Coolant Tubes, Heating and Cooling

Tubos de refrigerante, calefacción y refrigeración

When you think about the environment in which a coolant tube operates, it's hard to believe they are made the way they are. You've seen these parts replaced over and over again. Coolant tubes fail early and often. Why? The parts are poorly designed!

You're sick of it, and so are we. So we decided to do something about it! Through the collection and examination of failed OE parts, our product team has been able to target the most failure prone coolant tubes, the ones you have to replace at an alarming rate. We've beefed up the weak spots. We've gotten rid of mild steel and replaced it with high-quality stainless. The result: a more reliable solution for you and your truck.

Los tubos del refrigerante transportan agua desde el radiador hasta el bloque del motor. Debido a esta proximidad con el motor, estas piezas son estresadas constantemente por las vibraciones y las altas temperaturas que existen bajo el capó del camión. El estrés de este entorno puede causar los tubos a corroer, mohorarse, romperse y fugas, resultando en las tasas de sustitución alto.

Los tubos refrigerantes reestructurados por Dorman están contruidos con un material actualizado de acero inoxidable. Esto ayuda a reducir la corrosión, resultando en una piezas de muy buena calidad y muy confiable.

COOLANT TUBES

Coolant Tube

Dorman# 936-5201 **OE#** A05-16380-003

Make: Freightliner

Years: 2011-99

Models: Century Class, Argosy, Columbia

Notes: Detroit Diesel Series 60

Material Upgraded to Stainless Steel

Coolant Tube

Dorman# 936-5202 **OE#** A05-16384-001

Make: Freightliner

Years: 2011-90

Models: FLD, Century, Columbia

Notes: Caterpillar C15 3406E

Material Upgraded to Stainless Steel

Coolant Tube

Dorman# 936-5403 **OE#** K181-5141

Make: Kenworth

Years: 2011-90

Models: W900B, W900L

Notes: Caterpillar C15 3406E, & 3176

Material Upgraded to Stainless Steel

Coolant Tube

Dorman# 936-5404 **OE#** K181-5483

Make: Kenworth

Years: 2003-90

Models: T800, T600

Notes: Caterpillar C15 3406E, & Acert

Material Upgraded to Stainless Steel

Coolant Tubes, Heating and Cooling

Tubos de refrigerante, calefacción y refrigeración

Coolant Tube

Dorman# 936-5405 **OE#** K181-5597

Make: Kenworth

Years: 2011-95

Models: W900L, W900B

Notes: Caterpillar C15 3406E

Material Upgraded to Stainless Steel

Coolant Tube

Dorman# 936-5401 **OE#** 07-06464

Make: Peterbilt

Years: 2004-90

Models: 379, 378, 377, 357

Notes: Cummins N14

Material Upgraded to Stainless Steel

Coolant Tube

Dorman# 936-5402 **OE#** 07-06462

Make: Peterbilt

Years: 2005-87

Models: 379, 378, 377, 357

Notes: Caterpillar C15 3406E

Material Upgraded to Stainless Steel

Coolant Tube

Dorman# 936-5501 **OE#** 20561364

Make: Volvo

Years: 2008-01

Models: VN

Notes: Cummins & Volvo N14, D12

Material Upgraded
to Stainless Steel

Coolant Tube

Dorman# 936-5502 OE# 20357260

Make: Volvo

Years: 2011-00

Models: VN, VNL, VHD

Notes: Cummins & Volvo ISX, D12

Material Upgraded to Stainless Steel

Air Door Actuator

Dorman# 604-5101 OE# 3542606C1

Make: International

Years: 2009-03

Models: 4000, 7000,
8000, 9000, Prostar

Heater Hose Connector

Dorman# 800-401 OE# 15622861

Make: GMC

Years: 2002-30

Models: C3500, C4500, C5500

Notes: Heater hose inlet of $\frac{5}{8}$ and
thread size $\frac{1}{2}$ NPT

HVAC Knob Kit

Dorman# 702-5402 OE# FD1240

Make: Kenworth

Years: 2009-03

Models: T-Series, W-Series

Notes: Bergstrom HVAC system

Kit Includes Three Knobs

Coolant Tubes, Heating and Cooling

Tubos de refrigerante, calefacción y refrigeración

HVAC Knob Kit

Dorman# 702-5401 OE# 121-0001-000

Make: Peterbilt

Years: 2011-87

Models: 357, 367, 375, 378, 379, 386, 387, 330, 335

Notes: Sprague HVAC system

Kit Includes Three Knobs

Radiator Fan Assembly

Dorman# 620-5601 OE# 8-97383-808-0

Make: Isuzu

Years: 2010-94

Models: NPR

Door Handles and Body Parts

Manijas de las puertas y partes para la carrocería

When you consider the amount of wear and tear a door handle goes through in a typical day, it's no surprise why you replace them so often. They take a beating. Truckers pull themselves into the cab using the exterior handles to support their weight, and lean on the interior handles again on the way out of the truck. When you couple this level of wear and tear with constant exposure to the elements you are left with handles that are rusted, damaged and broken.

At Dorman we've focused on the door handles that give you the most problems. We've developed replacement parts for the handles that frequently fail and give you one headache after another. The handles you've sent to us, and asked us to develop an aftermarket alternative for! Dorman HD Solutions has the handles you need. We've got your alternative solution to the dealer.

Manijas de las puertas, se someten a un gran desgaste cada momento que es conducido por un camión. Hay una enorme cantidad de fuerza aplicada a la manija cuando entra y sale de la cabina. Este alto nivel de desgaste se combina con la constante exposición a los elementos y las razones por las cuales debilitan a los tiradores de las puertas aclarándose con el tiempo. Una vez se oxida y se corroe la manija mientras entra y sale de la cabina pueden causar daños e incluso romper la pieza.

Fluid Reservoirs and Engine Parts

Recipientes de líquido y partes para el motor

You've all heard the horror stories. A truck is out of service because of a leaking fluid reservoir. You lose your patience, your temper and worst of all - your profit. These reservoirs are exposed to the harsh conditions that exist under the hood of your truck. Extreme temperatures and constant vibrations yield an endless struggle that these parts will ultimately lose.

By soliciting the help of technicians, Dorman has been able to leverage firsthand experience to identify the most in-demand fluid reservoirs. The coolant tanks and washer bottles that never seem to stay on your truck long enough. We've examined common failure patterns and redesigned our parts to reduce or eliminate these conditions. We've upgraded materials. We've eliminated leak prone areas.

Los depósitos de líquidos se encuentran normalmente cerca del motor del camión. Las temperaturas extremadamente altas y las fuertes vibraciones que caracterizan a este entorno contribuyen significativamente a fallas en los depósitos de líquidos. Cuando están expuestos a altas temperaturas durante un período prolongado de tiempo, las botellas pueden fundirse y deformarse, resultando en pérdidas. La presión adicional de las vibraciones del motor puede causar ciertos materiales quebrarse y romperse.

Los depósitos de líquidos también se reemplazan con frecuencia debido al desgaste de los lugares de montaje. Con el tiempo, las temperaturas extremas y las vibraciones del motor pueden debilitar el montaje hasta el punto de hacer grietas o romperlo, necesitando un reemplazo de embalse.

OE NUMBERS CAN TYPICALLY BE FOUND ON THE SURFACE OF FLUID RESERVOIR CAPS

OE NUMBERS CAN TYPICALLY BE FOUND PRINTED ON THE SIDE OF FLUID RESERVOIRS

Coolant Tank

Fuel Senders, Fuel and Emissions

Envíos de combustible, combustible y emisiones

You hear about it every day. It's the same old story. The cost of fuel is rising and proper fuel management is becoming more important than ever. You more than likely take the appropriate steps to make sure that you are conserving as much fuel as possible. You go to extreme lengths to make sure you aren't wasting money. Nothing could be worse than going to these lengths only to find out that your fuel sender isn't displaying an accurate fuel level.

In researching the Dorman HD Solutions fuel senders, our product team reached out to technicians and repair shops in an effort to develop comprehensive solutions to common problems associated with faulty fuel senders. As a result, we provide a complete offering of part alternatives to failure prone fuel level senders. These senders are sold as a kit and each includes the gasket needed for a complete repair. This comprehensive solution helps you to cut down on product cost and repair time.

Los remitentes de combustible se encuentran dentro del tanque de combustible y constantemente están sumergidos en el combustible. Con el tiempo, la exposición a este entorno puede causar daños a las unidades. El combustible puede hacerse gelatina (gel) y se adhieren a distintas zonas del remitente, causando lecturas inexactas o un brazo de nivel incautado. También, los aditivos del combustible pueden ser desgastados fuera del material del remitente, causando patrones similares de fracaso.

Como el costo del combustible sigue aumentando, preocuparse por el combustible es cada vez más importante que nunca. Sin embargo, es difícil vigilar adecuadamente la eficiencia del combustible sin obtener una lectura del nivel de combustible precisa. Lecturas del nivel de combustible falso pueden resultar en pérdida de tiempo y gastos innecesarios.

SOLUTIONS

A Better Alternative to the OE Dealer

Dorman offers Formerly “Dealer Only” Parts to the Heavy Duty Aftermarket

Customers benefit from the added value of the products offered through the Dorman HD Solutions™ program:

Dorman parts are often redesigned to provide a more reliable parts solution. Through the collection and examination of failed OE parts our engineers are able to determine how and why parts fail. Even more importantly, they are able to redesign parts with a focus on reducing (or eliminating) common failure patterns. Better designs and better materials result in more reliable parts you can take advantage of.

Many Dorman parts are offered as Complete Kits. With an eye towards saving you time and money, Dorman’s product teams solicit feedback from technicians and field professionals to properly understand everything that is required for a complete repair for some specific parts. The input Dorman collects from professionals with firsthand experience is then leveraged into the development of Dorman Complete Kits – parts that provide you with everything needed to complete the job. One phone call, one part number – saves you money and cuts down on repair time.

IMPROVED PARTS FOR BETTER RELIABILITY

Hood Cable

Our heavier gauge cable is designed with upgraded materials, increasing strength and reliability.

Dorman #
924-5402

Original Hood Cable

Fluid Reservoir

Our transparent bottle makes the need for a sight gauge obsolete, thereby eliminating two possible leak points.

Dorman #
603-5602

Original Fluid Reservoir

INCLUDES EVERYTHING NEEDED FOR A COMPLETE REPAIR

Door Check

One Dorman kit saves time and money by providing four parts that the Dealer offers only separately.

Dorman # 924-5401 (Includes All Parts Shown)

Headlights and Lighting

Faros e iluminación

Nothing ruins the appearance of a stunning truck like a faded or broken headlight. You work hard to keep your rig looking great. In an instant, a collision or debris kicked up from the road can ruin that image. Headlights also wear over time and leave you with that yellowish tint that we have all seen before. You never want to see these situations happen but, unfortunately, they are inevitable.

With new CSA regulations in place, the stakes have never been higher. Drivers are at risk of having their licenses suspended if they fail to comply with these regulations. You can no longer afford to put off the replacement of a headlight. The next time you find yourself in this situation, rest assured that Dorman will be your source for application-specific headlights.

Los faros pueden sustituirse por una variedad de razones diferentes. Quizás las razones más evidentes para sustituir los faros son las colisiones. Es prácticamente inevitable que con el tiempo un camión esté involucrado en un accidente, y los faros tendrán que ser sustituido inmediatamente.

Los faros también pueden desgastarse con el tiempo. Los materiales del lente con el cual se construyen los faros pueden desgastarse, causando la emisión un tinte amarillento opaco al rayo de luz. Reglamentaciones nuevas del CSA amenazan con poner faltas a la licencia del conductor, así que deben cambiarse las luces desgastadas y opacas sin ninguna demora.

Hood Springs, Latches and Components

Resortes del capó, cierres y componentes

It seems that any time you open the hood of a truck you see nothing but rust on the components that actually hold that hood in place! When you think about the weight associated with the hood of a truck it is shocking that the hood components expected to support this load are often found in such deteriorating condition. Aside from exposure to contaminants, excessive engine heat and vibration – the parts also suffer from poor designs!

Dorman has been able to identify and develop a complete line of alternatives for these failure prone components. By hitting the streets and examining both fleet and salvage vehicles, our engineers have identified the most sought out hood components and made them more reliable. Materials have been improved from low-grade metals to high quality stainless steel and many components are offered as complete kits containing everything you will need to complete the job.

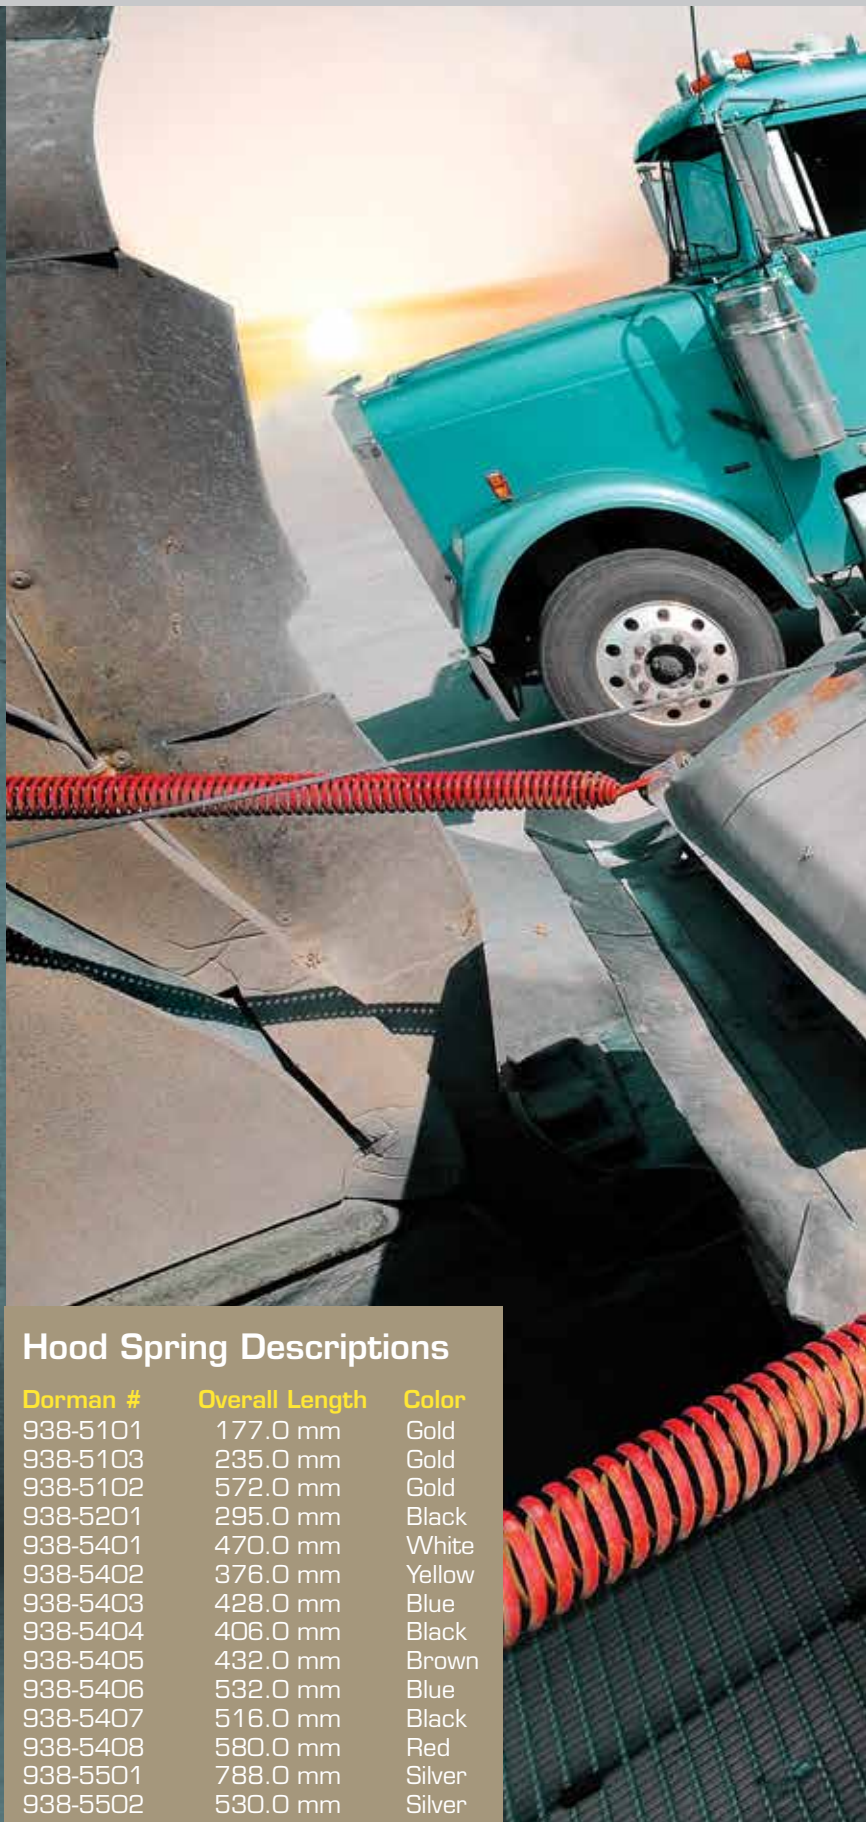

Los Resortes del capó se encuentran bajo el capó del camión, donde nada protege contra la exposición del aire húmedo y las condiciones climáticas difíciles. Como muchas otras piezas, los resortes del capó son vulnerables a óxido y la corrosión, que hace que se debiliten. Como el capó de un camión es muy pesado, un resorte debilitado puede fácilmente soltarse y romperse.

El capó típicamente es sostenido por una serie de resortes. Si uno de los resortes falla, por excesivo peso los demás resortes potencialmente podrían provocar un fallo también.

La exposición extendida a temperaturas frías también puede ser perjudicial para los resortes del capó, causando que sean frágiles y se debiliten. Como los resortes deben expandirse para acomodar el peso del capó cuando esté abierto, los efectos perjudiciales del clima frío pueden hacerlos más susceptibles a soltarse y romperse.

Kits Include Latch, Mounting Brackets and Hardware.

Hood Latch Kit Right/Left

Dorman# 315-5101 **OE#** 499523C3 (Latch Only),
1699929C9

Make: International

Years: 2011-79

Models: 1000, 2000, 4000, 7000, 8000,
9000 and S-Series

Kits Include Latch, Mounting Brackets and Hardware.

Hood Springs, Latches and Components

Resortes del capó, cierres y componentes

Hood Latch Kit Right/Left

Dorman# 315-5401 **OE#** L56-0001

Make: Kenworth

Years: 2011-87

Models: W900, T600, T300, T800

Kits Include Latch, Mounting Brackets and Hardware.

Hood Latch Kit Right/Left

Dorman# 315-5402 **OE#** K147-107

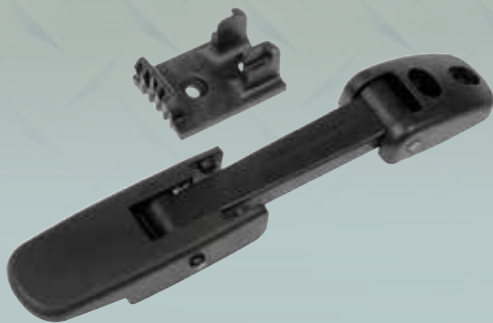

Make: Kenworth

Years: 2005-87

Models: Models W900B, T600A

Notes: 1987-85 T800

Kits Include Latch, Mounting Brackets and Hardware.

Hood Latch Kit Right

Dorman# 315-5502 **OE#** 25169065

Make: Mack

Years: 2011-01

Models: CH, CHN, CXN, CV

Notes: From 05/09/01

Kits Include Latch, Mounting Brackets and Hardware.

Hood Latch Kit Left

Dorman# 315-5503 **OE#** 25159428

Make: Mack

Years: 2011-02

Models: CH, CHN, CXN, CV

Notes: From 05/09/01

Kits Include Latch, Mounting Brackets and Hardware.

Hood Springs, Latches and Components

Resortes del capó, cierres y componentes

Hood Latch Kit Right/Left

Dorman# 315-5401 **OE#** L56-0001 (Latch Only),
23-13857 (Kit)

Make: Peterbilt

Years: 2011-87

Models: 357, 359, 367, 377, 378, 379,
388, 389

Kits Include Latch, Mounting Brackets and Hardware.

Hood Latch Kit Right/Left

Dorman# 315-5501 **OE#** 8174018

Make: Volvo

Years: 2002-91

Models: AC, WA, WC, WG, WI

Kits Include Latch, Mounting Brackets and Hardware.

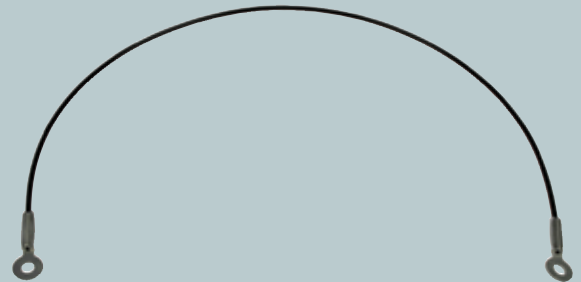

Hood Cable

Dorman# 924-5206 **OE#** A17-12082-000

Make: Freightliner

Years: 2005-89

Models: FLD, FLC, Classic models

Hood Cable

Dorman# 924-5207 **OE#** A17-12081-000

Make: Freightliner

Years: 2005-89

Models: FLD, FLC, Classic models

Hood Springs, Latches and Components

Resortes del capó, cierres y componentes

Hood Cable

Dorman# 924-5501 **OE#** 25152850

Make: Mack

Years: 1995-90

Models: CH models with Axle Forward

Hood Cable

Dorman# 924-5502 **OE#** 25171452

Make: Mack

Years: 2003-90

Models: RD models

Hood Cable

Dorman# 924-5402 **OE#** L92-6000-0718

Make: Peterbilt

Years: 2005-87

Models: 357, 367, 375, 377, 378, 379

Notes: Improved Design With Heavier Cable Gauge And Upgraded Materials

Speed Sensors and Tachometer Sensors

Sensores de velocidad y sensores de tacómetro

Speed sensors and tachometer sensors are responsible for reading important information regarding the performance of your truck. Unfortunately, these sensors are not always engineered to handle these tasks. The parts are constantly stressed due to their location. Plastic material is often used to create these parts which can become brittle and wear from the extreme temperatures and road debris that constantly bombard them.

Our focus in developing alternatives for speed and tachometer sensors centers on overcoming these common failure patterns. After investing resources examining faulty sensors with an eye towards alternative designs, our parts were developed using a magnetic sensor made from a stronger aluminum material. This improvement eliminates many of the problems associated with plastic sensors. With the Dorman HD Solutions sensors, you are left with a more dependable part and a more dependable truck.

Los sensores de velocidad y tacómetro están bajo constante presión debido a su ubicación. La exposición a los elementos amenaza la longevidad de estas piezas: el calor y frío extremo pueden desgastar los materiales de los cual están contruidos los sensores. Por otra parte, el agua de la carretera puede salpicar en ellos y potencialmente congelar en hielo, haciendo la función magnética funcione pobremente y posiblemente se desgaste en tamaño. Incluso los desechos levantados desde la carretera durante la operación del vehículo pueden dañar los sensores. Cualquiera que sea la causa, con el tiempo, la parte puede dañarse, causando información inexacta para el conductor del camión.

Speed Sensor

Dorman# 505-5201 OE# SAA85920008

Make: Freightliner

Years: 2011-89

Models: All Freightliner models

Notes: A screw in speed sensor with a Merritor transmission with an internal tone ring

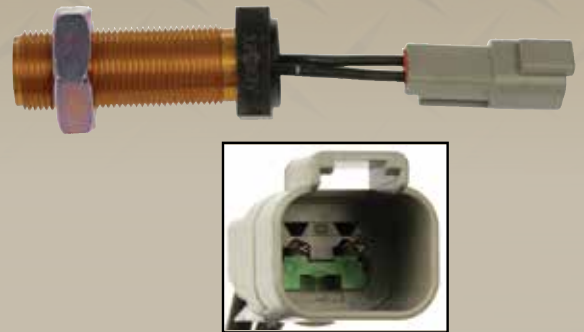

Speed Sensor

Dorman# 505-5104 OE# 2503117C1

Make: International

Years: 1998-90

Models: 9600, 9700

Speed Sensor

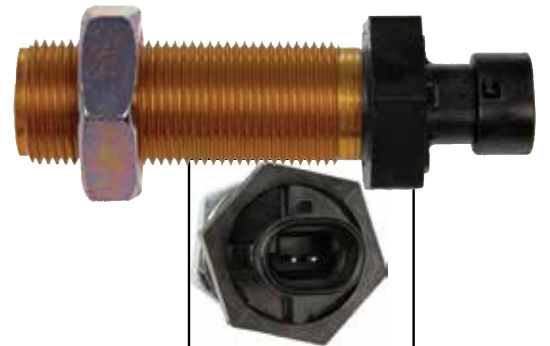

Dorman# 505-5105 OE# 3528003C1

Make: International

Years: 2007-97

Models: 1000, 4000, 5000, 7000, 8000, and 9000 series

Notes: Built after May 1997 and later

Speed Sensor

Dorman# 505-5505 OE# 25166488

Make: Mack

Years: 2010-89

Models: All Mack models

Notes: Screw in sensor with Eaton Transmission

Speed Sensors and Tachometer Sensors

Sensores de velocidad y sensores de tacómetro

Speed Sensor

Dorman# 505-5512 OE# 20706327

Make: Mack

Years: 2011-97

Models: All Mack models

Notes: Push in sensor in timing cover or bell housing

Speed Sensor

Dorman# 505-5510 OE# 8029939

Make: Volvo

Years: 2011-89

Models: All Volvo models

Notes: Detroit Diesel

Tachometer Sensor

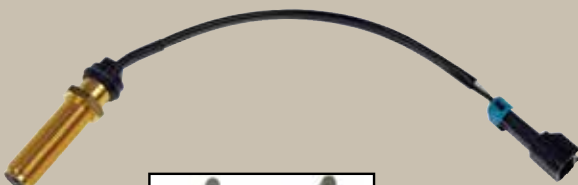

Dorman# 505-5501 OE# 64MT2105M

Make: Mack

Years: 1995-87

Models: RD, CH Models

Notes: Mack engine

Tachometer Sensor

Dorman# 505-5504 OE# 64MT435

Make: Mack

Years: 2001-90

Models: CH, MR models

Notes: Magnum 430HP

Tachometer Sensor

Dorman# 505-5506 OE# 64MT440M

Make: Mack

Years: 2010-89

Models: RD, CH Models

Notes: All except Magnum 430HP

Tachometer Sensor

Dorman# 505-5511 OE# 8078108

Make: Volvo

Years: 2011-89

Models: All Volvo models

Notes: Detroit Diesel

Tachometer & Speed Sensor

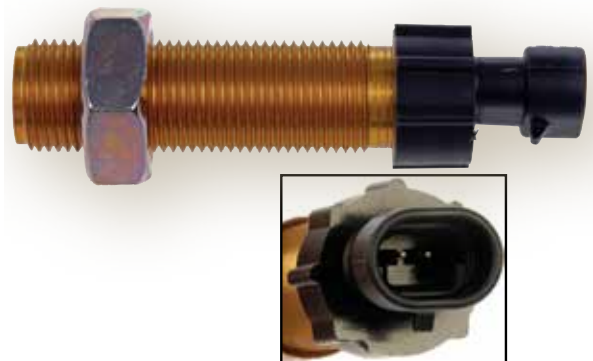

Dorman# 505-5406 OE# Q21-6005

Make: Kenworth

Years: 2011-95

Models: All Kenworth models

Notes: Eaton trans with internal tone ring, mounts in tailshaft

Tachometer & Speed Sensor

Dorman# 505-5407 OE# K3454

Make: Kenworth

Years: 2011-95

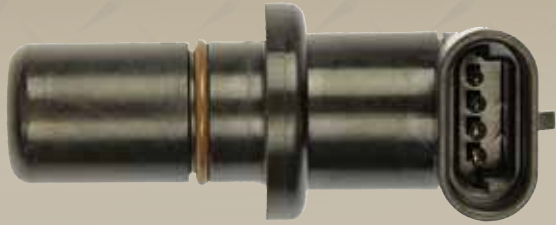

Models: All Kenworth models

Notes: Eaton trans that has external tone ring (2 pin connector)

Speed Sensors and Tachometer Sensors

Sensores de velocidad y sensores de tacómetro

Tachometer & Speed Sensor

Dorman# 505-5408 **OE#** K3455

Make: Kenworth

Years: 2011-95

Models: All Kenworth models

Notes: Eaton trans that has external tone ring (4 pin connector)

Tachometer & Speed Sensor

Dorman# 505-5507 **OE#** 64MT412M

Make: Mack

Years: 1990-67

Models: RD, CH, MR, DM models

Tachometer & Speed Sensor

Dorman# 505-5406 **OE#** Q21-6005

Make: Peterbilt

Years: 2011-95

Models: All Peterbilt models

Notes: Eaton trans with internal tone ring, mounts in tailshaft

Tachometer & Speed Sensor

Dorman# 505-5407 **OE#** K3454

Make: Peterbilt

Years: 2011-95

Models: All Peterbilt models

Notes: Eaton trans that has external tone ring (2 pin connector)

Tachometer & Speed Sensor

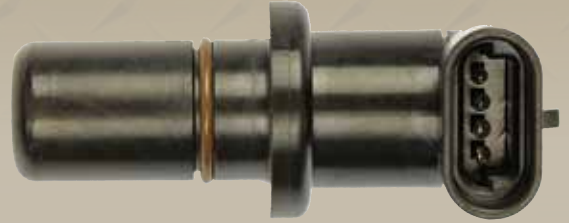

Dorman# 505-5408 **OE#** K3455

Make: Peterbilt

Years: 2011-95

Models: All Peterbilt models

Notes: Eaton trans that has external tone ring (4 pin connector)

4WD Transfer Case Motor

Dorman# 600-909 **OE#** 88962312

Make: GMC

Years: 2008-05

Models: C4500, C5500 Series

Window Regulators and Window Parts

Reguladores de ventana y partes para la ventana

There is no feeling quite like it. The sky is blue, the sun is shining, and you have your arm rested on your door with the wind in your hair. It is an amazing feeling. Nothing should prevent a driver from being able to experience this sense of freedom. Unfortunately, a damaged window regulator will do just that.

You roll your window down for a variety of reasons: paying tolls, smoking, enjoying the weather, communicating with people and any number of other reasons. Losing the ability to simply operate the window normally can make your drive uncomfortable. Poor design and low quality materials are often contributing factors when dealing with broken regulators. Through the collection of these failed samples and rigorous cycle testing done in our state-of-the-art laboratory Dorman has developed window regulators that meet the needs of the only person that matters... you.

Los reguladores de la ventana comúnmente fallan debido a la frecuencia con que se utilizan las piezas. El conductor baja sus ventanas por diferentes razones: fumar, pagar peajes, disfrutando del clima, comunicarse con personas, etc. Su funcionamiento regular hace que esta pieza se desgaste en una cantidad considerable.

Los reguladores de la ventana manual tienen los dientes del engranaje que permiten a la ventana para subir o bajar. Estos dientes pueden desgastarse con el tiempo y eventualmente causar que el regulador brinque o deje de funcionar completamente.

Los reguladores de la ventana con motores de potencia también suelen fallar. Con el tiempo, los cables que suben y bajan la ventana pueden debilitarse y soltarse, y pueden desgastar los dientes del engranaje del motor del interfaz con el regulador. Con cualquiera de estos acontecimientos va a necesitar reemplazar la pieza.

Wiper Transmissions and Dash Components

Transmisiones del limpiaparabrisas y componentes para el tablero de instrumentos

Your truck needs to be on the road regardless of the weather conditions. Rain, snow or sleet won't prevent you from making your delivery. When a truck is out in these conditions the vehicle is depending heavily on the windshield wiper system. As you know, nothing is more critical to this system than a solid wiper transmission.

Unfortunately these parts are often developed poorly. Plastic is frequently used as a bushing in the pivot assemblies. This material fatigues quickly and can end up causing the failure of the entire unit. Dorman has developed part alternatives for the wiper transmissions that fail the most regularly. We've taken the time to work with technicians and fleet specialist to determine which units fail and take steps to develop solutions that keep you and your truck running reliably. The next time the weather is worrisome you won't have to worry at all.

Las transmisiones del limpiaparabrisas aguantan mucho desgaste. El plástico que se utiliza como un casquillo en muchos de los enchufes es particularmente sujetas a daños. El plástico se fatiga fácilmente y finalmente fracasa, haciendo que la transmisión del limpiaparabrisas fracase. Si los pivotes son expulsados de la línea al limpiar los desechos en el parabrisas a mano o con unas herramientas, pueden producir efectos similares. Independientemente de la causa, una transmisión dañada debe ser reemplazada inmediatamente.

Los camiones tienen que estar en el camino independientemente de las condiciones meteorológicas. Por lo tanto, es esencial un sistema fiable de limpiaparabrisas, y nada es más importante para este sistema que la transmisión del limpiaparabrisas. Controla las manijas del limpiaparabrisas, ayudando a asegurar que el parabrisas se mantenga claro durante la lluvia, aguanieve y nieve.
