ALONG WITH THE PRECISION afforded by the vehicle's variable power-assisted steering, the power tilt and telescopic steering wheel also features race-inspired paddle shifters. They give you intimate control of the vehicle's 6-speed automatic transmission.

The transmission also lets the engine rev high. Grade Logic Control holds performance in hilly terrain.

*Power beyond
displacement.*

LARGE ENGINES generate plenty of power, but add extra weight for the vehicle to overcome. That's why Acura engineers gave the MDX a V-6 capable of producing power well beyond what is expected for its size. To accomplish this feat, the engine incorporates two specialized breathing systems.

A dual-stage intake manifold utilizes a precisely tuned sonic wave to pack the maximum amount of air into the combustion chambers. The variable flow exhaust also plays a part, with valves that stay closed at low RPMs to provide proper back pressure. When pressure is built up, they open wide to provide a rush of power.

PERFECT ACCOMPANIMENT to thrilling performance is an engaging sense of confidence. In the MDX, it starts with the signature Super Handling All-Wheel Drive system. When extra torque is needed, it distributes power between the front and rear wheels accordingly. Through turns, it can even send up to 100% of available rear power to the inside wheel and increase its rotation speed for more confident cornering. The available Active Damper System can adapt to driving conditions and adjust suspension compliance in as little as 5 milliseconds.
