Warranties

3 years / 60,000 km "bumper to bumper" no deductible limited warranty.

5 years / 100,000 km major components and powertrain.

3 years / unlimited km CAA roadside assistance.

Extended service contract available at extra cost.

See warranty book for details and limitations.

2009 SUBARU FLEET PROGRAM

With a great model lineup to suit your business needs, it simply makes sense to add the safety, value and reliability of Subaru symmetrical full-time All-Wheel Drive vehicles to your fleet. Thanks to the Subaru symmetrical full-time All-Wheel Drive system, all Subaru vehicles are uniquely equipped to offer unsurpassed control and safety in all types of weather conditions and on all types of road surfaces. Affordable acquisition costs, high residual value, and volume fleet incentives make Subaru vehicles an excellent value and a smart investment. With the all-weather safety of All-Wheel Drive, outstanding value and the reliability of Subaru engineering, Subaru vehicles will make a welcome and intelligent addition to any business.

2009 MODEL YEAR FLEET ASSISTANCE PROGRAM

- Fleet program allowances apply only to commercial fleet accounts approved and registered with Subaru Canada, Inc.
- Fleet program allowances (credits) are passed through to the purchaser and are shown as a distinct line item on the bill of sale.
- Fleet program allowances can not be combined with any retail or wholesale incentive, lease rate subvention, or bid assistance.
- Special fleet concessions (bid assistance) may be available in lieu of the published program for volume purchases. This will be done on a "stair step" system, and will be available retroactively based on vehicles actually purchased. All fleet concessions must be pre-approved in writing by the Director, National Fleet Sales and Marketing.

Impreza (except STI)	\$1250
Legacy	\$2000
Forester	\$1250
Outback	\$2500
Tribeca	\$1250

Fleet Assistance Programs do not apply to Impreza WRX STI.

Do You Qualify as a Fleet Customer?

To qualify, a fleet customer must have 5 vehicles registered in the company's name and a Fleet Account Number (FAN) approved by and registered with Subaru Canada, Inc.

How to Apply for a Fleet Account Number (FAN)

To apply for a Fleet Account Number please select the appropriate form which may be downloaded from www.fleet.subaru.ca. The completed application form, along with the required number of proof of vehicle registration(s), is then forwarded to Subaru Canada, Inc. When the application and support documents are verified and approved by Subaru your company will be registered and a Fleet Account Number provided.

FAN Application Forms

Leasing Company Account FAN Application Form

Leasing Company: Please include copies of ten (10) vehicle provincial registrations that provide both Lessor and Lessee names. The registrations should include two (2) that are dated at least six (6) months prior to the application date.

Commercial Account FAN Application Form

Commercial Account: Please include copies of five (5) vehicle provincial registrations.

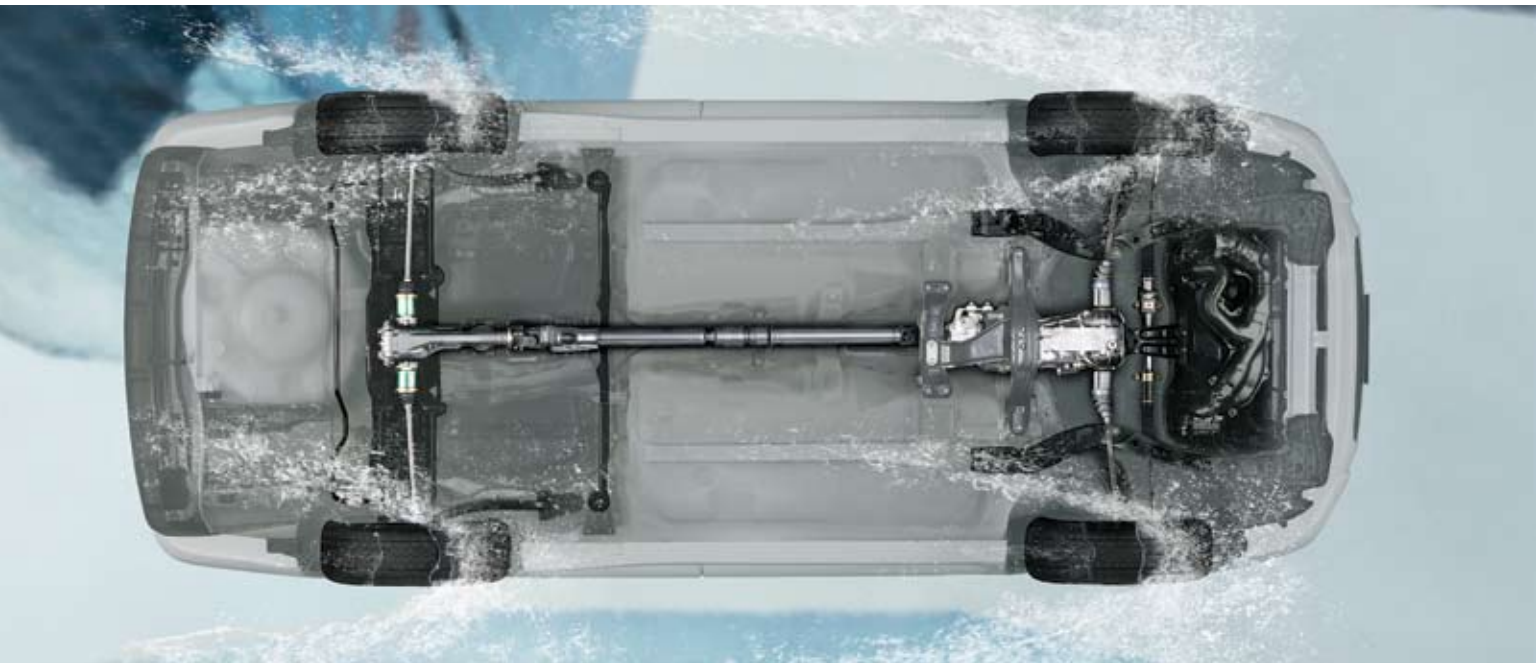

Daily Rental Account FAN Application Form

Daily Rental: Please include copies of five (5) vehicle provincial registrations.

FAN Requirements

The vehicles you are purchasing or leasing must remain in original service in Canada and are to be used in the operation of the business for a minimum of 12 months, except daily rental companies for which there is a minimum 6-month in-service requirement. Vehicle registrations can be for any make or model but they are to be for cars or trucks only. In provinces with government insurance, we alternatively accept a copy of a vehicle listing issued by the governing authority in lieu of individual registrations.

THE SUBARU SAFETY ADVANTAGE

Subaru symmetrical full-time All-Wheel Drive

Strike a balance, get a grip, take control. Since 1972, this has been the core philosophy behind the development of every Subaru vehicle. In that time, our engineers have perfected a combination unique to the industry: the SUBARU BOXER engine and the linear drivetrain layout known as the Subaru symmetrical full-time All-Wheel Drive system.

In this layout, all drivetrain components – the engine, transmission, driveshaft, and front and rear differentials – are logically aligned close to the centre point of the vehicle. The benefits of a balanced, symmetrical drivetrain are both numerous and substantial.

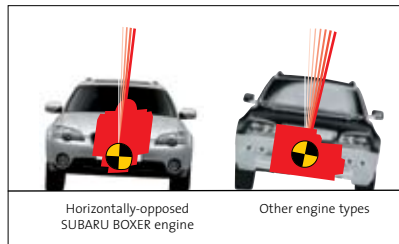

First, it gives every Subaru heightened stability and ideal weight distribution side to side. In most conditions, the compact design also allows for linear, controllable, full-time power to be distributed to all four wheels simultaneously – which translates into superior traction and control, especially when cornering.

In addition, the layout provides the perfect foundation for a 4-wheel fully independent suspension system that delivers precise handling and incredible stability without sacrificing ride quality. The long, equal-length axle shafts allow for maximum suspension travel, superior balance at all four wheels and maximum contact between the tires and the road, even when the road surface changes. The suspension can then be further tuned to virtually eliminate torque steer and create superior driving dynamics that allow the vehicle's refined and sporty nature to show through.

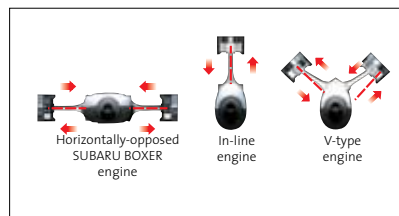

Why is symmetrical full-time All-Wheel Drive a better solution?

Simply: balance, grip, control.

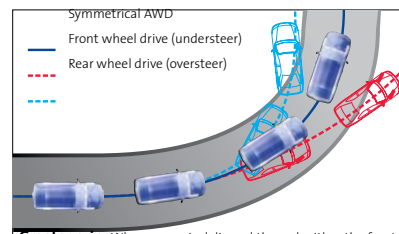

www.symmetrical-awd.com

Better balance: When cornering, centrifugal force causes a vehicle to lean and how much it leans depends in part on the vehicle's centre of gravity. Due to the placement of its compact SUBARU BOXER engine, all Subaru vehicles have an exceptionally low centre of gravity. This translates into reduced body roll, along with improved handling and stability, without the need for an overly stiff suspension.

Less vibration: With its 180-degree, horizontally-opposed configuration, the SUBARU BOXER engine design cuts vibration dramatically by eliminating the inertia of opposing pistons as found in V-shaped or in-line configuration engines. The result is excellent responsiveness throughout the rev range, unprecedented driving comfort, greatly improved vehicle stability and a quieter cabin.

Greater grip: When power is delivered through either the front or the rear wheels, lateral forces will tend to make the vehicle understeer or oversteer while cornering; this, in turn, can lead to instability. With Subaru's symmetrical full-time AWD system, however, power is sent through all four wheels, the vehicle steers naturally and neutrally in the direction of the turn, and precise, controlled handling is maintained.

Respect for the environment is everyone's responsibility and, at Subaru Canada, Inc., we take this responsibility very seriously. We believe that corporations should always be aware of the potential environmental impact created by their commercial activities and always be working on minimizing that impact.

As part of our mandate to be a committed corporate citizen, we are dedicated to protecting the earth's natural resources, the local and national environment, and human health. This mandate extends beyond just meeting the stated environmental laws and regulations to encompass the integration of sound environmental practices in all our business decisions.

As evidence of our commitment, in 2004, Subaru Canada, Inc. achieved ISO 14001 certification, an internationally recognized standard for Environmental Management Systems (EMS).

At Subaru Canada, Inc., we believe that, in order to thrive, we must be fully aware of our impact on the environment. This awareness then becomes the catalyst for creating new processes and policies designed to meet our environmental challenge – today and tomorrow.

To learn more about Subaru's commitment to the environment visit www.subaru-earth.com.

Premier Package

(available for 3.0R Limited)

- GPS DVD-based navigation system and monitor system with touch-screen display

PZEV Plus

The Subaru Legacy PZEV meets California's Super Ultra Low Emissions Vehicle (SULEV) tailpipe standard. It also achieves zero evaporative emissions. This combination makes the Subaru PZEV one of the cleanest gas-powered vehicles on the planet and a strong combatant in the fight against smog. Plus the Subaru Legacy PZEV is SmartWay™ certified by the U.S. Environmental Protection Agency, meaning they achieve strict, predetermined levels for fuel economy and tailpipe emissions.

The Supplemental Restraint System (SRS airbags) affords the driver and passenger additional protection in some collisions. This system provides supplemental protection only, and seatbelts must be worn in order to avoid injuries to out-of-position occupants upon airbag deployment. The combination of SRS and seatbelts provides the best protection in a serious accident. All illustrations, specifications, features and photographs contained in this brochure are based on product information available at the time of its printing, and may not be completely accurate following its publication.
