CENTER LINE TS

Weight distribution and sway control in a single unit!

The ***Center Line TS*** was in development by Husky's engineering team for nearly three years. We brought advanced design, the latest in technology and materials science to a product that greatly improves the towing experience. ***Center Line TS*** replaces products that have been relatively unchanged for more than two decades. The result is a dramatic change in weight distribution systems on the market today. Integrating weight distribution and sway control, the ***Center Line TS*** delivers superior performance and resolves many of the shortcomings of older technology products.

Weight Distribution and Sway Control Engineered to Perform!

- The Center Line TS top plate is forged 1035 steel. Forged 1035 produces a much stronger hitch with excellent fatigue properties.
- The trunnions are hardened 1045 steel: Ensuring exceptional strength and wear properties.
- Tapered spring bars deliver a superior fit and appearance: Superior fit delivers superior sway control.
- Combines weight distribution and sway control in a single unit.
- Universal EZ Adjust frame brackets for easy installation and adjustment
- Exacting tolerances in spring bar, head and lift brackets: The Center Line TS reacts to trailer sway conditions earlier than competing products & delivers a smoother, quieter ride.
- None of the noise problems other WD/sway products have – it's quiet.
- Forged and hardened steel components deliver excellent long-term durability and service.
- Hitch ball is factory pre-installed and properly torqued.
- Significantly lighter weight than competing products.
- Handle can be used to hook up and remove bars.
- No need for additional hardware.
- Outstanding performance – ***drive it and see!***

CENTER LINE® TS

Combines weight distribution and sway control in a single unit without additional hardware. Reacts to trailer sway conditions earlier than competing products and delivers a smoother, quieter ride. Forged and hardened steel components deliver exceptional durability, safety and service. Hitch ball is factory installed and tightened to the correct torque specifications. Includes universal frame brackets for easy installation and adjustment. Each kit contains everything necessary to install this hitch – no separate components!

CENTER LINE® HD

Levels your load and keeps your trailer straight in all driving conditions. Self-centering sway control systems creates resistance to counteract trailer sway before it begins. Includes head assembly, spring bar brackets, 10" shank, strap kit and hardware kit. Order spring bars and head assembly separately. Limited lifetime warranty.

14-0997	31390	Head Assembly

Plus one of the following spring bars:

14-1250	31511	600-800 lbs.	2-5/16" Ball	Up to 8,000 lbs.
14-1251	31512	800-1200 lbs.	2-5/16" Ball	Up to 12,000 lbs.
14-1252	31513	1000-1400 lbs.	2-5/16" Ball	Up to 14,000 lbs.

Made for 50° trailer frames only.

ROUND BAR WEIGHT DISTRIBUTION PACKAGE

Ready for safe towing right out of the box! Comes with the same features as the Round Bar Weight Distribution Hitches, PLUS a dual friction, sway control system that diminishes sway from windy conditions and passing vehicles, and a pre-assembled and torqued trailer ball and sway control ball.

14-1074	31995	400-600 lbs.	2" Ball	Up to 6,000 lbs.

TRUNNION BAR WEIGHT DISTRIBUTION PACKAGE

Ready for safe towing right out of the box! Comes with the same features as the Trunnion Bar Weight Distribution Hitches, PLUS a dual friction, sway control system that diminishes sway from windy conditions and passing vehicles, and a pre-assembled and torqued trailer ball and sway control ball. Trailer ball is 2-5/16" x 1-1/4" 12,000 lb.

14-1072	31620	600-800 lbs.	2-5/16" Ball	Up to 8,000 lbs.
14-1073	31621	800-1200 lbs.	2-5/16" Ball	Up to 12,000 lbs.

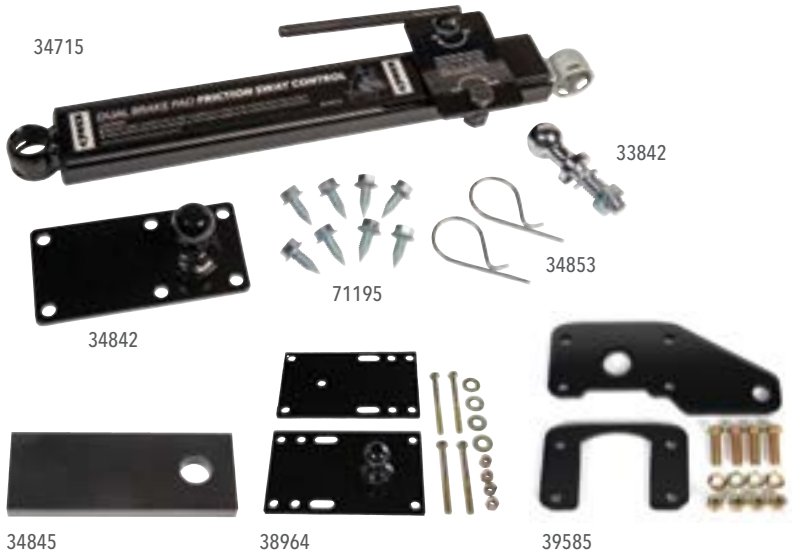

TRUNNION BAR WEIGHT DISTRIBUTION

Features a bolt-together hitch head and 10" shank assembly, raised ball platform for greater coupler clearance and turning radius and a built-in dual sway control platform. Fits all Class III / IV 2" receivers. 8" of height adjustment (rise: 7-1/2"; drop: 1"). 1-1/4" hole-on-head assembly. Requires 1-1/4" shank on trailer ball. Balls not included.
5 year limited warranty.

14-0993	31330	300-500 lbs.	2-5/16" Ball	Up to 5,000 lbs.
14-1065	31331	500-800 lbs.	2-5/16" Ball	Up to 8,000 lbs.

SWAY CONTROLS

• Dual friction brake pad system provides constant and adjustable sway reduction. • Diminishes sway from windy conditions & passing vehicles.
• Secures with socket & spring clip connectors. • Detaches quickly for storage. • Right-handed and left-handed models.
NOTE: for trailers 24' and longer, the use of both Right Hand and Left Hand sway controls is recommended.

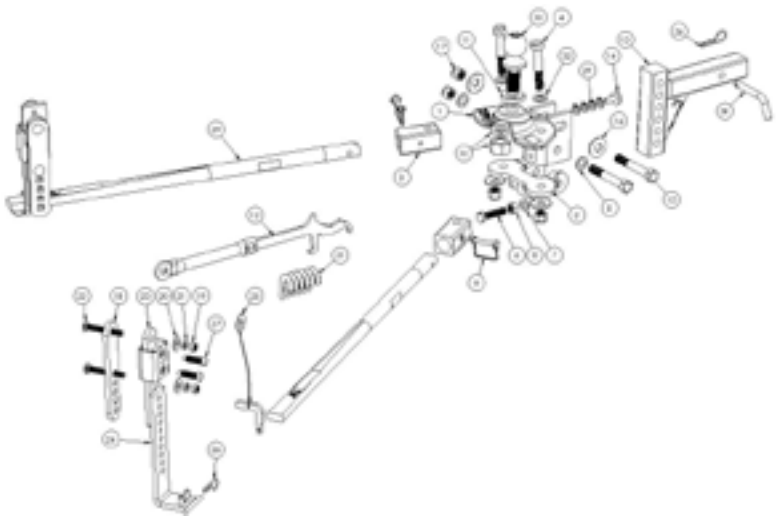

Diminishes lateral trailer movement in windy conditions and passing vehicles. Dual friction brake pad system provides constant and adjustable sway reduction. Detaches quickly for storage. Secures with socket & spring clip connectors. Select from a complete left or right kit or build your own kit

HITCH BALLS

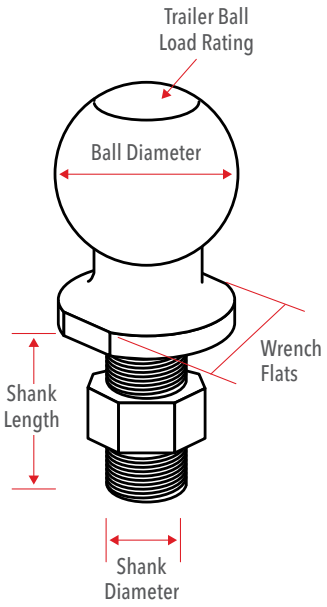

Manufactured from a single piece of solid steel with various shank lengths to accommodate a variety of ball platform thicknesses. Rated from Class I to Class IV with varying gross towing loads up to 17,000 lbs. Includes lockwasher and nut. Follow these easy steps to properly determine the correct trailer ball for your application:

A. Determine Ball & Coupler Size – Most couplers are stamped with the required trailer ball size. The sizes you'll most likely find stamped in the coupler are: Class I, 1-7/8"; Class II, 2"; Class III, 2-5/16".

B. Gross Trailer Weight (GTW) – Select the appropriate trailer ball to match or exceed the Gross Trailer Weight rating of the trailer.

C. Match the Trailer Ball Shank to the Ball Platform Thickness & Hole Size – When mounted in the ball platform, the threaded ball shank must protrude beyond the bottom of the lock washer and nut at least two threads.

D. Hole Size – The trailer ball shank must be matched to the platform hole diameter size. Standard hole sizes are: Class I: 3/4" diameter; Class II: 3/4" diameter; Class III/IV: 1" diameter; Weight Distribution: 1-1/4" diameter.

All Husky trailer balls come with "wrench flats" for ease of installation.

HUSKY® TOWING PRODUCTS

BALL MOUNTS

The best way to even out a load is to select the best fitting ball mount. Ball mounts vary by weight rating, shaft length, and rise/drop measurements. Husky's Class I & II Ball Mounts are manufactured with a precise rise or drop to suit each of the applications. Rise/drop measurements become important in Class III and IV, and Husky offers you a wide range of rise/drop choices. Weight rating is limited to vehicle tow rating; see vehicle owner's manual.

FOR BALL MOUNT RISE:
A = Distance from ground to bottom of trailer coupler.
B = Distance from ground to top I.D. of the receiver tube opening.
C = Amount of rise necessary to keep trailer level.

FOR BALL MOUNT DROP:
A = Distance from ground to bottom of trailer coupler.
B = Distance from ground to top I.D. of the receiver tube opening.
C = Amount of drop necessary to keep trailer level.

A: Measure from the ground to the top of the hitch.

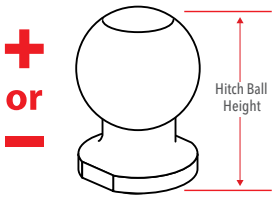

B: Measure from the ground to the INSIDE top of the trailer coupler (when level)

C: Determine the "DROP" or "Rise"

DROP: if the coupler is LOWER than the hitch: ADD the height of the hitch ball (usually 2.5"-3")

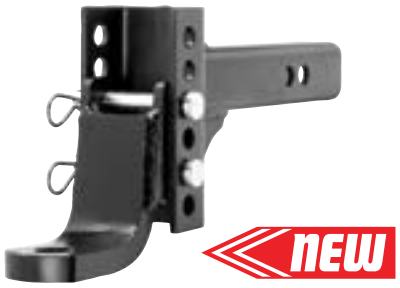

RISE: if the coupler is HIGHER than the hitch: SUBTRACT the height of the hitch ball (usually 2.5"-3")

EXAMPLE: a 7" DROP is needed to make this trailer level.
4" (Hitch - Coupler) + 3" (Hitch Ball Ht.) = 7" (DROP)

ADJUSTABLE BALL MOUNT KIT

Includes a solid steel ball mount accessory, and accepts 1" shank diameter hitch balls (not included). Adjustable 6-3/4 Inch Drop Or 5-1/4 Inch Rise. GTW: 6000 lbs. Two high strength clevis pins allows for easy removal and swift interchangeability of accessories and height adjustments. Rust resistant powder-coat finish.

71-8550 33140 Switch Hitch

One quick switch. One tough hitch.

No fumbling between setups. The Switch Hitch by Husky® has a solid core with a swivel design making it faster to switch over than any other tri-ball trailer hitch.

You haven't seen a hitch switch like this before.

Revolutionary design in Class IV tri-ball trailer hitches designed to eliminate problems associated with current generation hitches such as lost keys, lost pins and inability to remove from receiver Switch Hitch is machined from solid 2" bar of steel and exceeds all Class IV requirements. Patented switching and locking mechanism utilizing a carbon steel pin to ensure strength and durability.

The only one of its kind.

Each hitch is black powder coated for a long lasting good look. A grease fitting is provided to ensure years of trouble free operation.

Slides into your hitch receiver and provides the attachment point for your weight distribution. WD hitches other than 32464 come with the 2" x 2" 31518 shank. The 32464 round bar hitch comes with the 2.5" x 2" 32459 shank.

SUPER BRUTE & BRUTE SERIES POWER JACKS

Brute was the first jack in its class to offer a ball screw for low rolling friction, compared to the sliding friction of standard power jacks. Rolling friction means the motor works less, draws less amperage, creates less heat, reduces noise and increases motor and jack life. The ball screw shown here is standard in all Brutes except the HSB5000R which uses a hi-capacity ball nut.

SUPER BRUTE SERIES

15-1460	82084	HSB4000	4,000 lbs.
15-1459	82022	HSB5000R with Remote	5,000 lbs.

BRUTE SERIES

15-1462	87248	HB3000	3,000 lbs.
15-1461	87247	HB4500	4,500 lbs.
15-1463	87641	HB4500R with Remote	4,500 lbs.

The Smart Stop feature prevents damage by electronically stopping the travel at the end of the stroke. Prevents stalling and adds longevity to the system. Brute Jacks with remote control, HB4500R and HSB5000R, let you operate the jack from inside while leveling your refrigerator! Remote makes leveling more convenient. Also assists in hitching and unhitching.

Advanced 20mm Ball Screw design provides superior lifting capacity, reduces friction, amperage draw and motor wear.

HUSKY ASCEND® FLEXIBLE MOUNT PROPORTIONAL TRAILER BRAKE CONTROL

The revolutionary Husky Ascend features flexible mounting, so you can put your brake control components where you want them. The Heads up display can be dash mounted, rear view mirror mounted, or wherever it's convenient for you. The separate control can be placed in a handy location within easy reach. And the Ascend's brain mounts completely out of sight. All three components simply plug in together for the ultimate in flexibility and safety. The Ascend keeps your eyes on the road and controls within reach. Advanced proportional technology gives you ultimate control over your towing experience by mirroring the braking of the tow vehicle. The Ascend's 8 brake capacity means you get short proof protection for up to 8 trailer brakes. Plus you get on-the-fly sensitivity adjustment with 7 settings for different loads and driving conditions. The Husky Ascend is also electric over hydraulic compatible, so it works with electric over hydraulic trailer brakes. Lifetime warranty.

- 2 digit LED braking display is small, sleek, and elegant
- Mounts separate of the brain
- Wires route up to corner of a pillar, so display is at the dash level
- Makes it easier to see without looking toward your knee
- Wires can be hidden from view
- Display is adjustable; orient it based on the vehicle and your height

HUSKY QUEST® PROPORTIONAL BRAKE CONTROL

Advanced Proportional Controller Mirrors the Braking Action of the Tow Vehicle.

The easy to use Husky Quest requires no leveling and is packed with features to provide the ultimate ease in setting and adjusting for safe, smooth stops. Fully Digital settings for power level (gain) and sensitivity (response) makes this the easiest brake control to set and the most repeatable in use after use. On the fly sensitivity adjustment; 5 preset options for optimal control from the touch of a button. Easiest to adjust settings for full and empty loads time and again. Easy to read digital power scale from 5-to-99. Advanced inertial accelerometer instantly activates brakes. Advanced proportional controller mirrors braking action of the tow vehicle. No pendulum, no problem! Flexible mounting options. 8-brake capacity. Innovative vertical slide is easier to see and use than traditional horizontal slides. Short-proof protected. Lifetime Warranty.

ELECTRIC BRAKE ASSEMBLY KITS

Save time and money by installing Husky Brake Assemblies. Why replace shoes, magnets, springs, adjusters, etc.? If you have to replace two or more of these components, it is easier and more economical to install the complete assembly. With Husky, you get back on the road fast!

FOR AXLE TEK, DEXTER, FAYETTE, HAYES & ALKO ELECTRIC BRAKES

Reduce precious time and aggravation on difficult brake repairs by using Husky easy to install complete brake assembly kits. These CSA certified kits provide durability, and reliability in braking performance. These kits fit Axle Tek, Dexter, Fayette, and Hayes, with these flange patterns: 3" hole diameter x 4-holes x 4" bolt center on 7" and 10" brakes; 3.25" hole diameter x 5-holes x 3.88" bolt center on 12" brakes. All kits are individually boxed.

SUSPENSION**PRO** ELECTRIC TONGUE JACKS

Now there's a better way to tackle the some of the toughest chores known to towing. Suspension Pro Electric Tongue Jacks make setting up a weight distribution system easier than ever, replacing tedious hand cranking with the push of a button. They deliver an industry-leading duty cycle for a lifetime of reliable performance, job-after-job, year-after-year. And they're fast, travel 6" up or 7.6" down under 80 seconds. Exceptional efficiency is also built-in, with a respectably low current draw even under full load. Three feature-rich models are offered, for total lifting capacities of up to 3,500 pounds. For the best in all-around performance, go with the pro. Suspension Pro Electric Tongue Jacks.

All SuspensionPro jacks include:

- *Exclusive "SmartStop" feature so there are no mechanical hard stops on end of the stroke.*
- *All SuspensionPro jack ratings are working load ratings, not just intermittent load.*
- *Resettable circuit breaker instead of glass fuses.*

WATER HEATER ANODE RODS LEAD-FREE

- *18% more magnesium for extended protection*
- *Significantly extends the water heater tank life*

The single most important factor in tank life is the condition of its anode. Aqua Pro Magnesium Anode Rods will attract the elements that cause corrosion, protecting the tank from those elements. Simply replace your MPT drain plug with the Aqua Pro Anode Rod to protect your tank. For best results the anode rod should be replaced annually.

Quality Constructed... Great Value!

4-WHEEL 38 GALLON 25 GALLON 18 GALLON

The only 4-wheel tote tank that lets you store your extra hookup fittings. The Tote-N-Stor® tanks have a low-profile design for easy storage and a handy vent system that makes these not only quick to fill but also the fastest draining tanks on the market. The convenient Tote-N-Stor® tanks come completely assembled, including a built-in storage compartment with a 3/4" garden hose cap; a 3" sewer hose cap; a 3" straight hose adapter; a 15" garden hose; a 3" x 36" waste drain hose and clamps. A translucent sight tube shows you the fill level. The smart design also lets you drain the tank without lifting, and fill the tank without it bulging from expansion. A built-in tow handle is longer than the handles on other tanks, making the Tote-N-Stor® tanks easy to steer, and the extra length also prevents the tank from hitting your heels when you pull the tank. When you let go of the handle, it doesn't fall to the ground, so the Tote-N-Stor® handle stays clean, too.

Easy disposal of waste water without having to break camp

Large rubber wheel design, makes it easy to transport a full tank for emptying

Fresh water hose inlet for easy cleanup

Blow-molded polyethylene construction is light-weight...won't rust or corrode
