

## Guide to the Gwen Bell artifact and book collection

**Creator:** Gwen Bell and Gordon Bell

**Dates:** 1541-2000, bulk 1800-1955

**Extent:** 499 items

**Collection number:** X6288.2012, X7090.2014, XB15.76, XB23.78, XB47.79, XB65.80, XB67.80, XB91.76, XB97.80X, B113.80, XB137.81, XB180.81, XB185.81, XB343.85

**Catalog number:** 102733969

**Collection processed by:** CHM staff

**Finding aid prepared by:** Sara Chabino Lott

**Sponsor:** The Computer History Museum wishes to honor Gwen Bell as a founder and patron of the Museum. This guide is published in recognition of her dedication to the Museum in its formative years and her continued commitment to its growth and excellence.

### **Abstract**

This rare and important collection comprises written works and physical objects relating to early calculating instruments and methods. With material dated between 1541 and 2000, the collection offers researchers a unique window into the early origins and development of history's most significant calculating devices and methods.

## **Administrative Information**

### **Access Restrictions**

The collection is open for research. However, due to the age and fragility of many of the items, if a digitized version is available, researchers will be directed to the surrogate item.

### **Publication Rights**

The Computer History Museum (CHM) can only claim physical ownership of the collection. Copyright restrictions may apply and users are responsible for satisfying any claims of the copyright holder. Requests for copying and permission to publish, quote, or reproduce any portion of the Computer History Museum's collection must be obtained jointly from both the copyright holder (if applicable) and the Computer History Museum as owner of the material.

### **Languages**

English, French, German, and Latin.

### **Biographical/Historical Note**

Gwen Bell earned her B.S. from the University of Wisconsin in 1957 and a Master of City and Regional Planning from Harvard University in 1959. She earned a PhD in geography from Clark University in 1967. Bell co-founded what is now known as The Computer history Museum with her husband Gordon Bell and Ken Olson in 1975. Gwen Bell was the Museum's first director and was active with the Museum until 1998.

Gwen and Gordon Bell began proactively collecting pre-computing artifacts in 1975. Their first purchase was a 1903 six digit Millionaire calculator. By the time the Digital Computer Museum

opened in Marlboro, MA in 1979 they had approximately 80 books, calculators, and navigational instruments. When The Computer Museum History Center (TCMHC) was established in Mountain View, CA in 1996, the collection had grown to roughly 400 artifacts and books, which they had on permanent loan with TCMHC.

### **Scope and Content of the Collection**

The collection documents the early origins and development of human measurement and computation through rare books and related artifacts. Dated between 1541 and 2000, the collection contains over 200 books of algorithms and tables, and monographs on measuring and computing devices, as well as nearly 300 machines and devices related to the books.

### **Arrangement**

The collection is arranged into two series:

Series 1, Algorithms, tables, and history of calculation books, 1541-1995, bulk 1800-1955

Series 2, Pre-computing artifacts, circa 1600-2000, bulk 1850-1975

### **Indexing Terms**

### **Collection Contents**

#### **Series 1, Algorithms, tables, and history of calculation books, 1541-1995, Bulk 1800-1955**

This series contains mathematical, accounting, farming, astronomy, merchant, and engineering tables, as well as monographs on slide rules, arithmometers, planimeters, sectors, Napier's Bones, military compasses, and telescopes. Also included are later-day commentaries on these instruments and their history. All of the works have been digitized and are available as full-text PDFs through the Museum's online catalog <https://www.computerhistory.org/collections/search/>. The folder list for this series is arranged alphabetically.

#### **Series 2, Pre-computing artifacts, circa 1600-2000, Bulk 1850-1975**

This series contains pre-computing artifacts that were collected as a complement to the rare books. Included are abaci, sectors, linear, circular and cylindrical slide rules, mechanical and electrical/electronic adding machines and calculators, as well as replicas of early calculators such as the Pascaline and the Schickard. The folder list for this series is arranged alphabetically.

B1667.01	Easy introduction to the slide rule : with diagrams, An	1965
B1005.98	Ede's gold & silversmiths' and jewellers' calculator : for showing at sight the exact value of and quantity of gold ... also, tables on the duties on gold and silver	[18--?]
102727848	Electrical tables and memoranda	1898
B1672.01	Electronic inventions and discoveries : electronics from its earliest beginnings to the present day	1997
B1558.01	Elements of pulse circuits	1958
B246.82	Elements of technology : taken chiefly from a course of lectures delivered at Cambridge, on the application of the sciences to the useful arts : now published for the use of seminaries and students	1829
B1550.01	Elenco di numeri primi fra 10 milioni e 500 milioni estrattii da serie quadratiche	1931
B1570.01	English life table : tables of lifetimes, annuities, and premiums : with an introduction by William Farr, M.D., F.R.S., D.C.L.	1864
B1011.98	Essentials of arithmetic : advanced book	1915
B1661.01	Factor tables : giving the complete decomposition into prime factors of all numbers up to 256,000	1937
B1013.98	Farmer's harvest companion, and country gentleman's assistant : containing exact and useful tables ... particularly useful to farmers in the time of harvest, and to all persons who put out work by the acre, The	1841

B1553.01	Farmer's harvest companion, and country gentleman's assistant : containing exact and useful tables ... particularly useful to farmers in the time of harvest, and to other persons who put out work by the acre, The	1836
B1599.01	Farmer's land-measurer, or pocket companion : showing, at one view, the content of any piece of land, from dimensions taken in yards : with a set of useful agricultural tables, The	1842
B257.82	Faster than thought : a symposium on digital computing machines	1953
B1007.98	Five-figure mathematical tables : consisting of logs and cologs of numbers from 1 to 40,000 ... also, trigonometrical functions and their logs of angles from 0°-90° at intervals of 1 minute : with subsidiary tables	1915
B1586.01	Four figure mathematical tables : comprising logarithmic and trigonometrical tables, and tables of squares, square roots, and reciprocals	1918
B1561.01	Four figure mathematical tables : comprising logarithmic and trigonometrical tables, and tables of squares, square roots, and reciprocals	1910
B1548.01	Four place tables of logarithms and trigonometric functions : with auxiliary tables (chiefly to three figures) of squares, square roots, cubes, cube roots, reciprocals, circumferences and areas of circles, exponentials, natural logarithms, radians, and constants	1910
B1552.01	Fractional calculator, or, new ready reckoner : shewing at one view the value of any quantity of goods, from one-eighth of any weight or measure to thirty thousand, at any price from one thirty-second of a penny to	1838

	twenty shillings : with discount tables from 85 to 95 per cent : being particularly adapted for merchants, lace manufacturers, cotton and commission agents, drapers, &c. &c., The	
B1671.01	Fundamental operations in bead arithmetic : how to use the Chinese abacus, The	[19--?]
B1617.01	Fünfstellige logarithmen : mit mehreren graphischen rechentafeln und häufig vorkommenden zahlwerten	1909
B1619.01	Gentleman and farmer's pocket companion and assistant : consisting of tables for finding the contents of any piece of land by pacing, or by dimensions taken on the spot in ells : likewise, various other tables, of great use to every gentleman and farmer in Scotland, The	1802
B1602.01	Gentleman's and farmer's assistant : containing, first, tables for finding the content of any piece of land, from dimensions taken in yards : second, tables shewing the width required for an acre in any square piece of land ... standard imperial bushel, The	1839
B1676.01	Guglielmo Marconi : 1874 - 1937 : a science museum booklet	1979
102727850	Hand book of calculations for engineers and firemen : relating to the steam engine, the steam boiler, pumps, shafting, etc. ... tables of pressures of steam, etc., etc., etc.	1898
