# Flick'em Up! DEAD OF WINTER

After searching every corner of the city, Rosa and Kevin head back to rejoin the group. The canned food they gathered should be enough to keep them going for the foreseeable future. Discussing plans for the colony, they fail to hear the intensifying low moan, and suddenly, they are met with a horde of zombies. They're blocking the way. There's no choice but to fight!

Welcome to the world of *Flick'em Up! DEAD OF WINTER*. Its beautiful components and immersive scenarios will transform your table into the post-apocalypse wasteland of a zombie invasion.

You and your friends will search high and low to gather resources and weapons to survive the trials ahead. Danger lurks everywhere, but you must put your fears to rest and confront the dead while you still can.

Yet, zombies aren't the only threat you'll face, as yours isn't the only group fighting for survival. Unfortunately, there's just no reasoning with them. Living or dead, it's eat or be eaten.

## MATERIAL

18 ZOMBIES  
(with stickers)

11 SURVIVOR FIGURES  
(with stickers)

11 BACK PACKS  
(with stickers)

11 SURVIVOR BOARDS

### 4 VEHICLES

1 CAR

1 ICE CREAM TRUCK

1 RV

1 PICKUP TRUCK

### 6 BUILDINGS

1 GROCERY STORE

1 POLICE STATION

1 LIBRARY

1 GAS STATION

1 HOSPITAL

1 SCHOOL

### VARIOUS TOOLS

1 TIME MARKER

1 ACID

1 SHOTGUN  
TEMPLATE

1 SNIPER RIFLE  
TEMPLATE

2 BARRICADES

3 STREET LAMPS

4 CITY LIMITS  
(in 2 parts each)

### DANGEROUS DAYS AND NIGHTS!

Change the zombie tower's day and night markers to the next higher markers available.

#### NEW CLAN

In order win, you must join a clan. To do so, enter a building occupied by exactly one survivor. You immediately join the clan of that survivor, and share the objective of that clan.

**SECRET!**

## 63 CARDS

- 7 FIGHT CARDS
- 30 CROSSROADS CARDS
- 20 OBJECTIVE CARDS
- 6 BETRAYER'S OBJECTIVE CARDS

## 1 ZOMBIE TOWER

(in 3 parts + 8 set of screws)

 x 8

 x 8

ROOF SUPPORT

ZOMBIE BIN

## 102 TOKENS

- 40 life
- 6 "not allowed"
- 4 survivors
- 8 foods
- 8 fuel
- 8 medicine
- 1 pretzel
- 4 guns
- 2 baseball bats
- 2 knives
- 2 shot guns
- 2 snipers
- 6 crossroads
- 1 key
- 4 zombies
- 2 extra actions
- 2 flares

## 37 OTHER PIECES

- 14 support blocks
- 3 barrels (with stickers)
- 3 boxes (with stickers)
- 1 white movement disc (with sticker)
- 2 black bullets
- 6 small white bullets
- 1 baseball bat
- 1 knife
- 6 stands

# ASSEMBLY

## ZOMBIES

Stickers on both sides

## MOVEMENT DISC

One sticker on one side.

## BARRELS

One sticker per barrel

A- Sticker on one side

## SURVIVORS

B- Backpack on the other side

NOTE: Each survivor is numbered. Attach the corresponding backpack.

## BOXES

Stickers on each side.  
One number per box.

## VEHICLES

(except RV)  
Slot into a plastic stand

## BUILDINGS AND RV

Add 2 support blocks

## CITY LIMITS

Assemble the two parts

## CITY LAMPS

Slot into a plastic stand

# ZOMBIE TOWER

A- Build the tower.

B- Build the bin.

C- Assemble A + B

## THE WORLD HAS CHANGED!

It's high time you got used to it. The world you once knew is no more. All that's left is a sprawling wasteland ravaged by hordes of zombies. You can run. You can even hide. But the only way to survive this mess and create a new future for the human race is to face the problem head on. You're going to have to take chances and trust your instinct. Your survival depends on it!

### BEFORE PLAYING

Before playing, you must choose:

- A playing surface
- A scenario
- Your teams (scenarios 6 - 10)

### PLAYING SURFACE

*Flick'em Up!* **DEAD OF WINTER** can be played on most flat surfaces, big or small: table, floor, etc. The surface you choose must allow the pieces to slide well and be accessible from all sides. The surface must have sufficient space to place all the necessary pieces.

The 4 **city limits** markers define the space in which the game is played, otherwise referred to as the city.

### CHOOSE A SCENARIO

You will find a booklet of 10 scenarios, each of which provides an original adventure and a new city for you to explore.

Each scenario is explained in detail, including any additional rules required to enjoy the adventure.

## SURVIVORS

Each survivor has their own board which matches their plastic figure and backpack number. This board displays the contents of their backpack, otherwise known as their inventory. This inventory is divided into a number of spaces.

- Each survivor has a default weapon which may not be covered, unless a scenario or Crossroads card instructs the player to do so.
- Each survivor's life points are stacked on the top right space of their inventory.
- Each survivor has 2 additional inventory spaces they may use to store other tokens, such as weapons, scenario tokens, etc.

### TEAM(S)

Place the survivor boards in a group outside of the city limits. If there is more than one team of survivors, place the survivor boards in separate groups, ideally on opposite sides of the city.

#### 1 TEAM

#### 2 TEAMS

##### TEAM A

##### TEAM B

Vs.

## OVERVIEW OF A GAME

### ROUNDS

Each game of *Flick'em Up! DEAD OF WINTER* consists of a number of rounds, depending on the chosen scenario.

Each round represents half a day (either day or night), and is tracked on the camper's awning.

Each round consists of a number of turns. Each turn, an available survivor will be used.

#### A turn:

- 1- Use an available survivor belonging to your team (p. 6).
- 2- Execute the zombies' reaction (p.10).

When no available survivors remain, the round ends. Prepare for a new round (p. 11).

### BACKPACKS

Each survivor has their own rotating backpack which indicates whether or not the survivor is **available** to be used in the current round.

A survivor is **available** to be used when the color on the top of their backpack matches the current round.

**NOTE:** If you are unable to see a survivor's backpack (fallen / in a building), turn or flip the survivor so that their backpack is visible.

### USING A SURVIVOR

The active player chooses an available survivor and stands it up if it is fallen. The chosen survivor is now the active survivor.

The active survivor may perform up to 2 of the following actions:

- Move
- Use a weapon
- Take / Drop Off

A player may choose to perform the same action twice. It is also possible for the player to choose to perform only one action, or even none at all.

Regardless of how many actions the player performs, once their turn is complete, they must rotate the backpack of the used survivor. This survivor is no longer available for this round.

### LOSING LIFE

A survivor may lose life tokens during the game for different reasons (like in a *Zombie Rush* p. 11).

When a survivor loses their last life token:

- The survivor is removed from the game.
- Any tokens on the survivor's board are placed face up in the grocery store.

## THE FLICK

Most of your actions involve flicking, as that is how survivors both move and shoot.

A 'flick' is performed as illustrated below, with a finger but without the resistance of your thumb (weaker, but more controlled than a standard 'flick').

## MOVE

Once a player has chosen to move a survivor, he replaces the survivor figure with the movement disc (line on top). The player then attempts the movement by flicking the movement disc (as described above).

If the disc:

- A** does not touch any object, figure, or building, or leave the city limits:
  - The movement is successful. The survivor figure replaces the movement disc on the table.

- B** touches any object, figure, or building, or leaves the city limits:
  - The movement is unsuccessful.
  - The survivor figure is returned to the position it occupied before the movement flick.

If moving is the player's last action, the survivor must be oriented in the direction of the movement disc's orientation line. Otherwise, the survivor may be oriented in the direction of the player's choice.

Any object disturbed by the movement disc are returned to the position they occupied before the movement flick.

## TOO CLOSE!

Any survivor figure standing next to a standing zombie (within the space of a movement disc) immediately loses 1 life token and is placed fallen on the table.

**EXCEPTION:** The active survivor is immune to this rule during their turn (e.g.: between their two actions).

## ENTERING AND EXITING A BUILDING

Door zone

A building's door is an invisible line that is flush with the front facing edges of that building's support blocks.

To mark that a survivor has entered a building, it's figure is placed on either of that building's support blocks.

To exit a building, a player must place the movement disc behind the building, and flick the movement disc through the building's door.

A building is successfully exited when the entirety of the movement disc has exited the building's door.

All movement rules apply (e.g. touching objects, figures, etc.) when entering or exiting a building, with one exception: touching the support block of the building the movement disc enters or exits is allowed.

**NOTE:** If a building's entrance is blocked by an object, that object may be temporarily set aside during an attempt to enter or exit the building.

**NOTE:** The Camper follows the same rules as buildings. Survivors may enter and exit the Camper as they would any other building.

## USING A WEAPON

Each survivor starts each scenario with at least 1 weapon. It is possible to gain additional weapons during the game.

Here are the 3 most common weapons:

## GUN

To fire a gun, a player places a bullet (black disc) to the left or right of the active survivor, at a distance of one bullet.

The player then flicks the bullet at the target of their choice (as described above).

**If the bullet:**

- A** **First** touches an object, a building, a fallen figure, or a standing figure that does not fall:
  - All figures and objects remain in their new position.
  - All objects that fell as the result of the flick are returned to a standing position.
- B** **First** touches a figure and causes it to fall - **the figure is wounded**:
  - If it is a **zombie**, it is placed in the zombie bin.
  - If it is a **survivor**, it remains fallen and loses 1 life token.
  - All other figures and objects that fell as a result of the bullet are not affected. They remain in their new position and are returned to standing
- C** Touches nothing:
  - Nothing happens. The action is lost.

## SHOOTING WITH 2 GUNS

If a survivor has 2 or more guns, they may shoot 2 bullets with the same action. To do so, the player places a bullet on each side of the survivor and flicks them one after the other, according to the rules above. The two bullets may be shot at the same or different targets.

**NOTE:** A survivor with 3 guns may not shoot 3 times.

## SHOOTING FROM INSIDE A BUILDING

A survivor may fire a gun from inside of a building at targets outside of the building. To do so, the player places the bullet behind the building and fires it between the 2 support blocks of the building. All rules regarding the shoot action apply in the same manner as described above.

**NOTE:** A survivor may not fire a gun from inside of a building occupied by one or more zombies.

## BASEBALL BAT

The baseball bat can be used to quietly knock over a zombie or enemy survivor while moving. It does not cause figures it touches to become wounded, however it does make less noise than a gun (explained later).

To use the baseball bat, the player replaces their survivor figure with the baseball bat, flat on the table, pointed in the direction of their choice. Then, the player flicks the knob (bottom of the handle) of the baseball bat towards the target of their choice.

**NOTE:** The knob may be flicked so that the bat moves straight forward or so that it spins as it moves.

If the bat:

- A** first touches a zombie or enemy survivor:
  - The movement is successful, regardless of whether or not the touched figure falls.
  - All other components that fell as a result of the flick are returned to standing.
- B** first touches an object, building, or friendly survivor:
  - The movement is unsuccessful, and the active survivor is returned to the position it occupied before the flick.
  - All components that fell as a result of the flick are returned to standing.

If using the baseball bat was a survivor's last action, the survivor must be oriented in the direction of the bat's length. Otherwise, the survivor may be oriented in the direction of the active player's choice.

**NOTE:** Causing a zombie to fall is advantageous, as it will prevent it from participating in a future Zombie Rush. However, causing an enemy survivor to fall only prevents it from being wounded.

## ENTERING OR EXITING A BUILDING

A player may enter/exit a building by using a baseball bat. The rules for doing so are identical to those for using a movement disc.

## KNIFE

The effect of throwing a knife is almost identical to that of firing a gun. However, instead of flicking a bullet, you flick the knife. It also makes less noise than a gun (explained later).

To use a knife, the player stands the knife upright to the left or right of the active survivor at a distance of one bullet.

The player then flicks the knife at the target of their choice.

The rules for throwing a knife are otherwise identical to firing a gun (see page 8).

## SHORT DISTANCE KILL

Any weapon can be used at short distance to kill a zombie. If the active survivor is next to a zombie, you may spend 1 action to kill the zombie without flicking a weapon.

**NOTE:** This counts as using the weapon, for the purpose of determining the zombies' reaction (page 10).

## TAKE / DROP OFF

When inside of a building, the active survivor may spend an action to take and/or drop off a token (weapon, food, fuel, medicine, etc.).

**TAKE:** Choose a token on the building's support block and add it to the active survivor's inventory.

**DROP OFF:** Remove a token in the active survivor's inventory and place it on the building's support block.

**NOTE:** You may exchange tokens by taking a token and dropping off a token in a single action.

When a survivor takes a face down token, they look at it and decide whether to add it to their inventory or to leave it off face up in the building. In either case, only one action is spent.

# ZOMBIES' REACTION!

Once a player has completed all the actions they wish to perform with their chosen survivor, they must execute the zombies' reaction, if any. The zombies' reaction depends on the loudest type of noise made by the survivor's actions. Only one of the following zombie reactions should be executed. Determine the survivor's loudest action and execute the corresponding zombie reaction.

## SURVIVOR ACTION

## ZOMBIE REACTION

If the survivor made a **LOUD** noise (whether successful or unsuccessful):

Fired any type of gun

- Turn the closest standing zombie, if any, to face the active survivor. Place the zombie tower directly behind that zombie. (Image 1)
- Remove that zombie, plus 2 more (the 2 standing zombies closest to the active survivor, if any) for use in the Zombie Rush. (Image 2)
- Stand all zombies remaining in the city. (Image 3)
- Execute the Zombie Rush (see page 11).

If the survivor made a **QUIET** noise (whether successful or unsuccessful):

- Used a non-gun weapon
- Moved

If the **zombie closest** to the active survivor is...

### FALLEN:

- Stand that zombie. (no Zombie Rush)

### STANDING:

- Turn the closest standing zombie to face the active survivor and place the zombie tower directly behind that zombie.
- Remove that zombie from the city for use in the Zombie Rush.
- Execute the Zombie Rush (see page 11).

If the survivor was **SILENT**:

- did not perform any movement or weapon actions.

- None

## IMPORTANT:

- The zombie bin always stays in the position illustrated in the scenario. This component doesn't move with the zombie tower.
- The zombie tower is designed to be placed over top of most game components without needing to move them. However, if a component (building, etc.) would the tower, simply set that component to the side for the duration of the Zombie Rush.
- If there is a building between the newly positioned zombie tower and the active survivor, rotate the tower so that its exit faces the side of the building closest to the active survivor).

## ZOMBIE RUSH

Follow these 3 steps to perform the rush.

1

Ensure the roof support is in place.

2

Pick up the zombie (s) being used for the rush and place it on the roof, according to its number. If the number is occupied, place it on the number of your choice.

3

Remove the roof support to execute the Zombie Rush.

### After the Zombie Rush:

- Each survivor that fell as a result of the Zombie Rush loses 1 life token, regardless of which figure or object caused them to fall.
- All objects that fell during the Rush must be returned to standing, in their new position.
- All zombies simply remain in their new position.
- All figures pushed outside of the city must be placed just inside of the city limits (approximately where they left the city) in a fallen position.
- Finally, return the zombie tower to its home on the top of zombie bin.

## ZOMBIES ENTERING A BUILDING

It is possible for zombies to enter a building during the game:

A zombie may only enter a building if both of the following are true:

- At least one survivor or token is inside.
- Fewer than 2 zombies are inside.

A zombie enters a building when:

- any part of a fallen or standing zombie has entered a building's door.
- a standing zombie is within a movement disc's width of a building's support block (i.e. a movement disc will not fit between the zombie and a support block).

## END OF THE ROUND

When there are no more survivors whose backpack color matches the current round color, the round ends and a new round begins.

To prepare for the next round, perform the following:

- 1- Move the day marker forward one space on the RV's awning. If the marker reaches the skull, the game ends. Otherwise, proceed to step 2.
- 2- Stand all zombies currently in play.
- 3- Add new zombies to the city (as described below).

## A NEW HORDE ARRIVES!

Before each day begins, a number of zombies equal to the zombie bin's daytime invasion marker. Likewise, before each nighttime invasion marker, a number of zombies equal to the night token must be added to the city. These new zombies will arrive by way of a Zombie Rush.

### To add new zombies to the game:

- Ensure the zombie tower is in its home position on top of the zombie bin.
- Take a number of zombies equal to the corresponding invasion marker on city. These new zombies will arrive by way of a Zombie Rush.
- Execute the Zombie Rush.

If there are not enough zombies in the zombie bin to add the required number of zombies, the game ends immediately. The city has been overrun and the survivors have lost.

## GAME END

The game ends when:

- A group of survivors completes their objective – that group of survivors wins!
- A certain number of survivors are dead (scenario specific) – the survivors lose.
- There are not enough zombies in the zombie bin to add the required number of zombies – the survivors lose.
- The round marker reaches the skull - consult the scenario to find out who wins/loses.

## GLOSSARY

---

**STANDING:** Any figure that is on their feet.

**FALLEN:** Any figure that is lying on its side on the table.

**IN THE CITY:** Any and all space within the designated city limits.

**IN A BUILDING:** Any component on the support blocks of a building is IN that building.

**ACTIVE PLAYER:** The player whose turn it is.

**ACTIVE SURVIVOR:** The survivor being used by the active player.

**DOOR:** An invisible line flush with the front facing edges of a building's support blocks.

**FIGURE:** All plastic figures (survivors, zombies).

**OBJECT:** Obstacle components such as barrels, cars, city lights, boxes, etc.

**FRIENDLY SURVIVOR:** A survivor belonging to the same team.

**NEXT TO:** Components less than the width of movement disc apart are considered NEXT TO one another.

# SCENARIOS

# THE SCENARIOS

This section of the booklet contains 10 original scenarios to play and replay as written, or modified to include your own personal touch.

If this is your first time in this zombie infested world, we suggest enjoying the scenarios in numerical order.

If you're an experienced survivor, we encourage you to use the various components of *Flick 'em up! DEAD OF WINTER* to modify the existing scenarios and to create your own so that you can share them with others!

Modifying a scenario is simple. For example, you can replay a scenario and change the following:

- use a different team of survivors
- give special powers to some or all of the survivors (flip their survivor's tile)

We invite you to share your scenarios, cities, and other ideas with us at this address: [coolideas@pretzelgames.com](mailto:coolideas@pretzelgames.com).

Each scenario includes the following information:

- The storyline
- Which survivors to use
- The number of life tokens
- The objective(s)
- A map of the city
- Setup instructions
- Where the day/night marker begins
- Game end conditions
- Additional rules for the scenario

Pay special attention to the additional rules introduced in these scenarios, as they add to those provided in the rule book. We also suggest playing the scenarios in order, as the later scenarios use rules that are introduced in earlier ones. Some additional rules have a symbol associated with them so you can easily note whether or not that rule is in effect in a later scenario.

**SET UP**

Ready the survivors presented in this section.

**NEW RULES ICONS**

Backpack starting position

Round marker starting position

Number of zombies added each day/night

Number of zombies that begin in the zombie bin

**Buildings:** POLICE STATION, LIBRARY, HOSPITAL, GROCERY STORE, GAS STATION, SCHOOL

**Vehicles:** RV, ICE CREAM TRUCK, TRUCK, CAR, ZOMBIE TOWER

**Materials position:** On the support block, In front of the building

**Icons:** Zombie, Survival, Markers face down, City limits, Street lamps, Barrel, Box, Barricades

**Item Icons:** Fuel, Foods, Guns, Survivors, Knives, Crossroads, Key, Zombie, Medicine, Life, Snipers, "not allowed", Baseball bats, Shot guns, Pretzel

## COOPERATIVE

S1 - Get Outta Town!	(1 to 10 players)	p. 16
S2 - They're Everywhere!	(1 to 10 players)	p. 18
S3 - Tend to the Wounded	(1 to 10 players)	p. 20
S4 - Starvation	(1 to 10 players)	p. 22
S5 - Separated	(1 to 10 players)	p. 24

## COMPETITIVE

S6 - Tensions Rise!	(2 to 10 players)	p. 26
S7 - Cornering the Market	(2 to 10 players)	p. 28
S8 - Strength in Numbers	(2 to 10 players)	p. 30
S9 - Home	(6, 8 or 10 players)	p. 32
S10 - At Each Other's Throats	(6, 8 or 10 players)	p. 34

## WAYS TO PLAY

**Flick'em Up! DEAD OF WINTER** may be played by 1 to 10 players.

There are 2 different ways to play:

### COOPERATIVE:

All players belong to the same group of survivors. The players must determine the turn order: first player, second player, etc. On a player's turn, they may choose to use any available survivor to execute their turn. Once each player has had a turn, play continues from the beginning of the turn order (i.e.: the first player).

### COMPETITIVE:

Each team must determine their own team's turn order. The first player of the team holding the pretzel takes the first turn of the game, followed by the first player of the opposing team. Turns alternate between teams, with each team following their own team's turn order. Players are divided into 2 or more teams. The number of players per team does not matter.

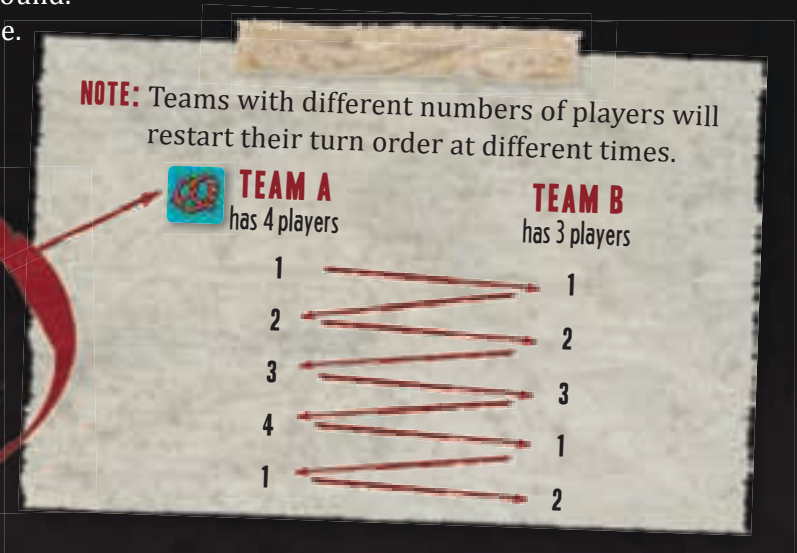

Before beginning the game, players must determine their turn order, as described above.

The survivor whose inventory holds the pretzel must be used first in each round.

The pretzel may change hands from one survivor to another during the game.

If the survivor holding the pretzel loses their last life token, the pretzel is given to the closest remaining survivor (of either team).

Each new round is started by the team holding the pretzel.

1

# GET OUTTA TOWN!

1 - 10 players

Your group of survivors has to leave the city as quickly as possible!

The zombies in the streets are few for the moment, but your scouts have discovered a horde of them are headed for your camp.

You're going to have to clear a path so that you can drive the RV straight outta town.

## OBJECTIVE

Have a survivor in the RV and have 3 or fewer zombies in the city.

## SPECIAL RULES

Survivors can not enter buildings. Zombies can not enter buildings or the RV.

The first survivor to enter the RV becomes the driver.  
The driver is not available to be used for the remainder of the scenario.

## INSTANT DEFEAT

If a zombie touches the RV or either of its support blocks, the survivors lose immediately.

## GAME END

The survivors win if they complete their objective.  
The survivors lose if 3 or more survivors are dead or if the round marker reaches the skull.

The game board is a dark blue map of a town with various buildings and vehicles. Buildings include a Police Station, Library, Hospital, School, Gas Station, and Grocery Store. Vehicles include a Car, Ice Cream Truck, and a Truck. A Zombie Tower is located at the bottom center. The RV is positioned in the upper right. There are several zombie icons scattered throughout the town. A skull icon is located in the bottom right corner of the map area.

### SET UP

- 2 Anita
- 2 John
- 2 Thomas
- 2 Loretta
- 2 Kevin

### NEW RULES

- Skull icon
- Skull icon
- RV icon
- 2 1/2 icon
- Skull icon x 4
- +2 icon
- +3 icon

## NEW RULES

### SHOTGUN

When shooting with the shotgun, the player must use the shotgun barrel.

To use a shotgun:

- Place the shotgun template next to the active survivor, on their left or right, and orient it in the direction you wish to shoot.
- Place 4 shotgun bullets (1/2 the size of the normal bullets) in the barrel so that they are not perfectly aligned with each other (see illustration).
- Hold the template and shoot!

Injuries:

- Any figure (zombie or survivor) knocked over by a shotgun bullet is wounded, even those hit by a ricochet.

### SNIPER RIFLE

Like the regular gun, but with better aim. Perfect for shooting at distant targets.

To use a sniper rifle:

- Place the sniper rifle template next to the active survivor, on their left or right, and orient it in the direction you wish to shoot.
- Place a bullet in the template, hold the template, and shoot!

# 2

# THEY'RE EVERYWHERE!

1 - 10 players

You've run out of resources. You're going to have send a group of survivors to explore the surrounding area in order to secure food and fuel. It's not going to be easy. The city is crawling with zombies. But as Rosa always says, "We can either die crying or die trying!"

## OBJECTIVE

Have 2 gas and 2 food in the RV.

## GAME END

The survivors win if they complete their objective. The survivors lose if 3 or more survivors are dead or if the round marker reaches the skull.

## SET UP

Shuffle the following tokens face down:

Place 1 face down token in each of the following buildings:  
School, Hospital, Police Station, Library.

### SET UP

- 3 Elijah
- 3 Lily
- 3 Mike
- 2 Rosa
- 3 John

### NEW RULES

- 
- 
- 
-

## NEW RULES

### FIGHT: SURVIVOR VS ZOMBIE

A fight between a survivor and a zombie happens when:

- A survivor enters a building containing at least one zombie (fallen zombies stand up when a survivor enters the building they occupy).
- A survivor in a building containing at least one standing zombie wishes to perform an action (take an object, move, etc.).

### FIGHT

Stage the fight outside of the city limits:

1. Place the survivor and the zombies facing each other, 75-90 cm apart.
2. Shuffle the zombie fight cards to create a face down movement deck.
3. The survivor chooses a weapon to use during the fight (the rules for resolving fight depend on the type of weapon the survivor uses).

### USING A GUN OR KNIFE:

Each round of a fight consists of two steps: the survivor attacks, then the zombie moves.

#### 1. THE SURVIVOR ATTACKS:

Flick the bullet or knife at the zombie.

If the flicked weapon causes the zombie to fall:

- The zombie is returned to the zombie bin, and the fight ends immediately. Otherwise...

#### 2. THE ZOMBIE MOVES:

Reveal the top card of the fight deck, place it in front of the zombie, and execute the corresponding action.

**WALK:** Move the zombie to the opposite end of the card. The survivor shoots again.

**ATTACK:** The fight ends immediately. The survivor loses 1 life token and may not perform any further actions this turn.

### 2 VS. 1

The above rules apply. Place the 2 survivors or 2 zombies side by side, at least 10cm apart.

Additional rules:

- A pair of zombies walk together. Each movement card indicates the action of both zombies.
- Survivors use their weapons one after the other.
- The fight continues until only survivors or zombies are left standing.

If you fight 2 zombies and only have a baseball bat... good luck!

### USING A BASEBALL BAT:

Place the baseball bat on one side of the table, and the zombie on the opposite side.

When using the baseball bat, each round of a zombie attack consists of one of two actions: Wait OR Attack the zombie.

#### 1. WAIT

Reveal the top card of the fight deck, place it in front of the zombie, and execute the corresponding action.

**WALK:** Move the zombie to the opposite end of the card. The survivor chooses to Wait or Attack the zombie.

**ATTACK:** The fight ends immediately. The survivor loses 1 life token and may not perform any further actions this turn.

#### 2. ATTACK THE ZOMBIE

Flick the baseball bat at the zombie.

If the zombie falls, place the fallen zombie on one of the building's support blocks. The zombie attack ends immediately.

Otherwise, the survivor falls and loses 1 life token.

ATTACK

WALK

# 3

# TEND TO THE WOUNDED

1 - 10 players

You can hear a fellow survivor in distress! But where are the shouts coming from? It's hard to know for sure given the chaos in the streets. Your group has launched a rescue operation.

Quickly - find the wounded survivor and bring her to what remains of the hospital. It's not what it used to be, but it should have everything you need to tend to the wounded... if you can find her in time.

## OBJECTIVE

Escort the wounded survivor to the Hospital with no zombies inside.

## SET UP

Shuffle the following tokens face down:

Place 1 token face down under each vehicle.

Place 1 token face down in each building except the Hospital.

## SPECIAL RULE

The wounded survivor, Anita, cries in pain as you escort her through the streets. Each action performed by the survivor escorting Anita is considered to be a **LOUD** noise when determining the zombies' reaction. Anita, the wounded survivor, has only 2 life tokens.

## GAME END

The survivors win if they complete their objective. The survivors lose if Anita dies or if the round marker reaches the skull.

The game board is a dark blue map with a grid of streets. Buildings are represented by dark blue shapes with labels: CAR, GAS STATION, GROCERY STORE, SCHOOL, ICE CREAM TRUCK, LIBRARY, TRUCK, HOSPITAL, POLICE STATION, RV, and ZOMBIE TOWER. Vehicles are represented by green shapes with labels: CAR, GAS STATION, GROCERY STORE, SCHOOL, ICE CREAM TRUCK, TRUCK, and HOSPITAL. Tokens are represented by small icons: 1X car, 1X gas station, 2X grocery store, 2X school, 2X hospital, and 1X zombie. A red arrow points to the ZOMBIE TOWER. A skull icon is located in the bottom right corner of the map.

### SET UP

- 3 Gabriel
- 3 Mike
- 3 Olivia
- 3 Thomas
- 3 Kevin

### NEW RULES

- 
- 
-

## Special Rules

### RESCUING ANITA

When a survivor reveals the survivor token, they immediately become Anita's escort. Place the revealed token next to the survivor's name on their survivor board. Place Anita on the building's support block with her escort.

### TAKE, DROP, EXCHANGE IN THE CITY (VEHICLES, BARRELS, BOXES, ETC.)

A survivor may perform a take, drop, or exchange action to move tokens to or from an object (vehicle, barrel, box, etc.) in the city. To do so, the survivor must be within a movement disc's width of the object they wish to interact with. The rules for doing so are otherwise identical to the rules for Take / Drop / Exchange.

## NEW RULES

### RESCUED FIGURE

A rescued figure moves with its escort. While in the streets, the rescued figure must be positioned within a movement disc's width of its escort at all times. As such, after the escort completes a move action, the rescued figure must be repositioned. If the escort enters a building, Anita is placed in the building, too.

If the escort falls for any reason, it and the rescued figure become separated. The nearest standing survivor becomes the new escort. Reposition the rescued figure next to its new escort, and move the survivor token to the new escort's survivor board. If there is no standing survivor in the rescued figure's vicinity (the street, same building, etc.), the rescued figure remains in its position, and the survivor token is placed to the side for now. The next survivor to end its movement next to the rescued figure becomes its new escort.

# 4

# STARVATION

1 - 10 players

*There is nothing to eat, and morale is the lowest it's ever been. But, you may have gotten lucky. Rumor has it that the Grocery store in the next town over still has plenty of canned food. The trouble is getting to it, as the shop seems to have been boarded up. Those barricades were likely meant to keep the zombies at bay, but now they're just keeping you from eating. One thing is clear, if you don't eat by nightfall, you won't be able to fend off the hordes, and you'll become food yourself.*

## OBJECTIVE

Bring 4 food to the RV.

## SET UP

Place 2 barricades in front of the Grocery store's door and 4 food tokens in the Grocery store.

Shuffle the following markers face down:

Place 1 face down in each building, except the Grocery store.

## SPECIAL RULE

When the round marker reaches 2 and 1, the group must decide to eat or go hungry. To eat, discard a food token from one of the survivor's inventories. If you are unable to do so, or choose not to, the group goes hungry: each survivor loses 1 life token.

## GAME END

The survivors win if they complete their objective. The survivors lose if 3 or more survivors are dead or if the round marker reaches the skull.

### SET UP

- 3 Elijah
- 3 Lily
- 3 Rosa
- 3 Loretta
- 3 John

### NEW RULES

- VS (Zombie vs Survivor)
- Skull (Game End)
- 3 (Round Marker)
- 5 (Food Tokens)
- +5 (Morale)

## NEW RULES

### BARRICADES

A barricaded building can not be entered. A building is considered barricaded as long as one or more barricade tokens block any portion of the building's entrance.

Players may attempt to remove barricades from play by using the move or use a weapon actions to flick various discs and weapons at the barricade tokens.

Barricade tokens are removed from the game once they no longer block the entrance (i.e.: no portion of the barricade token occupies the space between the building's support blocks).

If a movement disc or baseball bat causes the last of a building's barricades to be removed, the active survivor enters the building. Otherwise, the survivor is returned to the spot they occupied before the flick, as normal.

Any action where a flicked component touches a barricade token is considered to have made a **LOUD** noise.

**EXCEPTION:** You may not attempt to remove barricades from behind a building.

# 5

# SEPARATED

1 - 10 players

*It's been days now since anyone in the group last saw a zombie. It's an unfamiliar peace that lets you feel relaxed for the first time in months. But when the group's mood lifts, its guard begins to fall. You and the others crack jokes while searching for fuel and other supplies in a small, but seemingly deserted town. But it's far from deserted. Your carelessness allows a horde of zombies to separate the group, and you're brought crashing back to reality. Get the fuel you need and regroup with the others before it's too late.*

## OBJECTIVE

Find the 2 separated survivors and have 2 fuel in the RV.

## SET UP

Shuffle the following tokens face down:

Place 2 face down tokens in each building.

## SPECIAL RULE

When you take a survivor token, immediately add that survivor to your team. Place the survivor's figure in the building in which the token was found. New survivors start with 2 life tokens.

## GAME END

The survivors win if they complete their objective. The survivors lose if 2 or more survivors are dead or if the round marker reaches the skull.

### SET UP

- 2 Anita
- 2 Gabriel
- 2 Thomas
- 2 Kevin

Found survivors start with 2 life points.

### NEW RULES

- Weapons icons
- VS icon
- Survivor icon
- Round marker icon with '3'
- Skull icon with 'x 8'
- Life token icon with '+2'
- Life token icon with '+4'

## NEW RULES

### CROSSROADS

Shuffle the Crossroads cards and place them outside of the city.

When a survivor take a Crossroads token he immediately reveals it and draws a Crossroads card and reads it aloud. The player must execute the effect of the card, if possible.

When a card mentions “the survivor”, the effect applies to the active survivor. When a card mentions “a survivor”, the effect applies to any survivor who matches the conditions listed on the card.

When a crossroad card mentions NEW zombies, those zombies must be taken from the game box, if possible. If more zombies are required than those left in the game box, take zombies from the zombie bin to fulfill the requirement.

For some time now, the group has lived in relative comfort in an established colony. Regular trips into the neighboring cities provided the colony with all the supplies it needed for the group to survive. Until now. Resources have become scarce, and rising tension regarding the group's next move has splintered the group into two. Not only that, the zombies have found a way into the colony. Only one of the groups is driving out of here alive. Now where the heck did we put the keys to the RV?

### OBJECTIVE FOR BOTH GROUPS

Have at least 2 of your survivors, the key, and at least 1 fuel in the RV.

### SET UP

Shuffle the following 9 tokens face down:

Place 2 face down tokens in each of these buildings:  
Gas Station, Grocery, School.

Place 1 face down token in each of these buildings:  
Police Station, Library, Hospital.

### SPECIAL RULE

When taken, the key, fuel, and X tokens are placed face down in survivors' inventories, in order to be kept secret from the opposing team. Crossroads tokens are immediately revealed as normal.

### GAME END

A team of survivors wins if they complete their objective.  
Both teams lose if the round marker reaches the skull.

### SET UP

TEAM A	TEAM B
3 Elijah	3 Anita
3 Gabriel	3 Rosa
3 Mike	3 Kevin
3 Loretta	3 Thomas

### NEW RULES

- Key, Fuel, X tokens
- VS. icon, Skull icon
- RV icon, 3 icon
- Skull icon x10, +2 icon, +3 icon

## STEALING TOKENS

When a survivor falls due to any attack, a face down token may be stolen from their inventory. Identify the standing survivor with free space in their inventory closest to the fallen survivor (within the city or in the same building). That standing survivor may look at one face down token in the fallen figure's inventory before deciding what to do with it.

They may:

- add the token to their own inventory.
- Leave the token in the fallen survivor's inventory.
- remove it from the game if it is an X token.

When a survivor enters the RV, they reveal their face down tokens. If the survivor is holding the key or any fuel, those tokens are immediately removed from the survivor's inventory and placed in the RV (no action is spent to do so).

## NEW RULES

### FIGHT: SURVIVOR VS SURVIVOR

When survivors of opposing teams occupy the same building, a fight breaks out.

#### THE FIGHT

Stage the fight outside of the city limits:

- Place the survivors facing each other, 75-90 cm apart.
- Each survivor chooses the weapon they wish to use during the fight.

The active survivor attacks (flicks their weapon) first.

If an attack causes the opposing survivor to fall:

- The fallen survivor loses 1 life token.
- The player who won the fight flicks the fallen survivor out of the building. Place the survivor behind the building's entrance and flick it out into the city.

If an attack does not cause the opposing survivor to fall:

- The opposing survivor advances one step (the width of a movement disc) forward.
- The opposing survivor attacks.

The players take turns advancing and attacking until one of the two survivors falls.

### USING THE BASEBALL BAT

A survivor that chooses to fight using a baseball bat may only attack once, but may wait to do so. When it is their turn to attack, they may choose to wait or attack.

If a survivor using a baseball bat chooses to wait, the opposing survivor attacks and advances, as normal. If a survivor using a baseball bat chooses to attack, they replace their figure with the baseball bat and flick the bat at the opposing survivor.

If the flicked bat causes the opposing survivor to fall:

- The fallen survivor is flicked from the building, as described above, but **does not lose a life token**.
- If the flicked bat does not cause an opposing survivor to fall, the attacking survivor loses 1 life token, and is flicked from the building by an opposing player.

### 2 VS 1

Survivors belonging to the same team are placed side by side, at least 10 cm apart.

All the above rules apply. Additionally:

- Survivors of the same team use their weapons one after the other.
- The fight continues until only one team remains in the building.

### SURVIVOR(S) VS SURVIVOR VS ZOMBIE(S)

The fight between the two teams is resolved first, as described above. Once the fight is resolved, the remaining survivor(s) fight the zombie(s).

Good luck!

# 7

# CORNERING THE MARKET

2-10 players

This city is well stocked with the tools needed for survival, but it's also infested with zombies! One group got their hands on a stockpile of food, while the other has found a handsome supply of fuel. Not so long ago, the wise idea would've been to band together and pool your resources. But those days are gone. Whichever group can corner the market on either food or fuel will have an easy time of pushing the other out of town.

## OBJECTIVE FOR BOTH GROUPS

**TEAM A:** Have all 3 fuel tokens or all 4 food tokens in the RV at the end of a round.

**TEAM B:** Have all 3 fuel tokens or all 4 food tokens in the gas station at the end of a round.

## SET UP

Mix 10 tokens face down:

Place them face down in the following buildings: 1 at the library, 2 each at the police station, the school and the hospital and 3 at the grocery store!

## GAME END

A team of survivors wins if they complete their objective. If the round marker reaches the skull, the team with the most fuel and/or food tokens in their base wins. In case of a tie, the team whose survivors are holding more fuel and/or food tokens wins.

The main game board is a dark blue map with various buildings and locations. Buildings include: RV, LIBRARY, TRUCK, GROCERY STORE, ICE CREAM TRUCK, HOSPITAL, CAR, SCHOOL, POLICE STATION, and GAS STATION. A green ZOMBIE TOWER is located at the bottom center. Tokens are placed in buildings: 1 token in the library, 2 tokens in the school, hospital, and police station, and 3 tokens in the grocery store. There are also several zombie tokens (green) and key tokens (yellow) scattered across the map.

### SET UP

TEAM A	TEAM B
3 Elijah	3 Gabriel
3 Lily	3 Rosa
3 John	3 Mike
3 Kevin	3 Thomas
3 Olivia	3 Loretta

Power side face up

### NEW RULES

- Weapons: Knife, Shotgun, Rifle, Star
- Items: Fuel, Food, Key
- Round Marker: Skull icon, 3
- Score: Fuel/Food tokens, +1, +4

## NEW RULES

### SPECIAL POWERS

Each survivor has a special power which is active whenever that side of their survivor board is face up.

#### SURVIVOR'S SPECIAL POWER

**ANITA WALLACE:** Anita begins the game with 2 extra actions tokens on her survivor board. She may discard 1 token to take an extra action on her turn.

**ELIJAH JORDAN:** Elijah begins the game with 2 flare tokens on his survivor board. Elijah may spend an action to use a flare.

**GABRIEL DIAZ:** When looking at face down tokens, Gabriel may look at 2 tokens before choosing which of them to take.

**MIKE CHO:** Mike may perform a free move action at the end of his turn. The movement disc is not used. Flick Mike's figure itself, according to the normal move action rules. If Mike falls during this movement, return him to the position he occupied before the flick.

**OLIVIA BROWN:** Olivia may stack 2 medicine tokens on one inventory space. Olivia may also discard 1 medicine token to give 1 life token to a survivor in the same building or NEXT TO her in the city without spending an action. The medicine token used to do so may be discarded from her own inventory or from the inventory belonging to the survivor being healed.

**JOHN PRICE:** If John killed one or more zombies on his turn, he gains a third action to be spent that turn.

**LORETTA CLAY:** Loretta may stack 2 food tokens on one inventory space. Whenever she takes a food token, she may take a second token without spending an action.

### FLARE

The flare draws the attention of nearby zombies. Using a flare costs 1 action. To use a flare, the player places the flare token on their thumb finger (as depicted, face up or down) and flicks it in the direction of their choice.

The flick is successful if its movement ends within the city limits. Return any figures or objects that fall as a result of the flare to standing. If the flick is unsuccessful, remove the flare token from the game.

At the end of a turn in which a survivor successfully used a flare, the zombies' reaction is directed at the flare token instead of the active survivor. After executing the zombies' reaction, remove the flare token from the game.

**IMPORTANT:** At the end of a turn in which a flare was successfully used, the player executes the zombie reaction in the direction of the flare. The type of zombie reaction depends only on which side of the flare faces up (ignore the noises of other actions performed on the same turn).

A big flare creates a **LOUD** noise.

A small flare creates a **QUIET** noise.

If you've learned one thing about fighting other groups of survivors, it's that the more people you have on your side, the stronger you are. Upon entering a new city, you see signs of human life. Perhaps you can persuade more survivors to join your group. But, looking down the road, you see a rival group has found their way here, too. And they don't look like they're willing to share.

### OBJECTIVE FOR BOTH TEAMS

- Control three more survivors than the opposing team at any time
- OR
- Control more survivors than the opposing team when the round marker reaches the skull.

### SET UP

Shuffle these tokens face down:

Remove one at random. Place 1 face down token in each of the buildings not blocked by an X token. Place the remaining 8 face down tokens in a supply outside of the city.

### GAME END

A team of survivors wins if they have at least 3 more survivors than the opposing team. If the round marker reaches the skull, the team with more survivors wins. In case of a tie, play another round.

### SET UP

TEAM A	TEAM B
3 Anita	3 Elijah
3 Rosa	3 Mike
3 Thomas	3 Kevin

Power side face up

### NEW RULES

## Special Rules

### AVAILABLE BUILDINGS

Buildings blocked by an “X” token cannot be entered.

### NEW X TOKENS

Whenever the last survivor in a building exits that building (move action, losing a zombie fight, etc.):

- The active player takes an “X” from the building of their choice and places it in front of that building.
- The active player takes 1 token from the supply outside of the city and places it face down in the building from which the X had been removed.

### NEW SURVIVOR

When a survivor token is revealed, it is placed face up on the same support block. The active player takes an unused survivor board at random, and places it outside of the city (normal side up) with 2 life tokens.

The next survivor to exit the building using a move action (i.e. not ejected after losing a fight) will add the new survivor to their team. Upon exiting the building using a move action, the active player adds the new survivor board to those belonging to their team. Place the new survivor’s figure next to the active survivor, and remove the survivor token from the game.

Rotate the new survivor’s backpack so that it matches the color of the current round.

It's been far too long since you've had a place you could call your own. It's taken weeks of work, but you and the group – your friends – have managed to convert this school into a place you can all stay long term. Home, if you will. But this isn't a world where you can have nice things without others wanting to take them from you. A renegade group likes the look of your new place, but you're not going down without a fight.

## OBJECTIVE

**TEAM A:** Prevent Team B from completing their objective.

**TEAM B:** Control the School by having 1 or more survivors in the building at the end of a round holding at least 2 of the following tokens: food, fuel, medicine.

## SET UP

Separate players into 2 even teams. Each player then chooses 1 survivor to play as in this scenario.

Shuffle these tokens face down:    

Place them face down in the following locations: 4 in the Grocery Store; 2 each in the Police Station, Library, Gas Station, Hospital; 1 on top of each box. Remove the betrayer cards from the secret objective deck. Shuffle the remaining objective cards and create 2 piles: one for each team, with a number of cards equal to the number of players on a team. Shuffle 1 betrayer card into each team's pile. Finally, deal 1 card from a team's pile to each player on that team, and remove the single card remaining in each team's pile from the game.

## GAME END

Team B wins if they complete their objective. Team A wins if the round marker reaches the skull.

**SET UP**

TEAM A	TEAM B
Survivors	Survivors
A	B
	

**NEW RULES**

-    
-   
-  
-   

## NEW RULES

### SECRET OBJECTIVES

Each player has a secret objective. In order for each individual player to win, they must complete the objective on their card AND be on the winning team. Players on the winning team who have not completed their objective have lost.

One of the players might be a betrayer. The betrayer wins if their own team fails to complete their objective (i.e. they want the other team to win).

The active player may spend an action to accuse a player on their team of being the betrayer. After a brief discussion, all players on the team vote thumbs up or down. If there are more thumbs up than thumbs down, the accused player must show their objective card to the rest of their team. Otherwise, nothing happens.

#### **If the accused player IS the betrayer:**

- They are removed from the team. They are now a team unto themselves.
- If the betrayer has more than 1 life token, they lose 1 life token.
- The betrayer's figure is placed fallen. The accused player flicks the figure in the direction their choice.
- The betrayer discards their objective cards and draws a new secret objective from the Betrayer's objective deck. The betrayer must now complete this new objective in order to win.
- The betrayer takes an X token (explained shortly).
- The accusing player flips their survivor board, allowing them access to their special power.

#### **If the accused player is NOT the betrayer: :**

- The accused player discards their objective card and draws a new one.
- The accused player then decides whether to stay with their current clan or to join the opposing clan.

### A-STAY WITH THEIR ORIGINAL CLAN

- If the ACCUSED player has more than 1 life point, they lose 1 life point.
- If the ACCUSING player has more than 1 life point, they lose 1 life point.

### B-JOIN THE OPPOSING CLAN

- The ACCUSED player places their survivor board with those of the opposing team.
- The ACCUSING player flips their survivor board, allowing them access to their special power with his special power.

### THE LONE BETRAYER

The betrayer is a third team that plays third in team order. On their turn, the betrayer may flip their X token to pass their turn. Flip the X token face up at the beginning of each round.

### DEAD AND GONE!

When a survivor has no life tokens left, they are removed from the game, as normal. The player to whom that survivor belonged is also out of the game, as they have nothing left to do.

*It's no use. You've tried time and again to come to some sort of agreement, but there's simply no reasoning with them. And they're not about to leave you alone. It's truly unfortunate that it's come to this. You and the people you now call family will never know peace as long as these rivals of yours continue to draw breath. Only one of you can live in this town now and it's time to find out who that is.*

*Time... for war!*

## MAIN OBJECTIVE FOR BOTH TEAMS

Kill all survivors of the opposing team or have one of your survivors enter the opposing colony while holding 2 fuel tokens.

## SET UP

Players must split up into 2 even teams. Each player then chooses 1 survivor to play as in this scenario.

Mix these 23 tokens face down:

Places face down at each building except the Hospital.

Set the betrayer's secret objective cards aside. Shuffle the remaining secret objective cards and create 2 piles: one for each team, with a number of cards equal to the number of players on a team. Shuffle the betrayer's secret objective cards and add 1 to each team's pile. Each team shuffles their own pile and deals 1 card to each player on their team, removing the remaining card from the game without looking at it.

### SET UP

TEAM A	TEAM B
Survivors	Survivors
A	B

### NEW RULES

--	--

## GAME END

- If one team has no more survivors, the opposing team wins. Congratulations! You've eliminated your rivals.
- A team wins if one of their survivors enters the opposing team's colony holding 2 fuel tokens. Congratulations! You've destroyed your rival's base.

If the round marker reaches the skull, the team with more remaining survivors wins. In case of a tie, play another round.
