Introduction

About NutriPATH Integrative Pathology

NutriPATH is a privately owned medical laboratory that specialises in the area of functional health and wellbeing pathology testing. NutriPATH today, is one of the largest functional testing laboratories servicing as a multinational company for integrative medicine practitioners. Our functional pathology and routine pathology tests assist general practitioners, naturopaths, nutritionists, dieticians, chiropractors, osteopaths and other complementary healthcare practitioners in identifying the underlying cause of illness as well as providing tools for the prevention of disease and premature ageing.

NutriPATH offers more tests than any other integrative medical laboratory. With more than 200 tests available, it is the anti-ageing and integrative medical practitioners' one-stop-shop. Assessments investigate endocrine, gastrointestinal, immunological, metabolic and nutritional balance.

Ongoing Clinical Support for Practitioners

The clinical and scientific staff behind NutriPATH have had many years of experience, technical knowledge and are proactively involved in providing a wide array of services in pathology testing and training. Our clinical team present and participate at workshops and seminars to a broad spectrum of healthcare professionals nationally and internationally. NutriPATH has always been dedicated to provide education to practitioners in integrative and anti-ageing medicine. NutriPATH offers technical assistance from their experienced consultants who are available to discuss test selection, interpretation and treatment considerations. In addition, NutriPATH provides helpful interpretative guidelines and treatment suggestions on all test reports. Our test panels are constantly updated to meet the needs of the practitioners and their patients' health status.

We differentiate ourselves from Pathology Services available in that we:

- Can tailor test panels to suit your area of specialty eg. weight management, allergies or hormonal imbalances.
- Constantly update our tests with new innovative analytes and profiles.
- Provide test panels that are measured with a variety of samples e.g. saliva, urine, dried urine, hair, blood or blood spot and stool.
- **Provide ongoing training and clinical support at NO CHARGE via telephone and webinars.**
- Provide competitive pricing and offer a one-stop facility for testing locally around Australia.

For more information about our products please visit www.nutripath.com.au
or contact us on **1300 688 522** or at info@nutripath.com.au

Introduction

Ordering Test Collection Kits

NutriPATH provide 3 simple efficient methods of ordering test collection kits for your clients.

STEP 1: Order your A4 (for medical software) OR A5 (pre-printed personalised) request forms OR register to order online via the NutriPATH online portal.

STEP 2: Decide whether: a) You wish to stock test collection kits within your clinic (at no up front cost).

If you wish to stock these test kits in your clinic, please call **Customer Service on 1300 688 522** **OR**

b) You will have your patients call NutriPATH to order their test collection kits **OR**

c) You wish to simply utilise the online portal as your main access for online ordering at www.nutripath.com.au

If you have chosen to stock the test kits:

Give the patient

1. The appropriate test collection kit as specified in our Test Directory.
2. A request form with the patient details section completed and the relevant test(s) required filled out in 'Tests Requested' section of the request form.

If you have chosen not to stock the test collection kits within the clinic:

Give the patient

1. A request form with the patient details section completed and the relevant test(s) required filled out in the 'Tests Requested' section of the request form.
2. Direct the patient to then call NutriPATH on **1300 688 522** and order the relevant test collection kit to be posted to them.

If you have chosen to use the online portal to order test kits and view patient test results:

We now have an online portal service where you can place your order for test kits online - 24 hours a day, 7 days per week.

Contact us at info@nutripath.com.au if you are interested in setting up your practitioner online portal.

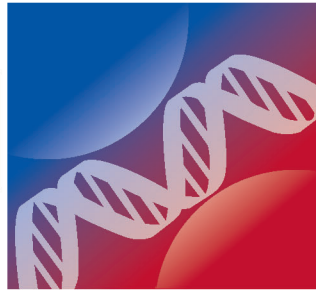

STEP 3: Once the patient has received the test collection kit, they should carefully read the collection instructions before proceeding to collect the specimen. It is important that the healthcare practitioner informs the patient of any medications or supplements that need to be withheld.

STEP 4: After collection of the specimen, the patient will complete the patient details section of the request form with their personal details and credit card details. The patient will then insert the specimens and request form in the express post container (padded envelope/transport cylinder) provided in the collection kit and post to NutriPATH.

STEP 5: Upon receipt at NutriPATH these specimens will be processed and analysed. Results are sent directly to practitioners. Results are available via hard copy, fax, email or electronic download.

STEP 6: Patients are referred back to their practitioner for interpretation of their results.

NutriPATH offers clinical support to practitioners regarding test results and recommended treatments.
For any other assistance or clinical support call NutriPATH on 1300 688 522

Introduction

General Test Information

Collection instructions and all items needed to perform the test are included in the test kits. NutriPATH highly recommend that you advise your clients to read the specimen collection instructions carefully prior to sample collection. If there is something within the instructions that your client does not understand, please advise them to contact the NutriPATH Customer Service team for clarification.

The majority of samples collected are stable for transport to NutriPATH via overnight Express Post. In many circumstances preservatives are added to the specimen collection containers to ensure that the sample reaches the laboratory in ample time for analysis. In some circumstances, samples require transportation via dry ice or must reach NutriPATH within 24 hours; however, special instructions for transportation are provided with these test kits.

Test Request Forms

NutriPATH requires test request forms for each test to be completed by the healthcare practitioner. Failure to provide a completed test request form may result in either a sample rejection or a delay in test results. Below are the requirements of filling out a NutriPATH request form for your patient.

Please fill in the 'Patient Information' section outlined in red using block letters for data entry purposes.

- Given name
- Surname
- Date of Birth
- Gender
- Address
- Telephone
- Amount Due

Please indicate whether the patient is on any hormone medication or medication specific to the test that is requested.

This form is titled 'NutriPATH' and includes contact information: 'Please call us on 1300 688 522 if you do not have a Test Kit', '16 Harker St, Burwood, Victoria 3125', 'Email: info@nutripath.com.au', and 'Fax: (03) 9880 2999'. It is divided into several sections: 'PATIENT INFORMATION (BLOCK LETTERS ONLY)' with fields for Name, Address, Phone, and Date of Birth; 'PRACTITIONER INFORMATION' with fields for Name, Address, and Telephone Number; 'Clinical Notes' with checkboxes for various symptoms and medications; 'Tests/Analyses Required' with a table for selecting tests; and 'CREDIT CARD DETAILS' with fields for Card Number, Expiry Date, and Amount Due. A 'PLEASE NOTE' box states: '1. Results WILL NOT be released until payment is finalised. 2. Results will only be released to the referring practitioner. Results cannot be released directly to the patient.' A 'Date Collected' field is also present.

Practitioner signature is required for authorization of requesting the pathology test.

Please print in the square box the test code and test name that you would like NutriPATH to perform.

A5 Pre-Printed Personalised Request Forms

Please indicate under 'Supplement History' whether the patient is on any hormone medication or medication specific to the test that is requested.

The Guideline for Selecting Hormone Testing with NutriPATH Pathology

COLLECTION METHOD TYPE	NO EXOGENOUS STEROIDS	ORAL STEROIDS	TOPICAL STEROIDS	VAGINAL STEROIDS	TROCHE/SUBLINGUAL STEROIDS	PELLET/IM STEROIDS
SERUM	✓	✓	✗	✗	✓	✓
SALIVA	✓	✓	✓	✓	✗	✓
DRIED URINE	✓	✗	✗	✗	✓	✓
DRIED BLOOD SPOT	✓	✓	✓	✓	✓	✓

Please note this guide is for patients who are on hormone replacement therapy (HRT)

Saliva is ideal for: (Test Codes 1001-1012) pg. 5

- Easy sample collection and is the preferred choice for most cases.
- Assessing "free" (unbound to carrier proteins) hormone levels.
- General hormone screening for both male and female.
- Monitoring hormone replacement therapies given orally, topically, vaginally or via pellets.
- Determining diurnal cortisol levels (4 times during one day) for adrenal function 'Gold standard'

Blood Spot is ideal for: (Test Codes 1401-1417) pg. 8

- Monitoring all hormone replacement therapies (oral, topical, vaginal, sublingual, pellet)
- Patients who are unable to produce saliva e.g. due to Sjogrens Syndrome.
- Assessing interstitial tissue/capillary hormone levels.

Dried Urine is ideal for: (Test Codes 1501-1507) pg. 9

- Measuring steroid hormone metabolites –ideal for cancer risk assessments.
- Complex hormone cases as it can measure an extensive range of hormones.
- Assessing nocturnal and diurnal melatonin production.

		*** Faecal DNA Multiplex PCR <u>with any CDSA Level 1 - 5</u> ***	Stool Test Kit	\$50.00
Comprehensive Digestive Stool Analysis (CDSA) - Please see detailed sample reports at www.nutripath.com.au				
• CDSA Level 1	2003	Macroscopic & Microscopic description; Beneficial and other Bacteria; Yeasts; Parasites (visual detection); Antibiotic/Natural agents sensitivities (bacteria & yeasts only) Inc. pH NOTE: Add on Faecal PCR [2002] for more sensitive parasite detection	Stool Test Kit	\$130.00
• CDSA Level 2	2004	Macroscopic & Microscopic description; Beneficial and other Bacteria; Yeasts; Parasites (visual detection); Antibiotic/Natural agents sensitivities (bacteria & yeasts only); plus Digestive, Absorption and Metabolic markers inc. pH, β-glucuronidase, SCFAs NOTE: Add on Faecal PCR [2002] for more sensitive parasite detection	Stool Test Kit	\$220.00
• CDSA Level 3	2005	Macroscopic & Microscopic description; Beneficial and other Bacteria; Yeasts; Parasites (visual detection); Antibiotic/Natural agents sensitivities (bacteria & yeasts only); Digestive, Absorption and Metabolic markers; plus Pancreatic elastase (PE1) NOTE: Add on Faecal PCR [2002] for more sensitive parasite detection	Stool Test Kit	\$260.00
• CDSA Level 3+	2006	Macroscopic & Microscopic description; Beneficial and other Bacteria; Yeasts; Parasites (visual detection); Antibiotics/Natural agents sensitivities (bacteria & yeasts only); Digestive, Absorption and Metabolic markers; plus Transglutaminase IgA, Calprotectin, M2PK, H.pylori antigen NOTE: Add on Faecal PCR [2002] for more sensitive parasite detection	Stool Test Kit	\$370.00
• CDSA Level 4	2007	Macroscopic & Microscopic description; Digestive, Absorption and Metabolic markers including PE1; Beneficial & other Bacteria; Yeasts; Parasites (visual & chemical EIA detection); Antibiotic/Natural agents sensitivities (bacteria & yeasts only) NOTE: Add on Faecal PCR [2002] for more sensitive parasite detection	Stool Test Kit	\$340.00
• CDSA Level 4+	2008	Macroscopic & Microscopic description; Digestive, Absorption and Metabolic markers; Inflammation markers; Tumour/Ulcer markers; Beneficial and other Bacteria; Yeasts; Parasites (visual & chemical EIA detection); Antibiotics/Natural agents sensitivities (bacteria & yeasts only) This profile Includes all levels of testing NOTE: Add on Faecal PCR [2002] for more sensitive parasite detection	Stool Test Kit	\$450.00
• CDSA Level 5	2009	Macroscopic & Microscopic description; Beneficial and other Bacteria; Yeasts; Parasites (visual & chemical EIA detection); Antibiotic/Natural agents sensitivities (bacteria & yeasts only) Inc. pH NOTE: Add on Faecal PCR [2002] for more sensitive parasite detection	Stool Test Kit	\$200.00

Genetic Assessments				
CardioGenomic PLUS Profile	8002	SNPs for Apolipoprotein-E (APOE), Cholesteryl ester transfer protein (CETP), Selectin E (SELE), MTHFR, Guanine Nucleotide-binding protein (GNB3), Angiotensin II Receptor-1 (AGTR1), Prothrombin (Factor 2), Leiden (Factor 5), Plasminogen Activator Inhibitor-1 (PAI-1), Glycoprotein 3 (GP3A)	Buccal Swab Kit	\$560.00
DetoxiGenomic Profile	8003	SNPs for Phase I: Cytochrome P-450 (CYP1A1, CYP1B1, CYP2A6, CYP2C9, CYP2C19, CYP2D6, CYP3A4); SNPs for Phase II: Methylation (COMT), Acetylation (NAT1, NAT2), Glutathione conjugation (GSTM1, GSTP1), Oxidative protection (SOD1, SOD2)	Buccal Swab Kit	\$640.00
EstroGenomic Profile	8004	SNPs for Estrogen metabolism (CYP1A1, CYP1B1, COMT, GSTM1, GSTP1), Hypercoagulation (GP3A, PAI-1, Factor 2, Factor 5), Cardiovascular (APOE, MTHFR, TNF α , IL6), Osteoporosis (VDR, TNF α , IL6)	Buccal Swab Kit	\$800.00
ImmunoGenomic Profile	8005	SNPs for Chronic Inflammation (IL1 β), Th-1 Cytokines (TNF α), Th-2 Cytokines (IL4, IL6, IL10, IL13)	Buccal Swab Kit	\$320.00
NeuroGenomic Profile	8006	SNPs for Methylation (COMT, MTHFR), Detoxification (GSTM1, GSTP1), Oxidative protection (SOD2)	Buccal Swab Kit	\$480.00
Advanced Methylation Genes	8009	SNPs for methylenetetrahydrofolate reductase (MTHFR), 5-methyltetrahydrofolate-homocysteine methyltransferase (MTR), Methionine synthase reductase (MTRR), Adenosylhomocysteinase (AHCY), Catechol-O-methyltransferase (COMT)	Buccal Swab Kit	\$280.00

Wellness Genetic Assessments				
Pathway Fit Profile	8011	Profile of over 75 genetic markers known to impact metabolism, exercise and energy use. For improvement of overall health and wellness through positive lifestyle changes. Personalised diet and exercise plan provided.	Genomic Buccal Swab Kit	\$320.00
Healthy Weight DNA Profile	8012	Comprehensive health and wellness genetic profile of nutrigenetic, medication response and a number of common health conditions. Genetically matched diet provided.	Genomic Buccal Swab Kit	\$385.00
Healthy Woman DNA Profile	8013	Comprehensive genetic profile assessing women's dietary and nutritional needs, optimal exercise regimens, potential medication response and a number of common health conditions. Specific weight management plan provided.	Genomic Buccal Swab Kit	\$385.00
Cardiac DNA Profile	8014	Assessment of DNA to identify specific genetic variants associated with an increased risk of developing certain heart related health conditions, as well as medication response to 8 classes of prescribed medications for heart-related conditions.	Genomic Buccal Swab Kit	\$385.00
Cardiac DNA Healthy Weight DNA Profile	8015	Genetic profile incorporating nutrigenetics and a number of common health conditions. Genetically matched diet provided to achieve and maintain a healthy weight and improve heart health.	Genomic Buccal Swab Kit	\$385.00
Mental Health DNA Profile	8016	Pharmacogenomic profile to indicate a patient's response to over 50 psychiatric medications indicated for Major Depressive Disorder, Schizophrenia, Bipolar disorder, epilepsy, seizures, ADHD, anxiety, other neurological disorders.	Genomic Buccal Swab Kit	\$385.00
Pain Medication DNA Profile	8017	Pharmacogenomic profile to identify genetic variants that may affect how a patient responds to 13 commonly prescribed pain medications. Important for appropriate selection and management (inc. opioids, NSAIDs, methotrexate etc).	Genomic Buccal Swab Kit	\$385.00
Skin Fit Profile	8018	Profile of over 70 genetic markers associated with seven key categories of skin Health (Predisposition to Sun-Induced Aging, Dry skin and wrinkle development, skin inflammation and allergy, skin texture and elasticity, skin protection against oxidation/glycation, skin nutritional needs). Personalised skin care treatment and nutritional support provided.	Genomic Buccal Swab Kit	\$320.00
Gluten Fit Profile	8019	Gluten Fit genetics is used to help you understand your patients gluten sensitivity and develop a diet to meet their nutritional needs.	Genomic Buccal Swab Kit	\$385.00

VACUTAINER BLOOD TUBE GUIDE & BLOOD DRAW ORDER

Tube Cap Colour	Tube Name	Relevant Blood Tests
9NC	Sodium Citrate (NaCit)	Fibrinogen
SST	Serum Separator Tube (SST)	Hormones: Cortisol, Cortisol Binding Globulin, DHEAs, E1, E2, E3, Progesterone, Testosterone, Free Testosterone, FSH, LH, Growth hormone, IGF-1, IGF-BP3, HCG, Pregnenolone, Prolactin, SHBG, TSH, free T4, free T3, Reverse T3, Thyroid antibodies; Vitamins: Antioxidants, Copper, Ceruloplasmin, Fat Soluble Vitamins, Folate, Iron studies, Vitamin B12, Vitamin D, Vitamin K; Other: Apolipoprotein A & B, CRP, Electrolytes (UEC), Insulin, Liver Function tests (LFTs), Lipid profile, Cardiovascular profiles, LipoScreen, Oxidised LDL, Lipoprotein (a); AFP, ANA, dsDNA, ENA, RF, Anti-gliadin antibodies, Anti-cardiolipin antibodies, Candida antibodies, Coeliac profile, Cytokines, IgE Allergy panels, IgG & IgA Inhalant panels, Gastrin, Tick-borne Disease serology, PSA, Tumour markers, Zonulin
LH	Lithium Heparin (LithHep)	Amino Acids, Glutathione (Reduced and Oxidised), Histamine, Ubiquinone (CoQ10), Vitamins A B C E
K ₂ EDTA	Potassium EDTA (K-EDTA)	Red cell or whole blood Minerals - Al, As, Cd, Cu, Hg, Pb Red cell or whole blood Metals - Ca, Cr, K, Mg, Na, Se, Zn
K2E	EDTA	AA:EPA, ACTH, Aldosterone, Ammonia, B vitamins, Blood Group, Essential Fatty Acids, ESR, FBE, Glycosylated Hb (HbA1c), HLA DQ/DR, g, MTHFR, Nagalase, Omega 3 Index, Oxidative Damage Markers, SAME, SAH, Selenium (red cell)
FX	Fluoride Oxalate (FI Ox)	Fasting Glucose
