Complete Riders Troubleshooter Manuals On A Single DVD Disc!

Tired of changing CD's? Tired of getting "that" schematic on your old radio where you can't read the values? REA has sold hundreds of this DVD-ROM publication at a break-through price. REA created the first Riders Professional CD-Series

that is the ONLY database driven system ever created and is the "standard" that others are judged by. Now we are providing a lower cost alternative to our earlier CD-ROM database driven series. Every collector or restorer who repairs radios should own this DVD. Requires Windows on a PC to use it. It requires nothing to download as it has its own built in digital browser that allows viewing, magnification, rotation and printing to your own printer. This DVD holds almost 120,000 of the early radio models made from 1920 to 1954. A true price breakthrough yet with no sacrifice in quality. A professionally produced product.

Only \$ 199 + \$ 6 S&H (Sold only on DVD)

Coming Soon, The First 200 Sam's Photofact sets on a Radio Era DVD-ROM electronic publication - call for information

ANTIQUE RADIO CLASSIFIED

EDITOR'S COMMENTS

Once upon a time, antique radio collectors thought that the only collectibles were early wireless and battery sets. How our horizons have broadened! First came AC sets and then on to transistor radios and hi-fi equipment. The pages of A.R.C. over the years attest to the fact that collecting now encompasses the changes in the radio technology of each decade. The industry has catered to the tastes and needs of the times, and so, among the traditional sets of a period, an unusual one may surface.

Richard Arnold's article about the 1957 Sylvania "Prospector" is an excellent example. Here is a portable radio apparently designed for Cold War times, complete with sundial, compass, and Geiger counter. Richard doesn't even own the radio, but took writing about it on as a challenge from friends who supplied the information. This kind of collaboration offers all of us the opportunity to learn about what's "new" on that ever-expanding radio-collecting horizon.

Of course, what's new *and* old attracting the eyes of collectors becomes most evident at meets and auctions. High on the list of annual successful meets is our own GBARC Radio XXXVII, reported again by Managing Editor Dorothy Schecter. Probably the largest meet on the East Coast, it hosted over 600 buyers and sellers in a facility filled with 98 tables. The "old guard" were there as usual, but what was really striking was the number of young people — and even younger family members — present. From that vantage point, the future of radio collecting looks bright.

The VRPS spring auction, though a smaller event than its fall convention and auction reported last month, was also well attended. High-end items were not prevalent in this auction, but the large quantity — over 400 items — made for a very respectable total of over \$20,000. VRPS always does a commendable organizational job in planning such events.

In that regard, A.R.C. is being forced to plan for an internal cataclysmic event, as you will see from our "Staff Profile." Pat Wedge, our office manager, and her husband, have decid-

ed to pull up New England stakes and head for North Carolina. Dorothy Schecter's article will tell you all the reasons, but, of course, we're having difficulty accepting the inevitable. Our only consolation is that we'll give her a royal send-off at the historic Concord Colonial Inn as a reminder of her Concord roots. Maybe that will change her mind.

Phil Bliss certainly changed his mind when he gave up looking for a Crosley Pup. Instead, he built one, albeit with a wood, rather than a metal cabinet. A successful outcome like this one has to give a great deal of satisfaction to the creator.

A book, of course, is another kind of creation requiring painstaking work. Reviewers Jim Monaghan and Dave Crocker found Kyle Husfloen's new price guide for radio and TV to be a solid effort. They are particularly impressed with the excellence of the TV section and recommend the book highly to TV collectors.

Getting back to the theme of the unusual showing up among a manufacturer's products, note the 1930s Dictograph set in *Photo Review* this month. Given the company name, the expectation would be that the set would have some capacity for dictation. After all, if a set can have a Geiger counter, why not a capability for dictation? Not so. It's a 6-tube set, pure and simple. Five other early sets are shown; one is the rarely seen Kennedy III.

A.R.C. Benefits. Be sure to take advantage of A.R.C. benefits: a toll-free number (866) 371-0512; Discover, MasterCard, American Express, Visa accepted; the Web, www.antiqueradio.com; books shipped free in the U. S. by USPS media mail; and for current subscribers, a 10 percent discount on all book orders.

Coming Radio Events. Time to get out and enjoy the spring weather at a nearby meet. There are 17 listed this month, including NVCF in the U.K., Kutztown, Pennsylvania, and Radio Daze in Minnesota. There are also 25 meetings and three auctions — more than enough to keep you busy.

Happy Collecting!

John V. Terrey, Editor

OOPS!

Our report on the November 19, 2005, Estes auction mistakenly said that the Floyd Stahl collection was included with that of Edward Sage. Instead, the collection of Roger Varn of Canton, Ohio, was included. Although the Stahl collection was advertised to be included with the Sage collection, it will be auctioned later this year.

ON THE COVER

The cover illustration is from a 1957 Sylvania brochure advertising the "Prospector," an AC/DC portable radio with a built-in Geiger counter. Our thanks to Randy Bassham who supplied the brochure to Richard Arnold for his article on this set. There's more than one way for collectors to help each other in an effort to preserve radio history.

WITH THE COLLECTORS

The Sylvania 3401 "Prospector" A Radio with Geiger Counter and More

BY RICHARD ARNOLD

Ever on the lookout for an unusual radio to buy and make the subject of an A.R.C. article, Richard Arnold's approach this time is slightly different. He doesn't own the radio, but he's met the owner's challenge to turn the information offered into an article. Another stroke of good luck for A.R.C. (Editor)

Here is a story of a very unusual radio that I'll bet not many of you have ever heard about — a 1957 Sylvania 3401 portable AM radio that has a Geiger counter built into it.

One day, I was at the home of a collector/friend who knew that I liked to do research on radios and write about them for *Antique Radio Classified*. A friend of his had sent him some information on this set, and he offered it to me, saying, "Here, see what you can do with this."

Well, I guessed that was a

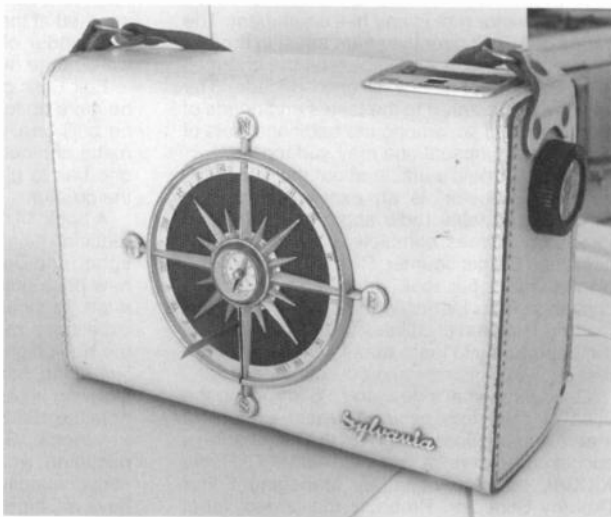

Figure 1. The Sylvania "Prospector" Model 3401 is housed in a leather case. What appears to be a radio dial is actually a compass and sundial. This radio is unusual in that it includes a Geiger counter.

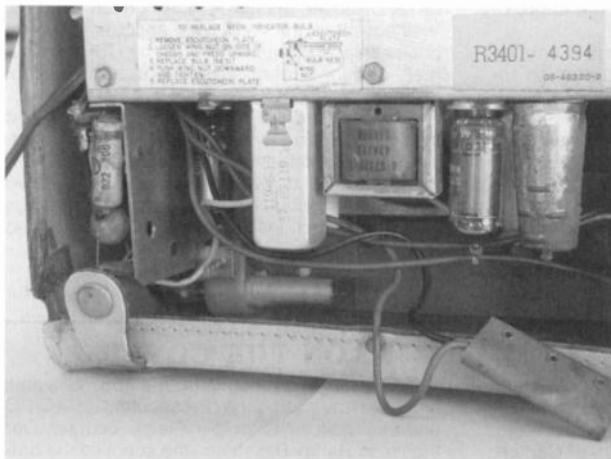

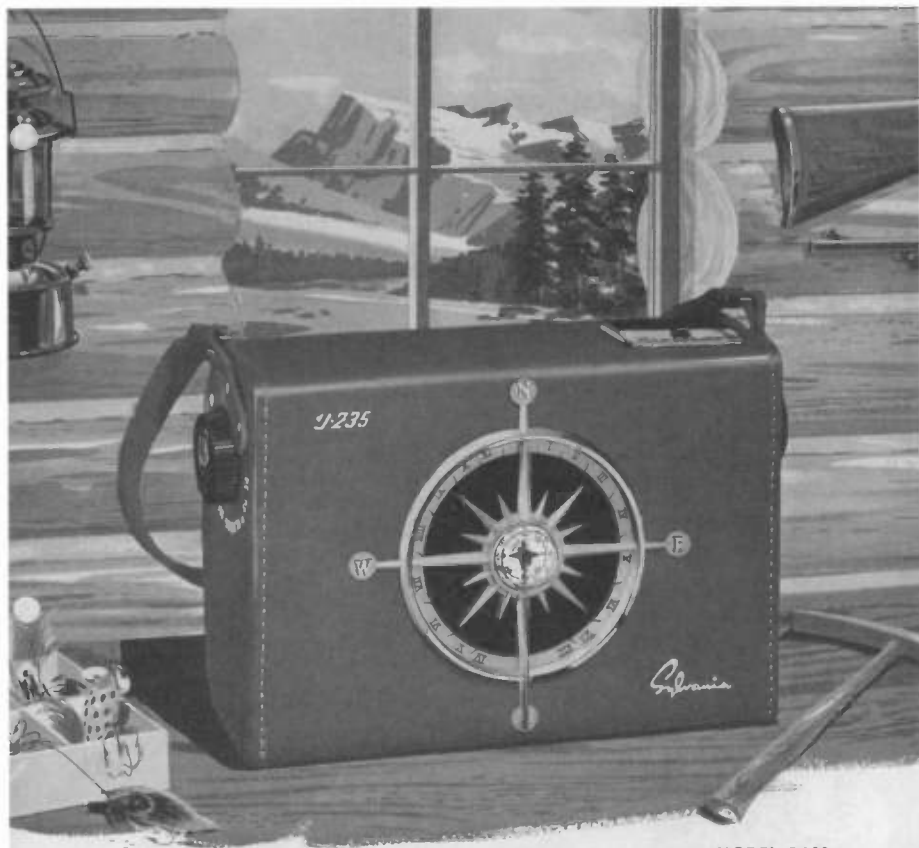

Figure 2. An interior view of the Prospector's inverted chassis and Geiger-Muller tube shown horizontally at the bottom.

challenge, and that is why I have decided to write this article. To begin, I contacted some collectors who own one of these rare radios on the Antique Radio Forum. They were willing to take the time to make their information available to me, and so I am able to put together this story.

THE SYLVANIA MODEL 3401

The Sylvania Model 3401, called the "Prospector," is a 1957, AC-battery, portable, shown in Figure 1. The radio is an AM receiver with a Geiger counter, and it comes in a leather case with a shoulder strap. There are two model numbers given: One is a 3401TA in a tan leather case, and the other, a 3401BG. They both use

MODEL 3401

THE **SYLVANIA** *Prospector* **AC/DC-BATTERY PORTABLE RADIO**

with built-in **GEIGER COUNTER...SUN DIAL...COMPASS**

Sportsmen and fun lovers alike will find all the thrills of modern outdoor living built into this completely new portable. Built-in geiger counter, compass and sun dial add a zestful flavor to its rugged outdoor appeal. Sensitive, fool-proof geiger counter provides dual indication of radioactivity.

Powerful 6-tube performance deems the Prospector a rugged fringe performer, too, with ample power for remote reception. Built-in Ferrite Loop antenna and heavy-duty Alnico speaker insure strong, clear reception . . . top-notch tone clarity. Compact leather case crafted in top-grain Cowhide, hand-stitched for extra strength and durability. Includes adjustable shoulder strap. Available in two distinctive luggage colors with contrasting chrome trim.

From a Sylvania brochure for the "Prospector." The fine print appeals to "sportsmen and fun lovers."

the same chassis, given as number Ch. 1-612-1.

Along with using a selenium rectifier, the radio uses the following tubes: one each of a 1R5 as a converter, a 1U4 IF as an amplifier, and a 1U5 detector-AVC & AF amplifier. A 3V4 is used as a power output tube. Now, here is the kicker — the radio also includes one Type VG18 Geiger-Muller tube.

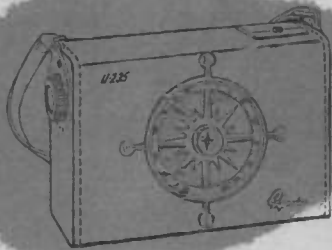

Figure 2 shows an interior view of the radio. Note the inverted chassis and the Geiger-Muller

tube at the left, just below the IF can.

The radio operates on 105-125 volts AC-DC or batteries and tunes in the broadcast band from 540 to 1650 Kc.

The Geiger counter part to this radio is pretty simple. There is a push button which, when pressed, activates a simple buzzer-transformer. The transformer generates a high voltage, which is stored in a capacitor. This high voltage

SYLVANIA

**AC/DC-BATTERY
PORTABLE RADIO**

MODEL 3401

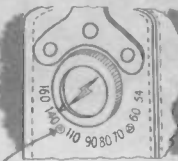

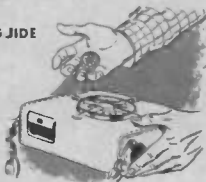

RADIATION DETECTOR

Foolproof Built-in geiger tube features "sight and sound" indication of radioactivity. Speaker gives distinct clicks, neon visual indicator flashes clearly!

TIME AND DIRECTION GJIDE

Operating compass and sun dial built in! Accurately tells time, indicates direction when hunting, fishing, camping, hiking, cycling . . . anywhere outdoors!

CIVIL DEFENSE AID

Hear emergency Civil Defense broadcasts. Special CD channels 640 and 1240 KC clearly marked within tuning range.

STRONG, CLEAR RECEPTION

Powerful Sylvania built chassis features 6-tube performance! Designed to withstand rigors of portable usage, assures constant, strong reception on battery operation. Operates on AC/DC current also.

TOP GRAIN COWHIDE CASE

Crafted in leather for rugged, lasting quality! Entire back of case snaps open, makes battery changing quick and easy. Smartly trimmed in polished chrome!

ADJUSTABLE CARRYING STRAP

Convenient carrying strap adjusts to any size, makes carrying from the shoulder comfortable, provides new ease of portability!

specifications

ANTENNA: Built-in Ferrite Loop.

TUNING RANGE: 535 KC to 1650 KC.

TUBES: 4 receiving tubes, includes 2 dual-purpose tubes, giving equivalent of 6 tube performance, plus 1 rectifier and 1 geiger tube. Neon flasher.

POWER INPUT: 117 volts, AC/DC, 60 cycles, 15 watts.

BATTERY COMPLEMENT: 2 1½ volt A batteries, and 1 90 volt B battery.

SPEAKER: Heavy-duty 4" PM Alnico

CONTROLS: Direct drive 180 degree tuning, ON/OFF and volume, neon radiation indicator and geiger switch.

CABINET: Top-grain Cowhide, hand-stitched for extra strength. Choice of two luggage colors, with contrasting metal trim.

DIMENSIONS: Height 6½", Width 10¼", Depth 3¼", Net weight less batteries 4½ lbs. Shipping weight approximately 6 lbs.

Specifications subject to change without notice

MODEL 3401 AG POLAR BEIGE MODEL 3401 TA LUGGAGE TAN

From a Sylvania brochure. No detail is left out of this list of the wonders of the "Prospector."

(Sylvania prospector, continued)

is what operates the Geiger-Muller tube.

Each time a Uranium particle penetrates the Geiger-Muller tube it discharges (fires). Each time the Geiger tube fires, it passes a small pulse of current, which is coupled into the audio amplifier in the radio and makes a "click" in the speaker. The sudden pulse of plate current in the audio

output tube causes a neon light to flash at the time that the click is heard. The push button and neon lamp are shown in Figure 3.

WHY A GEIGER COUNTER?

When I first saw the pictures of this radio I thought back to the 1950s when I was a kid and we were all somewhat afraid of a nuclear

Figure 3. This close-up shows the Geiger counter's neon lamp indicator at the top and the push button below.

(Sylvania prospector, continued)

attack from Russia. A lot of families back then built bomb shelters and had them stocked with all the necessities to maintain life should an attack have occurred. One of the most important items was a battery radio. I think that this Geiger counter radio could have been used not only to keep up with the news, but also to test the outside air to see if it was safe to venture out.

Well, of course, that was not really the radio's purpose. Back in the 1950s many people were out prospecting for uranium. There was a lot of money to be made up in them thar hills. I found out that this radio was used in prospecting for uranium. So, while someone was running up and down the mountains looking for uranium to make his fortune, he could also be enjoying his favorite AM radio program. Cool!

The radio also incorporates in its construction a built-in compass that is smack in the center of the front of the cabinet, as shown in

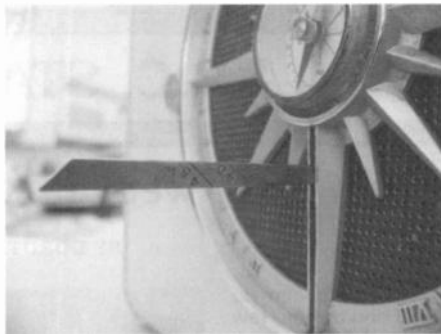

Figure 5. A close-up of the sundial and its pulled-out vane. Note the use of Roman numerals on the sundial's face.

Figure 4. In addition, the radio includes a sundial, shown in Figure 5, with its pull-out vane.

So, this little radio seems to have it all — an AC radio, a Geiger counter, a sundial, and a compass. For the weekend uranium hunter how could he lose?

I have been watching for one to show up on eBay, but so far none has. I have learned from others that they do appear from time to time and usually go for around \$200 or so.

I want to thank Mr. Bill Jeffrey of Scottsdale, Arizona, a senior member of the Antique Radio Forum, for supplying me with the pictures shown in this article. Because of his contribution, we all now have a little more knowledge of what was an obscure little radio. Thanks too to Randy Bassham, also a member of the Antique Radio Forum, for the wonderful color brochure.

My friend Fielding Grigsby of Ardmore, Oklahoma, deserves full credit and thanks for initiating this whole project.

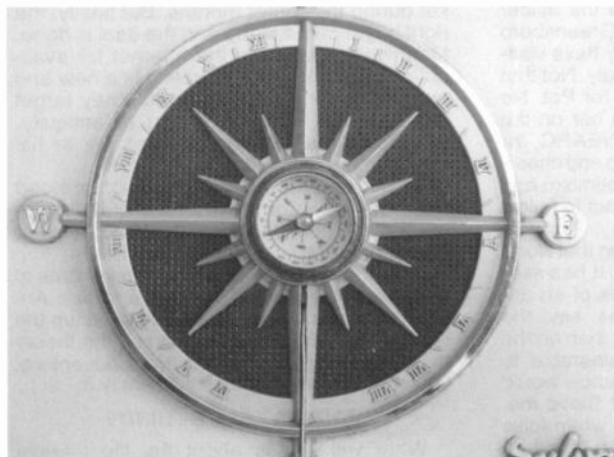

Figure 4. A compass is mounted on the front of the radio and is surrounded by a compass rosette.

(Richard Arnold, P.O. Box 275, Lone Grove, OK 73443)

Richard Arnold, a frequent contributor to A.R.C., has been collecting radios since 1985. His interest is primarily in cathedrals and 1920s battery sets, and his collection ranges from crystal sets to a 1928 American Bosch in a Pooley cabinet. His prize is the 1932 Jackson Bell Peter Pan featured in the June 1991 A.R.C.

A.R.C. STAFF PROFILE

Pat Wedge – Winter Escapee

BY DOROTHY SCHECTER

How could she do it? Abandon her New England heritage — and A.R.C. — for the sunny South? A person who grew up in Concord, Massachusetts, and then actually bought her family homestead after she married, has deep roots here. What could be the driving force?

Well, one more long winter and an adventurous spirit will do it. Yes, much to our regret, Pat, our office manager for the past four years, and her husband Steve are pulling up stakes after a lifetime in Massachusetts. Their two sons are approaching complete independence — one about to graduate in architecture, the other pursuing a degree in music production. And so the time has come to try something new in the several years left before retirement.

They have chosen to move to the milder climate of the Raleigh/Durham/Greensboro area of North Carolina, which they have visited and found interesting and friendly. Not that making friends would be difficult for Pat. No doubt those of you who talk with her on the phone or meet her at AWA, NEARC, or GBARC events know how outgoing and cheerful she always is. Her perennial optimism and upbeat personality will be a hard act to follow for her successor here at A.R.C.

That optimism leads her to reason that North Carolina will be a happy medium. It has seasonal changes, and would be less of an adjustment to climate and terrain as, say, the Deep South. Settling inland rather than on the coast would make them less vulnerable to hurricanes, and, of course, heavy snow would be a rarity. The fact that Pat and Steve met during the famous blizzard of '78 when folks were holed up here for a week can remain a fond memory, no longer a likely reality.

PRACTICAL CONSIDERATIONS

Of course, making such a move before retirement requires job consideration. Fortunately,

ly, Steve's job with an oil industry company as technical support to customers allows flexibility in his base of operation. Whether on a plane or on the telephone or computer, he can do the job almost anywhere. Pat too has the skills to fit into any office situation. With North Carolina's growing economy seemingly assured, Pat and Steve should fit in nicely.

Another serious issue when making such a move has to do with real estate. Fellow staff members here at A.R.C. have lived

through the day-by-day process of selling Pat's house in a softening market. It began with serious cosmetics applied to the house by Steve, followed by placing the property on the market in the summer of 2005.

The ups and downs of the process even included removing the house from the market during the winter months. But finally, the right buyer came along and the deal is done. Meanwhile searching the Internet for available property in North Carolina is a new and exciting game for the Wedges. They target older houses with the charm of antiquity, something that Steve can work on in his spare time.

Of course, the house and neighborhood must also allow for Steve's Ham radio equipment and antenna. No wonder Pat has felt at home in our radio-collecting world.

They have taken trips to the chosen area to view the possibilities that seem limitless. Another choice is to rent while they continue the search. Pat would surely embrace the theory that when you've engaged in an adventure, you should take your time and enjoy it.

WHAT'S LEFT BEHIND?

What will I miss about the life I leave behind? This is a question anyone making a major move must ask. Not the winter, that's clear to Pat. But, there are friends and family, such as her two sisters with whom she shares holidays, an interest in genealogy,

and annual trips. And her sons won't find popping in for a visit so easy.

And then there is, after all, the what might be called "unique" job with A.R.C. "I've never worked in a converted garage before," she quipped, as she also lamented that she wouldn't be around to see the boss's barn/museum to be built right before our eyes.

Variety would have to be the key to describing Pat's job. Yes, "Office Manager" is the category, but how to account for the breadth of the tasks — from the routine ordering of office supplies, books and staff birthday cakes, to answering telephone queries, updating the subscription list, handling renewals and payroll, collecting auction house reports, writing Club News, typing ads, attending meets, and on and on.

A major undertaking has been organizing the Greater Boston Antique Radio Collector meet in Westford, Massachusetts, every February. If you've connected with A.R.C. in the last four years, you've had the pleasure of connecting with Pat. Whatever her next job offers, we're sure she won't forget her years at A.R.C.

SPIRIT OF ADVENTURE

To foster this kind of big change in mid-life,

there has to be an adventuresome spirit at work. In Pat and Steve this spirit seems to spring into action at intervals. Recently, they decided to take their first cruise. It was a short one because, as Pat said, "If it doesn't work out, you can stand anything for a week." Fortunately, the gamble was worth the risk, and they had a wonderful time.

Risk was inherent in a more long-term decision. At one time in Pat's working career, which included 17 years as a programmer with Digital Equipment Corp., they decided to become entrepreneurs and open a franchise called "The Wildbird Center." For six years, Pat ran the shop, which sold bird food and related items. An inveterate birdwatcher herself, she ran related programs for children, and Steve led the Saturday morning bird-watching trips. No doubt that's another lure to the South — warmer weather for bird-watching — maybe another store!

Whatever the future offers, we can easily imagine Pat saying, "Let's give it a try." It's been our good luck that she gave A.R.C. a try, and we wish her well, hoping she won't forget those New England roots.

(Dorothy Schecter, c/o A.R.C., Box 2, Concord, MA 01742)

Pseudo Pup

BY PHILIP BLISS

When you can't find the radio of your secret desires, build it. Phil Bliss didn't wait for Fate to hand him a Crosley Pup. Read about his step-by-step acquisition. (Editor)

For quite some time I have wanted to own a Crosley Pup. Since the availability is somewhat limited, I decided to build a "Pseudo Pup." Thanks to Dave Crocker and Leonard Aquino, I was able to obtain the Crosley book type condenser, regeneration control, schematic, and rheostat necessary to construct the radio. Although the Crosley Pup is housed in a metal cabinet, I chose to build my reproduction using wood stock. I used $\frac{1}{16}$ " stock made by laminating two sheets of $\frac{1}{32}$ " thick walnut veneer.

The first step was to get all of the materials and parts together. (See parts and materials lists below). Before I cut the sides, top, and bottom pieces for the cabinet, I assembled the circuit on a breadboard with the

sides containing the book condenser and regeneration control spaced $\frac{5}{8}$ ". I discovered
(Continued on following page)

Figure 7. The finished Pseudo Pup with its UV-199 tube in place.

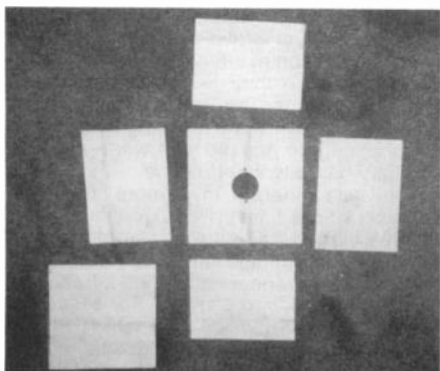

Figure 1. The panels cut to size and ready for assembly.

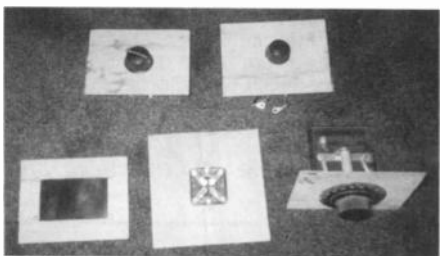

Figure 2. The wood cabinet panels with all components mounted and the rear panel cut to accept the Bakelite panel.

Figure 3. The assembled cabinet ready to be painted.

(Pseudo Pup continued)

ered that to keep within the approximate dimensions of the original Pup and still allow the radio to tune properly, had to cut $\frac{3}{8}$ " off of the regeneration control shaft and add $\frac{1}{16}$ " to the overall length and width of the cabinet.

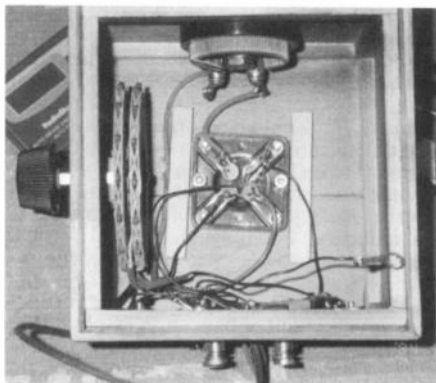

Figure 4. An underside view of the radio before installation of the tuning capacitor.

Figure 5. Another underside view with the tuning capacitor in place.

After these calculations, I cut the sides, top, and bottom to size, as shown in Figure 1. I added $\frac{1}{8}$ " to length of two of the sides and $\frac{1}{8}$ " to the length and width of the top to allow for an overlap at the corners during the assembly process. After cutting the shaft, I drilled and tapped the cut end of the control shaft to enable me to reattach the spiderweb coil with a small screw.

After these calculations I cut the sides, top, and bottom to size. I added $\frac{1}{8}$ " to length of two of the sides and $\frac{1}{8}$ " to the length and widths of the top to allow for an overlap at the corners during the assembly process.

The next step was to mount all of the components in their proper location, as shown in Figure 2, and cut the opening for the Bakelite panel on the rear of the cabinet. For ease of assembly, I removed all of the parts from the sides and top and put the cabinet together using the $\frac{1}{4}$ " square wood stock for bracing on all of the inside corners and edges. Since I planned to recess the bottom panel, I raised the bottom mounting strips $\frac{1}{16}$ " to allow for the thickness of the panel.

Using model maker's Super Glue made

the construction process fast and easy. During the mock-up process, I found that if I had used square stock any larger than $\frac{1}{4}$ ", the spider web coil on the regeneration control would not fit properly. Using $\frac{1}{4}$ " stock limited the arc of the rounded outside edges of the cabinet.

To make the flange around the bottom edge I cut a $\frac{1}{8}$ " by $\frac{3}{8}$ " strip of wood from an old ruler, rounded the top edge and attached the pieces to the lower edge. Using a sanding block, I then rounded the top and side edges. Figure 3 shows the finished cabinet in its unpainted state. Since this completed the wood working, I primed and sprayed the cabinet with wrinkle finish.

The next step was to cut and drill mounting holes in the Bakelite panel. The slots for the grid leak resistor supports were cut and the four binding posts were mounted. Then the grid leak assembly was bolted into place.

After the wrinkle finish had dried, the radio was ready to assemble. I left the book condenser out until all other wiring was finished. Figures 4 and 5 show the interior of the Pseudo Pup, while exterior views are provided in Figures 6 and 7.

Wiring the radio was made quite easy by leaving the book condenser out until all other parts were in place and wired. Since I have never seen a Pup in real life, I could only guess how large to make the rear Bakelite panel. The finished dimensions of the radio are $5\frac{7}{16}$ " x $5\frac{1}{16}$ " x 4".

Upon completing the set, I attached it to my Antique Electronic Supply Model K-101A power supply for the final test. After hooking

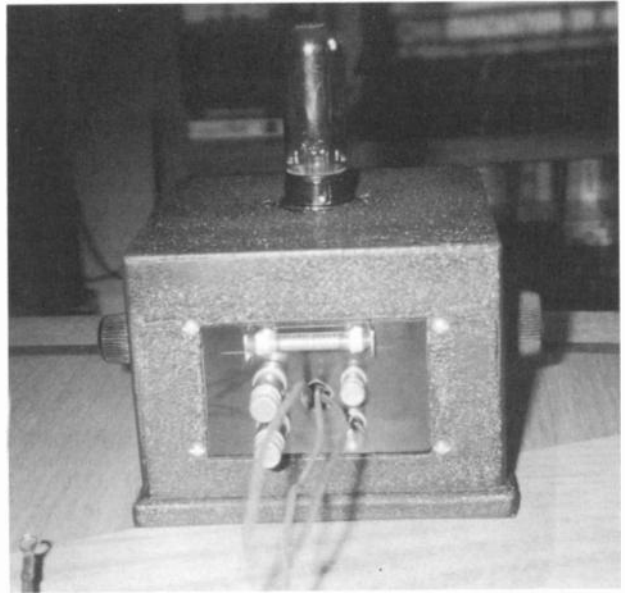

Figure 6. A rear view of the completed radio showing the Bakelite panel and its components.

it up to my antenna and ground, I attached my Baldwin "C" earphones and turned it on.

Wow! It worked even better than I had expected. Even though the adjustment of the tuning condenser regeneration control and the filament voltage were very critical, the selectivity was better than I had expected.

Philip Bliss is a graduate of Florida State University. Now retired, his career was in the field of education. While in the army from 1952 to 1954, he was a radio repairman, and he has continued to use that skill as a radio collector.

(Philip Bliss, 183 Austin Ryan Drive, Kingsland, GA 31548)

MATERIALS FOR PSEUDO PUP

- | | |
|---|--|
| 1. UV-199 tube | 11. $\frac{1}{4}$ " square stock spruce or pine, approx. 60" |
| 2. UV-199 tube socket | 12. $\frac{1}{8}$ " x $\frac{3}{8}$ " stock (lip around base of the cabinet) |
| 3. Grid leak assembly with resistor | 13. Assorted screws for mounting components |
| 4. 0.00025 mF mica cap | 14. Glue for cabinet assembly |
| 5. Spider web coil regeneration control (Crosley) | 15. Primer paint |
| 6. Crosley book tuning condenser (Crosley) | 16. Wrinkle paint |
| 7. Crosley filament rheostat | 17. Bakelite panel $2\frac{1}{2}$ " x 4" |
| 8. (4) binding posts | 18. Assorted soldering lugs and connectors |
| 9. Earphones (Baldwin) | 19. Wire |
| 10. $\frac{1}{16}$ " hard wood veneer approx. 150 sq. in. (base material) | 20. $22\frac{1}{2}$ V and 3 V power supply |

PHOTO REVIEW

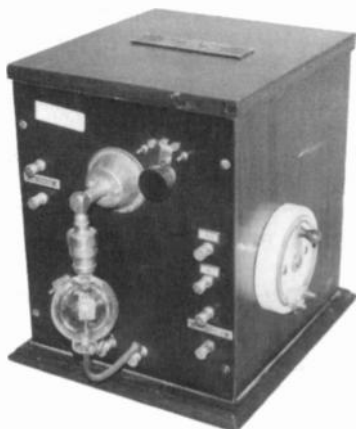

This column presents in pictorial form many of the more unusual radios, speakers, tubes, advertising, and other old radio-related items from our readers' collections. The photos are meant to help increase awareness of what's available in the radio collecting hobby. Send in any size photos from your collection. Photos must be sharp in detail, contain a single item, and preferably have a light-colored background. A short, descriptive paragraph **MUST** be included with each photo. Please note that receipt of photos is not acknowledged, publishing is not guaranteed, and photos are not returned.

PHILCO MODEL 38-12 – This 5-tube table radio was manufactured by the Philco Corporation in Philadelphia. The tubes used in this set are one each of the following: 6A7, 78, 75, 84, and 41. The first two numbers in the model number indicate that it was sold in 1938. (*Clark Trissell – Lincoln, NE*)

DICTOGRAPH SILENT RADIO – Found in a local estate auction, this set has six tubes, and judging by its tube lineup, I would guess that it was made in the 1930s. Made of a bright maple with Deco style lines across the front, it has a unique sliding door that closes from right to left. The controls on the front are for tuning, volume, and tone. I figured there should be something for dictation, but there is no evidence of that at all. (*Claude Chafin – Independence, MO*)

DEFORST RJ5 REPRODUCTION – I fabricated this hand-built detector unit based on the DeForest RJ5 Audion detector. DeForest sold the original unit for \$25 in 1914. My set uses original parts, such as the ceramic rheostat and the spherical, double filament DeForest tube. The cabinet stands 10½" tall and 8¾" wide. (*Wally Worth – Wollaston, MA*)

WIRELESS SPECIALTY IP-203 DETECTOR – This unit has three selectable crystal detectors. Two appear to be galena crystals, while the third is a green sparking color. Any ideas about the material in this third crystal? (*Don Watson, Elk Grove Village, IL*)

PHOTO REVIEW

STEWART-WARNER MODEL 415 SPEAKER –

This dynamic radio speaker was introduced by the Speedmeter Corporation in 1926, and it sold then for \$30. Called the "Radioamplifier" by the company, it was referred to as the "Dancing Girl Speaker" by everyone else. The thin brass grille over a light gold cloth depicts two (mythical?) girls dancing gleefully. The center base is brass. (Robert Enemark – Duxbury, MA)

WARE TYPE T – This 3-tube Neutrodyne receiver was offered in 1924 by the Ware Radio Corporation of New York City. It operated on three Type 199 tubes, which were exposed. The small lift-top opened for access to the batteries. (Wally Worth – Wollaston, MA)

KENNEDY MODEL III – Manufactured by the Colin B. Kennedy Company of St. Louis, Missouri, this 3-tube portable is covered with black leatherette. It has a cover with a handle that snaps over the top. Inside the cover is a small strap to hold the headphones, also made by Kennedy. It sold for \$101 in 1934. (Wally Worth – Wollaston, MA)

ZENITH CUBE, MODEL UNKNOWN – This 5-tube, 3-band set, ca 1936, was found in rough condition with no model identification. The chassis appears to be essentially the same as a Model 5S29, except that it has a large power transformer that will operate on 110 or 220 volts AC. It features a small black dial with color bands. I believe that this very unusual radio was made for the international market, as Zenith did not market a cube model in the U. S. in 1936. The cabinet has been refinished, the under chassis has all new capacitors and filters, the original speaker has been replaced with another vintage Zenith speaker, and it has four factory wood "Z" knobs. It works great on all bands and sounds great too. (Ed Ripley – South St. Paul, MN)

MEET REPORT

Radio XXXVII

Westford, Massachusetts — February 19, 2006

REPORTED BY DOROTHY SCHECTER

If you're a collector and you have relatives in Boston, why not arrange a visit around a major radio event in the area? And if you're from Minnesota, a few degrees below zero on the morning of a meet in Massachusetts is no deterrent. So went the thinking of Alan Yelsey from Minneapolis, who was duly impressed with the happenings at Radio XXXVII, the annual Greater Boston Antique Radio Collectors (GBARC) meet on Sunday, February 19. In the first hour, Alan sold most of the 1930s and 1940s radios he had brought along, and so he was able to enjoy the crowd, the size of which was unlike anything he had seen at events back home.

This year the Westford Regency Hotel ballroom and an adjunct room in Westford, Massachusetts, were filled with 98 tables, up from last year's 90. More than 600 eager buyers and sellers crowded the room. Alan deserved a prize for coming the greatest distance, but all of the New England states were represented, as well as New York, New Jersey, Ohio, and others.

WHY AM I HERE?

"Old Guard" attendees were heard to ask the question with tongue-in-cheek, knowing full well the easy answers — the fun of the chase after the long-sought-for set, the competition, the wheeling and dealing, the camaraderie — and, of course, the addiction to old radios and anything to do with the heyday of the radio era. That's why they're apt to hang around long after the show has officially ended to swap radio tales.

No one admits more readily to the addiction than John DeLoria, who, along with his wife Judy, whom he describes as the "heavy lifter," lives a radio life. They belong to ten different clubs and travel all over the country to all the big shows.

The addiction is confirmed when John describes the purchase of a collection of 350 radios in order to get the one or two he really wanted. Transporting the collection meant several trips to Canada. And

Variety is evident at John DeLoria's tables: Left, top to bottom, a Wings Cigarette radio, ca 1930s; a green Crosley Showboy with bird motif; and a Hallicrafters shortwave set. Right, an impressive 1939 Zenith 15S374.

how could he pass up the brand new 3-piece, 1931 living room set with a radio built into the couch, all still packed in plastic? Small wonder he has nine public storage spaces.

The DeLoria tables showed the variety in his collection. The Wings Cigarette radio from the early 1930s was one of many different brands that RCA had no problem advertising in times when smoking was the fashion. A porcelain ladybug crystal set sat on a round living room table containing a 1930s RCA radio. A 1950s Emerson advertising piece perched next to a large photo of another handsome set for sale, but too heavy to bring to the meet — a Philco bar radio complete with all the glassware.

Yes, John is addicted to old radios, but he and Judy appreciate the other major attraction to the

This Air-Way Type F 4-tube receiver tempted buyers at Stuart Mount's table.

This beautiful Philco Model 16B, an 11-tube set covering 4 bands, was available at John Hagan's table for \$425.

hobby — the wonderful people and sense of community.

That's what seems to bring folks back year after year and even after a hiatus. George Kazowska had a two-year break, but he was back with his friend and helper May Yanocsko. In his 25 years of collecting, George's interests have taken many turns, from the 1930s to transistor sets to foreign sets and back to the 1930s. A Cord blue mirrored radio from the 1930s graced his table, along with a 1940s Champion Venus 975A.

A meet like this one fits into his philosophy of sharing information with fellow collectors. On his website is a page for Zenith research, containing raw data from Zenith service manuals and other references.

For a first-time seller like Johanna Mendelin, this philosophy would fit well with her impression that at this meet she was being introduced to things she wouldn't have otherwise known. That was what her late brother Bob Defenderfer, a Ham and professional audio man, had done when he shared with her his love of radio and electronics. Johanna was there with her husband and 23-month old twins to try to put Bob's collection into the right hands, rather than throw it out as some relations had suggested. Bob did well to pass on the need to preserve radio history.

A GENERATIONAL THING

The Mendelin family was a good example of the increasing number of families with two or three generations in attendance. Surely a good sign for this hobby. Like the

Mendelins, Bill and Darcey Dunn came from Vermont with their very young children to display their wares and enjoy the crowd. Bill has been collecting since his father gave him his grandmother's old radio about 35 years ago. That may be a longer time than many much older attendees who began collecting in their retirement years. And who knows, the children may carry on the interest.

Signs of that hope were everywhere. Jeff Gardner of Gloversville, New York, was back for the second year as a vendor. He was able to tour the room while his son Ben once again manned the table. Bruce Phillips did not have his usual helper, *(Continued on following page)*

Bill and Darcey Dunn of Wardsboro, Vermont, with young Matthew and Emma, made this a family weekend.

(Radio XXXVII, continued)

son Ross, but daughter Jonica filled in nicely at the "Radio Orphanage." Multiple progeny is certainly an asset in the radio meet business.

Of course, the "First Family" was there — "first that is, when your father runs the meet. John Terrey's grandchildren came with son Jeff and his wife Susan. Nine-month old Katie latched on to a "Hello Kitty" novelty radio, indicating that she and her brother Joe are being brought up right.

The editor's granddaughter, Katie Terrey, with her mom Susan. Already a radio collector at age 16 months, Katie clings to her "Hello Kitty" novelty radio.

Two generations are impressive, but three in attendance are even more so. Phil and Giselle Guinan from Litchfield, New Hampshire, had help from their grandson, 16-year-old Jayme, and his dad, son-in-law Bob LaRochelle. What an opportunity for Phil to indoctrinate the young. He has plenty of history to use as ammunition — a radio shop back in the 1930s, a career in industrial electronics, and

Three generations were "on display" at the Guinan table: Left to right, son-in-law, Bob LaRochelle; grandson, Jayme LaRochelle; and Giselle and Phil Guinan.

Eric Fogel gives thumbs up to the meet as he awaits a customer for his Crosley Fiver.

now lots of repair work on sets of the 1930s-1950s. Let's hope Jayme follows in his footsteps.

LOOKING AHEAD

The future of the hobby seemed to be on the minds of many participants. John Hartman commented that, as he looked around, he saw many young people. He expressed amazement at the growth of interest in the hobby and confidence in the possibility of finding the right home for most old sets. He himself has filled a big barn at his apple farm in Eaton, New Hampshire, in less than three years.

That optimism was reflected in the presence of buyers like John and Jean Jesensky who were looking for radios of the 1960s and stereo of the 1970s — "All the stuff you wanted to buy when you were a kid, but couldn't afford to.

Another husband and wife team, Francis and Barbara Pond, were also serious buyers. They were looking for promising items to stock their space in a group antique shop in Amherst, New Hampshire. Collectors for 30 years, they enjoy the activity as a hobby, not expecting it to be a big money-maker. It must also be a pleasure to share the same interest — a repeated theme in "radio families."

Friends are often like families. Tom Cooper and

Pat Franzis from New Milford, Connecticut, came together and did well as first-time sellers. Both began collecting as eight-year olds and both are lucky enough to have sympathetic wives. Pat figures he has a "radio gene" directly from his grandfather who built sets. He also has a 1920s house that is perfect for antique radio decor. These two would seem to have it all.

LOOKING BACK

The same might be said of Ed White and his longtime companion/helper Trudy Adams. The only difference might be that, at age 90, Ed has had a much longer time to enjoy his life in radio. In a memoir given to A.R.C. Ed has traced his interest in radio back to grade school and a next-door

Ed White and Trudy Adams, regulars at the GBARC shows, are well equipped to make an announcement.

neighbor with a radio shop in his cellar.

Other memories include acquiring a chunk of galena ore for use as a detector, making a cat whisker from a fine guitar string, sending a box top and fifty cents for a Quaker Oats crystal set kit, and building a one-tube amplifier, to name a few. We can only conclude that radio-collecting contributes to keeping the memory sharp.

Memories were certainly a part of the conversation at John Nowacki's table. Here was a case of West meets East, as John from Kennebunk, Maine, talked with Werzhen Xu, a Massachusetts computer software engineer originally from China. Xu spoke of his growing interest in radio during his high school years in China. His father had an RCA radio and an RCA turntable in a crank phonograph, but with Chinese labels. He remembered that before 1940, all radios came from the U.S., but the family's first black and white TV in 1958 came from Russia.

Such one-on-one encounters make the radio meet experience an international affair. We realize that radio touched the lives of people throughout the world long before "global economy" became a household phrase.

HERE AND NOW

A chat with John Hagman, down from Vermont and a sometime reporter for A.R.C., often gives a sense of immediacy. A down-to-business guy, John finds it advantageous to stay at the hotel and get a close parking space from which to move his specialty — large table sets. Though he uses the Internet as an educational tool and to get fast information, he finds that a meet allows him to buy, sell, and socialize. Furthermore, it enables him to hand a sale over without shipping and labor costs.

On the other hand, after the meet John expressed disappoint-

Werzhen Xu shares memories of radio in China with John Nowacki, as they also discussed the merits of a vintage tube tester.

ment with his sales and the lack of interest in his consoles and restored table sets. However, many others were pleased with sales; in fact some sold everything they brought. A certain amount of luck is built into any meet.

Despite his disappointment, John also found himself in a typical dilemma for many vendors — how to resist buying and to avoid turning his house into a series of aisles. The A.R.C. staff recognizes the problem, since we work for John Terrey in the midst of his hundreds of radios! Still, how difficult resistance must be when a collector like John Hagman says, "I've already seen more exotic sets for sale here than at any other meet." As John DeLoria might add, "What's an addict to do?" Maybe it all has to do with the name "John."

Hope to see you all at Radio XXXVIII on February 18, 2007. It's always worth the trip from wherever you are.

(Dorothy Schecter, c/o A.R.C., P.O. Box 2, Carlisle, MA 01741)

Bruce Mager of New York City Waves store had a bit of everything for sale, from an Atwater Kent breadboard to plastic sets. The ship speaker on the top shelf is a sought-after item.

AUCTION REPORT

Vintage Radio & Phonograph Society Spring Auction Grapevine, Texas — March 19, 2005

REPORTED BY GEORGE POTTER

As with the November 2004 VRPS convention report, which we ran in April 2006. "Better late than never!" We thank George for completing this report in between his FEMA duties. (Editor)

The Vintage Radio and Phonograph Society (VRPS) Spring Auction was held on March 19, 2005, at the Grapevine Convention Center, Grapevine, Texas, just north of DFW International airport.

The doors opened at 7 A.M., bidding started at 10 A.M., and by 4 P.M., the VRPS team had finished up the auction. Jim Sargent did the honors as auctioneer, with Bill Werzner, HVRA president from Houston, helping out.

This year we had an excellent mix of 436 items to sell, with only 43 passes. One of the unusual items that passed was an Atwater Kent breadboard with display brass/tipped tubes that started at \$875. There was also a box with manuals and 3 headsets, which sold for 60 bucks. Why? It contained a Kennedy headset that many didn't see! There was also a very nice Atwater Kent 84 cathedral that sold at \$530.

Total attendance was 148 of which 114 were registered bidders. Total sales were: \$20,666.

e=excellent, vg=very good, g=good, f=fair, p=poor, *= guaranteed to work, unk=unknown condition, N.O.S.=new old stock, wk=working, nwk=not working, WT=with tubes, NT=no tubes, BB=brass-based, TT=tipped tube, SW=shortwave, PS=power supply, PB=push buttons, WE=Western Electric. All prices have been rounded down to the dollar. Some low

This 1932 Burley tombstone, manufactured by Sentinel Radio Corp., is housed in a cabinet reminiscent of the RCA Model RE-7. In very good condition, it sold for \$110.

cost items and items in poor condition or non-specific descriptions are omitted.

Aeromaster, wood, vg	\$140
Airline 62425, wood set	65
American Bosch 5, 1931, g	110

This 1957 Crosley "left Bullseye" radio in a light tan cabinet was guaranteed to work. It brought \$200 in the auction.

A warning: Auction prices are not current values. Our selection of auction items is not necessarily complete. A listing such as this cannot adequately include the condition of cabinets, chassis, transformers, tubes, the operating status of the set, and the inclusion of incorrect, restored or replica components, etc. Auction prices are the result of the excitement of the auction process, the skill of the auctioneer and the specific interests of the participants. Nevertheless, auction prices serve as useful references and as another element in the value determining process. The possibility of error always exists, and if we are notified, corrections will be reported.

This large, professionally framed lithograph of Nipper, in excellent condition, sold for \$40.

A Radiola 25, complete with loop antenna and in very good condition, sold for \$180.

The Vintage Radio and Phonograph Society (VRPS) publishes "The Reproducer" quarterly and "Soundwaves" monthly between the quarterlies. Dues are \$17.50. Activities include monthly meetings, a spring auction, an annual convention, and a summer swap meet. For more information: George Potter, VRPS, P.O. Box 165345, Irving, TX 75016. www.vrps.org.

BOOK REVIEW

Antique Trader Radio & Television Price Guide

Edited by Kyle Husfloen

REVIEWED BY JIM MONEGHAN & DAVE CROCKER

This new price guide has input by contributing editors Steve McVoy, Bob Ready and Harry Poster. The book covers radios from the 1920s to the 1950s, and television sets from the late 1920s to the 1970s. There are 272 pages with 750 nice big color photos.

The well known TV collector, Harry Poster, writes the introduction and provides a basic overview of radio/TV collecting that is easy to understand and appeals to the novice collector. However, the description of a crystal set is a little confusing, and the terms Bakelite and Catalin should be more clearly defined.

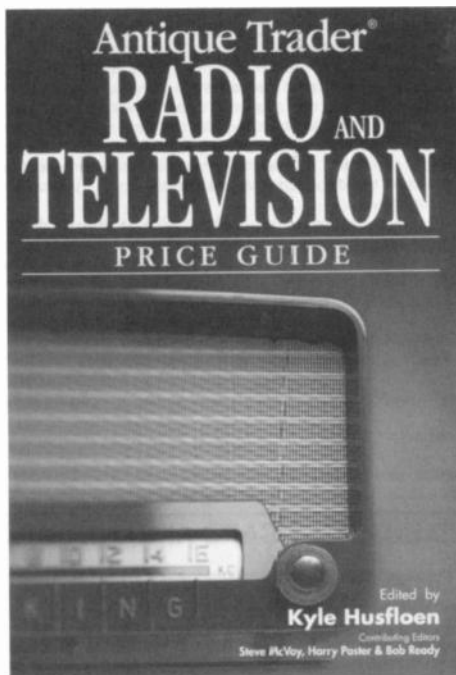

The Radio Section.

The radio section, (not including transistor sets), consists of 58 pages of listings and prices. Quite a few manufacturers are listed, but, unfortunately, there is a very small representation of radio models for each one. There are only eight listings for Atwater Kent, 18 listings for Philco, 16 listings for RCA and a mere 14 for Zenith. Some of the high-end companies are not listed at all (Federal and Kennedy to name a few).

There are some mistakes in model numbers and descriptions in the radio section. The Amrad Neutrodyne is not a crystal set. The metal Atwater Kent 441 shown is really a Model 44. The console shown on page 17 is not an Atwater Kent but an Eveready. The Arvin 850T is priced at \$435, instead of \$35-45. In the introduction, the Stewart-Warner A6-1Q is priced correctly later, on page 61. The Crosley 51 is definitely not a "crystal set."

There are other items that could be mentioned, but let's get on to the TV section.

The TV Section. Where this book excels is in the television section that has 120 pages with lots of vivid color photographs. The comprehensive

listing of manufacturers and models covers practically all of the collectible TVs you are likely to encounter in attics and at shows. The TV collectors will also appreciate the extensive listings and color photos for the rare prewar televisions. The prices in this section are very good and correspond with current values.

We found ourselves looking through this section over and over again. A lot of work went into this chapter and the results are excellent. This book is an outstanding resource for any TV collector from beginner to advanced.

There is a small section of original advertisements (25 pages), mostly from the 1940s to the 1950s, that are really fun to look over. Too bad they weren't dated as to year of publication. The special feature section (32 pages), contains an unusual group of radios with color photos and prices in reverse alphabetical order (Z to A).

If you are strictly a radio collector who isn't interested in TVs, there are other price guides on the market that will give you a more comprehensive listing of manufacturers and their radios. If you take an interest in antique radios *and* TVs, it wouldn't hurt to include this new publication in your library. But, if you are a real TV enthusiast, this book is a must! There hasn't been a TV price guide update since 1992. Enjoy!

The book in an 8 1/2" x 6" paper format may be ordered for \$19.99 from the publisher, kp books, 700 East State St., Iola, WI 54990-0001 or A.R.C. Be sure to check the supplier for shipping information.

(Jim Moneghan, Lincoln Electronics, 45 Arnold St., Lincoln, RI 02865; Dave Crocker, 35 Santuit Pond Rd., #4B, Mashpee, MA 02649)

A.R.C. RATES & POLICIES

GUARANTEE. You may cancel your subscription at any time and receive a pro rata refund for issues not yet mailed. If errors to ads are made by A.R.C., upon request a free correction will be run in the next available issue.

PAYMENT. Please send in full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid (except for the 6 and 12 month display ads indicated below). Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA or MasterCard (\$10.00 min.) are preferred. Make check out to "A.R.C." Cash is OK for small amounts. Canadian payers may send a Canadian check but specify *U.S. funds*. Subscriptions will be prorated to amount sent if amount is incorrect.

FAX & E-MAIL PROCEDURES/PAYMENT. Subscriptions, book orders, classified ads, display ads, etc. are welcome by fax or e-mail. Deadlines are the same as for ads received by mail. Please calculate the amount due. Payment by VISA or MasterCard is preferred if your order is over \$10. If under \$10, or if you prefer to send a check or money order, state the amount being sent and that the payment is in the mail. **Do not** send another copy of your ad with your payment; simply indicate that it is a fax or e-mail payment. If you want confirmation of our receipt of your fax, call immediately after sending your fax.

CHANGE OF ADDRESS. Please notify us 4 weeks in advance of a change of address. Send both your new and old addresses, and include your SUB# and effective date of your new address. Temporary address changes can be made also.

SUBMISSION OF MATERIAL. *Antique Radio Classified* welcomes and solicits information that pertains or relates to radio history or collecting. This may include articles, book reviews, photos, information on upcoming radio events, meetings, antique radio organizations, radio auctions, sources of old radio and restoration supplies, and other related and interesting material. All material submitted should be carefully researched, typed and accompanied by good photos, if appropriate. Computer disks are appreciated. Writing guidelines are available upon request.

PUBLISHING RIGHTS. Unless other arrangements are made: (1) All received materials (ads, articles, letters, correspondence, e-mail, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will not be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

MAILING OF ISSUES. U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). The mailing of First Class copies is staggered with faraway copies mailed before local copies. Non-U.S. copies are mailed on the first day. Periodicals copies are mailed on the last day. Mailing dates change each month, but mailing is usually completed by the 27th of the month. First Class copies usually are received by the 5th of the month; copies by Periodicals mail, by the 10th.

ETHICS. No person involved in the production of A.R.C. is to act on any information in the magazine until the first delivery day after local copies are mailed.

DISCLAIMER. The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

Antique Radio Classified subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

DISPLAY AND BUSINESS CARD ADS • DETAILS AND RATES

The deadline is the first of the month for display and business card ad artwork, payment and repeat requests.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Advertising must be prepaid, except as noted below; see "Payment" paragraph above for details. Late ads will be run only if space and time permit. **Originals must be the artwork size listed below.** Send all artwork on disk or ask us to typeset it for you. Do not send in artwork on art board or send negatives. Please call for instructions on how to send your electronic ad. If used, reverse type must be limited to 25% of the ad. If you want us to prepare your ad, include the one-time cost below for A.R.C. to make up the ad.

Add \$16.00 per photo for screening unless part of an existing electronic ad. **Do not cut or trim photos or glue photos to artwork; submit separately.**

If you are confused by these requirements and terms, please

contact A.R.C. before beginning to prepare your ad. We will be happy to advise you on your ad ideas, estimate how much the ad will cost, recommend an ad size, etc.

We assume that advertisers want all ads which are submitted to run without delay; therefore, we will run the ad and bill for any additional work required for the ad to meet these specifications. A late ad will run beginning with the next month. "Tear sheets" will be sent only for 1/16-page or larger ads and only if requested when the ad is submitted.

First business card per advertiser is at lower rate.

The 3-month rates represent about an 11% discount, the 6-month rates 23%, the 12-month rates 30%. Placement requests: add 15% but call first. Clubs: write for discount policy.

E-mail: arc@antiqueradio.com

Web: www.antiqueradio.com

A.R.C. RATES & POLICIES

CLASSIFIED ADS • DETAILS AND RATES

ONE FREE 20-WORD AD for subscribers in each issue; additional words are 29¢ each. See details below. Classified ads sent by mail, fax, e-mail or by any other method must be received (not just postmarked!) by **Noon Eastern Time** on the classified ad deadline date to guarantee inclusion in the current issue. Late ads are held for the following issue. Please enclose correct payment with all ads. Cash is OK for small amounts. (Canadian and other foreign advertisers, please see "Payment" on opposite page for methods.) "Free words" cannot be accumulated from month to month; free words must be requested when ad is submitted.

Faxed & e-mailed ads: Please see additional information on opposite page.

When including ads with other A.R.C. correspondence, write the ads on a separate piece of paper. Include SUB# with ad. Ads may be sent in advance; but, write each ad on a separate piece of paper and indicate the month (or successive months up to your subscription expiration; 12-months, maximum) you want the ad to run.

To minimize our typing errors: Please write legibly. Use both capital and small letters. Do not use a dash between words. Carefully write the following numbers and letters (especially in model numbers) since some can look alike; for example 1, l and I (the number one, the capital i and the small L.) Also: 0, O, o, Q and D; v, r and n; 6, b and G; V, U, u, v and Y; A and R; 5, S and s; 2, Z and z. We try to correct spelling errors, so when using an uncommon word or manufacturer which we might mistake as a more common word or manufacturer, note it so that we do not "correct" it. Editor's annotations are in [brackets] in ads.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Classified ads must have a standard heading such as **WANTED, FOR SALE, FOR TRADE, FOR SALE/TRADE, SERVICES, MESSAGE, HELP, AUCTION, MEET, FREE.** This heading is the only bold or all-capitalized words allowed in the ad. Capitalize only manufacturer names, model names, etc. This standard ad format makes scanning the ads easier.

Before writing your ad, please look over the ads in a recent issue of A.R.C., and try to write your ad in the same style. Full name (or company name) and address is **required** in all classified ads; we will add it if you forget.

The publisher reserves the right to edit ads without notification to the advertiser and to reject ads for any reason. Names other than the advertiser will be edited out of ads. Ads with non-radio-related items will be returned or edited unless the non-radio-related items are for trade of radio-related items, or they are incidental to and appear at the end of an otherwise acceptable ad. The publisher is not responsible for errors due to illegibly written ads or for any other reason. See also Publishing Rights on opposite page.

Clubs: Since club activities receive free coverage on the *Coming Radio Events* pages, the free 20 words may not be used for club activity ads. A discount on display advertising is available for clubs.

Classified Ad Rates per Month

Deadline: NOON ET— 10th of the month!

Subscribers:

First 20 words: **FREE***
29¢ per word for extra words over 20 **plus**
10¢ per word for a shaded ad (count all words including free words).

* Subscribers may take 20 free words on only one ad each month.

Non-Subscribers:

47¢ per word **plus**
10¢ per word for shaded ad.

Please do not forget to send in the extra 29¢ per word when your classified ad runs over the free 20 words; your payment will be appreciated, and it will help to keep A.R.C. healthy.

PHOTO & DRAWING DETAILS

**Deadline: 1st of the month
for all ads with drawings or photos!**

Drawings and photos are encouraged as the response to your ad is much larger and the reader knows better what you want or are selling. Send in your drawing or photograph, and A.R.C. will reduce it or enlarge it as needed.

Photo and Drawing Rates per Month

\$23.00 per month for each photo or drawing
(If ad is canceled, this amount cannot always be refunded.)

CHANGES & CANCELLATIONS

Please check your ads carefully before sending them in. Once ads are received, it is not always possible to refund the amount sent, pull the ad or make changes.

IMPORTANT — COUNTING WORDS — IMPORTANT

The standard headings: **WANTED, FOR SALE, etc.,** count as one word each time used in an ad. Name, address and (one) telephone number, count as 6 words, regardless of length. Ham call letters and business name can be included in the 6 words and do not count extra. Full name (or company name) and address is required in all classified ads. Each additional word, abbreviation, model number or number group, extra telephone numbers, fax, e-mail, etc. count as one word each. Hyphenated words count as two words.

EXTRAVAGANZA '06

Hosted by the Michigan Antique Radio Club

July 7 & 8, 2006

Holiday Inn South Convention Center
6820 S. Cedar Street, Lansing, MI 48911
(517) 694-8123

Come join us for our 21st Anniversary

This year we are proud to honor PHILCO as we celebrate the 21st anniversary of the Michigan Antique Radio Club. We are celebrating the company that created some of the most memorable achievements from the quintessential Cathedral radio, to the Mystery Box remote to the Predicta. Everyone has collected a Philco!

PHILCO

HIGHLIGHTS:

- HUGE 2-DAY FLEA MARKET

NOTE: FLEA MARKET OPENS FRIDAY!

- HOSPITALITY UNDER THE BIG TOP
- SATURDAY AUCTION WITH RICH ESTES
- EQUIPMENT CONTEST
- INFORMAL SOCIAL HOUR WITH LIVE ENTERTAINMENT
- PHILCO EXHIBIT
- 4 INFORMATIVE PROGRAMS
- DAILY PRIZE DRAWINGS

For information contact: Bryan Wilemon, 9924 Rosedale (new!), Allen Park, MI 48101.

E-mail: abpushpull@aol.com or check out our web page at www.michiganantiqueradio.org.

EXTRAVAGANZA '06 Registration

Please NOTE: To encourage participation by the general public, buyer's access to the flea market is free but we request that everyone participating in EXTRAVAGANZA must register! The monies collected as a result of registrations are a major source of revenue that helps pay for the event. Your cooperation is greatly appreciated.

Complete Auction & Appraisal Service*

Vintage Radio Auction

The William Turner Collection

Saturday, July 29, 2006 at 10 AM EDT

at the Expo Auction Center

8157 Garman Rd., Burbank Ohio (Exit 204 off I-71)

then south on SR #83 to the Duke & Duchess Gas Station, turn left
onto Garman Rd. and follow to the auction site.

Estes Auctions is pleased to offer the collection of Mr. William Turner of St. Charles, Missouri at our auction facility. Some of the items to be sold are a Zenith Model 3R, an Atwater Kent Model 10 breadboard, a nice selection of Crosley radios - Model 50, Crosley 50-A, Crosley 51, Crosley 52, Crosley Ace, Crosley XJ, Crosley VI, Crosley Super Trirdyn, a very nice Crosley Pup, and to these Crosley radios we are including a collection of wood and Bakelite Crosley radios from a collection in Cincinnati. Mr. Turner has a large selection of ca. 1920s battery sets of various makes, lots of good test equipment, horn speakers, cone speakers, some amateur radio receivers, and we also will have a selection of crystal sets to sell. Lots of radio books and magazines, lots of headphones, a big selection of radio tubes including many early Type 201, 301A, WD-11, WD-12, UV-200, UX-99, UV-99, balloon Type 80, balloon Type 45, also transmitting type tubes. This will be another good sale. We have just picked up this collection and will have more details in the June issue of *Antique Radio Classified*. We look forward to seeing you at the summer meets.
