *kid spark*).

ROK Blocks Mobile STEM Lab for Grades PreK-3

Projects cover measurement, following step-by-step instructions, problem solving, introductory engineering, design cycles, symmetry, spatial and logical reasoning, sequence and more.

Corresponding Curriculum

- 40+ hours of project-based, hands-on STEM challenges
- Covers Phases 1 and 2 of Kid Spark's STEM-Maker Curriculum: Mentored Construction Play and STEM Fundamentals

Lab Contents

- 299+ engineering building components (30+ types, including beams, risers, braces, bearings, cogs and more)
- 1 heavy-duty storage case (stack up to 4)

SnapStack Mobile STEM Lab for Grades 4-6

Projects cover structural and mechanical engineering; working with specifications, constraints and design briefs; applying and measuring mechanical advantage; understanding diagrammatic instructions; and simple and compound machines.

Corresponding Curriculum

- 20+ hours of project-based, hands-on STEM challenges
- Covers Phase 3 of Kid Spark's STEM-Maker Curriculum: Applications in Design & Engineering

Lab Contents

- 269+ engineering building components (17 types, including beams, risers, pulleys, axle and hinge blocks, corbels and more)
- 1 heavy-duty storage case (stack up to 8)

Engineering Pathways Mobile STEM Lab for Grades 4-8+

This lab includes two robotics platforms: the entry level Maker ROK Bot and the Arduino-compatible ROKduino SmartBlock. ROKduino is a fully programmable robotics controller with eight sensor inputs and four motor/power outputs. A PC or Mac is required to download the ROKduino visual and C++ programming software.

Projects cover structural and mechanical engineering, robotics, visual and C++ programming, Computer Aided Design (CAD) and computational thinking. Guide students from motorizing

basics to creating interactive environments where multiple machines interact with each other autonomously. Add a 3-D printer to teach rapid prototyping.

Corresponding Curriculum

- 66+ hours of project-based, hands-on STEM challenges
- Covers Phases 3 and 4 of Kid Spark's STEM-Maker Curriculum: Applications in Design & Engineering and Systems of Technology

Lab Contents

- 1 ROKduino programmable smart block
- 1 Maker ROK-Bot, a remote control robotic chassis
- 371+ engineering building components
- 3 heavy-duty storage cases lock together to form 1 lab (stack up to 2 labs)

FedEx

Rigamajig Basic Builder Kit & Add-On Kits

Engage young minds with large-scale, hands-on learning

The award-winning Rigamajig system is the perfect playful approach to hands-on STEM exploration. Children follow their curiosity as they play and build, learning along the way.

Integrating the Simple Machines Add-On Kit allows creators to mechanize their Rigamajig contraptions into systems that demonstrate the principles of force, mechanics, and direction. The Chutes Add-On Kit helps kids experiment with cause and effect, gravity, and systems thinking. The Locomotion Add-On Kit gives builders the option of making rolling, spinning, mobile creations.

- Plastic parts are 100% recycled nylon; wood parts are Baltic birch plywood with a nonhazardous finish
- Basic Builder Kit has 260+ parts, including planks, wheels, pulleys, nuts, bolts, rope, and 2 plastic crates to keep small parts together
- All Basic Builder Kit components can be stored and transported in the included mobile wood cart with four 3" dia. casters (2 locking) and zippered, blue canvas cover
- Optional Simple Machines Add-On Kit has 57 parts, including gears, wheel pulley, levers, belts, cranks, and axles
- Optional Chutes Add-On Kit has 93 parts, including chutes, cradles, balls, nuts, and wing bolts
- Optional Locomotion Add-On Kit has 103 parts, including wheels, casters, axles, planks, platforms, connectors, and ropes
- Add-On Kit components can be stored and transported in the included canvas bags
- Minimum required play area is 100 sq. ft.
- For ages 3+

NEW!

Strawbees® Coding & Robotics School Kit

Elevate your Strawbees projects with circuit boards, servo motors, sensors, and LEDs

Whether your makers are new to constructing with straws or have already mastered the art of building with Strawbees, this all-in-one classroom kit has everything you need to infuse building projects with robotics and coding. Extra-rigid, reusable, and recyclable Strawbees straws are perfect for simple to complex creations, and now you can bring those creations to life. Add motors, lights, and sensors, and then program them to move, light up, and sense the environment. Open-ended projects include a moving crane, a friendly robot, a musical instrument, and a pig that's afraid of the dark!

- 1,400 construction straws
- 12 circuit boards with built-in rechargeable batteries
- 12 servo motors
- 36 servo motor arms

Host a Cardboard Challenge

Jump into the fun of cardboard making by participating in the annual Global Cardboard Challenge that takes place every October. The event kicks off in September to allow kids time to plan, design and build their creations. Inspired by the video "Caine's Arcade," we know kids can build some pretty amazing things with just of cardboard and their imaginations! Get the details at cardboardchallenge.com.

K'NEX Maker Kit Large

The building solution your makerspace has been waiting for

- Start with the 100 included building ideas or create your own DIY designs
- Includes 800+ classic connectors and rods in a reusable storage bin with dividers
- Supports 2-3 builders at once
- Ages 6+

Product No. ND137-5890

Price \$79.99

K'NEX Intro to Structures: **Bridges**

Models demonstrate 7 key bridge types

- Build 13 different bridge models, 1 at a time
- · Comes in a solid storage tray with snap-on lid
- Set includes 207 pieces, enough for 2-3 students working as a team
- Ages 8+

STOCK

Product No. ND137-1439

K'NEX Gears

Hands-on introduction to simple machines supports Common Core requirements for grades 3-5

- Make real-life replicas with color-coded building instructions, including photos and key facts
- Models demonstrate 2 spur gear examples, 2 crown gear examples and 2 sprocket gear examples
- · Comes in a solid storage tray with snap-on lid
- Includes 198 K'NEX connectors and rods, enough for 2-3 students working as a team
- Ages 8+

Kid K'NEX Construction Set

Big, soft pieces are great for children with varying manipulative skills

- Use the 8 included model cards or build your own creatures
- · Easy assembly and disassembly
- Includes 131 pieces with 10 eyes and 2 ears/wings
- Supports 6-8 children
- Ages 3+

KEVA® Maple Plank Sets

Durable maple planks stack up perfectly time after time

The premise is simple, yet compelling: build structures by stacking the identical ¼"H x ¾"W x 4½"D planks with no glue and no connectors. All ages and abilities build at their own skill level and discover the joy of creating their own works of art and clever contraptions. Ages 5+.

- 200- and 400-plank sets include 2 KEVA balls and an idea booklet
- 800-plank set includes 16 KEVA balls, idea booklet, four 10" x 10" laminated idea cards and 2 canvas tote bags
- 1,000-plank set includes 20 KEVA balls, guide book and wood roller bin

EVA maker

KEVA® Maker Bot Maze

Tinker away — create a unique bot and build a maze to explore

The Bot Maze is the perfect platform for engineering experimentation, innovation and creation. Customize a motorized bot with the included craft supplies, then build a maze of tunnels, doorways and obstacles for your bot to navigate! Ages 7+.

- 30 planks
- 8 half planks
- 25 connectors
- 2 motorized bots
- 6 tumble blocks
- 3 bumper balls
- Various craft supplies: googly eyes, pipe cleaners, feathers, pom-poms, glue dots, string, tape, felt and foam

Product No. Price ND137-5454 \$39.99

An interactive STEM tool that presents stimulating building challenges Brain Builder puzzle cards show 2D designs from

multiple angles and builders try to create a matching 3D structure. Solutions are on the other side of the card. Your 3D imagination to the test as challenges increase in difficulty from beginner to expert. Ages 7+.

- 20 planks
- 30 double-sided puzzle cards
- 1 zippered carrying case

Product No. Price ND137-5453 \$14.99

KEVA® Structures

Introduce makers to architecture, building and creative design

The premise is simple, yet compelling: build structures by stacking the identical 1/4" H x 3/4" W x 41/2" D planks

with no glue and no connectors. All ages and abilities build at their own skill level and discover the joy of creating their own works of art and clever contraptions. Ages 5+.

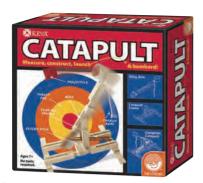

- 200 planks
- 24-page idea booklet with building instructions

Product No. Price ND137-5455 \$49.99

All products on this page contain small parts.

KEVA® Catapult

Introduce students to the fundamentals of physics as they experiment with force, tension and angles

Build your own authentic Catapult, then let the fun and experiments begin! What shoots farther, a marshmallow or a piece of macaroni? How does the objects course change when you pull the arm back to different points? If you make the flight deck higher, how does it affect the hurl? Ages 7+.

- Predrilled wood planks
- · Wood glue
- Leather strap
- 2 rubber bands
- Launch cup
- 2 balls
- Target mat
- · Various fasteners

KEVA® Contraptions 200-plank Set

Help students embrace their creativity as they design engineering marvels

Take hands-on learning to the next level with KEVA Contraptions! Create intricate, tunnels, towers, ramps and chutes with this interactive STEM set. No glue, tools or connectors required — just simple stacking and the laws of gravity. As they build, students learn the principals of slope, velocity, force, momentum and balance. The "bounce" of the ball provides some of the most surprising moves — make it twist, bump, hop and stop. Projects vary in difficultly, making it suitable for a wide range of ages and abilities. Ages 7+

- 200 predrilled wood planks
- 2 lightweight plastic, ping-pong size KEVA balls
- Guide book loaded with instructions, photos, ideas and tips

PowerClix® **Solids Building Sets**

Magnetic pieces in 6 shapes help students explore mass and volume PowerClix Solids is a magnetic building system that develops fine motor skills, explores mass and volume, and introduces solid geometry with STEM applications. The colorful plastic pieces feature neodymium magnets that never repel, so creating 2D and 3D models is easy. Building pieces come in 6 unique shapes, allowing students to create free-form designs as they discover how mass and volume are used to model an object. Designed to integrate with all other PowerClix sets

- Translucent ABS plastic construction
- Included creativity guide is packed with ideas to inspire builders
- Ages 3+

PowerClix® **Organics Building Sets**

Magnetic pieces in organic shapes that allow for open-ended, free-form designs

PowerClix Organics is a magnetic building system that develops fine motor skills, encourages asymmetrical thinking and introduces organic geometry with STEM applications.

The colorful plastic pieces feature neodymium magnets that never repel, so creating 2D and 3D models is easy. Building pieces replicate 8 unique shapes found in nature (such as skeletons, coral reefs, insects and plants), allowing students to use a more organic visual language while creating free-form models. Designed to integrate with all other PowerClix sets.

- Translucent ABS plastic construction
- Included creativity guide is packed with ideas to inspire builders

Q-BA-MAZE™ 2.0 Ultimate Stunt Set

Gets imaginations rolling faster and further than you ever imagined Build, bounce, adjust angles, fine-tune turns and experiment with cause and effect to see what kind of zany, zigzagging action is possible! The Ultimate Stunt Set features every stunt in the Q-BA-MAZE arsenal, plus three exciting additions — the spiral sphere, quad-exit cubes and marble catchers. Use critical thinking skills to stack and interlock the translucent ABS plastic pieces in a way that creates an advanced marble maze that keeps everyone guessing! Activities strengthen STEM, physics, basic engineering, strategy and fine-motor skills. Set includes 156 cubes, 9 stunt pieces, 8 marble catchers and 50 premium steel marbles and a nylon drawstring marble storage bag. Ages 6+.

Q-BA-MAZE™ 2.0 Rails Extreme Set

A challenging exercise for both sides of the brain

Cubes that keep you guessing and rails that go the distance really ramp up your marble run fun! Smooth, 2½" x 2½" cubes slide together with ease to create endless paths and possibilities. Cubes have a unique double-exit design that will have players wondering which way the marbles will go. The 7½"L straightaway rails connect to any cube or to each other to build tracks that send marbles zigzagging through the maze. Precision joints provide exceptional stability. Components are constructed of translucent ABS plastic. Set includes 82 cubes, 18 straightaway rails, 4 mesh coaster tubes, 4 marble catchers, 50 premium steel marbles and a nylon drawstring marble storage bag. Ages 6+.

3 Cheers for 3D Building

Enhance STEM curriculum and inspire innovators of all ages with hands-on 3D building opportunities in your makerspace.

3D pens extrude a flexible plastic filament and are commonly used to design artistic pieces, modify and repair other plastics objects, and experiment with design prototypes.

Once a concept is ready, move over to a 3D printer and watch the final product emerge! Analyze, revise and repeat.

3Doodler Start Super Mega Pen Set

Completely child safe — no hot parts Specially designed for young creators, this all-in-one set includes everything needed to start experimenting with 3D printing. The 3D pen has no hot parts, so it's completely kid safe. Just slide the switch to turn it on and allow 1 minute for warmup. Pick a colorful Eco-Plastic strand, feed it into the pen and start doodling in 3D! (Each 6"L strand is enough for 60" of doodling.) The nontoxic, BPA-free plastic hardens after a few seconds, giving students time to shape their creations to perfection. The included DoodleBlocks templates can be filled in as molds or used to create contour lines for specific shapes, patterns and structures. Ideal for building essential STEM skills, the 3Doodler Start projects inspire creativity, design, planning,

building and spatial understanding.

3Doodler Start Learning Packs

All-in-1 kits for fun and effective hands-on learning

3Doodler Start Learning Packs are specifically designed and priced for educational institutions — you can outfit an entire classroom with 3Doodler pens for less than the cost of a regular 3D printer. Each Learning Pack comes with 3D pens, lesson plans, classroom materials, accessories, and plastic refills, packaged in a way to help you and your students get started as soon as you open the box. It's a great way to make lessons fresh, fun, and different — students are genuinely excited about the ability to create!

- Each Student Kit includes: three 3Doodler Start 3D Pens, 3 Micro-USB charging cables, 6x DoodleBlocks, and 3 DoodlePads
- Each Teacher Kit includes: 1 teacher's checklist, 1 3Doodler poster, 1 welcome note, 1 cheat sheet, 2 lesson plans, 1 manual, 1 EDU booklet, 1 activity guide, 1 DoodleBlock™ guide, 2 unblocking tools, and a troubleshooting guide
- Each Plastic Kit includes: 1,200 strands of biodegradable 3Doodler Start Plastic Filaments (150 each of 8 colors)
- For ages 6+

3Doodler Create+ Pen

The latest version of the world's first 3D printing pen

Create+ offers the best and safest 3D drawing experience ever! The pen extrudes heated plastic that hardens almost instantly, allowing you to draw amazing 3D structures, freehand or on stencils. Now with dual drive, the Create+ is re-engineered to provide an ultra-smooth and enhanced 3D doodling experience. Improvements include greater control in fast/slow speeds for different doodling techniques, more reliable performance with different plastic types, and greater durability.

- Create+ pen
- 3 packs of 25, 3 mm plastic refills in 15 colors
- Ultimate Guide of Doodling with 5 projects
- 3-piece maintenence tool set
- Power adapter
- For ages 14+

3Doodler Create+ Learning Packs

Everything you need to bring 3D creations into classrooms

3Doodler Create+ Learning Packs are all-in-one educational tools for providing fun and effective hands-on learning. Each Learning Pack comes with 3D pens, lesson plans, classroom materials, accessories, and plastic refills, packaged in a way to help you and your students get started as soon as you open the box. This activity is an ideal complement for STEM subjects, tactile learning, problem solving, and much more. It's also an economical option for labs and makerspaces — you can outfit an entire classroom with 3Doodler pens for less than the cost of a regular 3D printer.

- Each Student Kit includes: three 3Doodler Create+ 3D Pens, 3 power adapters, 1 nozzle set, and 3 DoodlePads
- Each Teacher Kit includes: 1 Jetpack, 1 teacher's checklist, 1 3Doodler poster, 1 welcome note, 2 lesson plans, 1 cheat sheet, 1 Ultimate Guide to Doodling, 1 manual, 1 EDU Booklet, and a set of troubleshooting tools with guide

Dremel® DigiLab 3D45 3D Printer

- Fully enclosed chamber mitigates temperature fluctuations for higher quality prints
- Semiautomated leveling build platform
- Clog-resistant extruder tested to run for hundreds of hours
- Filament recognition system automatically changes temperature settings for error-proof printing
- 50-micron resolution ensures precise output
- 5" full-color, HD touch screen lets you easily control and monitor jobs
- Wi-Fi, USB and Ethernet connectivity
- Integrated HD camera lets you remotely monitor jobs and capture time-lapse videos
- Active carbon filter protects users from potentially harmful VOCs
- Dremel DigiLab 3D Slicer (desktop) and Dremel Print Cloud (web-based) software included
- Requires Mac OSX (10.9+) or Window 7/8/8.1/10
- Includes ECO-ABS filament spool, nylon filament spool, glue stick, build sheet, object removal tool, unclog tool, USB flash drive, USB cable, power cable, quick-start quide and instruction manual
- Measures 16"H x 16"W x 201/4"L

FedEx

Product No. Price ND137-7072 \$1,999.99

Why Choose the Dremel 3D45 Printer?

- Heated build plate is compatible with nylon, eco-ABS, PETG, and PLA filaments
- 50 micron print resolution offers better accuracy and finer details
- Integrated HD camera for managing and recording prints remotely via Wi-Fi and Dremel Print Cloud

ND137-8052

- 5" full-color, HD touch screen lets you easily control and monitor jobs
- Camera Integration lets you import text and logos, helping to reduce misprints
- Wi-Fi, USB and Ethernet connectivity

that's impossible to achieve by hand.

- SMART safety sensors detect problems and help troubleshoot
- Semiautomated leveling build platform
- Dremel DigiLab 3D Slicer (desktop) and Dremel Print Cloud (web-based) software included
- Requires a BOFA filtration system (sold separately, or use your own), which removes potentially harmful fumes and particulates created during the laser cutting process
- Requires Mac OSX (10.9+) or Window 7/8/8.1/10

STEM Activities

Coding & Robotics

Advancements in technology and computing have expanded our ability to solve problems using new ways of thinking.

Because of this, your students need to develop computational thinking skills to take advantage of future career opportunities that involve new technology. Computational thinking is a problem-solving process where students learn to identify, analyze, and implement solutions with the greatest efficiency.

If you're overwhelmed about incorporating robotics and coding into your curriculum, try thinking about the challenge or lesson first and how the robot can be a learning tool for that challenge second. Using a variety of robots keeps the focus on understanding coding as a problem-solving tool.

The trusted coding and robotics products in this catalog support learners through all the phases of learning to code.

- Introduce the principles of coding with screen-free coding tools: Code & Go® Mouse (p. 26), Cubetto (p. 27), Cubelets® (p. 28) and Ozobot® (p. 29)
- Expand the coding experience to include block-based coding and more sophisticated Java and Python programming: Dash and Dot (p. 30), Cue (p. 31), Sphero® (pp. 32–33), Makeblock (pp. 34–35), meeperBot (p. 36), Edison (p. 36), and Bloxels (p. 38)

Demco MakerHub is your key to using these learning tools, offering hundreds of projects that span all grade levels and subjects. Create a free account and start your search at **makerhub.demco.com**.

Code & Go® Robot Mouse Activity Set

Say hello to a little mouse that packs a big STEM learning punch! Build a maze, use the coding cards to program the sequence of steps, then watch the mouse race to the cheese. Each movement goes for 5", so kids can adapt this set to use on different surfaces. Set includes a blue Colby robot mouse. Add multiple players with Jack, the programmable robot mouse (sold separately). Both mice light up, make sounds, feature 2 speeds and have colorful buttons to match coding cards for easy programming and sequencing. Mice are 4"L and require 3 AAA batteries (not included).

- Includes a 4"L programmable robot mouse, 1 cheese wedge, 22 maze walls, 16 maze grids, 3 tunnels, 30 double-sided coding cards and 10 double-sided activity cards
- Activity guide provides a hands-on introduction to coding concepts
- Requires 3 AAA batteries (not included)
- Ages 5+

Cubetto Coding Robot

Teaches the basics of computer programming — no screens required Cubetto is a friendly wooden robot that teaches the basics of computer programming through hands-on play. It incorporates a coding language that kids can touch and manipulate. Each block is an action forward, left, right or function. Place the blocks on the board to tell Cubetto where to go, hit the blue GO button and watch as your program is executed.

- 3"H x 4"W x 41/3"D, laminated plywood robot with ABS plastic internal frame and 3" dia. wheels
- 9\%"H x 9\%"W laminated plywood control board
- Bluetooth® 4.0 connectivity
- 391/3" H x 391/3" W world map mat is machine washable
- Includes 16 coding blocks and a 10-page story book to extend activities
- Requires 6 AA batteries (not included)
- Ages 3+

Botley® the Coding Robot

Interactive robot teaches coding in an easy, friendly way

This next-generation coding robot introduces programming fundamentals without the need for a screen. Botley pairs hands-on coding challenges with advanced collision detection, looping commands and If/Then programming logic. The robot is ready to use right out of the box, and he'll have kids coding in minutes. Program up to 80 steps, or turn on black-line-following mode and draw a path for Botley to travel.

- 2¾"H x 5½"W x 3½"D, durable plastic robot with detachable arms
- Features remote programmer, 40 coding cards, 6 play boards, stickers to decorate robot and a variety of accessories to create obstacles for Botley (8 sticks, 12 cubes, 2 cones, 2 balls and 1 goal)
- Multilingual activity guide available for free download
- Requires 5 AAA batteries (3 for robot, 2 for remote programmer, not included)
- Ages 5+

Inspire Kids to Become Better Thinkers with Cubelets®

Cubelets is a groundbreaking robot construction system designed for budding innovators. The advanced OS 4 technology preloaded inside each Cubelets block makes robot construction remarkably simple and fast. There's no wrong way to build a robot, because power and data are automatically routed where needed. And there's no need for coding or wiring — just snap the robot blocks together and the magnetic faces do the rest.

There are thousands of combinations, and every new arrangement makes a unique robot with novel behaviors. Brick adapters are provided to connect Cubelets with your favorite LEGO®-type construction systems. The included Bluetooth® Cubelet blocks pair with your phone, tablet or PC for easy robot controlling, software updates and remote control functionality. Each kit includes access to over 40 hours of free standards-aligned lesson plans. For ages 4+.

NEW!

Cubelets Curiosity Set

Fuel curiosity and expand your robot building horizons using Cubelets! With the Bluetooth® Hat, Cubelets constructions can be paired with the free iOS-, Android- and FireOS-compatible companion app to remote control robots or change Cubelets' behaviors with the new Personality Swap.

- Modular components let builders construct an infinite number of interactive robots
- Kit features 10 Cubelets robot blocks (1 each of Battery, Brightness, Flashlight, Inverse, Passive and Rotate; 2 each of Distance and Drive), 1 Bluetooth Hat, 2 brick adapters and a charging cable

Ozobot® Bit Kits

Introducing the Ozobot Bit, a smart little robot here to introduce coding. Controlling the Ozobot is simple — just create OzoCodes by drawing lines and segments with colored markers, and the Bit will move along the lines and explore each unique path. When you've mastered OzoCodes, advance to OzoBlockly.com, a web-based visual editor.

- Each Ozobot Bit measures just over 1"
- Hardware and battery are protected by a tough polycarbonate shell
- Each Bit comes with a durable bottom cover and Micro-USB charging cable

Ozobot® Evo

Say hello to the Ozobot Evo — a smart robot measuring just over 1" that's big on personality! The fun begins as soon as you open the box with autonomous LED lights, movements and sounds. Evo uses infrared proximity sensing to get around obstacles, and app-enabled remote controls to explore its surroundings. The protective OzoSkin cover is made of soft, clear plastic that can be decorated to customize your robot. The included set of washable, nontoxic Color Code Markers make it easy to start coding your robot. Draw lines, create roads and design mazes on paper for Evo to explore. Download the free Evo by Ozobot app for more coding challenges and games. Evo connects instantly to your smartphone or tablet via Bluetooth® for hassle-free programming and updates.

- Durable polycarbonate body
- Bluetooth connectivity with a range of up to 30'
- Free Evo by Ozobot app available for download at Apple App Store and GooglePlay

Dash and Dot Robots

Kids learn to code as they bring real robots to life

Get started rocking, rolling, and coding with Dash and Dot! Dash is a clever robot that can be programmed to dance, light up, make sounds, react to sounds and more. Dot is ready to be transformed into anything you can dream up, from an alarm clock to a fortune teller.

Control Dash and Dot from your Apple or Android smart phone or tablet with the free, easy-to-use Wonder, Blockly, Path, Xylo, and Go apps. Wonder and Blockly also provide access to built-in challenge tutorials.

Each Accessory Pack includes a variety of fun snap-on items: bulldozer bar, tow hook, bunny ears, and tail. Building Brick Connector Sets include 4 connectors specially designed to work with all major brick brands. The Xylophone and the Xylo app turn Dash into a solo marching band and light show. Use the Ball Launcher to turn Dash into a projectile-throwing machine — each kit includes 1 launcher, 3 projectiles, and 6 stacking targets compatible with all major brick brands. The free Apple, Android, and Kindle apps allow you to adjust your launching power and aim at specific targets.

For ages 6+.

Sphero® SPRK+

Designed to inspire curiosity, creativity and invention through connected play and coding, this 3" dia. robotic ball takes hands-on learning up a notch! Sphero SPRK+ pairs to your smartphone or tablet, allowing you to program simple commands like roll, flip, spin and color change. As your coding skills improve, you can move on to more complex instructions for your robot to follow.

- Durable polycarbonate shell with a scratch-resistant UV coating
- Clear design lets you see internal components work and react
- Bluetooth® SMART connectivity with a range of up to 100'
- Quick Start guide gets you rolling in moments
- Sphero Edu app lets you program the ball and collaborate with other users around the globe (available for download at Apple App Store, GooglePlay, Chrome Store and Kindle Store)
- Swift Playgrounds app features interactive puzzles and challenges that let you explore code and create engaging programs (available for download at Apple App Store)

Makeblock mBot-S Explore Kit

A simple yet real robotics experience

Introduce beginners to the concept of robotics and help them develop teamwork and problem solving skills! Along with all of the features of the original mBot V1.1, this entry-level robot kit includes an LED matrix display that lets students program RBG lights to customize expressions and text. After building, users can control the robot or play games via mobile apps, or write code with the visual programming software mBlock 5. It's a great tool to integrate into computer science, robotics, and other STEAM curricula.

- Includes 1 mCore shell, 1 Arduino Uno main controller board, 2 motors, 1 mini wheel, 2 slick tires, 1 battery holder, 1 IR remote control, and a variety of hardware and connectors
- $\bullet~$ 5 integrated sensors: Light, IR Receiver, Button, Ultrasonic, and Line Follower
- Electronic modules: Buzzer, RGB LED, IR Transmitter, LED Matrix, and 2 Motor
- Bluetooth® and USB connectivity (3 RJ25 cables and 1 USB cable included)
- Drag-and-drop mBlock graphical software provides a quick way to learn programming and control robots
- Add Lego®-compatible bricks (not included) to build bigger robots

Edison Robot

Learners experiment, explore and cultivate their innovativeness while having fun

Meet Edison — the modular robot that immerses students in robotics, programming, math, engineering and other STEM concepts. Using infrared light and sound sensors, Edison can find its way around obstacles, sense light levels, detect lines and respond to sound commands. You can even program the robot to be controlled by a standard TV or DVD remote!

Edison is ready to use right out of the box. It comes preloaded with functions that are activated by driving the robot over included bar code cards. When students are ready for more of a challenge, they can download free software apps to create their own programs on a computer.

Use Edison as-is, or add LEGO® bricks to build a bigger robot or a completely new invention. Learning by doing has never been easier or more affordable!

- Each Edison robot features a line tracking sensor, 2 light sensors (left and right), infrared receiver and transmitter, Piezo sounder, sound sensor, 2 variable-speed motors, 2 red LED lights (left and right), 3 control buttons and two 11/2" dia. wheels
- Robotics education lesson plans enhance learning activities
- Included EdComm cable transfers programs to Edison via your computer's headphone jack
- Powered by 4 AAA batteries (included)
- Grades K–12

meeperBOT 2.0 Plus

MeeperBot is a remote controlled, programmable bot that brings your building bricks to life. The studded, Lego®-compatible chassis is powered by 2 motors and controlled by the MeeperBot Controller app on your smart device.

Multi-Bot Mode lets you connect and control up to 8 bots from 1 device. Control and code bots with BotCode — an easy-to-use programming tool that uses drag-and-drop, scratch-like commands. In addition to BotCode, you can use Blockly for more advanced programming. ROBOT:IT curriculum includes a variety of robotics and circuitry lessons. Activities provide students with educational experiences across all 4 pillars of STEM learning.

- Durable ABS plastic chassis
- Compatible with Lego, Mega Bloks®, and other standard building bricks
- 3 controller drive modes (touch, power leash, and tank)
- Bluetooth® "BLE" sensor driven
- Includes front hitch; back hitch; removable wheels; and dual rear-wheel, 300 rpm motors
- Apple and Android compatible
- Powered by a 9V battery (not included)
- For ages 5+ sicia or FedEx

Specify wheel color:

Meeper is not affiliated with LEGO®, MEGA Brands Inc.® or any other construction block company.

STEM Activities

Circuitry & Electronics

Inquiry-based learning provides hands-on experiences, encourages creative problem-solving, and helps students understand the world around them. Through exploring, asking questions, making discoveries, and testing those discoveries in search of new understanding, students become independent thinkers and creative problem solvers.

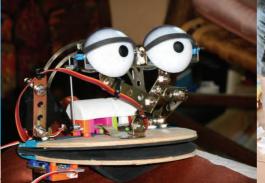

Project-based learning, design thinking, and genius hour are pedagogies that are student-centered variations of inquiry-based learning.

Using new learning tools, such as the circuitry and electronics products in this catalog, makes concepts real and helps build foundational understanding. These tools develop critical-thinking and problemsolving skills, as well as new capacities for learning how things work.

Demco MakerHub is your key to using these learning tools, offering hundreds of projects that span all grade levels and subjects. Create a free account and start your search at **makerhub.demco.com**.

NEW!

Makeblock Neuron Kits

Stimulate kids' creativity and ingenuity

Craft programmable electronic inventions in just 5 minutes with these comprehensive STEAM kits! Building blocks are connected in a snap with magnetic Pogo Pins. No coding experience is required — the graphical programming interface in the Neuron app lets students add basic or advanced functionality into their inventions. The Neuron app comes with continually updated invention guides and video tutorials that get kids started and quide them through their own creative ideas. Bluetooth®-enabled Neuron gadgets can be controlled and programmed using mBlock on desktop computers and the Neuron app on mobile devices. Or just assemble blocks to make creative gadgets without any coding. Magnetic backs allow blocks to be displayed on whiteboards and other magnetic surfaces for demonstrations. Compatible with the Makeblock platform and Lego® blocks. Ages 6+.

FedEx

- 2 power blocks
- 4 connection blocks (1 each of Wi-Fi, Bluetooth, wireless transmitter, and wireless receiver)
- 4 controller blocks (1 each of button, knob, funny touch, and joystick)
- 10 sensor blocks (1 each of light, ultrasonic, color, gyro, humiture, temperature, soil moisture, sound, PIR, and dual IR detector)
- 1 camera and 1 mic with speaker
- 2 DC motors and 1 dual DC motor driver
- 1 LED strip, 1 LED strip driver, 1 LED panel, and 1 RGB light
- 9 Neuron boards
- 2 servos and 1 dual servo driver
- Includes 3 USB cables and a variety of clips, switches, probes, and wires

Product No. Price ND137-8348 \$664.99

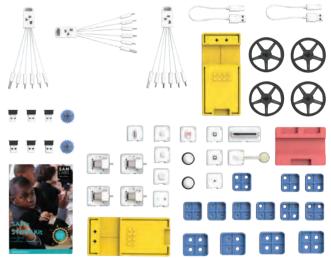

Inventor Kit

- 1 power block
- 1 funny touch block
- 1 Bluetooth block
- 1 gyro sensor
- 1 buzzer
- 1 funny switch
- 1 LED panel
- 9 Neuron boards
- 1 servo and 1 dual servo driver
- Cables and connectors include 1 USB cable, 1 GND wire, 36 friction pin connectors, and 20 rubber bands

Product No. Price ND137-8349 \$113.99

SAM Labs STEAM Kit

STEAM-based learning has never been more fun! Designed by a team of engineers and teachers, this classroom-tested kit introduces students to the world of coding and creating. SAM blocks are wirelessly activated using Bluetooth® 4.0 connectivity. Just turn them on and effortlessly pair them to the free SAM Space app to make classroom projects that cover a variety of subjects. Curriculum-aligned lesson plans guide students and instructors step-by-step through activities such as building self-driving cars, learning Morse code, and performing photosynthesis experiments.

- Build a variety of internet-connected projects and perform STEAM-based experiments
- Use free SAM Space app to program creations (available for download at Apple App Store or GooglePlay)
- Kit features 17 wireless Bluetooth SAM blocks with accessories that are compatible with Lego® blocks, 40+ SAM software blocks, 2 buttons, 2 RGB LEDs, 1 heat sensor, 1 proximity sensor, 1 buzzer, 1 tilt sensor, 1 light sensor, 1 pressure sensor, 2 sliders, 4 DC motors, 1 Servo motor, 4 wheels, 2 chassis, 2 roller balls, 2 controllers, 6 gear wheels, 4 large holders, 10 small holders, 4 Bluetooth USB dongles, 2 Micro-USB charging cables, 3 Micro-USB 5-in-1 charging cables and a Getting Started Guide
- Compatible with all SAM Labs free curriculum-aligned, online lesson plans
- Suitable for up to 6 students; ages 7-16

Engage Kids in Hands-On Learning with Squishy Circuits

Squishy Circuits use conductive and insulating play dough to teach the basics of electrical circuits in a fun, hands-on format. Just combine batteries (not included) and the premade doughs to create

Squishy Circuits Lite Kit

- 15 LEDs (5 each of blue, green, and red)
- 1 battery holder (holds 4 AA batteries, not included)
- 7 oz. conductive dough (assorted colors)

		-	-	-	
Ŀ	1	U	L	Ш	

Product No.	Price
ND137-7215	\$14.99

Squishy Circuits Standard Kit

- 25 LEDs (5 each of blue, green, red, white, and yellow)
- 1 battery holder (holds 4 AA batteries, not included)
- 1 piezoelectric buzzer
- 1, 3.5 oz. container of white insulating dough
- 3, 3.5 oz. containers of conductive dough (1 each of blue, green, and red)

Product No.	Price	
ND137-7216	\$34.9	

Squishy Circuits Dough Kit

Safe, nontoxic dough for use with Squishy Circuits projects

- Insulating dough does not dry out; conductive dough will dry out if not returned to container after use
- 1, 7 oz. container of white insulating dough
- 7, 7 oz. containers of conductive dough (1 each of black, blue, green, orange, purple, red, white, and yellow)

Make Electronics Easy & Fun with Snap Circuits

As students create flying saucers, radios, light shows and sound effects, they learn the principles of electricity, sound and motion.

Each Snap Circuits kit comes with hundreds of project ideas and includes all of the necessary components, which easily snap together on the project board.

Bring your music to life with strobing, spinning patterns of light

Snap Circuits are building pieces that snap together on a simple "rows and columns" base grid that functions like a circuit board. Each component is easily identifiable by a different color and functional purpose. Exciting

projects provide a hands-on introduction to electronics and circuits. Just hook any iPhone, Android phone or MP3 player up to your Snap Circuits creation and watch the circuits put on a show!

SNAP CIRCUIT

- Build more than 175 projects
- Features 55 components, including an infrared detector, strobe light, color-changing LED and lighted fans
- Comprehensive instruction manual included
- Requires 4 AA batteries (not included)
- Ages 8+

Snap Circuits® Training Programs

Student training kits offer an in-depth exploration of the components in Snap Circuits Extreme and Pro. The included student guide is packed with real-world applications and problem-solving quizzes that cover all topics related to electricity and electronics being taught in middle schools and above. Also includes a teacher manual that prepares educators for proper introduction of Snap Circuits and helps them test student knowledge through a series of guizzes. Each kit features a heavy-duty plastic case with custom foam inserts for housing components. Kits require 4 AA batteries (not included). For ages 8+

Extreme Training Program

- · Build over 750 projects
- Features 80 snap-together components, including a power amplifier, variable capacitor, analog meter and solar cell

Product No.	Price
ND137-6616	\$195.99

Pro Training Program

- · Build over 500 projects
- Features 75 snap-together components

Product No.			Price
ND137-6617			\$149.99

Create multidimensional, lighted structures

Snap Circuits are building pieces that snap together on a double-sided "rows and columns" base grid that functions like a circuit board. Each component is easily identifiable by a different color and functional purpose.

Rotating components allow you to build circuits horizontally, vertically and upside down. Exciting projects introduce students to the basics of circuitry, electricity and lights.

- Build more than 150 projects
- Features 50 components, including a 3-color light tunnel and a projector with 6 images, plus various mirrors and reflecting circuits
- Instructions for a range of projects can be downloaded online
- Requires 3 AA batteries (not included)
- Ages 8+

Snap Circuits® Arcade

Enjoy the excitement of an arcade while supporting a vigorous STEM or STEAM curriculum

Snap Circuits are building pieces that snap together on a simple "rows and columns" base grid that functions

like a circuit board. Each component is easily identifiable by a different color and functional purpose. Exciting projects introduce students to the basics of electricity, engineering and circuitry.

- Build more than 200 arcade-style projects
- Features 30 components, including a microcontroller preprogrammed with interactive games, a programmable word fan and a dual LED display
- · Curriculum-rich, easy-to-follow instruction manual provided
- Requires 3 AA batteries (not included)
- Ages 8+

Brown Dog Gadgets Paper Circuits

Low-cost, hands-on tools for teaching the basics of electricity

Paper circuits are electronic circuits that are created on paper or cardboard using nylon conductive tape, LEDs and a low-voltage battery as a power source. In addition to being educational, they can also be a fun makerspace project that brings artwork and crafts to life.

- Standard Kit includes enough materials for up to 10 Paper Circuit projects: one 15' nylon conductive tape roll, 10 coin cell batteries, 30 jumbo LEDs and 10 binder clips
- Classroom Set includes enough materials for up to 25 Paper Circuit projects: three 15' nylon conductive tape rolls, 25 coin cell batteries, 120 jumbo LEDs and 25 binder clips
- Build time: 15-30 minutes per project
- Ages 9+

Brown Dog Gadgets Bristlebots

An inexpensive way to introduce basic engineering, motors, circuits, and physics concepts

Bristlebots are small robots made by combining a toothbrush head and a vibrating motor. By changing the position of the pipe cleaner arms, they will travel in circles, walk straight lines or scoot around randomly. No tools are required for building — the toothbrush heads come precut, and motor wires have exposed ends to connect to the battery.

- Each kit includes everything you need to build Bristlebots: precut toothbrush heads, double-sided tape cubes, vibration motors, batteries, googly eyes and pipe cleaners
- Build time: 5–15 minutes per robot
- Ages 10+

Brown Dog Gadgets Crazy Circuits

Modular electronic circuits make creations light up, move around, and come to life

This electronic learning platform allows students to create circuits from almost any material they
can imagine. Use Crazy Circuits to construct paper crafts with conductive tape, use conductive
thread for sewing, sculpt with conductive dough, and create art with conductive inks and paints.
You can even pop Crazy Circuits onto Lego® bricks to make your creations light up, move,
and make noise. Start with simple circuits comprised of a battery and LED, then add switches,
buttons, and programming boards to integrate sound, motion, and interactive elements.

Starter Pack

- Features 1 slide switch, 10 LEDs (5 mini surface mount, 5 jumbo), 1 Lego baseplate, 1 piezoelectric speaker, 1 conductive tape roll, 1 conductive thread bobbin, 5 coin cell batteries, and 2 coin cell battery holders
- Preprogrammed blink/fade board lets you control LEDs
- Plastic organizer included

Technology

Powerful Tools for Student Learning

Technology can engage senses and awaken creativity in new ways, opening doors for students to understand how multiple intelligences and collaboration fuel the learning process.

Virtual reality (VR) technology can transport students back in time, into the future, and to places around the world they may never be able to visit. VR can add an element of awe to the learning process, developing curiosity, wonder, and empathy.

Understanding and using technology is part of mastering the digital literacy landscape. Using various digital media tools such as computers, cameras, and microphones to write, record, edit, and produce content not only demonstrates mastery of content, but builds confidence in communication and presentation skills.

HUE™ HD Cameras & Animation Studio Kit

Cost-effective alternatives to standard document cameras

- Wide-angle, anti-glare optical lens
- 1280 x 720 resolution
- Flexible neck with full 360° rotation
- Integrated microphone
- Capture images from full and/or half sheets and project them onto a whiteboard via your PC and projector
- Record sound and video (requires a 16 bit or higher sound card, not included)
- Advanced functions include picture editing and stop-motion animation
- Use camera in its included base or connect directly to a USB port
- Compatible with all computers with a USB port, including Windows (XP, Vista, 7, 8, 10), Mac (OS X 10.4.3 and later), and most Linux distributions
- USB to Mini-USB cable included FedFx

HD Pro Camera

- Captures images from full and half sheets
- · Built-in LED lights
- Included HUE Intuition software allows users to save recorded sounds and videos locally or upload/email recordings, annotate images and save them in multiple file formats, take snapshots, and shoot multiple images over time

Specify color: Black, Blue, Green, or Red.

HD Camera and Animation Studio Kit

- Camera captures images from half sheets
- Includes everything you need to create stop-motion animation videos
- Teacher-created animation software CD (PC and Mac compatible) allows for timelapse recording, onion skinning, and green screening
- Software lets users record or import music and sounds; add text and special effects; copy, edit, move, and delete animation frames; and upload finished videos to YouTube or other sites
- HUE Book of Animation features step-by-step instructions for creating 20 stop-motion videos

Arts & Crafts

Provide Valuable Learning Experiences

Tactile low-tech and no-tech activities such as drawing, painting, coloring, and journaling promote creativity, and are naturally mindful.

Creating spaces for everyone to participate in making enhances and supports kindness and empathy initiatives, while also giving students opportunities to connect with others. Making activities can also be meditative, clearing minds to be open and available for learning.

Craft supplies are essential items in design and engineering projects, including many of the free lessons available at **makerhub.demco.com**.

Furniture & Organization

Create a Space That Supports Student Success

When incorporating more hands-on projects and active learning, a flexible and adaptable environment is critical.

- Make sure your spaces can accommodate changing needs throughout the day with mobile tables and work surfaces.
- Encourage student choice and facilitate independent and small group work by offering a variety of seating options.
- Keep learning tools and resources at students' fingertips with the right storage and organization solutions.
- Share resources throughout your building by looking at mobile carts and shelving.

Refreshing, remodeling, or creating a new space? Demco has been helping schools and libraries transform their learning environments for decades. You can see some of these projects and learn more about our comprehensive interior design and project management services at **demcointeriors.com**.

For Stool and Workstation

NEW!

Démco[®]

Gear Guard™ Mobile STEM Workstation

Specifically designed for corralling parts, robots, and equipment, this mobile workstation will become your complete STEM hub. The 31½" top height and 33½" overall height make it easy to dock this unit alongside the Demco Gear Guard™ STEM Table (sold separately). The 40 "W x 24 "D top features a 2 "H rim to provide a contained space for engaging in STEM activities. Top is also ideal for storing and transporting equipment like 3D printers. Two lower shelves have 2"H backstops to help contain stored items during transit. Shelves accept 12"H, molded polypropylene Jumbo Gratnells® Totes (sold separately) to keep supplies handy and easy to access. Locking 3" dia. casters provide stability and mobility to create a ready-to-go activity station wherever needed.

- 11/8" thick particleboard with a high-pressure laminate surface and PVC edge-banding
- 2"H rim around work surface
- 2 lower shelves with 121/4" clearance and 2"H backstops
- 3" dia. locking casters

UltraHD Rolling Storage Cabinets

High-capacity cabinets hold up to 600 lbs. of supplies and tools

These large cabinets are the answer to your storage needs in makerspaces, classrooms, or any place that has a lot of stuff. Convenient adjustable shelves allow you to organize all your maker supplies, and locking doors keep it all secure.

- Commercial-grade steel frame with powder-coat finish
- 4 steel shelves hold up to 150 lbs. each; 3 shelves adjust in 1" increments
- Stainless steel doors with magnetic latches and fingerprint-resistant coating
- Single-key locking system
- Bases feature polyurethane bumpers
- 5" dia. casters, 2 locking

Built-In Trash and Recycle Bins

Plastic Storage Bins Included

CEF Ed Table & Stool Sets

Maximize creative time and minimize setup and cleanup

- 1½" thick, solid maple butcher block top is smoothly sanded and oiled for a natural and safe finish
- 2 satin-finished aluminum, 4"W x 7"W power hubs built into top; each pop-up hub includes 1 AC outlet, 2 USB ports and a 20' cord
- Two 6" dia., color-coded holes in top lead to concealed, pull-out waste receptacles
- Includes 1 gray receptacle for trash and 1 blue receptacle for recycling; both low-density polyethylene containers measure 30"H x 20"W x 11"D
- 6 circular, rubber-coated magnets mounted under top (3 per side) secure included stools when not in use and raise them off the floor to facilitate cleaning
- The lightweight, 500-lb. capacity stools are made of galvanized steel with a powder-coat finish
- Each stool features a 12" x 12" seat, under-seat cross braces, built-in foot rails and plastic floor glides
- Stools stack up to 8 high; plastic caps on cross braces protect the paint finish during stacking
- Clear industrial-strength, injection-molded polypropylene storage bins slide out for easy access to supplies

- The 3½"H x 8¼"W x 10¾"L bins include lids that lock in place and will not come off if bins are turned upside down or dropped
- Lower 2-sided cabinet features an open, pass-through design with 6 adjustable shelves behind nonlocking double doors
- ¾" thick side panels and 1½" thick base are constructed of furniture board with a high-pressure laminate surface
- Table moves easily on 5" dia., low-profile locking casters

Demco[®]

Mobile Build 'n' Write Boards

If you've been eyeing Lego® walls on Pinterest but haven't found the time or wall space to make your own, we've got the solution. This double-sided wonder features a building surface with generous space for all ages to construct and create with standard-sized building bricks. To make it even better, the reverse side has a large markerboard for designing and planning. The board is also magnetic, so you can add other activities like Tumble Trax marble runs. Best of all, we made the whole thing mobile, so you can take the hands-on learning anywhere and everywhere.

- Double-sided, %" thick Baltic birch frame and base
- Clear UV finish on flat surfaces and clear lacquer finish on edges
- Integrated handles for easy transport
- Build side features a green Lego-compatible surface and 2 built-in 3½"H x 24¼"W x 6"D trays for storing building bricks
- Write side features a magnetic markerboard surface with built-in marker ledge
- Four 2" dia. locking casters

Lego®-Compatible Slabs

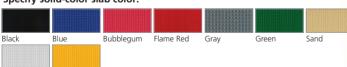

- Ultra-durable, 1/4" thick polystyrene slab tiles are twice as thick as other baseplates
- Unique tongue-and-groove system allow slabs to interlock for large-scale building activities
- Compatible with all major brands of classic-size building bricks
- Choose from a variety of solid colors or thematic printed designs
- Optional black and white poplar wood Slab Frames (sold separately) allow you to display Slabs on a wall (mounting hardware included)
