Product Guide

# Breathing Easy with Medline

Medline is one of the largest manufacturers and distributors of healthcare supplies, with over 125,000 different items used in hospitals, long term acute care facilities, nursing homes, surgery centers, physicians offices and at home. Among these products are more than 2,000 products designed for patients with a wide variety of respiratory problems. From the neonatal patient in the hospital, to the adult patient at home, our products enhance the life of each patient that uses them.

The Medline Respiratory division includes product specialists and experienced clinicians that understand the challenges of providing respiratory care in every health care environment.

Our goal is to provide the products that will directly improve clinical outcomes of patients around the world and enhance their well-being.

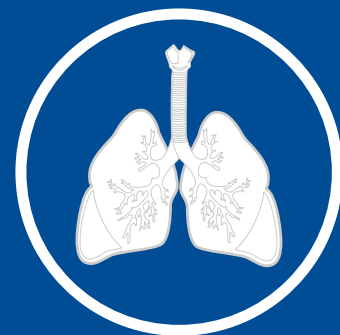

**Improving Clinical Outcomes.** To enable you to deliver the best possible clinical outcomes, we constantly seek out and develop products that have the potential to make positive clinical impacts within respiratory patient populations. Our portfolio spans the continuum of care, from acute to long-term, pediatric to geriatric and facility- to home-based.

**Improved Respiratory Tools.** The needs of the respiratory caregiver and the needs of the respiratory patient are what inspire Medline Respiratory. The knowledge and insights from fellow respiratory professionals help us to continuously improve our products in big ways and small.

**Business and Value-Oriented.** Medline's exceptional product quality and improved patient care is truly affordable. Medline is dedicated to providing products with excellent value and designed to improve patient outcomes. Respiratory products are, and always will be, an integral component of the overall value you have come to expect from Medline.

# OXYGEN & AEROSOL DELIVERY

When a compromised respiratory system can't deliver oxygen, every cell in the body suffers. Doctors prescribe oxygen to bolster respiratory function; Medline provides the innovative products professionals need for respiratory care--the link between an oxygen source and the patient.

See the full listing of our line of oxygen and aerosol delivery products starting on page 22.

# SuperSoft Nasal Cannula

## Fight breakdown on delicate skin

The difference between an ordinary nasal cannula and Medline Respiratory's SuperSoft nasal cannula is immediately noticeable. It's soft, flexible, and non-sticky so it's gentle on ear, cheek and nose skin--all sites where sores can develop with even short-term oxygen use. Help reduce pressure and friction on delicate tissue. Enhance patient comfort and compliance. Try the SuperSoft nasal cannula today.

HCS4514S

- Helps maintain skin integrity on the ears of oxygen therapy patients
- Excellent alternative to bulky foam ear cushions

- New patients are less apprehensive of wearing a cannula
- Existing patients can't believe how comfortable and gentle these are
- Good for compliance.

- Reduce purchasing ear pads
- Reduce cost of ear sore treatments
- Cost effective alternative

## Accessories for concurrent CPAP and oxygen therapy

If any of your oxygen patients are also on CPAP therapy, Medline Respiratory has all the CPAP masks, accessories, supplies and filters to keep the CPAP delivering just what the doctor ordered. We offer oxygen-compatible CPAP products as well as supplies to keep parts clean and fresh and encourage compliance.

HCS4640B

HCS4525V

# Sterile Water for Inhalation

## Help Protect patients from tap water pathogens

Humidified gases make respiratory therapy much more comfortable and keep delicate mucous membranes from drying out. The problem is, ordinary tap water can contain microorganisms. That's why these prefilled humidifiers use sterile water. They're convenient, too.

HCS00300

- Convenient for caregivers and patients
- Compatible with most therapy set-ups
- Sterile water reduces exposure to potentially harmful pathogens in tap water

- Size choices reduce waste
- Made in the USA

# Oxygen Hardware

## Your one-stop supplier for selection and savings

When you're dealing with Medline Respiratory, you're working with a team of experts who understand the subtle differences between different valves, conservers, regulators and flowmeters. It's the combination of expertise, customer service and broad product selection that sets Medline apart from other suppliers.

# Airway Clearance Products

**Hundreds of choices, innovative features,  
ordering support from a team of specialists**

Medline Respiratory suction products are built for the rigors of hospital and home care. Aspirators are rugged and quiet. Regulators are built to tight tolerances for improved accuracy. Knobs and selector switches of Gentec® suction regulators and flowmeters are made with antimicrobial Agion®.\*

HCS7850  
Accommodates 850cc  
or 1200cc canister

- Hundreds of suction regulator configurations meet any requirement
- Agion antimicrobial surfaces

- Industrial high quality for years of reliable service
- Ten-year warranty

- Simpler acquisition: Medline provides both portable and in-wall suction systems, plus parts and accessories

\*Agion's silver antimicrobial additive is EPA registered, and has been certified for its material content, recyclability and manufacturing characteristics. Cradle to Cradle CertifiedCM products meet established standards for human safety, environmental safety and recyclability. This product does not protect users or others against disease-causing bacteria.

# MEDICATION DELIVERY

Delivering medications to the lungs is far more challenging than the straightforward pill or injection. How much of the prescribed dosage is actually being used? Is the treatment regimen being followed? Is the delivery method too hard to use or too inconsistent? Medline Respiratory products are designed to help you—and your patients—meet these challenges.

See the full list of medication delivery products beginning on page 30.

# Aeromist Plus® Nebulizer Compressor

## Powerful, compact and economical

The Aeromist Plus is a workhorse nebulizer compressor and a favorite among patients, facilities and providers. It provides excellent therapy in conjunction with the included one jet nebulizer kit. The small footprint and top handle allow for easy placement on any surface. Non-skid, non-marking feet keep it stable. Washable, reusable filters included to save money. The power cord stores completely inside the case shell, for even greater convenience.

See page 31 for ordering information on our compact, multi-powered, on-the-go compressor and the popular DoggyNeb® pediatric compressors is on page 31.

HCS2GO

HCSDOGNEB

- Compact and easy to use
- Easy to carry and set up
- Can be used horizontally

- Effective treatment delivery
- Easy to teach patient to use

- Free custom labeling program puts name, logo and contact information front-and-center on the device

# Nebulizers & MDI Spacers

## Consistent particle size, consistently better therapy

The VixOne nebulizer produces an ideal particle size--less than 5 microns--for maximum therapeutic effect. It increases the amount of medication that is delivered deep within the lungs. The kit includes a medication cup, tubing and either a mask or a mouthpiece and tee adapter. Highly efficient and latex free, it lets you add medication without opening the medication cup. The standard fittings accommodate most clinical applications.

See page 30 for more nebulizer choices and accessories.

- Effective, efficient provision of the right medication therapy

- Wide selection meets the needs of clinical staff, reduces the need for multiple vendors

HCS4482

## Optimal delivery for better compliance

Offer your patients a simple and economical way to improve the effectiveness of their inhaler by delivering more medication directly to the lungs. It also helps avoid some of the unpleasant taste of inhaled medications. Medline Respiratory offers several models including some with mask interfaces. You'll find the right one for your patient.

- Simplifies inhaler use
- Intuitive for patients
- Better medication delivery

- Reduces medication deposition on the tongue
- Encourages compliance

# Peak Flow Meters

## Bring predictability to patients' lives

Medline Respiratory's range of purse-or pocket-size peak flow meters starts at the most basic and goes up to electronic digital units. All help patients measure their own at-the-moment lung function that can help predict asthma attacks before they occur, so preemptive therapy can be started.

See page 32 for ordering information for our windmill trainer.

- Windmill trainer adds fun and helps educate
- Great for those with language barriers

- Green/yellow/red zones make it easy for patients to see their lung function
- Gives patients the power to better manage and control asthma symptoms

# PATIENT MONITORING

Modern medicine needs accurate patient data to make appropriate diagnoses and treatment plans. For respiratory conditions, blood oxygen saturation—either for a single moment or over time—is one of the most critical data elements. Pulse oximeters from Medline Respiratory deliver quick, accurate data in a variety of patient situations.

See page 32 for patient monitoring product ordering information.

# Hand-Held Pulse Oximeters

## Extended or spot O2 monitoring in a compact unit

Roughly the size of a smart phone, these hand held units capture SpO2 data which can later be downloaded to a computer for electronic charting. Each unit holds multiple readings for multiple patients. While both work for spot-checking, the HCSPM60 works as a continuous monitor, too, especially useful for sleep labs and home use where a bulky monitor is cumbersome. It can hold up to 96 hours of trending data for a single patient.

- Use reusable probes for most patients or disposable probes when cross-contamination is an issue

- Highly accurate
- Easy-to-use
- Versatile: continuous or spot

# Disposable and Reusable Probes

## Our probe selection makes one-stop shopping easy

Medline Respiratory has the right oximeter probe for a variety of pulse oximeters in the market, whether it be a hand-held or a table top, including the popular 7-pin Nellcor® and 9-pin BCI® layouts. Our knowledgeable staff will ensure you get the right probe for your needs.

Probe choices address your unique requirements. For example, Transpore® probes are transparent to allow visualization of the underlying skin, and Microfoam® repositions easily to help maintain skin integrity. Medplast™ provides maximum adhesive for a secure fit. Soft silicone boots on reusable models accommodate larger fingers and aren't disrupted by moderate patient movement.

# TRACHEOSTOMY MANAGEMENT

A ventilator setup is only as strong as the weakest link. Often, that link is the connection between the ventilator circuit and the tracheostomy tube.

When there's a disconnect from the ventilator, alarms sound, staff drops whatever they're doing to investigate, patients become scared, hypoxic (or worse) and family caregivers are subjected to undue stress.

The Phoneris® Inner Cannula and AeroFlex® Ventilator Connector system is one of the most innovative ways to help Prevent Disconnect™. They help keep ventilator circuits safe and secure for patients, simple and complete for caregivers.

See page 34 for complete tracheostomy product ordering information.

# Phoneris® Inner Cannula and AeroFlex® Ventilator Connector

## Prevent disconnects—save time and lives

Phoneris Inner Cannula and AeroFlex Ventilator Connector use an exceptional design to connect patients to their ventilator. Compatible with Shiley® DCT and DCFS, it helps reduce accidental disconnects—one of the most serious and common issues for ventilator patients.

- **Safer.** The positive-click connection is a secure solution to the clinical problem of accidental disconnects and offers peace-of-mind to patients, caregivers and family.
- **Gentler.** AeroFlex swivels and flexes to help reduce torsion and pressure on the tracheostomy tube and stoma. The flush taper design makes suctioning less traumatic, too.
- **Easier.** Longer, more flexible wing clips provide an audible and visual assurance of a secure connection. The AeroFlex disconnects with a simple twist.

Phoneris System  
HCSTIC8 & HCSTIC4681

- FDA cleared anti-disconnect device, unlike rubber bands
- Fewer unplanned disconnections for patient safety
- Fewer ventilator nuisance alarms for staff efficiency

- Stresses prevention of loss of PEEP
- Reduces incidents that cause patient and family anxiety
- Compatible with Shiley trach tubes

## Heat and moisture management

Noses come in all shapes and sizes and so do Medline HMEs and HMEFs. Humidifying and filtering air is like an “artificial nose”, our full range of high quality HMEs and HMEFs satisfy all your needs. They are independently tested.

# RESUSCITATION

The word resuscitate comes from the Latin word that means reawaken. Resuscitation can be one of the most dramatic and intense activities in healthcare.

You need a manual resuscitator that is configured to work properly for you. With over 30 choices, Medline Respiratory resuscitation bags are designed to do the job you need them to do.
