- [Printer hardware setup and software installation](#)

The following information is correct at the time of publication.

For video assistance, see www.hp.com/videos/LaserJet.

For current information, see www.hp.com/support/colorljE57540mfp.

HP's all-inclusive help for the printer includes the following information:

- Install and configure
- Learn and use
- Solve problems
- Download software and firmware updates
- Join support forums
- Find warranty and regulatory information

Warning icons

Warning icon definitions: The following warning icons may appear on HP products. Apply appropriate caution where applicable.

• Caution: Electric shock

• Caution: Hot surface

• Caution: Keep body parts away from moving parts

• Caution: Sharp edge in close proximity

Printer views

- [Printer front view](#)
- [Printer back view](#)
- [Interface ports](#)
- [Control-panel view](#)

Printer front view

1	Document-feeder cover (access for clearing jams)
2	Document-feeder input tray
3	Document-feeder output bin
	NOTE: When feeding long paper through the document feeder, extend the paper stop at the right side of the output bin.
4	Control panel with color touchscreen display (tilts up for easier viewing)
5	Convenience stapler (c model only)
6	Right door (access to the fuser and for clearing jams)
7	Tray 1
8	On/off button
9	Model name
10	Tray 2
11	Front door (access to the toner cartridges)
12	Standard output bin
13	Physical keyboard (c model only). Pull the keyboard straight out to use it.

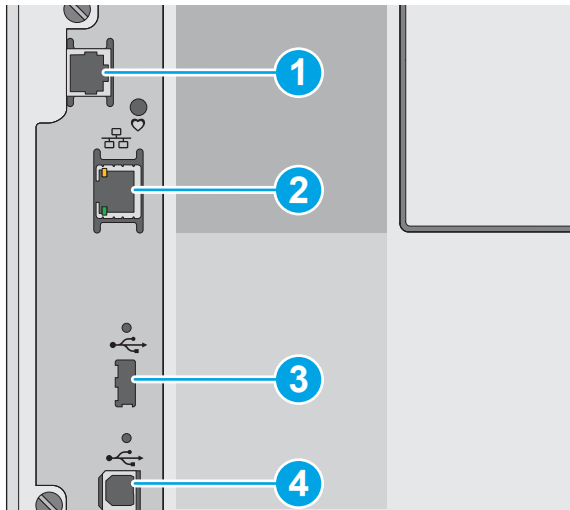

14	Easy-access USB port (on the side of the control panel)
	Insert a USB flash drive for printing or scanning without a computer or to update the printer firmware.
	NOTE: An administrator must enable this port before use.
15	Hardware integration pocket (for connecting accessory and third-party devices)

Printer back view

1	Toner-collection-unit door
2	Formatter (contains the interface ports)
3	Power connection
4	Serial number and product number label
5	Slot for a cable-type security lock (on the rear cover of the printer)
6	Formatter cover

Interface ports

1 Fax port (c models only. The port is covered for the dn model.)

2 Local area network (LAN) Ethernet (RJ-45) network port

3 USB port for connecting external USB devices (this port might be covered)

NOTE: For easy-access USB printing, use the USB port near the control panel.

4 Hi-Speed USB 2.0 printing port

Control-panel view

The Home screen provides access to the printer features and indicates the current status of the printer.

Return to the Home screen at any time by selecting the Home button.

 **NOTE:** The features that appear on the Home screen can vary, depending on the printer configuration.

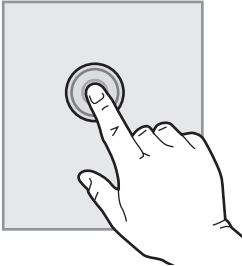

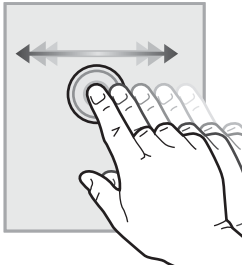

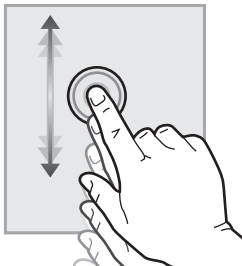

1	Home  button	Touch the Home button to return to the printer Home screen at any time.
2	Applications area	Touch any of the icons to open the application. Swipe the screen sideways to access more applications. NOTE: The available applications vary by printer. The administrator can configure which applications appear and the order in which they appear.
3	Reset button	Touch the Reset button to clear changes, release the printer from a paused state, display hidden errors, and restore the default settings (including the language and keyboard layout).
4	Sign In or Sign Out button	Touch the Sign In button to access secured features. Touch the Sign Out button to sign out of the printer. The printer restores all options to the default settings. NOTE: This button displays only if the administrator has configured the printer to require permission for access to features.

5	Information  button	<p>Touch the information button to access a screen that provides access to several types of printer information. Touch the buttons at the bottom of the screen for the following information:</p> <ul style="list-style-type: none"> • Display Language: Change the language setting from this screen. • Sleep Mode: Place the printer into sleep mode from this screen. • Wi-Fi Direct: View information for how to connect directly to the printer using a phone, tablet, or other device with Wi-Fi. • Wireless: Use this screen to view and change wireless connection settings (for the z model and for the dn and f models only when an optional wireless accessory is installed). • Ethernet: Use this screen to view and change Ethernet connection settings. • HP Web Services: Find information to connect and print to the printer using HP Web Services (ePrint). • Fax Number: View the printer fax number (for f and z models and for the dn model only when the optional fax accessory is installed).
6	Help  button	Touch the Help button to open the embedded help system.
7	Current time	Displays the current time.
8	Start Copy button	Touch the Start Copy button to start a copy job.
9	Copies field	The copies field indicates the number of copies that the printer is set to make.
10	Home-screen page indicator	The Home screen has multiple pages. This icon indicates the number of pages and which page is currently active. Swipe the screen sideways to scroll between pages.
11	Keyboard (c model only)	<p>This printer includes a physical keyboard. The keys are mapped to a language in the same way the virtual keyboard on the printer touchscreen is mapped. Whenever the keyboard layout for the virtual keyboard changes, the keys on the physical keyboard are remapped to match the new settings.</p> <p>NOTE: In some locations, the printer comes with adhesive keyboard overlays to customize the keys for different languages.</p>
12	Near-field communication icon (c model only)	This icon indicates the printer includes integrated HP near-field communication (NFC) and Wi-Fi Direct
13	Easy-access USB port	<p>Insert a USB flash drive for printing or scanning without a computer or to update the printer firmware.</p> <p>NOTE: An administrator must enable this port before use.</p>
14	Hardware integration pocket	For connecting accessory and third-party devices.

How to use the touchscreen control panel

Use the following actions to use the printer touchscreen control panel.

Action	Description	Example
Touch 	Touch an item on the screen to select that item or open that menu. Also, when scrolling through menus, briefly touch the screen to stop the scrolling.	Touch the Settings icon to open the Settings app.
Swipe 	Touch the screen and then move your finger horizontally to scroll the screen sideways.	Swipe until the Settings app displays.
Scroll 	Touch the screen and then move your finger vertically to scroll the screen up and down. When scrolling through menus, briefly touch the screen to stop the scrolling.	Scroll through the Settings app.

Printer specifications

Product number		3GY25A	3GY26A
Security	HP Trusted Platform Module for encrypting all data that passes through the printer	Optional	Optional
Control-panel display and keyboard	Color touchscreen control panel	✓	✓
	Physical keyboard	Not supported	✓
Print	Prints 38 pages per minute (ppm) on A4 and 40 ppm on letter-size paper	✓	✓
	Easy-access USB printing (no computer required)	✓	✓
	Store jobs in the printer memory to print later or print privately	✓	✓
Fax		Optional	✓
Copy and Scan	Copies 38 pages per minute (ppm) on A4 and 40 ppm on letter-size paper	✓	✓
	<p>NOTE: Copy and scan speeds are subject to change. For the most current information, go to support.hp.com.</p>		
	100-page document feeder with dual-head scanning for single-pass duplex copying and scanning	✓	✓
	HP EveryPage Technologies including ultrasonic multi-feed detection	Not supported	✓
	Embedded optical character recognition (OCR) provides the ability to convert printed pages into text that can be edited or searched using a computer	Not supported	✓
	SMART Label feature provides paper-edge detection for automatic page cropping	Not supported	✓
	Automatic page orientation for pages that have at least 100 characters of text	Not supported	✓
	Automatic tone adjustment sets contrast, brightness, and background removal for each page	Not supported	✓
Digital Send	Send documents to E-mail, USB, and shared folders on a network	✓	✓
	Send documents to SharePoint®	Not supported	✓

Supported operating systems

Linux: For information and print drivers for Linux, go to www.hp.com/go/linuxprinting.

UNIX: For information and print drivers for UNIX®, go to www.hp.com/go/unixmodelscripts.

The following information applies to the printer-specific HP PCL 6 print drivers, and HP print drivers for macOS.

Windows: Go to the printer-support website for this printer: www.hp.com/support/colorljE57540mfp to download and install the HP print driver.

macOS: Mac computers are supported with this printer. Download HP Easy Start from 123.hp.com/LaserJet to install the HP print driver.

1. Go to 123.hp.com/LaserJet.
2. Follow the steps provided to download the printer software.

Table 1-1 Supported operating systems and print drivers

Operating system	Print driver installed (from the software on the web)	Notes
Windows 7, 32-bit and 64-bit	The PCL 6 printer-specific print driver is available for download from the printer-support website. Download the driver, and then use the Microsoft Add Printer tool to install it.	
Windows 8, 32-bit and 64-bit	The PCL 6 printer-specific print driver is available for download from the printer-support website. Download the driver, and then use the Microsoft Add Printer tool to install it.	
Windows 8.1, 32-bit and 64-bit	The PCL 6 printer-specific print driver is available for download from the printer-support website. Download the driver, and then use the Microsoft Add Printer tool to install it.	
Windows 10, 32-bit and 64-bit	The PCL 6 printer-specific print driver is available for download from the printer-support website. Download the driver, and then use the Microsoft Add Printer tool to install it.	
Windows Server 2008 R2, SP 1, 64-bit	The PCL 6 printer-specific print driver is available for download from the printer-support website. Download the driver, and then use the Microsoft Add Printer tool to install it.	
Windows Server 2012, 64-bit	The PCL 6 printer-specific print driver is available for download from the printer-support website. Download the driver, and then use the Microsoft Add Printer tool to install it.	
Windows Server 2012 R2, 64-bit	The PCL 6 printer-specific print driver is available for download from the printer-support website. Download the driver, and then use the Microsoft Add Printer tool to install it.	

Table 1-1 Supported operating systems and print drivers (continued)

Operating system	Print driver installed (from the software on the web)	Notes
Windows Server 2016, 64-bit	The PCL 6 printer-specific print driver is available for download from the printer-support website. Download the driver, and then use the Microsoft Add Printer tool to install it.	
macOS 10.11 El Capitan, macOS 10.12 Sierra, macOS 10.13 High Sierra	Download HP Easy Start from 123.hp.com/LaserJet , and then use it to install the print driver.	

NOTE: Supported operating systems can change. For a current list of supported operating systems, go to www.hp.com/support/colorljE57540mfp for HP's all-inclusive help for the printer.

NOTE: For details on client and server operating systems and for HP UPD driver support for this printer, go to www.hp.com/go/upd. Under **Additional information**, click the links.

Table 1-2 Minimum system requirements

Windows	macOS
<ul style="list-style-type: none"> • Internet connection • Dedicated USB 1.1 or 2.0 connection or a network connection • 2 GB of available hard-disk space • 1 GB RAM (32-bit) or 2 GB RAM (64-bit) 	<ul style="list-style-type: none"> • Internet connection • Dedicated USB 1.1 or 2.0 connection or a network connection • 1.5 GB of available hard-disk space

Printer dimensions

Figure 1-1 Dimensions for the printer

	Printer fully closed	Printer fully opened
1. Height	583 mm (23 in)	837 mm (33 in)
2. Depth	504 mm (19.8 in)	853 mm (33.6 in)

	Printer fully closed	Printer fully opened
3. Width	482 mm (19 in)	803 mm (31.6 in)
Weight	dn model: 38.1 kg (84 lb) c model: 38.6 kg (85 lb)	

Figure 1-2 Dimensions for the 1 x 550-sheet paper feeder

1. Height	130 mm (5.1 in)
2. Depth	Tray closed: 465 mm (18.3 in) Tray opened: 768 mm (30.2 in)
3. Width	Lower-right door closed: 458 mm (18.0 in) Lower-right door opened: 853 mm (33.6 in)
Weight	5.8 kg (12.8 lb)

Figure 1-3 Dimensions for the cabinet/stand

1. Height	295 mm (11.6 in)
2. Depth	Door closed: 869 mm (34.2 in) Door opened: 1113 mm (43.8 in)

3. Width	884 mm (34.8 in)
	This value is subject to change. For current information, go to www.hp.com/support/colorljE57540mfp .
Weight	17.7 kg (39 lb)
	This value is subject to change. For current information, go to www.hp.com/support/colorljE57540mfp .

Figure 1-4 Dimensions for the printer with three 1 x 550-sheet paper feeders and the cabinet/stand

	Printer and accessories fully closed	Printer and accessories fully opened
1. Height	1268 mm (49.9 in)	1522 mm (59.9 in)
2. Depth	869 mm (34.2 in)	1113 mm (43.8 in)
3. Width	884 mm (34.8 in)	853 mm (33.6 in)
Weight	dn model: 73.2 kg (161.4 lb) c model: 73.7 kg (162.5 lb)	

¹ These values are subject to change. For current information, go to www.hp.com/support/colorljE57540mfp.

² Do not extend more than one paper tray at a time.

Power consumption, electrical specifications, and acoustic emissions

See www.hp.com/support/colorljE57540mfp for current information.

CAUTION: Power requirements are based on the country/region where the printer is sold. Do not convert operating voltages. This will damage the printer and void the printer warranty.

Operating-environment range

Table 1-3 Operating-environment specifications

Environment	Recommended	Allowed
Temperature	17° to 25°C (62.6° to 77°F)	15° to 30°C (59° to 86°F)
Relative humidity	30% to 70% relative humidity (RH)	10% to 80% RH

Printer hardware setup and software installation

For basic setup instructions, see the Hardware Installation Guide that came with the printer. For additional instructions, go to HP support on the Web.

Go to www.hp.com/support/colorljE57540mfp for HP's all-inclusive help for the printer. Find the following support:

- Install and configure
- Learn and use
- Solve problems
- Download software and firmware updates
- Join support forums
- Find warranty and regulatory information

Load paper to Tray 1 (multipurpose tray)

Introduction

The following information describes how to load paper into Tray 1. This tray holds up to 100 sheets of 75 g/m² (20 lb) paper or 10 envelopes.

 **NOTE:** Select the correct paper type in the print driver before printing..

 **NOTE:** Tray 1 does not support labels. To print on sheets of labels, use Tray 2, or one of the optional 550-sheet paper feeders.

 **CAUTION:** To avoid jams, never add or remove paper from Tray 1 during printing.

1. Open Tray 1.

2. Pull out the tray extension to support the paper.

3. Spread the paper guides to the correct size, and then load paper in the tray. For information about how to orient the paper, see [Tray 1 paper orientation on page 20](#).

4. Make sure that the paper fits under the fill line on the paper guides.

NOTE: The maximum stack height is 10 mm (0.4 in), or approximately 100 sheets of 75g paper.

5. Adjust the side guides so that they lightly touch the paper stack, but do not bend it.

Tray 1 paper orientation

When using paper that requires a specific orientation, load it according to the information in the following table.

 **NOTE:** The [Alternative Letterhead Mode](#) settings affects the way to load letterhead or preprinted paper. This setting is disabled by default. When using this mode, load paper as for automatic duplex printing. For more information, see [Use alternative letterhead mode on page 21](#).

Paper type	Image Orientation	Single-sided printing	Duplex printing or with Alternative Letterhead Mode enabled
Letterhead or preprinted	Portrait	Face-down Top edge leading into the printer	Face-up Bottom edge leading into the printer
	Landscape	Face-down Top edge toward the back of the printer	Face-up Top edge toward the back of the printer
Prepunched	Portrait and landscape	Holes toward the back of the printer	Holes toward the back of the printer

Use alternative letterhead mode

Use the [Alternative Letterhead Mode](#) feature to load letterhead or preprinted paper into the tray the same way for all jobs, whether printing to one side of the sheet of paper or to both sides. When using this mode, load paper as for automatic duplex printing.

To use the feature, enable it by using the printer control-panel menus.

Enable Alternative Letterhead Mode by using the printer control-panel menus

1. From the Home screen on the printer control panel, swipe from right to left until the [Settings](#) menu displays. Touch the [Settings](#) icon to open the menu.
2. Open the following menus:
 - [Manage Trays](#)
 - [Alternative Letterhead Mode](#)
3. Select [Enabled](#), and then touch the [Save](#) button or press the [OK](#) button.

Load paper to Trays 2, 3, 4, and 5

Introduction

The following information describes how to load paper in Tray 2 and the optional 550-sheet trays (Trays 3, 4, and 5; part number B5L34A). These trays hold up to 550 sheets of 75 g/m² (20 lb) paper.

 **NOTE:** The procedure to load paper for the optional 550-sheet trays is the same as for Tray 2. Only Tray 2 is shown here.

 **NOTE:** The paper guides may be locked before use and may not be adjustable.

 **CAUTION:** Do not extend more than one paper tray at a time.

1. Open the tray.

NOTE: Do not open this tray while it is in use.

2. Before loading paper, adjust the paper-width guides by squeezing the adjustment latches and sliding the guides to the size of the paper being used. The arrow on the tray guide should line up exactly with the marking on the tray.

3. Adjust the paper-length guide by squeezing the adjustment latch and sliding the guide to the size of the paper being used.

4. Load paper into the tray. For information about how to orient the paper, see [Tray 2 and the 550-sheet trays paper orientation on page 24](#).

NOTE: Do not adjust the paper guides tightly against the paper stack. Adjust them to the indentations or markings in the tray.

NOTE: To prevent jams, adjust the paper guides to the correct size and do not overfill the tray. Be sure that the top of the stack is below the tray full indicator, as shown in the enlargement in the illustration.

5. Close the tray.

6. The tray configuration message displays on the printer control panel.
7. If the paper size and type shown is not correct, select **Modify** to choose a different paper size or type.

For custom-size paper, specify the X and Y dimensions for the paper when the prompt displays on the printer control panel.

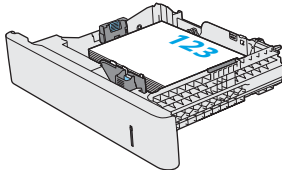

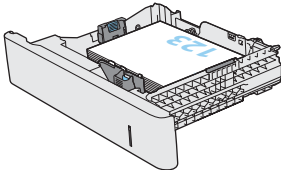

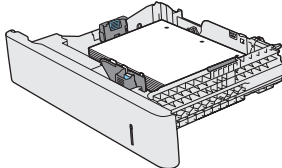

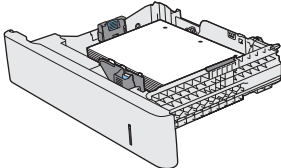

Tray 2 and the 550-sheet trays paper orientation

When using paper that requires a specific orientation, load it according to the information in the following table.

 **NOTE:** The **Alternative Letterhead Mode** settings affects the way to load letterhead or preprinted paper. This setting is disabled by default. When using this mode, load paper as for automatic duplex printing. For more information, see [Use alternative letterhead mode on page 25](#).

Paper type	Image Orientation	Single-sided printing	Duplex printing or with Alternative Letterhead Mode enabled
Letterhead or preprinted	Portrait	Face-up Top edge toward the right	Face-down Top edge toward the left

Paper type	Image Orientation	Single-sided printing	Duplex printing or with Alternative Letterhead Mode enabled
	Landscape	Face-up Top edge toward the back of the printer	Face-down Top edge toward the back of the printer
			
Prepunched	Portrait and landscape	Holes toward the back of the printer	Holes toward the back of the printer
			

Use alternative letterhead mode

Use the [Alternative Letterhead Mode](#) feature to load letterhead or preprinted paper into the tray the same way for all jobs, whether printing to one side of the sheet of paper or to both sides. When using this mode, load paper as for automatic duplex printing.

To use the feature, enable it by using the printer control-panel menus.

Enable Alternative Letterhead Mode by using the printer control-panel menus

1. From the Home screen on the printer control panel, swipe from right to left until the [Settings](#) menu displays. Touch the [Settings](#) icon to open the menu.
2. Open the following menus:
 - [Manage Trays](#)
 - [Alternative Letterhead Mode](#)
3. Select [Enabled](#), and then touch the [Save](#) button or press the [OK](#) button.

Load and print envelopes

Introduction

The following information describes how to print and load envelopes. Use only Tray 1 to print on envelopes. Tray 1 holds up to 10 envelopes.

To print envelopes using the manual feed option, follow these steps to select the correct settings in the print driver, and then load the envelopes into the tray after sending the print job to the printer.

Print envelopes

1. From the software program, select the **Print** option.
2. Select the printer from the list of printers, and then click or tap the **Properties** or **Preferences** button to open the print driver.

 **NOTE:** The name of the button varies for different software programs.

 **NOTE:** To access these features from a Windows 8 or 8.1 Start screen, select **Devices**, select **Print**, and then select the printer.

3. Click or tap the **Paper/Quality** tab.
4. In the **Paper size** drop-down list, select the correct size for the envelopes.
5. In the **Paper type** drop-down list, select **Envelope**.
6. In the **Paper source** drop-down list, select **Manual feed**.
7. Click the **OK** button to close the **Document Properties** dialog box.
8. In the **Print** dialog box, click the **OK** button to print the job.

Envelope orientation

Load envelopes in either of these orientations:

Face-down

Top edge toward the back of the printer

Face-down

Top edge leading into the printer

Load and print labels

Introduction

To print on sheets of labels, use Tray 2 or one of the optional 550-sheet trays. Tray 1 does not support labels.

To print labels using the manual feed option, follow these steps to select the correct settings in the print driver, and then load the labels into the tray after sending the print job to the printer. When using manual feed, the printer waits to print the job until it detects the tray has been opened and closed.

Manually feed labels

1. From the software program, select the **Print** option.
2. Select the printer from the list of printers, and then click or tap the **Properties** or **Preferences** button to open the print driver.

 **NOTE:** The name of the button varies for different software programs.

 **NOTE:** To access these features from a Windows 8 or 8.1 Start screen, select **Devices**, select **Print**, and then select the printer.

3. Click or tap the **Paper/Quality** tab.
4. In the **Paper size** drop-down list, select the correct size for the sheets of labels.
5. In the **Paper type** drop-down list, select **Labels**.
6. In the **Paper source** drop-down list, select **Manual feed**.

 **NOTE:** When using manual feed, the printer prints from the lowest-numbered tray that is configured for the correct size of paper, so it is not necessary to specify a particular tray. For example, if Tray 2 is configured for labels, the printer will print from Tray 2. If Tray 3 is installed and configured for labels, but Tray 2 is not configured for labels, the printer will print from Tray 3.

7. Click the **OK** button to close the **Document Properties** dialog box.
8. In the **Print** dialog box, click the **OK** button to print the job.

9. Load sheets of labels face-up with the top of the sheet toward the right side of the printer.

Use the convenience stapler (c model)

The convenience stapler can staple up to 20 sheets of 75 g/m² (20 lb) paper.

CAUTION: To avoid damage to the printer, do not attempt to staple materials other than paper.

1. Insert the stack of paper into the slot on the front of the stapler.
2. Wait for the stapler to staple the sheets. The stapler activates when it senses paper, and it makes a stapling sound.

NOTE: If the printer is in Sleep mode, there might be a short delay.

3. Remove the stapled paper from the slot.

If the stapler does not release the paper, follow these steps to resolve the problem.

WARNING! To avoid injury, do not put your finger inside the stapler area to attempt to release the paper.

1. Open and close the stapler door, and then try removing the paper.
2. If the paper is still stuck, make sure the stapler door is closed, and then turn off the printer and turn it on again.

Order supplies, accessories, and parts

Ordering

Order supplies and paper	www.hp.com/go/suresupply
Order genuine HP parts or accessories	www.hp.com/buy/parts
Order through service or support providers	Contact an HP-authorized service or support provider.
Order using the HP Embedded Web Server (EWS)	To access, in a supported web browser on your computer, enter the printer IP address or host name in the address/URL field. The EWS contains a link to the HP SureSupply website, which provides options for purchasing Original HP supplies.

Supplies and accessories

In order to purchase toner cartridges, contact your managed service representative. Make sure that you know your product model number, which appears on the product label on the printer rear cover.

Item	Description	Part number
Supplies		
HP toner-collection unit	Replacement toner-collection unit with attached door	B5L37A
HP Staple Cartridge Pack	Replacement staple cartridges for the c model. Contains two staple cartridges of 1500 staples each.	Q7432A
HP LaserJet 110 V Fuser Kit	Replacement fuser for 110 V models NOTE: A message displays on the control panel if the fuser needs to be replaced.	B5L35A
HP LaserJet 220 V Fuser Kit	Replacement fuser for 220 V models NOTE: A message displays on the control panel if the fuser needs to be replaced.	B5L36A
HP 200 ADF Roller Replacement Kit	Replacement feed rollers for the document feeder	B5L52A
Accessories		
HP Color LaserJet 550-sheet Media Tray	Optional 550-sheet paper feeder NOTE: The printer supports up to three 550-sheet paper feeders.	B5L34A
Printer stand and cabinet	Optional stand with storage cabinet to support the printer Recommended when using multiple optional paper feeders. Includes installation instructions	B5L51A
HP LaserJet Keyboard Overlay Kit for Simplified Chinese & Traditional Chinese (c model only)	Language-specific, adhesive overlay for the physical keyboard	A7W12A

Item	Description	Part number
HP LaserJet Keyboard Overlay Kit for Swedish (c model only)	Language-specific, adhesive overlay for the physical keyboard	A7W14A
HP 1GB DDR3 x32 144-Pin 800MHz SODIMM	Optional DIMM for expanding the memory	E5K48A
HP Trusted Platform Module	Automatically encrypts all data that passes through the printer Includes installation instructions	F5S62A
HP Foreign Interface Harness	Optional port for connecting third-party devices	B5L31A
HP LaserJet MFP Analog Fax Accessory 600	Optional fax accessory for the dn model	B5L53A
HP Jetdirect 2900nw Print Server	USB wireless print server accessory	J8031A
HP Jetdirect 3000w NFC/Wireless Accessory	Wi-Fi direct accessory for “touch” printing from mobile devices	J8030A

Customer self-repair parts

Customer Self-Repair (CSR) parts are available for many HP LaserJet printers to reduce repair time. More information about the CSR program and benefits can be found at www.hp.com/go/csr-support and www.hp.com/go/csr-faq.

Genuine HP replacement parts can be ordered at www.hp.com/buy/parts or by contacting an HP-authorized service or support provider. When ordering, one of the following will be needed: part number, serial number (found on back of printer), product number, or printer name.

- Parts listed as **Mandatory** self-replacement are to be installed by customers, unless you are willing to pay HP service personnel to perform the repair. For these parts, on-site or return-to-depot support is not provided under the HP printer warranty.
- Parts listed as **Optional** self-replacement can be installed by HP service personnel at your request for no additional charge during the printer warranty period.

Item	Description	Self-replacement options	Part number
1 x 550 Sheet Feeder Kit	Replacement 1 x 550-sheet feeder	Mandatory	B5L34-67901
Printer Cabinet Kit	Replacement printer cabinet/stand	Mandatory	B5L51-67901
HP Fuser kit	Replacement fuser	Mandatory	B5L35-67901 (110-volt) B5L36-67901 (220-volt)
HP Fuser kit, service	Replacement fuser, service kit	Mandatory	B5L35-67902 (110-volt) B5L36-67902 (220-volt)
ITB and T2 Roller kit, service	Replacement transfer belt and secondary transfer roller	Optional	B5L24-67901
T2 Roller Service Kit	Replacement secondary transfer roller	Mandatory	B5L24-67902
Tray 2-X Roller kit	Replacement rollers for Trays 2, 3, 4, and 5	Optional	B5L24-67904
Control-panel kit	Replacement touchscreen control panel	Mandatory	B5L47-67018

Item	Description	Self-replacement options	Part number
320 GB Hard Disk Drive kit	Replacement hard disk drive	Mandatory	5851-6712
HP 1GB DDR3 x32 144-Pin 800MHz SODIMM	Replacement memory DIMM	Mandatory	E5K48A-67902
HP Trusted Platform Module kit	Replacement trusted platform module	Mandatory	F5S62-61001
HP Foreign Interface Harness kit	Replacement foreign interface harness	Mandatory	B5L31-67902
Toner Collection Unit	Replacement toner-collection unit	Mandatory	B5L37-67901
Analog FAX 600 Kit	Replacement fax board	Mandatory	B5L53-67901
ADF Maintenance Kit	Maintenance kit for the document feeder	Mandatory	B5L52-67903
Scanner white backing	Replacement white plastic backing for the scanner	Mandatory	5851-6570
Retention Clip Assy	Replacement retention clips that are behind the scanner white backing	Mandatory	5851-6573
U.S. English Keyboard Kit	Replacement keyboard for the c model	Mandatory	B5L47-67019
U.K. English Keyboard Kit	Replacement keyboard for the c model	Mandatory	B5L47-67020
Keyboard Overlay Kit French, Italian, Russian, German, Spanish, Ukrainian	Replacement keyboard overlay for the c model	Mandatory	5851-6019
Keyboard Overlay Kit Canadian French, Latin American Spanish, U.S. Spanish	Replacement keyboard overlay for the c model	Mandatory	5851-6020
Keyboard Overlay Kit Swiss French, Swiss German, Danish	Replacement keyboard overlay for the c model	Mandatory	5851-6021
Keyboard Overlay Kit Simplified Chinese, Traditional Chinese	Replacement keyboard overlay for the c model	Mandatory	5851-6022
Keyboard Overlay Kit Spanish, Portuguese	Replacement keyboard overlay for the c model	Mandatory	5851-6023
Keyboard Overlay Kit Japanese (KG and KT)	Replacement keyboard overlay for the c model	Mandatory	5851-6024

Replace the toner cartridges

Introduction

The following information provides details about the toner cartridges for the printer, and it includes instructions to replace them.

- [Toner-cartridge information](#)
- [Remove and replace the cartridges](#)

Toner-cartridge information

This printer indicates when the toner-cartridge level is low and very low. The actual toner-cartridge life remaining can vary. Consider having a replacement cartridge available to install when print quality is no longer acceptable.

To purchase cartridges or check cartridge compatibility for the printer, go to HP SureSupply at www.hp.com/go/suresupply. Scroll to the bottom of the page and verify that the country/region is correct.

The printer uses four colors and has a different toner cartridge for each color: yellow (Y), magenta (M), cyan (C), and black (K). The toner cartridges are inside the front door.

 **NOTE:** High-yield toner cartridges contain more toner than standard cartridges for increased page yield. For more information, go to www.hp.com/go/learnaboutsupplies.

Do not remove the toner cartridge from its package until it is time to replace it.

 **CAUTION:** To prevent damage to the toner cartridge, do not expose it to light for more than a few minutes. Cover the green imaging drum if the toner cartridge must be removed from the printer for an extended period of time.

The following illustration shows the toner-cartridge components.

1	Handle
2	Imaging drum
3	Protective shield
4	Memory chip

CAUTION: If toner gets on clothing, wipe it off by using a dry cloth and wash the clothes in cold water. Hot water sets toner into fabric.

NOTE: Information about recycling used toner cartridges is in the toner-cartridge box.

Remove and replace the cartridges

1. Open the front door.

2. Grasp the handle of the used toner cartridge and pull out to remove it.

3. Remove the new toner cartridge from its protective shell by tearing off the plastic strip and opening the package. Save all packaging for recycling the used toner cartridge.

4. Remove the protective shield from the toner cartridge.

5. Support the toner cartridge underneath with one hand while holding the cartridge handle with the other. Align the toner cartridge with its slot on the shelf, and then insert the toner cartridge into the printer.

NOTE: Avoid touching the green imaging drum. Fingerprints on the imaging drum can cause print defects.

6. Close the front door.

7. Pack the used toner cartridge into the box that the new cartridge came in, or use a large cardboard box and fill it with several cartridges that you need to recycle. See the enclosed recycling guide for information about recycling.

In the U.S., a pre-paid shipping label is included in the box. In other countries/regions, go to www.hp.com/recycle to print a pre-paid shipping label.

Adhere the pre-paid shipping label to the box, and return the used cartridge to HP for recycling.

Replace the toner-collection unit

Introduction

The following information provides details about the toner-collection unit for the printer, and it includes instructions to replace it.

The printer indicates when the toner-collection unit is nearly full and when it is completely full. When it is completely full, printing stops until the toner-collection unit is replaced.

To purchase a toner-collection unit (part number B5L37A), go to the HP Parts Store at www.hp.com/buy/parts.

 **NOTE:** The toner-collection unit is designed for a single use. Do not attempt to empty the toner-collection unit and reuse it. Doing so could lead to toner being spilled inside the printer, which could result in reduced print quality. After use, return the toner-collection unit to HP's Planet Partners program for recycling.

 **CAUTION:** If toner gets on clothing, wipe it off by using a dry cloth and wash the clothes in cold water. Hot water sets toner into fabric.

Remove and replace the toner-collection unit

1. Open the front door.

2. Open the toner-collection-unit door on the upper-left side of the printer.

3. Pull out the toner-collection unit and the attached door.

4. Remove the new toner-collection unit from its packaging.

5. Install the new toner-collection unit and the attached door into the printer. Align the tabs on the door with the slots in the printer.

6. Close the toner-collection unit door.

7. Close the front door.

To recycle the used toner-collection unit, follow the instructions included with the new toner-collection unit.

Replace the staple cartridge (c models)

Introduction

The following information provides details about the staple cartridges for the printer, and it includes instructions to replace them.

To purchase a package of two staple cartridges (part number Q7432A), go to the HP Parts Store at www.hp.com/buy/parts. Each cartridge holds 1,500 staples.

Remove and replace the staple cartridge

1. Open the stapler door.

NOTE: Opening the stapler door disables the stapler.

2. Remove the staple cartridge from the printer.

3. Insert the new staple cartridge into the opening inside the stapler door.

4. Close the stapler door.

4 Print

Print tasks (Windows)

How to print (Windows)

The following procedure describes the basic printing process for Windows.

1. From the software program, select the **Print** option.
2. Select the printer from the list of printers. To change settings, click the **Properties** or **Preferences** button to open the print driver.

 **NOTE:** The name of the button varies for different software programs.

 **NOTE:** In Windows 10, 8.1, and 8, these applications will have a different layout with different features from what is described below for desktop applications. To access the print feature from a Start screen app, complete the following steps:

- **Windows 10:** Select **Print**, and then select the printer.
- **Windows 8.1 or 8:** Select **Devices**, select **Print**, and then select the printer.

For the HP PCL-6 V4 driver, the HP AiO Printer Remote application downloads additional driver features when **More settings** is selected.

 **NOTE:** For more information, click the Help (?) button in the print driver.

3. Click the tabs in the print driver to configure the available options. For example, set the paper orientation on the **Finishing** tab, and set the paper source, paper type, paper size, and quality settings on the **Paper/Quality** tab.
4. Click the **OK** button to return to the **Print** dialog box. Select the number of copies to print from this screen.
5. Click the **Print** button to print the job.

Automatically print on both sides (Windows)

Use this procedure for printers that have an automatic duplexer installed. If the printer does not have an automatic duplexer installed, or to print on paper types that the duplexer does not support, print on both sides manually.

1. From the software program, select the **Print** option.
2. Select the printer from the list of printers, and then click the **Properties** or **Preferences** button to open the print driver.

 **NOTE:** The name of the button varies for different software programs.

 **NOTE:** In Windows 10, 8.1, and 8, these applications will have a different layout with different features from what is described below for desktop applications. To access the print feature from a Start screen app, complete the following steps:

- **Windows 10:** Select **Print**, and then select the printer.
- **Windows 8.1 or 8:** Select **Devices**, select **Print**, and then select the printer.

For the HP PCL-6 V4 driver, the HP AiO Printer Remote application downloads additional driver features when **More settings** is selected.

3. Click the **Finishing** tab.
4. Select **Print on both sides**. Click **OK** to close the **Document Properties** dialog.
5. In the **Print** dialog, click **Print** to print the job.

Manually print on both sides (Windows)

Use this procedure for printers that do not have an automatic duplexer installed or to print on paper that the duplexer does not support.

1. From the software program, select the **Print** option.
2. Select the printer from the list of printers, and then click the **Properties** or **Preferences** button to open the print driver.

 **NOTE:** The name of the button varies for different software programs.

 **NOTE:** In Windows 10, 8.1, and 8, these applications will have a different layout with different features from what is described below for desktop applications. To access the print feature from a Start screen app, complete the following steps:

- **Windows 10:** Select **Print**, and then select the printer.
- **Windows 8.1 or 8:** Select **Devices**, select **Print**, and then select the printer.

For the HP PCL-6 V4 driver, the HP AiO Printer Remote application downloads additional driver features when **More settings** is selected.

3. Click the **Finishing** tab.
4. Select **Print on both sides (manually)**, and then click **OK** to close the **Document Properties** dialog.
5. In the **Print** dialog, click **Print** to print the first side of the job.
6. Retrieve the printed stack from the output bin, and place it in Tray 1.
7. If prompted, select the appropriate control panel button to continue.

Print multiple pages per sheet (Windows)

1. From the software program, select the **Print** option.
2. Select the printer from the list of printers, and then click the **Properties** or **Preferences** button to open the print driver.

 **NOTE:** The name of the button varies for different software programs.

 **NOTE:** In Windows 10, 8.1, and 8, these applications will have a different layout with different features from what is described below for desktop applications. To access the print feature from a Start screen app, complete the following steps:

- **Windows 10:** Select **Print**, and then select the printer.
- **Windows 8.1 or 8:** Select **Devices**, select **Print**, and then select the printer.

For the HP PCL-6 V4 driver, the HP AiO Printer Remote application downloads additional driver features when **More settings** is selected.

3. Click the **Finishing** tab.
4. Select the number of pages per sheet from the **Pages per sheet** drop-down.
5. Select the correct **Print page borders**, **Page order**, and **Orientation** options. Click **OK** to close the **Document Properties** dialog.
6. In the **Print** dialog, click **Print** to print the job.

Select the paper type (Windows)

1. From the software program, select the **Print** option.
2. Select the printer from the list of printers, and then click the **Properties** or **Preferences** button to open the print driver.

 **NOTE:** The name of the button varies for different software programs.

 **NOTE:** In Windows 10, 8.1, and 8, these applications will have a different layout with different features from what is described below for desktop applications. To access the print feature from a Start screen app, complete the following steps:

- **Windows 10:** Select **Print**, and then select the printer.
- **Windows 8.1 or 8:** Select **Devices**, select **Print**, and then select the printer.

For the HP PCL-6 V4 driver, the HP AiO Printer Remote application downloads additional driver features when **More settings** is selected.

3. Click the **Paper/Quality** tab.
4. Select the paper type from the **Paper type** drop-down list.
5. Click **OK** to close the **Document Properties** dialog. In the **Print** dialog, click **Print** to print the job.
If the tray needs to be configured, a tray configuration message displays on the printer control panel.
6. Load the tray with the specified type and size of paper, and then close the tray.
7. Touch the **OK** button to accept the detected type and size, or touch the **Modify** button to choose a different paper size or type.
8. Select the correct type and size, and then touch the **OK** button.

Additional print tasks

Go to www.hp.com/support/colorljE57540mfp.

Instructions are available for performing specific print tasks, such as the following:

- Create and use printing shortcuts or presets
- Select the paper size, or use a custom paper size
- Select the page orientation
- Create a booklet
- Scale a document to fit a specific paper size
- Print the first or last pages of the document on different paper
- Print watermarks on a document

Print tasks (macOS)

How to print (macOS)

The following procedure describes the basic printing process for macOS.

1. Click the **File** menu, and then click the **Print** option.
2. Select the printer.
3. Click **Show Details** or **Copies & Pages**, and then select other menus to adjust the print settings.

 **NOTE:** The name of the item varies for different software programs.

4. Click the **Print** button.

Automatically print on both sides (macOS)

 **NOTE:** This information applies to printers that include an automatic duplexer.

 **NOTE:** This feature is available if you install the HP print driver. It might not be available if you are using AirPrint.

1. Click the **File** menu, and then click the **Print** option.
2. Select the printer.
3. Click **Show Details** or **Copies & Pages**, and then click the **Layout** menu.

 **NOTE:** The name of the item varies for different software programs.

4. Select a binding option from the **Two-Sided** drop-down list.
5. Click the **Print** button.

Manually print on both sides (macOS)

 **NOTE:** This feature is available if you install the HP print driver. It might not be available if you are using AirPrint.

1. Click the **File** menu, and then click the **Print** option.
2. Select the printer.
3. Click **Show Details** or **Copies & Pages**, and then click the **Manual Duplex** menu.

 **NOTE:** The name of the item varies for different software programs.

4. Click the **Manual Duplex** box, and select a binding option.
5. Click the **Print** button.
6. Go to the printer, and remove any blank paper that is in Tray 1.
7. Retrieve the printed stack from the output bin and place it with the printed-side facing down in the input tray.
8. If prompted, touch the appropriate control panel button to continue.

Print multiple pages per sheet (macOS)

1. Click the **File** menu, and then click the **Print** option.
2. Select the printer.
3. Click **Show Details** or **Copies & Pages**, and then click the **Layout** menu.

 **NOTE:** The name of the item varies for different software programs.

4. From the **Pages per Sheet** drop-down list, select the number of pages that you want to print on each sheet.
5. In the **Layout Direction** area, select the order and placement of the pages on the sheet.
6. From the **Borders** menu, select the type of border to print around each page on the sheet.
7. Click the **Print** button.

Select the paper type (macOS)

1. Click the **File** menu, and then click the **Print** option.
2. Select the printer.
3. Click **Show Details** or **Copies & Pages**, and then click the **Media & Quality** menu or the **Paper/Quality** menu.

 **NOTE:** The name of the item varies for different software programs.

4. Select from the **Media & Quality** or **Paper/Quality** options.

 **NOTE:** This list contains the master set of options available. Some options are not available on all printers.

- **Media Type:** Select the option for the type of paper for the print job.
 - **Print Quality:** Select the resolution level for the print job.
 - **Edge-To-Edge Printing:** Select this option to print close to the paper edges.
5. Click the **Print** button.

Additional print tasks

Go to www.hp.com/support/colorljE57540mfp.

Instructions are available for performing specific print tasks, such as the following:

- Create and use printing shortcuts or presets
- Select the paper size, or use a custom paper size
- Select the page orientation
- Create a booklet
- Scale a document to fit a specific paper size
- Print the first or last pages of the document on different paper
- Print watermarks on a document

Store print jobs on the printer to print later or print privately

Introduction

The following information provides procedures for creating and printing documents that are stored on the printer. These jobs can be printed at a later time or printed privately.

- [Create a stored job \(Windows\)](#)
- [Create a stored job \(macOS\)](#)
- [Print a stored job](#)
- [Delete a stored job](#)
- [Information sent to printer for Job Accounting purposes](#)

Create a stored job (Windows)

Store jobs on the printer for private or delayed printing.

1. From the software program, select the **Print** option.
2. Select the printer from the list of printers, and then select **Properties** or **Preferences** (the name varies for different software programs).

 **NOTE:** The name of the button varies for different software programs.

 **NOTE:** In Windows 10, 8.1, and 8, these applications will have a different layout with different features from what is described below for desktop applications. To access the print feature from a Start screen app, complete the following steps:

- **Windows 10:** Select **Print**, and then select the printer.
- **Windows 8.1 or 8:** Select **Devices**, select **Print**, and then select the printer.

For the HP PCL-6 V4 driver, the HP AiO Printer Remote application downloads additional driver features when **More settings** is selected.

3. Click the **Job Storage** tab.
4. Select a **Job Storage Mode** option.
 - **Proof and Hold:** Print and proof one copy of a job, and then print more copies.
 - **Personal Job:** The job does not print until you request it at the printer control panel. For this job-storage mode, you can select one of the **Make Job Private/Secure** options. If you assign a personal identification number (PIN) to the job, you must provide the required PIN at the control panel. If you encrypt the job, you must provide the required password at the control panel. The print job is deleted from memory after it prints and is lost if the printer loses power.
 - **Quick Copy:** Print the requested number of copies of a job and store a copy of the job in the printer memory so you can print it again later.
 - **Stored Job:** Store a job on the printer and allow other users to print the job at any time. For this job-storage mode, you can select one of the **Make Job Private/Secure** options. If you assign a personal identification number (PIN) to the job, the person who prints the job must provide the required PIN at

the control panel. If you encrypt the job, the person who prints the job must provide the required password at the control panel.

5. To use a custom user name or job name, click the **Custom** button, and then enter the user name or the job name.

Select which option to use if another stored job already has that name:

- **Use Job Name + (1-99):** Append a unique number to the end of the job name.
 - **Replace Existing File:** Overwrite the existing stored job with the new one.
6. Click the **OK** button to close the **Document Properties** dialog box. In the **Print** dialog box, click the **Print** button to print the job.

Create a stored job (macOS)

Store jobs on the printer for private or delayed printing.

1. Click the **File** menu, and then click the **Print** option.
2. In the **Printer** menu, select the printer.
3. By default, the print driver displays the **Copies & Pages** menu. Open the menus drop-down list, and then click the **Job Storage** menu.
4. In the **Mode** drop-down list, select the type of stored job.
 - **Proof and Hold:** Print and proof one copy of a job, and then print more copies.
 - **Personal Job:** The job does not print until someone requests it at the printer control panel. If the job has a personal identification number (PIN), provide the required PIN at the control panel. The print job is deleted from memory after it prints and is lost if the printer loses power.
 - **Quick Copy:** Print the requested number of copies of a job and store a copy of the job in the printer memory to print it again later.
 - **Stored Job:** Store a job on the printer and allow other users to print the job at any time. If the job has a personal identification number (PIN), the person who prints the job must provide the required PIN at the control panel.
5. To use a custom user name or job name, click the **Custom** button, and then enter the user name or the job name.

Select which option to use if another stored job already has that name.

- **Use Job Name + (1-99):** Append a unique number to the end of the job name.
 - **Replace Existing File:** Overwrite the existing stored job with the new one.
6. If you selected the **Stored Job** or **Personal Job** option in step 4, you can protect the job with a PIN. Type a 4-digit number in the **Use PIN to Print** field. When other people attempt to print this job, the printer prompts them to enter this PIN number.
 7. Click the **Print** button to process the job.

Print a stored job

Use this procedure to print a document that is in a job storage folder on the printer.

1. From the Home screen on the printer control panel, select [Print](#), and then select [Print from Job Storage](#).
2. Under [Stored Jobs to Print](#), select [Choose](#), and then select the folder where the document is saved.
3. Select the document, and then touch [Select](#).

If the document is private, enter the four-digit PIN in the [Password](#) field, and then select [OK](#).

4. To adjust the number of copies, select the box to the left of the [Print](#) button, and then select the number of copies from the keypad that opens. Select the Close  button to close the keypad.
5. Select [Print](#) to print the document.

Delete a stored job

You can delete documents that have been saved to when printer when they are no longer needed. You can also adjust the maximum number of jobs for the printer to store.

- [Delete a job that is stored on the printer](#)
- [Change the job storage limit](#)

Delete a job that is stored on the printer

Follow these steps to delete a job that is stored in the printer memory.

1. From the Home screen on the printer control panel, select [Print](#).
2. Select [Print from Job Storage](#).
3. Select [Choose](#), and then select the name of the folder where the job is stored.
4. Select the name of the job.
5. Select the Trash  button to delete the job.

If the job is private or encrypted, enter the PIN or password, and then select [OK](#).

6. Select [Delete Jobs](#) on the confirmation prompt.

Change the job storage limit

When a new job is stored in the printer memory, the printer overwrites any previous jobs with the same user and job name. If a job is not already stored under the same user and job name, and the printer needs additional space, the printer might delete other stored jobs starting with the oldest. Follow these steps to change the number of jobs that the printer can store:

1. From the Home screen on the printer control panel, select [Settings](#).
2. Open the following menus:
 - [Copy/Print or Print](#)
 - [Manage Stored Jobs](#)
 - [Temporary Job Storage Limit](#)

3. Use the keypad to enter the number of jobs that the printer stores.
4. Select **Done** to save the setting.

Information sent to printer for Job Accounting purposes

Printing jobs sent from drivers on the client (e.g., PC) may send personally identifiable information to HP's Printing and Imaging devices. This information may include, but is not limited to, user name and client name from which the job originated that may be used for job accounting purposes, as determined by the Administrator of the printing device. This same information may also be stored with the job on the mass storage device (e.g., disk drive) of the printing device when using the job storage feature.

Print from the USB port

Introduction

This printer features easy-access USB printing, for quickly printing files without sending them from a computer. The printer accepts standard USB flash drives in the USB port near the control panel. It supports the following types of files:

- .pdf
- .prn
- .pcl
- .ps
- .cht

Enable the USB port for printing

The USB port is disabled by default. Before using this feature, enable the USB port. Use one of the following methods to enable the port:

Method one: Enable the USB port from the printer control-panel menus

1. From the Home screen on the printer control panel, swipe until the [Settings](#) menu displays. Touch the [Settings](#) icon to open the menu.
2. Open the following menus:
 - [USB Settings](#)
 - [Print From USB Drive Settings](#)
 - [Enable Print From USB Drive](#)
3. Select the [Enabled](#) option.

Method two: Enable the USB port from the HP Embedded Web server (network-connected printers only)

1. Open the HP Embedded Web Server (EWS):
 - a. From the Home screen on the printer control panel, touch the Information  icon, and then touch the Network  icon to display the IP address or host name.
 - b. Open a web browser, and in the address line, type the IP address or host name exactly as it displays on the printer control panel. Press the [Enter](#) key on the computer keyboard. The EWS opens.

 **NOTE:** If the web browser displays a message indicating that accessing the website might not be safe, select the option to continue to the website. Accessing this website will not harm the computer.

2. Open the **Copy/Print** tab.
3. On the left side of the screen, click **Retrieve from USB Setup**.

4. Select the **Enable Retrieve from USB** check box.
5. Click **Apply**.

Print from a USB flash drive

1. Insert the USB flash drive into the easy-access USB port.

NOTE: The port might be covered. For some printers, the cover flips open. For other printers, pull the cover straight out to remove it.

2. From the Home screen on the printer control panel, select **Print**.
3. Select **Print from USB Drive**.
4. Touch **Choose**, and then select the name of the document to print. Touch **Select**.

NOTE: The document might be in a folder. Open folders as necessary.

5. To adjust the number of copies, touch the number of copies field in the bottom-left corner of the screen. Use the keypad to enter the number of copies to print.
6. Select **Print** to print the document.

5 Copy

For more information:

- [Make a copy](#)

- [Additional options when copying](#)
- [Additional copy tasks](#)

The following information is correct at the time of publication.

For video assistance, see www.hp.com/videos/LaserJet.

For current information, see www.hp.com/support/colorljE57540mfp.

HP's all-inclusive help for the printer includes the following information:

- Install and configure
- Learn and use
- Solve problems
- Download software and firmware updates
- Join support forums
- Find warranty and regulatory information

Make a copy

1. Place the document face-down on the scanner glass, or place it face-up in the document feeder and adjust the paper guides to fit the size of the document.
2. From the Home screen on the printer control panel, select [Copy](#).
3. In the [Options](#) pane, select the number of copies.
4. Select [Optimize Text/Picture](#) to optimize for the type of image being copied: text, graphics, or photos. Select one of the predefined options.
5. Set options marked with a yellow triangle before using the preview feature.

 **NOTE:** After the preview scan, these options are removed from the main [Options](#) list and are summarized in the [Pre-scan Options](#) list. To change any of these options, discard the preview and start over.

Using the preview feature is optional.

6. Touch the right pane of the screen to preview the document. In the preview screen, use the buttons on the right of the screen to adjust the preview options and to rearrange, rotate, insert, or remove pages.

Use these buttons to toggle between two-page view and thumbnail view. More options are available in thumbnail view than in two-page view.

Use these buttons to zoom in or out on the selected page.

NOTE: Select only one page at a time to use these buttons.

Use this button to rotate the page 180 degrees.

NOTE: This button is available only in the thumbnail view.

Use this button to delete the selected pages.

NOTE: This button is available only in the thumbnail view.

Use these buttons to rearrange the pages within the document. Select one or more pages and move them to the left or right.

NOTE: These buttons are available only in the thumbnail view.

Use this button to add a page to the document. The printer prompts to scan additional pages.

Use this button to clear the changes made in the preview and start over.

7. When the document is ready, touch [Start](#) to begin copying.

Copy on both sides (duplex)

1. Place the document face-down on the scanner glass, or place it face-up in the document feeder and adjust the paper guides to fit the size of the document.
2. From the Home screen on the printer control panel, select [Copy](#).
3. In the [Options](#) pane, select [Original Sides](#), and then select the option that describes the original document:
 - Use [Automatically detect](#) to detect whether the original is printed on one or both sides of the page.
 - Use [1-sided](#) for originals that are printed on one side of the page.
 - Use [2-sided \(book-style\)](#) for originals that flip on the right/left edge of the page, like books. If the image is portrait, the output flips on the long edge of the page. If the image is landscape, the output flips on the short edge of the page.
 - Use [2-sided \(flip-style\)](#) for originals that flip on the top/bottom edge of the page, like calendars. If the image is portrait, the output flips on the short edge of the page. If the image is landscape, the output flips on the long edge of the page.
4. Select [Output Sides](#), and then select one of these options:
 - [Match original](#): The output will match the format of the original. For example, if the original is 1-sided, the output will be 1-sided. However, if the administrator has restricted 1-sided printing and the original is 1-sided, the output will be 2-sided book-style.
 - [1-sided](#): The output will be 1-sided. However, if the administrator has restricted 1-sided printing, the output will be 2-sided book-style.
 - [2-sided \(book-style\)](#): The output will flip on the right/left edge of the page, like a book. If the image is portrait, the output flips on the long edge of the page. If the image is landscape, the output flips on the short edge of the page.
 - [2-sided \(flip-style\)](#): The output will flip on the top/bottom edge of the page, like a calendar. If the image is portrait, the output flips on the short edge of the page. If the image is landscape, the output flips on the long edge of the page.
5. Set options marked with a yellow triangle before using the preview feature.

 **NOTE:** After the preview scan, these options are removed from the main [Options](#) list and are summarized in the [Pre-scan Options](#) list. To change any of these options, discard the preview and start over.

Using the preview feature is optional.

6. Touch the right pane of the screen to preview the document. In the preview screen, use the buttons on the right of the screen to adjust the preview options and to rearrange, rotate, insert, or remove pages.

Use these buttons to toggle between two-page view and thumbnail view. More options are available in thumbnail view than in two-page view.

Use these buttons to zoom in or out on the selected page.

NOTE: Select only one page at a time to use these buttons.

Use this button to rotate the page 180 degrees.

NOTE: This button is available only in the thumbnail view.

Use this button to delete the selected pages.

NOTE: This button is available only in the thumbnail view.

Use these buttons to rearrange the pages within the document. Select one or more pages and move them to the left or right.

NOTE: These buttons are available only in the thumbnail view.

Use this button to add a page to the document. The printer prompts to scan additional pages.

Use this button to clear the changes made in the preview and start over.

7. When the document is ready, touch [Start](#) to begin copying.

Additional options when copying

The following settings are available in the [Options](#) list when copying.

NOTE: The following list contains the master set of options available for HP Enterprise MFP printers. Some options are not available on all printers.

Number of Copies	Specify the number of copies to make.
Load and Save Settings	Load Quick Set: Load copy settings from a saved Quick Set. NOTE: Use the HP Embedded Web Server to create and save Quick Sets. Save Defaults: Save the current settings in the Options list as default settings for future copy jobs.
Sides	Specify whether the original document is printed on one side or both sides, and whether the copies are to be printed on one side or both sides.
Color/Black	Specify whether copies are to be printed in color, black and gray, or black only. For color printers only.
Staple	Specify the placement of staples. For printers with automatic finishing accessories only. This feature does not apply to printers with convenience staplers.)
Staple/Hole Punch	Specify the number and placement of punched holes. For printers with hole-punch accessories only.
Scan Mode	Standard Document: Scan a page or stack of pages through the document feeder, or individually on the flatbed glass. Book Mode: Scan an open book and output each page of the book onto different pages. 2-sided ID Copy: Scan each side of an identification card on the flatbed glass and output them onto one page. After scanning the first side, the printer prompts to place the second side in the correct position on the glass.
Reduce/Enlarge	Scale the size of the scanned document up or down.
Original Size	Specify the paper size for the original document.
Paper Selection	Specify the paper size and type for the copies.
Booklet	Format and rearrange original scanned images into pages that print as a booklet.
Content Orientation	Specify whether the original document is printed in Portrait or Landscape orientation.
Pages per Sheet	Copy multiple sheets of paper onto a single sheet. Select one, two, or four pages per sheet.
Output Bin	Specify which output bin to use for the job when the printer output bins are configured for mailbox mode. For printers with multiple output bins only. NOTE: This option does not appear when the output bins are configured for stacker mode or function-separator mode.

<p>Paper Path</p> <p>For printers that have an option to flip pages inside the paper path.</p>	<p>Select a specific paper path:</p> <p>Face-up (straightest path): Pages output to the bin in the opposite order that they were placed in the document feeder.</p> <p>Face-down (correct order): Pages are stacked in the same order as they were placed in the document feeder.</p>
<p>Image Adjustment</p>	<p>Sharpness: Clarify or soften the image. For example, increasing the sharpness could make text appear crisper, but decreasing it could make photos appear smoother.</p> <p>Darkness: Increase or decrease the amount of white and black used in colors in scanned images.</p> <p>Contrast: Increase or decrease the difference between the lightest and the darkest color on the page.</p> <p>Background Cleanup: Remove faint colors from the background of scanned images. For example, if the original document is printed on colored paper, use this feature to lighten the background without affecting the darkness of the image.</p> <p>Automatic Tone: Available for Flow printers only. The printer automatically adjusts the Darkness, Contrast, and Background Cleanup settings to the most appropriate for the scanned document.</p>
<p>Optimize Text/Picture</p>	<p>Optimize the job for the type of image being scanned: text, graphics, or photos.</p>
<p>Edge-to-Edge</p>	<p>Scan and print a copy closer to the edge of the page than is normally allowed. Printing close to the edge can result in some print-quality issues.</p>
<p>Erase Edges</p>	<p>Remove blemishes, such as dark borders or staple marks, by cleaning the edges of the scanned image.</p>
<p>Collate</p>	<p>Assemble each set of pages in the same order as the original document when making multiple copies of a document.</p>
<p>Automatically Straighten</p> <p>NOTE: Available on Flow models only.</p> <p>This feature is not available for all firmware versions. You might need to update the printer firmware to use this feature.</p>	<p>Automatically straighten a scanned image.</p>
<p>Blank Page Suppression</p> <p>NOTE: This feature is not available for all firmware versions. You might need to update the printer firmware to use this feature.</p>	<p>Exclude blank pages in the original document from scanned images. This feature is useful for scanning pages printed on both sides to eliminate blank pages in the resulting scanned document.</p>
<p>Multi-feed Detection</p>	<p>Enable or disable multi-feed detection. When enabled, scanning stops when the printer detects more than one page at a time being fed in the document feeder. When disabled, scanning continues when a multi-feed is detected, to allow scanning pages that are stuck together, originals with self-adhesive notes on them, or thick paper.</p>

Additional copy tasks

Go to www.hp.com/support/colorljE57540mfp.

Instructions are available for performing specific copy tasks, such as the following:

- Copy or scan pages from books or other bound documents
- Copy mixed-size documents
- Copy or scan both sides of an identification card
- Copy or scan a document into a booklet format

6 Scan

Set up Scan to Email

- [Introduction](#)
- [Before you begin](#)
- [Step one: Access the HP Embedded Web Server \(EWS\)](#)
- [Step two: Configure the Network Identification settings](#)
- [Step three: Configure the Send to Email feature](#)
- [Step four: Configure the Quick Sets \(optional\)](#)
- [Step five: Set up Send to Email to use Office 365 Outlook \(optional\)](#)

Introduction

The printer has a feature that enables it to scan a document and send it to one or more email addresses. To use this scan feature, the printer must be connected to a network; however, the feature is not available until it has been configured. There are two methods for configuring Scan to Email, the **Scan to Email Setup Wizard** for basic and **Email Setup** for advanced. Use the following information to set up the Scan to Email feature.

Before you begin

To set up the Scan to Email feature, the printer must have an active network connection.

Administrators need the following information before beginning the configuration process.

- Administrative access to the printer
- DNS suffix (e.g., companyname.com)
- SMTP server (e.g., smtp.mycompany.com)

 **NOTE:** If you do not know the SMTP server name, SMTP port number, or authentication information, contact the email/Internet service provider or system administrator for the information. SMTP server names and port names are typically found by doing an Internet search. For example, use terms like "Gmail smtp server name" or "Yahoo smtp server name" to search.

- SMTP server authentication requirements for outgoing email messages, including the user name and password used for authentication, if applicable.

 **NOTE:** Consult your email service provider's documentation for information on digital sending limits for your email account. Some providers may temporarily lock your account if you exceed your sending limit.

Step one: Access the HP Embedded Web Server (EWS)

1. From the Home screen on the printer control panel, touch the Information  icon, and then touch the Network  icon to display the IP address or host name.

- Open a web browser, and in the address line, type the IP address or host name exactly as it displays on the printer control panel. Press the **Enter** key on the computer keyboard. The EWS opens.

NOTE: If the web browser displays a message indicating that accessing the website might not be safe, select the option to continue to the website. Accessing this website will not harm the computer.

The screenshot shows the HP Embedded Web Services (EWS) interface. The top navigation bar includes tabs for Information, General, Copy/Print, Scan/Digital Send, Fax, Troubleshooting, Security, HP Web Services, and Networking. The left sidebar lists various pages like Device Status, Job Log, Configuration Page, etc. The main content area is titled "Device Status" and shows the following information:

- Sleep mode on**
- Supplies:**
 - Black Cartridge (Order 508A (CF360A)) 90%*
 - Cyan Cartridge (Order 508A (CF361A)) 90%*
 - Magenta Cartridge (Order 508A (CF363A)) 90%*
 - Yellow Cartridge (Order 508A (CF362A)) 90%*
 - Fuser Kit (Order 110V-B5L35A, 220V-B5L36A) 100%*
 - Document Feeder Kit (Order B5L52A) 100%*
- Toner Collection Unit B5L37A: **OK**
- * Estimated levels. Actual levels may vary.
- [Supplies Details](#)
- Media:**

Input/Output	Status	Capacity	Size	Type
Tray 1	Empty	100 sheets	Any Size	Any Type
Tray 2	OK	550 sheets	Letter (8.5x11)	Plain
Standard bin	OK	250 sheets	N/A	N/A

[Change Settings](#)

Step two: Configure the Network Identification settings

NOTE: Configuring email setup on the **Networking** tab is an advanced process and might require the assistance of a system administrator.

- Using the EWS top navigation tabs, click **Networking**.

NOTE: For configuring the network settings for use with Office 365, [Step five: Set up Send to Email to use Office 365 Outlook \(optional\) on page 79](#)

- In the left navigation pane, click **TCP/IP Settings**. A username/password might be required to access the **Network Identification** tab of the EWS.
- On the **TCP/IP Settings** dialog, click the **Network Identification** tab.

4. If DNS is required on the network, in the **TCP/IP Domain Suffix** area, verify that the DNS suffix for the email client being used is listed. DNS suffixes have this format: *companyname.com*, *gmail.com*, etc.

 **NOTE:** If the Domain Name suffix is not set up, use the IP address.

5. Click **Apply**.
6. Click **OK**.

Step three: Configure the Send to Email feature

The two options for configuring Send to Email are the **Email Setup Wizard** for basic configuration and **Email Setup** for advanced configuration. Use the following options to configure the Send to Email feature:

- [Method one: Basic configuration using the Email Setup Wizard](#)
- [Method two: Advanced configuration using the Email Setup](#)

Method one: Basic configuration using the Email Setup Wizard

This option opens the **Email Setup Wizard** in the HP Embedded Web Server (EWS) for basic configuration.

1. Using the EWS top navigation tabs, click **Scan/Digital Send**.
2. In the left-navigation pane, click **Email and Scan to Network Folder Quick Setup Wizards**.

3. In the **Email and Scan to Network Folder Quick Setup Wizards** dialog, click the **Email Setup** link.

 **NOTE:** If a message displays indicating that the Scan to Email feature is disabled, click **Continue** to proceed with the configuration and enable the Scan to Email feature upon completion.

4. On the **Configure Email Servers (SMTP)** dialog, select one of the following options and complete the steps:

Option one: Use a server already in use by Email

- ▲ Select **Use a server already in use by Email**, and then click **Next**.

Option two: Search network for outgoing email server

 **NOTE:** This option finds outgoing SMTP servers inside your firewall only.

- Select **Search network for outgoing email server**, and then click **Next**.
- Select the appropriate server from the **Configure Email Server (SMTP)** list, and then click **Next**.
- Select the option that describes the server's authentication requirements:
 - **Server does not require authentication:** Select **Server does not require authentication**, and then click **Next**.
 - OR–
 - **Server requires authentication:** From the drop-down list, select an authentication option:
 - **Use credentials of user to connect after Sign In at the control panel:** Select **Use credentials of user to connect after Sign In at the control panel**, and then click **Next**.
 - OR–
 - **Always use these credentials:** Select **Always use these credentials**, enter the **User name** and **Password**, and then click **Next**.

Option three: Add SMTP server

- a. Select **Add SMTP server**
- b. Enter the **Server Name** and **Port Number**, and then click **Next**.

 **NOTE:** In most cases, the default port number does not need to be changed.

 **NOTE:** If you are using a hosted SMTP service such as Gmail, verify the SMTP address, port number, and SSL settings from the service provider's website or other sources. Typically, for Gmail, the SMTP address is smtp.gmail.com, port number 465, and the SSL should be enabled.

Please refer to online sources to confirm these server settings are current and valid at the time of configuration.

- c. Select the appropriate server authentication option:
 - **Server does not require authentication:** Select **Server does not require authentication**, and then click **Next**.
 - OR–
 - **Server requires authentication:** Select an option from the **Server requires authentication** drop-down list:
 - **Use credentials of user to connect after Sign In at the control panel:** Select **Use credentials of user to connect after Sign In at the control panel**, and then click **Next**.
 - OR–
 - **Always use these credentials:** Select **Always use these credentials**, enter the **User name** and **Password**, and then click **Next**.
5. On the **Configure Email Settings** dialog, enter the following information about for the sender's email address, and then click **Next**.

 **NOTE:** When setting up the **From**, **Subject**, and **Message** fields, if the **User editable** check box is unchecked, users will not be able to edit those fields at the printer control panel when sending an email.

Option	Description
From (Required)	Select one of the following options from the From drop-down list: <ul style="list-style-type: none">● User's address (sign-in required)● Default From: Enter a default email address and display name in the Default From Email Address and Default Display Name fields <p>NOTE: Create an email account for the printer, and use this address for the default email address.</p> <p>NOTE: Configure the email feature so that users must sign in before using it. This prevents users from sending an email from an address that is not their own.</p>

Option	Description
Subject (Optional)	Provide a default subject line for the email messages.
Message (Optional)	Create a custom message. To use this message for all emails sent from the printer, clear the User editable check box for Message .

6. In the **Configure File Scan Settings** area, set the default scanning preferences, and then click **Next**.

Option	Description
File Type	Select the default file type that the for the scanned document: <ul style="list-style-type: none"> • PDF • JPEG • TIFF • MTIFF • XPS • PDF/A
Color/Black	Select the default color setting for the scanned document: <ul style="list-style-type: none"> • Color • Black • Black/Gray • Automatically detect
Quality and File Size	Select the default output quality for the scanned document: <ul style="list-style-type: none"> • Low (small file) • Medium • High (large file)
Resolution	Select the default scan resolution for the scanned document: <ul style="list-style-type: none"> • 75 dpi • 150 dpi • 200 dpi • 300 dpi • 400 dpi • 600 dpi

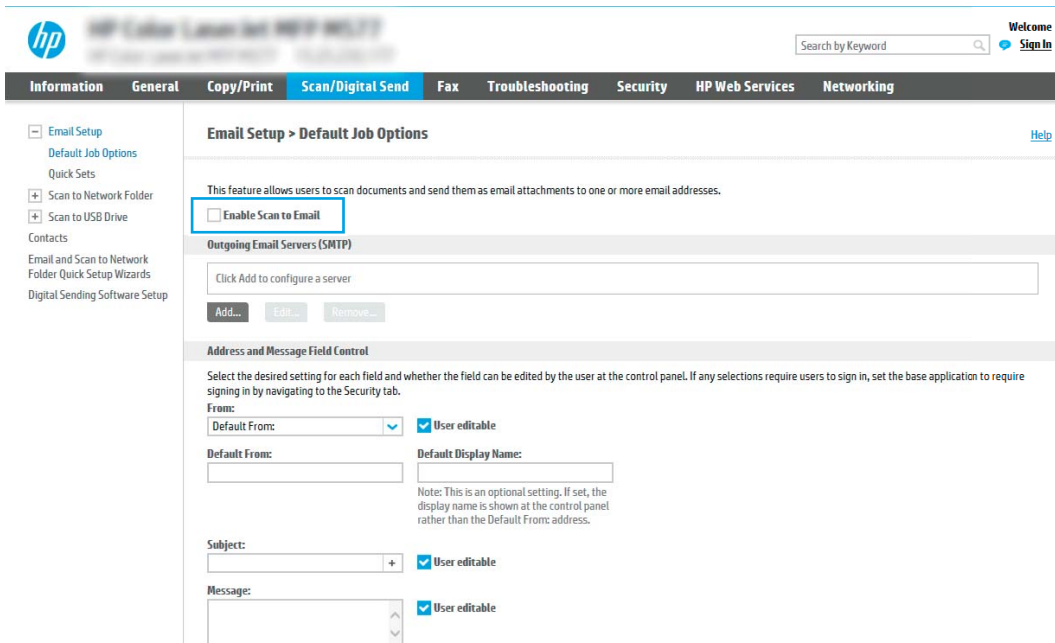

7. Review the **Summary** area, and then click **Finish** to complete the setup.

Method two: Advanced configuration using the Email Setup

1. Using the EWS top navigation tabs, click **Scan/Digital Send**, and then click **Email Setup** in the left navigation pane.

 **NOTE:** By default, the Email Setup page displays the basic settings for Scan to Email setup. To access additional settings, click the **Advanced Settings** button at the bottom of the page.

2. On the **Email Setup** dialog, select the **Enable Send to Email** check box. If this check box is not selected, the feature is unavailable at the printer control panel.

The screenshot shows the HP EWS interface for 'Email Setup > Default Job Options'. The 'Scan/Digital Send' tab is active. In the 'Email Setup' section, the 'Enable Scan to Email' checkbox is checked. Below this, the 'Outgoing Email Servers (SMTP)' section is visible, along with the 'Address and Message Field Control' section which includes fields for 'From', 'Subject', and 'Messages', each with a 'User editable' checkbox.

3. In the **Outgoing Email Servers (SMTP)** area, complete the steps for one of the following options:

- Select one of the displayed servers
- Click **Add** to start the SMTP wizard.
 1. In the SMTP wizard, select one of the following options:
 - **Option one: I know my SMTP server address or host name:** Enter the address of an SMTP server, and then click **Next**
 - **Option two:** If you do not know the address of the SMTP server, select **Search network for outgoing email server**, and then click **Next**. Select the server, and then click **Next**.

 **NOTE:** If an SMTP server was already created for another printer function, the **Use a server already in use by another function** option displays. Select this option, and then configure it to be used for the email function.

2. On the **Set the basic information necessary to connect to the server** dialog, set the options to use, and then click **Next**.

 **NOTE:** Some servers have problems sending or receiving emails that are larger than 5 megabytes (MB). These problems can be prevented by entering a number in **Split emails if larger than (MB)**.

 **NOTE:** In most cases, the default port number does not need to be changed. However, when using the Enable SMTP SSL Protocol option, port 587 must be used.

 **NOTE:** If you are using Google™ Gmail for email service, select the **Enable SMTP SSL Protocol** check box. Typically, for gmail, the SMTP address is smtp.gmail.com, port number 465, and the SSL should be enabled.

Please refer to online sources to confirm these server settings are current and valid at the time of configuration.

3. On the **Server Authentication Requirements** dialog, select the option that describes the server's authentication requirements:
 - **Server does not require authentication**, and then click **Next**.
 - **Server requires authentication**
 - From the drop-down box, select **Use credentials of user to connect after Sign In at the control panel**, and then click **Next**.
 - From the drop-down box, select **Always use these credentials**, enter the **Username** and **Password**, and then click **Next**.

 **NOTE:** If using a signed-in user's credentials, set email to require sign in by the user on the printer control panel. Deny device guest access to email by clearing the check box for email in the **Device Guest** column in the **Sign in and Permission Policies** area on the **Access Control** dialog of the **Security** tab. The icon in the check box changes from a check mark to a lock.

4. On the **Server Usage** dialog, choose the printer functions that will send email through this SMTP server, and then click the **Next** button.

 **NOTE:** If the server requires authentication, a user name and password for sending automatic alerts and reports from the printer will be required.

5. On the **Summary and Test** dialog, enter a valid email address in the **Send a test email to:** field, and then click **Test**.
6. Verify that all of the settings are correct, and then click **Finish** to complete the outgoing email server set up.

4. In the **Address and Message Field Control** area, enter a **From:** setting and any of the other optional settings.

Address and Message Field Control settings:

Feature	Description
Address Field Restrictions¹	<p>Specify whether users must select an email address from an address book or whether users are allowed to enter in an email address manually.</p> <p>CAUTION: If Users must select from address book is selected, and any of the address fields are also set as User editable, changes to those editable fields also change the corresponding values in the address book.</p> <p>To prevent users from changing contacts in the Address Book at the printer control panel, go to the Access Control page on the Security tab, and deny Device Guest access to address book modifications.</p>
Allow invalid email address formats¹	Select to allow an invalid email address format.
User editable	<p>To use the Default From address and Default Display Name for all emails sent from this printer (unless a user is signed in), do not select the User editable check box.</p> <p>When setting up the address fields, if the User editable check box is unchecked, users will not be able to edit those fields at the printer control panel when sending an email. For send-to-me functionality, clear the User editable check boxes for all of the address fields, including the From: To: CC:, and BCC: fields, and then set that user's send email From: their own email address and To: their own email address.</p>
Default From: and Default Display Name:	<p>Provide an email address and name to use for the From: address for the email message.</p> <p>NOTE: Create an email account for the printer, and use this address for the default email address.</p> <p>NOTE: Configure the email feature so that users must sign in before using it. This prevents users from sending an email from an address that is not their own.</p>
To:¹	Provide a To (recipient) email address for emails.
CC:¹	Provide a CC email address for emails.
BCC:¹	Provide a BCC email address for emails.
Subject:	Provide a default subject line for the email messages.
Message:	Create a custom message. To use this message for all emails sent from the printer, clear or do not select the User editable check box for Message: .

¹ This setting is available only on the Advanced Settings page.

5. In the **Signing and Encryption** area, set the signing and encryption preferences.

NOTE: These settings are available only on the Advanced Settings page.

Signing and Encryption settings:

Feature	Description
Signing	<p>Select whether to sign the security certificate.</p> <p>Select the User editable check box to make this setting editable at the printer control panel.</p>
Hashing Algorithm	Select the algorithm to use for signing the certificate.
Encryption	<p>Select whether to encrypt the email.</p> <p>Select the User editable check box to make this setting editable at the printer control panel.</p>
Encryption Algorithm	Select the algorithm to use for encrypting the email.

Feature	Description
Attribute for Recipient Public Key	Enter which attribute to use to retrieve the recipient's public key certificate from LDAP.
Use the recipient public key certificate to verify the recipient	Select this setting to use the recipient's public key certificate to verify the recipient.

- In the **Notification Settings** area, select when users will receive notifications about sent emails. The default setting is using the signed in user's email address. If the recipient email address is blank, no notification is sent.
- In the **Scan Settings** area, set the default scanning preferences.

 **NOTE:** These settings are available only on the Advanced Settings page.

Scan settings:

Feature	Description
Original Size	Select the page size of the original document.
Original Sides	Select whether the original document is single-sided or double-sided.
Optimize Text/Picture	Select to optimize for the output of a particular type of content.
Content Orientation	Select the way the content of the original document is placed on the page: Portrait or Landscape .
Background Cleanup	Select a value to remove faint images from the background or to remove a light background color.
Darkness	Select a value to adjust the darkness of the file.
Contrast	Select a value to adjust the contrast of the file.
Sharpness	Select a value to adjust the sharpness of the file.
Image Preview	Select whether to require or make optional a displayed preview of the job or to disable a preview.
Cropping Options	Select whether or not to allow a job to be cropped and the type of cropping option.
Erase Edges	Select this setting to specify the width of edge margins to be erased, in either inches or millimeters, for the front side and back side of a job.

- In the **File Settings** area, set the default file settings preferences.

File settings:

Feature	Description
File Name Prefix ¹	Set the default file name prefix used for files saved to a network folder.
File Name	Default file name for the file to be saved. Select the User editable check box to make this setting editable at the printer control panel.
File Name Suffix ¹	Set the default file name suffix used for files saved to a network folder. Duplicate filename suffix default [filename]_YYYYMMDDT
File Name Preview ¹	Enter a file name, and then click the Update Preview button.
File Numbering Format ¹	Select a file name format for when the job is divided into multiple files.

Feature	Description
Add numbering when job has just one file (ex. _1-1)	Select this setting to add numbering to a file name when the job is only one file instead of multiple files.
File Type	Select the file format for the saved file. Select the User editable check box to make this setting editable at the printer control panel.
High Compression (smaller file)	Select this setting to compress the scanned file, which reduces the file size. However, the scanning process for a High compression file might take longer than for a Normal compression file.
PDF encryption¹	If the file type is PDF, then this option encrypts the output PDF file. A password must be specified as part of the encryption. The same password must be used to open the file. The user will be prompted to enter a password prior to scanning their job if one has not been set prior to pressing start.
Resolution	Set the resolution for the file. Higher resolution images have more dots per inch (dpi), so they show more detail. Lower resolution images have fewer dots per inch and show less detail, but the file size is smaller.
Quality and File Size	Select the quality for the file. Higher-quality images require a larger file size than lower-quality images, and they take more time to send.
Color/Black	Specify whether copies are to be printed in color, black and gray, or black only.
Suppress blank pages¹	If the Suppress blank pages option is enabled, blank pages will be ignored.
Create Multiple Files¹	Select this setting to scan pages into separate files based on a predetermined maximum number of pages per file.

¹ This setting is available only on the Advanced Settings page.

- Review the selected options to verify that they are accurate, and then click **Apply** to complete the setup.

Step four: Configure the Quick Sets (optional)

Quick Sets are optional short-cut jobs that can be accessed on the main Home screen or within the Quick Sets application at the printer.

- In the **Email Setup** area of the left navigation pane, click **Quick Sets**.
- Select one of the following options:
 - Select an existing Quick Set under Quick Sets Application in the table.
 - OR-
 - Click **Add** to start the Quick Set Wizard.
- If you selected **Add**, the **Quick Sets Setup** page opens. Complete the following information:
 - Quick Set Name:** Enter a title for the new Quick Set.
 - Quick Set Description:** Enter a description of the Quick Set.
 - Quick Set Start Option:** To set how the Quick Set starts, click either **Enter application, then user presses Start** or **Start instantly when selected from the Home Screen**.
- Define the following settings for the Quick Set: Address and Message Field Control, Signing and Encryption, Notification Settings, Scan Settings, File Settings.
- Click **Finish** to save the Quick Set.

Step five: Set up Send to Email to use Office 365 Outlook (optional)

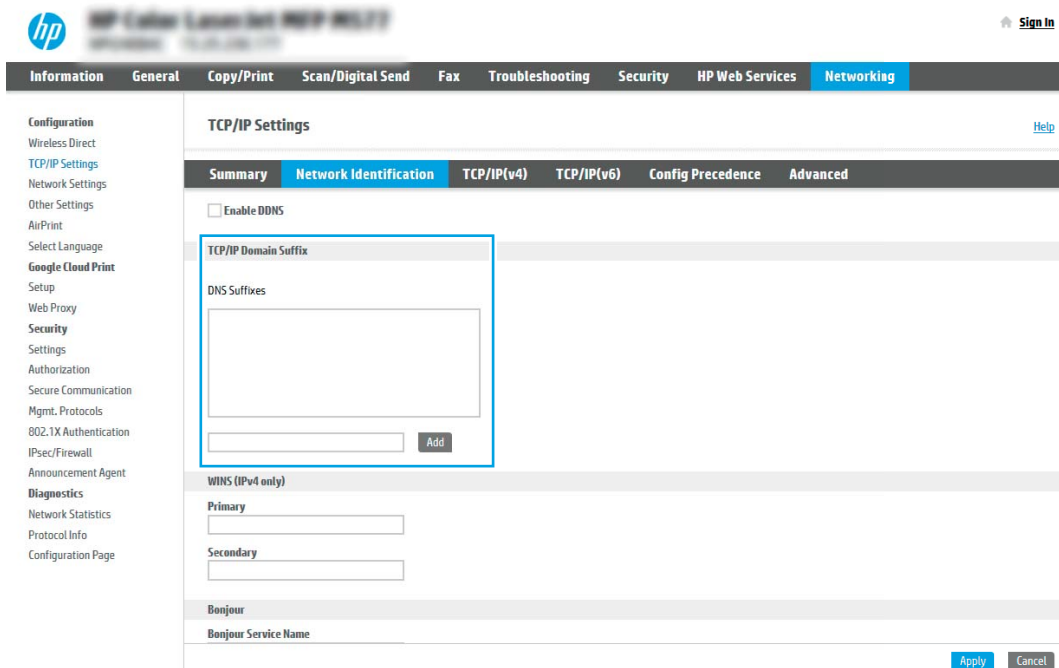

Introduction

Microsoft Office 365 Outlook is a cloud-based email system provided by Microsoft which uses Microsoft's Simple Mail Transfer Protocol (SMTP) server to send or receive emails. Complete the following to enable the printer to send an email with an Office 365 Outlook account from the control panel.

 **NOTE:** You must have an email address account with Office 365 Outlook to configure the settings in the EWS.

Configure the outgoing email server (SMTP) to send an email from an Office 365 Outlook account

1. Using the EWS top navigation tabs, click **Networking**.
2. In the left navigation pane, click **TCP/IP Settings**.
3. In the **TCP/IP Settings** area, click the **Network Identification** tab.
4. If DNS is required on the network, in the **TCP/IP Domain Suffix** area, verify that the DNS suffix for the email client being used is listed. DNS suffixes have this format: *companyname.com*, Gmail.com, etc.

The screenshot shows the HP EWS interface for TCP/IP Settings. The 'Networking' tab is selected in the top navigation bar. The left navigation pane shows 'TCP/IP Settings' selected. The main content area is titled 'TCP/IP Settings' and has a sub-tab 'Network Identification' selected. Under 'Network Identification', there is a checkbox for 'Enable DDNS' which is unchecked. Below that is the 'TCP/IP Domain Suffix' section, which contains a 'DNS Suffixes' list and an 'Add' button. The 'WINS (IPv4 only)' section has 'Primary' and 'Secondary' input fields. The 'Bonjour' section has a 'Bonjour Service Name' input field. At the bottom right, there are 'Apply' and 'Cancel' buttons.

 **NOTE:** If the Domain Name suffix is not set up, use the IP address.

5. Click **Apply**.
6. Click the **Scan/Digital Send** tab.
7. On the left navigation pane, click **Email Setup**.

- On the **Email Setup** page, select the **Enable Send to Email** check box. If this check box is not available, the feature is unavailable at the printer control panel.

The screenshot shows the HP Email Setup interface. The top navigation bar includes 'Information', 'General', 'Copy/Print', 'Scan/Digital Send', 'Fax', 'Troubleshooting', 'Security', 'HP Web Services', and 'Networking'. The left sidebar lists 'Email Setup' with sub-options like 'Default Job Options', 'Quick Sets', 'Scan to Network Folder', and 'Scan to USB Drive'. The main content area is titled 'Email Setup > Default Job Options'. A blue box highlights the 'Enable Scan to Email' checkbox, which is checked. Below this is the 'Outgoing Email Servers (SMTP)' section with an 'Add...' button. The 'Address and Message Field Control' section has several fields: 'Default From' (dropdown), 'Default Display Name' (text input), 'Subject' (text input), and 'Message' (text area). Each of these fields has a 'User editable' checkbox checked.

- In the **Outgoing Email Servers (SMTP)** area, click **Add** to start the SMTP wizard.
- In the **I know my SMTP server address or host name** field, type `smtp.onoffice.com`, and then click **Next**.
- On the **Set the basic information necessary to connect to the server** dialog, in the **Port Number** field, type `587`.

 **NOTE:** Some servers have problems sending or receiving emails that are larger than 5 megabytes (MB). These problems can be prevented by entering a number in **Split emails if larger than (MB)**.

- Select the **Enable SMTP SSL Protocol** check box, and then click **Next**.
- On the **Server Authentication Requirements** dialog, complete the following information:
 - Select **Server requires authentication**.
 - From the drop-down list, select **Always use these credentials**
 - In the **Username** field, type the Office 365 Outlook email address.
 - In the **Password** field, type the Office 365 Outlook account password, and then click **Next**.
- On the **Server Usage** dialog, choose the printer functions that will send email through this SMTP server, and then click the **Next** button.
- On the **Summary and Test** dialog, enter a valid email address in the **Send a test email to:** field, and then click **Test**.
- Verify that all of the settings are correct, and then click **Finish** to complete the outgoing email server set up.

Set up Scan to Network Folder

- [Introduction](#)
- [Before you begin](#)
- [Step one: Access the HP Embedded Web Server](#)
- [Step two: Set up Scan to Network Folder](#)

Introduction

This document explains how to enable and configure the Scan to Network Folder function. The printer has a feature that enables it to scan a document and save it to a network folder. To use this scan feature, the printer must be connected to a network; however, the feature is not available until it has been configured. There are two methods for configuring Scan to Network Folder, the **Save to Network Folder Setup Wizard** for basic setup and **Save to Network Folder Setup** for advanced setup.

Before you begin

 **NOTE:** To set up the Scan to Network Folder feature, the printer must have an active network connection.

Administrators need the following items before beginning the configuration process.

- Administrative access to the printer
- The fully-qualified domain name (FQDN) (e.g., \\servername.us.companyname.net\scans) of the destination folder OR the IP address of the server (e.g., \\16.88.20.20\scans).

 **NOTE:** The use of the term "server" in this context refers to the computer where the shared folder resides.

Step one: Access the HP Embedded Web Server

1. From the Home screen on the printer control panel, touch the Information  icon, and then touch the Network  icon to display the IP address or host name.
2. Open a web browser, and in the address line, type the IP address or host name exactly as it displays on the printer control panel. Press the **Enter** key on the computer keyboard. The EWS opens.

 **NOTE:** If the web browser displays a message indicating that accessing the website might not be safe, select the option to continue to the website. Accessing this website will not harm the computer.

The screenshot shows the HP Embedded Web Server (EWS) interface. At the top, there is a navigation bar with tabs: Information, General, Copy/Print, Scan/Digital Send, Fax, Troubleshooting, Security, HP Web Services, and Networking. The left sidebar contains a list of links: Device Status, Job Log, Configuration Page, Supplies Status Page, Event Log Page, Usage Page, Device Information, Control Panel Snapshot, Print, Printable Reports and Pages, and Open Source Licenses. The main content area is titled "Device Status" and includes a "Sleep mode on" indicator. Below this is a "Supplies" section showing four toner cartridges: Black Cartridge (Order 508A, CF360A) at 90%, Cyan Cartridge (Order 508A, CF361A) at 90%, Magenta Cartridge (Order 508A, CF363A) at 90%, and Yellow Cartridge (Order 508A, CF362A) at 90%. It also shows a Fuser Kit (Order 110V-B5L35A, 220V-B5L36A) at 100% and a Document Feeder Kit (Order B5L52A) at 100%. A Toner Collection Unit B5L37A is shown as OK. A note states: "* Estimated levels. Actual levels may vary." and a link for "Supplies Details" is provided. Below the supplies section is a "Media" section with a table:

Input/Output	Status	Capacity	Size	Type
Tray 1	Empty	100 sheets	Any Size	Any Type
Tray 2	OK	550 sheets	Letter (8.5x11)	Plain
Standard bin	OK	250 sheets	N/A	N/A

A "Change Settings" link is located below the media table.

Step two: Set up Scan to Network Folder

Method one: Use the Scan to Network Folder Wizard

This option opens the setup wizard that is in the HP Embedded Web Server (EWS) for the printer. The setup wizard includes the options for basic configuration.

NOTE: Before you begin: To display the printer's IP address or host name, touch the Information  icon, and then touch the Network  icon on the printer's control panel.

1. Using the EWS top navigation tabs, click **Scan/Digital Send** tab. The **Email and Scan to Network Folder Quick Setup Wizards** dialog opens.
2. In the left-navigation pane, click **Email and Scan to Network Folder Quick Setup Wizards**.
3. Click the **Save to Network Folder Quick Set Wizard** link.
4. On the **Add or Remove a Save to Network Folder Quick Set** dialog, click **Add**.

NOTE: Quick Sets are short-cut jobs that can be accessed on the printer Home screen or within the Quick Sets application.

NOTE: The Save to Network Folder feature can be minimally configured without creating a quick set. However, without the quick set, users must enter the destination folder information at the control panel for each scan job. A quick set is required to include Save to Network Folder metadata.

5. On the **Add Folder Quick Set** dialog, complete the following information:
 - a. In the **Quick Set Title** field, type a title.

 **NOTE:** Name the Quick Set something that users can understand quickly (e.g., "Scan and save to a folder").

- b. In the **Quick Set Description** field, type a description explaining what the Quick Set will save.
 - c. Click **Next**.
6. On the **Configure Destination Folder** dialog, complete the following information:
- a. In the **UNC Folder Path** field, type a folder path where the scan will go.

The folder path can either be the fully-qualified domain name (FQDN) (e.g., \servername.us.companyname.net\scans) or the IP address of the server (e.g., \\16.88.20.20\scans). Be sure that the folder path (e.g., \scans) follows the FQDN or IP address.

 **NOTE:** The FQDN can be more reliable than the IP address. If the server gets its IP address via DHCP, the IP address can change. However, the connection with an IP address might be faster because the printer does not need to use DNS to find the destination server.

- b. From the **Authentication Settings** drop-down, select one of the following options:
 - **Use credentials of user to connect after Sign In at the control panel**
 - **Always use these credentials**

 **NOTE:** If **Always use these credentials** is selected, a user name and password must be entered in the corresponding fields, and the printer's access to the folder must be verified by clicking **Verify Access**.

- c. In the **Windows Domain** field, type the Windows domain.

 **TIP:** To find the Windows domain in Windows 7, click **Start**, click **Control Panel**, click **System**.

To find the Windows domain in Windows 8, click **Search**, enter **System** in the search box, and then click **System**.

The domain is listed under **Computer name, domain, and workgroup settings**.

- d. Click **Next**.
7. On the **Configure File Scan Settings** dialog, set the default scanning preferences for the Quick Set, and then click **Next**.
8. Review the **Summary** dialog, and then click **Finish**.

Method two: Use Scan to Network Folder Setup

This option enables advanced configuration of the Save to Network Folder feature using the HP Embedded Web Server (EWS) for the printer.

 **NOTE:** Before you begin: To display the printer's IP address or host name, touch the Information  icon, and then touch the Network  icon on the printer's control panel.

Step one: Begin the configuration

1. Click the **Scan/Digital Send** tab.
2. On the left navigation menu, click the **Scan to Network Folder Setup** link.

Step two: Configure the Scan to Network Folder settings

1. On the **Scan to Network Folder Setup** page, select the **Enable Scan to Network Folder** check box. If this box is not selected, the feature is unavailable at the printer control panel.
2. In the Scan to Network Folder area of the left navigation pane, click **Quick Sets**. Click **Add** to open the **Quick Sets Setup** dialog.

 **NOTE:** Quick Sets are short-cut jobs that can be accessed on the printer Home screen or within the Quick Sets application.

 **NOTE:** The **Scan to Network Folder** feature can be minimally configured without creating a quick set. However, without the quick set, users must enter the destination folder information at the control panel for each scan job. A quick set is required to include Scan to Network Folder metadata.

Complete all of the settings in the Quick Set Setup to fully configure the Scan to Network Folder feature.

Dialog one: Set the Quick Set name, description, and options for user interaction at the control panel

Use the **Set the button location for the Quick Set and options for user interaction at the control panel** dialog to configure where the **Quick Set** button will display on the printer control panel and to configure the level of user interaction at the printer control panel.

1. In the **Quick Set Name** field, type a title.

 **NOTE:** Name the Quick Set something that users can understand quickly (e.g., "Scan and save to a folder").

2. In the **Quick Set Description** field, type a description explaining what the Quick Set will save.
3. From the **Quick Set Start Option** list, select one of the following options:

- Option one: **Enter application, then user presses Start**
- Option two: **Start instantly upon selection**

Select one of the following prompt options :

- **Prompt for original sides**
- **Prompt for additional pages**
- **Require Preview**

 **NOTE:** If **Start instantly upon selection** is selected, the destination folder must be entered in the next step.

4. Click **Next**.

Dialog two: Folder Settings

Use the **Folder Settings** dialog to configure the types of folders the printer sends scanned documents to.

There are two types of destination folders to select from:

- Shared folders or FTP folders
- Personal shared folders

There are two types of folder permissions to select from:

- Read and write access
- Write access only

The following information describes how to configure the folder settings.

Configure the destination folder for scanned documents

Option 1: Shared folders or FTP folders

To save scanned documents to a standard shared folder or an FTP folder, complete the following steps:

1. If it is not already selected, select **Save to shared folders or FTP folders**.
2. Click **Add...**. The **Add Network Folder Path** dialog opens.
3. On the **Add Network Folder Path** dialog, select one of the following options:
 - Option one: **Save to a standard shared network folder**

Information **General** **Copy/Print** **Scan/Digital Send** **Fax** **Troubleshooting** **Security** **HP Web Services** **Networking**

- Email Setup
 - Default Job Options
 - Quick Sets
- Scan to Network Folder
 - Default Job Options
 - Quick Sets
- Scan to USB Drive
- Contacts
- Email and Scan to Network Folder Quick Setup Wizards
- Digital Sending Software Setup

Quick Sets Setup

Add Network Folder Path

Save to a standard shared network folder

UNC Folder Path: **Custom Subfolder:**

(\path\path) Appends a custom subfolder at end of the folder path.

Restrict subfolder access to user

Folder Path Preview:

Some Custom Subfolder values will be updated only when the Quick Set is used.

Authentication Settings:

Windows Domain:

Save to an FTP Server
A Workstation or Server that has a File Transfer Protocol (FTP) service installed and configured.

NOTE: For more information about creating shared network folders see [Set up a shared folder](#) (c04431534).

1. If it is not already selected, select **Save to a standard shared network folder**.
2. In the **UNC Folder Path** field, type a folder path.

The folder path can either be the fully-qualified domain name (FQDN) (e.g., \servername.us.companyname.net\scans) or the IP address of the server (e.g., \16.88.20.20\scans). Be sure that the folder path (e.g., \scans) follows the FQDN or IP address.

NOTE: The FQDN can be more reliable than the IP address. If the server gets its IP address via DHCP, the IP address can change. However, the connection with an IP address might be faster because the printer does not need to use DNS to find the destination server.

3. To automatically create a subfolder for scanned documents in the destination folder, select a format for the subfolder name from the **Custom Subfolder** list.
 To restrict the subfolder access to the user who creates the scan job, select **Restrict subfolder access to user**.
4. To view the complete folder path for scanned documents, click **Update Preview**.
5. From the **Authentication Settings** list, select one of the following options:
 - **Use credentials of user to connect after Sign In at the control panel**
 - **Always use these credentials**

NOTE: If **Always use these credentials** is selected, a user name and password must be entered in the corresponding fields.

6. In the **Windows Domain** field, type the Windows domain.

 **NOTE:** To find the Windows domain in Windows 7, click **Start**, click **Control Panel**, click **System**.

To find the Windows domain in Windows 8, click **Search**, enter **System** in the search box, and then click **System**.

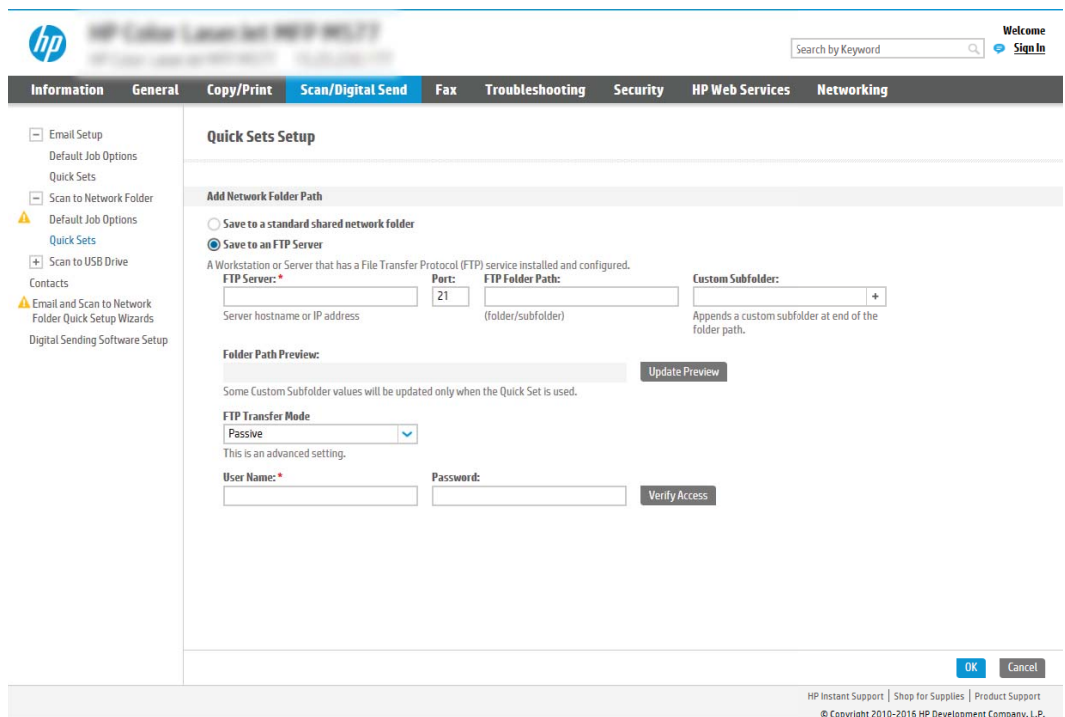

The domain is listed under **Computer name, domain, and workgroup settings**.

 **NOTE:** If a shared folder is set to be accessed by everyone, values for a workgroup name (default is "Workgroup"), a user name and password must be entered in the corresponding fields. However, if the folder is within a particular user's folders and not Public, the user name and password of that user must be used.

 **NOTE:** An IP address might be necessary instead of a computer name. Many home routers do not handle computer names well, and there is no Domain Name Server (DNS). In this case, it is best to set up a static IP address on the shared PC to alleviate the problem of DHCP assigning a new IP address. On a typical home router, this is done by setting a static IP address that is on the same subnet, but outside the DHCP address range.

7. Click **OK**.

- Option two: **Save to an FTP Server**

The screenshot shows the HP EWS 'Quick Sets Setup' interface. The 'Scan/Digital Send' tab is active. Under 'Add Network Folder Path', the 'Save to an FTP Server' option is selected. The form includes fields for 'FTP Server' (Server hostname or IP address), 'Port' (set to 21), 'FTP Folder Path' (folder/subfolder), and 'Custom Subfolder'. There is a 'Folder Path Preview' section with an 'Update Preview' button. The 'FTP Transfer Mode' is set to 'Passive'. There are also 'User Name' and 'Password' fields with a 'Verify Access' button. At the bottom right, there are 'OK' and 'Cancel' buttons. The footer contains support links and copyright information: 'HP Instant Support | Shop for Supplies | Product Support © Copyright 2010-2016 HP Development Company, L.P.'

 **NOTE:** If an FTP site is outside the firewall, a proxy server must be specified under the network settings. These settings are located in the **EWS Networking** tab, under the **Advanced** options.

1. Select **Save to an FTP Server**.
2. In the **FTP Server** field, type the FTP server name or IP address.
3. In the **Port** field, type the port number.

 **NOTE:** In most cases, the default port number does not need to be changed.

4. To automatically create a subfolder for scanned documents in the destination folder, select a format for the subfolder name from the **Custom Subfolder** list.
5. To view the complete folder path for scanned documents, click **Update Preview**.
6. From the **FTP Transfer Mode** list, select one of the following options:
 - **Passive**
 - **Active**
7. In the **Username** field, type the user name.
8. In the **Password field**, type the password.
9. Click **Verify Access** to confirm the destination can be accessed.
10. Click **OK**.

Option 2: Personal shared folders

To save scanned documents to a personal shared folder, complete the following steps:

 **NOTE:** This option is used in domain environments where the administrator configures a shared folder for each user. If the Save to a personal shared folder feature is configured, users will be required to sign in at the printer control panel using Windows credentials or LDAP authentication.

1. Select **Save to a personal shared folder**.
2. In the **Retrieve the device user's home folder using this attribute** field, type the user's home folder in the Microsoft Active Directory.

 **NOTE:** Verify that the user knows where this home folder is located on the network.

3. To add a user name subfolder at the end of the folder path, select **Create subfolder based on user name**.
To restrict the subfolder access to the user who creates the scan job, select **Restrict subfolder access to user**.

Select the destination folder permissions

Option 1: Read and write access

To send scanned documents to a folders configured for read and write access, complete the following steps:

 **NOTE:** **Send only to folders with read and write access** supports folder verification and job notification

1. If it is not already selected, select **Send only to folders with read and write access**.
2. To require the printer to verify folder access before starting a scan job, select **Verify folder access prior to job start**.

 **NOTE:** Scan jobs can complete more quickly if **Verify folder access prior to job start** is not selected; however, if the folder is unavailable, the scan job will fail.

3. Click **Next**.

Option 2: Write access only

To send scanned documents to a folder configured for write access only, complete the following steps:

 **NOTE:** **Allow sending to folders with write access only** does not support folder verification or job notification

 **NOTE:** If this option is selected, the printer cannot increment the scan filename. It sends the same filename for all scans.

Select a time-related filename prefix or suffix for the scan filename, so that each scan is saved as a unique file, and does not overwrite a previous file. This filename is determined by the information in the File Settings dialog in the Quick Set Wizard.

1. Select **Allow sending to folders with write access only**.
2. Click **Next**.

Dialog three: Notification settings

- ▲ On the **Notification Settings** dialog, complete one of the following tasks:

 **NOTE:** In order to send notification emails, the printer must be set up to use an SMTP server for sending email jobs. For more information about setting up the SMTP server for sending emails see [Set up Scan to Email](#) (c04017973).

- Option one: **Do not notify**
 1. Select **Do not notify**.
 2. To prompt the user to review their notification settings, select **Prompt user prior to job start**, and then click **Next**.
- Option two: **Notify when job completes**
 1. Select **Notify when job completes**.
 2. Select the method for delivering the notification from the **Method Used to Deliver Notification** list.

If the method of notification selected is **Email**, type the email address in the **Notification Email Address** field.
 3. To include a thumbnail of the first scanned page in the notification, select **Include Thumbnail**.
 4. To prompt the user to review their notification settings, select **Prompt user prior to job start**, and then click **Next**.
- Option three: **Notify only if job fails**
 1. Select **Notify only if job fails**.
 2. Select the method for delivering the notification from the **Method Used to Deliver Notification** list.

If the method of notification selected is **Email**, type the email address in the **Notification Email Address** field.
 3. To include a thumbnail of the first scanned page in the notification, select **Include Thumbnail**.
 4. To prompt the user to review their notification settings, select **Prompt user prior to job start**, and then click **Next**.

Dialog four: Scan Settings

On the **Scan Settings** dialog, set the default scanning preferences for the Quick Set, and then click **Next**.

Scan settings:

Feature	Description
Original Size	Select the page size of the original document.
Original Sides	Select whether the original document is single-sided or double-sided.
Optimize Text/Picture	Select to optimize for the output of a particular type of content.
Content Orientation	Select the way the content of the original document is placed on the page: Portrait or Landscape .
Background Cleanup	Select a value to remove faint images from the background or to remove a light background color.
Darkness	Select a value to adjust the darkness of the file.
Contrast	Select a value to adjust the contrast of the file.
Sharpness	Select a value to adjust the sharpness of the file.
Image Preview	Select whether to require or make optional a displayed preview of the job or to disable a preview.
Cropping Options	Select whether or not to allow a job to be cropped and the type of cropping option.
Erase Edges	Select this setting to specify the width of edge margins to be erased, in either inches or millimeters, for the front side and back side of a job.

Dialog five: File Settings

On the **File Settings** dialog, set the default file settings for the Quick Set, and then click **Next**.

File settings:

Feature	Description
File Name Prefix	Set the default file name prefix used for files saved to a network folder.
File Name	Default file name for the file to be saved. Select the User editable check box to make this setting editable at the printer control panel.
File Name Suffix	Set the default file name suffix used for files saved to a network folder.
File Name Preview	Enter a file name, and then click the Update Preview button.
File Numbering Format	Select a file name format for when the job is divided into multiple files.
Add numbering when job has just one file (ex. _1-1)	Select this setting to add numbering to a file name when the job is only one file instead of multiple files.
File Type	Select the file format for the saved file. Select the User editable check box to make this setting editable at the printer control panel.
High Compression (smaller file)	Select this setting to compress the scanned file, which reduces the file size. However, the scanning process for a High compression file might take longer than for a Normal compression file.
PDF encryption	If the file type is PDF, then this option encrypts the output PDF file. A password must be specified as part of the encryption. The same password must be used to open the file. The user will be prompted to enter a password prior to scanning their job if one has not been set prior to pressing start.

Feature	Description
Resolution	Set the resolution for the file. Higher resolution images have more dots per inch (dpi), so they show more detail. Lower resolution images have fewer dots per inch and show less detail, but the file size is smaller.
Quality and File Size	Select the quality for the file. Higher-quality images require a larger file size than lower-quality images, and they take more time to send.
Color/Black	Specify whether copies are to be printed in color, black and gray, or black only.
Suppress blank pages	If the Suppress blank pages option is enabled, blank pages will be ignored.
Meta Data File Format	Use the drop-down list to select the file format for meta-data information.
Create Multiple Files	Select this setting to scan pages into separate files based on a predetermined maximum number of pages per file.

Dialog six: Summary

On the **Summary** dialog, review the **Summary** dialog, and then click **Finish**.

Step three: Complete the configuration

1. In the left-navigation pane, click **Scan to Network Folder**.
2. On the **Scan to Network Folder** page, review the selected settings, and then click **Apply** to complete the setup.

Set up Scan to USB Drive

- [Introduction](#)
- [Step one: Access the HP Embedded Web Server](#)
- [Step two: Enable Scan to USB Drive](#)
- [Step three: Configure the Quick Sets \(optional\)](#)
- [Default scan settings for Scan to USB Drive setup](#)
- [Default file settings for Save to USB Setup](#)

Introduction

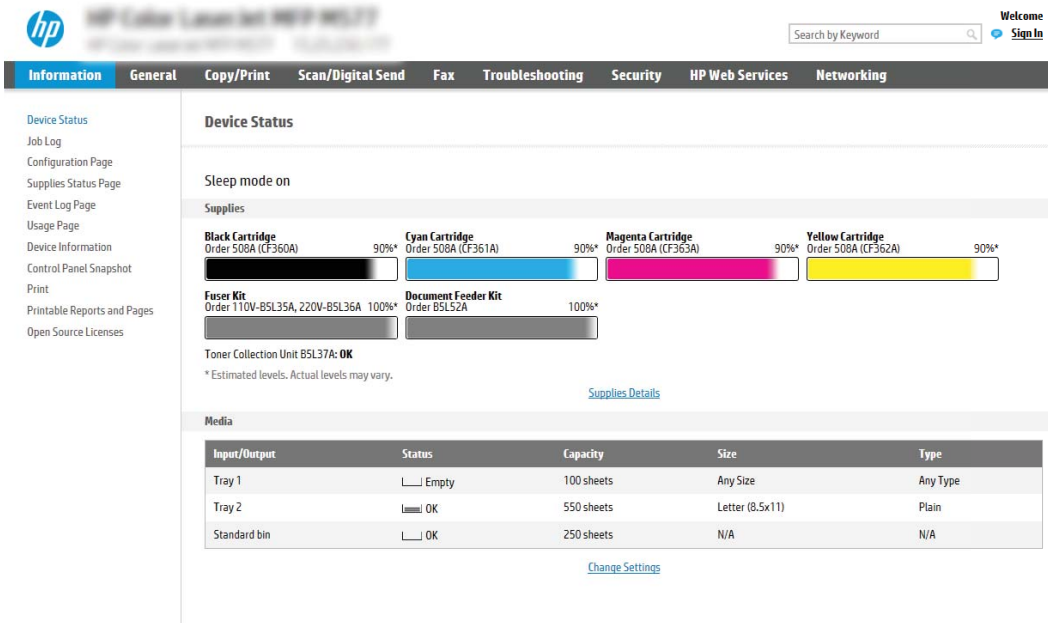

The printer has a feature that enables it to scan a document and save it to a USB flash drive. The feature is not available until it has been configured through the HP Embedded Web Server (EWS).

Step one: Access the HP Embedded Web Server

1. From the Home screen on the printer control panel, touch the Information  icon, and then touch the Network  icon to display the IP address or host name.
2. Open a web browser, and in the address line, type the IP address or host name exactly as it displays on the printer control panel. Press the **Enter** key on the computer keyboard. The EWS opens.

 <https://10.10.XXXXX/>

 **NOTE:** If the web browser displays a message indicating that accessing the website might not be safe, select the option to continue to the website. Accessing this website will not harm the computer.

The screenshot shows the HP Embedded Web Server (EWS) interface. At the top, there is a navigation bar with tabs for Information, General, Copy/Print, Scan/Digital Send, Fax, Troubleshooting, Security, HP Web Services, and Networking. The left sidebar contains a list of links: Device Status, Job Log, Configuration Page, Supplies Status Page, Event Log Page, Usage Page, Device Information, Control Panel Snapshot, Print, Printable Reports and Pages, and Open Source Licenses. The main content area is titled "Device Status" and includes the following sections:

- Sleep mode on**
- Supplies**: A section showing the status of various supplies with progress bars and labels:
 - Black Cartridge** (Order 508A (CF360A)): 90%*
 - Cyan Cartridge** (Order 508A (CF361A)): 90%*
 - Magenta Cartridge** (Order 508A (CF363A)): 90%*
 - Yellow Cartridge** (Order 508A (CF362A)): 90%*
 - Fuser Kit** (Order 110V-B5L35A, 220V-B5L36A): 100%*
 - Document Feeder Kit** (Order B5L52A): 100%*
- Toner Collection Unit B5L37A: OK**
- * Estimated levels. Actual levels may vary.
- [Supplies Details](#)
- Media**: A table showing the status of input/output trays and bins.

Input/Output	Status	Capacity	Size	Type
Tray 1	Empty	100 sheets	Any Size	Any Type
Tray 2	OK	550 sheets	Letter (8.5x11)	Plain
Standard bin	OK	250 sheets	N/A	N/A

[Change Settings](#)

Step two: Enable Scan to USB Drive

1. Select the **Security** tab.
2. Scroll to **Hardware Ports** and make sure that **Enable Host USB plug and play** is enabled.
3. Select the **Copy/Print** tab for MFP models or the **Print** tab for SFP models.
4. Select the **Enable Save to USB** check box.
5. Click **Apply** at the bottom of the page.

 **NOTE:** Most devices ship with Hard disk drives (HDDs) already installed. In some cases, additional storage devices can be added via USB. Verify whether the Save to USB feature needs to be expanded to USB and Hard drive

Step three: Configure the Quick Sets (optional)

 **NOTE:** Quick Sets are short-cut jobs that can be accessed on the printer Home screen or within the Quick Sets application.

1. In the **Scan to USB Drive** area of the left navigation pane, click **Quick Sets**.
2. Select one of the following options:
 - Select an existing Quick Set under Quick Sets Application in the table.
 - OR-
 - Click **Add** to start the Quick Set Wizard.
3. If you selected **Add**, the **Quick Sets Setup** page opens. Complete the following information:
 - **Quick Set Name:** Enter a title for the new Quick Set.
 - **Quick Set Description:** Enter a description of the Quick Set.
 - **Quick Set Start Option:** To set how the Quick Set starts, click either **Enter application, then user presses Start** or **Start instantly when selected from the Home Screen**.
4. Select a default location where scanned files are saved on USB storage devices inserted into the USB port on the control panel, and then click **Next**. The default location options are:
 - **Save at root directory of the USB storage device**
 - **Create or place in this folder on the USB Storage Device** — The path to the folder on the USB storage device must be specified when using this file location option. A backslash \ must be used to separate folder\subfolder names in the path.
5. Select an option from the **Condition on Which to Notify:** drop-down list, and then click **Next**.

This setting determines if, or how, users are notified when a Save To USB Quick Set job completes or fails. The options for the **Condition on Which to Notify:** setting are:

 - **Do not notify**
 - **Notify when job completes**
 - **Notify only if job fails**

6. Choose the **Scan Settings** for the Quick Set, and then click **Next**.

 **NOTE:** For more information on the available scan settings, see [Default scan settings for Scan to USB Drive setup on page 94](#)

7. Choose the **File Settings** for the Quick Set, and then click **Next**.

 **NOTE:** For more information on the available file settings, see [Default scan settings for Scan to USB Drive setup on page 94](#)

8. Review the summary of settings, and then click **Finish** to save the Quick Set, or click **Previous** to edit the settings.

Default scan settings for Scan to USB Drive setup

Table 6-1 Scan settings for Scan to USB Drive Setup:

Feature	Description
Original Size	Select the page size of the original document.
Original Sides	Select whether the original document is single-sided or double-sided.
Optimize Text/Picture	Select to optimize for the output of a particular type of content.
Content Orientation	Select the way the content of the original document is placed on the page: Portrait or Landscape .
Background Cleanup	Select a value to remove faint images from the background or to remove a light background color.
Darkness	Select a value to adjust the darkness of the file.
Contrast	Select a value to adjust the contrast of the file.
Sharpness	Select a value to adjust the sharpness of the file.
Image Preview	Select whether to require or make optional a displayed preview of the job or to disable a preview.
Cropping Options	Select whether or not to allow a job to be cropped and the type of cropping option.
Erase Edges	Select this setting to specify the width of edge margins to be erased, in either inches or millimeters, for the front side and back side of a job.

Default file settings for Save to USB Setup

Table 6-2 File settings for Save to USB Setup:

Option name	Description
File Name Prefix	Set the default file name prefix used for files saved to a network folder.
File Name	Default file name for the file to be saved. Select the User editable check box to make this setting editable at the printer control panel.
File Name Suffix	Set the default file name suffix used for files saved to a network folder. Duplicate filename suffix default [filename]_YYYYMMDDT

Table 6-2 File settings for Save to USB Setup: (continued)

Option name	Description
File Name Preview	Enter a file name, and then click the Update Preview button.
File Numbering Format	Select a file name format for when the job is divided into multiple files.
Add numbering when job has just one file (ex. _1-1)	Select this setting to add numbering to a file name when the job is only one file instead of multiple files.
File Type	Select the file format for the saved file. Select the User editable check box to make this setting editable at the printer control panel.
High Compression (smaller file)	Select this setting to compress the scanned file, which reduces the file size. However, the scanning process for a High compression file might take longer than for a Normal compression file.
PDF encryption	If the file type is PDF, then this option encrypts the output PDF file. A password must be specified as part of the encryption. The same password must be used to open the file. The user will be prompted to enter a password prior to scanning their job if one has not been set prior to pressing start.
Resolution	Set the resolution for the file. Higher resolution images have more dots per inch (dpi), so they show more detail. Lower resolution images have fewer dots per inch and show less detail, but the file size is smaller.
Quality and File Size	Select the quality for the file. Higher-quality images require a larger file size than lower-quality images, and they take more time to send.
Color/Black	Specify whether copies are to be printed in color, black and gray, or black only.
Suppress blank pages	If the Suppress blank pages option is enabled, blank pages will be ignored.
Create Multiple Files	Select this setting to scan pages into separate files based on a predetermined maximum number of pages per file.

Set up Save to SharePoint® (Flow models only)

- [Introduction](#)
- [Before you begin](#)
- [Step one: Access the HP Embedded Web Server \(EWS\)](#)
- [Step two: Enable Save to SharePoint® and create a Save to SharePoint Quick Set](#)
- [Scan and save a file directly to a Microsoft® SharePoint site](#)
- [Quick set scan settings and options for Save to SharePoint®](#)

Introduction

Use Save the SharePoint® to scan documents directly to a Microsoft® SharePoint site. This feature eliminates the need to scan the documents to a network folder, USB flash drive, or email message, and then manually upload the files to the SharePoint site.

Save to SharePoint® supports all scanning options, including the ability to scan documents as images or use the OCR features to create text files or searchable PDFs.

The feature is disabled by default. Enable Save to SharePoint® in the HP Embedded Web Server (EWS).

NOTE: The Save to Sharepoint® feature is only available on workflow-equipped printers.

Before you begin

Before this procedure can be completed, the destination folder that the scanned files will be saved to must exist on the SharePoint site, and write access must be enabled to the destination folder. Save to SharePoint® is disabled by default.

Step one: Access the HP Embedded Web Server (EWS)

1. From the Home screen on the printer control panel, touch the Information  icon, and then touch the Network  icon to display the IP address or host name.
2. Open a web browser, and in the address line, type the IP address or host name exactly as it displays on the printer control panel. Press the **Enter** key on the computer keyboard. The EWS opens.

A screenshot of a web browser's address bar showing the URL "https://10.10.XXXX/". The address bar has a blue border and a small icon on the left.

NOTE: If the web browser displays a message indicating that accessing the website might not be safe, select the option to continue to the website. Accessing this website will not harm the computer.

The screenshot shows the HP Web Services interface for a printer. The top navigation bar includes tabs for Information, General, Copy/Print, Scan/Digital Send, Fax, Troubleshooting, Security, HP Web Services, and Networking. The left sidebar lists various pages like Device Status, Job Log, Configuration Page, etc. The main content area is titled 'Device Status' and includes sections for Sleep mode on, Supplies, and Media. The Supplies section shows levels for Black, Cyan, Magenta, and Yellow cartridges, as well as Fuser Kit and Document Feeder Kit. The Media section contains a table with columns for Input/Output, Status, Capacity, Size, and Type.

Input/Output	Status	Capacity	Size	Type
Tray 1	Empty	100 sheets	Any Size	Any Type
Tray 2	OK	550 sheets	Letter (8.5x11)	Plain
Standard bin	OK	250 sheets	N/A	N/A

Step two: Enable Save to SharePoint® and create a Save to SharePoint Quick Set

Follow these steps to enable the feature **Save to SharePoint** feature and create a Save to SharePoint Quick Set:

1. Using the top navigation tabs, click **Scan/Digital Send**.
2. In the left navigation pane, click **Save to SharePoint®**.

 **NOTE:** Quick Sets are short-cut jobs that can be accessed on the printer Home screen or within the **Quick Sets** application.

3. Select **Enable Save to SharePoint®**, and then click **Apply**.
4. In the **Save to SharePoint®** area of the left navigation pane, click **Quick Sets**. Click **Add** to launch the Quick Set Wizard.
5. Enter a **Quick Set Name** (for example, “Scan to Sharepoint”) and a **Quick Set Description**.
6. Select a **Quick Set Start Option** to determine what occurs after selecting a Quick Set on the printer control panel, and then click the **Next** button.
7. Use the following steps to add the path to the SharePoint folder.
 - a. Click **Add** on the **SharePoint® Destination Settings** page to open the **Add SharePoint® Path** page.
 - b. Open another browser window, navigate to the SharePoint folder to use, and then copy the folder path for the SharePoint folder from that browser window.
 - c. Paste the SharePoint folder path into the **SharePoint® Path:** field.
 - d. By default, the printer overwrites an existing file that has the same file name as the new file. Clear **Overwrite existing files** so that a new file with the same name as an existing file is given an updated time/date stamp.
 - e. Select an option from the **Authentication Settings** drop-down menu. Select whether it is necessary to sign in to the SharePoint site with credentials, or store the credentials within the Quick Set.

 **NOTE:** Use credentials of user to connect after Sign In at the control panel is selected in the **Authentication Settings** drop-down menu, the logged-in user must have permissions to write to the specified SharePoint site.

 **NOTE:** For security purposes, the printer does not display credentials entered in the Quick Set Wizard.

- f. Click **OK** to complete the SharePoint path setup and navigate back to the **SharePoint Destination Settings** page.
8. Select **Verify folder access prior to job start** to ensure that the SharePoint folder specified as the destination folder is accessible each time the Quick Set is used. If this option is not selected, jobs can be saved to the SharePoint folder more quickly. However, if this option is not selected *and* the SharePoint folder is inaccessible the job will fail.
9. Click **Next**.
10. Set a **Condition on Which to Notify**: on the **Notification Settings** page. This setting configures the Quick Set to either not notify, or to send email messages or print a summary page if a job either completes successfully or fails. Select one of the following options from the **Condition on Which to Notify**: drop-down menu:
 - Select **Do not notify** for the Quick Set to not perform any notification action when a job completes successfully or fails.
 - Select **Notify when job completes** to for the Quick Set to send a notification when a job completes successfully.
 - Select **Notify only if job fails** to for the Quick Set to send a notification only when a job fails.

Selecting either **Notify when job completes** or **Notify only if job fails** requires the **Method Used to Deliver Notification**: to be set. Select from the following options:

- **Email**: Use this option to send an email when the selected notification condition occurs. This option requires a valid email address in the **Notification Email Address**: field.

 **NOTE:** To use the email notification feature, first configure the email feature on the printer.

- **Print**: Use this option to print the notification when the selected notification condition occurs.

 **NOTE:** Select **Include Thumbnail** for either notification option to include a thumbnail image of the first page of the scanned page of the job.

11. Click **Next**.
12. Select options from the **Scan Settings** page, and then click **Next**. For more information, see [Table 6-3 Scan settings for Save to SharePoint® on page 100](#).
13. Select options from the **File Settings** page, and then click **Next**. For more information, see [Table 6-4 File settings for Save to SharePoint on page 100](#).
14. Review the summary of settings, and then click the **Finish** button to save the Quick Set, or click the **Previous** button to edit the settings.

Scan and save a file directly to a Microsoft® SharePoint site

1. Place the document face-down on the scanner glass, or place it face-up in the document feeder and adjust the paper guides to fit the size of the document.
2. From the Home screen on the printer control panel, select **Scan**, and then select **Scan to SharePoint®**.

 **NOTE:** It might be necessary to sign in to the printer to use this feature.

3. To select a Quick Set, in the **Quick Sets and Defaults** area touch **Load**. Select a Quick Set, and then touch **Load**.
4. Touch the **File Name:** text field to open a keyboard, and then type the name for the file using either the on-screen keyboard or the physical keyboard. Touch Enter .
5. Touch **Options** to view and configure settings for the document.
6. Touch the right pane of the screen to preview the document. In the preview screen, use the buttons on the right of the screen to adjust the preview options and to rearrange, rotate, insert, or remove pages.

Use these buttons to toggle between single-page view and thumbnail view. More options are available in thumbnail view than in single-page view.

Use these buttons to zoom in or out on the selected page.

NOTE: Select only one page at a time to use these buttons.

Use this button to rotate the page 180 degrees.

NOTE: This button is available only in the thumbnail view.

Use this button to delete the selected pages.

NOTE: This button is available only in the thumbnail view.

Use these buttons to rearrange the pages within the document. Select one or more pages and move them to the left or right.

NOTE: These buttons are available only in the thumbnail view.

Use this button to add a page to the document. The printer prompts to scan additional pages.

Use this button to clear the changes made in the preview and start over.

Touch this button to collapse the preview screen and return to the Copy screen.

7. Touch the Start  button to save the file.

Quick set scan settings and options for Save to SharePoint®

The following tables list the settings and options available in the Quick Set Wizard when adding, editing, or copying a Save to SharePoint® Quick Set.

Table 6-3 Scan settings for Save to SharePoint®

Feature	Description
Original Size	Select the page size of the original document.
Original Sides	Select whether the original document is single-sided or double-sided.
Optimize Text/Picture	Select to optimize for the output of a particular type of content.
Content Orientation	Select the way the content of the original document is placed on the page: Portrait or Landscape .
Background Cleanup	Select a value to remove faint images from the background or to remove a light background color.
Darkness	Select a value to adjust the darkness of the file.
Contrast	Select a value to adjust the contrast of the file.
Sharpness	Select a value to adjust the sharpness of the file.
Image Preview	Select whether to require or make optional a displayed preview of the job or to disable a preview.
Cropping Options	Select whether or not to allow a job to be cropped and the type of cropping option.
Erase Edges	Select this setting to specify the width of edge margins to be erased, in either inches or millimeters, for the front side and back side of a job.

Table 6-4 File settings for Save to SharePoint

Feature	Description
File Name Prefix	Set the default file name prefix used for files saved to a network folder.
File Name	Default file name for the file to be saved. Select the User editable check box to make this setting editable at the printer control panel.
File Name Suffix	Set the default file name suffix used for files saved to a network folder. Duplicate filename suffix default [filename]_YYYYMMDDT

Table 6-4 File settings for Save to SharePoint (continued)

Feature	Description
File Name Preview	Enter a file name, and then click the Update Preview button.
File Numbering Format	Select a file name format for when the job is divided into multiple files.
Add numbering when job has just one file (ex. _1-1)	Select this setting to add numbering to a file name when the job is only one file instead of multiple files.
File Type	Select the file format for the saved file. Select the User editable check box to make this setting editable at the printer control panel.
High Compression (smaller file)	Select this setting to compress the scanned file, which reduces the file size. However, the scanning process for a High compression file might take longer than for a Normal compression file.
PDF encryption	If the file type is PDF, then this option encrypts the output PDF file. A password must be specified as part of the encryption. The same password must be used to open the file. The user will be prompted to enter a password prior to scanning their job if one has not been set prior to pressing start.
Resolution	Set the resolution for the file. Higher resolution images have more dots per inch (dpi), so they show more detail. Lower resolution images have fewer dots per inch and show less detail, but the file size is smaller.
Quality and File Size	Select the quality for the file. Higher-quality images require a larger file size than lower-quality images, and they take more time to send.
Color/Black	Specify whether copies are to be printed in color, black and gray, or black only
Suppress blank pages	If the Suppress blank pages option is enabled, blank pages will be ignored.
Create Multiple Files	Select this setting to scan pages into separate files based on a predetermined maximum number of pages per file.

Create a Quick Set

- [Introduction](#)
- [Step one: Access the HP Embedded Web Server \(EWS\)](#)
- [Step two: Add and manage Quick Sets](#)

Introduction

Quick Sets are short-cut jobs that are available from the Home screen or within the [Quick Sets](#) feature on the printer control panel and do not impact the defaults set for the base application. To use a Quick Set on the printer control panel, enable the base application.

Create Quick Sets for the following base applications to improve job accuracy and decrease the time to complete a job:

- **Email** — Use email Quick Sets to configure and save commonly used settings for sending jobs from the printer via email as email attachments.
- **Fax** — Use fax Quick Sets to configure and save commonly used settings for fax jobs.
- **Save to Network Folder** — Use Save to Network Folder Quick Sets to configure and save commonly used settings for saving jobs to a network folder.
- **Save to USB** — Use Save to USB Quick Sets to configure and save commonly used settings for saving jobs to a USB device.
- **Copy** (MFPs only) — Use Copy Quick Sets to configure and save commonly used settings for copy jobs.
- **Save to SharePoint®** (Flow models only) — Use Save to SharePoint Quick Sets to configure and save commonly used settings for saving jobs to a SharePoint site.

Select from various job options, such as starting a job immediately upon selection of a quick set or requiring an image preview before starting a job.

Step one: Access the HP Embedded Web Server (EWS)

1. From the Home screen on the printer control panel, touch the Information  icon, and then touch the Network  icon to display the IP address or host name.
2. Open a web browser, and in the address line, type the IP address or host name exactly as it displays on the printer control panel. Press the [Enter](#) key on the computer keyboard. The EWS opens.

 **NOTE:** If the web browser displays a message indicating that accessing the website might not be safe, select the option to continue to the website. Accessing this website will not harm the computer.

[Change Settings](#)

Step two: Add and manage Quick Sets

Add a Quick Set

Use the following steps to add a new Quick Set.

1. Using the top navigation tabs, click **General**.
2. In the left navigation pane, click **Quick Sets**.
3. Click **Add**. The **Quick Sets Setup** page opens.

 **NOTE:** Click **Cancel** on any page of **Quick Sets Setup** to cancel the current changes, exit **Quick Sets Setup**, and return to the **Quick Sets** page.

4. Select a **Quick Set Type**, and then click **Next**. The following Quick Set types are available for selection, depending on your printer:

 **NOTE:** A **Quick Set Type** only needs to be determined when a quick set is created by using the **General** EWS tab.

- Scan to Email
- Scan to Fax
- Scan to Network Folder
- Scan to USB Drive
- Copy (MFPs only)
- Save to SharePoint® (workflow printers only)

5. Enter a title for the Quick Set in the **Quick Set Name** (required) field.
6. Enter a description of the Quick Set in the **Quick Set Description** field.

7. Select a **Quick Set Start Option** to determine what occurs after selecting a Quick Set on the printer control panel, and then click **Next**.
 8. Select settings and complete tasks in **Quick Sets Setup**. Click **Next** to proceed to the next page of available options until reaching the **Summary** page.
-
-  **NOTE:** The settings available in **Quick Sets Setup** vary by the type of Quick Set being added. Refer to the tables in [Quick Set settings and options on page 105](#) to see the available settings and options for each type of Quick Set.
-
9. Review the summary of settings, and then click **Finish** to save the Quick Set, or click **Previous** to edit the settings.

Edit a Quick Set

Use the following steps to edit the settings of an existing Quick Set.

1. Using the top navigation tabs, click **General**.
2. In the left navigation pane, click **Quick Sets**.
3. In the **Quick Sets List** area, click the check box next to the appropriate Quick Set, and then click **Edit**. The **Quick Sets Setup** page opens.

 **NOTE:** Click **Cancel** on any page of **Quick Sets Setup** to cancel the current changes, exit **Quick Sets Setup**, and return to the **Quick Sets** page.

4. If necessary, modify the following settings, and then click **Next**:
 - **Quick Set Name**
 - **Quick Set Description**
 - **Quick Set Start Option**
5. Select settings and complete tasks in **Quick Sets Setup**. Click **Next** to proceed to the next page of available options until reaching the **Summary** page.

 **NOTE:** The settings available in **Quick Sets Setup** vary by the type of Quick Set being edited. Refer to the tables in [Quick Set settings and options on page 105](#) to see the available settings and options for each type of Quick Set.

6. Review the **Summary** page, and then click **Finish** to save changes made to the Quick Set.

Copy a Quick Set

1. Using the top navigation tabs, click **General**.
2. In the left navigation pane, click **Quick Sets**.
3. In the **Quick Sets List** area, click the check box next to the appropriate Quick Set, and then click **Copy**. The **Quick Sets Setup** page opens.

 **NOTE:** Click **Cancel** on any page of **Quick Sets Setup** to cancel the current changes, exit **Quick Sets Setup**, and return to the **Quick Sets** page.

4. If necessary, modify the following settings, and then click **Next**:

- Quick Set Name
 - Quick Set Description
 - Quick Set Start Option
5. Select settings and complete tasks in **Quick Sets Setup**. Click **Next** to proceed to the next page of available options until reaching the **Summary** page.

NOTE: The settings available in **Quick Sets Setup** vary by the type of Quick Set being copied. Refer to the tables in [Quick Set settings and options on page 105](#) to see the available settings and options for each type of Quick Set.

6. Review the **Summary** page, and then click **Finish** to save the Quick Set.

Remove a Quick Set

Use the following steps to remove a Quick Set.

1. Using the top navigation tabs, click **General**.
2. In the left navigation pane, click **Quick Sets**.
3. In the **Quick Sets List** area, click the check box next to the appropriate Quick Set, and then click **Remove...**
4. When the **Confirmation Page** opens, click **Remove** to finish removing the Quick Set.

Quick Set settings and options

The following tables list the settings and options available in the Quick Set Wizard when adding, editing, or copying a Quick Set.

Table 6-5 Address and Message Field Control — Scan to Email Quick Sets

Option	Description
Address Field Restrictions	Use the Address Field Restrictions drop-down list to specify whether users can type an email address or select an email address from an address book
From:	Use the From: drop-down list to set the email address that displays in the From: field of the email. If Default From: is selected, the email address listed in the Default From: field is used. If User's address (sign-in required) is selected, the user is required to sign in to the printer with their email address when using the Quick Set. This field can be set to be user-editable.
Default From:	The Default From: field is used to define the email address used when Default From: is selected in the From: drop-down list.
Default Display Name:	Use this field to set the name displayed on the printer's control panel. If this field is not set, the value in the Default From: displays on the printer's control panel. This field is optional.

Table 6-5 Address and Message Field Control — Scan to Email Quick Sets (continued)

Option	Description
To:	Use these drop-down lists to set the email recipient, CC (carbon copy) and BCC (blind carbon copy) values.
CC:	The options for each of these fields are:
BCC:	
	<ul style="list-style-type: none"> • User's address (sign-in required) • Blank • Specify address
	These fields can be set to be user-editable
Subject:	Use this field to set the value that appears in the subject line of the email.
	This field can be set to be user-editable.
Message:	Use this field to set the value for the body of the email.
	This field can be set to be user-editable.

Table 6-6 Signing and Encryption — Scan to Email Quick Sets

Option	Description
Signing	Use the Signing drop-down list to specify whether the email sent using the Quick Set is digitally signed.
	This field can be set to be user-editable.
Hashing Algorithm	Use the Hashing Algorithm drop-down list to set the type hashing algorithm used with signed emails. The following hashing algorithms are available:
	<ul style="list-style-type: none"> • SHA-1 • SHA-256 (recommended) • SHA-384 • SHA-512
Encryption	Use the Encryption drop-down list to specify whether the email sent using the Quick Set is encrypted.
	This field can be set to be user-editable.
Encryption Algorithm	Use the Encryption Algorithm drop-down list to set the encryption algorithm used for encrypted emails sent using the Quick Set.
Attribute for Recipient Public Key	The Attribute for Recipient Public Key field is used to set the attribute used for retrieving the email recipient's public key from LDAP for signed or encrypted emails.
Use the recipient public key certificate to verify the recipient	Select this setting to use the recipient's public key certificate to verify the recipient.

Table 6-7 Scan settings — Scan to Email, Scan to Fax, Scan to Network Folder, Scan to SharePoint®, and Scan to USB Quick Sets

Option	Description
Original Size	Specify the size for the original document.

Table 6-7 Scan settings — Scan to Email, Scan to Fax, Scan to Network Folder, Scan to SharePoint®, and Scan to USB Quick Sets (continued)

Option	Description
Original Sides	Select whether the original document is single-sided or double-sided.
Optimize Text/Picture	<p>Optimize the job for the type of image being scanned: text, graphics, or photos.</p> <p>Select from the following options:</p> <ul style="list-style-type: none"> • Text: Use for documents that contain mostly text • Mixed: Use for documents with a mix of text and pictures • Printed picture: Use for line drawings and preprinted images, such as magazine clippings or pages from books <p>NOTE: If bands of irregular intensity print on the copies, try selecting Printed picture to improve the quality.</p> <ul style="list-style-type: none"> • Photograph: Use for photographic prints
Content Orientation	<p>Select the way the content of the original document is placed on the page:</p> <ul style="list-style-type: none"> • Portrait: The short edge of the page is along the top. • Landscape: The long edge of the page is along the top.
Background Cleanup	Select a value to remove faint images from the background or to remove a light background color.
Darkness	Select a value to adjust the darkness of the file.
Contrast	Select a value to adjust the contrast of the file.
Sharpness	Select a value to adjust the sharpness of the file.
Image Preview	Select whether to require or make optional a displayed preview of the job or to disable a preview.
Cropping options (not available for Scan to Fax)	Select whether or not to allow a job to be cropped and the type of cropping option.
Erase Edges (not available for Scan to Fax)	Select this setting to specify the width of edge margins to be erased, in either inches or millimeters, for the front side and back side of a job.
Resolution (Scan to Fax only)	Set the resolution for the file. Higher resolution images have more dots per inch (dpi), so they show more detail. Lower resolution images have fewer dots per inch and show less detail, but the file size is smaller.
Suppress blank pages (Scan to Fax only)	If the Suppress blank pages option is enabled, blank pages will be ignored.

Table 6-8 File settings — Scan to Email, Scan to Network Folder, Scan to SharePoint®, and Scan to USB Quick Sets

Feature	Description
File Name Prefix	Set the default file name prefix used for files saved to a network folder.
File Name	<p>Default file name for the file to be saved.</p> <p>Select the User editable check box to make this setting editable at the printer control panel.</p>
File Name Suffix	<p>Set the default file name suffix used for files saved to a network folder.</p> <p>Duplicate filename suffix default [filename]_YYYYMMDDT</p>

Table 6-8 File settings — Scan to Email, Scan to Network Folder, Scan to SharePoint®, and Scan to USB Quick Sets (continued)

Feature	Description
File Name Preview	Enter a file name, and then click the Update Preview button.
File Numbering Format	Select a file name format for when the job is divided into multiple files.
Add numbering when job has just one file (ex. _1-1)	Select this setting to add numbering to a file name when the job is only one file instead of multiple files.
File Type	Select the file format for the saved file. Select the User editable check box to make this setting editable at the printer control panel.
High Compression (smaller file)	Select this setting to compress the scanned file, which reduces the file size. However, the scanning process for a High compression file might take longer than for a Normal compression file.
PDF encryption	If the file type is PDF, then this option encrypts the output PDF file. A password must be specified as part of the encryption. The same password must be used to open the file. The user will be prompted to enter a password prior to scanning their job if one has not been set prior to pressing start.
Resolution	Set the resolution for the file. Higher resolution images have more dots per inch (dpi), so they show more detail. Lower resolution images have fewer dots per inch and show less detail, but the file size is smaller.
Quality and File Size	Select the quality for the file. Higher-quality images require a larger file size than lower-quality images, and they take more time to send.
Color/Black	Specify whether copies are to be printed in color, black and gray, or black only.
Suppress blank pages	If the Suppress blank pages option is enabled, blank pages will be ignored.
Meta Data File Format (Scan to Network Folder Quick Sets only)	Use the drop-down list to select the file format for meta-data information. The options for this field are: <ul style="list-style-type: none"> • None • XML • HPS
Create Multiple Files	Select this setting to scan pages into separate files based on a predetermined maximum number of pages per file.

Table 6-9 Copy settings — Copy Quick Sets

Option	Description
Copies	Set the default number of copies.
Sides	Select a Sides option: <ul style="list-style-type: none"> • Original Sides <ul style="list-style-type: none"> – 1-sided – 2-sided • Output Sides <ul style="list-style-type: none"> – 1-sided – 2-sided

Table 6-9 Copy settings — Copy Quick Sets (continued)

Option	Description
Color/Black	<p>Specify whether copies are printed in color or in black and white:</p> <ul style="list-style-type: none"> • Automatically detect: Prints color documents in color (for printers that support color copying), and black and white documents in black and white. For mixed documents, the printer will determine whether to print in color or black and white. • Color: Prints documents in color (for printers that support color copying). • Black: Prints documents in black and white.
Reduce/Enlarge	<p>Use the Reduce/Enlarge feature to scale the size of the document up or down.</p> <p>Select a Reduce/Enlarge option:</p> <ul style="list-style-type: none"> • Automatic: The printer automatically scales the image to fit the paper size in the tray. • Manual: To reduce the image, type a scaling percentage that is less than 100. To enlarge the image, type a scaling percentage that is greater than 100.
Original Size	Specify the size for the original document.
Paper Selection	Select the paper size and type and which tray to use for the copies.
Booklet	Enable or disable Booklet Format, and select whether to Borders on each page .
Collate	<p>For printers that support print-job finishing, each set of copied pages are assembled in the same order as the original document.</p> <p>NOTE: If the printer has a stapler installed, select a staple option. To not staple the copies, select None.</p> <p>Select a Collate option:</p> <ul style="list-style-type: none"> • Collate on: If making more than one copy, select to assemble pages in the correct order for each set of copies. • Collate off: Select to group the same pages together. For example, if making five copies of an original document that has two pages, all five first pages are grouped together and all five second pages are grouped together.
Content Orientation	<p>Select the way the content of the original document is placed on the page:</p> <ul style="list-style-type: none"> • Portrait: The short edge of the page is along the top. • Landscape: The long edge of the page is along the top.
Pages per Sheet	<p>Select how many pages to print on one sheet and the page order: to copy to one, two, or four Pages per Sheet and select whether to Add page borders.</p> <p>Pages per Sheet</p> <ul style="list-style-type: none"> • One • Two • Four <p>Page Order</p> <ul style="list-style-type: none"> • Right, then down: Prints the pages in rows • Down, then right: Prints the pages in columns <p>Click the Add page borders check box to add borders on the pages.</p>

Table 6-9 Copy settings — Copy Quick Sets (continued)

Option	Description
Image Adjustment	<p>Use the settings to improve the overall quality of the copy. For example, adjust the Darkness and Sharpness, and use the Background Cleanup setting to remove faint images from the background or to remove a light background color.</p> <ul style="list-style-type: none"> • Darkness: Adjust to increase or decrease the amount of white and black in the colors • Contrast: Adjust to increase or decrease the difference between the lightest and darkest color on the page • Background Cleanup: Adjust if you are having trouble copying a faint image • Sharpness: Adjust to sharpen or soften the image. For example, increasing the sharpness could make text look clearer, but decreasing it could make photographs look smoother.
Optimize Text/Picture	<p>Optimize the job for the type of image being scanned: text, graphics, or photos.</p> <p>Select from the following options:</p> <ul style="list-style-type: none"> • Text: Use for documents that contain mostly text • Mixed: Use for documents with a mix of text and pictures • Printed picture: Use for line drawings and preprinted images, such as magazine clippings or pages from books <p>NOTE: If bands of irregular intensity print on the copies, try selecting Printed picture to improve the quality.</p> <ul style="list-style-type: none"> • Photograph: Use for photographic prints
Edge-to-Edge	<p>Use to avoid shadows that can display along the edges of copies when the original document is printed close to the edges.</p> <p>Combine this feature with the Reduce/Enlarge feature to ensure that the entire page is printed on the copies.</p> <p>When the Edge-to-Edge feature is turned on, the printer minimizes margins and prints as close to the edge of the paper as possible.</p>
Scan Mode	<p>Select the type of document to scan:</p> <ul style="list-style-type: none"> • Standard Document: Scan a page or stack of pages through the document feeder, or individually on the flatbed glass. • 2-sided ID: Scan each side of an identification card on the flatbed glass and output them onto one page. After scanning the first side, the printer prompts to place the second side in the correct position on the glass. • Book Mode: Scan an open book and output each page of the book onto different pages.
Erase Edges	<p>Select this setting to specify the width of edge margins to be erased, in either inches or millimeters, for the front side and back side of a job.</p>
Image Preview	<p>Select whether to require or make optional a displayed preview of the job or to disable a preview.</p>

Send a scanned document to one or more email addresses

Introduction

The printer has a feature that enables it to scan a document and send it to one or more email addresses. Before using this feature, use the HP Embedded Web Server to enable it and set it up.

Scan and send a document to email

1. Place the document face-down on the scanner glass, or place it face-up in the document feeder and adjust the paper guides to fit the size of the document.
2. From the Home screen on the printer control panel, select [Scan](#), and then select [Scan to Email](#).

 **NOTE:** If prompted, type your user name and password.

3. Touch the [To](#) field to open a keyboard.

 **NOTE:** If you are signed in to the printer, your user name or other default information might appear in the [From](#) field. If so, you might not be able to change it.

4. Specify the recipients by using one of these methods:

Enter addresses manually

- ▲ Enter the address in the [To](#) field. To send to multiple addresses, separate the addresses with a semicolon, or touch the Enter  button on the touchscreen keyboard after typing each address.

Enter addresses from the Contacts list

- a. Touch the Contacts  button that is next to the [To](#) field to open the [Contacts](#) screen.
 - b. From the drop-down list, select the appropriate contact list.
 - c. Select a name from the list of contacts to add the name to the recipients list. Repeat this step for each recipient, and then touch the [Done](#) button.
5. Complete the [Subject](#), and [File Name](#) fields by touching the field and using the touchscreen keyboard to enter information. Touch the [Done](#) button when you have completed the fields.
 6. To configure settings for the document, touch the [Options](#) button. For example:
 - Select [File Type and Resolution](#) to specify the type of file to create, the resolution, and the output quality.
 - If the original document is printed on both sides, select [Original Sides](#), and then select [2 Sided](#).
 7. Set options marked with a yellow triangle before using the preview feature.

 **NOTE:** After the preview scan, these options are removed from the main [Options](#) list and are summarized in the [Pre-scan Options](#) list. To change any of these options, discard the preview and start over.

Using the preview feature is optional.

8. Touch the right pane of the screen to preview the document. In the preview screen, use the buttons on the right of the screen to adjust the preview options and to rearrange, rotate, insert, or remove pages.

Use these buttons to toggle between single-page view and thumbnail view. More options are available in thumbnail view than in single-page view.

Use these buttons to zoom in or out on the selected page.

NOTE: Select only one page at a time to use these buttons.

Use this button to rotate the page 180 degrees.

NOTE: This button is available only in the thumbnail view.

Use this button to delete the selected pages.

NOTE: This button is available only in the thumbnail view.

Use these buttons to rearrange the pages within the document. Select one or more pages and move them to the left or right.

NOTE: These buttons are available only in the thumbnail view.

Use this button to add a page to the document. The printer prompts to scan additional pages.

Use this button to clear the changes made in the preview and start over.

Touch this button to collapse the preview screen and return to the Copy screen.

9. When the document is ready, touch the **Send** button.

NOTE: The printer might prompt you to add the email address to the contact list.

Scan and send to network folder

Introduction

The printer can scan a file and save it in a shared folder on the network. Before using this feature, use the HP Embedded Web server to enable the feature and configure the shared folders. The system administrator can configure pre-defined Quick Sets folders; otherwise it is necessary to specify the folder path for each job.

Scan and save the document to a folder

 **NOTE:** You might be required to sign in to the printer to use this feature.

1. Place the document face-down on the scanner glass, or place it face-up in the document feeder and adjust the paper guides to fit the size of the document.
2. From the Home screen on the printer control panel, select [Scan](#), and then select [Scan to Network Folder](#).
3. To specify a path for this job only, touch the [Folder Paths](#) text field to open a keyboard, and type the path to the folder, and then touch the Enter  button. Use this format for the path:

`\\server\folder`, where “server” is the name of the server that hosts the shared folder, and “folder” is the name of the shared folder. If the folder is nested inside other folders, complete all necessary segments of the path to reach the folder. For example: `\\server\folder\folder`

Or, touch the [Add a Path](#) button that is below the [Folder Paths](#) field to select a pre-defined Quick Sets path or a path associated with a Contact.

 **NOTE:** The [Folder Paths](#) field might have a pre-defined path, and it might not be editable. In this situation, the administrator has configured this folder for common access.

4. Touch the [File Name](#) text field to open a keyboard, and then type the name for the file, and then touch the Enter  button.
5. To configure settings for the document, touch the [Options](#) button. For example:
 - Select [File Type and Resolution](#) to specify the type of file to create, the resolution, and the output quality.
 - If the original document is printed on both sides, select [Original Sides](#), and then select [2 Sided](#).
6. Set options marked with a yellow triangle before using the preview feature.

 **NOTE:** After the preview scan, these options are removed from the main [Options](#) list and are summarized in the [Pre-scan Options](#) list. To change any of these options, discard the preview and start over.

Using the preview feature is optional.

7. Touch the right pane of the screen to preview the document. In the preview screen, use the buttons on the right of the screen to adjust the preview options and to rearrange, rotate, insert, or remove pages.

Use these buttons to toggle between single-page view and thumbnail view. More options are available in thumbnail view than in single-page view.

Use these buttons to zoom in or out on the selected page.

NOTE: Select only one page at a time to use these buttons.

Use this button to rotate the page 180 degrees.

NOTE: This button is available only in the thumbnail view.

Use this button to delete the selected pages.

NOTE: This button is available only in the thumbnail view.

Use these buttons to rearrange the pages within the document. Select one or more pages and move them to the left or right.

NOTE: These buttons are available only in the thumbnail view.

Use this button to add a page to the document. The printer prompts to scan additional pages.

Use this button to clear the changes made in the preview and start over.

Touch this button to collapse the preview screen and return to the Copy screen.

8. When the document is ready, touch [Scan](#) to save the file.

Scan and save to a USB flash drive

Introduction

The printer can scan a file and save it on a USB flash drive. Before using this feature, use the HP Embedded Web server to enable and configure it.

Scan and save the document to a USB flash drive

 **NOTE:** You might be required to sign in to the printer to use this feature.

1. Place the document face-down on the scanner glass, or place it face-up in the document feeder and adjust the paper guides to fit the size of the document.
2. Insert the USB flash drive into the USB port near the printer control panel.
3. From the Home screen on the printer control panel, select **Scan**, and then select **Scan to USB Drive**.
4. From the **Save As...** list, select the flash drive. Save the file on the root of the USB flash drive, or save it in an existing folder.
5. Touch the **File Name** text field to open a keyboard, and then type the name for the file, and then touch the Enter  button.
6. To configure settings for the document, touch the **Options** button. For example:
 - Select **File Type and Resolution** to specify the type of file to create, the resolution, and the output quality.
 - If the original document is printed on both sides, select **Original Sides**, and then select **2 Sided**.
7. Set options marked with a yellow triangle before using the preview feature.

 **NOTE:** After the preview scan, these options are removed from the main **Options** list and are summarized in the **Pre-scan Options** list. To change any of these options, discard the preview and start over.

Using the preview feature is optional.

8. Touch the right pane of the screen to preview the document. In the preview screen, use the buttons on the right of the screen to adjust the preview options and to rearrange, rotate, insert, or remove pages.

Use these buttons to toggle between single-page view and thumbnail view. More options are available in thumbnail view than in single-page view.

Use these buttons to zoom in or out on the selected page.

NOTE: Select only one page at a time to use these buttons.

Use this button to rotate the page 180 degrees.

NOTE: This button is available only in the thumbnail view.

Use this button to delete the selected pages.

NOTE: This button is available only in the thumbnail view.

Use these buttons to rearrange the pages within the document. Select one or more pages and move them to the left or right.

NOTE: These buttons are available only in the thumbnail view.

Use this button to add a page to the document. The printer prompts to scan additional pages.

Use this button to clear the changes made in the preview and start over.

Touch this button to collapse the preview screen and return to the Copy screen.

9. When the document is ready, touch [Scan](#) to save the file.

Additional options when scanning

The following settings are available in the [Options](#) list when scanning.

 **NOTE:** The following list contains the master set of options available for HP Enterprise MFP printers. Some options are not available on all printers.

File Type and Resolution	<p>Save a scanned document as one of several types of files.</p> <p>The following standard file types are available:</p> <ul style="list-style-type: none">• PDF: This file type provides the best overall image and text quality. PDF files require Adobe® Acrobat® Reader software for viewing.• JPEG: This file type is a good choice for most graphics. Most computers have a browser that can view .JPEG files. This file type produces one file per page.• TIFF: This is a standard file type that many graphics programs support. This file type produces one file per page.• MTIFF: MTIFF stands for multi-page TIFF. This file type saves multiple scanned pages in a single file.• XPS: XPS (XML Paper Specification) creates an XAML file that preserves the original formatting of the document and supports color graphics and embedded fonts.• PDF/A: PDF/A is a type of PDF designed for long-term archival of electronic documents. All format information in the document is self-contained. <p>HP Enterprise Flow MFP printers or MFP printers that are connected to a digital send software (DSS) server also support the following OCR file types:</p> <ul style="list-style-type: none">• Text (OCR): Text (OCR) creates a text file by using optical character recognition (OCR) to scan the original. A text file can be opened in any word processing program. The formatting of the original will not be saved using this option.• Unicode Text (OCR): Unicode Text (OCR) is an industry standard used to consistently represent and manipulate text. This file type is useful for internationalization and localization.• RTF (OCR): RTF (OCR) creates a rich text format (RTF) file by using optical character recognition (OCR) to scan the original. RTF is an alternative text format that can be opened by most word processing programs. Some of the formatting of the original will be saved using this option.• Searchable PDF (OCR): Searchable PDF (OCR) creates a searchable PDF file by using optical character recognition (OCR) to scan the original. When a document is scanned in this way, use Adobe Acrobat® Reader's search tools to search for specific words or phrases within the PDF.• Searchable PDF/A (OCR): Searchable PDF/A (OCR) is a type of PDF/A file that includes information about the document structure, which allows content to be searched.• HTML (OCR): HTML (OCR) creates a Hypertext Markup Language (HTML) file containing the contents of the original document. HTML is used to display files on Web sites.• CSV (OCR): CSV (OCR) is common text file format that contains comma-separated values. This type of file can be opened by most word processing, spreadsheet, or database programs. <p>MFP printers that are connected to a DSS server also support the following OCR file types for digital send jobs:</p> <ul style="list-style-type: none">• XML (OCR): DESCRIPTION NEEDED.• Searchable XPS (OCR): DESCRIPTION NEEDED.
Original Sides	<p>Specify whether the original document is printed on one side or both sides.</p>

Color/Black	Specify whether the scanned image will be in color, black and gray, or black only. For color printers only.
Scan Mode	<p>Standard Document: Scan a page or stack of pages through the document feeder, or individually on the flatbed glass.</p> <p>Book Mode: Scan an open book and output each page of the book onto different pages.</p> <p>2-sided ID Copy: Scan each side of an identification card on the flatbed glass and output them onto one page. After scanning the first side, the printer prompts to place the second side in the correct position on the glass.</p>
Resolution	Specify the resolution of scanned images. Select a higher resolution to increase the clarity of the image. However, as the resolution increases, the file size also increases.
Original Size	Specify the paper size for the original document.
Content Orientation	Specify whether the original document is printed in Portrait or Landscape orientation.
Image Adjustment	<p>Sharpness: Clarify or soften the image. For example, increasing the sharpness could make text appear crisper, but decreasing it could make photos appear smoother.</p> <p>Darkness: Increase or decrease the amount of white and black used in colors in scanned images.</p> <p>Contrast: Increase or decrease the difference between the lightest and the darkest color on the page.</p> <p>Background Cleanup: Remove faint colors from the background of scanned images. For example, if the original document is printed on colored paper, use this feature to lighten the background without affecting the darkness of the image.</p> <p>Automatic Tone: Available for Flow printers only. The printer automatically adjusts the Darkness, Contrast, and Background Cleanup settings to the most appropriate for the scanned document.</p>
Optimize Text/Picture	Optimize the job for the type of image being scanned: text, graphics, or photos.
Erase Edges	Remove blemishes, such as dark borders or staple marks, by cleaning the edges of the scanned image.
Cropping Options	<p>Crop to original size: Crop the image to match the paper size of the original document.</p> <p>Crop to content: Crop the image to the size of the detectable content in the original document.</p>
Automatically Straighten	Automatically straighten a scanned image.
Blank Page Suppression	Exclude blank pages in the original document from scanned images. This feature is useful for scanning pages printed on both sides to eliminate blank pages in the resulting scanned document.
Multi-feed Detection	Enable or disable multi-feed detection. When enabled, scanning stops when the printer detects more than one page at a time being fed in the document feeder. When disabled, scanning continues when a multi-feed is detected, to allow scanning pages that are stuck together, originals with self-adhesive notes on them, or thick paper.
Create Multiple Files	Divide a larger scan job into several smaller output files.
Notification	Select whether to send notifications of the status of scan jobs. The printer can print the notification, or it can send the notification in an email.
Signing and Encryption	<p>Sign: Send an email with a digital signature.</p> <p>Encrypt: Send an email as an encrypted file.</p> <p>NOTE: This feature is supported for scan to email only.</p>

HP JetAdvantage business solutions

HP JetAdvantage solutions are workflow and printing solutions that are easy-to-use, and both network and cloud-based. HP JetAdvantage solutions are designed to help businesses of all types, including healthcare, financial services, manufacturing, and public sector, manage a fleet of printers and scanners.

HP JetAdvantage Solutions include:

- HP JetAdvantage Security solutions
- HP JetAdvantage Management solutions
- HP JetAdvantage Workflow solutions
- HP JetAdvantage Mobile Printing solutions

For more information about HP JetAdvantage business workflow and printing solutions, go to www.hp.com/go/PrintSolutions.

Additional scan tasks

Go to www.hp.com/support/colorljE57540mfp.

Instructions are available for performing specific scan tasks, such as the following:

- Copy or scan pages from books or other bound documents
- Send a scanned document to a folder in the printer memory
- Copy or scan both sides of an identification card
- Copy or scan a document into a booklet format

7 Fax

- Join support forums
- Find warranty and regulatory information

Set up fax

Introduction

This information applies to fax and Flow models, or to other printers when an optional analog fax accessory has been installed. Before continuing, connect the printer to a phone line (for analog fax) or to an Internet or network fax service.

Set up fax by using the printer control panel

1. From the Home screen on the printer control panel, select [Settings](#).
2. Open the following menus:
 - [Fax](#)
 - [Internal Fax Modem Setup](#)

NOTE: If the [Internal Fax Modem Setup](#) menu does not appear in the menu listing, LAN or Internet fax might be enabled. When LAN or Internet fax is enabled, the analog fax accessory is disabled and the [Internal Fax Modem Setup](#) menu does not display. Only one fax feature, either LAN fax, analog fax, or Internet fax, can be enabled at a time. To use analog fax when LAN fax is enabled, use the HP Embedded Web Server to disable LAN fax.

3. Select the location from the list on the right side of the screen, and then select [Next](#).
4. Touch the [Company Name](#) text field, and use the keypad to type the company name.
5. Touch the [Fax Number](#) text field, and use the keypad to type the sending fax number. Select [Next](#).
6. Verify that the date and time settings are correct. Make changes as necessary, and then select [Next](#).
7. If a dialing prefix is required for sending faxes, touch the [Dialing Prefix](#) text field, and use the keypad to enter the number.
8. Review all the information on the left pane, and then select [Finish](#) to complete the fax setup.

Change fax configurations

 **NOTE:** The settings configured using the control panel override any settings made in the HP Embedded Web Server.

- [Fax dialing settings](#)
- [General fax send settings](#)
- [Fax receive settings](#)

Fax dialing settings

1. From the Home screen on the printer control panel, select [Settings](#).
2. Open the following menus:
 - [Fax](#)
 - [Fax Send Settings](#)
 - [Fax Dialing Settings](#)

Configure any of the following settings, and then select [Done](#):

Menu item	Description
Redial on Error	The Redial on Error feature sets the number of times a fax number will be redialed when an error occurs during a fax transmission.
Redial on No Answer	The Redial on No Answer setting selects the number of times the fax accessory redials if the number dialed does not answer. The number of retries is either 0 to 1 (used in the U.S.) or 0 to 2, depending on the location setting. The interval between retries is set by the redial interval setting.
Redial on Busy	The Redial on Busy setting selects the number of times (0 through 9) the fax accessory redials a number when the number is busy. The interval between retries is set by the Redial Interval setting.
Redial Interval	<p>The Redial Interval setting selects the number of minutes between retries if the number dialed is busy or not answering, or if an error occurs.</p> <p>NOTE: You might observe a redial message on the control panel when both the Redial on Busy and Redial on No Answer settings are set to off. This occurs when the fax accessory dials a number, establishes a connection, and then loses the connection. As a result of this error condition, the fax accessory performs three automatic redial attempts regardless of the redial settings. During this redial operation, a message displays on the control panel to indicate that a redial is in progress.</p>
Fax Send Speed	<p>The Fax Send Speed setting sets the modem bit rate (measured in bits per second) of the Analog Fax modem while sending a fax.</p> <ul style="list-style-type: none">• Fast (v.34 – 33.6k)• Medium (v.17 – 14.4k)• Slow (v.29 – 9.6k)
Line Monitor Volume	Use the Line Monitor Volume setting to control the printer's dialing volume level when sending faxes.
Dialing Mode	The Dialing Mode setting sets the type of dialing that is used: either tone (touch-tone phones) or pulse (rotary-dial phones).

Menu item	Description
Dialing Prefix	The Dialing Prefix setting allows you to enter a prefix number (such as a "9" to access an outside line) when dialing. This prefix number is automatically added to all phone numbers when dialed.
Detect dial tone	The Detect dial tone setting determines whether the fax checks for a dial tone before sending a fax.

General fax send settings

1. From the Home screen on the printer control panel, select [Settings](#).
2. Open the following menus:
 - [Fax](#)
 - [Fax Send Settings](#)
 - [General Fax Send Settings](#)

Configure any of the following settings, and then select [Done](#):

Menu item	Description
Fax Number Confirmation	When the Fax Number Confirmation feature is enabled, the fax number must be entered twice to ensure that it was entered correctly. The feature is disabled by default.
PC Fax Send	Use the PC Fax Send feature to send faxes from a PC. This feature is enabled by default.
Error Correction Mode	<p>Normally, the fax accessory monitors the signals on the telephone line while it is sending or receiving a fax. If the fax accessory detects an error during the transmission and the Error Correction Mode setting is on, the fax accessory can request that the error portion of the fax be sent again.</p> <p>The Error Correction Mode feature is enabled by default. You should turn it off only if you are having trouble sending or receiving a fax and if you are willing to accept the errors in the transmission and a probable quality reduction in the image. Turning off the setting might be useful when you are trying to send a fax overseas or receive one from overseas, or if you are using a satellite telephone connection.</p> <p>NOTE: Some VoIP providers might suggest turning off the Error Correction Mode setting. However, this is not usually necessary.</p>
Fax Header	Use the Fax Header feature to control whether the header is appended to the top, and content is shifted down, or if the header is overlaid on top of the previous header.

Fax receive settings

1. From the Home screen on the printer control panel, select [Settings](#).
2. Open the following menus:
 - [Fax](#)
 - [Fax Receive Settings](#)
 - [Fax Receive Setup](#)

Configure any of the following settings, and then select [Done](#):

Menu item	Description
Receive Mode	<p>The Receive Mode setting determines how the fax accessory receives fax jobs. Select one of the following options:</p> <ul style="list-style-type: none">• Automatic• TAM• Fax/Tel• Manual
Rings to Answer	<p>The Rings to Answer setting determines the number of times the phone rings before the call is answered by the fax accessory.</p> <p>NOTE: The default range for the available options for the Rings to Answer setting is location-specific. The range of possible Rings to Answer options is limited by location.</p> <p>If the fax accessory is not answering, and the Rings to Answer setting is 1, try increasing it to 2.</p>
Ring Volume	<p>The Ring Volume setting allows you to adjust the ringer volume.</p>
Fax Receive Speed	<p>Touch the Fax Receive Speed drop down menu and select one of the following options:</p> <ul style="list-style-type: none">• Fast (v.34 – 33.6k)• Medium (v.17 – 14.4k)• Slow (v.29 – 9.6k)
Extension Phone	<p>This setting allows you use a separate telephone in conjunction with the fax functions.</p>
Allow Reprinting	<p>This setting allows you to reprint received faxes.</p>
Receive to PC	<p>This setting allows you to receive faxes directly to your computer.</p>
Fax Polling	<p>This setting allows you to enable or disable the fax polling function.</p>
Fax/Tel Ring Time	<p>This setting determines the number of times the phone rings before the fax/tel mode initiates.</p>

Send a fax

1. Place the document face-down on the scanner glass, or place it face-up in the document feeder and adjust the paper guides to fit the size of the document.
2. From the Home screen on the printer control panel, select **Fax**. You might be prompted to type a user name and password.
3. Specify the recipients by using one of these methods:

Enter recipients manually

- ▲ Touch the **Fax Recipients** text field, and then use the keypad to enter the fax number. To send to multiple fax numbers, separate the numbers with a semicolon, or select the Enter  button on the touchscreen keyboard after typing each number.

Enter recipients from the Contacts list

- a. Select the Contacts  button that is next to the **Fax Recipients** field to open the **Contacts** screen.
 - b. Select the appropriate contact list.
 - c. Select a name or names from the list of contacts to add to the recipients list, and then select **Add**.
4. To load a Quick Set, select **Load**, select the Quick Set, and then select **Load** under the **Quick Sets** list.

 **NOTE:** **Quick Sets** are predefined settings for various types of output, such as **Text**, **Photograph**, and **High Quality**. You can select a Quick Set to view the description.

5. To configure settings, such as **Resolution**, **Sides**, and **Content Orientation**, select **Options** in the lower left corner, and then select the settings from the **Options** menus. Select **Done** if prompted.
6. Optional Preview: Touch the right pane of the screen to preview the document. You can use the **Expand** and **Collapse** buttons on the left side of the preview pane to expand and collapse the preview screen.

Expand button

Collapse button

Use the buttons on the right of the screen to adjust the preview options and to rearrange, rotate, insert, or remove pages.

Toggle between the two-page view and the thumbnail view. More options are available in the thumbnail view than in the two-page view.

Zoom in or out on the selected page.

NOTE: Select only one page at a time to use these buttons.

Rotate the page 180 degrees.

NOTE: This button is available only in the thumbnail view.

Delete the selected pages.

NOTE: This button is available only in the thumbnail view.

Rearrange the pages within the document. Select one or more pages and move them to the left or right.

NOTE: These buttons are available only in the thumbnail view.

Add a page to the document. The printer prompts you to scan additional pages.

Clear the changes made in the preview and start over.

7. When the document is ready, select [Send](#) to send the fax.

Additional fax tasks

Go to www.hp.com/support/colorljE57540mfp.

Instructions are available for performing specific fax tasks, such as the following:

- Create and manage fax speed dial lists
- Configure fax billing codes
- Use a fax printing schedule
- Block incoming faxes
- Fax archiving and forwarding

8 Manage the printer

Advanced configuration with the HP Embedded Web Server (EWS)

- [Introduction](#)
- [How to access the HP Embedded Web Server \(EWS\)](#)
- [HP Embedded Web Server features](#)

Introduction

Use the HP Embedded Web Server to manage printing functions from a computer instead of the printer control panel.

- View printer status information
- Determine the remaining life for all supplies and order new ones
- View and change tray configurations
- View and change the printer control-panel menu configuration
- View and print internal pages
- Receive notification of printer and supplies events
- View and change network configuration

The HP Embedded Web Server works when the printer is connected to an IP-based network. The HP Embedded Web Server does not support IPX-based printer connections. Internet access is not needed to open and use the HP Embedded Web Server.

When the printer is connected to the network, the HP Embedded Web Server is automatically available.

NOTE: The HP Embedded Web Server is not accessible beyond the network firewall.

How to access the HP Embedded Web Server (EWS)

1. From the Home screen on the printer control panel, select the Information  icon, and then select the Network  icon to display the IP address or host name.
2. Open a web browser, and in the address line, type the IP address or host name exactly as it displays on the printer control panel. Press the **Enter** key on the computer keyboard. The EWS opens.

A screenshot of a web browser address bar showing the URL "https://10.10.XX.XXX/". The address bar has a blue border and a small globe icon on the left.

NOTE: If the web browser displays a message indicating that accessing the website might not be safe, select the option to continue to the website. Accessing this website will not harm the computer.

To use the HP Embedded Web Server, the browser must meet the following requirements:

Windows® 7

- Internet Explorer (version 8.x or greater)
- Google Chrome (version 34.x or greater)
- Firefox (version 20.x or greater)

Windows® 8 or greater

- Internet Explorer (version 9.x or greater)
- Google Chrome (version 34.x or greater)
- Firefox (version 20.x or greater)

macOS

- Safari (version 5.x or greater)
- Google Chrome (version 34.x or greater)

Linux

- Google Chrome (version 34.x or greater)
- Firefox (version 20.x or greater)

Information tab

Table 8-1 HP Embedded Web Server Information tab

Menu	Description
Device Status	Shows the printer status and shows the estimated life remaining of HP supplies. The page also shows the type and size of paper set for each tray. To change the default settings, click the Change Settings link.
Job Log	Shows a summary of all jobs the printer has processed.
Configuration Page	Shows the information found on the configuration page.
Supplies Status Page	Shows the status of the supplies for the printer.
Event Log Page	Shows a list of all printer events and errors. Use the HP Instant Support link (in the page footer on all HP Embedded Web Server pages) to connect to a set of dynamic web pages that help solve problems. These pages also show additional services available for the printer.

Table 8-1 HP Embedded Web Server Information tab (continued)

Menu	Description
Usage Page	Shows a summary of the number of pages the printer has printed, grouped by size, type, and paper print path.
Device Information	Shows the printer network name, address, and model information. To customize these entries, click the Device Information menu on the General tab.
Control Panel Snapshot	Shows an image of the current screen on the control panel display.
Print	Upload a print-ready file from the computer to print. The printer uses the default print settings to print the file.
Printable Reports and Pages	Lists the internal reports and pages for the printer. Select one or more items to print or view.
Open Source Licenses	Shows a summary of the licenses for open source software programs that can be used with the printer.

General tab

Table 8-2 HP Embedded Web Server General tab

Menu	Description
Control Panel Customization	Reorder, show, or hide features on the control-panel display. Change the default display language and keyboard layouts.
Quick Sets	Configure jobs that are available in the Quick Sets area of the Home screen on the printer control panel.
Alerts	Setup email alerts for various printer and supplies events.
Control Panel Settings App	Shows the Settings app options that are available on the printer control panel.
General Settings	Configure how the printer recovers from jams and whether copy jobs initiated at the printer control panel take priority over print jobs.
AutoSend	Configure the printer to send automated emails regarding printer configuration and supplies to specific email addresses.
Edit Other Links	Add or customize a link to another website. This link displays in the footer area on all HP Embedded Web Server pages.
Ordering Information	Enter information about ordering replacement cartridges. This information displays on the supplies status page.
Device Information	Name the printer and assign an asset number to it. Enter the name of the primary contact who will receive information about the printer.
Language	Set the language in which to display the HP Embedded Web Server information.
Date/Time Settings	Set the date and time or synchronize with a network time server.
Energy Settings	Set or edit sleep settings for business and non-business hours and wake, sleep, and holiday events for the printer. Set which interactions with the printer cause it to wake from sleep mode.
Backup and Restore	Create a backup file that contains printer and user data. If necessary, use this file to restore data to the printer.
Reset Factory Settings	Restore printer settings to the factory defaults.

Table 8-2 HP Embedded Web Server General tab (continued)

Menu	Description
Solution Installer	Install third-party software packages that extend or modify the functionality of the printer.
Firmware Upgrade	Download and install printer firmware upgrade files.
Quota and Statistics Services	Provides connection information about third-party job-statistics services.

Copy/Print tab

Table 8-3 HP Embedded Web Server Copy/Print tab

Menu	Description
Print from USB Drive Settings	Enable or disable the Print from USB Drive menu on the control panel.
Manage Stored Jobs	Enable or disable the ability to store jobs in the printer memory. Configure job-storage options.
Default Print Options	Configure the default options for print jobs.
Restrict Color (Color printers only)	Permit or restrict color printing and copying. Specify permissions for individual users or for jobs that are sent from specific software programs.
PCL and PostScript Settings	Adjust the PCL and PostScript settings for all print jobs, including copy jobs and received faxes.
Print Quality	Configure the print quality settings, including color adjustment, image registration, and allowed paper types.
Manage Supplies	Configure how the printer reacts when supplies reach a Very Low state.
Copy Settings	Configure the default options and Quick Sets for copy jobs. NOTE: If job-specific copy setting options are not set from the control panel at the start of a job, the default settings will be used for the job.
Manage Trays	Configure settings for paper trays.

Scan/Digital Send tab

Table 8-4 HP Embedded Web Server Scan/Digital Send tab

Menu	Description
Email Setup	Configure the default email settings for digital sending, including the following: <ul style="list-style-type: none">• Settings for the outgoing mail (SMTP) server• Settings for Email Quick Sets jobs• Default message settings, such as the "From" address and the subject line• Settings for digital signatures and encryption• Settings for email notifications• Default scan settings for email jobs• Default file settings for email jobs
Scan to Network Folder	Configure the network folder settings for digital sending, including the following: <ul style="list-style-type: none">• Settings for Quick Sets jobs saved in a network folder• Settings for notifications• Default scan settings for jobs saved in a network folder• Default file settings for jobs saved in a network folder
Scan to SharePoint® (Flow models only)	Configure the Microsoft SharePoint® settings for digital sending, including the following: <ul style="list-style-type: none">• Settings for Quick Sets jobs saved in a document library on the SharePoint® site• Default settings for jobs saved in a document library on the SharePoint® site
Scan to USB Drive	Configure the USB settings for digital sending, including the following: <ul style="list-style-type: none">• Settings for Quick Sets jobs saved on a USB flash drive• Settings for notifications• Default scan settings for jobs saved on a USB flash drive• Default file settings for jobs saved on a USB flash drive
Contacts	Manage contacts, including the following: <ul style="list-style-type: none">• Add email addresses into the printer one at a time.• Import a large list of frequently-used email addresses on to the printer all at once, rather than adding them one at a time.• Export contacts from the printer into a .CSV file on the computer to use as a data backup, or import the records onto another HP printer.• Edit email addresses that have already been saved in the printer.
Preferences	Configure size detection from the scanner glass.
Email and Scan to Network Folder Quick Setup Wizards	Configure the printer to send scanned images as email attachments. Configure the printer to save scanned images to network-folder Quick Sets. Quick Sets provide easy access to files saved on the network.
Digital Sending Software Setup	Configure settings related to using optional Digital Sending software.

Fax tab

Table 8-5 HP Embedded Web Server Fax tab

Menu	Description
Fax Send Setup	Configure settings for sending faxes, including the following: <ul style="list-style-type: none">• Default settings for outgoing faxes• Settings for fax Quick Sets jobs• Settings for notifications• Default setting for sending faxes using the internal fax modem• Settings for using a LAN fax service• Settings for using an Internet fax service
Fax Speed Dials	Manage speed dials, including the following: <ul style="list-style-type: none">• Import .CSV files containing email addresses, fax numbers, or user records, so that they can be accessed on this printer.• Export email, fax, or user records from the printer into a file on the computer to use as a data backup, or import the records onto another HP printer.
Fax Receive Setup	Configure default print options for incoming faxes, and set up a fax printing schedule.
Fax Archive and Forwarding	Enable or disable fax archiving and fax forwarding, and configure basic settings for each: <ul style="list-style-type: none">• Fax archiving is a method to send a copy of all incoming and outgoing faxes to an email address, a network folder, or an FTP server.• Fax forwarding is a method to forward incoming faxes to a different fax device.
Fax Activity Log	Contains a list of the faxes that have been sent from or received by this printer.

Troubleshooting tab

Table 8-6 HP Embedded Web Server Troubleshooting tab

Menu	Description
General Troubleshooting	Select from a variety of reports and tests to help solve problems with the printer. Configure settings for Fax, OXPd, and Auto Recovery.
Online Help	Link to HP cloud-based online help to assist in troubleshooting printing issues.
Diagnostic Data	Export printer information to a file that can be useful for detailed problem analysis. NOTE: This item is available only if an administrator password is set from the Security tab.
Firmware Upgrade	Download and install printer firmware upgrade files.
Reset Factory Settings	Reset printer settings to factory defaults.

Security tab

Table 8-7 HP Embedded Web Server Security tab

Menu	Description
General Security	Settings for general security, including the following: <ul style="list-style-type: none">• Configure an administrator password to restrict access to certain features on the printer.• Set PJI password for processing PJI commands.• Set file system access and firmware upgrade security.• Enable or disable the Host USB port on the control panel or the USB connectivity port on the formatter for printing directly from a computer.• View the status of all security settings.
Account Policy	Enable administrator account settings.
Access Control	Configure access to printer functions for specific individuals or groups, and select the method individuals use to sign in to the printer.
Protect Stored Data	Configure and manage the internal hard drive for the printer. This printer includes an encrypted hard drive for maximum security. Configure settings for jobs that are stored on the printer hard drive.
Certificate Management	Install and manage security certificates for access to the printer and the network.
Web Service Security	Allow resources on this printer to be accessed by web pages from different domains. If no sites are added to the list, then all sites are trusted.
Self Test	Verify that the security functions are running according to expected system parameters.

HP Web Services tab

Use the **HP Web Services** tab to configure and enable HP Web Services for this printer. It is necessary to enable HP Web Services to use the HP ePrint feature.

Table 8-8 HP Embedded Web Server HP Web Services tab

Menu	Description
Web Services Setup	Connect this printer to HP's ePrintCenter on the web by enabling HP Web Services.
Web Proxy	Configure a proxy server if there are issues enabling HP Web Services or connecting the printer to the Internet.
HP JetAdvantage	Access solutions that extend the capabilities of the printer.

Networking tab

Use the **Networking** tab to configure and secure network settings for the printer when it is connected to an IP-based network. This tab does not display if the printer is connected to other types of networks.

Table 8-9 HP Embedded Web Server Networking tab

Menu	Description
Configuration	
Wi-Fi Direct	Configure Wi-Fi Direct settings for printers that include embedded Wi-Fi Direct Print and NFC printing or that have a wireless accessory installed. NOTE: The configuration options available depend on the print server model.
TCP/IP Setting	Configure TCP/IP settings for IPv4 and IPv6 networks. NOTE: The configuration options available depend on the print server model.
Network Settings	Configure IPX/SPX, AppleTalk, DLC/LLC, and SNMP settings, depending on the print server model.
Other Settings	Configure general printing protocols and services supported by the print server. The available options depend on the print server model, but can include firmware update, LPD queues, USB settings, support information, and refresh rate.
AirPrint	Enable, set up, or disable network printing from Apple supported printers.
Select Language	Change the language displayed by the HP Embedded Web Server. This page displays if the web pages support multiple languages. Optionally, select supported languages through language-preference settings in the browser.
Select Location	Select a country/region for the printer
Google Cloud Print	
Setup	Set up Google Cloud Print options.
Web Proxy	Configure proxy settings.
Security	
Settings	View and restore current security settings to factory-default values. Configure security settings using the Security Configuration Wizard. NOTE: Do not use the Security Configuration Wizard to configure security settings using network-management applications, such as HP Web Jetadmin.
Authorization	Control configuration management and use of this printer, including the following: <ul style="list-style-type: none"> • Set or change the administrator password to control access to configuration parameters. • Request, install, and manage digital certificates on the HP Jetdirect print server. • Limit host access to this printer through an Access Control List (ACL) (for selected print servers on IPv4 networks only).
Secure Communication	Configure security settings.

Mgmt. Protocols	Configure and manage security protocols for this printer, including the following: <ul style="list-style-type: none"> • Set the security management level for the HP Embedded Web Server, and control traffic over HTTP and HTTPS. • Configure the SNMP (Simple Network Management Protocol) operation. Enable or disable the SNMP v1/v2c or SNMP v3 agents on the print server. • Control access through protocols that may not be secure, such as printing protocols, print services, discovery protocols, name resolution services, and configuration-management protocols.
802.1X Authentication	Configure 802.1X authentication settings on the Jetdirect print server as required for client authentication on the network, and reset the 802.1X authentication settings to factory-default values. CAUTION: When changing the 802.1X authentication settings; the printer might lose its connection. To reconnect, it might be necessary to reset the print server to a factory-default state and reinstall the printer.
IPsec/Firewall	View or configure a Firewall policy or an IPsec/Firewall policy (for selected HP Jetdirect models only).
Announcement Agent	Enable or disable the HP Device Announcement Agent, set the configuration server, and configure mutual authentication using certificates.
Diagnostics	
Network Statistics	Display network statistics that are collected and stored on the HP Jetdirect print server.
Protocol Info	View a list of network-configuration settings on the HP Jetdirect print server for each protocol.
Configuration Page	View the HP Jetdirect configuration page, which contains status and configuration information.

Other Links list

NOTE: Configure which links display in the footer of the HP Embedded Web Server by using the **Edit Other Links** menu on the **General** tab. The following are the default links.

Table 8-10 HP Embedded Web Server Other Links list

Menu	Description
Product Support	Connect to the support site for the printer to search for help on various topics.
Shop for Supplies	Connect to the HP SureSupply website for information on purchasing original HP supplies, such as cartridges and paper.
HP Instant Support	Connect to the HP website to find solutions to printer problems.

Configure IP network settings

- [Printer sharing disclaimer](#)
- [View or change network settings](#)
- [Rename the printer on a network](#)
- [Manually configure IPv4 TCP/IP parameters from the control panel](#)
- [Manually configure IPv6 TCP/IP parameters from the control panel](#)
- [Link speed and duplex settings](#)

Printer sharing disclaimer

HP does not support peer-to-peer networking, as the feature is a function of Microsoft operating systems and not of the HP printer drivers. Go to Microsoft at www.microsoft.com.

View or change network settings

Use the HP Embedded Web Server to view or change IP configuration settings.

1. Open the HP Embedded Web Server (EWS):
 - a. From the Home screen on the printer control panel, touch the Information  icon, and then touch the Network  icon to display the IP address or host name.
 - b. Open a web browser, and in the address line, type the IP address or host name exactly as it displays on the printer control panel. Press the **Enter** key on the computer keyboard. The EWS opens.

 **NOTE:** If the web browser displays a message indicating that accessing the website might not be safe, select the option to continue to the website. Accessing this website will not harm the computer.

2. Click the **Networking** tab to obtain network information. Change settings as needed.

Rename the printer on a network

To rename the printer on a network so that it can be uniquely identified, use the HP Embedded Web Server.

1. Open the HP Embedded Web Server (EWS):
 - a. From the Home screen on the printer control panel, touch the Information  icon, and then touch the Network  icon to display the IP address or host name.
 - b. Open a web browser, and in the address line, type the IP address or host name exactly as it displays on the printer control panel. Press the **Enter** key on the computer keyboard. The EWS opens.

 **NOTE:** If the web browser displays a message indicating that accessing the website might not be safe, select the option to continue to the website. Accessing this website will not harm the computer.

2. Open the **General** tab.

3. On the **Device Information** page, the default printer name is in the **Device Name** field. You can change this name to uniquely identify this printer.

NOTE: Completing the other fields on this page is optional.

4. Click the **Apply** button to save the changes.

Manually configure IPv4 TCP/IP parameters from the control panel

Use the control-panel [Settings](#) menus to manually set an IPv4 address, subnet mask, and default gateway.

1. From the Home screen on the printer control panel, select [Settings](#).
2. Open the following menus:
 - [Networking](#)
 - [Ethernet](#)
 - [TCP/IP](#)
 - [IPV 4 Settings](#)
 - [Config Method](#)
3. Select the [Manual](#) option, and then select [OK](#).
4. Open the [Manual Settings](#) menu.
5. Select the [IP Address](#), [Subnet Mask](#), or [Default Gateway](#) option.
6. Touch the first field to open a keypad. Enter the correct digits for the field, and then select [OK](#).
Repeat the process for each field to be configured.

Manually configure IPv6 TCP/IP parameters from the control panel

Use the control-panel [Settings](#) menus to manually set an IPv6 address.

1. From the Home screen on the printer control panel, select [Settings](#).
2. To enable manual configuration, open the following menus:
 - [Networking](#)
 - [Ethernet](#)
 - [TCP/IP](#)
 - [IPV6 Settings](#)
3. Select [Enable](#), select [On](#), and then select [OK](#).
4. To configure the address, open the [Address](#) menu, and then touch the field to open a keypad.
5. Use the keypad to enter the address, and then select [OK](#).

Link speed and duplex settings

 **NOTE:** This information applies only to Ethernet networks. It does not apply to wireless networks.

The link speed and communication mode of the print server must match the network hub. For most situations, leave the printer in automatic mode. Incorrect changes to the link speed and duplex settings might prevent the printer from communicating with other network devices. To make changes, use the printer control panel.

 **NOTE:** The printer setting must match the setting for the network device (a network hub, switch, gateway, router, or computer).

 **NOTE:** Making changes to these settings causes the printer to turn off and then on. Make changes only when the printer is idle.

1. From the Home screen on the printer control panel, swipe until the [Settings](#) menu displays. Touch the [Settings](#) icon to open the menu.
2. Open the following menus:
 - [Networking](#)
 - [Ethernet](#)
 - [Link Speed](#)
3. Select one of the following options:
 - [Auto](#): The print server automatically configures itself for the highest link speed and communication mode allowed on the network.
 - [10T Half](#): 10 megabytes per second (Mbps), half-duplex operation
 - [10T Full](#): 10 Mbps, full-duplex operation
 - [10T Auto](#): 10 Mbps, automatic-duplex operation
 - [100TX Half](#): 100 Mbps, half-duplex operation
 - [100TX Full](#): 100 Mbps, full-duplex operation
 - [100TX Auto](#): 100 Mbps, automatic-duplex operation
 - [1000T Full](#): 1000 Mbps, full-duplex operation
4. Select [OK](#). The printer turns off and then on.

Printer security features

Introduction

The printer includes several security features to restrict who has access to configuration settings, to secure data, and to prevent access to valuable hardware components.

- [Security statements](#)
- [IP Security](#)
- [Assign or change the system password using the HP Embedded Web Server](#)
- [Encryption support: HP High Performance Secure Hard Disks](#)
- [Lock the formatter](#)

Security statements

The printer supports security standards and recommended protocols that help you keep the printer secure, protect critical information on your network, and simplify the way you monitor and maintain the printer.

IP Security

IP Security (IPsec) is a set of protocols that control IP-based network traffic to and from the printer. IPsec provides host-to-host authentication, data integrity, and encryption of network communications.

For printers that are connected to the network and have an HP Jetdirect print server, you can configure IPsec by using the **Networking** tab in the HP Embedded Web Server.

Assign or change the system password using the HP Embedded Web Server

Assign an administrator password for access to the printer and the HP Embedded Web Server so that unauthorized users cannot change the printer settings.

1. Open the HP Embedded Web Server (EWS):
 - a. From the Home screen on the printer control panel, touch the Information  icon, and then touch the Network  icon to display the IP address or host name.
 - b. Open a web browser, and in the address line, type the IP address or host name exactly as it displays on the printer control panel. Press the **Enter** key on the computer keyboard. The EWS opens.

 **NOTE:** If the web browser displays a message indicating that accessing the website might not be safe, select the option to continue to the website. Accessing this website will not harm the computer.

2. Click the **Security** tab.
3. Open the **General Security** menu.
4. In the area labeled **Set the Local Administrator Password**, enter the name to associate with the password in the **Username** field.
5. Enter the password in the **New Password** field, and then enter it again in the **Verify Password** field.

 **NOTE:** To change an existing password, first enter the existing password in the **Old Password** field.

6. Click the **Apply** button.

 **NOTE:** Make note of the password and store it in a safe place. The administrator password cannot be recovered. If the administrator password is lost or forgotten, contact HP Support at support.hp.com for the assistance required to completely reset the printer.

Some features on the printer control panel can be secured so that unauthorized people cannot use them. When a feature is secured, the printer prompts you to sign in before you can use it. You can also sign in without waiting for a prompt by selecting **Sign In** from the printer control panel.

Typically, the credentials for signing in to the printer are the same as for signing in to the network. Consult the network administrator for this printer if you have questions about which credentials to use.

1. From the Home screen on the printer control panel, select **Sign In**.
2. Follow the prompts to enter the credentials.

 **NOTE:** To maintain security for the printer, select **Sign Out** when you have finished using the printer.

Encryption support: HP High Performance Secure Hard Disks

The hard disk provides hardware-based encryption so you can securely store sensitive data without impacting printer performance. This hard disk uses the latest Advanced Encryption Standard (AES) and has versatile time-saving features and robust functionality.

Use the **Security** menu in the HP Embedded Web Server to configure the disk.

Lock the formatter

The formatter has a slot that you can use to attach a security cable. Locking the formatter prevents someone from removing valuable components from it.

Energy-conservation settings

Introduction

- [Set the Sleep/Auto Off After Inactivity setting](#)
- [Set the sleep timer and configure the printer to use 1 watt or less of power](#)
- [Set the sleep schedule](#)
- [Set the Delay Shut Down setting](#)

Configure sleep settings to reduce power usage when the printer is idle.

Set the Sleep/Auto Off After Inactivity setting

Use the control panel menus to set the amount of idle time before the printer enters sleep mode.

Complete the following procedure to change the Sleep/Auto Off After setting:

1. On the printer control panel, open the [Setup](#) menu.
2. Open the following menus:
 - [System Setup](#)
 - [Energy Settings](#)
 - [Sleep/Auto Off After](#)
3. Use the arrow keys to select the time for the Sleep/Auto Off delay, and then press the [OK](#) button.
Select the time for the Sleep/Auto Off After delay.

Set the sleep timer and configure the printer to use 1 watt or less of power

The sleep settings affect how much power the printer uses, the wake/sleep time, how quickly the printer enters sleep mode, and how quickly the printer wakes up from sleep mode.

To configure the printer to use 1 watt or less of power while in sleep mode, enter times for both the [Sleep after Inactivity](#) and [Auto Off after sleep](#) settings.

1. From the Home screen on the printer control panel, select [Settings](#).
2. Open the following menus:
 - [General](#)
 - [Energy Settings](#)
 - [Sleep Settings](#)
3. Select [Sleep after Inactivity](#) to specify the number of minutes the printer is inactive before it enters sleep mode. Enter the appropriate time period.
4. Select [Auto Off after sleep](#) to put the printer into a deeper power save mode after a period of sleep. Enter the appropriate time period.

 **NOTE:** By default, the printer will wake from Auto Off in response to any activity other than USB or Wi-Fi. For greater energy settings, you can set it to wake only to the power button by selecting [Shut down \(wake on power button only\)](#).

5. Select [Done](#) to save the settings.

Set the sleep schedule

Use the [Sleep Schedule](#) feature to configure the printer to automatically wake or go into Sleep mode at specific times on specific days of the week.

1. From the Home screen on the printer control panel, select [Settings](#).
2. Open the following menus:
 - [General](#)
 - [Energy Settings](#)
 - [Sleep Schedule](#)
3. Select the [New Event](#) button, and then select the type of event to schedule: [Wake Event](#) or [Sleep Event](#).
4. For a wake or sleep event, configure the time and the days of the week for the event. Select [Save](#) to save the setting.

Set the Delay Shut Down setting

Use the control panel menus to select whether or not the printer delays shutting down after the power button is pressed.

Complete the following procedure to change the Delay Shut Down setting:

1. On the printer control panel, open the [Setup](#) menu.
2. Open the following menus:
 - [System Setup](#)
 - [Energy Settings](#)
 - [Delay Shut Down](#)
3. Select one of the delay options:
 - [No Delay](#): The printer shuts down after a period of inactivity determined by the Shut Down After setting.
 - [When Ports Are Active](#): When this option is selected the printer will not shut down unless all ports are inactive. An active network link or fax connection will prevent the printer from shutting down.

HP Web Jetadmin

HP Web Jetadmin is an award-winning, industry-leading tool for efficiently managing a wide variety of networked HP products, including printers, multifunction printers, and digital senders. This single solution allows you to remotely install, monitor, maintain, troubleshoot, and secure your printing and imaging environment — ultimately increasing business productivity by helping you save time, control costs, and protect your investment.

HP Web Jetadmin upgrades are periodically made available to provide support for specific product features. Go to www.hp.com/go/webjetadmin for more information.

Software and firmware updates

HP regularly updates features that are available in the printer firmware. To take advantage of the most current features, update the printer firmware. Download the most recent firmware update file from the Web:

Go to www.hp.com/support/colorljE57540mfp. Click **Drivers & Software**.

9 Solve problems

For more information:

- [Customer support](#)
- [Control panel help system](#)
- [Restore factory settings](#)
- [A “Cartridge is low” or “Cartridge is very low” message displays on the printer control panel](#)

The following information is correct at the time of publication.

For video assistance, see www.hp.com/videos/LaserJet.

For current information, see www.hp.com/support/colorljE57540mfp.

HP's all-inclusive help for the printer includes the following information:

- Install and configure
- Learn and use
- Solve problems
- Download software and firmware updates
- Join support forums
- Find warranty and regulatory information

Customer support

Get telephone support for your country/region	Country/region phone numbers are on the flyer that was in the box with the printer or at support.hp.com .
Have the printer name, serial number, date of purchase, and problem description ready	
Get 24-hour Internet support, and download software utilities and drivers	www.hp.com/support/colorljE57540mfp
Order additional HP service or maintenance agreements	www.hp.com/go/carepack
Register the printer	www.register.hp.com

Control panel help system

The printer has a built-in Help system that explains how to use each screen. To open the Help system, select the Help  button in the upper-right corner of the screen.

For some screens, the Help opens to a global menu where you can search for specific topics. You can browse through the menu structure by touching the buttons in the menu.

Some Help screens include animations that show specific procedures, such as clearing paper jams.

If the printer alerts of an error or warning, touch the Help  button to open a message that describes the problem. The message also contains instructions to help solve the problem.

Restore factory settings

Introduction

Use one of the following methods to restore the printer to the original settings from the factory.

 **NOTE:** Restoring factory settings sets most of the printer settings to their factory defaults. However, some settings are not changed, such as language, date, time, and some network configuration settings.

Method one: Restore factory settings from the printer control panel

1. From the Home screen on the printer control panel, swipe until the **Settings** menu displays. Touch the **Settings** icon to open the menu.
2. Open the following menus:
 - **General**
 - **Reset Factory Settings**
3. Touch **Reset**.

A verification message advises that completing the reset function might result in loss of data.

4. Select **Reset** to complete the process.

 **NOTE:** The printer restarts automatically after the reset operation completes.

Method two: Restore factory settings from the HP Embedded Web Server (network-connected printers only)

1. Open the HP Embedded Web Server (EWS):
 - a. From the Home screen on the printer control panel, touch the Information  icon, and then touch the Network  icon to display the IP address or host name.
 - b. Open a web browser, and in the address line, type the IP address or host name exactly as it displays on the printer control panel. Press the **Enter** key on the computer keyboard. The EWS opens.

 **NOTE:** If the web browser displays a message indicating that accessing the website might not be safe, select the option to continue to the website. Accessing this website will not harm the computer.

2. Open the **General** tab.
3. On the left side of the screen, click **Reset Factory Settings**.
4. Click the **Reset** button.

 **NOTE:** The printer restarts automatically after the reset operation completes.

A “Cartridge is low” or “Cartridge is very low” message displays on the printer control panel

Cartridge is low: The printer indicates when a toner cartridge level is low. Actual toner cartridge life remaining may vary. Consider having a replacement available to install when print quality is no longer acceptable. The toner cartridge does not need to be replaced now.

Cartridge is very low: The printer indicates when the toner cartridge level is very low. Actual toner cartridge life remaining may vary. Consider having a replacement available to install when print quality is no longer acceptable. The toner cartridge does not need to be replaced now unless the print quality is no longer acceptable.

Once an HP toner cartridge has reached **Very Low**, HP’s Premium Protection Warranty on that toner cartridge has ended.

Printer does not pick up paper or misfeeds

Introduction

The following solutions can help solve problems if the printer is not picking up paper from the tray or is picking up multiple sheets of paper at one time. Either of these situations can result in paper jams.

- [The printer does not pick up paper](#)
- [The printer picks up multiple sheets of paper](#)
- [The document feeder jams, skews, or picks up multiple sheets of paper](#)

The printer does not pick up paper

If the printer does not pick up paper from the tray, try these solutions.

1. Open the printer and remove any jammed sheets of paper. Verify that no torn remnants of paper remain inside the printer.
2. Load the tray with the correct size of paper for the job.
3. Make sure the paper size and type are set correctly on the printer control panel.

4. Make sure the paper guides in the tray are adjusted correctly for the size of paper. Adjust the guides to the appropriate indentation in the tray. The arrow on the tray guide should line up exactly with the marking on the tray.

 **NOTE:** Do not adjust the paper guides tightly against the paper stack. Adjust them to the indentations or markings in the tray.

The following images show examples of the paper-size indentations in the trays for various printers. Most HP printers have markings similar to these.

Figure 9-1 Size markings for Tray 1 or the multipurpose tray

Figure 9-2 Size markings for cassette trays

5. Verify that the humidity in the room is within specifications for this printer and that paper is being stored in unopened packages. Most reams of paper are sold in moisture-proof wrapping to keep paper dry.

In high-humidity environments, paper at the top of the stack in the tray can absorb moisture, and it might have a wavy or uneven appearance. If this happens, remove the top 5 to 10 sheets of paper from the stack.

In low-humidity environments, excess static electricity can cause sheets of paper to stick together. If this happens, remove the paper from the tray, and flex the stack by holding it at each end and bringing the ends up to form a U shape. Then, rotate the ends down to reverse the U shape. Next, hold each side of the stack of paper, and repeat this process. This process releases individual sheets without introducing static electricity. Straighten the paper stack against a table before returning it to the tray.

Figure 9-3 Technique for flexing the paper stack

6. Check the printer control panel to see if it is displaying a prompt to feed the paper manually. Load paper, and continue.
7. The rollers above the tray might be contaminated. Clean the rollers with a lint-free cloth dampened with warm water. Use distilled water, if it is available.

CAUTION: Do not spray water directly on to the printer. Instead, spray water on the cloth or dab the cloth in water and wring it out before cleaning the rollers.

The following image shows examples of the roller location for various printers.

Figure 9-4 Roller locations for Tray 1 or the multipurpose tray

The printer picks up multiple sheets of paper

If the printer picks up multiple sheets of paper from the tray, try these solutions.

1. Remove the stack of paper from the tray and flex it, rotate it 180 degrees, and flip it over. *Do not fan the paper.* Return the stack of paper to the tray.

 **NOTE:** Fanning the paper introduces static electricity. Instead of fanning the paper, flex the stack by holding it at each end and bringing the ends up to form a U shape. Then, rotate the ends down to reverse the U shape. Next, hold each side of the stack of paper, and repeat this process. This process releases individual sheets without introducing static electricity. Straighten the paper stack against a table before returning it to the tray.

Figure 9-5 Technique for flexing the paper stack

2. Use only paper that meets HP specifications for this printer.
3. Verify that the humidity in the room is within specifications for this printer, and that paper is being stored in unopened packages. Most reams of paper are sold in moisture-proof wrapping to keep paper dry.

In high-humidity environments, paper at the top of the stack in the tray can absorb moisture, and it might have a wavy or uneven appearance. If this happens, remove the top 5 to 10 sheets of paper from the stack.

In low-humidity environments, excess static electricity can cause sheets of paper to stick together. If this happens, remove the paper from the tray, and flex the stack as described above.
4. Use paper that is not wrinkled, folded, or damaged. If necessary, use paper from a different package.

5. Make sure the tray is not overfilled by checking the stack-height markings inside the tray. If it is overfilled, remove the entire stack of paper from the tray, straighten the stack, and then return some of the paper to the tray.

The following images show examples of the stack-height markings in the trays for various printers. Most HP printers have markings similar to these. Also make sure that all sheets of paper are below the tabs near the stack-height marks. These tabs help hold the paper in the correct position as it enters the printer.

Figure 9-6 Stack-height markings

Figure 9-7 Tab for the paper stack

6. Make sure the paper guides in the tray are adjusted correctly for the size of paper. Adjust the guides to the appropriate indentation in the tray. The arrow on the tray guide should line up exactly with the marking on the tray.

 **NOTE:** Do not adjust the paper guides tightly against the paper stack. Adjust them to the indentations or markings in the tray.

The following images show examples of the paper-size indentations in the trays for various printers. Most HP printers have markings similar to these.

Figure 9-8 Size markings for Tray 1 or the multipurpose tray

Figure 9-9 Size markings for cassette trays

7. Make sure the printing environment is within recommended specifications.

The document feeder jams, skews, or picks up multiple sheets of paper

NOTE: This information applies to MFP printers only.

- The original might have something on it, such as staples or self-adhesive notes, that must be removed.
- Check that all rollers are in place and that the roller-access cover inside the document feeder is closed.
- Make sure that the top document-feeder cover is closed.
- The pages might not be placed correctly. Straighten the pages and adjust the paper guides to center the stack.
- The paper guides must be touching the sides of the paper stack to work correctly. Make sure that the paper stack is straight and the guides are against the paper stack.
- The document feeder input tray or output bin might contain more than the maximum number of pages. Make sure the paper stack fits below the guides in the input tray, and remove pages from the output bin.
- Verify that there are no pieces of paper, staples, paper clips, or other debris in the paper path.
- Clean the document-feeder rollers and the separation pad. Use compressed air or a clean, lint-free cloth moistened with warm water. If misfeeds still occur, replace the rollers.
- From the Home screen on the printer control panel, scroll to and touch the [Supplies](#) button. Check the status of the document-feeder kit, and replace it if necessary.

Clear paper jams

Introduction

The following information includes instructions for clearing paper jams from the printer.

- [Jam locations](#)
- [Auto-navigation for clearing paper jams](#)
- [Experiencing frequent or recurring paper jams?](#)
- [Clear paper jams in the document feeder](#)
- [13.A1 tray 1 paper jam](#)
- [13.A2 tray 2 paper jam](#)
- [13.A3, 13.A4, 13.A5 tray 3, tray 4, tray 5 paper jam](#)
- [13.B right door and fuser area paper jam](#)
- [13.E1 output bin paper jam](#)
- [13.8 staple jams](#)

Jam locations

1	Document feeder
2	Right door and fuser area
3	Tray 1
4	Lower-right door
5	Optional 550-sheet trays

6	Tray 2
7	Output bin

Auto-navigation for clearing paper jams

The auto-navigation feature assists in clearing jams by providing step-by-step instructions on the control panel. When you complete a step, the printer displays instructions for the next step until you have completed all steps in the procedure.

Experiencing frequent or recurring paper jams?

To reduce the number of paper jams, try these solutions.

NOTE: To see a video that demonstrates how to load paper in a way that reduces the number of paper jams, click [here](#).

1. Use only paper that meets HP specifications for this printer.
2. Use paper that is not wrinkled, folded, or damaged. If necessary, use paper from a different package.
3. Use paper that has not previously been printed or copied on.
4. Make sure the tray is not overfilled. If it is, remove the entire stack of paper from the tray, straighten the stack, and then return some of the paper to the tray.
5. Make sure the paper guides in the tray are adjusted correctly for the size of paper. Adjust the guides so they are touching the paper stack without bending it.
6. Make sure that the tray is fully inserted in the printer.
7. If you are printing on heavy, embossed, or perforated paper, use the manual feed feature and feed sheets one at a time.
8. Open the [Trays](#) menu on the printer control panel. Verify that the tray is configured correctly for the paper type and size.
9. Make sure the printing environment is within recommended specifications.

Clear paper jams in the document feeder

The following information describes how to clear paper jams in the document feeder. When a jam occurs, the control panel displays an animation that assists in clearing the jam.

1. Lift the latch to release the document-feeder cover.

2. Open the document-feeder cover.

3. Remove any jammed paper.

4. Lift the document-feeder input tray.

5. Remove any jammed paper.

6. Lower the document-feeder input tray.

7. Close the document-feeder cover.

NOTE: Verify that the latch on the top of the document-feeder cover is completely closed.

 **NOTE:** To avoid jams, make sure the guides in the document-feeder input tray are adjusted against the document, without bending the document. To copy narrow documents, use the flatbed scanner. Remove all staples and paper clips from original documents.

 **NOTE:** Original documents that are printed on heavy, glossy paper can jam more frequently than originals that are printed on plain paper.

13.A1 tray 1 paper jam

Use the following procedure to check for paper in all possible jam locations related to Tray 1. When a jam occurs, the control panel displays an animation that assists in clearing the jam.

1. If most of the sheet of paper is visible in the tray, slowly pull the jammed paper out of the printer. Make sure that the entire sheet is removed. If it tears, continue with the following steps to find the remnants.

If most of the sheet of paper has been pulled inside the printer, continue with the following steps.

2. Lift the latch on the right door to release it.

3. Open the right door.

4. If jammed paper is present, gently pull it out.

5. Close the right door.

13.A2 tray 2 paper jam

Use the following procedure to check for paper in all possible jam locations related to Tray 2. When a jam occurs, the control panel displays an animation that assists in clearing the jam.

1. Lift the latch on the right door to release it.

2. Open the right door.

3. Gently pull out any jammed paper from the pick up area.

4. Close the transfer assembly.

5. Push down on the green levers to release the jam-access cover.

6. Gently pull out any jammed paper. If the paper tears, make sure to remove all remnants.

7. Close the jam-access cover, and then lower the transfer assembly.

8. Pull the tray completely out of the printer by pulling and lifting it up slightly.

9. Remove any jammed or damaged sheets of paper. Verify that the tray is not overfilled and that the paper guides are adjusted correctly.

- 10. Remove any paper from the feed rollers inside the printer. First pull the paper to the left to release it, and then pull it forward to remove it.

- 11. Reinsert and close the tray.

- 12. Close the right door.

13.A3, 13.A4, 13.A5 tray 3, tray 4, tray 5 paper jam

Use the following procedure to check for paper in all possible jam locations related to the optional 550-sheet paper feeders. When a jam occurs, the control panel displays an animation that assists in clearing the jam.

1. Open the lower-right door.

2. Gently pull out any jammed paper.

3. Pull the tray completely out of the printer by pulling and lifting it up slightly.

4. Remove any jammed or damaged sheets of paper. Verify that the tray is not overfilled and that the paper guides are adjusted correctly.

5. Remove any paper from the feed rollers inside the printer. First pull the paper to the left to release it, and then pull it forward to remove it.

6. Close the lower-right door.

7. Reinsert and close the tray.

8. Open the right door.

9. Gently pull out any jammed paper from the pick up area.

10. Close the transfer assembly.

11. Push down on the green levers to release the jam-access cover.

12. Gently pull out any jammed paper. If the paper tears, make sure to remove all remnants.

13. Close the jam-access cover, and then lower the transfer assembly.

14. Close the right door.

13.B right door and fuser area paper jam

Use the following procedure to check for paper in all possible jam locations inside the right door. When a jam occurs, the control panel displays an animation that assists in clearing the jam.

⚠ CAUTION: The fuser can be hot while the printer is in use. Wait for the fuser to cool before handling it.

1. Lift the latch on the right door to release it.

2. Open the right door.

3. Gently pull out any jammed paper from the pick up area.

4. Close the transfer assembly.

5. Push down on the green levers to release the jam-access cover.

6. Gently pull out any jammed paper. If the paper tears, make sure to remove all remnants.

7. Close the jam-access cover, and then lower the transfer assembly.

8. If paper is visible entering the bottom of the fuser, gently pull downward to remove it.

CAUTION: Do not touch the foam on the transfer roller. Contaminants can affect print quality.

9. If paper is jammed as it enters the output bin, gently pull the paper out to remove it.

10. Paper could be jammed inside the fuser where it would not be visible. Grasp the fuser handles, lift up slightly, and then pull straight out to remove the fuser.

CAUTION: The fuser can be hot while the printer is in use. Wait for the fuser to cool before handling it.

11. Open the jam-access door. If paper is jammed inside the fuser, gently pull it straight up to remove it. If the paper tears, remove all paper fragments.

CAUTION: Even if the body of the fuser has cooled, the rollers that are inside could still be hot. Do not touch the fuser rollers until they have cooled.

12. Close the jam-access door, and push the fuser completely into the printer until it clicks into place.

13. Check for jammed paper in the duplex path inside the right door, and remove any jammed paper.

14. Close the right door.

13.E1 output bin paper jam

Use the following procedure to clear jams in the output bin. When a jam occurs, the control panel displays an animation that assists in clearing the jam.

1. If paper is visible in the output bin, grasp the leading edge and remove it.

13.8 staple jams

Use the following procedure to clear jams in the stapler. When a jam occurs, the control panel displays an animation that assists in clearing the jam.

1. Open the stapler door.
- NOTE:** Opening the stapler door disables the stapler.

2. Remove the staple cartridge from the printer.

3. Lift up on the small lever at the back of the staple cartridge. Remove the jammed staples.

4. Close the lever at the back of the staple cartridge. Be sure that it snaps into place.

5. Reinsert the staple cartridge into the opening inside the stapler door.

6. Close the stapler door.

Improve print quality

Introduction

- [Print from a different software program](#)
- [Check the paper-type setting for the print job](#)
- [Check toner-cartridge status](#)
- [Print a cleaning page](#)
- [Visually inspect the toner cartridge or cartridges](#)
- [Check paper and the printing environment](#)
- [Try a different print driver](#)

If the printer is having print-quality problems, try the following solutions in the order presented to resolve the issue.

Print from a different software program

Try printing from a different software program. If the page prints correctly, the problem is with the software program from which you were printing.

Check the paper-type setting for the print job

Check the paper type setting when printing from a software program and the printed pages have smears, fuzzy or dark print, curled paper, scattered dots of toner, loose toner, or small areas of missing toner.

Check the paper type setting on the printer

1. Open the tray.
2. Verify that the tray is loaded with the correct type of paper.
3. Close the tray.
4. Follow the control panel instructions to confirm or modify the paper type settings for the tray.

Check the paper type setting (Windows)

1. From the software program, select the **Print** option.
2. Select the printer, and then click the **Properties** or **Preferences** button.
3. Click the **Paper/Quality** tab.
4. From the **Paper Type** drop-down list, click the **More...** option.
5. Expand the list of **Type is:** options.
6. Expand the category of paper types that best describes your paper.

7. Select the option for the type of paper you are using, and click the **OK** button.
8. Click the **OK** button to close the **Document Properties** dialog box. In the **Print** dialog box, click the **OK** button to print the job.

Check the paper type setting (macOS)

1. Click the **File** menu, and then click the **Print** option.
2. In the **Printer** menu, select the printer.
3. By default, the print driver displays the **Copies & Pages** menu. Open the menus drop-down list, and then click the **Finishing** menu.
4. Select a type from the **Media Type** drop-down list.
5. Click the **Print** button.

Check toner-cartridge status

Follow these steps to check the estimated life remaining in the toner cartridges and if applicable, the status of other replaceable maintenance parts.

Step one: Print the supplies status page

1. From the Home screen on the printer control panel, select the **Reports** menu.
2. Select the **Configuration/Status Pages** menu.
3. Select **Supplies Status Page**, and then select **Print** to print the page.

Step two: Check supplies status

1. Look at the supplies status report to check the percent of life remaining for the toner cartridges and, if applicable, the status of other replaceable maintenance parts.

Print quality problems can occur when using a toner cartridge that is at its estimated end of life. The supplies status page indicates when a supply level is very low. After an HP supply has reached the very low threshold, HP's premium protection warranty on that supply has ended.

The toner cartridge does not need to be replaced now unless the print quality is no longer acceptable. Consider having a replacement available to install when print quality is no longer acceptable.

If you determine that you need to replace a toner cartridge or other replaceable maintenance parts, the supplies status page lists the genuine HP part numbers.

2. Check to see if you are using a genuine HP cartridge.

A genuine HP toner cartridge has the word "HP" on it, or has the HP logo on it. For more information on identifying HP cartridges go to www.hp.com/go/learnaboutsupplies.

Print a cleaning page

During the printing process paper, toner, and dust particles can accumulate inside the printer and can cause print-quality issues such as toner specks or spatter, smears, streaks, lines, or repeating marks.

Follow these steps to clean the printer's paper path.

1. From the Home screen on the printer control panel, select the [Support Tools](#) menu.
2. Select the following menus:
 - [Maintenance](#)
 - [Calibration/Cleaning](#)
 - [Cleaning Page](#)
3. Select [Print](#) to print the page.

A **Cleaning...** message displays on the printer control panel. The cleaning process takes a few minutes to complete. Do not turn the printer off until the cleaning process has finished. When it is finished, discard the printed page.

Visually inspect the toner cartridge or cartridges

Follow these steps to inspect each toner cartridge.

1. Remove the toner cartridges from the printer, and verify that the sealing tape has been removed.
2. Check the memory chip for damage.
3. Examine the surface of the green imaging drum.

 **CAUTION:** Do not touch the imaging drum. Fingerprints on the imaging drum can cause print-quality problems.

4. If you see any scratches, fingerprints, or other damage on the imaging drum, replace the toner cartridge.
5. Reinstall the toner cartridge, and print a few pages to see if the problem has resolved.

Check paper and the printing environment

Step one: Use paper that meets HP specifications

Some print-quality problems arise from using paper that does not meet HP specifications.

- Always use a paper type and weight that this printer supports.
- Use paper that is of good quality and free of cuts, nicks, tears, spots, loose particles, dust, wrinkles, voids, staples, and curled or bent edges.
- Use paper that has not been previously printed on.
- Use paper that does not contain metallic material, such as glitter.
- Use paper that is designed for use in laser printers. Do not use paper that is designed only for use in Inkjet printers.
- Use paper that is not too rough. Using smoother paper generally results in better print quality.

Step two: Check the environment

The environment can directly affect print quality and is a common cause for print-quality or paper-feeding issues. Try the following solutions:

- Move the printer away from drafty locations, such as open windows or doors, or air-conditioning vents.
- Make sure the printer is not exposed to temperatures or humidity outside of printer specifications.
- Do not place the printer in a confined space, such as a cabinet.
- Place the printer on a sturdy, level surface.
- Remove anything that is blocking the vents on the printer. The printer requires good air flow on all sides, including the top.
- Protect the printer from airborne debris, dust, steam, grease, or other elements that can leave residue inside the printer.

Step three: Set the individual tray alignment

Follow these steps when text or images are not centered or aligned correctly on the printed page when printing from specific trays.

1. From the Home screen on the printer control panel, select the [Settings](#) menu.
2. Select the following menus:
 - [Copy/Print](#) or [Print](#)
 - [Print Quality](#)
 - [Image Registration](#)
3. Select [Tray](#), and then select the tray to adjust.
4. Select [Print Test Page](#), and then follow the instructions on the printed pages.
5. Select [Print Test Page](#) again to verify the results, and then make further adjustments if necessary.
6. Select [Done](#) to save the new settings.

Try a different print driver

Try a different print driver when printing from a software program and the printed pages have unexpected lines in graphics, missing text, missing graphics, incorrect formatting, or substituted fonts.

Download any of the following drivers from the HP website: www.hp.com/support/colorljE57540mfp.

HP PCL.6 driver	This product-specific print driver is for Windows XP 32 bit, Vista 32 bit, and Server 2008 32 bit operating systems. Not all features or page sizes are supported.
HP PCL 6 driver	This product-specific print driver is for Windows 7, 8, 8.1, 10, Server 2008 64 bit, Server 2008 R2, Server 2012, Server 2012 R2, and Server 2016 operating systems.
HP PCL-6 V4 driver	This product-specific print driver is for Windows 7, 8, 8.1, 10, Server 2008 64 bit, Server 2008 R2, Server 2012, Server 2012 R2, and Server 2016 operating systems.

HP UPD PS driver

- Recommended for printing with Adobe® software programs or with other highly graphics-intensive software programs
- Provides support for printing from postscript emulation needs, or for postscript flash font support

HP UPD PCL 6

- Recommended for printing in all Windows environments
 - Provides the overall best speed, print quality, and printer feature support for most users
 - Developed to align with Windows Graphic Device Interface (GDI) for best speed in Windows environments
 - Might not be fully compatible with third-party and custom software programs that are based on PCL 5
-

Improve copy image quality

If the printer is having copy quality problems, try the following solutions in the order presented to resolve the issue.

- [Check the scanner glass for dirt and smudges](#)
- [Calibrate the scanner](#)
- [Check the paper settings](#)
- [Check the image-adjustment settings](#)
- [Optimize copy quality for text or pictures](#)
- [Edge-to-edge copying](#)

Try these few simple steps first:

- Use the flatbed scanner rather than the document feeder.
- Use high-quality originals.
- When using the document feeder, load the original document into the feeder correctly, using the paper guides, to avoid unclear or skewed images.

If the problem still exists, try these additional solutions. If they do not fix the problem, see “Improve print quality” for further solutions.

Check the scanner glass for dirt and smudges

Over time, specks of debris might collect on the scanner glass and white plastic backing, which can affect performance. Use the following procedure to clean the scanner if the printed pages have streaks, unwanted lines, black dots, poor print quality, or unclear text.

1. Press the power button to turn the printer off, and then disconnect the power cable from the electrical outlet.

2. Open the scanner lid.

3. Clean the scanner glass and the document feeder strips with a soft cloth or sponge that has been moistened with nonabrasive glass cleaner.

CAUTION: Do not use abrasives, acetone, benzene, ammonia, ethyl alcohol, or carbon tetrachloride on any part of the printer; these can damage the printer. Do not place liquids directly on the glass or platen. They might seep and damage the printer.

NOTE: If you are having trouble with streaks on copies when you are using the document feeder, be sure to clean the small strip of glass on the left side of the scanner.

4. Dry the glass and white plastic parts with a chamois or a cellulose sponge to prevent spotting.
5. Connect the power cable to an outlet, and then press the power button to turn the printer on.

Calibrate the scanner

If the copied image is not positioned correctly on the page, follow these steps to calibrate the scanner.

 **NOTE:** When using the document feeder, make sure to adjust the guides in the input tray so they are against the original document.

1. From the Home screen on the printer control panel, swipe until the **Support Tools** menu displays. Touch the **Support Tools** icon to open the menu.
2. Open the following menus:

- [Maintenance](#)
 - [Calibration/Cleaning](#)
 - [Calibrate Scanner](#)
3. Touch the [Start](#) button to start the calibration process. Follow the on-screen prompts.
 4. Wait while the printer calibrates, and then try copying again.

Check the paper settings

Follow these steps if copied pages have smears, fuzzy or dark print, curled paper, or areas where pigment has dropped out.

Check the paper selection options

1. From the Home screen on the printer control panel, select [Copy](#).
2. Select [Options](#), and then scroll to and select [Paper Selection](#).
3. Select [Paper size](#), and then select one of the predefined options.
4. Select [Paper type](#), and then select one of the predefined options.
5. Select [Paper tray](#), and then select one of the predefined options.
6. Select [Done](#) to save the paper selection options.

Check the image-adjustment settings

Adjust these additional settings to improve copy quality:

- [Sharpness](#): Clarify or soften the image. For example, increasing the sharpness could make text appear crisper, but decreasing it could make photos appear smoother.
 - [Darkness](#): Increase or decrease the amount of white and black used in colors in scanned images.
 - [Contrast](#): Increase or decrease the difference between the lightest and the darkest color on the page.
 - [Background Cleanup](#): Remove faint colors from the background of scanned images. For example, if the original document is printed on colored paper, use this feature to lighten the background without affecting the darkness of the image.
 - [Automatic Tone](#): Available for Flow printers only. The printer automatically adjusts the [Darkness](#), [Contrast](#), and [Background Cleanup](#) settings to the most appropriate for the scanned document.
1. From the Home screen on the printer control panel, select [Copy](#).
 2. Select [Options](#), and then scroll to and select [Image Adjustment](#).
 3. Adjust the sliders to set the levels, and select [Done](#).
 4. Select [Copy](#) to start the copy job.

NOTE: These settings are temporary. After you have finished the job, the printer returns to the default settings.

Optimize copy quality for text or pictures

Optimize the copy job for the type of image being copied: text, graphics, or photos.

1. From the Home screen on the printer control panel, select **Copy**.
2. Select **Options**, and then select **Optimize Text/Picture**.
3. Select one of the predefined options.
4. Select **Copy** to start the copy job.

NOTE: These settings are temporary. After you have finished the job, the printer returns to the default settings.

Edge-to-edge copying

Use this feature to avoid shadows that can appear along the edges of copies when the original document is printed close to the edges.

1. From the Home screen on the printer control panel, select **Copy**.
2. Select **Options**, and then select **Edge-To-Edge**.
3. Select the **Edge-To-Edge output** option if the original document is printed close to the paper edges.
4. Select **Copy** to start the copy job.

Improve scan image quality

- [Check the scanner glass for dirt and smudges](#)
- [Check the resolution settings](#)
- [Check the color settings](#)
- [Check the image-adjustment settings](#)
- [Optimize scan quality for text or pictures](#)
- [Check the output-quality settings](#)

Try these few simple steps first:

- Use the flatbed scanner rather than the document feeder.
- Use high-quality originals.
- When using the document feeder, load the original document into the feeder correctly, using the paper guides, to avoid unclear or skewed images.

If the problem still exists, try these additional solutions. If they do not fix the problem, see “Improve print quality” for further solutions.

Check the scanner glass for dirt and smudges

Over time, specks of debris might collect on the scanner glass and white plastic backing, which can affect performance. Use the following procedure to clean the scanner if the printed pages have streaks, unwanted lines, black dots, poor print quality, or unclear text.

1. Press the power button to turn the printer off, and then disconnect the power cable from the electrical outlet.

2. Open the scanner lid.

3. Clean the scanner glass and the document feeder strips with a soft cloth or sponge that has been moistened with nonabrasive glass cleaner.

CAUTION: Do not use abrasives, acetone, benzene, ammonia, ethyl alcohol, or carbon tetrachloride on any part of the printer; these can damage the printer. Do not place liquids directly on the glass or platen. They might seep and damage the printer.

NOTE: If you are having trouble with streaks on copies when you are using the document feeder, be sure to clean the small strip of glass on the left side of the scanner.

4. Dry the glass and white plastic parts with a chamois or a cellulose sponge to prevent spotting.
5. Connect the power cable to an outlet, and then press the power button to turn the printer on.

Check the resolution settings

 **NOTE:** Setting the resolution to a high value increases the file size and the scan time.

Follow these steps to adjust the resolution setting:

1. From the Home screen on the printer control panel, select [Scan](#).
2. Select one of the following Scan features:
 - [Scan to Email](#)
 - [Scan to Network Folder](#)

- [Scan to USB Drive](#)
 - [Scan to SharePoint®](#)
3. Select [Options](#), and then select [File Type and Resolution](#).
 4. Select one of the predefined [Resolution](#) options, and then select [Done](#).
 5. Select [Send](#) or [Save](#) to start the scan.

Check the color settings

Follow these steps to adjust the color setting:

1. From the Home screen on the printer control panel, select [Scan](#).
2. Select one of the following Scan features:
 - [Save to Device Memory](#)
 - [Scan to E-mail](#)
 - [Scan to Network Folder](#)
 - [Scan to USB](#)
 - [Scan to SharePoint®](#)
3. Touch the [Options](#) button.
4. In the Options pane, scroll to and select [Color/Black](#).
5. Select one of the predefined options.
6. Touch the [Send](#) button.

Check the image-adjustment settings

Adjust these additional settings to improve scan quality:

- [Sharpness](#): Clarify or soften the image. For example, increasing the sharpness could make text appear crisper, but decreasing it could make photos appear smoother.
 - [Darkness](#): Increase or decrease the amount of white and black used in colors in scanned images.
 - [Contrast](#): Increase or decrease the difference between the lightest and the darkest color on the page.
 - [Background Cleanup](#): Remove faint colors from the background of scanned images. For example, if the original document is printed on colored paper, use this feature to lighten the background without affecting the darkness of the image.
 - [Automatic Tone](#): Available for Flow printers only. The printer automatically adjusts the [Darkness](#), [Contrast](#), and [Background Cleanup](#) settings to the most appropriate for the scanned document.
1. From the Home screen on the printer control panel, select [Scan](#).
 2. Select one of the following Scan features:

- [Scan to E-mail](#)
 - [Scan to Network Folder](#)
 - [Scan to USB Drive](#)
 - [Scan to Job Storage](#)
 - [Scan to SharePoint®](#)
3. Select [Options](#), and then select [Image Adjustment](#).
 4. Adjust the sliders to set the levels, and then select [Done](#).
 5. Select [Send](#) or [Save](#) to start the scan.

NOTE: These settings are temporary. After you have finished the job, the printer returns to the default settings.

Optimize scan quality for text or pictures

Optimize the scan job for the type of image being scanned: text, graphics, or photos.

1. From the Home screen on the printer control panel, select [Scan](#).
2. Select one of the following Scan features:
 - [Scan to E-mail](#)
 - [Scan to Network Folder](#)
 - [Scan to USB Drive](#)
 - [Scan to Job Storage](#)
 - [Scan to SharePoint®](#)
3. Select [Options](#), and then select [Optimize Text/Picture](#).
4. Select one of the predefined options.
5. Select [Send](#) or [Save](#) to start the scan.

NOTE: These settings are temporary. After you have finished the job, the printer returns to the default settings.

Check the output-quality settings

This setting adjusts the level of compression when saving the file. For the highest quality, select the highest setting.

1. From the Home screen on the printer control panel, select [Scan](#).
2. Select one of the following Scan features:
 - [Scan to Email](#)
 - [Scan to Network Folder](#)
 - [Scan to USB Drive](#)
 - [Scan to SharePoint®](#)

3. Select [Options](#), and then select [File Type and Resolution](#).
4. Select one of the predefined [Quality and File Size](#) options, and then select [Done](#).
5. Select [Send](#) or [Save](#) to start the scan.

Improve fax image quality

If the printer is having fax quality problems, try the following solutions in the order presented to resolve the issue.

- [Check the scanner glass for dirt and smudges](#)
- [Check the send-fax resolution settings](#)
- [Check the image-adjustment settings](#)
- [Optimize fax quality for text or pictures](#)
- [Check the error-correction settings](#)
- [Check the fit-to-page setting](#)
- [Send to a different fax machine](#)
- [Check the sender's fax machine](#)

Try these few simple steps first:

- Use the flatbed scanner rather than the document feeder.
- Use high-quality originals.
- When using the document feeder, load the original document into the feeder correctly, using the paper guides, to avoid unclear or skewed images.

If the problem still exists, try these additional solutions. If they do not fix the problem, see “Improve print quality” for further solutions.

Check the scanner glass for dirt and smudges

Over time, specks of debris might collect on the scanner glass and white plastic backing, which can affect performance. Use the following procedure to clean the scanner if the printed pages have streaks, unwanted lines, black dots, poor print quality, or unclear text.

1. Press the power button to turn the printer off, and then disconnect the power cable from the electrical outlet.

2. Open the scanner lid.

3. Clean the scanner glass and the document feeder strips with a soft cloth or sponge that has been moistened with nonabrasive glass cleaner.

CAUTION: Do not use abrasives, acetone, benzene, ammonia, ethyl alcohol, or carbon tetrachloride on any part of the printer; these can damage the printer. Do not place liquids directly on the glass or platen. They might seep and damage the printer.

NOTE: If you are having trouble with streaks on copies when you are using the document feeder, be sure to clean the small strip of glass on the left side of the scanner.

4. Dry the glass and white plastic parts with a chamois or a cellulose sponge to prevent spotting.
5. Connect the power cable to an outlet, and then press the power button to turn the printer on.

Check the send-fax resolution settings

Follow these steps to adjust the resolution of outgoing faxes.

 **NOTE:** Increasing the resolution increases the fax size and send time.

1. From the Home screen on the printer control panel, select **Fax**.
2. Select **Options**.
3. In the Options pane, scroll to and select **Resolution**.
4. Select one of the predefined options, and then select **Send** to send the fax.

Check the image-adjustment settings

Adjust these additional settings to improve send-fax quality:

- **Sharpness:** Clarify or soften the image. For example, increasing the sharpness could make text appear crisper, but decreasing it could make photos appear smoother.
 - **Darkness:** Increase or decrease the amount of white and black used in colors in scanned images.
 - **Contrast:** Increase or decrease the difference between the lightest and the darkest color on the page.
 - **Background Cleanup:** Remove faint colors from the background of scanned images. For example, if the original document is printed on colored paper, use this feature to lighten the background without affecting the darkness of the image.
 - **Automatic Tone:** Available for Flow printers only. The printer automatically adjusts the **Darkness**, **Contrast**, and **Background Cleanup** settings to the most appropriate for the scanned document.
1. From the Home screen on the printer control panel, select **Fax**.
 2. Select **Options**.
 3. In the Options pane, scroll to and select **Image Adjustment**.
 4. Adjust the sliders to set the levels, and then select **Done**.
 5. Select **Send** to send the fax.

NOTE: These settings are temporary. After you have finished the job, the printer returns to the default settings.

Optimize fax quality for text or pictures

Optimize the fax job for the type of image being scanned: text, graphics, or photos.

1. From the Home screen on the printer control panel, select **Fax**.
2. Select **Options**.
3. In the Options pane, scroll to and select **Optimize Text/Picture**.
4. Select one of the predefined options.
5. Select **Send** to send the fax.

NOTE: These settings are temporary. After you have finished the job, the printer returns to the default settings.

Check the error-correction settings

The **Error Correction Mode** setting might be disabled, which can reduce image quality. Follow these steps to re-enable the setting.

1. From the Home screen on the printer control panel, swipe until the **Settings** menu displays. Touch the **Settings** icon to open the menu.
2. Open the following menus:

- [Fax](#)
 - [Fax Send Settings](#)
 - [General Fax Send Settings](#)
3. Select the [Error Correction Mode](#) option. Touch the [Done](#) button.

Check the fit-to-page setting

If the [Fit to Page](#) setting is enabled, and the incoming fax is larger than the default page size, the printer attempts to scale the image to fit the page. If this setting is disabled, larger images split across multiple pages.

1. From the Home screen on the printer control panel, select [Settings](#).
2. Open the following menus:
 - [Fax](#)
 - [Fax Receive Settings](#)
 - [Default Job Options](#)
 - [Fit to Page](#)
3. Select the [On](#) option to enable the setting, or select the [Off](#) option to disable it.

Send to a different fax machine

Try sending the fax to a different fax machine. If the fax quality is better, the problem is related to the initial recipient's fax machine settings or supplies status.

Check the sender's fax machine

Ask the sender to try sending from a different fax machine. If the fax quality is better, the problem is with the sender's fax machine. If a different fax machine is unavailable, ask the sender to consider making the following changes:

- Make sure the original document is on white (not colored) paper.
- Increase the fax resolution, quality level, or contrast settings.
- If possible, send the fax from a computer software program.

Solve fax problems

- [Checklist for solving fax problems](#)
- [General fax problems](#)

Checklist for solving fax problems

Use the following checklist to help identify the cause of any fax-related problems you encounter:

- **Are you using the fax cable supplied with the fax accessory?** This fax accessory has been tested with the supplied fax cable to meet RJ11 and functional specifications. Do not substitute another fax cable; the analog-fax accessory requires an analog-fax cable. It also requires an analog phone connection.
- **Is the fax/phone line connector seated in the outlet on the fax accessory?** Make sure that the phone jack is correctly seated in the outlet. Insert the connector into the outlet until it "clicks."

NOTE: Verify that the phone jack is connected to the fax port rather than to the network port. The ports are similar.

- **Is the phone wall jack working properly?** Verify that a dial tone exists by attaching a phone to the wall jack. Can you hear a dial tone, and can you make or receive a phone call?

What type of phone line are you using?

- **Dedicated line:** A standard analog fax/phone line assigned to receive or send faxes.

NOTE: The phone line should be for printer fax use only and not shared with other types of telephone devices. Examples include alarm systems that use the phone line for notifications to a monitoring company.

- **PBX system:** A business-environment phone system. Standard home phones and the fax accessory use an analog phone signal. Some PBX systems are digital and might not be compatible with the fax accessory. You might need an interfacing Analog Telephone Adapter (ATA) to connect the fax machine to digital PBX systems.
- **Roll-over lines:** A phone system feature where a new call "rolls over" to the next available line when the first incoming line is busy. Try attaching the printer to the first incoming phone line. The fax accessory answers the phone after it rings the number of times set in the rings-to-answer setting.

Are you using a surge-protection device?

A surge-protection device can be used between the wall jack and the fax accessory to protect the fax accessory against electrical power passed through the phone lines. These devices can cause some fax communication problems by degrading the quality of the phone signal. If you are having problems sending or receiving faxes and are using one of these devices, connect the printer directly to the phone jack on the wall to determine whether the problem is with the surge-protection device.

Are you using a phone company voice-messaging service or an answering machine?

If the rings-to-answer setting for the messaging service is lower than the rings-to-answer setting for the fax accessory, the messaging service answers the call, and the fax accessory cannot receive faxes. If the rings-to-answer setting for the fax accessory is lower than that of the messaging service, the fax accessory answers all calls.

Does your phone line have a call-waiting feature?

If the fax telephone line has an activated call-waiting feature, a call-waiting notice can interrupt a fax call in progress, which causes a communication error. Ensure that a call-waiting feature is not active on the fax telephone line.

Check fax accessory status

If the analog-fax accessory does not appear to be functioning, print a [Configuration Page](#) report to check the status.

1. From the Home screen, scroll to and select [Reports](#).
2. Open the following menus:
 - [Configuration/Status Pages](#)
 - [Configuration Page](#)
3. Touch the [Print](#) button to print the report, or touch the [View](#) button to view the report on the screen. The report consists of several pages.

NOTE: The printer IP address or host name is listed on the Jetdirect Page.

On the Fax Accessory Page of the Configuration Page, under the Hardware Information heading, check the Modem Status. The following table identifies the status conditions and possible solutions.

NOTE: If the Fax Accessory Page does not print, there might be a problem with the analog fax accessory. If you are using LAN fax or Internet fax, those configurations could be disabling the feature.

Operational / Enabled ¹	The analog-fax accessory is installed and ready.
Operational / Disabled ¹	The fax accessory is installed, but you have not configured the required fax settings yet. The fax accessory is installed and operational; however, the HP Digital Sending utility has either disabled the printer fax feature or has enabled LAN fax. When LAN fax is enabled, the analog-fax feature is disabled. Only one fax feature, either LAN fax or analog fax, can be enabled at a time. NOTE: If LAN fax is enabled, the Scan to Fax feature is unavailable on the printer control panel.
Non-Operational / Enabled/Disabled ¹	The printer has detected a firmware failure. Upgrade the firmware.
Damaged / Enabled/Disabled ¹	The fax accessory has failed. Reseat the fax accessory card and check for bent pins. If the status is still DAMAGED, replace the analog-fax accessory card.

¹ ENABLED indicates that the analog-fax accessory is enabled and turned on; DISABLED indicates that LAN fax is enabled (analog fax is turned off).

General fax problems

The following are some common fax problems.

The fax failed to send

JBIG is enabled, and the receiving fax machine does not have JBIG capability.

Turn off the JBIG setting.

An Out of Memory status message displays on the printer control panel

The printer storage disk is full.

Delete some stored jobs from the disk. From the Home screen on the printer control panel, touch the [Retrieve from Device Memory](#) button. Open the list of stored jobs or stored faxes. Select a job to delete, and then touch the [Delete](#) button.

Print quality of a photo is poor or prints as a gray box

You are using the wrong page-content setting or the wrong resolution setting.

Try setting the [Optimize Text/Picture](#) option to [Photograph](#) setting.

You touched the Stop button to cancel a fax, but the fax was still sent

If the job is too far along in the sending process, you cannot cancel the job.

This is normal operation.

No fax address book button displays

None of the contacts in the selected contacts list have fax information associated with them.

Not able to locate the Fax settings in HP Web Jetadmin

Fax settings in HP Web Jetadmin are located under the device's status page drop-down menu.

Select **Digital Sending and Fax** from the drop-down menu.

The header is appended to the top of the page when the overlay option is enabled

For all forwarded faxes, the printer appends the overlay header to the top of a page.

This is normal operation.

A mix of names and numbers is in the recipients box

Names and numbers can both display, depending on where they are from. The fax address book lists names, and all other databases list numbers.

This is normal operation.

A one-page fax prints as two pages

The fax header is being appended to the top of the fax, pushing text to a second page.

To print a one page fax on one page, set the overlay header to overlay mode, or adjust the fit-to-page setting.

A document stops in the document feeder in the middle of faxing

A jam is in the document feeder.

Clear the jam, and send the fax again.

The volume for sounds coming from the fax accessory is too high or too low

The volume setting needs to be adjusted.

Adjust the volume in the [Fax Send Settings](#) menu and the [Fax Receive Settings](#) menu.
