

Job Title: Driller

Summary Description: Cal spas is seeking a driller who performs hand precision drilling as necessary to produce high quality, conforming products according to specifications. Drills pre-marked holes in fiberglass shell for attachment of fixtures, using pneumatic hand drill.

Duties and Responsibilities:

- Receive spa shells from station previous stations.
- Lift the shell with crane and move it to the drilling line.
- Place the shell smoothly on top table.
- Using pneumatic hole saw cutter, cut the holes of the spa shell resin walls to a thickness of 1/8" around the edge of the hole.
- Inspect every hole done.
- Pass shell to next station.
- Follow all safety and housekeeping rules & procedures at all times.

Qualification Requirements:

- This is a very fast paced position performed on a production line in a team environment.
- 1-year minimum Face Grinding Experience
- Be able to perform extremely close tolerance work (.0001) with proper finishes
- Proficiency with a variety of pneumatic hand tools
- Working knowledge of gauges and micrometers
- Read blueprints/ engineering drawing
- Able to read / communicate in English
- Must be able to become certified to wear a respirator and work in a loud environment.
- Physically able to perform trim, cutting and sanding operations as well as lift tools and assemblies.
