

SX-T3

LEFT/RIGHT FRONT MAIN SPEAKER

The SX-T3 is one of RBH's T System modular speakers. An SX-T3 is essentially an SX-T2 with an additional SX-1010N mounted above the SX-T1 for astonishing dynamic range and bass impact. Capable of producing sound pressure levels rivaling a commercial theater, the SX-T3 is not for the timid. It provides astounding sonic clarity and delivers the ultimate in performance for large-scale music and home theater systems. Another benefit of the SX-T3 is its flexibility with regards to system configuration; allowing for both full-range and LFE configurations for the SX-1010N subwoofers. As with other T System models, the SX-T1 and SX-1010N "modules" are secured together using the included T System clamping brackets. The SX-T3 is currently available in black oak with a satin front baffle.

SX-T3N: A pair of SX-T3N's consists of two SX-T1's, four SX-1010N's, T System clamping brackets and feet.

SX-T3P: A pair of SX-T3P's consists of two SX-T1's, four SX-1010N's, T System clamping brackets, feet, and four SA-400 subwoofer amplifiers (one amplifier to power each SX-1010N).
