

Xerox® iGen4® 90/110 Digital Production Press, Xerox iGen4 220 Perfecting Press and iGen4 Xerox Automated Packaging Solution Configuration Europe Paper and Specialty Media Guide - August 2011

For your convenience, this guide contains three lists:

- Xerox Guaranteed Media List
- Xerox Custom Media List
- Non-Xerox Tested Media List

The Xerox Guaranteed Media List contains Xerox paper and specialty media that has been extensively tested on the Xerox iGen4 90/110 Digital Production Press for image quality and performance. All Xerox paper and specialty media on this list are digitally optimized, designed and manufactured for optimal performance in Xerox digital printing equipment. Our extensive testing and stringent specifications ensure that we are able to guarantee the performance and consistency of Xerox paper and specialty media. Xerox paper and specialty media are tested and qualified by Xerox laboratories to guarantee consistent quality.

The Xerox Custom Media List contains custom media that has been tested on the Xerox iGen4 90/110 Digital Production Press for image quality and performance. Custom media on this list are digitally optimized, designed and manufactured for performance in Xerox digital printing equipment. Customers should validate the Best Practices for Operation are acceptable for their application. When purchasing a particular media product for the first time, customers are advised to purchase small quantities to insure that expectations are met.

The Non-Xerox Tested Media List contains non-Xerox branded paper and specialty media. Xerox tested many media products on the Xerox iGen4 90/110 Digital Production Press and based on such testing have published this list of tested media products which may or may not, at the time of and based upon such testing, meet Xerox performance criteria. No subsequent testing has been done and therefore no determination can be made as to whether or not such products would currently fail or pass Xerox performance criteria.

General Information

Media observations made in this publication are based on tests conducted using standard images with moderate to heavy image area coverage. Test machines are maintained within specifications defined by user documentation.

This document will be updated regularly to reflect the most current media test results. Suggested machine adjustments as well as best practices for operation are included where applicable in order to optimize media performance.

Instructions for programming media, including specific attributes, listed in this document but not yet in the Xerox iGen4 90/110 Digital Production Press stock library can be found in the customer training manual or in the "Define New Stock" section of online help.

When using the Xerox® DocuSP® Controller, all stocks will be automatically connected to colour profiles and calibration. To program a stock with non-default settings, see the DocuSP 3.7 Customer Documentation or the On-Line Help on the DocuSP Color Server: On-Line Help/Colour Management/Using Color Profiles. When using a Creo® DFE, colour mapping is performed using the Paper Stock Color.

Warranty Disclaimer

Xerox makes no guarantees or warranties, either expressed or implied, concerning the performance, use or replacement of non-Xerox branded media or throughput products. Customers should inquire directly of their paper distributor or manufacturer for any guarantees they may offer. When purchasing a particular media product for the first time, customers are advised to purchase small quantities to ensure their expectations are met. The quality of Xerox supplies is consistent from ream to ream and is backed by a 100 % guarantee. The quality of non-Xerox branded paper may vary from ream to ream or carton to carton, so for optimum performance on Xerox colour equipment, use only the best - Xerox supplies. To learn more about the benefits of using Xerox Supplies, please contact your Supplies Representative. For the most recent version of this list visit www.xerox.com/europaper

Xerox iGen4 90/100 Digital Production Press, Xerox iGen4 220 Perfecting Press and iGen4 Xerox Automated Packaging Solution Configuration Custom Media List - Europe - August 2011

The **Xerox CUSTOM Media List** contains custom media that has been tested on the Xerox iGen4 90/110 Digital Production Press for image quality and performance.
 Custom media on this list are digitally optimized, designed and manufactured for performance in Xerox digital printing equipment.
 Best Practices for Operation are outlined below.
 Customers should validate the Best Practices for Operation are acceptable for their application.
Any alterations to the product's basic design, including sheet size, must be tested and approved by the Xerox Media & Compatibles Technology Center.
 When purchasing a particular media product for the first time, customers are advised to purchase small quantities to insure that expectations are met.
 CUSTOM media may be ordered through the Xerox Supplies Account Manager.

Xerox iGen4 90/100 Digital Production Press, Xerox iGen4 220 Perfecting Press and iGen4 Xerox Automated Packaging Solution Configuration Custom Media List - Europe - August 2011

The **Xerox CUSTOM Media List** contains custom media that has been tested on the Xerox iGen4 90/110 Digital Production Press for image quality and performance.
 Custom media on this list are digitally optimized, designed and manufactured for performance in Xerox digital printing equipment.
 Best Practices for Operation are outlined below.
 Customers should validate the Best Practices for Operation are acceptable for their application.
Any alterations to the product's basic design, including sheet size, must be tested and approved by the Xerox Media & Compatibles Technology Center.
 When purchasing a particular media product for the first time, customers are advised to purchase small quantities to insure that expectations are met.
 CUSTOM media may be ordered through the Xerox Supplies Account Manager.

Xerox iGen4 90/100 Digital Production Press, Xerox iGen4 220 Perfecting Press and iGen4 Xerox Automated Packaging Solution Configuration Non-Xerox Tested Media List - Europe - August 2011

The **Non-Xerox Tested Media List** contains non-Xerox branded paper and specialty media. Xerox has tested many media products on the Xerox iGen4 90/100 Digital Production Press and based on such testing have published this list of tested media products which may or may not, at the time of and based upon such testing, meet Xerox performance criteria. No subsequent testing has been done and therefore no determination can be made as to whether or not such products would currently fail or pass Xerox performance criteria.

Green - Good test results, purchase a small quantity to insure expectations are met.

Yellow - Customer should validate the limitations are acceptable for their application.

Not Recommended

Xerox makes no guarantees or warranties, either expressed or implied, concerning the performance, use, consistency or replacement of non-Xerox branded media or throughput products. Customers should inquire directly of their paper distributor or manufacturer for any guarantees they may offer. When purchasing a particular media product for the first time, customers are advised to purchase small quantities to insure that expectations are met. For guaranteed best performance, use digitally optimized paper and specialty media from Xerox Supplies.

Xerox iGen4 90/100 Digital Production Press, Xerox iGen4 220 Perfecting Press and iGen4 Xerox Automated Packaging Solution Configuration Non-Xerox Tested Media List - Europe - August 2011

The **Non-Xerox Tested Media List** contains non-Xerox branded paper and specialty media. Xerox has tested many media products on the Xerox iGen4 90/100 Digital Production Press and based on such testing have published this list of tested media products which may or may not, at the time of and based upon such testing, meet Xerox performance criteria. No subsequent testing has been done and therefore no determination can be made as to whether or not such products would currently fail or pass Xerox performance criteria.

Green - Good test results, purchase a small quantity to insure expectations are met.

Yellow - Customer should validate the limitations are acceptable for their application.
